

# HERITAGE®

U.S. COIN AUCTION

AUGUST 10, 12 & 14, 2016 | ANA | ANAHEIM

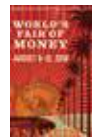

Lot 6351

# U.S. Coins

Featuring: The Hamilton Collection • The Conch Collection • The Palos Verdes Collection, Part II • The Bowler Collection of Morgan Dollars • The Elbert Henry Gary Collection, Part II • The Ray Levoi Collection, Part II • The Collection of Richard W. DeRobertis The Wright Collection, The #3 Finest All-Time PCGS Registry Set of Matte Proof Lincoln Cents • The Commander Collection The Good Karma Collection • The GATOR Collection • The Eagle One Collection, Part III • The Craig and Jeff Lehrer Collection Selections From the Eric P. Newman Numismatic Education Society

August 10, 12 & 14, 2016 | Anaheim

## Signature® Floor Sessions 1-5

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Anaheim Convention Center • Room 213D  
800 West Katella Avenue • Anaheim, CA 92802

### Session 1

Wednesday, August 10 • 12:00 PM PT • Lots 3001–3919

### Session 2 - PLATINUM NIGHT (see separate catalog)

Wednesday, August 10 • 6:00 PM PT • Lots 3920–4441

### Session 3

Friday, August 12 • 9:00 AM PT • Lots 4442–5035

### Session 4

Friday, August 12 • 1:00 PM PT • Lots 5036–5718

### Session 5

Friday, August 12 • 6:00 PM PT • Lots 5719–6356

## Signature® Internet Session 6

(HERITAGELive!®, Internet, Fax, & Mail only Session)

### Session 6

Sunday, August 14 • 12:00 PM CT • Lots 7001-9002

## LOT SETTLEMENT AND PICK-UP

Thursday, August 11 • 10:00 AM – 1:00 PM PT

Friday, August 12 • 10:00 AM – 1:00 PM PT

Saturday, August 13 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: [CREDIT@HA.com](mailto:CREDIT@HA.com)

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

**This auction is subject to a Buyer's Premium of 17.5% (minimum \$19).**

## BIDDING METHODS

### HERITAGE Live!®<sup>1</sup> Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at [HA.com/Live](http://HA.com/Live)

### Live Floor Bidding

Bid in person during the floor sessions.

### Live Telephone Bidding (floor sessions only)

Phone bidding must be arranged on or before

Tuesday, August 9, by 12:00 PM CT.

Client Service: 866-835-3243

### Internet Absentee Bidding

Proxy bidding ends one hour prior to the session start time.

Live Proxy bidding continues through the session.

[HA.com/1238](http://HA.com/1238)

### Fax Bidding

Fax bids must be received on or before Tuesday, August 9, by 12:00 PM CT. Fax: 214-409-1425

### Mail Bidding

Mail bids must be received on or before Tuesday, August 9.

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Cataloged by: Mark Van Winkle, Chief Cataloger, Mark Borckardt, Senior Numismatist; David Stone, Jon Amato, Brian Koller, John Sculley, Zeke Wischer, Jacob Lipson

Dear Bidder:

Welcome to Heritage's Official Auction of the American Numismatic Association Convention and the 2016 World's Fair of Money. Five Heritage floor sessions are scheduled at the ANA's marquis event, including a high-value Platinum Night auction on Wednesday evening, August 10. The remaining floor sessions are scheduled for Wednesday afternoon and Friday morning, afternoon, and evening. An online-only Signature® Internet session follows on Sunday afternoon.

It is hard to imagine a more impressive ANA than the one in the offing. Many coins deserve special mention, although we have room to mention only a few here. For early dollar enthusiasts, not one but two 1794 silver dollars make their appearance. Equally exciting is a 1795 "Double Plug" B-5, BB-27 dollar certified AU53 NGC. This is currently the only known early dollar of any variety with two Mint-inserted, metallurgically confirmed Silver Plugs.

A 1795 Heraldic Eagle five dollar gold piece – the rare BD-14 variety – grades AU58 NGC. The coin is possibly unique in its terminal die state, and it accompanies many other significant gold offerings including 1879 and 1880 Flowing Hair stellars as well as some interesting Territorial gold lots.

We encourage you to take special note of our Featured Collections to help you plan your bids. Our catalog home page on the Heritage website will take you to a link for each Featured Collection, allowing you to view the collections in their entirety for convenient reference and bidding.

## The Hamilton Collection

Early silver type is the focus of this stunning collection, with groups of nice Bust dollars and early quarters, but the main emphasis is half dollars in the Flowing Hair, Draped Bust, Capped Bust, and Reeded Edge formats. Obviously, this is a collection that was formed with the enthusiasm of a collector, the eye of a specialist, and the innate sense of quality of a connoisseur.

The Bust halves in the collection are identified by Overton variety (and Tompkins number, if applicable). Well over 200 Bust half dollars make up the set, and most of the coins are in Mint State grades. A majority of the high-grade pieces rank in the Condition Census for the variety, or very nearly so. The coins remain in their original holders as collected – housed in early generation holders for both PCGS and NGC – and most of the coins display CAC endorsement – including several Gold CAC coins.

The significance of the Hamilton Collection is demonstrated by inclusion of all four Overton varieties of the Draped Bust Small Eagle half dollars dated 1796 or 1797. Over the years, few numismatists have held all four of these varieties in their collection. Five other collections come to mind that have accomplished this challenging feat:

- The A.C. Gies Collection (Stack's, October 1940)
- The Dennis Heller Collection (New England Rare Coin Auctions, January 1982)
- The James Brilliant Collection (Bowers and Merena, January 1992)
- The Jules Reiver Collection (Heritage, January 2006)
- The Bayside New York Collection (Heritage, July 2008)

We are pleased and honored to add The Hamilton Collection to this esteemed list, a sure sign of an advanced collection of special importance. There are coins in The Hamilton Collection for every collector and specialist. None of the coins have been seen at public auction for at least two decades, and many were purchased by private treaty. As a result, most of the highly graded coins are missing from the current Condition Census lists. We expect a host of bidders for the Hamilton lots (Bust half collectors are especially well-known as an avid group) and we have no doubt that every knowledgeable collector will be delighted by the extraordinarily attractive and original coins in the collection.

### The Conch Collection

Lacking only a few extreme rarities, The Conch Collection focuses on early 20th century gold with nearly complete sets of Indian eagles and Saint-Gaudens double eagles in high grades.

Masterfully assembled, the sets display high eye appeal as well as outstanding technical grade for every coin in the collection. The average grade calculates above MS64 for both series, with many coins seemingly on the borderline of an even finer grade in terms of surface quality and eye appeal. Highlights include a 1907 Wire Rim eagle in MS65 PCGS, with just 500 pieces struck as prototypes. A 1914 ten dollar piece in MS67 PCGS qualifies as a hidden condition rarity in the series. In the Saint-Gaudens double eagle set, the 1931 in MS65 PCGS is a classic series rarity, as are the 1920-S, 1921, and 1927-S (all in MS63 PCGS).

### The Palos Verdes Collection, Part II

In many respects, the beginnings of the federal coinage system that exists today can be traced to 1790 and 1791, prior to the official establishment of the Mint in early 1792.

Private individuals such as Peter Getz sought government approval for designs in hope of obtaining a contract to mint coinage for circulation, and the Mint itself issued patterns and coined its first issue in quantity in 1792. This consignment of additional selections from The Palos Verdes Collection embodies the numismatic roots of our federal coinage, with three extremely rare Peter Getz issues including the 1792 Washington President cent, Plain Edge, in XF40, a 1792 Washington silver pattern half dollar (Baker-24) struck over a 1770 Germanic half thaler, and the unique 1796 Washington "dollar" (Baker-33), struck over a Mexican eight reales.

Official Mint issues in the consignment include a rare and attractive 1792 Silver Center cent in SP35 PCGS and a 1792 half dime, Judd-7, XF40 PCGS with pleasing, lightly toned surfaces. A circa 1781 Libertas American Medal (Betts-615, Loubat-14) struck in bronze grades MS60 Brown, the design that served as inspiration for the 1793 C-2 half cent, offered in VF30 PCGS – a scarce single-year type. Three early dollars conclude this important consignment including a pleasing 1794 dollar, the historic first-year Flowing Hair issue graded PCGS Genuine, XF Details.

### The Bowler Collection of Morgan Dollars

The completion of a circulation-strike set of Morgan dollars is challenging but possible. Legions of collectors are dedicated to achieving such a collection, although few are able to center the entire collection around the high grades demonstrated by The Bowler Collection of Morgan Dollars. The circulation strike set is complete including the listed Guide Book varieties.

The majority of coins meet or exceed MS65 in grade, each carefully selected for high-end quality. Other highlights include the 1892-S in MS62, the 1889-CC in MS63+ PCGS CAC (with outstanding aesthetic appeal), and a virtually pristine 1885-CC graded MS67 PCGS CAC. Top 100 and Hot 50 varieties are interspersed throughout the set. A 1903-S Micro S in Choice About Uncirculated joins other notable varieties including an 1899 Micro-O certified

MS62 PCGS, the Shifted Eagle 1901 VAM-3 doubled die reverse graded AU58 PCGS, and an 1890-CC Tail Bar VAM-4 dollar in a MS64 PCGS holder.

### The Elbert Henry Gary Collection, Part II

We are delighted to present additional selections from the collection of Elbert Henry Gary (1846-1927), an American lawyer and county judge who was a key founder of U.S. Steel in 1901 – formed in partnership with J.P. Morgan, Andrew Carnegie, and Charles M. Schwab. The city of Gary, Indiana (his namesake) was founded in 1906 as part of the U.S. Steel enterprise, where Gary served as president and chairman of the board. Some say President Theodore Roosevelt considered Mr. Gary the head of the “steel trust” during Roosevelt’s trust-busting campaign (which Mr. Gary considered a compliment). Somehow, the two men were able to get along.

The current consignment includes important colonial issues as well as early copper, gold, and silver type. Pieces of special note include three 1776 Continental dollar varieties struck in pewter, a 1796 No Stars Capped Bust quarter eagle graded AU53 PCGS, the one-year type 1808 quarter eagle certified AU53+ PCGS, and a high-end 1818 STATESOF half eagle, ideal for type, graded MS63 PCGS CAC.

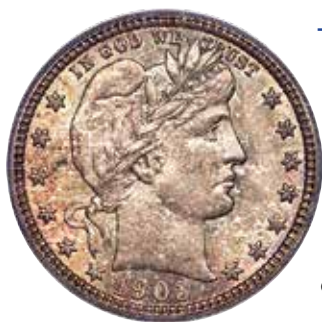

### The Ray Levoi Collection, Part II

Mr. Levoi devoted many years to the pursuit of important, high-grade U.S. coins, and each new specimen was put against the same stringent test for quality. We sold the Ray Levoi Collection of Buffalo nickels at the April, 2014 Central States auction, and we are equally excited to present his collection of Walking Liberty halves at this year’s ANA World’s Fair of Money. The quality of the set is astounding. The collection comprises 59 coins averaging 65.97 in grade with virtually the entire set earning CAC endorsement. To mention just a few highlights, the 1916-S Walker grades MS66 PCGS CAC with remarkable quality. The three key 1921 issues are all Gem or near-Gem with CAC green seals. The 1933-S (pictured here) is certified MS66+ PCGS CAC and it is truly spectacular.

### The Collection of Richard W. DeRobertis

A rare 1795 Small eagle ten in MS61 PCGS highlights a collection that includes only a small number of lots but a large amount of collector appeal and quality. Copper, silver, and gold selections focus on collector-friendly grades and highly desirable varieties, in denominations that range from an 1888/7 cent to a glistening 1939 Doubled Monticello nickel (MS67 PCGS) to an appealing 1795 Flowing Hair dollar graded VF20 NGC).

### The Wright Collection, The #3 Finest All-Time PCGS Registry Set of Matte Proof Lincoln Cents

A short-but-challenging set to build, Matte Proof Lincoln cents are immensely popular with today’s collectors. It was not always so. Collectors were unfamiliar with the matte finish. It is a short set of just nine dates – an achievable collection. Yet assembling a set with the outstanding quality confirmed by its high Registry Set ranking is a considerable achievement. Each issue shows the eye of a discerning specialist. With a set rating of 68.895, the quality is easy to behold but difficult (or impossible) to exceed.

### The Commander Collection

A single coin makes up the consignment, but it will command considerable attention as one of just two 1879 stellas graded in the Superb Gem category by PCGS. This is an immaculate coin, with bright yellow-gold color and reflective fields, housed in a PR67 PCGS Secure holder.

### The Good Karma Collection

We are indeed fortunate to have two outstanding Featured Collections of Walking Liberty half dollars in the auction. The Good Karma Collection is an astutely formed set of Walking Liberty halves in favored collector grades, with both circulation strikes and proofs represented. Examples appear throughout Session 3 (to be held Friday morning of the event), with additional coins in the Signature® Internet session on Sunday, August 14. Many coins grade in the MS66 to MS68 range, with an especially notable 1920-D half of outstanding Gem quality that appears during the Platinum Night session.

### The GATOR Collection

An excellent and numismatically important collection of half dimes – ranging from key circulation strikes to patterns – makes up The GATOR Collection, which focuses on the key varieties and transitional issues that make the series so interesting for collectors. Three 1871 Indian Princess half dime patterns (Judd-1062, Judd-1065, and Judd-1069) are among the patterns offered during Floor Session 5 held on Friday evening. Several attractive early half dimes highlight both Platinum Night and Floor Session 1.

### The Eagle One Collection, Part III

Parts I and II of this fine collection appeared earlier this year and were remarkably well-received as well as actively bid. Part III contains a trio of key date Standing Liberty quarters that lead an all-Platinum Night contingent of additional selections from the well-regarded Eagle One Collection.

### The Craig and Jeff Lehrer Collection

Jeff Lehrer writes: "A little history about our coin collecting. Craig and I began collecting back in the early 60's and we both eventually focused on the buffalo nickel. Decades went by when we stopped collecting while we raised our families. About 15 years ago we both got interested in collecting again. This was inspired by the availability of online auctions and coins. It was a place where you could see what was available nationwide on a daily basis. With Craig living in North Pole, Alaska, this was a godsend for him. His only coin shop was in Fairbanks! Little did we know that the collecting of circulated Buffalo nickels would blossom into the fun of trying to complete a mint state set! Now that we are retired, it's time to pass these coins on. The vast majority of our coins were selected for strike, not grade. We both prefer looking at a well struck MS 62, 63 or 64 than a flatly struck example with a higher numerical grade. These are "cherry-picked" coins we think a meticulous, savvy collector will love. Many of our coins were graded as members of the PCGS collectors club or through NGC with our membership in the ANA. I hope the winners of these coins will appreciate their quality."

### Selections From the Eric P. Newman Numismatic Education Society

We have a special consignment from The Eric P. Newman Numismatic Education Society to headline Session 1 of our Signature floor sessions. Five original, preliminary flying eagle sketches by the hand of famed sculptor Hermon MacNeil will be sold as separate lots at the start of the Standing Liberty quarters portion of the auction. Drawn in early 1916 at his College Point studio during the beginning stages of the Standing Liberty quarter design's development, these sketches are among the few artifacts from MacNeil's studio known to survive that pertain to the Standing Liberty quarter design. These sketches – two of which show the

adopted design, while three others portray proposed designs – were acquired from MacNeil's studio contents after his death 1947, by neighbor John Coughlin. Shortly thereafter they became the possessions of Eric P. Newman, and more recently, they have been a showcase exhibit in the Newman Money Museum. This is their first public offering. The depth of history and numismatic significance of these sketches, direct artifacts of one of the most storied coin design stories in American numismatics, is arguably unparalleled in this sale.

We look forward to seeing you in Anaheim at the ANA! Please be sure to stop by our booth on the bourse, view the Signature and Platinum Night lots on-site, and stay to bid at the auction sessions. If not able to attend in person, please remember that we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® – our proprietary, award-winning online platform.

Good luck with your bids!

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice-President

# SESSION ONE

## COLONIALS

1662 Oak Tree Twopence, AU50  
Small 2, Noe-30, W-240

- 3001** 1662 Oak Tree Twopence, Small 2, AU50 PCGS. CAC. Noe-30, W-240, Salmon 1-A, R.4. An evenly struck steel-gray example. The tree is protected by the design and displays mint luster. The obverse is misaligned 10% toward 7:30. The reverse has intact legends and nearly ideal centering. Wavy near the AN in ENGLAND, but no marks are remotely consequential. Listed on page 40 of the 2017 *Guide Book*. NGC ID# 2ARD, PCGS# 45355 Base PCGS# 17

1662 Oak Tree Twopence, XF40  
Large 2, Noe-33

- 3002** 1662 Oak Tree Twopence, Large 2, XF40 PCGS. Noe-33, W-240, Salmon 1-B, R.5. This dove-gray representative has a sharply defined tree and a well centered reverse. The obverse is moderately misaligned toward 9 o'clock, though only the tops of AS are affected. SE and WE are incompletely struck, and a rim mark at 2 o'clock causes a bulge at 10 o'clock on the reverse. The distinction between Noe-33 and Noe-34 is murky, related to the strength of the horizontal die crack through the date. Salmon (2010) consolidated Noe-32, Noe-33, Noe-33.5, and Noe-34 into a single listing. Whitman (2009) went further and designated all Oak Tree twopence as W-240. Listed on page 40 of the 2017 *Guide Book*. NGC ID# 2ARE, PCGS# 45356 Base PCGS# 17

1662 Oak Tree Twopence, MS61  
Large 2, Noe-34, Ex: Norweb  
Second Finest Known

- 3003** 1662 Oak Tree Twopence, Large 2, MS61 NGC. CAC. Noe-34, W-240, Salmon 1-B, R.5. 12.4 grains. The Norweb catalog stated the present twopence is "among the finest known of the variety." The deep silver-gray surfaces are evenly struck aside from minor blending at the left obverse border. The tree has strong definition. The obverse is misaligned toward 9 o'clock, but all letters are complete. The partial wire rim on both sides is unusual for the Massachusetts series. Described as an early reverse die state in the 1987 Norweb catalog, it is a matter of conjecture whether the present piece is Noe-33 or Noe-34. The varieties are from the same die pair, and distinguished by the strength of the horizontal crack through the first three date digits. This piece is the second finest known of Noe-34 behind the finer Mint State Hain Family coin. Ex: O.B. Windau (1956); *Norweb Collection* (Bowers and Merena, 10/1987), lot 1188; Donald Groves Partrick. NGC ID# 2ARE, PCGS# 45356 Base PCGS# 17

- 3004** 1652 Oak Tree Shilling, IN at Bottom — Damaged — NGC Details. VG. Noe-13, W-520, Salmon 10-G, R.6. 68.8 gn. A silver-gray example with golden-brown high points. A mostly round flan with intact legends. The surfaces are somewhat wavy and exhibit uneven wear, with the GLA in ENGLAND smooth. A crease crosses the obverse through the top of the tree trunk. Most of the tree is bold, and the date and denomination are readable. Listed on page 41 of the 2017 *Guide Book*. NGC ID# 2ARL, PCGS# 45362 Base PCGS# 20

1760 Voce Populi Halfpenny, MS65 Brown  
Zelinka 6-C, Single Finest Certified

- 3005** 1760 Hibernia-Voce Populi Halfpenny MS65 Brown PCGS. N. 9, Z. 6-C, W-1382X, R.1. The Voce Populi farthings and halfpennies were a private issue struck in Ireland. Examples were imported into America, in similar fashion to William Wood's earlier tokens for Ireland, and circulated by weight. Jerry Zelinka's October 1976 article in *The Colonial Newsletter* is the foremost source on the Voce Populi series. This is a well struck chocolate-brown example with exemplary surfaces. Struck a few degrees off center toward 2 o'clock, which due to die rotation affects the bottom of the date. Listed on page 51 of the 2017 *Guide Book*. Population for all Voce Populi halfpennies: 1 in 65 Brown, 0 finer (7/16). NGC ID# 2AUC, PCGS# 262

- 3006 1766 Pitt Halfpenny VF35 PCGS. Betts-519, Breen-251, W-8350, R.3.** The "Great Commoner," William Pitt the Elder, steered legislation through Parliament that ended the Stamp Act, despised by traders on both sides of the Atlantic. He is honored on this halfpenny variety, which has smooth olive-brown surfaces and moderate wear on the cheek of Pitt. Slightly off-center toward 3 o'clock. Listed on page 52 of the 2017 *Guide Book*. NGC ID# 2AUH, PCGS# 236

**1779 Rhode Island Ship Token, MS62 Brown  
No Wreath, Copper, W-1730**

- 3007 1779 Rhode Island Ship Token, No Wreath, Copper, MS62 Brown PCGS. Betts-562, W-1730, R.3.** A British propaganda medal, made to compel the Dutch to remain neutral during the Revolutionary War. The legends extol the occupation of Rhode Island under the command of Admiral Howe. VLUGTENDE has been effaced from the obverse exergue, as seen on all but one medal from the original dies, which were later modified to replace the offending word with an ornament. A chocolate-brown example with minor verdigris and no abrasions. Listed on page 52 of the 2017 *Guide Book*. NGC ID# 2AUL, PCGS# 579

- 3008 1788 Massachusetts Cent, Period, AU50 PCGS. Ryder 10-L, W-6280, High R.2.** A lightly worn chocolate-brown representative with glossy, unmarked surfaces. A few minor flan striations (as made) are present, including a retained lamination at 9 o'clock on the reverse. Listed on page 61 of the 2017 *Guide Book*. NGC ID# 2WNJ, PCGS# 311

**1787 New Jersey Copper  
Satin MS63 Brown, Maris 43-d**

- 3009 1787 New Jersey Copper, Small Planchet, Plain Shield, MS63 Brown PCGS. CAC. M. 43-d, W-5225, R.1.** A curved die crack on the shield aids attribution. This Rahway Mint variety is plentiful, but quality Mint State examples of any New Jersey copper are rare. Glossy medium brown with glimpses of steel-blue on the obverse. Struck a few degrees off center toward 7:30, with a few left-side letters partly off the flan. Impressively devoid of abrasions or carbon. Listed on page 70 of the 2016 *Guide Book*. Population: 6 in 63 Brown, 2 finer (6/16) for all 1787 New Jersey varieties. Ex: *Baltimore Signature* (Heritage, 7/2003), lot 5039; *FUN Signature* (Heritage, 1/2004), lot 5004; *Liberty Collection of American Colonial Coinage, Part Three* (Heritage, 5/2008), lot 1960; *FUN Signature* (1/2012), lot 3985; *New York Signature* (Heritage, 10/2015), lot 3015. NGC ID# AUL8, PCGS# 506

- 3010 1783 Nova Constellation Copper, Pointed Rays, Small US AU53 PCGS. Crosby 2-B, W-1865, R.2.** A medium brown representative with noticeable semiprooflike luster despite moderate wear on the all-seeing eye. No marks are apparent, though a small flan flaw is inside the U in US, and the right obverse margin has a brief curved line from an incomplete punch. Listed on page 56 of the 2017 *Guide Book*. NGC ID# 2AYX, PCGS# 801

- 3011 1785 Nova Constellatio Copper, Pointed Rays, Large Date AU55 PCGS. Crosby 3-B, W-1895, R.2.** A lightly circulated and problem-free medium brown Nova Constellatio copper. An early die state with only minimal die crumbling. The reverse is misaligned a few degrees toward 7 o'clock, but the legends are intact. Listed on page 56 of the 2017 *Guide Book*. From *The Elbert Henry Gary Collection, Part II*. NGC ID# 2AZ3, PCGS# 813

- 3012 1787 Fugio Cent, Club Rays, Rounded Ends, XF40 PCGS. N. 4-E, W-6685, R.3.** A chocolate-brown Fugio copper with light, even wear and an absence of distracting marks or spots. A minor lamination is noted near the MI in MIND. The Club Rays type is conditionally challenging. Listed on page 90 of the 2017 *Guide Book*.

From *The Elbert Henry Gary Collection, Part II*. NGC ID# AX5E, PCGS# 904

- 3013 1787 Fugio Cent, Club Rays, Rounded Ends, XF45 PCGS. N. 3-D, W-6680, R.3.** A charming golden-brown representative. No marks are noticeable, and only the G in FUGIO is lightly defined. The Club Rays type is conditionally challenging, since none emerged from the Bank of New York holdings. Listed on page 90 of the 2017 *Guide Book*. NGC ID# AX5E, PCGS# 904

- 3014 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, XF40 PCGS. N. 13-X, W-6855, R.2.** A lilac-red and olive-brown type representative. The clashed surfaces lack consequential marks. No flan flaws merit mention. The strike is good save for softness near 4:30 on the obverse and opposite at 2 o'clock on the reverse. Listed on page 89 of the 2017 *Guide Book*. From *The Elbert Henry Gary Collection, Part II*. NGC ID# AX5E, PCGS# 883

- 3015 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU50 PCGS. N. 12-X, W-6820, R.3.** Deep steel-blue toning encompasses this unabrased and lightly circulated Fugio copper. Minor to moderate laminations are scattered, with the most apparent near the F in FUGIO. Listed on page 89 of the 2017 *Guide Book*. NGC ID# AX5E, PCGS# 883

**1787 Fugio Cent, MS62 Brown  
N. 8-X, Pointed Rays  
Double Struck in Collar**

- 3016 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays — Double Struck in Collar — MS62 Brown PCGS. N.8-X, W-6750, R.3.** This Fugio cent displays multiple mint errors, though none are listed on the PCGS insert. The reverse is rotated and double struck, most noticeable on the rings and WE ARE ONE and on STATES UNITED. The obverse shows no doubling since it was an anvil die and remained stationary while the hammer (reverse) die rotated between strikes. Both strikes appear off center toward 4 o'clock with an arc of unstruck surface near 9 o'clock. However, the designs are complete aside from the right-side dentils. Finally, a large die lamination affects the obverse legends near 6 o'clock. A smooth tan-brown example likely from the Bank of New York hoard. Listed on page 89 of the 2017 *Guide Book*. NGC ID# AX5E, PCGS# 883

- 3017** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS62 Brown PCGS. N. 11-X, W-6790, R.4. The vertical die crack at 6 o'clock on the reverse identifies the specialist-familiar X Reverse. An unmarked walnut-brown example with moderate incompleteness of strike near 9 o'clock. Rotated double struck; most apparent on FUGIO and the left-side rings. Listed on page 89 of the 2017 *Guide Book*. NGC ID# AX5E, PCGS# 883

**1787 Fugio Cent, MS64 Brown  
STATES UNITED, Pointed Rays  
N. 13-X, 4 Cinquefoils**

- 3018** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS64 Brown PCGS. N. 13-X, W-6855, R.2. A lavender-brown obverse is paired with an olive-green and lilac reverse. The evenly struck and undisturbed surfaces are unabraded and exhibit only trivial flan imperfections. Struck a few degrees off center toward 4 o'clock. The usual die state with obverse clash marks and a vertical crack at 12 o'clock on the reverse. Likely from the Bank of New York hoard. Listed on page 89 of the 2017 *Guide Book*. NGC ID# AX5E, PCGS# 883

**1787 Fugio Cent, MS64 Red and Brown  
N. 13-X, STATES UNITED**

- 3019** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64 Red and Brown NGC. N. 13-X, W-6855, R.2. Substantial brick-red remains on this well struck and lustrous Choice Fugio copper. Fairly close to full Red, although the open fields exhibit glimpses of olive-brown. Marks are essentially absent, but the reverse has a few minor spots. Likely formerly part of the Bank of New York holdings. Listed on page 89 of the 2017 *Guide Book*.  
Ex: Chicago ANA Signature (Heritage, 8/2014), lot 3043, which realized \$5,287.50. NGC ID# 2B8E, PCGS# 884

**1787 Fugio Cent, MS62 Brown  
Newman 8-B, Four Cinquefoils  
UNITED STATES, Pointed Rays**

- 3020** 1787 Fugio Cent, UNITED STATES, Cinquefoils MS62 Brown PCGS. N. 8-B, W-6740, R.3. The medium brown surfaces are well centered, coruscating, and unmarked. The strike is sharp at the centers and shows occasional incompleteness along the borders. Narrow laminations, as made, cross portions of both sides. As often seen for Newman 8-B, the reverse is strongly die clashed. Likely once part of the Bank of New York holdings. Listed on page 89 of the 2017 *Guide Book*.  
From The Elbert Henry Gary Collection, Part II. NGC ID# 2B8F, PCGS# 889

- 3021** 1787 Fugio Cent, STATES UNITED, Eight-Pointed Stars, XF40 PCGS. N. 15-Y, W-6915, R.2. Newman 15-Y is the sole variety with eight-pointed stars instead of cinquefoils within the reverse label. The die marriage becomes elusive in better circulated grades and is uncollectible in Mint State. This walnut-brown example is unblemished aside from a small cigar-shaped flan flaw on the reverse at 5:30. The reverse is slightly misaligned toward 11:30. Listed on page 90 of the 2017 *Guide Book*.  
From The Elbert Henry Gary Collection, Part II. NGC ID# 2B8K, PCGS# 898

**1783 Chalmers Shilling, AU50  
Long Worm Variety, W-1790**

- 3022** 1783 Chalmers Shilling, Long Worm AU50 NGC. Breen-1012, W-1790, R.4. 52.5 grains, 91% silver, 8% copper, per NGC metallurgical tests. Three of the four Chalmers pieces in our November 2014 offering from the Eric P. Newman Numismatic Education Society tested at 91% silver, nearly equal the standard weight of the Spanish milled dollar. Those Spanish coins provided a ready source of silver in the late 18th century. Other examples are reported in the range of 81 to 86% silver

Two Chalmers varieties are identified as the Long Worm and the Short Worm, referring to the length of the vertical worm shared by the two birds. However, an easier attribution feature is the fence (or bar or hedgerow) in relation to the letters. The Long Worm variety has the fence ending at the second I in SHILLING, while the Short Worm variety has the fence ending at the N in SHILLING.

The dies were misaligned in the press, and the obverse is off-center, while the reverse is properly centered. This attractive piece has delicate gold toning on its medium gray surfaces. Listed on page 53 of the 2017 *Guide Book*.

Ex: Eric P. Newman Numismatic Education Society (Heritage, 11/2014), lot 3006. NGC ID# 2AUT, PCGS# 595

**1795 Talbot, Allum & Lee Mule, MS65 Brown  
W-8725, Very Scarce Blofield Cavalry Reverse**

- 3023** 1795 Talbot, Allum & Lee Mule, Blofield Cavalry Reverse, MS65 Brown PCGS. Breen-1051, W-8725, High R.4. Several Talbot, Allum & Lee mule varieties exist, likely made circa 1800 for sale to collectors. The surfaces of this Gem Blofield Cavalry example are exceptionally attractive and free of marks with bluish-brown, glossy patina. Only die-related anomalies are noted, since the Blofield die was broken at the edge between 8 and 10 o'clock and the reverse shows numerous die lines among the military paraphernalia. Lapping of the obverse die resulted in Liberty's disembodied head eerily floating above the shoulders. PCGS lists just a single finer example of this rare muling. PCGS# 969

**1795 Talbot, Allum & Lee Mule, MS66 Brown  
Blofield Cavalry Reverse, W-8725**

- 3024** 1795 Talbot, Allum & Lee Mule, Blofield Cavalry Reverse, MS66 Brown PCGS. CAC. Breen-1051, W-8725, High R.4. A Talbot, Allum & Lee obverse die is muled with an unrelated Blofield Cavalry die, even though the Blofield die had a broken edge between 8 and 10 o'clock. The obverse die was lapped prior to the strike, which separated Liberty's from her shoulders. One of several TAL mule varieties, all probably made for sale to British Conder token collectors. A prooflike and virtually pristine piece with lovely apple-green toning. Glimpses of fire-red linger in design crevices. PCGS# 969

**1796 Myddelton Token in Silver, W-8905  
Rare Relic of a Failed Kentucky Settlement**

- 3025** 1796 Myddelton Token, Silver, PR PCGS Genuine. Breen-1073, W-8905, R.6. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the coin has the details of an Uncirculated proof specimen that has been cleaned, resulting in subdued, silver-gray surfaces with some light hairlines in the fields. Myddelton tokens were struck in silver and bronzed copper in small numbers by the Soho Mint in England. They were issued on behalf of Philip Parry Price Myddelton, who organized an ill-fated plan to settle a large tract of land in Kentucky with English artisans and skilled tradesmen. Perhaps as few as 20 silver pieces survive. Listed on pages 78-79 of the 2017 *Guide Book*. NGC ID# 2B67, PCGS# 649

- 3026** 1783 Washington & Independence Cent, Small Military Bust, Engrailed Edge AU58 PCGS. Baker-4B, W-10150, R.6. This well struck Small Military Bust cent has medium brown toning. Liberty's legs show only a trace of wear, and the fields are lightly abraded. The obverse exhibits several advanced die cracks. Listed on page 81 of the 2017 *Guide Book*. Population: 5 in 58, 3 finer (7/16).  
Ex: *Liberty Collection of United States Colonial Coinage* (Heritage, 1/2008), lot 118, which realized \$1,840. NGC ID# 2B6N, PCGS# 673

- 3027** 1791 Washington Small Eagle Cent AU55 PCGS. Baker-16, W-10630, R.3. A coruscating chocolate-brown example. We note only slight rim nicks at 6 o'clock on the obverse and 2 o'clock on the reverse, and a small spot behind Washington's shoulder. A private pattern issue, struck at the Westwood Mint in Birmingham, England in an attempt to secure an American coinage contract. Listed on page 81 of the 2017 *Guide Book*. NGC ID# 2B73, PCGS# 705

- 3028** Washington Success Medal, Large Size, Reeded Edge, AU55 PCGS. Baker-266, DeWitt-GW-1792-2, W-10915, R.6. The second GE in GEORGE is widely spaced, the pick-up point to distinguish Baker-266 from the similar and more available Baker-265. This green-gold brass token shows softness of strike on the all-seeing eye, usual for the series. Free from marks or flan detractors. Listed on page 86 of the 2017 *Guide Book*. NGC ID# 2VZ7, PCGS# 780

Washington Funeral Urn Medal, AU58  
White Metal, Baker-166C

- 3029 (1800) Washington Funeral Urn Medal, White Metal, AU58 PCGS. Baker-166C, Die Variety 3-D. Newburyport, Massachusetts, engraver Jacob Perkins was the maker for the Funeral Urn medals. These always have small holes near 12 o'clock, as they were intended to be worn at George Washington's February 22, 1800, civic funeral procession, held in Boston. This is a well defined cream-gray representative with a few thin marks above the WO in WORLD and a smoothed area on the reverse field to the upper right of the urn. Designated by PCGS both as AU58 and Tooled - AU Details. PCGS# 410788

## HALF CENTS

- 3030 1793 C-2, B-2, R.3, Poor 1 PCGS. CAC. The broad double leaf below the A in STATES and the forehead curl below the I in LIBERTY combine to confirm the attribution. This half cent has granular medium brown fields and smooth chocolate-brown highpoints. The obverse shows a few light hair-thin marks. A desirable single year and first year type. Our EAC grade Poor 1. NGC ID# 2222, PCGS# 35006 Base PCGS# 1000
- 3031 1793 C-2, B-2, R.3 — Corroded — NCS. Fine Details. The walnut-brown surfaces are granular, but all legends are clear. A thin line on the cheekbone and a rim nick on the reverse at 10 o'clock provide the sole mentionable marks. The introductory half cent type, derived from the Libertas America medal, was struck only in 1793. Our EAC grade VG7. NGC ID# 2222, PCGS# 35006 Base PCGS# 1000
- 3032 1793 C-3, B-3, R.3 — Corrosion — NGC Details. Good. The date and all legends are readable, though occasional letters are indistinct. The deep lavender fields are evenly granular and contrast with lightly toned high points. A few hair-thin marks cross the portrait. Our EAC grade Fair 2.

1794 C-1a, B-1a Half Cent, XF45  
Head High in the Field

- 3033 1794 Normal Head, C-1a, B-1a, R.3, XF45 NGC. The only variety usually encountered with Large Edge Letters. This variety has two immediately recognizable characteristics. The first is the doubled date with the original date crowded along the border, and the second date about 50% above the first. The entire bust was entered high in the obverse field, and the top of the head is close to LIBERTY, and the bust line is far above the date. This attractive piece has minor handling marks expected for the grade, along with lightly granular medium brown surfaces. Our EAC grade VF25. NGC ID# 2223, PCGS# 35018 Base PCGS# 1003

1795 C-6b Half Cent, VF20  
Thick Planchet, 103.70 Grains

- 3034 1795 Plain Edge, No Pole, Thick Planchet, C-6b, B-6b, R.5, VF20 PCGS. 103.70 grains. Although not an official Condition Census, records suggest that there are 48 known examples of the thick planchet 1795 C-6b half cent. Most of those are in lower grades, with just 10 pieces equal or finer than this new discovery. Consigned as a generic 1795 half cent, Brian Koller of our cataloging staff noticed that the planchet appeared visually thicker than others he had examined over the years. The coin was returned to PCGS and they obtained a weight of 103.70 grains, consistent with other thick planchet examples. This piece has smooth reddish chocolate-brown surfaces with minor corrosion noted at 3 o'clock on the obverse. Our EAC grade VG10. PCGS# 35092 Base PCGS# 1018

1797 C-1 Half Cent, AU53  
1 Above 1, Late Die State

- 3035 1797 1 Above 1, C-1, B-1, R.2, AU53 PCGS. Manley Die State 4.0 to 5.0. A late die state with a swollen right obverse field, which in turn causes an indistinct impression on the ICA in AMERICA. The obverse die was nearly shattered from cracks. This deep brown representative is refreshingly unabraded, and the major motifs are nicely struck. The surfaces are microgranular below Liberty's cap. Our EAC grade VF20. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042
- 3036 1804 Spiked Chin, C-8, B-7, R.1, MS62 Brown NGC. Manley Die State 3.0. Golden-brown clings to the design, although the fields and devices are deep brown. Carbon is trivial for the grade, and luster shimmers when the piece is rotated beneath a light. Minute ticks on the portrait are all that limit the grade. Our EAC grade AU55. NGC ID# 222G, PCGS# 35167 Base PCGS# 1075
- 3037 1804 Crosslet 4, No Stems, C-12, B-11, R.2, AU58 PCGS. CAC. A lustrous chocolate-brown half cent with a dash of sea-green below the D in UNITED. Well struck for the variety, which always exhibits partial dentilation. Moderate marks near the chin are evident only upon close evaluation. Our EAC grade AU50. NGC ID# 222F, PCGS# 35173 Base PCGS# 1072
- 3038 1804 Plain 4, No Stems, C-13, B-10, R.1, MS62 Brown PCGS. Manley Die State 2.0. C-13 is the only Plain 4, No Stems die marriage. This satiny example exhibits substantial golden-brown color, although the upper left obverse displays deeper medium brown. Practically unabraded, though we note an unobtrusive retained lamination (as made) on the cheek and right obverse field. Our EAC grade XF45. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

**1804 C-13 Half Cent, MS63 Brown  
Plain 4, No Stems**

- 3039 1804 Plain 4, No Stems, C-13, B-10, R.1, MS63 Brown PCGS.** Ex: Carvin Goodridge Collection. This lustrous olive and steel-brown half cent exhibits considerable traces of original mint red on both sides, along with a few splashes of dark brown toning. Most of the trivial contact marks appear to be remainders from the planchet at the time this example was struck. The surfaces are highly attractive. A late die state, the strike is a trifle weak at the borders, a typical appearance for the variety due to misalignment of the dies. Our EAC grade MS60.

Ex: *Stuart Block Collection (Superior, 2/1992), lot 442; Carvin Goodridge Collection (Goldberg Coins, 9/2012), lot 171.* NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

- 3040 1805 No Stems, C-1, B-1, R.1, AU58 PCGS.** Manley Die State 1.0. Golden-brown luster outlines design elements. The open fields and high points are medium brown. Relatively unabraded, though a strike-through (as made) surrounds the C in CENT. A four-piece variety set of No Stems half cents is surprising affordable in quality condition. Our EAC grade AU50. NGC ID# 222H, PCGS# 35179 Base PCGS# 1081

- 3041 1805 Large 5, Stems, C-4, B-4, R.2, AU55 NGC.** Manley Die State 1.0. The deep mahogany-brown surfaces reveal lavender, powder-blue, and wheat-gold undertones. Free from any consequential contact or carbon. In better grades, C-4 is much scarcer than the No Stems C-1. Our EAC grade XF40.  
Ex: *Denver Signature (Heritage, 8/2006), lot 113, which realized \$920.* NGC ID# 222H, PCGS# 35188 Base PCGS# 1090

- 3042 1806 Small 6, No Stems, C-1, B-3, R.1, MS62 Brown PCGS.** The sea-green, lilac, and chestnut surfaces are well struck, satiny, and minimally abraded. Minor strike-throughs (as made) are noted above HALF, and an unobtrusive spot is on the wreath near the D in UNITED. The 1806 C-1 is the last stand for the Stemless reverse, which previously appeared on 1804 and 1805 varieties. Our EAC grade AU55. NGC ID# 222J, PCGS# 35191 Base PCGS# 1093

- 3043 1808/7 C-2, B-2, R.3, VF25 PCGS.** Manley Die State 1.0. A nicely defined representative of this conditionally rare variety. Lavender, olive-green, and tan-brown shades alternate across both sides. Small to moderate marks include a thin line near the second S in STATES. Our EAC grade Fine 12. NGC ID# 222L, PCGS# 35212 Base PCGS# 1110

- 3044 1811 Close Date, C-2, B-2, Low R.3, VF25 PCGS.** Manley Die State 2.0. A better date half cent with unmarked and moderately granular walnut-brown surfaces. The curls and leaves exhibit wear commensurate with the grade. The normal size of the E in LIBERTY distinguishes C-2 from the even scarcer C-1, which features a large E in LIBERTY. Our EAC grade Fine 15. NGC ID# 222S, PCGS# 35242 Base PCGS# 1135

**1825 C-2, B-2 Half Cent  
Softly Lustrous, MS64 Brown**

- 3045 1825 C-2, B-2, R.1, MS64 Brown PCGS.** Manley Die State 3.0. Variety diagnostics include 25 in the date centered below the curl, and repunching on star 12. The late die state shows a flow line adjacent to the same star, and weakness near the stem. Mahogany and steel-blue hues adorn this Choice half cent. The stars and curls are bold with trivial blending over the hair above ERTY. An incomplete impression characterizes the wreath leaves. Our EAC grade AU55. NGC ID# 222T, PCGS# 35249 Base PCGS# 1141

- 3046 1832 C-1, B-1, R.2, MS64+ Brown PCGS. CAC.** A coruscating near-Gem with walnut-brown and lavender toning. Glimpses of red linger near the stars. The crisply struck surfaces are pleasing despite an unobtrusive spot on the reverse near 1:30. Our EAC grade MS60. NGC ID# 222Y, PCGS# 35273 Base PCGS# 1159

- 3047 1855 C-1, B-1, R.1, MS66 Brown PCGS.** This sharp Premium Gem 1855 half cent displays vibrant mint luster. Substantial copper-red luster remains in the protected regions of the fields, although the patina is weighted slightly toward the Brown pole with olive-brown and faint bluish overtones. Our EAC grade MS62. Population: 5 in 66 Brown, 0 finer (7/16). NGC ID# 26YZ, PCGS# 35333 Base PCGS# 1233

**1855 C-1 Half Cent, MS65 Red**

- 3048 1855 C-1, B-1, R.1, MS65 Red PCGS.** A lustrous peach-gold Gem. Essentially devoid of marks, although the right obverse field displays moderate carbon. The strike is good despite blending on portions of the dentils. A popular type-coin issue. Our EAC grade MS65. Population: 32 in 65 Red, 0 finer (7/16). NGC ID# 26YZ, PCGS# 35335 Base PCGS# 1235

## PROOF HALF CENTS

1842 Half Cent, PR65 Brown  
First Restrike, B-2  
Exceptional Color

- 3049** 1842 First Restrike, B-2, R.6, PR65 Brown PCGS. Small berries in the wreath and doubling on the T in CENT identify the first restrike. All three proof varieties (B-1, B-2, and B-3) are rare but collectible. This precisely struck Gem exhibits magnificent ocean-blue toning throughout both sides. A lint mark (as made) is northeast of the F in HALF, but post-strike imperfections are inconsequential. Our EAC grade PR60. NGC ID# 26Z8, PCGS# 35357 Base PCGS# 1263

1844 Half Cent, PR63 Brown  
Second Restrike, B-3

- 3050** 1844 Restrike, B-3, R.6, PR63 Brown PCGS. Die file marks at the border above RICA identify this as a Second Restrike half cent. With the sole exception of the 1849 Large Date business strikes, all half cents dated in the 1840s are proof-only issues, and they are known by the terms Original, First Restrike, and Second Restrike. This desirable proof is sharply detailed with olive and pale orange surfaces. The fields are moderately mirrored. Our EAC grade PR63. Population: 2 in 63 Brown, 5 finer (6/16).  
Ex: Dallas Signature (Heritage, 10/2009), lot 69. NGC ID# 26ZB, PCGS# 1275

1846 Half Cent, PR64 Brown  
B-3, Second Restrike

- 3051** 1846 Second Restrike PR64 Brown PCGS. CAC. B-3, R.6. Breen-3 is identified by small berries within the wreath and a series of tiny diagonal die lines from the dentils near RICA. The variety was likely struck during the late 1850s, an era of prolific unauthorized proof restrikes that augmented the salaries of the Mint coiners. This prominently mirrored near-Gem displays iridescent sea-green, lilac-red, and peach-gold patina. The strike is sharp except on the hair above the ear. Our EAC grade PR60. NGC ID# 26ZF, PCGS# 1287

1849 Half Cent, PR65 Brown  
B-2, First Restrike

- 3052** 1849 Restrike PR65 Brown PCGS Secure. CAC. B-2, Low R.6. The small berries and doubled T in CENT are characteristic of first restrike half cents. The small date also distinguishes proofs from the 1849 business issue, which has a large date. This desirable Gem has a full strike save for blending on the 8 in the date. The surfaces appear devoid of carbon or contact. The obverse exhibits caramel-gold, lilac-red, and aquamarine toning. The reverse is mostly olive-green but also has a small area of tan patina before the first S in STATES. Our EAC grade PR60. NGC ID# 26ZM, PCGS# 1305

1856 Half Cent in Copper-Nickel  
Judd-177, PR65

- 3053** 1856 Half Cent Pattern, Judd-177, Pollock-205, R.5, PR65 PCGS. Regular die trials striking for the half cent. Struck in copper-nickel with a plain edge. These pieces were an important metallurgical trial striking that tested the proposed alloy for the Flying Eagle cents struck later in this same year. One of only two pattern half cent varieties; the other is Judd-155. Blended apple-green and tan-brown toning blankets unabraded surfaces. Well struck except for the dentils. Certified in an old green label holder. Ex: Orlando FUN Signature (Heritage, 1/2010), lot 3728, which realized \$4,600. NGC ID# 29AV, PCGS# 11777

1856 Half Cent, PR65 Brown  
Exceptional B-1 Example

- 3054** 1856 PR65 Brown PCGS. B-1, R.7 as a Proof. Large rust pit on the I of UNITED. Most proof 1856 half cents are from a different reverse die (B-3) with doubling on CENT and the ribbon. This fully struck Gem offers reflective fields displaying deep ruby-red, orange-gold, olive, and navy-blue tints when rotated beneath a light. Carbon is minimal. Four pinpoint aqua flecks occur on the reverse. Encapsulated in a green label holder. Our EAC grade PR60. Population: 5 in 65 Brown, 0 finer (6/16). NGC ID# 26ZX, PCGS# 1329

## LARGE CENTS

### 1793 S-3 Chain Cent, VF Details

- 3055** 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Corroded — NCS. VF Details. The S-3 Chain cent is a popular variety for date and type collectors as it is much more widely available than any of the other varieties. In fact, it is available about as often as all other varieties combined. The surfaces of this nicely detailed example are lightly corroded. The obverse is reddish-brown and the reverse is steel-brown. Our EAC grade VG10. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

### 1793 Wreath Cent, XF Details Vine and Bars Edge, S-8

- 3056** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — Tooled — PCGS Genuine. XF Details. A loupe reveals wispy pinscratches throughout both sides, and the obverse field is lightly pitted. Two faded thin marks are located between the TY in LIBERTY and on the lower curls. The medium brown surfaces nonetheless retain considerable charm. Luster fills the legends, wreath, and curls. Our EAC grade VF20.  
Ex: Rosemont Signature (Heritage, 8/2013), lot 3045, which realized \$12,925. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

- 3057** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Obverse Fields Tooled, Burnished — ANACS. Fine 12 Details. The right obverse field is lightly smoothed, as is Liberty's jaw. The obverse has been wiped to remove granularity. The reverse is microgranular and shows pitting near AMERICA. This deep brown Wreath cent has generally bold legends, although the fraction is somewhat faint. Our EAC grade Good 5. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

### 1793 Wreath Cent, VF Details S-9, Vine and Bars Edge

- 3058** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Environmental Damage — NCS. VF Details. Breen Die State III. The Wreath cent is a single year type, struck during the first year of regular U.S. Mint operation. The present gunmetal-gray example shows impressive detail throughout. The surfaces are evenly microgranular, but marks are minor, mostly confined to a slight obverse edge knock at 2 o'clock and a single thin obverse line at 8 o'clock. Our EAC grade VG10. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

### 1793 Wreath Cent, XF Sharpness S-9, Vine and Bars Edge

- 3059** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Damage — PCGS Genuine. XF Details. Breen Die State VII with clash marks at the top of the wreath. A nicely detailed and slightly glossy steel-gray Wreath cent. The obverse exhibits dull, straight diagonal lines near 4:30 and 10:30, and on Liberty's neck and above her ear. The reverse is surprisingly devoid of abrasions. Our EAC grade Fine 12. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

### 1793 Wreath Cent, AU Details S-9, Vine and Bars Edge

- 3060** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Tooled — PCGS Genuine. AU. Breen Die State VII-VIII. The reverse die is failing near the R in AMERICA. A richly detailed Wreath cent type coin with lightly to moderately granular dark brown surfaces. The portrait and the obverse field near 3 o'clock display faded pinscratches. Our EAC grade Fine 12. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

**1793 S-16, B-19 Liberty Cap Cent, VG Details  
Second Rarest Sheldon-Numbered 1793 Cap Variety**

- 3061 1793 Liberty Cap — Environmental Damage — NGC Details. VG. S-16, B-19, R.6.** Ex: Mervis Collection. This piece has the sharpness of VG8 with corroded steel and olive-brown surfaces, showing an obverse edge cut at 12 o'clock. Other surface marks and verdigris are lost in the corrosion. The surface quality prevents a determination of the die state. This cent is unlisted in the Bland and Noyes census lists, and ranks about 12th finest known per our EAC grade. The S-16 die marriage is the second rarest Sheldon-numbered 1793 Liberty Cap cent, behind the S-15, and slightly rarer than the S-12. Our EAC grade Good 4.

*Discovered by Walter Breen in 1956; Ray Chatham (via Richard Picker); Abe Kosoff; Admiral Worthington Butler; Abe Kosoff; A-Mark (3/1973); Dr. C.R. Chambers; Ennis; Jack Beymer; Fred Borchardt; Greg Hannigan; Adam Mervis Collection (Heritage, 1/2014), lot 2425.*

**1794 S-24, B-8 Cent, Good 6  
Double Struck on an Incomplete Planchet**

- 3062 1794 Head of 1794, S-24, B-8, R.1 — Double Struck, Curved Clip — Good 6 NGC.** Ex: Mervis Collection. Breen Die State indeterminate but late with reverse swelling. The incomplete planchet has a curved clip at 6 o'clock, and this piece is boldly double struck, with the second strike about 10 degrees off-center. The two strikes are vertically aligned with the date of the second strike above that of the first strike. The gunmetal-gray surfaces are moderately granular. Double struck 1794 cents are rare and seldom available. Our EAC grade Good 6.

*Ex: Goldberg Coins (9/2008), lot 306; Dan Holmes (Goldberg Coins, 9/2010), lot 369; Adam Mervis Large Cent Collection (Heritage, 1/2014), lot 2443.*

- 3063 1794 Head of 1794, S-38, B-25, R.5 — Corroded — ANACS. XF40 Details.** A "Marred Field" variety with a prominent die lump below the base of the cap. The chocolate-brown and sea-green obverse is mildly glossy and moderately granular. The tan-brown reverse is evenly porous. Fairly sharp by the standards of 1794 cents, and without any distracting abrasions. Our EAC grade VG7. NGC ID# 223P, PCGS# 35579 Base PCGS# 901374

**Important 1794 S-47 Cent, AU50  
Condition Census**

- 3064 1794 Head of 1794, S-47, B-39, R.4, AU50 PCGS.** The obverse die is the same die that is found on the iconic Starred Reverse cent. This scarce S-47 die pair has a unique reverse that appears nowhere else in the early cent series. The glossy light chocolate-brown surfaces exhibit a few insignificant contact marks, with a low area near the bottom hair curls. Otherwise, this lovely cent is virtually flawless for the grade. Del Bland grades the coin a conservative VF20 and tied for seventh finest in his list. In our opinion, VF25 and tied for third finest known is appropriate. Our EAC grade VF25.

*Purchased unattributed in a date set at a local household goods auction; Douglas F. Bird (4/2008); Edward F. Leitner (Goldberg Coins, 1/2015), lot 255; Dr. Charles Link. NGC ID# 223P, PCGS# 35606 Base PCGS# 901374*

**1794 S-63, B-37 Cent, XF40  
Distinctive 'Fallen 4' Variety**

- 3065 1794 Head of 1794, S-63, B-37, R.2, XF40 NGC.** The Fallen 4 variety, and an early die state example with a bold shoulder loop and no evidence of clash marks that appear in later states. Pleasing medium olive surfaces exhibit the usual quota of minor surface marks consistent with the grade. A few insignificant rim bruises are evident. Our EAC grade VF20.

*Purchased from Tom Reynolds (7/1988); Phillip Clover (Heritage, 9/2012), lot 3066. NGC ID# 223P, PCGS# 35651 Base PCGS# 901374*

- 3066 1794 No Fraction Bar, S-64, B-50, Low R.5, Fine 12 PCGS.** An early die state with a crack from the rim through the D in UNITED. This is a well-circulated example of the popular No Fraction variety listed in the *Guide Book*. The obverse displays strong definition, while the reverse has clear peripheral elements but lacks detail on the central denomination and fraction. A problem-free chocolate brown example of this rare and curious Sheldon variety. Our EAC grade VG8. NGC ID# 223P, PCGS# 35708 Base PCGS# 911374

**1794 Cent, Choice XF  
Head of 1795, S-70**

- 3067** 1794 Head of 1795, S-70, B-62, R.2, XF45 PCGS. A lovely deep tan-brown example of this collectible die marriage. S-70 is typically attributed by the heavy radial die crack between the TY in LIBERTY. Luster glimmers from the curls and wreath. Marks are essentially confined to a brief thin line above the CE in CENT. Our EAC grade VF30. NGC ID# 223R, PCGS# 35693 Base PCGS# 1365

**1796 Liberty Cap Cent, XF45  
Scarce Sheldon-88**

- 3068** 1796 Liberty Cap, S-88, B-9, R.4, XF45 NGC. A scarce Sheldon variety of this better Liberty Cap date. The hair near the ear shows moderate wear but the remainder of the design is sharp. The blended tan-brown and gunmetal surfaces are impressively free from abrasions, though minor granularity is noted beneath the I in LIBERTY. Our EAC grade VF30.  
Ex: FUN Signature (Heritage, 7/2013), lot 3033, which realized \$12,925. NGC ID# 223V, PCGS# 35771 Base PCGS# 1392

**1796 S-94 Cent, VF Details  
Draped Bust, Reverse of 1797  
Tied for Seventh Finest Known**

- 3069** 1796 Reverse of 1797, S-94, B-30, High R.5 - Altered Surfaces — PCGS Genuine. VF Details. Only slightly more than 30 examples of this rare die pair are known, and they are mostly in low grades. Del Bland lists 13 examples in his condition census, and those coins grade as low as VG10. The remaining couple dozen pieces are even lower grades. The present piece is a wonderful exception. Although the tan, olive, and steel-brown surfaces have microscopic roughness, this piece enjoys outstanding eye appeal. Del Bland grades this piece Fine 12, and tied for the seventh finest known to him. Bill Noyes grades the coin VG10 and tied for ninth finest. We certainly find no disagreement with Del Bland's assessment. Our EAC grade Fine 12.  
Ex: Dan Brown; 1975 EAC (Pine Tree, 2/1975), lot 671; Daryl Mercer (7/1978); Del Bland; Dr. Willard J. Carmel, Jr.; Superior (9/1997), lot 192; Fred Borchardt; Dr. Bruce Reinohl; Terry Denman (5/2/2012). NGC ID# 223W, PCGS# 35843 Base PCGS# 1407

**1796 S-96 Reverse of 1795 Cent, VF Details  
Recently Identified Example**

- 3070** 1796 Reverse of 1795, S-96, B-32, R.6 — Damaged — NGC Details. VF. Ex: Stack's W 57th St Collection. The dappled olive and steel-brown surfaces of this Condition Census cent exhibit moderate porosity at the left side of the obverse, with a nearly vertical cut on the right side of the reverse. The S-96 is one of the classic rarities among the Sheldon numbered varieties, with only about 26 examples known. The finest is a Mint State coin that was recently discovered in England. Second best are two examples that Bill Noyes grades just Fine 12. The present piece was hidden for many years in its New York Collection as an unattributed 1796 large cent. Its identity was revealed to the collecting world when it appeared in an August 2014 auction. While nicely detailed, its net grade may prove controversial due to its unique characteristics. We believe it is tied for 10th finest known. Our EAC grade Good 5.  
Ex: Stack's West 57th Street Collection (Stack's-Bowers, 8/2014), lot 3123. PCGS# 35822 Base PCGS# 1401

- 3071** 1798 Second Hair Style, S-174, B-35, R.2, XF45 PCGS. Breen Die State IV. A well-detailed Choice XF example in a late die state. The usual heavy clash marks are seen on the reverse. Reddish-brown surfaces are mostly smooth, although some granularity is seen in the right obverse field. The portrait has sharply delineated hair curls. Our EAC grade VF25. NGC ID# 2244, PCGS# 36092 Base PCGS# 1434

**1798 S-184, Near-Mint  
Second Hair Style, Smooth Surfaces**

- 3072** 1798 Second Hair Style, S-184, B-45, R.1, AU58 NGC. CAC. An exquisite Borderline Uncirculated example with plentiful luster throughout the curls, legends, and wreath. Mahogany and steel-blue shades endow smooth surfaces. The reverse is clashed but the dies are otherwise perfect. Certified in a former generation holder. Our EAC grade AU50. Census: 3 in 58, 1 finer (5/13).  
*Ex: FUN Signature (Heritage, 7/2013), lot 3034, which realized \$14,100. NGC ID# 2244, PCGS# 36119 Base PCGS# 1434*

**1799 S-189 Cent, Good 4  
Rarest Large Cent Date**

- 3073** 1799 S-189, B-3, R.2, Good 4 PCGS. The top half of the date is bold, and the knobs of the 9s are clear. The remainder of the legends are fairly sharp except for the fraction, the right half of LIBERTY, and the F in OF. The medium brown surfaces are evenly granular. No marks merit mention. The 1799 is key to a date set of large cents. Our EAC grade Good 4. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

**1804 Private Restrike Cent, MS65 Brown  
Struck Circa 1860**

- 3074** 1804 Restrike MS65 Brown PCGS. CAC. This cataloger told the story of the 1804, 1810, and 1823 large cent restrikes at the 1996 ANS Coinage of the Americas Conference. The obverse was originally used for the 1803 S-261 large cent, and the 3 was altered to a 4 in the die. The reverse is from the die for 1820 N-12. These pieces were probably struck in the early 1860s.

Both dies are heavily rusted, and the obverse has arc cracks at the left, with a branch to Liberty's nose. Some evidence of lapping is noted on the obverse. In his Large Cent Encyclopedia, Walter Breen noted that early die states (his Die State 1) have 10° (medal turn) die alignment, and that late die states (his Die State 2) have 190° (coin turn) alignment. This piece has 270° die alignment with the top of the reverse opposite 3 o'clock on the obverse. We have only seen two or three others with similar rotation.

This lovely golden-brown Gem has excellent eye appeal with subtle splashes of mahogany toning. A few scattered surface marks are entirely trivial. Population: 5 in 65 Brown, 7 finer. CAC does not distinguish between original and restrike 1804 cents, but one can assume that the MS64, two MS65, and five MS66 examples are all Restrikes (6/16). Our EAC grade MS62. NGC ID# 224J, PCGS# 45344

**1805 Cent, Choice AU  
Lovely Sheldon-267 Example**

- 3075** 1805 S-267, B-1, R.1, AU55 PCGS. The leaf tips point to the final S in STATES, confirming the Sheldon-267 variety. This attractive Choice AU cent exhibits mixed shades of steel-blue and golden-tan patina, the latter hue dominating the reverse. The impression is bold, though the exposed areas display trace amounts of friction. A lamination occurs below the date with minor roughness to the left of the lowest curls. The only marks of note appear on the bust and near the border across from Liberty's nose. Our EAC grade XF40. NGC ID# 224K, PCGS# 36427 Base PCGS# 1510

**1813 S-292 Cent, Very Fine  
Struck Widely Off Center**

- 3076** 1813 S-292, B-2, R.2 — Struck 40% Off Center — VF20 PCGS. Struck 40% off-center to 1 o'clock, this example shows granularity on the unstruck portion. Both sides exhibit intermingled olive-green and medium brown. Scattered surface marks are only a slight distraction on this important large cent error. Our EAC grade Fine 12.  
Ex: Adam Mervis Large Cent Collection (Heritage, 1/2014), lot 2871, which realized \$3,290. NGC ID# 224X, PCGS# 36511 Base PCGS# 1570

**1817 N-7 13 Stars Cent, XF Details  
Extremely Rare Early Die State  
The 'No Mouse' Stage**

- 3077** 1817 13 Stars, N-7, R.3, Early Die State — Altered Surfaces — PCGS Genuine. XF Details. This extremely important early die state cent is popularly known as the "No Mouse" variety, one of very few that were struck before the small die break joined the top of Liberty's head. That die break, when it is present, resembles a diminutive mouse. However, only about six of these coins are known without the Mouse break. Bill Noyes grades this piece VG10, and the finest of only three that appear in his census. Bob Grellman grades the piece Fine 15, and we agree with his assessment. The dark olive and steel surfaces are somewhat glossy, despite microscopic surface roughness. Faint scratches across Liberty's head are nearly invisible. Specks of light green verdigris appear among the reverse border dentils. Our EAC grade Fine 15.  
Ex: William Amshay (2005 EAC Sale, McCawley & Grellman, 4/2005), lot 311; Daniel W. Holmes, Jr. (Goldberg Coins, 5/2010), lot 41. PCGS# 36568 Base PCGS# 1594

- 3078** 1818 N-7, R.1, MS65 Brown PCGS. CAC. Lustrous and nicely struck with smooth sea-green and chestnut-brown surfaces. Delicate obverse cracks and a funnel-shaped cud over the O in OF attribute the Newcomb variety. Although N-7 is considered common, it is much scarcer in the present quality than, for example, the 1820 N-13. For all 1818 varieties, CAC Population: 4 in 65 Brown, 2 finer (7/16). Our EAC grade MS60. NGC ID# 2253, PCGS# 36619 Base PCGS# 1600

- 3079** 1818 N-10, R.1, MS64 Red and Brown PCGS. CAC. The late die state with a bold die crack across the entire obverse periphery and no reverse dentilation. This Choice Mint State Matron Head type coin shows pumpkin-gold color near design elements, though the fields and devices are mostly brown. A lens reveals faded contact on Liberty's lower cheek and a few scattered flecks. Our EAC grade MS62. NGC ID# 2253, PCGS# 36629 Base PCGS# 1601

**1819 N-4 Cent, AU53  
Low Condition Census**

- 3080** 1819 Small Date, N-4, R.3, AU53 NGC. Ex: Mervis Collection. Peripheral weakness results from radial flowlining on this late die state cent. Steel-brown and olive-green surfaces have hints of mahogany on the obverse. A few trivial ticks are noted, along with microscopic surface granularity. The 1819 N-4 cent is a scarce variety with a low condition census, and this piece likely ranks as the fifth or sixth finest known. Our EAC grade XF40.  
Ex: Adam Mervis Large Cent Collection (Heritage, 1/2014), lot 2051. NGC ID# 2254, PCGS# 36637 Base PCGS# 1606

**1820/19 N-2 Cent, MS63 Brown**

- 3081** 1820/19 N-2, R.2, MS63 Brown NGC. Ex: Mervis Collection. This late die state example has heavy flowlines on both sides, with only partial border details. Small planchet lamination marks are evident on the obverse. Lustrous with blended sea-green and golden-brown surfaces and minor blending on Liberty's forehead curl and lovelock. Our EAC grade AU58.  
Ex: Adam Mervis Large Cent Collection (Heritage, 1/2014), lot 2059. NGC ID# 2257, PCGS# 36682 Base PCGS# 1618

- 3082** 1820 Large Date, N-13, R.1, MS65 Brown PCGS. A beautiful Gem of the popular Randall Hoard variety. The obverse is mostly mahogany-brown and the reverse is principally gunmetal-blue. The high points display lavender-red. The lustrous surfaces are smooth aside from minor contact on the cheekbone. Our EAC grade MS60. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

**1820 N-13 Cent, MS64 Red  
Large Date, Vibrant Mint Color**

- 3083** 1820 Large Date, N-13, R.1, MS64 Red NGC. Although N-13 was a frequent entry within the Grellman Hoard, most Uncirculated examples of the variety are Brown or Red and Brown. Full Red pieces are rare. This nicely struck and lustrous orange-gold Choice cent has a spot near the F in OF but is otherwise extraordinary. The usual die state with bold cracks throughout the obverse periphery. Our EAC grade MS64. PCGS# 36675 Base PCGS# 1617

**1822 N-14 Large Cent, Good Details  
Rare Middle Date Variety**

**3084 1822 N-14, High R.6 — Damaged — NGC Details. Good.** The 1822 N-14 is always an extremely challenging variety for middle date large cent collectors, with just nine pieces known at last count. A damaged and corroded VG example sold in our January, 2014 Orlando FUN Signature Auction of the Adam Mervis Large Cent Collection, lot 2088, which brought over \$5,000.00.

Rich brown patina covers both sides of this important R.7 variety. The damage on the coin is mostly confined to the reverse, where some sizeable dents exist accompanied by areas of spotty corrosion. The obverse shows a few digs and some surface roughness, as well as a bulge from one of the reverse dents. To date, the finest known example is the Wes Rasmussen coin with a grade of Fine 12. Our EAC grade Fair 2.

**3085 1823/2 N-1, R.2, VF30 PCGS.** The 1823/2 N-1 and the 1823 N-2 command attention from collectors as the only U.S. Mint die marriages for the date. An out-of-mint “restrike,” N-3, is also known but less in demand. This medium brown N-1 example displays moderate marks near the first two stars and a gray spot on star 9. Our EAC grade Fine 15. NGC ID# 225B, PCGS# 36760 Base PCGS# 1630

**1825 Cent, Good 4  
Very Rare Newcomb-5  
Unconfirmed Until 2011**

**3086 1825 N-5, R.7, Good 4 PCGS.** Newcomb had never encountered an example of N-5, but listed the variety anyway in his classic 1944 reference, based upon earlier research by Frank Andrews. In 2011, Tom Deck found an example of the previously unconfirmed marriage, which pairs the N-4 obverse and N-10 reverse. Specialists checked their holdings, and a few more 1825 N-5 cents were confirmed. The present piece is the eighth known, and resides in the middle of the Condition Census for the variety. The chocolate-brown surfaces is free from verdigris or spots. Mentionable marks are limited to thin lines near Liberty’s neck and the T in CENT. Our EAC grade Good 4.

*Ex: Pre-Long Beach Auction (Ira & Larry Goldberg, 1/2015), lot 486, which realized \$4,700. PCGS# 522136 Base PCGS# 1642*

**1828 N-5 Cent, Borderline Uncirculated  
100% First Strike Brockage**

**3087 1828 Large Narrow Date, N-5, R.2 — 100% First Strike Obverse Brockage — AU58 PCGS.** The obverse of this cent shows a perfect brockage of the reverse, but the cent can nonetheless be attributed by Newcomb variety due to the spike from the leaf above the O in ONE, repunching on the E in CENT, a delicate die crack connecting the tops of TED, and the base of the E above the M in AMERICA. The reverse die only struck 1828 N-5. A cent stuck to the obverse die, and the obverse of that cent was struck between the present coin and the reverse die. On the brockage side, an arc of raised surface obscures a portion of AMERICA (the cent acting as an obverse die was presumably laminated in that area). The briefly circulated chocolate-brown surfaces are free from any remotely relevant marks or spots. Our EAC grade XF40. *From The Hamilton Collection.*

**1831 N-3 Cent, MS64 Brown  
Medium Letters, Vibrant Luster**

**3088 1831 Medium Letters, N-3, R.1, MS64 Brown PCGS. CAC.** The top of the E in CENT is repunched, a key diagnostic for Newcomb-3. This early die state near-Gem exhibits coruscating golden-brown and olive-green surfaces. Most of the star centers are soft, but the remainder of the strike is bold. Close inspection reveals only incidental marks. An exceptional Matron Head type coin. Our EAC grade MS60. NGC ID# 225M, PCGS# 36997 Base PCGS# 1681

**Double Struck 1831 Cent, MS63 Brown  
Large Letters, N-7**

- 3089** 1831 Large Letters, N-7, R.1 — Double Struck, Second Strike 90% Off Center — MS63 Brown PCGS. The first strike was normal, but the coin was later fed between the dies again, this time 90% off center toward 4:30 relative to the reverse, at 12 o'clock relative to the obverse of the first strike. During the second strike, a planchet (not included) obstructed the obverse die. The letters TATE in STATES are visible on the second strike. Perhaps deliberately saved by the finder due to its unusual out-of-round appearance. Lustrous with golden-brown toning and minor verdigris near the reverse center. Void of contact save for a small mark on the jaw. Our EAC grade AU55.

Ex: *Chicago Central States Signature* (Heritage, 4/2012), lot 3090; *Adam Mervis Large Cent Collection* (Heritage, 1/2014), lot 2153, which realized \$4,700. NGC ID# 225M, PCGS# 36976 Base PCGS# 1678

**1834 N-2 Cent, MS66 Brown  
Usual Die State**

- 3090** 1834 Small 8, Large Stars, Medium Letters, N-2, R.1, MS66 Brown NGC. The usual die state. Beginning in 1834, most large cent dates are much easier to find in Mint State grades than in previous years. Both sides are mahogany-brown and forest-green with vibrant mint luster. Traces of faded mint Red reside in selected protected areas. Our EAC grade MS60.

Ex: *The Joshua Collection* (Heritage, 7/2008), lot 1056; *Adam Mervis Large Cent Collection* (Heritage, 1/2014), lot 2172. NGC ID# 225R, PCGS# 37054 Base PCGS# 1708

**1835 Head of 1836 Cent, MS64+ Brown  
Very Scarce Newcomb-8**

- 3091** 1835 Head of 1836, N-8, R.4, MS64+ Brown PCGS. CAC. A middle die state with a bold radial obverse crack from 6:30 toward the T in LIBERTY. This impressive near-Gem has a mostly Red reverse. The obverse is primarily chocolate-brown but displays fire-red about the stars, date, and LIBERTY. Marks are inconsequential though two spots are noted near the N in UNITED. The present lot is likely the highest-graded N-8 cent to appear in a Heritage auction. Its grade exceeds the Wes Rasmussen example (lot 3644 in our January 2005 FUN Signature), which was certified as MS64 Brown NGC. Our EAC grade MS62. NGC ID# 225S, PCGS# 37060 Base PCGS# 1714

**1839 Large Cent, XF45  
Unknown to Newcomb, Rare N-15 Variety**

- 3092** 1839 Booby Head, N-15, Low R.6, XF45 NGC. Although a recent discovery in the realm of large cent varieties, the N-15 die pairing is well-established as the rarest of the 1839 large cent varieties, and it is among the rarest of all large cents from 1816 to 1839. Our archives reveal just three appearances: the Heritage Auctions January 2005 sale of the Helfenstein coin (Unc Details NCS) and two examples from our Jules Reiver Collection in January 2006, the finer coin being an AU53 NGC example, which realized \$9,200.00. Goldberg's February 2009 sale featured the apparently finest-known example graded MS62 Brown PCGS.

This current representative is a well-detailed and attractive XF45 coin, with smooth, medium brown surfaces. The N-15 diagnostics are clear, with the expected reverse die cracks as described by Noyes and die wear evident on the outer leaves and berries. The obverse die is shared with N-11, and shows the shoulder exposed, long lips with the mouth closed (or nearly so), and star 9 recut at the lowest outer point. Few abrasions are seen for the assigned grade, with two small, identifying marks on Liberty's chin visible with a glass. This is a rare opportunity for an advanced collector to acquire a problem-free and appealing 1839 N-15 cent. Our EAC grade VF30.

Ex: *San Francisco Signature* (Heritage, 3/2014), lot 10020. PCGS# 37258 Base PCGS# 1751

- 3093** 1846 Medium Date, N-11, R.1, AU58 PCGS. CAC. N-11 is the sole die marriage of the Medium Date variety. This tan-brown near-Mint representative displays slight wear on Liberty's ear, but luster emerges from the motifs and legends, and no marks are of any import. The lower reverse has a minor diagonal lamination, as issued. Our EAC grade XF45. NGC ID# 226C, PCGS# 403883 Base PCGS# 1868

- 3094 1847 Large Over Small 47, N-2, R.3, MS62 Brown PCGS.** Grellman Die State a. The top of the 47 in the date is obviously repunched on this early die state example. The chocolate-brown and sea-green surfaces show only incidental contact. The curls above the shoulder and a few of the upper stars are incompletely brought up. Our EAC grade AU55. NGC ID# 226D, PCGS# 37367 Base PCGS# 1880

**1849 N-1 Cent, MS66 Brown  
Middle Die State  
Possibly the Finest Known**

- 3095 1849 N-1, N-15, R.4, MS66 Brown PCGS.** Grellman Die State b, with myriad points and lines visible on the obverse die, and a heavy bar bisecting the O in OF. Thin rim breaks are evident over stars 7, 8, and 9. This piece is clearly finer than any of the three in the Dan Holmes collection, including the piece that was called third finest for the variety. It is equal to, or possibly slightly finer than, the best Naftzger coin that was called finest known. The rich chocolate-brown surfaces exhibit full cartwheel luster with hints of original mint red. Both sides are virtually flawless and show only microscopic spots. An extraordinary 1849 cent. Our EAC grade MS63. PCGS# 405634 Base PCGS# 1886

- 3096 1850 N-7, R.2, MS65 Red and Brown PCGS.** Grellman Die State b. A tiny die lump below Liberty's jaw is the pick-up point for Newcomb-7. A lovely dusky orange-gold Gem. Lustrous and unabraded with a minor spot near star 3. A few star centers are incomplete, but the overall strike is good. Our EAC grade MS63. NGC ID# 226G, PCGS# 405881 Base PCGS# 1890

- 3097 1850 N-9, R.2, MS66 Red and Brown PCGS.** Grellman Die State b. Die lines within the letters of ONE CENT allow prompt attribution of the Newcomb variety. This lustrous and crisply struck Premium Gem is virtually devoid of contact. The reverse is primarily orange-gold, though the portrait and obverse field have mellowed toward steel-gray. Our EAC grade MS64. PCGS# 405884 Base PCGS# 1890

**1851 Cent, Good Details  
Extremely Rare N-44, FS-302**

- 3098 1851 N-44, FS-302, R.7 — Damage — PCGS Genuine. Good Details.** The "Pillowed Die" variety. Apparently, the dies were improperly annealed, and promptly sank as coinage began, likely the reason for the extreme rarity of the die pairing. Specific repunching on the uprights of the 1s in the date is also diagnostic. The medium brown surfaces are occasionally microgranular, and a retained lamination is below the C in CENT. Included with the lot is a J.R. Grellman card, dated 9/26/1994, which describes the present cent as "nicks + flattened slightly, 8+/5." Our EAC grade Good 5. Ex: *American Gold and Silver*, Plaistow, NH, 9/1994; *Joe D'Agostino; Crescent Bay Rarities Collection (Superior, 2/2007)*, lot 254. PCGS# 406787 Base PCGS# 1892

- 3099 1852 N-4, R.1, MS66 Brown PCGS.** Ex: Twin Leaf Collection. Grellman Die State a. Die lines from the obverse dentils between 7 and 8 o'clock identify the initial die state of N-4. The obverse is principally sea-green with glimmers of fire-red. The reverse displays ample orange-red though the high points and open fields are brown. A small tick west of the earlobe serves as an identifier. Among the finest examples of the die marriage. Our EAC grade MS63.

Ex: *Julian Leidman; American Auction Association (Bowers and Ruddy, 11/1972)*, lot 908; *Del Bland; Jerry A. Bobbe; Jack Beymer, 12/1973; Myles Z. Gerson; Stanley Kesselman, 7/1980; Roy E. Naftzger, Jr. (Ira & Larry Goldberg, 9/2009)*, lot 1091; *Twin Leaf Collection (Stack's-Bowers, 7/2015)*, lot 2602. PCGS# 147238 Base PCGS# 1898

- 3100 1852 N-12, N-13, R.1, MS66 Red and Brown PCGS. CAC.** Grellman Die State a. N-12 and N-13 were once thought to be separate die varieties, but they are now recognized as early and late states of a single die pair. This Premium Gem represents the early die state with the 18 in the date repunched, and originally identified as N-12. A lovely example, exhibiting faded orange and chocolate-brown on the obverse, and nearly full light orange on the reverse. Our EAC grade MS63. PCGS# 147261 Base PCGS# 1899

- 3101 1852 N-22, N-9, R.1, MS65 Red and Brown PCGS. CAC.** Grellman Die State d. Groundbreaking late date large cent researcher Howard R. Newcomb mistakenly designated the early (N-22) and late (N-9) die states of this marriage as separate varieties. This lustrous example displays orange-red in design crevices, though the high points and open fields are brown. We note moderate contact on Liberty's jaw and a few small obverse spots. Our EAC grade MS63. PCGS# 147285

- 3102 1854 N-7, R.2, MS66 Brown PCGS.** Grellman Die State b. A magnificent ocean-blue Mature Head type coin. Mint Red lingers in protected areas. Cartwheel luster sweeps virtually contact-free surfaces. The strike is good, and the sole identifiers are a lint mark on Liberty's upper neck and a small depression on the O in ONE. Our EAC grade MS62. PCGS# 406078 Base PCGS# 1904

- 3103 1855 Upright 55, N-1, R.3, MS65+ Brown PCGS. CAC.** Grellman Die State b. A medium brown Gem with traces of brick-red in design crevices. The satiny surfaces show only infrequent and trivial contact. The lower half of the obverse exhibits an orange-peel texture due to die wear, usual for the Newcomb-1 middle to late die state. Our EAC grade MS60. NGC ID# 226M, PCGS# 406145 Base PCGS# 1907

**1855 Large Cent, MS65 Red  
Upright 55, Newcomb-4**

- 3104 1855 Upright 55, N-4, R.1, MS65 Red NGC.** Grellman Die State a. Two die lumps southwest of the earlobe attribute the Newcomb variety. The orange-red surfaces are lustrous and well preserved. The strike is bold except on the star centers. Carbon, contact, and strike-throughs are all inconsequential. Our EAC grade MS65. Census: 31 in 65 Red, 6 finer (6/16). Ex: *FUN Signature (Heritage, 1/2014)*, lot 3375, which realized \$3,055. PCGS# 406155 Base PCGS# 1909

- 3105 1855 Slanted 55, Knob Ear, N-9, R.1, MS65 Brown PCGS.** Grellman Die State f. This example has extensive die crumbling over Liberty's ear, although it is not the latest die state. While outside the Condition Census, far finer than usually seen. Smooth olive-brown surfaces with hints of the initial mint red remaining on both sides. Our EAC grade MS60+.  
Ex: *Craig A. Stevens Registry Collection of Large Cents (Heritage, 4/2006), lot 341, which realized \$2,185. NGC ID# 226M, PCGS# 403958 Base PCGS# 1913*

**1856 N-6 Cent, MS66+ Brown  
Misplaced Digit, Upright 5**

- 3106 1856 Upright 5, N-6, R.1, MS66+ Brown NGC. CAC.** Grellman Die State a, showing a the top of a stray 1 extended from the bust point. In later states that feature disintegrates into a dull lump. This sharply defined piece has lovely reddish-chocolate brown surfaces with faded orange mint luster on the reverse. Our EAC grade MS62. NGC ID# 226N, PCGS# 404588 Base PCGS# 1919

**PROOF LARGE CENTS**

**1855 Cent, PR64 Brown  
N-10, Slanted 55**

- 3107 1855 Slanted 55, N-10, R.5 as Proof, PR64 Brown PCGS. CAC.** A small die gouge from the front of the coronet and a straight die line near the O in OF are the pick-up points for Newcomb-10. 1855 proofs were also struck from N-11 dies. This N-10 specimen is intricately impressed and exhibits seamless, glassy fields. Primarily toned rose-red, although the borders offer sea-green shades, and the portrait is dusky apricot-gold. Our EAC grade PR60. PCGS# 400594 Base PCGS# 1994

**1855 N-11 Cent, PR65 Brown  
Proof-Only Variety**

- 3108 1855 Slanted 55, N-11, R.5, PR65 Brown PCGS.** The die line within the N in ONE confirms the challenging proof variety. A fully struck specimen with prominently reflective fields. The deep brown surfaces reveal pleasing cherry-red, sea-green, and lavender undertones when rotated under a light. As of (6/16), PCGS has certified a total of 27 proof 1855 cents, a mixture of N-10 and N-11. However, only 8 specimens have been certified as 65 or finer: 4 in 65 Brown, 1 in 65 Red and Brown, 1 in 66 Brown, 1 in 66 Red and Brown, and 1 in 66+ Red and Brown. Our EAC grade PR64.  
Ex: *T. James Clarke; Herbert Oechsner; A. Kollar; Superior (5/2005), lot 1049; Franklinton Collection, Part 2 (Stack's, 1/2008), lot 75; Adam Mervis Large Cent Collection (Heritage, 1/2014), lot 2388, which realized \$8,518.75. PCGS# 400597 Base PCGS# 1994*

**FLYING EAGLE CENTS**

- 3109 1857 MS64 PCGS.** The pleasing olive-brown surfaces of this attractive Choice specimen show no mentionable distractions and the design elements are sharply detailed throughout. Although the luster is somewhat dimmed by the patina, it shines through the toning in selected areas. NGC ID# 2276, PCGS# 2016
- 3110 1857 MS64 PCGS. CAC.** The satiny bronze-gold surfaces of this Flying Eagle type coin are free of any naked-eye distractions, and the only mentionable striking weakness is seen lightly on the eagle's tailfeathers and the upper portion of the right wreath branch. A shallow strike-through (as made) is above the E in ONE. NGC ID# 2276, PCGS# 2016
- 3111 1857 MS64 PCGS. CAC.** A sharply struck and lustrous green-gold Choice cent. A lens reveals trivial imperfections, but the eye appeal is considerable. From the "broken wing tip" hub with a faint and disconnected wingtip. NGC ID# 2276, PCGS# 2016

**1857 Flying Eagle Cent, Well-Preserved MS65**

- 3112 1857 MS65 PCGS.** While Gem condition 1857 Flying Eagle cents are generally obtainable for a price, finer-graded certified coins are not: Between NGC and PCGS, about three dozen submissions — likely not all *different coins* — are in higher grades. The medium-tan surfaces on this Gem PCGS coin are nicely preserved with some orange remaining near the rims. One small planchet indent below the tail feathers is consistent with the grade. PCGS reports 17 pieces in MS66 finer (6/16). NGC ID# 2276, PCGS# 2016

**3113 1857 Doubled Die Obverse, Snow-4, FS-101, MS64 PCGS.** The variety is undesignated on the holder, but its characteristics are obvious: strong die doubling on the eagle's eye, the final A in AMERICA, and selected other obverse elements. From the "missing wing tip" hub. A lustrous, unabraded, and boldly struck wheat-brown cent. Each side has a couple of slender vertical laminations, as made. NGC ID# 2276, PCGS# 37378

**3114 1858 Large Letters MS64 PCGS.** High Leaves Reverse. Closed E in ONE. Golden-brown and olive-green toning embraces this satiny Choice cent. The strike is precise except for softness on one of the cotton leaves. Essentially void of contact or carbon, and outstanding for the designated grade. NGC ID# 2277, PCGS# 2019

**3115 1858 Large Letters, Low Leaves, FS-901, MS64 PCGS. CAC.** Closed E in ONE. The Large Letters obverse is usually paired with a High Leaves reverse. This medium brown near-Gem has good luster and a nice strike. The surfaces are free from any distractions. PCGS# 569232 Base PCGS# 2019

**3116 1858 Small Letters MS64 PCGS.** Low Leaves. Close E in ONE. This final-year near-Gem exhibits sea-green, cherry-red, and peach-gold shades. The strike is good, and the coruscating surfaces are refreshingly devoid of marks. The reverse rim displays numerous small die breaks. NGC ID# 2279, PCGS# 2020

## PROOF FLYING EAGLE CENTS

### 1856 Flying Eagle Cent, XF Sharpness

**3117 1856 — Corrosion — NGC Proof Details. XF.** This tan-gold 1856 Flying Eagle cent is notably sharp, considering the XF Details designation from NGC. But moderate corrosion on each side prevents a numeric assignment. Several particularly porous areas prevent confirmation of the die pairing. An affordable example of this key issue.

### 1856 Flying Eagle Cent, Snow-9, AU Details

**3118 1856 Snow-9 — Cleaning — PCGS Proof Genuine. AU Details.** Snow-9, as usual. This sharply detailed 1856 Flying Eagle cent shows areas of gunmetal-blue toning atop otherwise bronze-brown surfaces. The coin is cleaned and has a few marks, but the eye appeal is acceptable for budget-friendly representation of this rare debut small cent. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

## INDIAN CENTS

### 1859 Laurel Wreath Indian Cent, MS65

**3119 1859 MS65 PCGS. CAC.** A satiny tan-gold Gem example of this one-year Laurel Wreath type, showing well-struck design elements and mostly unabraded surfaces. Eye appeal is pleasing. This issue is usually available in MS65 for a price, but finer pieces are genuinely scarce. CAC: 37 in 65, 9 finer (7/16). NGC ID# 227E, PCGS# 2052

**3120 1863 MS65+ NGC.** A sharply struck Gem, this copper-nickel Indian cent exhibits pleasing tan surfaces with satin luster and excellent eye appeal. NGC has only certified 25 finer examples of this issue (6/16). NGC ID# 229D, PCGS# 2067

### 1864 Copper-Nickel Cent, MS66 Snow-5, FS-401, Die Lines at Ear Eagle Eye Photo Seal

**3121 1864 Copper-Nickel, Die Lines at Ear, Snow-5, FS-401, MS66 PCGS Secure.** Eagle Eye Photo Seal card included. The coin has been reholdered and no longer bears an Eagle Eye Photo Seal, but the accompanying Photo Seal card has the same grade and certification ID as the present lot. FS-401 exhibits vertical die polish lines near Liberty's ear. More significantly, the coin is lustrous, fully struck, and nearly pristine with lovely peripheral golden-brown toning. NGC ID# 227K, PCGS# 408760 Base PCGS# 2070

### 1865 Indian Cent, MS66 Red Fancy 5 Date Style

**3122 1865 Fancy 5 MS66 Red PCGS.** The top of the 5 has a distinct curve on the Fancy 5 date logotype. This Premium Gem has fiery-orange mint luster with trivial carbon flecks on each side, but they are nearly invisible without a glass. The design details are bold including full feathers, diamonds, and shield details. Population: 12 in 66 Red, 0 finer (7/16). NGC ID# 227N, PCGS# 2084

**3123 1867 MS64 Red PCGS.** A well-struck, frosty copper-orange example of this conditionally elusive early Indian cent issue. A partial print appears on the upper obverse, but there are no bothersome carbon spots. The surface preservation is excellent for the grade. Population: 75 in 64 (2 in 64+) Red, 26 finer (7/16). NGC ID# 227R, PCGS# 2090

**3124 1870 MS64 Red PCGS.** This sharply detailed Choice Mint State Indian cent exhibits light orange mint luster with a small mark in the left obverse field that prevents a finer grade. Trivial fly specks are present and slight mellowing of the brilliant luster is noted on the obverse. NGC ID# 227U, PCGS# 2099

**1872 Cent, MS64 Red  
In an Old Green Label Holder**

**3125 1872 MS64 Red PCGS.** A remarkably sharp, Choice Mint State example of the 1872 Indian cent, showing smooth, satiny luster and rich copper-orange patina. A few traces of tan-red toning add to the eye appeal and attest to the originality of the surfaces. Seldom seen this fine. Housed in an old green label holder. Population: 46 in 64 Red, 19 finer (7/16). NGC ID# 227W, PCGS# 2105

**3126 1876 MS66 Red and Brown PCGS.** A sharp strike and frosty, copper-gold luster delivers excellent eye appeal on this Premium Gem 1876 Indian cent. The coin is nearly full Red, but traces of auburn toning define the Red and Brown designation. Still, a rarity so well-preserved. Population: 8 in 66 (1 in 66+) Red and Brown, 0 finer (7/16). NGC ID# 2283, PCGS# 2125

**3127 1877 XF45 PCGS.** This low mintage key-date Indian cent enjoys great demand across all grades. This pleasing olive-brown example has a bold LIBERTY, strong feather details, and partially visible diamonds. Both sides exhibit trivial grade-consistent handling marks. NGC ID# 2284, PCGS# 2127

**3128 1877 AU50 PCGS.** Traces of rub appear on the high points of this tan and golden-brown key-date Indian cent. The surfaces exhibit a few handling marks within reason for the assigned grade. NGC ID# 2284, PCGS# 2127

**3129 1877 — Questionable Color — PCGS Genuine. Unc. Details.** Primarily peach-red, though ONE CENT exhibits lavender shades. The satiny surfaces are smooth save for a single hair-thin mark near the F in OF. Shallow N in ONE, usual for business strikes (but not proofs) of this low mintage key. NGC ID# 2284, PCGS# 2127

**1877 Indian Cent, MS62 Brown  
Key Date**

**3130 1877 MS62 Brown PCGS.** Here is a sharply struck, satiny example of this key Indian cent issue, showing burgundy-brown and chocolate surfaces with tiny glimpses of copper-red luster in the crevices. Scattered light surface chatter defines the grade. The 1877 is the biggest key date in the series, and Mint State examples are highly sought-after. NGC ID# 2284, PCGS# 2127

**1877 Indian Cent, MS62 Brown  
Sought-After, Low-Mintage Issue**

**3131 1877 MS62 Brown NGC.** The 1877 Indian cent is the acknowledged key to the series, from a low mintage of 852,500 pieces. This pleasing MS62 specimen offers glossy mahogany brown surfaces that show only minor signs of contact. The design elements are sharply detailed in most areas, with some localized softness on the ribbon and lower curls. Census: 40 in 62 Brown, 69 finer (7/16). NGC ID# 2284, PCGS# 2127

**3132 1879 MS65 Red PCGS.** A sharp, satiny example with luminous copper-red, burnt-orange, and umber-gold coloration. Save for a solitary speck near the final A in AMERICA, the coin appears unblemished. Finer full Red examples are rare. Population: 57 in 65 (1 in 65+) Red, 22 finer (6/16). NGC ID# 2286, PCGS# 2135

**3133 1884 MS67 Red and Brown NGC.** Eagle Eye Photo Seal, card included. A ruby-red Indian is framed by an orange-gold obverse field. The reverse is brick-red. The obverse exhibits cartwheel luster while the reverse is semiprooflike. Certified in a former generation holder. NGC ID# 228B, PCGS# 2149

**1884 Cent, Blazing MS66+ Red  
The Finest Example at NGC**

- 3134 1884 MS66+ Red NGC.** Indian Head cent production dropped by more than half between 1883 and 1884. Rick Snow attributes the decrease to a difficulty in securing planchets. This blazing Red Premium Gem radiates frosty luster over surfaces that display pinpoint definition on the headdress, ribbon, and wreath elements. Clearly high-end for the grade. In fact, this is the finest example at NGC, and a not-to-be-missed opportunity for Registry builders. Census: 11 in 66 (1 in 66+) Red, 0 finer (7/16). NGC ID# 228B, PCGS# 2150

**1888/7 Cent, XF Details  
Snow-1, FS-301  
Indian Cent Key**

- 3135 1888/7 Snow-1, FS-301 — Corrosion — NGC Details. XF.** The rim die break over the E in UNITED is an important diagnostic for the FS-301 1888/7, perhaps the single most valuable variety within the Indian cent series. The base of a 7 is also noticeable below the left bottom of the third 8 in the date. The present example is much sharper than most FS-301 survivors, but the deep brown surfaces are evenly microgranular.

*From The Collection of Richard W. DeRobertis. 18002 STD*

- 3136 1888 MS66 Red and Brown PCGS. CAC.** Reddish-brown and bluish patination covers the lustrous surfaces of this Premium Gem Indian cent. Well-struck design features round out the coin's pleasing eye appeal; just the first three feather tips exhibit the usual weakness. A minor lamination (as made) is located above the space between AM in AMERICA. Population: 2 in 66 Red and Brown, 0 finer. CAC: 2 in 66, 0 finer (6/16). NGC ID# 228G, PCGS# 2167

**1888 Cent, MS66 Red  
Conditionally Rare**

- 3137 1888 MS66 Red PCGS. CAC.** Satiny copper-red luster illuminates sharp design elements and carbon-free surfaces on this Premium Gem 188 Indian cent. Eye appeal is outstanding. This issue is rarely seen so finer. CAC-approved in a green label holder. Population: 15 in 66 (1 in 66+) Red, 1 finer. CAC: 3 in 66 Red, 0 finer (7/16). NGC ID# 228G, PCGS# 2168

- 3138 1891 MS65 Red PCGS.** This frosty, sharp Gem Red 1891 Indian cent displays primarily deep copper-orange color but with lighter gold hues along the left reverse border. Finer examples are rarely seen. Population: 72 in 65 (1 in 65+) Red, 16 finer (7/16). NGC ID# 228K, PCGS# 2180

**1894 Cent, MS66 Red  
Among the Finest at PCGS**

- 3139 1894 MS66 Red PCGS.** Generous luster complements attractive medium orange-red surfaces with no signs of spots on this Gem 1894 Indian cent. The strike is well-impressed, showing four diamonds on the ribbon, although some softness on the forward feather tips is nearly inevitable. Seldom seen finer. Population: 33 in 66 (4 in 66+) Red, 0 finer (6/16). NGC ID# 228N, PCGS# 2189

- 3140 1895 MS66 Red PCGS.** A dull toning spot at the I of AMERICA is the only imperfection on this amazing Premium Gem that exhibits frosty mint luster and rich reddish-orange mint color. Population: 56 in 66 (6 in 66+) Red, 4 finer (7/16). NGC ID# 228P, PCGS# 2192

**1896 Cent, MS66+ Red  
Luminous, Frosty Surfaces**

- 3141 1896 MS66+ Red PCGS. CAC.** The typical Red 1896 cent grades MS64 or lower. In Gem condition the date is scarce, and this MS66+ Red CAC coin is a rarity. The frosty copper-orange surfaces are carbon-free and display boldly struck design elements. Eye appeal is outstanding. Population: 19 in 66 (4 in 66+) Red, 2 finer. CAC: 8 in 66, 1 finer (7/16). NGC ID# 228R, PCGS# 2195

- 3142 1899 MS66 Red NGC.** Eagle Eye Photo Seal, card included. A remarkable type coin that boasts booming luster, a sharp strike, consistent olive-gold color, an absence of contact, and only inconsequential carbon. Census: 53 in 66 (1 in 66+ Red, 1 in 66★), 10 finer (6/16). NGC ID# 228U, PCGS# 2204

**1900 Indian Cent, MS67 Red  
Tied for the Finest Certified**

- 3143 1900 MS67 Red PCGS.** This impressive Superb Gem has rich and frosty orange mint luster with splashes of deeper red toning on the obverse. The strike is bold with virtually full feather tips and sharp diamonds. The shield on the reverse is similarly bold. An exceptional example for an advanced Registry collection. Population: 15 in 67 Red, 0 finer (6/16). NGC ID# 228V, PCGS# 2207

- 3144 1901 MS67 Red and Brown PCGS.** 30th Anniversary Green Label Holder. Vibrant apple-green and orange-red colors endow both sides. More visually impressive than practically any full Red cent. Lustrous and intricately struck with a solitary fleck between the third and fourth headdress tips. NGC ID# 228W, PCGS# 2209

- 3145 1904 MS66+ Red PCGS. CAC.** Full diamonds and feather tips on the obverse, and sharp wreath details and shield on the reverse characterize this frosty Premium Gem that exhibits fiery orange mint luster. Population: 69 in 66 (4 in 66+) Red, 7 finer (7/16). NGC ID# 228Z, PCGS# 2219

- 3146 1906 MS66 Red PCGS. CAC.** The original red surfaces of this impressive Premium Gem are virtually pristine, aside from a small circular planchet flaw under the ribbon bow. The design elements are sharply detailed and overall eye appeal is terrific. Population: 36 in 66 (1 in 66+) Red, 2 finer. CAC: 8 in 66, 1 finer (6/16). NGC ID# 2293, PCGS# 2225

**1908-S Cent, MS66 Red and Brown  
Substantial Copper-Red Color**

- 3147 1908-S MS66 Red and Brown PCGS.** This popular branch mint issue is seldom seen in Premium Gem condition. The present coin shows copper-orange luster beneath a dusting of toning that forms a faint woodgrain pattern. The top three headdress feathers are slightly weak, but the strike is otherwise well-executed. Population: 11 in 66 (1 in 66+) Red and Brown, 0 finer (6/16). NGC ID# 2296, PCGS# 2233

**1909 Indian Cent, MS66+ Red  
Popular Final-Year Issue**

- 3148 1909 MS66+ Red PCGS.** A Plus-graded Premium Gem from the last year of the Indian design, this coin offers well-detailed design elements and impeccably preserved original red surfaces, with vibrant mint luster throughout. Overall eye appeal is terrific. Housed in a new 30th Anniversary green label holder. PCGS has graded 14 numerically finer examples (6/16). NGC ID# 2297, PCGS# 2237

- 3149 1909 MS66 Red PCGS. CAC.** The 1909 Indian Head cent was saved as a final-year type. Survivors can be found through MS66 Red with a little patience, but finer examples are very rare. Copper-orange and rose-gold color adorns each side. Four diamonds are clear, though the feather tips are a little soft. Well-preserved with 14 finer coins at PCGS (7/16). NGC ID# 2297, PCGS# 2237

**1909 Indian Cent, MS66+ Red  
Few Seen Finer**

- 3150 1909 MS66+ Red PCGS. CAC.** A well-struck, high-end Premium Gem example of this final-year Indian cent issue, showing luminous copper-orange luster and carbon-free surfaces. It is difficult to find a grade-limiting flaw, even with a loupe. Eye appeal is outstanding. PCGS has seen 14 Superb Gem submissions finer. CAC: 60 in 66, 1 finer (6/16). NGC ID# 2297, PCGS# 2237

- 3151 1909-S MS64 Red PCGS.** A nicely struck Choice key date cent. The lustrous pumpkin-gold and russet surfaces appear nearly unabraded, though a pair of small flecks approach the I and D in UNITED. Housed in a first generation holder. NGC ID# 2298, PCGS# 2240
- 3152 1909-S MS64 Red PCGS.** This Choice Red 1909-S Indian cent displays frosty golden luster with a trace of woodgrain toning across the obverse and scattered light flecks on the reverse. The top three headdress feathers are slightly soft, as always on this branch mint key. NGC ID# 2298, PCGS# 2240

## PROOF INDIAN CENTS

### 1860 Indian Cent, Sharp PR65

- 3153 1860 PR65 PCGS.** A razor-sharp Gem proof example of this less often seen copper-nickel date. The tan-gold surfaces exhibit mirrored fields but do not warrant a Cameo designation. Hints of pale lavender appear when tilted beneath a light. Finer examples are rarely seen. Population: 41 in 65, 15 finer (7/16). NGC ID# 229A, PCGS# 2253

### 1863 Cent, PR67 Cameo Dazzling Contrast and Eye Appeal

- 3154 1863 PR67 Cameo NGC.** Cameo contrasted proof 1863 Indian cents are elusive in any grade, and Superb Gems are extremely rare. None are so fine at PCGS. This glittering copper-orange example is remarkably close to an Ultra Cameo designation, showing sharp, frosty motifs and liquid-black mirroring in the fields. The contrast is astounding, and the preservation is equally impressive. Census: 3 in 67 Cameo (1 in 67 ★), 0 finer (6/16). NGC ID# 26SX, PCGS# 82262

### 1864 Indian Cent, PR65 Cameo Well-Preserved Copper-Nickel Example

- 3155 1864 Copper Nickel PR65 Cameo PCGS.** From a limited proof mintage of less than 1,000 pieces, struck at the height of the Civil War, this amazing Gem displays razor-sharp design elements with a rich coat of mint frost that contrasts boldly with the deeply reflective fields. The original red surfaces are well-preserved and overall eye appeal is outstanding. Population: 31 in 65 (1 in 65+) Cameo, 8 finer (6/16). NGC ID# 229E, PCGS# 82265
- 3156 1869 PR65 Red and Brown NGC.** Lovely violet, olive, and reddish-orange hues appear over each side of this Gem Red and Brown proof, giving character to the mirrored fields and sharp motifs. Finer coins are elusive. Census: 39 in 65 (2 in 65 ★) Red and Brown, 6 finer (6/16). NGC ID# 229M, PCGS# 2295
- 3157 1872 PR65 Red and Brown PCGS.** Eagle Eye Photo Seal, card included. The fields are dusky orange-gold, and the high points are medium brown. Free from contact, and mentionable carbon is isolated to a fleck above the A in STATES. An intricately struck and flashy Gem. Housed in a green label holder. NGC ID# 229R, PCGS# 2304
- 3158 1874 PR65 Red NGC.** Coppery surfaces show a woodgrain toning pattern over each side of this Gem Red proof cent, one of 700 specimens made at Philadelphia in 1874. The strike is unsurprisingly razor-sharp. Census: 11 in 65 Red, 2 finer (6/16). NGC ID# 229T, PCGS# 2311
- 3159 1876 PR65 Red PCGS.** A predominantly orange-gold Gem, although blushes of cherry-red cross the obverse. The fully struck surfaces appear unabraded and display only minuscule flecks. Certified in a green label holder. Population: 21 in 65 Red, 10 finer (7/16). NGC ID# 229V, PCGS# 2317

### 1877 Cent, PR63 Red and Brown

- 3160 1877 PR63 Red and Brown PCGS. CAC.** Bold N in ONE, characteristic of proofs of this low mintage date. The Indian has lavender toning, while the remainder of the coin exhibits forest-green, rose-red, and orange-gold shades. Fully struck and unabraded with two minor spots near the 1 in the date and the D in UNITED. Certified in a green label holder. NGC ID# 229W, PCGS# 2319
- 3161 1879 PR66 Red and Brown PCGS. CAC.** A sharp Premium Gem proof 1879 Indian cent, showing glimmering fields and satiny motifs. Substantial copper-orange and cherry-red hues underscore some olive-brown wisps of toning that deny a full Red designation from PCGS. Population: 42 in 66 Red and Brown, 9 finer (7/16). NGC ID# 229Y, PCGS# 2325

**3162 1881 PR66 Red and Brown NGC. Snow-PR2.** Pleasing orange-red and apple-green shades alternate across this needle-sharp Premium Gem. Carbon is virtually absent. The portrait is partially lapped, as made. The date is lightly repunched, apparent on the bases of the 1s in the date. Housed in a former generation holder. NGC ID# 22A2, PCGS# 2331

**3163 1881 PR67 Red and Brown NGC.** Vivid violet and crimson-red coloration gives this Superb Gem 1881 proof cent dramatic eye appeal, even showing subtle field-device contrast through the patina. The strike is full, and the fields are deeply mirrored. Census: 8 in 67 (1 in 67 ★) Red and Brown, 1 finer (7/16). NGC ID# 22A2, PCGS# 2331

#### 1885 Indian Cent, PR67+ Brown Exquisite Blue Toning

**3164 1885 PR67+ Brown PCGS.** This Superb Gem proof exhibits vibrant cobalt-blue toning on its mahogany-brown surfaces in combination to form exceptional eye appeal. The strike is nearly full with bold feathers and diamonds on the obverse. The wreath details are sharp and only the shield exhibits slight weakness. Population: 38 in 67 (5 in 67+) Brown, 0 finer (7/16). NGC ID# 22A6, PCGS# 2342

**3165 1886 Type Two PR65 Red and Brown PCGS.** The last feather points to (AMERI)CA. Rick Snow notes this variety is much scarcer than the Type One, about 1,750 coins out of 4,290 proofs struck in 1886. Copper and amber hues color this Gem cent. A couple of small spots occur on the reverse. Population: 16 in 65 Red and Brown, 4 finer (6/16). NGC ID# 22A8, PCGS# 92346

**3166 1886 Variety 2 PR65 Red and Brown PCGS.** A lovely Gem proof with considerable orange mint color and delicate bluish-brown overtones. Minor lint marks are evident on the Indian's cheek. Population: 16 in 65 Red and Brown, 4 finer (6/16). NGC ID# 22A8, PCGS# 92346

**3167 1887 PR66 Red and Brown PCGS.** Eagle Eye Photo Seal, card included. Spectacular cherry-red, forest-green, and orange-gold shades endow both sides. This fully struck and undisturbed Premium Gem is a visual treat for the connoisseur of patinated proof coinage. Encapsulated in a green label holder. NGC ID# 22A9, PCGS# 2349

**3168 1895 PR66 Red and Brown PCGS.** This sharp, almost carbon-free Premium Gem proof displays deep reddish-orange color and reflective fields. A few greenish tints appear when rotated beneath a light, denoting the Brown aspect of the PCGS designation. Population: 20 in 66 Red and Brown, 0 finer (7/16). NGC ID# 22AH, PCGS# 2373

## LINCOLN CENTS

**3169 1909 VDB Doubled Die Obverse, FS-1101, MS65 Red PCGS. CAC.** Die doubling is prominent on the RTY in LIBERTY and the 190 in the date. This lustrous orange and lemon-gold Gem has two blushes of ruby-red on the reverse. Carbon and contact are virtually absent. CAC Population: 7 in 65, 10 finer (7/16). NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425

**3170 1909 VDB Doubled Die Obverse, FS-1102, MS67 Red and Brown PCGS.** The obverse doubling is mostly visible on LIBERTY on this variety. A die chip in the upper loop of the R is diagnostic. This Superb Gem has vibrant cartwheel luster. The obverse has faded orange mint color with violet and blue overtones, while the reverse is mostly brilliant orange with delicate violet toning at the border. NGC ID# 22AZ, PCGS# 37635 Base PCGS# 2424

**3171 1909 VDB Doubled Die Obverse, FS-1102, MS66 Red PCGS.** Extra thickness on the 9s in the date identify the scarce FS-1102 first-year variety. An orange-gold Premium Gem with outstanding color and a bold strike. The lustrous surfaces display only infrequent and minute imperfections. Population: 17 in 66 (2 in 66+) Red, 2 finer (6/16).

*Ex: Long Beach Signature (Heritage, 6/2011), lot 3095, which realized \$1,267.30. NGC ID# 22AZ, PCGS# 37636 Base PCGS# 2425*

**3172 1909-S VDB MS64 Red and Brown PCGS.** Impressively well preserved for the grade, this olive-gold Choice 1909-S VDB Lincoln cent displays a bold strike and satiny mint luster. Wisps of reddish-brown and mint-green color appear on each side. An outstanding collector-grade example of this first-year key. NGC ID# 22B2, PCGS# 2427

**3173 1909-S VDB MS64 Red and Brown PCGS.** The obverse exhibits attractively blended gold and reddish-brown patina on its satin surface, while the reverse is mostly brilliant gold with streaks of light brown toning. An important and popular Lincoln cent issue with the distinctive appearance typical of the San Francisco Mint in 1909. NGC ID# 22B2, PCGS# 2427

**3174 1909-S VDB MS64 Red PCGS.** This frosty and highly lustrous Lincoln cent key exhibits brilliant orange mint color and trivial carbon flecks that prevent a higher grade. Both sides feature bold design definition. NGC ID# 22B2, PCGS# 2428

**3175 1909-S VDB MS64+ Red NGC.** A boldly detailed example of this highly popular issue, a key to the Lincoln cent series. This example has rich reddish-orange luster and a few minuscule reverse marks that prevent a full Gem grade assessment. NGC ID# 22B2, PCGS# 2428

#### 1909-S VDB Lincoln Cent, MS65 Red Gorgeous Luster

**3176 1909-S VDB MS65 Red PCGS Secure.** Glowing fire-orange hues abound on the frosty surfaces of this Gem Red 1909-S VDB Lincoln cent. The strike is full, and the surfaces are devoid of distracting abrasions. A few faint, scattered flecks on the reverse do not affect the eye appeal. A thoroughly appealing coin and one that pretty much dissolves any need to consider a higher-grade piece. NGC ID# 22B2, PCGS# 2428

**3177 1909-S MS65 Red PCGS.** This lustrous first-year San Francisco Gem is mostly yellow-gold, but the lower reverse has orange shadings. Boldly struck and unabraded with a small spot near the D in GOD. A better date in the finer full Red grades.

*Ex: Long Beach Signature (Heritage, 6/2001), lot 7666; Houston Signature (Heritage, 11/2007), lot 60123. NGC ID# 22B4, PCGS# 2434*

**3178 1909-S MS65 Red PCGS.** A popular transitional issue representing the debut of the Lincoln cent design. This fully lustrous Gem has rich golden mint surfaces and bold design details, enjoying excellent eye appeal. Scattered carbon flecks on each side are only visible with a glass. NGC ID# 22B4, PCGS# 2434

**3179 1909-S MS65 Red PCGS. CAC.** Apricot-gold and lime-green endow this highly lustrous and well struck Gem. Imperfections are limited to a trio of small tan freckles at 7:30. Among the lowest mintage Lincoln cent issues, and further bolstered by its first-year status. Certified in a green label holder. NGC ID# 22B4, PCGS# 2434

**1909-S Lincoln Cent, MS66 Red  
Incredible Color and Luster**

**3180 1909-S MS66 Red PCGS. CAC.** A gorgeous orange-red Premium Gem of this popular low mintage issue. The design elements are well struck, and a splash of lilac is seen on the upper reverse. Lustrous surfaces display a pebbly-like texture, especially on the reverse. A couple of light inoffensive flecks are noted on each side. The 1909-S has a reputation for being well made, and a number of pieces were set aside, yet PCGS (as of 6/16), has only certified six MS67 Red examples finer.

*Ex: FUN Signature (Heritage, 1/2006), lot 143. NGC ID# 22B4, PCGS# 2434*

**3181 1910-S MS66 Red PCGS. CAC.** Fiery-orange color dominates this amazing Premium Gem cent with a blush of copper patina over the right portion of the reverse. Strongly struck and undeniably high-end for the MS66 assessment. PCGS has graded 89 coins in MS66 Red, with three in 66+ Red, and four finer (6/16). NGC ID# 22B6, PCGS# 2440

**1911-D Cent, MS66 Red  
Only One Coin Finer at PCGS**

**3182 1911-D MS66 Red PCGS.** Struck from worn dies with a mild counterclockwise rotation of the reverse. This Premium Gem Red 1911-D Lincoln cent displays pleasing detail and is free of carbon spotting. The issue is scarce so well-preserved, and finer examples are prohibitively rare. Population: 54 in 66 (5 in 66+) Red, 1 finer (6/16). NGC ID# 22B8, PCGS# 2446

**1911-D Cent, MS66 Red  
Elusive in High Grade**

**3183 1911-D MS66 Red PCGS.** Frosty, luminous mint luster rolls over copper-orange surfaces on this Premium Gem 1911-D Lincoln cent. Die erosion in the fields slightly softens the strike sharpness, but the design definition is still pleasing. This issue is seldom seen so fine, and finer pieces are prohibitively rare. PCGS has certified 49 coins in MS66 Red, with five in 66+ Red, and a single coin finer (6/16). NGC ID# 22B8, PCGS# 2446

**1911-D Lincoln Cent, MS66 Red  
Only One Numerically Finer at PCGS**

**3184 1911-D MS66 Red PCGS.** The original red surfaces of this delightful Premium Gem are impeccably preserved and radiate vibrant mint luster on both sides. Razor-sharp definition is evident on all design elements and overall eye appeal is outstanding. Early Lincoln cents are quite elusive at this exalted grade level. Population: 54 in 66 (5 in 66+) Red, 1 finer (6/16). NGC ID# 22B8, PCGS# 2446

**3185 1911-D MS66 Red PCGS.** Both sides of this important Lincoln cent issue exhibit brilliant and highly lustrous orange surfaces. Despite a weak mintmark, all design elements on both sides are boldly defined. An absolutely splendid Premium Gem representative. Population: 54 in 66 (5 in 66+) Red, 1 finer (7/16). NGC ID# 22B8, PCGS# 2446

**3186 1911-S MS65 Red PCGS. CAC.** The 1911-S is a highly regarded early branch mint conditional rarity. A lustrous orange-gold example with essentially mark-free surfaces. Flecks are scattered east of the left wheat ear and below AMERICA. Certified in an old green label holder. CAC Population: 2 in 65 Red, 2 finer (7/16). NGC ID# 22B9, PCGS# 2449

**3187 1913 MS66 Red PCGS.** The 1913 is an issue that is scarce in the finer full Red grades, as this Premium Gem example demonstrates. The strike is sharp, and each side displays satiny copper-orange luster. Finer examples are rarely seen. Population: 79 in 66 (1 in 66+) Red, 9 finer (6/16). NGC ID# 22BD, PCGS# 2461

**1913-D Cent, MS66 Red  
Sharp Top-Grade Registry Coin**

**3188 1913-D MS66 Red PCGS.** Bright copper-orange luster defines the Red color designation of this Premium Gem 1913-D Lincoln cent. The O in ONE is poorly defined as usual, but the obverse is sharp. This satiny coin is conditionally rare and ranks among the finest certified. Population: 19 in 66 (2 in 66+) Red, 0 finer (6/16). NGC ID# 22BE, PCGS# 2464

**3189 1913-S MS65 Red and Brown PCGS.** This early series Gem shows well-preserved surfaces, with a mix of original red and light brown patina. The design elements display razor-sharp definition throughout and satiny mint luster shines through the toning. Population: 40 in 65 Red and Brown, 0 finer (6/16). NGC ID# 22BF, PCGS# 2466

**1914-D Cent, MS64 Brown  
Some Red Luster Remains**

**3190 1914-D MS64 Brown PCGS. CAC.** Burgundy and chocolate-brown overtones appear atop satiny surfaces on this Choice Brown 1914-D Lincoln cent. Noticeable tinges of copper-red luster remain in the protected regions, but the colors are weighted toward brown. This key date representative displays pleasing eye appeal for the grade. Population: 56 in 64 (1 in 64+) Brown, 16 finer (6/16). NGC ID# 84BX, PCGS# 2471

**1914-D Cent, MS64 Red and Brown  
Even Coloration**

**3191 1914-D MS64 Red and Brown PCGS.** A satiny Choice Mint State example of this key Denver issue, showing well-blended copper-red and auburn-brown patina. Scattered flecks are not out of line for the grade. This 1914-D Lincoln cent is well-struck and shows no distinctive abrasions. Finer Red and Brown coins are elusive. NGC ID# 22BH, PCGS# 2472

**1915-S Lincoln Cent, MS65 Red and Brown  
Among the Finest Certified at PCGS**

**3192 1915-S MS65 Red and Brown PCGS.** The original red surfaces of this early series Lincoln cent have mellowed to light brown in a few places but no mentionable distractions are evident and there is no trace of carbon. The design elements are sharply detailed and vibrant mint luster enhances the terrific eye appeal. Population: 24 in 65 Red and Brown, 0 finer (7/16). NGC ID# 22BM, PCGS# 2484

**1915-S Cent, MS65 Red and Brown  
Well-Balanced Color**

**3193 1915-S MS65 Red and Brown PCGS.** A conditionally scarce coin and among the finest Red and Brown examples at PCGS. This Gem 1915-S Lincoln cent displays a bold strike and glossy surfaces. Coppery-orange mint luster shines through burgundy, olive, and violet toning on each side. Population: 24 in 65 Red and Brown, 0 finer (6/16). NGC ID# 22BM, PCGS# 2484

**1915-S Cent, MS65 Red and Brown  
High-End for the Issue**

**3194 1915-S MS65 Red and Brown PCGS. CAC.** High-grade examples of the 1915-S cent with significant mint red remaining are scarce. This Gem is among the finest Red and Brown coins at PCGS and displays considerably more red than brown color. The surfaces are satiny and exhibit bold design elements. A few tiny specks do not detract. Population: 24 in 65 Red and Brown, 0 finer. CAC: 6 in 65 Red and Brown, 0 finer (7/16). NGC ID# 22BM, PCGS# 2484

**3195 1916-D MS65 Red PCGS.** The coppery-gold surfaces of this Gem exhibit sharply struck design elements, including Lincoln's hair, beard, and bow tie and the wheat lines and grains. This piece yields fantastic technical quality and aesthetic appeal. A trivial scrape on the lower reverse is all that prevents an even finer grade. Population: 65 in 65 (2 in 65+) Red, 18 finer (6/16). NGC ID# 22BP, PCGS# 2491

- 3196 1917-S MS65 Red and Brown PCGS.** The original red surfaces of this attractive Gem have mellowed to light brown in a few areas, but no mentionable distractions are evident. The design elements are sharply detailed and both sides radiate vibrant mint luster. Population: 52 in 65 (1 in 65+) Red and Brown, 0 finer (6/16). NGC ID# 22BU, PCGS# 2502

**1918 Cent, MS67 Red  
Sharp and Eye-Appealing**

- 3197 1918 MS67 Red PCGS.** Glistening mint luster adorns each side of this fully struck Superb Gem 1918 Lincoln cent. Save for a couple of faint, linear planchet laminations in the left obverse field, the coin appears flawless, and the copper-orange surfaces just glow beneath a light. A visually finer example will be almost impossible to locate. Population: 33 in 67 (4 in 67+) Red, 1 finer (6/16). NGC ID# 22BV, PCGS# 2506

**1918 Cent, MS67 Red  
Registry-Grade Rarity**

- 3198 1918 MS67 Red PCGS.** This is a well-detailed example, showing luminous copper-orange luster and frosty surfaces. Extensive metal flowlines in the fields denote a late die state. This Philadelphia issue is rarely seen so fine, and only a single higher-grade coin is known. Population: 33 in 67 (4 in 67+) Red, 1 finer (6/16). NGC ID# 22BV, PCGS# 2506
- 3199 1922 No D, Strong Reverse, FS-401, XF40 PCGS.** Die Pair 2. A medium brown representative of the *Guide Book* key date. The omission of cent production at Philadelphia in 1922 ensures eternal demand for this rare variety, in which the Denver mintmark was completely lapped from the obverse die late in its life. Small obverse marks are distributed. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285
- 3200 1922 No D, Strong Reverse, FS-401, XF40 PCGS. CAC.** Die Pair 2. TRUST and the second 2 in the date are bold, diagnostic for this key Lincoln variety. The chocolate-brown surfaces are lightly abraded and devoid of distractions. The lines in the wheat ears are distinct. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1922 No D Cent, MS63 Brown  
Die Pair 3, Weak Reverse**

- 3201 1922 Weak Reverse MS63 Brown PCGS.** Die Pair 3. Although designated as Brown, glimpses of bright gold color outline portions of the design. A ghost of the mintmark is noted below the first 2 in the date. The reverse border is blurry, as is diagnostic for the Weak Reverse variety, but the only noticeable contact is a tick on Lincoln's coat. Not as coveted as the Strong Reverse Die Pair #2, but an important find in Select Mint State. Population: 6 in 63 Brown, 0 finer (6/16).  
*Ex: The Barry Donnell Collection / Long Beach Signature (Heritage, 6/2004), lot 5322.* NGC ID# 2U6G, PCGS# 2540

- 3202 1923 MS67 Red PCGS.** 30th Anniversary Green Label Holder. Dazzling mint luster just radiates from mint-fresh surfaces on each side of this Superb Gem Red 1923 Lincoln cent. A bright yellow-gold interior on the obverse cedes to mint and lemon hues near the borders, while the reverse has a deeper orange-gold center. The strike is sharp, and eye appeal is superb. Population: 18 in 67 (2 in 67+) Red, 2 finer (6/16). NGC ID# 22CA, PCGS# 2545

**1923-S Cent, MS64+ Red  
Elusive in Full Red Condition**

- 3203 1923-S MS64+ Red PCGS.** A conditionally elusive, Plus-graded near-Gem example of this better San Francisco issue. The coin is struck from severely worn dies, as is typical of the date, which produces soft details on the relief elements. Each side displays satiny copper-red luster with a few unobtrusive flecks. Population: 67 in 64 (1 in 64+) Red, 17 finer (7/16). NGC ID# 22CB, PCGS# 2548
- 3204 1925 MS67+ Red PCGS.** This Plus-graded Superb Gem Red 1925 Lincoln cent is within the realm of Registry-grade coins, as only a single piece is finer at either service. The strike is sharp, and each side displays carbon-free, satiny luster. Population: 72 in 67 (4 in 67+) Red, 1 finer (7/16). NGC ID# 22CF, PCGS# 2560
- 3205 1925-D MS66 Brown PCGS.** Exceptionally smooth surfaces endow this Premium Gem that displays even brown toning over each side. Well struck design elements round out the coin's outstanding eye appeal. This piece is one of the three finest known. Population: 2 in 66 Brown, 0 finer (6/16). NGC ID# 22CG, PCGS# 2561

**1926-S Cent, MS64 Red  
Major Condition Rarity**

- 3206 1926-S MS64 Red PCGS. CAC.** This S-mint issue is among the most challenging of all Lincoln cents to locate in high grade with Red surfaces. A CAC-approved MS64 Red example is effectively the finest a collector could hope to obtain, as Gems have crossed the six-figure price threshold on multiple occasions. This copper-gold condition rarity boasts glistening luster over minimally marked surfaces. Typically struck with areas of softness on the portrait, O in ONE, and right wheat stalks. PCGS shows two finer grading events (6/16). NGC ID# 22CL, PCGS# 2575

- 3207 1927-D MS66 Red and Brown PCGS.** The impeccably preserved surfaces of this delightful Premium Gem exhibit a mix of original red and light brown patina, with well-detailed design elements and vibrant mint luster underneath. Population: 5 in 66 Red and Brown, 0 finer (6/16). NGC ID# 22CN, PCGS# 2580

**1928 Cent, MS67+ Red  
Registry-Grade Example**

- 3208 1928 MS67+ Red PCGS.** This Plus-graded Registry coin is tied for the finest 1928 Lincoln cent certified. The coin is boldly struck with frosty copper-red luster that is devoid of abrasions. No carbon spotting is seen, and the eye appeal is outstanding. Superb Gems are scarce, and Plus-designated pieces are rare. Population: 72 in 67 (7 in 67+) Red, 0 finer (7/16). NGC ID# 22CR, PCGS# 2587

**1928-S Cent, MS65+ Red  
Sharp and Appealing**

- 3209 1928-S MS65+ Red PCGS. CAC.** A razor-sharp, high-end Gem Red example of this conditionally elusive San Francisco issue, showing luminous surfaces and only a few tiny specks. Eye appeal exceeds expectations for the issue. The 1928-S is a scarce issue in Gem Red condition, and finer pieces are exceedingly rare. Population: 57 in 65 (6 in 65+) Red, 5 finer. CAC: 4 in 65 Red, none finer (7/16). NGC ID# 22CT, PCGS# 2593

- 3210 1929 MS67 Red PCGS.** Curiously, there were significant numbers of 1929 cents set aside, even though this was the first year of the Great Depression. This example displays pale yellow tinged red color overall with an arc of lilac on the right and lower portions of the rim on the obverse. Population: 68 in 67 (5 in 67+) Red, 0 finer (7/16). NGC ID# 22CU, PCGS# 2596

**1929 Lincoln Cent, MS67+ Red  
None Certified Finer**

- 3211 1929 MS67+ Red PCGS.** A Plus-graded Superb Gem with sharply detailed design elements and brightly lustrous original red surfaces that show a few hints of lilac. No mentionable distractions are evident and eye appeal is tremendous. Housed in a new 30th Anniversary green label holder. Population: 65 in 67 (5 in 67+) Red, 0 finer (6/16). NGC ID# 22CU, PCGS# 2596

**1931 Cent, MS67+ Red  
The Single Finest Certified**

- 3212 1931 MS67+ Red PCGS.** The 1931 Lincoln cent is a rarity in Superb Gem Red condition, and the present Plus-designated example stands apart as the sole finest certified. The strike is bold, and the glowing copper-orange luster is devoid of carbon spotting. The absolute dream coin for Registry enthusiasts. Population: 22 in 67 (1 in 67+) Red, 0 finer (6/16). NGC ID# 22D2, PCGS# 2614

- 3213 1931-S MS66 Red and Brown PCGS.** Among the finest Red and Brown coins certified, this Premium Gem 1931-S Lincoln cent displays a bold strike and satiny, unabraded mint luster. Substantially more red than brown color is present. Population: 4 in 66 Red and Brown, 0 finer (7/16). NGC ID# 22D4, PCGS# 2619

- 3214 1933 MS67 Red PCGS.** The fine-grained surfaces on each side of this remarkable Superb Gem are totally unencumbered by any sign of carbon. The reverse is bright orange-gold, while sunset hues visit parts of the obverse, well within the Red context. The 1933-PD issues are the last of the low-mintage Lincoln cent strikes that form the early "short set" from 1909-1933. Population: 56 in 67 (2 in 67+) Red, 0 finer (7/16). NGC ID# 22D7, PCGS# 2629

- 3215 1936 Doubled Die Obverse, FS-102, MS65 Red PCGS.** The "peg leg" on the R in LIBERTY is the pick-up point for distinguishing FS-102 from the other two prominent doubled dies for the issue, FS-101 and FS-103. This lustrous orange-gold Gem is well struck and essentially devoid of contact. The left obverse displays a smattering of pinpoint flecks. PCGS# 37753 Base PCGS# 92650

**3216 1937 MS67+ Red PCGS.** A highly lustrous Lincoln cent, this Superb Gem exhibits frosty surfaces and fiery-orange mint brilliance. The strike is bold and the surfaces are essentially flawless. PCGS has certified just 14 in MS67+ Red and only one finer (7/16). NGC ID# 86CF, PCGS# 2659

**3217 1937 MS67+ Red PCGS. CAC.** The 1937 Lincoln cent is available in MS67 Red, but Plus-graded coins such as the present piece are rare. The strike is sharp, and the satiny mint luster is free of carbon spotting. Fiery orange interiors cede to sun-gold around the peripheries. Population: 14 in 67+ Red, 1 finer (7/16). NGC ID# 86CF, PCGS# 2659

**3218 1940 MS67+ Red PCGS.** The color on this piece is nothing less than remarkable. After 76 years, there is absolutely no mellowing of the original bright mint red. Additionally, there are no mentionable abrasions. NGC ID# 22DT, PCGS# 2686

**3219 1941 MS67+ Red PCGS.** A rare Plus-graded Registry coin, trailing only a single numerically finer example at both services combined. This coin is carbon-free and boldly struck, showing luminous peach-orange mint luster. Population: 31 in 67+ Red, 1 finer (7/16). NGC ID# 22DW, PCGS# 2695

**3220 1941-D MS67+ Red PCGS.** Rich coppery-orange mint luster appears on both sides of this frosty Superb Gem 1941-D Lincoln cent. A glass is required to see the few minuscule carbon flecks. PCGS has certified only eight in MS67+ and none finer (7/16). NGC ID# 22DX, PCGS# 2698

**3221 1943-D MS68 NGC.** Well-struck and highly lustrous, with numerous faint die striations (as struck) in the fields, and a few scattered milky toning spots, most of them located on the reverse. The lovingly preserved surfaces seem flawless. Census: 51 in 68, 0 finer (6/16).  
*Ex: New York Signature (Heritage, 11/2003), lot 5380.* NGC ID# 22E6, PCGS# 2714

**3222 1943-D MS68 PCGS.** This stunning Superb Gem exhibits brilliant bluish luster with bold design motifs. Extensive die polish in the obverse and reverse fields impart a satiny, somewhat prooflike appearance. This example is tied for the finest certified (6/16) and is an ideal Set Registry candidate. NGC ID# 22E6, PCGS# 2714

#### 1943-S Steel Cent, MS68 Beautiful Luster and Surfaces

**3223 1943-S MS68 PCGS.** Glistening mint luster illuminates seemingly flawless surfaces on this sharp 1943-S steel cent. The coin is untoned and eye-catching, showcasing quality that is rarely seen on the San Francisco issue. None are certified finer by either service. Population: 56 in 68, 0 finer (6/16). NGC ID# 22E8, PCGS# 2717

**3224 1944 MS67+ Red PCGS.** This shell-case copper Lincoln cent, a stunning Superb Gem, exhibits brilliant orange luster and frosty surfaces with bold design motifs. PCGS has certified 40 in MS67+ and only two finer (7/16). NGC ID# 22EA, PCGS# 2722

**3225 1945-D MS67+ Red PCGS. CAC.** A Registry-grade 1945-D Lincoln cent, showing frosty copper-red luster and unabraded, virtually carbon-free surfaces. Few MS67 Red coins are awarded the Plus designation, and only a single piece is finer. Population: 16 in 67+ Red, 1 finer. CAC: 28 in 67 Red, 0 finer (7/16). NGC ID# 22EH, PCGS# 2737

#### 1946-S Cent, MS67+ Red Tied for Finest at NGC

**3226 1946-S MS67+ Red NGC.** Trumpet tail S. Fiery-orange color combines with frosty luster throughout, giving this Registry-quality cent fantastic eye appeal. Strongly struck with minor flecks on the shoulder. Remarkably, this is one of the top survivors from a massive production of nearly 200 million coins. There are only four Plus-designated Superb Gems at NGC with none finer (7/16). NGC ID# 22EM, PCGS# 2749

#### 1946-S Lincoln Cent, MS67+ Red Among the Finest at Both Services

**3227 1946-S MS67+ Red NGC.** Trumpet tail S. Striking problems tend to plague this San Francisco Lincoln cent emission, but no such issues are present on this Superb Gem. Rich copper-orange coloration drapes impeccably preserved, frosty surfaces that lack any marks worth mentioning. A couple of trivial carbon spots in the obverse field are noted for accuracy. A coin of unsurpassed quality, this is one of four MS67+ examples at NGC with none finer (7/16). NGC ID# 22EM, PCGS# 2749

#### 1948-D Cent, MS67+ Red Incredible Color and Luster

**3228 1948-D MS67+ Red PCGS.** No 1948-D Lincoln cent is finer than this high-end Superb Gem, and likely no equally graded example displays better eye appeal. This piece is sharp and frosty with carbon-free, unabraded surfaces. Fire-orange, cherry-red, and bronze-gold hues deliver unsurpassed eye appeal. Population: 77 in 67 (4 in 67+) Red, 0 finer (7/16). NGC ID# 22ET, PCGS# 2764

**3229 1948-D MS67+ Red NGC.** An extremely important condition rarity from the later Wheat cent era, this virtually flawless Superb Gem features fiery-orange surfaces and frosty luster. Census: 79 in 67 (1 in 67+) Red, 0 finer (7/16). NGC ID# 22ET, PCGS# 2764

- 3230 1949 MS67 Red PCGS.** Reddish-orange and pink luster appear on this frosty and highly brilliant Lincoln cent that is tied for the finest of its kind certified by PCGS or NGC. Population: 34 in 67 Red, 0 finer (7/16). NGC ID# 22EV, PCGS# 2770
- 3231 1949-S MS67+ Red PCGS. CAC.** One of only 10 Plus-graded coins in this grade at PCGS with none finer at either service (7/16). The strike is bold, and this carbon-free 1949-S Registry coin displays shimmering, frosty copper-orange mint luster. Eye appeal is outstanding. NGC ID# 22EX, PCGS# 2776
- 3232 1951-D MS67+ Red NGC.** Both sides of this impressive Superb Gem exhibit brilliant mint frosty with light pinkish-orange luster. This nearly flawless representative exhibits trivial carbon flecks that are only visible with a glass. NGC has certified two in MS67+ and none finer (7/16). NGC ID# 22F4, PCGS# 2791
- 3233 1951-D MS67+ Red PCGS. CAC.** An exquisite Superb Gem, this 1951-D Lincoln cent exhibits intense orange mint luster with frosty surfaces and bold design motifs. PCGS has only certified eight of these as MS67+ and none finer (7/16). NGC ID# 22F4, PCGS# 2791
- 3234 1952-D MS67+ Red PCGS.** A splendid Superb Gem with exceptional eye appeal, this 1952-D Lincoln cent has frosty luster and fiery orange mint brilliance. Population: 88 in 67 (5 in 67+) Red, 0 finer (7/16). NGC ID# 22F7, PCGS# 2800
- 3235 1953-D MS67+ Red NGC.** Fiery orange mint color and frosty luster are the hallmarks of this amazing Superb Gem, the only 1953-D cent graded MS67+ by NGC, with none finer (7/16). Few people gave these pieces a second thought 40 or 50 years ago, and now their true high-grade rarity is being realized. NGC ID# 22FA, PCGS# 2809
- 3236 1953-S MS67+ Red PCGS. CAC.** PCGS has Plus-graded only eight other MS67 Red examples of this San Francisco issue and there are none finer at either service (7/16). The present coin displays a sharp strike and frosty copper-orange luster without carbon spotting. Eye appeal is exceptional. NGC ID# 22FB, PCGS# 2812
- 3237 1954 MS66+ Red PCGS.** Pale orange luster is typical on this Philadelphia Mint Lincoln cent. This Premium Gem has a bold strike and frosty mint surfaces with excellent eye appeal. PCGS has only certified five finer examples (7/16). NGC ID# 22FC, PCGS# 2815

**1954-D Cent, MS67+ Red  
One of the Top Two Coins at NGC**

- 3238 1954-D MS67+ Red NGC.** The 1954-D often comes sharply struck and is available through Superb Gem condition without much difficulty. However, for those who desire the absolute best, this is one of only two Plus-graded MS67 submissions at NGC (7/16). Satiny, copper-orange surfaces are marvelously preserved, as is to be expected of a coin in this rarified grade. Spindly die cracks appear on the forehead and arm. The upper reverse border is somewhat incomplete. NGC ID# 22FD, PCGS# 2818

**1954-D Lincoln Cent, MS67+ Red  
None Graded Finer**

- 3239 1954-D MS67+ Red NGC.** Only two MS67 submissions at NGC have been awarded a Plus designation for quality within the grade (7/16), and both of them are included in this sale (see previous lot). Glittering copper-rose surfaces radiate satin luster over each side. Insignificant carbon spotting occurs in the fields, but eye appeal is nothing short of exceptional. Well-defined with a lightly impressed upper reverse margin. NGC ID# 22FD, PCGS# 2818
- 3240 1955 MS67+ Red PCGS. CAC.** The brilliant pinkish-orange luster of this satiny Superb Gem is outstanding, with virtually flawless surfaces to match. Minuscule marks are evident only at the lower reverse. Population: 47 in 67 (1 in 67+) Red, 0 finer (7/16). NGC ID# 22FE, PCGS# 2824
- 3241 1955 Doubled Die Obverse, FS-101, XF45 PCGS.** Attractive sea-green, lavender, and autumn-brown toning embraces this unblemished and well-defined key-date cent. Luster emerges from the legends, and the obverse legend doubling is dramatic. Certified in a green label holder. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3242 1955 Doubled Die Obverse, FS-101, AU53 NGC.** A lightly worn representative of the highly regarded doubled die variety. Marks are relatively minor, and the olive-brown surfaces display satin luster. The obverse exhibits scattered tiny gray freckles. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3243 1955 Doubled Die Obverse, FS-101, AU53 NGC.** A dramatic doubled die variety, and a key to the Lincoln series. A sharply defined chocolate-brown example. Lincoln's shoulder and the right reverse rim exhibit moderate marks. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3244 1955 Doubled Die Obverse, FS-101, AU53 PCGS.** All obverse legends are remarkably die doubled. This example is mostly chocolate-brown, with occasional areas of lighter tan toning and one unobtrusive gray spot below the ME in AMERICA. The obverse exhibits unimportant contact. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3245 1955 Doubled Die Obverse, FS-101, AU55 NGC.** Toned olive-green aside from a brick-red obverse field. Lincoln's jaw and cheekbone display minor wear, but luster shimmers throughout the legends and motifs. A loupe reveals a few unimportant marks. A key variety. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3246 1955 Doubled Die Obverse, FS-101, AU55 NGC.** A lightly worn sea-green and tan-brown example of the remarkable FS-101 doubled die variety. Marks are minimal and carbon is inconsequential. Discovered shortly after issue, many were saved in AU and Uncirculated grades, yet survivors are scarce relative to demand from Lincoln cent collectors. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3247 1955 Doubled Die Obverse, FS-101, AU55 PCGS.** The portrait high points exhibit slight blending, but this satiny olive-brown key date cent has minimal marks and only a single small spot on the obverse near 2 o'clock. The obverse legends exhibit the dramatic spread characteristic of the famous variety. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3248 1955 Doubled Die Obverse, FS-101, AU55 PCGS.** A Choice AU olive-brown example of the earliest known and most dramatic doubled die Lincoln cent variety. Marks and spots are essentially absent, though we note a small flan flake (as issued) below the first A in AMERICA. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3249 1955 Doubled Die Obverse, FS-101, AU58 NGC.** The cheekbone shows slight wear, but this olive-brown representative retains coruscating luster. No marks are noticeable, and the eye appeal is attractive. The most dramatic of the many doubled die Lincoln cent varieties. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3250 1955 Doubled Die Obverse, FS-101, AU58 NGC.** A satiny chocolate-brown key date cent. Void of spots or flan detractors. Crisply struck, and smooth aside from a pair of faint horizontal lines on the upper reverse field. A famous doubled die variety. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3251 1955 Doubled Die Obverse, FS-101, AU58 PCGS.** A coruscating walnut-brown cent with hints of olive-brown and rose-red. No wear is apparent, and no marks are of any import. A lens reveals distributed obverse carbon. The most impressive and best-known doubled die variety of the Lincoln series. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3252 1955 Doubled Die Obverse, FS-101, AU58 PCGS.** The most prominent obverse doubled die variety of the Lincoln cent series. A satiny near-Mint representative with slight rub on the cheekbone and an unobtrusive mark on the right stand of the N in CENT. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3253 1955 Doubled Die Obverse, FS-101, AU58 PCGS.** A satiny and lightly abraded chocolate-brown representative of the desirable and spectacular 1955 Doubled Die cent. Lincoln's cheekbone shows barely a trace of wear. Carbon is confined to a couple of tiny flecks on the reverse exergue. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825
- 3254 1955 Doubled Die Obverse, FS-101, MS61 Brown NGC.** Splendid cobalt-blue toning embraces this lustrous and lightly abraded key date cent. Hints of the initial orange-red color linger within the obverse legends. Exceptionally attractive for the grade. The most prominent doubled die of the cent denomination. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Doubled Die Obverse Cent  
Satiny MS64 Red**

- 3255 1955 Doubled Die Obverse, FS-101, MS64 Red PCGS.** The 1955 doubled die cent is seldom seen finer than MS64. This full Red Choice example balances eye appeal and affordability in an ideal combination. The strike is bold, and the well-preserved surfaces yield coppery-pink luster with reddish-orange hues on the Lincoln portrait. PCGS has seen 20 Gem Red coins finer (7/16). NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

**1955-D Cent, MS67 Red  
None Finer at Either Service**

- 3256 1955-D MS67 Red PCGS. CAC.** A beautifully preserved Superb Gem Red example of the 1955-D Lincoln cent, among the finest pieces certified. It is also one of only six representatives this fine with a CAC green label (6/16). The strike is sharp, and the surfaces display glowing copper-red luster. Two tiny specks are unobtrusively positioned on the lower reverse near the rim and the ER in AMERICA. Population: 31 in 67 (1 in 67+) Red, 0 finer. NGC ID# 22FH, PCGS# 2830
- 3257 1955-D MS67 Red PCGS. CAC.** The original red surfaces of this delightful Superb Gem are flawless, with vibrant mint luster on both sides. The design elements are well-detailed and eye appeal is outstanding. Housed in a new 30th Anniversary green label holder. Population: 31 in 67 (1 in 67+) Red, 0 finer. CAC: 6 in 67, 0 finer (6/16). NGC ID# 22FH, PCGS# 2830
- 3258 1955-S MS67+ Red PCGS.** An almost flawlessly preserved example of this late-series San Francisco issue, showing luminous copper-orange luster and boldly rendered design elements. The Registry Set potential is immense. Population: 20 in 67+ Red, 1 finer (6/16). NGC ID# 22FJ, PCGS# 2833
- 3259 1955-S MS67+ Red PCGS. CAC.** This delightful high-end Superb Gem displays a bold strike and carbon-free, shimmering mint luster. Copper-orange and rose-gold hues appear on each side with areas of lighter golden color in the margins. Eye appeal is incredible, and the technical quality is essential for Registry purposes. Population: 23 in 67+ Red, 1 finer (7/16). NGC ID# 22FJ, PCGS# 2833
- 3260 1956-D MS67+ Red NGC.** A stunning Superb Gem with extraordinary mint frost and brilliant orange mint luster. Prominent die polishing lines are visible in the obverse and reverse fields. As the only 1956-D graded MS67+ at NGC, this piece is the finest that grading service has examined (7/16). NGC ID# 22FL, PCGS# 2839

**1956-D Cent, MS67+ Red  
Registry-Grade CAC Coin**

- 3261 1956-D MS67+ Red PCGS. CAC.** Vivid fire-orange interiors cede to bright gold and peach peripheries on this eye-catching Registry-graded 1956-D cent. It is tied for the finest certified, having both the PCGS Plus designation and the CAC green label endorsement. An unsurpassed and arguably unequaled example. PCGS has certified 66 examples in MS67 Red, with seven examples in MS67+ Red, and none finer. CAC: 14 in 67 Red, none finer (7/16). NGC ID# 22FL, PCGS# 2839

**1957 Cent, Top-Grade MS67 Red  
Rare So Fine at PCGS**

- 3262 1957 MS67 Red PCGS.** This is the finest that the 1957 Lincoln cent is known. NGC has certified numerous pieces in MS67 Red, but PCGS has seen only 16 (6/16). This Registry Set contender displays a bold strike and satiny copper-red mint luster. The only discernible blemish is a tiny, unobtrusive speck in the upper-left obverse field. NGC ID# 22FM, PCGS# 2842

**1960 Lincoln Cent, MS67 Red  
Small Date Registry Coin**

- 3265 1960 Small Date MS67 Red PCGS.** On the scarcer Small Date 1960 Lincoln cent, the top of the 9 is flush with the top of the 1. The Large Date variant shows the 9 elevated. This top-grade Small Date coin displays glowing copper-orange mint luster and carbon-free surfaces. Eye appeal is outstanding. Population: 18 in 67 Red, 0 finer (6/16). NGC ID# 22FV, PCGS# 2863

**1959 Lincoln Cent, MS67+ Red  
The Single Finest Certified**

- 3263 1959 MS67+ Red PCGS.** The debut Memorial Reverse Lincoln cent and something of a rarity in Registry Set condition. PCGS and NGC have each seen 20 MS67 Red coins and none finer, but this piece is the only one with a Plus designation, making it the undisputed finest known (7/16). The coin is sharply struck from fresh dies, with beautiful, carbon-free surfaces. Copper-orange and ruby-red hues blend over each side, creating incredible eye appeal. NGC ID# 22FS, PCGS# 2854

**1962 Cent, MS67+ Red  
Registry Set Acquisition**

- 3266 1962 MS67+ Red PCGS.** This Plus-designated Superb Gem 1962 Lincoln cent is the top-of-the-line Registry coin for the issue. Any full Red Superb Gem is a rarity, and only a few have achieved the coveted Plus designation. This piece is boldly struck with gleaming copper-orange luster and no carbon spotting. Population: 32 in 67 (4 in 67+) Red, 0 finer (6/16). NGC ID# 22G3, PCGS# 2878

**1960 Small Date Cent, MS67 Red  
Tied for Finest Certified**

- 3264 1960 Small Date MS67 Red PCGS.** The Small Date 1960 Lincoln cent is scarcer in high grade than its Large Date counterpart. This Superb Gem Red example is conditionally rare and among the finest certified. The strike is sharp, and the softly frosted surfaces yield rich fire-orange luster. Population: 18 in 67 Red, 0 finer (6/16). NGC ID# 22FV, PCGS# 2863

- 3267 1962-D MS67 Red NGC.** The obverse and reverse fields exhibit myriad die polishing lines that impart brilliant satin luster on this fiery-orange Superb Gem that is tied for the finest certified. Census: 17 in 67 Red, 0 finer (7/16). NGC ID# 22G4, PCGS# 2881

- 3268 1963-D MS66+ Red NGC.** A sharply struck Premium Gem, this Denver Mint cent exhibits brilliant satin luster and fiery orange surfaces with a circle of strike weakness at the central reverse. This is the only example that NGC has awarded a Plus designation, and they have only certified four finer pieces (7/16). NGC ID# 22G6, PCGS# 2887

**1968-S Cent, MS67+ Red  
Gorgeous Luster and Surfaces**

- 3269 1968-S MS67+ Red PCGS.** This glowing copper-red 1968-S Lincoln cent looks pristine to the naked eye, and that opinion holds up even when studied under a loupe. The obverse portrait is completely devoid of contact, and only a tiny tick on the steps of the Lincoln Memorial prevents an even finer grade. The strike is sharp, and the eye appeal is remarkable. Only a single coin is known in a higher grade. Population: 60 in 67 (2 in 67+) Red, 1 finer (6/16). NGC ID# 273E, PCGS# 2909

- 3270 1970-D MS67+ Red PCGS.** A stunning Superb Gem, this 1970-D Lincoln cent displays rich deep orange mint luster with satiny surfaces and only a few dark toning specks that are invisible without a loupe. Population: 25 in 67 (1 in 67+) Red, 0 finer (7/16). NGC ID# 22GL, PCGS# 2929

- 3271 1972 MS67+ Red PCGS.** A conditionally rare, top-grade example of the 1972 Lincoln cent, showing a sharp strike and satiny copper-red mint luster. A few microscopic flecks do not detract, and the eye appeal is excellent. Population: 38 in 67 (3 in 67+) Red, 0 finer (7/16). NGC ID# 22GT, PCGS# 2953

**1972 Cent, MS67 Red  
Doubled Die Obverse**

- 3272 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS.** A beautifully preserved example of this modern *Guide Book* variety, showing luminous satin surfaces with varying shades of copper-orange, rose-red, and mint-green. A partial print is seen on Lincoln's shoulder, but there are no other blemishes. This issue is scarce so well preserved, and finer examples are prohibitively rare. Population: 40 in 67 Red, 1 finer (6/16). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

**1973-S Cent, MS67 Red  
Few Seen This Fine**

- 3273 1973-S MS67 Red PCGS.** This Registry-grade 1973-S Lincoln cent is fully struck and brilliant without obtrusive spots or abrasions. This otherwise common modern issue is rare in Superb Gem Red condition, and such coins are in high demand among Registry enthusiasts. Population: 13 in 67 Red, 0 finer (6/16). NGC ID# 22GZ, PCGS# 2968

**1973-S Cent, Top-Graded MS67 Red  
Extremely Rare So Fine**

- 3274 1973-S MS67 Red PCGS.** A mintage of 317 million coins seems to have had little bearing on the number of high-grade survivors. There are merely 13 Superb Gems at PCGS and two at NGC with none finer (7/16). Auction appearances are rarer than the coins themselves, and Registry Set enthusiasts should take advantage of this offering. Softly frosted golden-amber surface house fully struck relief elements. Virtually pristine. NGC ID# 22GZ, PCGS# 2968

- 3275 1974 MS67+ Red PCGS.** This virtually flawless Superb Gem Lincoln Memorial cent exhibits brilliant light orange luster with satiny mint surfaces. It doesn't get any better with no finer certified examples. Population: 97 in 67 (3 in 67+) Red, 0 finer (7/16). NGC ID# 22H2, PCGS# 2971

**1976 Cent, MS68 Red  
Top PCGS Registry Coin**

- 3276 1976 MS68 Red PCGS.** This remarkable Bicentennial-year Lincoln cent is tied with just two others (all PCGS coins) as the finest known of the issue (6/16). The strike is full, and carbon-free surfaces yield absolutely superb mint luster that shimmers as it rolls over flawless fields. A finer 1976 cent cannot even be imagined. NGC ID# 22H7, PCGS# 2982

- 3277 1978 MS67+ Red PCGS.** This modern issue has proved to be a condition rarity even though 5.5 billion pieces were produced. The surfaces are even red over each side. The date and LIBERTY show evidence of die doubling, but this is not listed in *Cherrypicker's*. The only feature resembling a flaw is Mint-made: a shallow planchet flake out of the center of the reverse. Population: 57 in 67 (13 in 67+) Red, 1 finer (7/16). NGC ID# 22HB, PCGS# 2992

**1979 Cent, MS68 Red  
Finest Condition Known**

- 3278 1979 MS68 Red PCGS.** A beautifully preserved, sharply struck 1979 Lincoln cent, showing virtually flawless copper-red luster and frosty, carbon-free surfaces. The coin just glows when rotated beneath a light. This piece is tied for the finest certified and is conditionally rare as such. Population: 7 in 68 Red, 0 finer (6/16). NGC ID# 22HD, PCGS# 2995

**1982 Small Date Bronze Cent, MS68 Red  
The Single Finest Certified**

- 3279 1982 Bronze, Small Date MS68 Red PCGS.** This is the sole finest Small Date bronze 1982 Lincoln cent certified (7/16). The strike is full, and the softly frosted surfaces display luminous copper-orange and mint-gold luster. There are no abrasions or distracting carbon specks. A must-have Registry coin. Population: 1 in 68 Red, 0 finer (7/16). NGC ID# 3AJG, PCGS# 146020

- 3280 1982 Zinc, Small Date MS68 Red PCGS.** This top-grade zinc, Small Date 1982 Lincoln cent displays a full strike and flawless copper-red luster that shows some orange peel effect in the fields. This lofty grade level is essential to represent in a high-ranking Registry Set. Population: 7 in 68 Red, 0 finer (7/16). NGC ID# 22HU, PCGS# 146030

- 3281 1982-D Zinc, Small Date, MS68 Red PCGS.** This frosty Superb Gem exhibits rich orange mint luster and flawless surfaces. Slightly pebbled surfaces are typical of these copper-plated zinc cents. Population: 13 in 68 Red, 0 finer (7/16). NGC ID# 22HU, PCGS# 146036 Base PCGS# 3050

- 3282 1985 MS68 Red PCGS.** This Registry coin is boldly struck and seemingly flawless with regards to preservation. Glowing tangerine-orange luster adorns each side, and there are no obvious carbon specks. A mild orange peel effect is seen on the obverse. Among the finest at PCGS. Population: 24 in 68 (1 in 68+) Red, 0 finer (6/16). NGC ID# 22J3, PCGS# 3071

- 3283 1985 MS68 Red PCGS.** A boldly defined Superb Gem Lincoln Memorial cent, this piece exhibits frosty mint luster and fiery orange surfaces with exceptional eye appeal. Population: 25 in 68 (2 in 68+) Red, 0 finer (7/16). NGC ID# 22J3, PCGS# 3071

- 3284 2006 MS68 Red PCGS.** An almost flawlessly preserved Registry coin, showing mint-fresh copper-pink luster and carbon-free surfaces. One of only three pieces in this finest-seen grade at PCGS (7/16). A must-have Registry acquisition. NGC ID# 273J, PCGS# 93196

- 3285 2006-D MS68 Red PCGS.** A bright, copper-pink coin with almost flawless preservation. This high-end Superb Gem 2006-D Lincoln cent ranks among the few finest certified. The strike is full, and the eye appeal is proportionate to the numeric grade. Population: 9 in 68 Red, 0 finer (6/16). NGC ID# 273K, PCGS# 93199

- 3286 2006-D MS68 Red PCGS.** A fully struck top-grade example with flawless copper-pink surfaces and splendid eye appeal. The 2006-D Lincoln cent is scarcely represented in this grade at PCGS, and such a coin is important for a high-ranking Registry Set. Population: 9 in 68 Red, 0 finer (7/16). NGC ID# 273K, PCGS# 93199

- 3287 2006-D MS68 Red PCGS.** Bright, even red luster is evenly matched from side to side. The bonded copper outer layer is tight and shows none of the often-seen "pickling" commonly found on post-1982 cents. Sharply struck. Population: 9 in 68 Red, 0 finer (7/16). NGC ID# 273K, PCGS# 93199

- 3288 2009 Presidency, MS68 Red PCGS.** The final reverse of the 2009 bicentennial Lincoln cent series, this Denver-issued Presidency example ranks as the sole finest at PCGS and is one of only two Red coins certified at that service finer than MS66 (6/16). The strike is sharp, and the copper-red surfaces are beautifully preserved. A must-have Registry coin. NGC ID# 22KK, PCGS# 407878

**PROOF LINCOLN CENTS**

- 3289 1909 PR65 Red and Brown PCGS.** Deep lavender shades embrace the majority of the obverse, though the right field and lower margin exhibit orange-red and apple-green. The reverse is brick-red with lilac high points. Certified in a first generation holder. NGC ID# 22KS, PCGS# 3304

- 3290 1910 PR66 Red and Brown PCGS. CAC.** 30th Anniversary Green Label Holder. An intricately struck Premium Gem. The obverse field is orange-red and the reverse field is olive-gold with blushes of steel-gray. Lincoln's hair is ruby-red. CAC Population: 11 in 66 Red and Brown, 1 finer (7/16). NGC ID# 22KT, PCGS# 3307

**1910 Lincoln Cent, PR66+ Red  
Extravagant Matte Luster**

- 3291 1910 PR66+ Red PCGS Secure.** If a matte proof Lincoln cent in blazing full Red condition is desired for type purposes, the 1909 and 1910 are the ideal candidates. This luminous 1910 displays greenish-gold surfaces and full design elements. Eye appeal is immediately pleasing, despite a few tiny specks that are seen with a loupe. This issue is rare so well-preserved and exceedingly so any finer. Population: 25 in 66 (3 in 66+) Red, 3 finer (7/16).

**From The Wright Collection, The #3 Finest All-Time PCGS Registry Set of Matte Proof Lincoln Cents.** NGC ID# 22KT, PCGS# 3308

**3292 1911 PR64 Red PCGS.** Pinkish-gold patina gives this Choice proof 1911 Lincoln cent its Red color designation, while the strike is sharp and carbon is pleasantly minimal. This matte proof issue is elusive in full Red condition and is rare at the Gem level. Population: 20 in 64 Red, 35 finer (6/16). NGC ID# 22KU, PCGS# 3311

**3293 1912 PR65 Brown PCGS. CAC.** A fully struck Gem proof 1912 Lincoln cent, showing olive-brown toning that has tiny hints of red, green, and gold throughout. Eye appeal is pleasing for the grade. A collectible Gem example of this conditionally elusive matte proof issue. Population: 49 in 65 Brown, 21 finer (7/16). NGC ID# 22KV, PCGS# 3312

**3294 1912 PR65 Red and Brown PCGS.** A run of 2,172 matte proof Lincoln cents was accomplished in 1912, but examples are scarcely seen at the Gem grade level regardless of color designation. Reddish-brown and copper-orange surfaces show minimal contact marks. A small white spot appears beside the N in CENTS. Population: 56 in 65 Red and Brown, 15 finer (6/16). NGC ID# 22KV, PCGS# 3313

**3295 1912 PR65 Red and Brown PCGS.** Subdued orange luster appears on the light brown surfaces of this Gem proof, with iridescent accents that enhance the eye appeal. A single small spot is evident at the rim below the date. Population: 56 in 65 Red and Brown, 15 finer (7/16). NGC ID# 22KV, PCGS# 3313

---

**1912 Cent, PR65 Red  
Conditionally Rare Registry Coin**

**3296 1912 PR65 Red PCGS Secure. CAC.** The 1912 matte proof cent will prove to be difficult to acquire in full Red condition, and such coins are rarely seen in Gem grade. Finer examples exist but are far out of reach for most collectors. This Gem piece is sharp and well-preserved with copper-gold and orange-red coloration. A loupe reveals a few tiny, scattered pepper specks that do not reduce the eye appeal. Population: 19 in 65 Red, 2 finer (7/16).

*From The Wright Collection, The #3 Finest All-Time PCGS Registry Set of Matte Proof Lincoln Cents.* NGC ID# 22KV, PCGS# 3314

**3297 1913 PR66 Brown PCGS. CAC.** This well-produced matte proof cent still shows significant remaining mint red that is interspersed with deeper blue-brown patina, especially on the obverse. There is no mentionable carbon on either side of this fully struck proof. The mintage was 2,983 pieces, making the 1913 an excellent candidate for type purposes. Population: 12 in 66 (1 in 66+) Brown, 0 finer (7/16). NGC ID# 22KW, PCGS# 3315

**3298 1913 PR65 Red and Brown PCGS. CAC.** The well-preserved surfaces of this delightful Gem show a mix of copper-red and lavender-brown patina, with subtle matte luster underneath. The design elements show pinpoint definition throughout. Population: 92 in 65 Red and Brown, 31 finer (6/16). NGC ID# 22KW, PCGS# 3316

---

**1915 Cent, PR66 Brown  
Attractive Matte Proof Surfaces**

**3299 1915 PR66 Brown PCGS.** Burnt-red, brown, and steel-blue hues appear in equal parts over each side of this Premium Gem 1915 matte proof cent. The strike is tack-sharp, and the surfaces are well-preserved. High-end examples of the challenging matte proof issue are scarce, regardless of color designation. Population: 23 in 66 (3 in 66+) Brown, 5 finer (7/16). NGC ID# 22KY, PCGS# 3321

---

**1915 Cent, PR65 Red  
Rarely Seen So Fine**

**3300 1915 PR65 Red PCGS Secure.** The 1915 matte proof Lincoln cent is usually available in the absolute sense but seldom in full Red condition. This Gem Red example is fully struck and luminous, showing coppery-pink luster that transitions to more golden hues when rotated beneath a light. Finer examples are exceedingly rare. From a mintage of only 1,150 pieces. Population: 17 in 65 Red, 9 finer (7/16).

*From The Wright Collection, The #3 Finest All-Time PCGS Registry Set of Matte Proof Lincoln Cents.* NGC ID# 22KY, PCGS# 3323

---

**1916 Cent, PR64 Red and Brown  
Less Often Seen Matte Proof Issue**

**3301 1916 PR64 Red and Brown PCGS.** A fully struck matte proof with impeccably well-preserved surfaces, showing rich burnt-umber toning with olive and brassy-brown accents. This Choice Red and Brown 1916 Lincoln is within the grasp of the average matte proof collector but exhibits quality reminiscent of a finer numeric level. NGC ID# 22KZ, PCGS# 3325

**1936 Lincoln Cent, PR66 Red and Brown  
Type One, Satin Finish**

- 3302 1936 Type One — Satin Finish PR66 Red and Brown PCGS.** This is the first of two proof finishes that appeared in 1936. The satin finish is a cross between the matte proofs struck two decades earlier, and the brilliant proofs that appeared later in 1936. This Premium Gem has nearly full red mint color on the obverse, and blends orange, violet, and green on the reverse. Population: 7 in 66 (2 in 66+) Red and Brown, 0 finer (7/16). NGC ID# 22L2, PCGS# 3331

**1936 Lincoln Cent, PR66 Red  
Type Two, Brilliant Finish**

- 3303 1936 Type Two — Brilliant Finish PR66 Red PCGS.** When the U.S. Mint resumed proof coinage in 1936, they initially tried a satiny finish that proved unpopular with collectors. This coin represents the second (Brilliant) proof finish used later in the year, which proved more popular. This spectacular Premium Gem is sharply detailed and impeccably preserved, with blazing red surfaces and deeply reflective fields. Population: 54 in 66 (3 in 66+) Red, 2 finer (6/16). NGC ID# 22L3, PCGS# 3335

- 3304 1937 PR65 Cameo PCGS. CAC.** Cameo contrast is rarely encountered on any denomination proof struck from 1936 to 1942. This example has sharply defined, satin devices on a deeply mirrored background on this brilliant orange Lincoln cent proof. Population: 22 in 65 Red Cameo, 30 finer (7/16). NGC ID# 22L5, PCGS# 83338

- 3305 1937 PR66 Cameo PCGS.** Cameo contrast is unusual with this issue, and Premium Gem Cameo proofs with original red surfaces are decidedly rare. This delightful specimen offers sharply detailed design elements and reflective fields that contrast boldly with the frosty devices. Just a few microscopic carbon spots are evident on close inspection. Population: 26 in 66 (2 in 66+) Cameo, 4 finer (7/16). NGC ID# 22L5, PCGS# 83338

**1942 Cent, PR67 Red  
Subtle Obverse Contrast**

- 3306 1942 PR67 Red PCGS.** Rose-red, copper-orange and mint-green hues accent otherwise bright golden surfaces on each side of this Superb Gem Red 1942 proof cent. The strike is full, and modest field-device contrast is seen on the obverse. The mirroring is virtually flawless. Examples are rarely seen this fine. Population: 3 in 67 Red, 0 finer (6/16). NGC ID# 22L9, PCGS# 3353

**1953 Lincoln Cent, PR67+ Red Deep Cameo  
Finest Certified at PCGS**

- 3307 1953 PR67+ Red Deep Cameo PCGS.** A substantial mintage of 128,800 proof Lincoln cents was accomplished in 1953, and the issue is not difficult to locate in lower proof grades. However, the issue is seldom seen with cameo surfaces. This coin, the finest certified example at PCGS by virtue of its Plus designation, exhibits well-detailed design elements with a rich coat of mint frost that contrasts profoundly against deeply mirrored fields to produce a stunning cameo effect. The original Red surfaces are impeccably preserved and overall eye appeal is extraordinary. Population: 7 in 67 (1 in 67+) Deep Cameo, 0 finer (7/16). NGC ID# 22LD, PCGS# 93368

**TWO CENT PIECES**

- 3308 1864 Small Motto, FS-401, AU58 NGC.** The introductory two cent subtype was rapidly replaced by its common Large Motto successor. The present walnut-brown example shows only a trace of wear on WE, the high point of the design. Marks are nearly absent. The strike is good save for blending on the T in UNITED. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

- 3309 1864 Small Motto, FS-401, MS61 Brown NGC.** An Uncirculated chocolate-brown example of the scarce introductory Small Motto subtype. The strike is bold and marks are nearly absent. A strike-through (as coined) affects the UST in TRUST, and the central reverse exhibits minor verdigris. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

**1864 Small Motto Two Cent Piece  
MS66 Red and Brown**

- 3310 1864 Small Motto, FS-401, MS66 Red and Brown NGC.** Considerable woodgrain effect dominates each side, although there is still more orange than brown appearing throughout. As a high-Mint State Small Motto example, this piece should find a ready home. The S in TRUST is surprisingly softly struck, to the point of near-invisibility, likely due to a filled die cavity. On the reverse a wispy die crack joins the ribbons of the bowknot. This is a well-struck piece, free from visible impairments. Census: 16 in 66 Red and Brown, 0 finer (6/16).  
*Ex: Summer FUN Signature (Heritage, 7/2011), lot 3202. PCGS# 38233 Base PCGS# 3580*

- 3311 1864 Large Motto MS65 Red PCGS Secure.** *Ex: TDP Collection.* Examples of the first-year Large Motto two cent survive in sizeable numbers through MS65 Red, but the certified population declines considerably thereafter. This piece has light copper-gold color with minimal carbon spotting. The olive leaves, shield lines, and wreath elements feature bold detail despite extensive cracking on the reverse. NGC ID# 22N9, PCGS# 3578

- 3312 1864 Large Motto MS65 Red PCGS.** A few trivial carbon flecks on each side of this Gem prevent a higher grade. The surfaces are fully brilliant with fiery orange mint color. PCGS has only certified 64 finer examples (6/16). NGC ID# 22N9, PCGS# 3578

**1864 Two Cent Piece, MS66 Red  
Outstanding Luster**

- 3313 1864 Large Motto MS66 Red PCGS.** A sharp Large Motto 1864 two cent piece, showing luminous Premium Gem-quality surfaces with vibrant copper-orange luster. A few scattered flecks do not detract. The Large Motto variant is the more plentiful of the two major 1864 two cent types, although pieces grading this fine are still scarce. PCGS has certified 61 coins in MS66 Red, with a single example in MS66+ Red, and two finer (6/16). NGC ID# 22N9, PCGS# 3578

- 3314 1865 Plain 5 MS66 Red and Brown PCGS. CAC.** Copper-tan luster enlivens both sides of this sharply struck two cent piece. Close inspection reveals no mentionable contact marks, and just a few tiny, light obverse flecks. Highly pleasing all-around eye appeal. Population: 33 in 66 (2 in 66+) Red and Brown, 0 finer (7/16).  
*Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 162. PCGS# 38248 Base PCGS# 3583*

- 3315 1865 Fancy 5 MS66 Red and Brown NGC.** Splendid apple-green and plum-red shades invigorate this coruscating and crisply struck Premium Gem. Study beneath a lens fails to locate any marks or spots. Certified in a prior generation holder. NGC ID# 8HFV, PCGS# 38257 Base PCGS# 3583

**1867 Two Cent, MS64+ Red and Brown  
Doubled Die Obverse**

- 3316 1867 Doubled Die Obverse, FS-101, MS64+ Red and Brown NGC. CAC.** *Ex: Highland Collection.* IN GOD WE TRUST is boldly die doubled on this important *Guide Book* variety. The present example displays sharp detail and rich copper-orange luster with blushes of burgundy toning. The surfaces are free of carbon and incredibly close to full Gem quality. Census: 4 in 64 (1 in 64+) Red and Brown, 3 finer (6/16). NGC ID# 22NB, PCGS# 38272 Base PCGS# 3595

- 3317 1869 MS65 Red and Brown PCGS. CAC.** Mottled reddish-brown toning appears on the brilliant orange surfaces of this fully lustrous Gem two cent piece. Both sides exhibit sharp design motifs on this scarce issue. Population: 63 in 65 (1 in 65+) Red and Brown, 5 finer (7/16). NGC ID# 22ND, PCGS# 3604

**PROOF TWO CENT PIECES**

**1864 Large Motto Two Cent, PR64 Red and Brown  
Original Coloration**

- 3318 1864 Large Motto PR64 Red and Brown NGC.** A razor-sharp strike and reflective fields characterize this Choice Red and Brown proof Large Motto two cent piece. Copper-orange, olive, and ruby-red appear in pools throughout the mirrored fields. There are no bothersome contact marks. This proof issue is elusive in all grades. NGC has certified 28 coins in PR64 Red and Brown, with a single Plus-graded example, and 42 finer (6/16). NGC ID# 274T, PCGS# 3622

**1864 Large Motto Two Cent, PR66  
Colorful Red and Brown Example**

- 3319 1864 Large Motto PR66 Red and Brown PCGS.** The more available Large Motto proof two cent issue, ideal for date representation. This Premium Gem Red and Brown example has few condition peers, and the surfaces display a lovely array of light purple, olive, copper-orange, and gold coloration. The strike is full. A small planchet lamination appears on the reverse rim above the N in UNITED. Population: 12 in 66 Red and Brown, 1 finer (6/16). NGC ID# 274T, PCGS# 3622

**1864 Two Cent Piece, PR65 Red and Brown Cameo  
Distinctive Large Motto Issue**

- 3320 1864 Large Motto PR65 Red and Brown Cameo NGC.** The well-preserved surfaces of this impressive Gem show a spectacular mix of original copper-red and magenta toning. The design elements are sharply detailed and the deeply mirrored fields provide bold cameo contrast with the frosty devices. This popular *Guide Book* issue claims an estimated proof mintage of just 100 pieces. Census: 4 in 65 Cameo, 1 finer (7/16). NGC ID# 274T, PCGS# 83623

**1866 Two Cent Piece, PR66 Red and Brown  
None Numerically Finer at PCGS**

- 3321 1866 PR66 Red and Brown PCGS. CAC.** Gorgeous, deeply reflective reddish-orange surfaces reveal wisps of light tan on the reverse. A sharp, even strike prevails, and there are no significant abrasions or unsightly spots to report. Population: 15 in 66 (1 in 66+) Red and Brown, 0 finer. CAC: 14 in 66, 0 finer (6/16). Ex: *FUN Signature* (Heritage, 1/2007), lot 1927. NGC ID# 274V, PCGS# 3631

**1866 Two Cent, PR66 Red Cameo  
Rare With Field-Device Contrast**

- 3322 1866 PR66 Red Cameo PCGS.** Very few proof 1866 two cent pieces are known with any degree of cameo contrast. This piece is among the finest Cameos certified, showing copper-orange surfaces with frosty motifs and mirrored fields. The strike is sharp, and there are no bothersome carbon spots. Eye appeal is outstanding. Population: 5 in 66 Red Cameo, 0 finer (6/16). NGC ID# 274V, PCGS# 83632

**1867 Two Cent Piece, PR65 Red  
Only Four Finer Coins at NGC**

- 3323 1867 PR65 Red NGC.** Flashy, lustrous surfaces add to the attractiveness of this Gem Red example. The obverse is particularly pleasing with intermingled shades of red and orange. The reverse primarily displays orange and deep golden-yellow hues, with hints of red and olive-green also present. Census: 20 in 65 Red, 4 finer (6/16). NGC ID# 274W, PCGS# 3635

- 3324 1868 PR65 Red and Brown PCGS. CAC.** Some vivid blue and plum overtones accent each side of this Gem Red and Brown 1868 proof two cent piece. The strike is sharp, and the fields are reflective. The rest of each side shows reddish-brown patina. Population: 45 in 65 Red and Brown, 19 finer. CAC: 16 in 65, 14 finer (6/16). NGC ID# 274X, PCGS# 3637

**1869 Two Cent Piece, PR66  
Lightly Contrasted Red and Brown Surfaces**

- 3325 1869 PR66 Red and Brown PCGS. CAC.** The obverse of this delightful Premium Gem proof has delicate blue toning on the devices, with full orange mint color elsewhere. The reverse has considerable blue and violet toning with splashes of orange color. This piece features a bold strike and light cameo contrast. Population: 21 in 66 Red and Brown, 2 finer. CAC: 12 in 66, 1 finer (6/16). NGC ID# 274Y, PCGS# 3640

- 3326 1870 PR65 Red and Brown PCGS. CAC.** Copper-orange, violet, and indigo hues appear in bands on this Red and Brown Gem proof. Sharply struck and an impressive survivor from an issue of 1,000 specimens. Population: 73 in 65 (1 in 65+) Red and Brown, 24 finer. CAC: 25 in 65, 13 finer (6/16).  
Ex: *FUN Signature (Heritage, 1/2012)*, lot 4456. NGC ID# 274Z, PCGS# 3643

**1871 Two Cent Piece, PR66 Red  
One-Sided Contrast**

- 3327 1871 FS-102, Doubled Die Obverse, PR66 Red PCGS. CAC.** All 1871 proof two cent pieces were struck with a doubled obverse. This Premium Gem Red example is among the finest at PCGS and is conditionally rare as such. The strike is sharp, and the obverse displays considerable cameo contrast. Golden-orange and copper-red hues compete on each side. Population: 17 in 66 (1 in 66+) Red, 0 finer (6/16). NGC ID# 22NH, PCGS# 3647

**1872 Two Cent, PR66 Red and Brown  
Attractively Toned**

- 3328 1872 PR66 Red and Brown NGC. CAC.** Plum-red centers are encompassed by orange-gold borders. The obverse displays glimpses of sea-green. This flashy and carbon-free Premium Gem has a needle-sharp strike and an undisturbed appearance. A very low business strike mintage puts date collector pressure on all available proofs. Census: 37 in 66 (1 in 66 ★) Red and Brown, 6 finer. CAC: 13 in 66, 0 finer (6/16).  
Ex: *Central States Signature (Heritage, 4/2011)*, lot 4313. NGC ID# 2752, PCGS# 3649

**1873 Closed 3 Two Cent, PR64 Red  
Popular Final Year, Proof-Only Issue**

- 3329 1873 Closed 3 PR64 Red PCGS. CAC.** The estimated mintage of the final-year, proof-only 1873 Closed 3 two cents—the originals—is put at 600 coins or so. The reverse die is a carryover from 1872, showing a horizontal die scratch from the leaf left of the large central 2. This is a fully Red piece with bright orange coloration, although a few tiny flecks seen under a loupe appear to preclude a Gem grade. An appealing coin. Population: 24 in 64 Red, 33 finer. CAC: 3 in 64, 5 finer (6/16). NGC ID# 5L57, PCGS# 3653

**1873 Open 3 Two Cent, PR66 Brown  
Among the Finest at PCGS**

- 3330 1873 Open 3 PR66 Brown PCGS. CAC.** Forest-green, violet, and brown hues are spread over copper-orange luster on this Premium Gem Brown Open 3 proof. The strike is sharp, and the fields are modestly reflective. Although a number of Red, as well as Red and Brown coins are known in PR66, none are numerically finer in any color category. Population: 5 in 66 (1 in 66+) Brown, 0 finer. CAC: 9 in 66, 0 finer (6/16). NGC ID# 2754, PCGS# 3654

**1873 Open 3 Two Cent Piece  
PR64 Red and Brown**

- 3331 1873 Open 3 PR64 Red and Brown PCGS. CAC.** The Open 3 coins were struck later in the year, and some have suggested they may have been struck later in the 1870s, calling these pieces Restrikes. However, we doubt that any were struck after 1873. While the Closed 3 pieces have a die line through the center of TRUST, the Open 3 proofs lack that die line, a clear variety diagnostic. This Choice proof has considerable pale orange mint color with splashes of light olive. Moderately mirrored fields accompany the sharp design motifs. Population: 66 in 64 Red and Brown, 30 finer. CAC: 10 in 64, 18 finer (6/16).  
Ex: *Rosemont Signature (Heritage, 8/2013)*, lot 3268. NGC ID# 2754, PCGS# 3655

## THREE CENT SILVER

- 3332 1851 MS66 PCGS. CAC.** A lovely frost-white Premium Gem example of the debut silver three cent piece, showing unabraded surfaces and excellent eye appeal. Some minor strike weakness on the Roman numeral and the central shield is typical of the issue and type. PCGS lists 19 Superb Gems finer (7/16). NGC ID# 22YX, PCGS# 3664
- 3333 1851-O MS64 PCGS.** Some faint multicolor hues appear throughout orange-gold toning on each side of this Choice 1851-O three cent silver piece. The central shield is slightly soft, as usual, but the strike is otherwise pleasing. An important issue, being the only date in the series struck at a branch mint. NGC ID# 22YY, PCGS# 3665

### 1851-O Silver Three Cent, MS65 Colorful Toning

- 3334 1851-O MS65 PCGS. CAC.** A satiny Gem example of the only branch mint issue in the three cent silver series. This 1851-O displays excellent preservation with champagne-tinted slate-gray interiors and forest-green and cherry-red peripheral toning. The central shield is poorly defined, as usual. Population: 52 in 65 (1 in 65+), 34 finer. CAC: 11 in 65, 17 finer (6/16). NGC ID# 22YY, PCGS# 3665
- 3335 1858 MS64 PCGS.** The 1858 silver three cent is the most plentiful Type Two issue, ideal for type representation. This Choice example displays well-struck motifs and satiny original luster with dusky champagne-gray toning. There are no detracting abrasions, a benefit of the near-Gem grade. NGC ID# 22Z7, PCGS# 3674

### 1865 Three Cent Silver, MS64 Popular Low-Mintage Issue

- 3336 1865 MS64 PCGS. CAC.** From a small mintage of just 8,000 pieces, this impressive Choice specimen exhibits sharply detailed design elements, with some dramatic clash marks on both sides. The well-preserved surfaces show a mix of vibrant satiny mint luster and prooflike reflectivity, under low-intensity shades of greenish-gold toning. Population: 17 in 64, 26 finer (7/16). NGC ID# 22ZF, PCGS# 3685
- 3337 1870 AU55 PCGS.** Boasting a small mintage of 3,000 pieces, the 1870 three cent silver is elusive in all grades. This Choice AU representative displays strong detail and uniformly deep russet toning. A pleasing coin for the grade. Population: 16 in 55, 58 finer (7/16). NGC ID# 22ZL, PCGS# 3691

## PROOF THREE CENT SILVER

- 3338 1865 PR65 PCGS Secure. CAC.** The 1865 three cent silver proof, coming from a mintage of 500 pieces, is a suitable date set alternative to the elusive circulation strike issue. Bluish-gray patina on the obverse cedes to gray, orange, and bluish-green on the reverse. Sharply struck throughout and nicely preserved. Population: 28 in 65, 21 finer (6/16). NGC ID# 27CB, PCGS# 3715

### 1867 Three Cent Silver, PR66 Remarkable Multicolor Patina

- 3339 1867 PR66 PCGS. CAC.** Spectacular apple-green, cherry-red, and peach-gold patina endows this fully struck and pristine specimen. Due to prevalent fractional currency and the three cent nickel, the 1867 three cent silver has a low mintage of 4,000 business strikes and 625 proofs. Certified in a green label holder. CAC Population: 12 in 66, 3 finer (7/16). NGC ID# 27CD, PCGS# 3717

## THREE CENT NICKELS

### 1866 Three Cent Nickel, MS66+ Rarely Encountered CAC Coin

- 3340 1866 MS66+ PCGS. CAC.** The 1866 three cent nickel is scarce in MS66 and rare any finer. The present Plus-graded Premium Gem is struck from clashed and cracked dies with slight weakness along the lower obverse and upper reverse rims. The nickel-gray surfaces show a hint of iridescence and excellent preservation. Population: 33 in 66 (4 in 66+), 3 finer. CAC: 17 in 66, 6 finer (6/16). NGC ID# 22NK, PCGS# 3732
- 3341 1869 MS66 NGC.** This example is tied for the finest of the date certified by both NGC and PCGS. Each side features frosty luster and nickel-gray coloration that generate excellent eye appeal. Census: 18 in 66 (2 in 66+), 0 finer (6/16). Ex: Long Beach Signature (Heritage, 2/2005), lot 5699. NGC ID# 22NL, PCGS# 3735
- 3342 1871 MS66 PCGS.** Extensive die clashing permeates the obverse but is less noticeable on the reverse. Each side is softly lustrous with areas of translucent tan-gold patina over otherwise brilliant, nickel-gray surfaces. Clean and attractive. Population: 48 in 66 (8 in 66+), 1 finer (6/16). NGC ID# 22NN, PCGS# 3737

**1871 Nickel Three Cent, MS67  
Condition Census**

- 3343 1871 MS67 NGC.** A Condition Census rarity, and a necessary Registry Set acquisition. This Superb Gem 1871 three cent nickel displays frosty, brilliant mint luster and unabraded surfaces. The obverse fields exhibit faint parallel die striations, which deliver distinctive luster. Only four coins are certified so fine at both services combined. Census: 3 in 67, 0 finer (6/16). NGC ID# 22NN, PCGS# 3737

**1873 Nickel Three Cent, MS66  
Open 3 Condition Rarity**

- 3344 1873 Open 3 MS66 PCGS. CAC.** This is a beautifully preserved, frosty Premium Gem example with glowing champagne luster. The obverse is well-defined, but portions of the reverse wreath and Roman numerals appear to have been struck with a grease-filled die. The Open 3 1873 nickel three cent is scarcer than its Closed 3 counterpart in high grade. This CAC-approved Premium Gem is among the finest known. Population: 4 in 66 (1 in 66+), 0 finer. CAC: 4 in 66, 0 finer (6/16). NGC ID# 22NR, PCGS# 3740

- 3345 1875 MS66 PCGS. CAC.** This attractive three cent nickel exhibits well-detailed design elements, with a curving lintmark through the top of the third I in the denomination. The well-preserved surfaces are lightly toned and lustrous. Population: 28 in 66 (5 in 66+), 4 finer. CAC: 12 in 66, 4 finer (6/16). NGC ID# 22NS, PCGS# 3743

- 3346 1883 MS62 PCGS.** The 1883 nickel three cent is scarce in Mint State, coming from a small mintage of 4,000 coins. This collectible Uncirculated coin displays a full strike and satiny, gold-tinted mint luster. Minor slide marks on Liberty's cheek preclude a finer grade from PCGS. Population: 15 in 62, 29 finer (7/16). NGC ID# 2765, PCGS# 3751

**1885 Three Cent Nickel, MS64  
Eye Appeal Exceeds Expectations**

- 3347 1885 MS64 PCGS. CAC.** The smallest mintage of the series — 1,000 coins — makes the 1885 three cent nickel highly popular in all grades. But enough Mint State examples were set aside by contemporary collectors that the issue is collectible today. The present coin shows a full strike and softly frosted luster. Traces of light golden toning appear on each side. Population: 19 in 64, 31 finer (7/16). NGC ID# 275G, PCGS# 3753

- 3348 1887 MS66 PCGS.** The well-preserved surfaces of this delightful Premium Gem show much prooflike reflectivity in the fields, under subtle shades of greenish-gold toning. The design elements show some minor incompleteness of detail, due to lapping. Population: 36 in 66, 1 finer (6/16). NGC ID# 22NU, PCGS# 3755

- 3349 1888 MS67 PCGS.** The 1888 three cent nickel is available for type representation, although Superb Gems will prove elusive. This piece is fully struck and seemingly flawless. Frosty silver-white luster glows on each side. Population: 46 in 67 (1 in 67+), 1 finer (7/16). NGC ID# 275H, PCGS# 3757

**PROOF THREE CENT NICKELS**

- 3350 1865 PR64 Deep Cameo PCGS. CAC.** A stunning Choice Deep Cameo proof, and the 1865 is a rare first-year issue in proof format. This brilliant light gray piece has a bold strike and exceptional field-to-device contrast on its untoned surfaces. Population: 6 in 64 Deep Cameo, 15 finer. CAC Green: 3 in 64 Deep Cameo, 4 finer (7/16). NGC ID# 52MV, PCGS# 93761

- 3351 1867 PR66 Cameo PCGS. CAC.** Traces of warm golden toning accent the softly frosted motifs and deeply mirrored fields of this Premium Gem Cameo 1867 three cent nickel. Faint roller marks (mint-made) across the central reverse have not been fully struck out of the planchet. Population: 39 in 66 (3 in 66+) Cameo, 3 finer. CAC: 26 in 66 Cameo, 1 finer (7/16). NGC ID# 275M, PCGS# 83763

- 3352 1869 PR67 ★ Cameo NGC.** Ex: TDP Collection. The eye appeal is nothing short of breathtaking as both sides present a sharply contrasted finish in the absence of toning. A few shallow planchet voids and tiny lintmarks are the only anomalies of note. Census: 5 in 67 Cameo (3 in 67★), 0 finer (7/16).  
Ex: Long Beach Signature (Heritage, 6/2005), lot 5402; Long Beach Signature (Heritage, 9/2005), lot 1360. NGC ID# 275P, PCGS# 83765

**1869 Three Cent Nickel, PR66+ Deep Cameo**  
**Conditionally Rare**

- 3353 1869 PR66+ Deep Cameo PCGS.** A hint of champagne color warms starkly contrasted, Premium Gem-quality surfaces on this high-end 1869 proof three cent nickel. The strike is full, and the fields exhibit glimmering mirrored surfaces. Deep Cameos are rarely seen this fine, and higher-grade coins are exceedingly scarce. PCGS has certified 14 coins in PR66 Deep Cameo, with two Plus-graded examples, and a single coin finer (6/16). NGC ID# 275P, PCGS# 93765

**1869 Three Cent Nickel**  
**Premium Gem Deep Cameo**

- 3354 1869 PR66 Deep Cameo PCGS. CAC.** A sharply struck Deep Cameo, this Premium Gem proof exhibits frosty design elements set against a deeply mirrored back drop, with only a few tiny strike-throughs (as made) on Liberty's cheek. The coin appears brilliant at first glance, though closer examination reveals a hint of golden color over each side. Population: 16 in 66 (2 in 66+) Deep Cameo, 1 finer. CAC: 12 in 66, 0 finer (6/16). NGC ID# 275P, PCGS# 93765

- 3355 1870 PR66 Cameo PCGS. CAC.** A sharp Cameo proof with frosty design elements and mirrored fields. Traces of light champagne luster appear on each side, adding to the eye appeal. The 1870 proof is seldom seen so fine in the Cameo category. Population: 14 in 66 Cameo, 1 finer (7/16). NGC ID# 275W, PCGS# 83766

- 3356 1871 PR66+ PCGS. CAC.** A sharp, well-preserved Premium Gem proof with traces of light champagne toning over the mirrored fields and satiny devices. A hint of cameo contrast is present, but it is not stark enough to warrant such a designation. Population: 34 in 66 (2 in 66+), 2 finer (7/16). NGC ID# 275S, PCGS# 3767

- 3357 1871 PR66+ NGC. CAC.** A charming stone-white specimen that exhibits faint glimpses of straw-gold toning. The strike is precise, and the imperfection is a fleck or two near the outer denominational columns. Struck slightly off center toward 9 o'clock, affecting only the width of the rim. Census: 44 in 66 (2 in 66+), 8 finer (7/16). NGC ID# 275S, PCGS# 3767

- 3358 1872 PR66 Cameo PCGS.** This Premium Gem proof Cameo is fully struck, and the field-device contrast is outstanding. Warm golden toning adds to the already strong eye appeal. The 1872 proof is rarely seen this fine in the Cameo category. Population: 18 in 66 (1 in 66+) Cameo, 0 finer (7/16). NGC ID# 26JT, PCGS# 83768

- 3359 1872 PR66+ Cameo NGC.** Appreciable cameo contrast accentuates the sharp design elements of this high-end Premium Gem proof 1872 three cent nickel. The mirroring is deeper than often seen on this issue, and the eye appeal benefits. Exceedingly rare any finer in the Cameo category. Census: 27 in 66 Cameo (3 in 66+), 3 finer (7/16). NGC ID# 26JT, PCGS# 83768

- 3360 1873 Closed 3 PR66 Cameo PCGS. CAC.** A sharply detailed Premium Gem Cameo proof, this three cent nickel has light gray surfaces with lustrous devices and fully mirrored fields. Population: 21 in 66 (3 in 66+) Cameo, 1 finer (7/16). NGC ID# 275U, PCGS# 83769

- 3361 1875 PR65 Cameo PCGS Secure. CAC. Ex:** TDP Collection. A delightful Gem proof, with sharply detailed, frosty design elements and deeply mirrored fields. Dramatic field/device contrast is evident and the surfaces are exquisitely preserved. Population: 29 in 65 (5 in 65+) Cameo, 8 finer (6/16). NGC ID# 22NV, PCGS# 83771

- 3362 1876 PR66 Cameo NGC.** A hint of champagne color graces the immaculately preserved, profoundly mirrored surfaces of this Premium Gem Cameo proof. From a mintage of 1,150+ specimens. Census: 34 in 66 Cameo (4 in 66 ★ Cameo, 1 in 66+★ Cameo), 6 finer (6/16).  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 2477. NGC ID# 275W, PCGS# 83772*

**1876 Nickel Three Cent, PR67 Cameo**  
**Tied for the Finest Cameo Certified**

- 3363 1876 PR67 Cameo NGC.** Due to the rarity of Ultra Cameos, high-end Cameo proof 1876 nickel three cents are often among the finest most collectors can acquire. This Superb Gem is one of the finest at NGC. The strike is full, and the contrasted surfaces yield a blush of light golden toning. Few examples are known this well preserved. Census: 6 in 67 Cameo (4 in 67 ★), 0 finer (6/16). NGC ID# 275W, PCGS# 83772

**1877 Nickel Three Cent, PR66+**  
**Delicately Toned**

- 3364 1877 PR66+ PCGS. CAC.** A boldly struck, modestly contrasted proof 1877 three cent nickel, showing lovely lavender, ice-blue, and champagne toning over each side. This proof-only issue had a small mintage of only 900 coins, and an example is essential for a complete date set. Population: 56 in 66 (2 in 66+), 4 finer. CAC: 25 in 66, 1 finer (6/16). NGC ID# 275X, PCGS# 3773

---

**1877 Three Cent Nickel, PR66+ Ultra Cameo**

- 3365** 1877 PR66+ Ultra Cameo NGC. Ex: TDP Collection. The three cent nickel was produced exclusively in proof format in 1877, with a small mintage of just 900 pieces. This high-end Premium Gem exhibits sharply detailed design elements with deeply reflective fields that contrast profoundly with the frosty devices. Eye appeal is incredible. Census: 1 in 66 Ultra Cameo (1 in 66+), 0 finer (6/16). NGC ID# 275X, PCGS# 93773

---

**1878 Three Cent Nickel, PR67+  
Only One Finer Certified**

- 3366** 1878 PR67+ PCGS. CAC. This delightful Plus-graded Superb Gem exhibits impeccably preserved surfaces under attractive shades of greenish-gold and lavender toning. The design elements are well-detailed and the fields are moderately reflective, under the patina. Population: 17 in 67 (1 in 67+), 1 finer (6/16). NGC ID# 275Y, PCGS# 3774
- 3367** 1878 PR67 Cameo NGC. The 1877 and 1878 three cent nickel, Shield nickels, and twenty-cent pieces were only coined in proof format. This 1878 three cent piece exhibits excellent contrast between its frosty devices and deeply mirrored fields. Both sides are light gray with no evidence of toning. A spectacular Superb Gem. NGC has graded 29 coins in PR67 Cameo, with another three in that grade with the ★ designation, and two finer (6/16). NGC ID# 275Y, PCGS# 83774
- 3368** 1878 PR67 Cameo PCGS. This proof-only issue is readily available in the absolute sense, but high-end Cameos like the present piece are scarce. This Superb Gem displays full detail and has lovely mirroring in the fields. A blush of light champagne toning adds to the eye appeal. Population: 33 in 67 (5 in 67+) Cameo, 1 finer (7/16). NGC ID# 275Y, PCGS# 83774
- 3369** 1878 PR67 Cameo PCGS. CAC. A fully struck coin from heavily polished dies, showing loss of shallow detail on liberty's nose. This Superb Gem Cameo proof 1878 three cent nickel displays pleasant contrast and a hint of light champagne color. Population: 33 in 67 (5 in 67+) Cameo, 1 finer. CAC: 28 in 67 Cameo, 0 finer (7/16). NGC ID# 275Y, PCGS# 83774

---

**1878 Three Cent Nickel, PR68 Cameo  
Likely Early Die State, Tied for Finest**

- 3370** 1878 PR68 Cameo NGC. This is a stunning Superb Gem Cameo example of this proof-only date, one of three such in the three cent nickel series. The devices are well-frosted and contrast starkly against the jet-black mirrored fields, and no mentionable contact appears on either side. The last 8 in the date is frosted on the inside, while the first 8 is clear, a trait that Walter Breen's *Proof Encyclopedia* theorizes may belong to an earlier die state than the coins with the second 8 mirrored. Census: 2 in 68 Cameo, 0 finer (6/16). NGC ID# 275Y, PCGS# 83774

---

**1882 Three Cent Nickel, PR67 Deep Cameo  
Tied for Finest Certified**

- 3371** 1882 PR67 Deep Cameo PCGS. CAC. The 1882 nickel three cent proof is a rarity in Deep Cameo. PCGS and NGC have combined seen only seven Deep/Ultra Cameo submissions. This Superb Gem is tied with one other as the finest at PCGS (7/16). The strike is sharp, and the mirrored fields provide outstanding contrast. A hint of light golden color appears on each side. NGC ID# 2764, PCGS# 93778
- 3372** 1885 PR67 PCGS. CAC. The obverse displays light honey-gold toning. The reverse shows delicately variegated straw-gold patina. The pristine surfaces are well struck except for the dentils. Encapsulated in a green label holder. NGC ID# 2767, PCGS# 3781

---

**1885 Three Cent Nickel, PR67+ Cameo  
Single Finest Certified at PCGS**

- 3373** 1885 PR67+ Cameo PCGS. CAC. An amazing Plus-graded Superb Gem proof, with sharply detailed, richly frosted design elements that contrast boldly with the deeply mirrored fields to create a stunning cameo effect. Impeccably preserved, with outstanding eye appeal. From a proof mintage of 3,790 pieces. Population: 12 in 67 (1 in 67+) Cameo, 0 finer (6/16). NGC ID# 2767, PCGS# 83781

**3374 1886 PR67+ PCGS. CAC.** This sharply struck Superb Gem proof has brilliant light gray surfaces with satin luster rather than deeply mirrored fields. However, the striking format is certain as the 1886 is a proof-only issue with no associated circulation strikes. This piece is pristine with virtually flawless surfaces. Population: 68 in 67 (2 in 67+), 3 finer. CAC Green: 19 in 67, 1 finer (7/16). NGC ID# 2768, PCGS# 3782

**1887/6 Nickel, PR67 Cameo  
FS-302, Strong Overdate**

**3375 1887/6 FS-302 PR67 Cameo PCGS. CAC.** Designated as Strong Overdate by PCGS, and repunching is also apparent on the two 8s. A boldly struck Superb Gem, brilliant save for a blush of gunmetal toning on the reverse exergue. Essentially pristine, though we note a small mint-made strike-through above the denominational columns. The reverse field also shows a "rabbit ears" clash mark from the bottom of the hairbun. NGC ID# 276A, PCGS# 416357 Base PCGS# 83784

**3376 1888 PR67 Cameo PCGS. CAC.** This fully struck 1888 Superb Gem proof is only a whisper away from exhibiting Deep Cameo contrast. The coin is essentially untoned, which allows the frosty devices to stand out from the liquidlike fields. This Cameo is among the finest certified. Population: 16 in 67 (1 in 67+) Cameo, 0 finer (7/16). NGC ID# 276B, PCGS# 83785

**3377 1889 PR67 ★ NGC. CAC.** A magnificent Superb Gem, with impeccably preserved surfaces and deeply reflective fields. The design elements exhibit razor-sharp definition throughout, with broad squared off borders. Eye appeal is simply tremendous. Census: 52 in 67 (1 in 67★), 2 finer (6/16). NGC ID# 22NW, PCGS# 3786

**SHIELD NICKELS**

**3378 1867 Rays, Repunched Date, FS-301, AU58 PCGS. CAC.** *Cherrypickers'* describes the repunching as "the top of a 1 is evident far to the west of the primary 1, and the top of a 7 is evident far to the east of the primary 7." A satiny pearl-gray example with rose and lime undertones near the obverse rim. No marks are apparent. FS-301 Population: 2 in 58, 0 finer (6/16). NGC ID# 22NY, PCGS# 38319 Base PCGS# 3791

**3379 1868 MS66 PCGS.** A few spidery die cracks are evident in the lower obverse field of this impressive Premium Gem, with sharply detailed design elements and well-preserved lustrous surfaces. Attractive hints of champagne-gold and lavender toning add to the considerable eye appeal. Population: 45 in 66 (5 in 66+), 1 finer (6/16). NGC ID# 22P2, PCGS# 3795

**3380 1868 Reverse of 1868, FS-901, MS66 PCGS.** A hint of wheat-gold toning visits this highly lustrous and well-struck Premium Gem. Virtually unabraded with a small circular granular area near the C in CENTS. *Cherrypickers'* identifies six die marriages of 1868 nickels with the scarce Fletcher IIb Reverse. FS-901 has a broken C in CENTS but the other letters in CENTS, STATES, and UNITED are normal. The variety is undesignated on the PCGS holder. Population (all varieties included): 45 in 66 (5 in 66+), 1 finer (6/16). PCGS# 400244 Base PCGS# 3795

**3381 1872 MS66+ PCGS. CAC.** The olive leaves, shield lines, and stars are all fully struck on this wonderful Premium Gem Shield nickel. Radiant luster blends with shades of nickel-gray and faint accents of gold. Extensive die cracks encompass the obverse. Population: 32 in 66 (4 in 66+), 1 finer. CAC: 11 in 66, 1 finer (7/16). NGC ID# 22P6, PCGS# 3799

**3382 1873 Open 3 MS65 PCGS.** An attractive Gem, with sharply detailed design elements and an extensive network of die cracks around the central devices on the obverse. The lightly toned, lustrous surfaces are free of mentionable distractions. Population: 50 in 65 (6 in 65+), 11 finer (6/16). NGC ID# 22P8, PCGS# 3800

**1873 Open 3 Shield Nickel, MS66  
Among the Finest Certified**

**3383 1873 Open 3 MS66 PCGS. CAC.** An obvious Open 3 example, conditionally rare in this finest-achieved numeric grade. The obverse die is extensively cracked, and minor strike weakness occurs on the higher wreath leaves and the horizontal shield lines. The reverse stars are bold. Each side displays frosty silver-gray luster and unabraded surfaces. Population: 11 in 66 (3 in 66+), 0 finer (6/16). NGC ID# 22P8, PCGS# 3800

**3384 1873 Closed 3 MS65 NGC.** Because the Closed 3 date logotype was only used for the first couple months of the year, these coins are scarcer than the later Open 3 coins. This sharply defined Gem exhibits fully lustrous light gray surfaces with no evidence of toning. Census: 13 in 65, 1 finer (6/16). NGC ID# 22P7, PCGS# 3801

**1876 Shield Nickel, Sharp MS66  
Tied for Finest at PCGS and NGC**

**3385 1876 MS66 PCGS.** The strike is remarkably sharp for the issue considering the heavily cracked dies. The obverse is more reflective than the satiny reverse — a characteristic of many proofs of the issue, although the obverse die cracks and swirling luster confirm its status as a business strike. Overall, the surfaces are largely untuned despite a few faint ice-blue and pale golden hints that show up when viewed beneath a light. This is a moderately available issue in lesser grades, but pieces grading numerically finer than the current Premium Gem are nonexistent at either service. Population: 18 in 66 (2 in 66+), 0 finer (6/16). NGC ID# 22PB, PCGS# 3805

**3386 1879 AU58 PCGS. CAC.** With a mintage of only 25,900 pieces, the 1879 Shield nickel is elusive in all grades. This CAC-approved near-Mint example displays sharp detail on the motifs and traces of luster in the fields. Each side has dusky battleship-gray toning that gives the coin original appeal. NGC ID# 5KWK, PCGS# 3808

**1879 Shield Nickel, MS66+  
Delicate Pastel Toning**

- 3387 1879 MS66+ PCGS.** After a two-year hiatus, circulation-strike Shield nickel production resumed in 1879 with a small mintage of 25,900 pieces. This high-end Premium Gem is conditionally scarce. The strike is bold, and the beautifully preserved, lustrous surfaces display lovely multicolor pastel hues. Population: 28 in 66 (2 in 66+), 2 finer (6/16). NGC ID# 5KWK, PCGS# 3808

**1880 Shield Nickel, AU53  
Circulation-Strike Rarity**

- 3388 1880 AU53 PCGS. CAC.** The 1880 Shield nickel boasts the lowest business strike mintage of the series (only 16,000 coins), and is a significant key date in all grades. The typical piece is well-worn, and while XF and AU coins are occasionally seen, Mint State pieces are rare. This sharply detailed AU representative displays original golden-gray color and boldly defined motifs. No significant die cracks are observed. Population: 2 in 53, 39 finer. CAC: 1 in 53, 9 finer (7/16). NGC ID# 276E, PCGS# 3810

**1881 Shield Nickel, MS66+  
Elusive Circulation Strike**

- 3389 1881 MS66+ PCGS. CAC.** Following the two proof-only years of 1877 and 1878, the Philadelphia Mint again produced circulation strike Shield nickels from 1879 through 1883. Mintages of those coins in 1879, 1880, and 1881 were low, and high grade Mint State survivors are rare. This lovely Premium Gem exhibits delightful champagne toning over its satin surfaces. The strike is bold and the surfaces are virtually flawless. Population: 20 in 66 (3 in 66+), 5 finer. CAC: 2 in 66, 1 finer (6/16). NGC ID# 276F, PCGS# 3811

**1883/2 Shield Nickel, MS65+  
Popular Guide Book Variety**

- 3390 1883/2 FS-302 MS65+ PCGS.** The undertype 2 is evident to the west of the primary 3 in the date, with the lower curve of the 2 most prominent. Remnants of the secondary digits are also visible inside the loops of both 8s, and a spidery die crack runs through the ball of the shield and the 3, identifying the scarce FS-302 overdate. The 1883, 3 over 2 variety is listed on page 133 of the 2017 *Guide Book*.

The present coin is a high-end Gem, from the last year of the Shield design. The design elements are sharply detailed throughout, and the obverse shows an extensive network of interesting die cracks through the fields and the wreath. The mostly brilliant, well-preserved surfaces radiate satiny mint luster and show a few hints of golden-tan toning. Population: 5 in 65 (2 in 65+), 3 finer (6/16).

*From The Collection of Richard W. DeRobertis.* PCGS# 38413  
Base PCGS# 3814

**PROOF SHIELD NICKELS**

**1866 Rays Shield Nickel, PR65  
First-Year Type Coin**

- 3391 1866 Rays PR65 PCGS.** The 1866 is the only With Rays proof Shield nickel that is usually available without breaking the bank. This Gem example displays reflective fields but has moderate strike weakness on the central shield and the reverse 5. The coin is brilliant. Finer examples will prove elusive. NGC ID# 276G, PCGS# 3817

- 3392 1867 No Rays PR65 Cameo NGC.** Dark gray fields highlight the lighter motifs on this Gem Cameo Proof nickel. The devices are sharply impressed, including all shield lines and the star centrils. Great overall eye appeal. Census: 21 in 65 Cameo (1 in 65★), 15 finer (6/16). NGC ID# 5EB6, PCGS# 83821

- 3393 1868 PR65 Cameo PCGS.** Dusky golden toning warms both sides of this Gem Cameo proof 1868 Shield nickel. The strike is sharp, and the mirrored fields are free of any obvious marks. Population: 30 in 65 (1 in 65+) Cameo, 19 finer (6/16). NGC ID# 276J, PCGS# 83822

**1869 Nickel, PR67 Cameo  
Tied for Finest Certified**

- 3394 1869 PR67 Cameo NGC.** Remarkably deep mirrors are seen in the fields on each side with significant mint luster covering the devices, thus rendering the desirable cameo effect. Contrary to the often-seen proofs from 1869, this piece is strongly struck throughout. The stars are often weak on this date; however, on this example on two, located at 12 and 6 o'clock show less-than-complete definition. Very rare in such superior condition. Census: 2 in 67 Cameo, 0 finer (6/16). NGC ID# AMTZ, PCGS# 83823

**1871 Nickel, Impressive PR67 ★  
Well-Struck, Great Eye Appeal**

- 3395 1871 PR67 ★ NGC.** A pleasing level of reflectivity is present on this lovely well-struck piece, although this issue is not generally known for deep mirrorlike fields. The coin is primarily nickel-white but displays faint elements of green-gold and olive that add to the eye appeal. NGC has awarded the PR67 ★ grade to one other example, with none finer (6/16).

*Ex: Long Beach Signature (Heritage, 2/2013), lot 3731; Long Beach Signature (Heritage, 6/2013), lot 4375. NGC ID# 276M, PCGS# 3825*

- 3396 1874 PR66 Cameo PCGS. CAC.** The sharply detailed frosty design elements contrast boldly with the reflective fields, creating a dramatic cameo effect. This delightful Premium Gem offers virtually pristine surfaces with outstanding eye appeal. Population: 28 in 66 (2 in 66+) Cameo, 6 finer. CAC: 16 in 66, 1 finer (6/16). NGC ID# 276R, PCGS# 83828

**1874 Shield Nickel, PR67 Cameo  
Sole Finest CAC-Approved Example**

- 3397 1874 PR67 Cameo PCGS. CAC. Fletcher-4.** The date is repunched on Fletcher-4. This Superb Gem Cameo proof is among the finest 1874 proof Shield nickels certified, and it is the only piece in this grade with a CAC endorsement. The strike is full, and the field-device contrast is exceptional. Neither side has perceptible toning. Population: 6 in 67 Cameo, 0 finer. CAC: 1 in 67 Cameo, 0 finer (7/16). NGC ID# 276R, PCGS# 83828

**1876 Shield Nickel, PR67+  
Finest Non-Cameo at PCGS**

- 3398 1876 PR67+ PCGS. CAC.** Superb Gem 1876 proof Shield nickels are rare, with or without any degree of cameo contrast. This brilliant non-Cameo displays razor-sharp design elements and nearly flawless preservation. The fields display a balance of mirroring and cartwheel luster. Unequaled at PCGS in the non-Cameo category. PCGS has graded a single coin in PR67, and only this coin in PR67+, with none finer (6/16). NGC ID# 4S39, PCGS# 3830

- 3399 1876 PR66 Cameo PCGS. CAC.** This Premium Gem is among the finer Cameos certified by PCGS, showing nearly immaculate surfaces and obvious contrast on each side. The frosty design elements are sharply brought up. The stark, cool appearance of the nickel alloy is warmed on this coin by a light golden overlay. Population: 30 in 66 (6 in 66+) Cameo, 6 finer (7/16). NGC ID# 276T, PCGS# 83830

- 3400 1878 PR65 NGC. CAC.** Soft greenish-gray and light tan patination takes on slightly deeper hues on the reverse of this proof-only Gem. The design elements are sharply struck throughout, and the occasional trivial marks are within the parameters of the grade designation. Indeed, this coin displays nice eye appeal and is well-deserving of the CAC endorsement. NGC ID# 276V, PCGS# 3832

**1878 Shield Nickel, PR67 Cameo  
High-End Condition Rarity**

**3401 1878 PR67 Cameo PCGS. CAC.** A rare Superb Gem Cameo, showing brilliant silver surfaces and razor-sharp detail. The depth of mirroring and the overall eye appeal exceed expectations for this often poorly produced proof-only Shield nickel. Cameos grading this fine are rare and none are finer. Population: 6 in 67 Cameo, 0 finer. CAC: 4 in 67, 0 finer (7/16). NGC ID# 276V, PCGS# 83832

**3402 1879/8 PR66 Cameo PCGS.** An intricately struck and coruscating high-grade proof nickel. No detractions are apparent. The lightly dappled wheat-gold toning is more prominent on the reverse. The overdate variety constitutes a minority of the 1879 proof production. NGC ID# 22PG, PCGS# 83834

**3403 1881 PR67 PCGS.** Lightly variegated wheat-gold toning graces this lustrous and fully struck Superb Gem. An ideal proof type coin. Carbon is confined to a solitary fleck below the tip of the left arrow. Certified in an old green label holder. NGC ID# 5L6U, PCGS# 3836

**3404 1882 PR67 PCGS.** A sharp Superb Gem proof with modest cameo contrast on the obverse. The reverse displays light olive-gold toning around the borders. Among the finest 1882 proof Shield nickels certified at PCGS. Population: 44 in 67, 0 finer (6/16). NGC ID# 276Y, PCGS# 3837

**LIBERTY NICKELS**

**3405 1883 No Cents MS67 NGC.** A circle of brilliant sky-blue appears at the central obverse with vibrant champagne toning over the balance of this Superb Gem. A few scattered surface marks are minuscule and consistent with the grades. Both dies exhibit extensive die cracks. Census: 70 in 67 (1 in 67+, 4 in 67★), 0 finer (7/16). NGC ID# 2772, PCGS# 3841

**1883 No Cents Liberty Nickel, MS67+  
Finest Grade Achieved**

**3406 1883 No Cents MS67+ PCGS. CAC.** A very nearly flawless example of the famous No Cents 1883 Liberty nickel, showing a razor-sharp strike and subtly reflective fields. Peripheral die cracks are typical of the issue. This piece dazzles with vibrant luster and has a hint of light golden color. Among the finest certified. Population: 42 in 67 (1 in 67+), 0 finer (6/16). NGC ID# 2772, PCGS# 3841

**3407 1883 With Cents MS66 PCGS.** A dull nick on Liberty's neck is the singular, grade-limiting mark on this Premium Gem. The strike is bold and both sides exhibit brilliant satin luster beneath lovely light gold toning. Population: 68 in 66 (9 in 66+), 6 finer (7/16). NGC ID# 22PH, PCGS# 3844

**3408 1883 With Cents MS66+ PCGS.** While the No Cents 1883 Liberty nickel is available through MS66, the With Cents variety is elusive so fine. This Plus-graded Premium Gem displays a blush of light golden toning over satiny mint luster. Several stars and the lower-left portion of the wreath exhibit typical strike weakness. Population: 68 in 66 (9 in 66+), 6 finer (7/16). NGC ID# 22PH, PCGS# 3844

**1884 Nickel, Golden MS66  
None Finer at PCGS**

**3409 1884 MS66 PCGS.** The 1 in the date is lightly recut on this Premium Gem 1884 Liberty nickel. Examples in this grade are occasionally seen, but none are certified finer at PCGS. This piece is well-struck and beautifully preserved, with satiny mint luster and warm golden toning. Population: 41 in 66 (11 in 66+), 0 finer (6/16). NGC ID# 22PJ, PCGS# 3845

**1884 Liberty Nickel, MS67  
Tied for Finest Certified**

**3410 1884 MS67 NGC.** Light honey-gold patina visits this thoroughly lustrous and essentially immaculate Superb Gem. The strike is crisp except on the left ear of corn. Flan imperfections are confined to a tiny strike-through below star 1. The 1 in the date is lightly repunched. Although available in Uncirculated grades, the 1884 becomes a formidable conditional rarity in the present quality. Census: 2 in 67, 0 finer (7/16). NGC ID# 22PJ, PCGS# 3845

**3411 1885 AU58 PCGS.** A mostly lustrous, golden-toned near-Mint example of this key Liberty nickel issue. The usual strike weakness is seen on the lower-left portion of the wreath and on several obverse stars, although such is not overly noticeable. Eye appeal is pleasing for the grade. NGC ID# 2773, PCGS# 3846

**3412 1889 MS66 PCGS.** Never has a finer example of this issue been examined by PCGS. This frosty Premium Gem has brilliant gray surfaces with full mint luster. A horizontal wisp of champagne toning bisects the reverse. PCGS has graded 27 coins in MS66, with four Plus-graded examples, and none finer (6/16). NGC ID# 2775, PCGS# 3850

---

**1898 Nickel, Frosty MS66+  
Conditionally Elusive**

**3413 1898 MS66+ PCGS. CAC.** Frosty luster rolls around beneath light champagne toning on this high-end Premium Gem 1898 Liberty nickel. The strike is sharp, and the eye appeal is high. Finer examples of this popular type-coin issue are prohibitively rare. Population: 39 in 66 (3 in 66+), 2 finer. CAC: 20 in 66, 0 finer (6/16). NGC ID# 22PP, PCGS# 3859

**3414 1899 MS66+ PCGS. CAC.** Ebullient luster exudes from this high-end Premium Gem that exhibit sharply struck devices. Only the corn ears left of the bowknot are a tad soft. NGC ID# 22PR, PCGS# 3860

---

**1899 Nickel, Golden MS67  
Among the Finest Certified**

**3415 1899 MS67 PCGS.** An almost perfectly preserved 1899 Liberty nickel with frosty, vibrant luster and warm golden toning. The corn ear to the left of the wreath bow is slightly soft, but the obverse is sharp. Eye appeal exceeds expectations. The 1899 is rarely seen this fine and never finer. PCGS has graded five coins in MS67, with a single Plus-graded example, and none finer (6/16). NGC ID# 22PR, PCGS# 3860

---

**1900 Nickel, Lightly Toned MS67  
Tied for Finest Certified**

**3416 1900 MS67 PCGS.** A conditionally rare, top-grade example of this final 19th century Liberty nickel issue. The strike is impressively sharp, and the surfaces radiate satiny cartwheel luster beneath warm light golden toning. Only a dozen coins are this fine between PCGS and NGC combined, with none finer. Population: 9 in 67, 0 finer (6/16). NGC ID# 22PS, PCGS# 3861

---

**1901 Nickel, Frosty MS67  
Condition Census Rarity**

**3417 1901 MS67 PCGS.** As the debut Liberty nickel of the 20th century, the 1901 is a favorite type coin. This Superb Gem is tied for the finest certified and displays comparably strong eye appeal. Stars 1 and 2 are slightly soft, but the wreath is bold. A hint of champagne toning warms the frosty, radiantly lustrous surfaces. There are no mentionable abrasions. Population: 4 in 67, 0 finer (6/16). NGC ID# 277C, PCGS# 3862

**3418 1902 MS66+ PCGS. CAC.** A beautifully preserved Liberty nickel type coin, nearly fine enough to garner a Superb Gem grade. The surfaces are frosty and lightly toned in pastel hues, showcasing a vibrant cartwheel effect when rotated beneath a light. The lower-left portion of the wreath exhibits its usual softness. PCGS has certified 68 coins in MS66, with this coin and eight others in MS66+, and seven finer. CAC Green: 24 in 66, 5 finer (6/16). NGC ID# 277D, PCGS# 3863

---

**1907 Liberty Nickel, MS66+  
Only One Certified Finer**

**3419 1907 MS66+ PCGS.** An impressive Premium Gem representative of a plentiful, high mintage issue, but a rarity in grades finer than MS65. This example has a bold strike with a partially detailed ear of corn in the left wreath branch. Both sides have frosty luster with delicate gold toning across the lower obverse and pale gold toning on the reverse. Population: 45 in 66 (4 in 66+), 1 finer (7/16). NGC ID# 277J, PCGS# 3868

**1909 Nickel, Reflective MS66+  
Tied Finest at PCGS, Elusive Late Date**

**3420 1909 MS66+ PCGS. CAC.** The reflective silver surfaces could put some proofs to shame, yet this is a circulation strike with outstanding vibrancy and fullness of strike that few nickels possess. Faint wisps of peach-gold toning enhance the brilliant-silver luster that cartwheels across the gleaming surfaces. If not for a few faint marks in Liberty's chin area, this example might be unsurpassable, because the problematic ear of corn and bowknot are sharply defined and there are no other detractions. Population: 41 in 66 (5 in 66+), 0 finer. CAC: 11 in 66, 0 finer (6/16). NGC ID# 277K, PCGS# 3870

**3421 1910 MS66 PCGS. CAC.** An impressive Premium Gem with frosty mint luster, this example displays brilliant gold toning on both sides, with delicate iridescent overtones. A splendid Set Registry candidate. PCGS has certified 68 coins in MS66, with this coin and eight others in MS66+, and seven finer. CAC Green: 24 in 66, 5 finer (6/16). NGC ID# 277L, PCGS# 3871

**3422 1912-S MS64 PCGS. CAC.** The usual satiny mint luster and pale lavender-gold and gray toning characterize this near-Gem 1912-S Liberty nickel, although eye appeal is better than average for the grade. The corn ear to the left of the wreath bow is well-defined, mirroring the sharpness of the other motifs. NGC ID# 277R, PCGS# 3875

**1912-S Nickel, MS65+  
Lightly Toned, Seldom Seen Finer**

**3423 1912-S MS65+ PCGS.** Wisps of lavender and mint-green appear throughout the satiny champagne-gray surfaces of this high-end Gem 1912-S Liberty nickel. The strike is bold, and the eye appeal is typical of the issue. The 1912-S is characteristically lackluster and poorly struck, although the present coin stands above the majority in those respects. PCGS lists 38 finer submissions (6/16). NGC ID# 277R, PCGS# 3875

**PROOF LIBERTY NICKELS**

**1883 With Cents Liberty Nickel  
Starkly Contrasted PR66 Deep Cameo**

**3424 1883 With Cents PR66 Deep Cameo PCGS.** The With Cents proof 1883 Liberty nickel is an all around scarcer coin than its No Cents counterpart. PCGS has seen only seven Deep Cameo examples, including four in this grade and two finer (7/16). The present coin is fully struck and displays stark field-device contrast with a hint of light golden toning. Eye appeal is outstanding. NGC ID# AVA2, PCGS# 93881

**3425 1884 PR64 Ultra Cameo NGC.** Although a few trivial contact marks prevent a Gem grade assessment, this lovely Liberty nickel has flashy and untuned gray surfaces. The lustrous devices rest on deeply mirrored fields. Census: 1 in 64 Ultra Cameo, 3 finer (6/16). NGC ID# 22PV, PCGS# 93882

**3426 1885 PR65 PCGS.** The 1885 is a series key due to its meager commercial mintage. This fully struck and lustrous Gem is unabraded and exhibits only trivial carbon. Light straw-gold toning adorns the centers, and the obverse margin is powder-blue. Certified in a green label holder. NGC ID# 277T, PCGS# 3883

**3427 1886 PR66 PCGS. CAC.** Beautifully preserved with a hint of field-device contrast and delicate champagne and ice-blue toning in the mirrors. The strike is full, and the eye appeal is exceptional. PCGS has seen only 27 numerically finer examples (6/16). NGC ID# 277U, PCGS# 3884

**3428 1886 PR67 PCGS.** A pristine Superb Gem example with flashy luster and virtually no abrasions. While the coin has the appearance and finish of a Mint State example, it is undoubtedly a proof, as the strike is flawless. One very tiny mark is noted in the reverse field just right of the V, this being the only abrasion visible even under magnification. One cannot imagine a better preserved 130 year-old coin. Neither PCGS nor NGC has graded any numerically higher. Population: 27 in 67 (1 in 67+), 0 finer (6/16). Ex: Philadelphia Signature (Heritage Auctions, 8/2000), lot 6971. NGC ID# 277U, PCGS# 3884

**1886 Liberty Nickel, PR67  
Registry Set Quality**

**3429 1886 PR67 PCGS. Breen-2542.** The 86 in the date is lightly repunched. Light to medium peach-red toning evenly adorns this flashy and fully struck specimen. A small spot near the L in LIBERTY is the sole imperfection. Minor retained laminations (as made) are noted on the lower right obverse field. Considered a semikey due to the low mintage of the accompanied circulation issue. Population: 27 in 67 (1 in 67+), 0 finer (6/16). NGC ID# 277U, PCGS# 3884

**1888 Nickel, Champagne-Colored PR67  
Among the Finest Certified**

- 3430 1888 PR67 PCGS.** A razor-sharp proof with mirrored fields that allow for a noticeable cartwheel effect when rotated beneath a light. Warm golden toning accentuates the eye appeal, and the satiny motifs offer a hint of contrast at ideal angles. The 1888 Liberty nickel proof is rarely seen in this finest-achieved grade. Population: 8 in 67, 0 finer (6/16). NGC ID# 277W, PCGS# 3886

**1888 Liberty Nickel, Golden PR67**

- 3431 1888 PR67 PCGS. CAC.** Cameo 1888 proof Liberty nickels are rare, making high-end non-Cameos such as this piece even more appealing than they otherwise might be. The strike is bold, and the reflective surfaces display lemon-gold toning over each side. None are known numerically finer. Population: 8 in 67, 0 finer. CAC: 5 in 67, none finer (7/16). NGC ID# 277W, PCGS# 3886

- 3432 1891 PR65+ Ultra Cameo NGC. CAC.** Ultra Cameo examples of the 1891 proof Liberty nickel are rare regardless of grade. This high-end Gem displays boldly struck design elements and stark field-device contrast. A blush of warm golden toning accentuates the eye appeal. Census: 3 in 65+ Ultra Cameo, 7 finer. CAC: 5 in 65 Ultra Cameo, 7 finer (7/16). NGC ID# 548V, PCGS# 93889

**1893 Nickel, PR66 Deep Cameo  
Stark White-on-Black Contrast**

- 3433 1893 PR66 Deep Cameo PCGS.** A rare Deep Cameo example of this otherwise plentiful proof Liberty nickel, showing beautiful mirroring and preservation with starkly contrasted, frost-white motifs. The strike is full, and the eye appeal is outstanding. A Registry-grade example. Population: 2 in 66 Deep Cameo, 4 finer (7/16). NGC ID# 2783, PCGS# 93891

**1897 Liberty Nickel, PR66 Deep Cameo  
One Finer Coin at PCGS**

- 3434 1897 PR66 Deep Cameo PCGS.** This Premium Gem Cameo proof Liberty nickel has deeply mirrored fields that frame its frosty and highly lustrous devices, creating a stunning cameo effect. Both sides are nickel-gray with no evidence of toning. This example is virtually as nice as they come. Population: 4 in 66 Deep Cameo, 1 finer (6/16). NGC ID# 2787, PCGS# 93895

- 3435 1898 PR66 Cameo NGC.** Almost completely brilliant with chalky devices that are dramatically offset by unfathomably deep, glassy fields. A halo of yellow-gold toning surrounds the peripheries, adding to the eye appeal. Census: 27 in 66 (1 in 66+, 5 in 66 ★, 2 in 66+ ★) Cameo, 2 finer (6/16).  
Ex: Long Beach Signature (Heritage, 1/2004), lot 5414. NGC ID# 2788, PCGS# 83896

- 3436 1898 PR66 Cameo PCGS.** A sharply struck Premium Gem Cameo proof, showing brilliant white-on-black contrast and beautifully preserved mirrors. The 1898 proof is seldom available this fine, and higher-grade Cameos are rare. Population: 25 in 66 (2 in 66+) Cameo, 10 finer (7/16). NGC ID# 2788, PCGS# 83896

**1898 Nickel, PR67 Cameo  
Flashy and Brilliant**

- 3437 1898 PR67 Cameo PCGS. CAC.** With 1,785 proofs minted, the 1898 consistently ranks among the most challenging issues in the Liberty Head nickel series. Each side of this Superb Gem Cameo proof features deeply reflective fields that produce dramatic contrast against the frosted motifs. It should come as no surprise that contact marks are essentially non-existent. Population: 9 in 67 (3 in 67+) Cameo, 0 finer. CAC: 7 in 67, 0 finer (6/16). NGC ID# 2788, PCGS# 83896

- 3438 1900 PR67+ PCGS.** This fully struck Superb Gem 1900 proof nickel dazzles the eye, showing liquidlike mirroring in the fields and satiny design elements that offer appreciable contrast. Lovely golden toning warms each side and adds to already considerable visual appeal. Population: 34 in 67 (8 in 67+), 2 finer (7/16). NGC ID# 278A, PCGS# 3898

- 3439 1901 PR67 PCGS.** This predictably fully struck Superb Gem proof is one of 1,985 such specimens manufactured in 1901. Rarely are examples seen so fine, though. Brilliant surfaces retain considerable reflectivity in the fields without any singular flaws. Population: 40 in 67 (5 in 67+), 1 finer (7/16). NGC ID# 278B, PCGS# 3899

**3440 1901 PR66 Cameo NGC.** This is a delightful cameo proof that is virtually untoned, save for some light golden-brown peripheral color. The design elements are sharply struck, except for the leaves and corn ear left of the bowknot. A few very light flecks are noted on each side. Census: 11 in 66 (1 in 66+, 2 in 66 ★) Cameo, 8 finer (6/16).

*Ex: Dallas Signature (Heritage, 11/2005), lot 619; Central States Signature (Heritage, 4/2006), lot 1010. NGC ID# 278B, PCGS# 83899*

**3441 1906 PR67 PCGS.** A delightful Superb Gem proof, with well-detailed design elements that show just a trace of the usual softness on the lower wreath. The impeccably preserved surfaces show deeply mirrored fields under delicate shades of greenish-gold toning. Population: 13 in 67, 0 finer (6/16). NGC ID# 278G, PCGS# 3904

**3442 1907 PR67 NGC.** This boldly struck Superb Gem proof exhibits brilliant light gray surfaces with satin devices and fully mirrored fields. No evidence of toning is noted on either side. Census: 10 in 67 (2 in 67★), 0 finer (7/16). NGC ID# 278H, PCGS# 3905

**3443 1909 PR67 PCGS.** This issue's unusually high mintage of 4,763 pieces makes it popular with proof type collectors. This crisply struck Superb Gem has flashy luster beneath areas of rose-gold and orange patina. Population: 43 in 67, 3 finer (7/16). NGC ID# 278K, PCGS# 3907

## BUFFALO NICKELS

### 1913 Type Two Buffalo Nickel, MS67+ Delightful Toning, Tied for Finest

**3444 1913 Type Two MS67+ PCGS.** The Type Two 1913 Buffalo nickel is rarely seen in Superb Gem condition. This beautifully toned, Plus-graded example is tied for the finest known. The strike is well-executed, although considerable die erosion appears on each side. Luminous, softly frosted surfaces show concentric yellow-gold, mint-green, ice-blue, and pale lavender hues. PCGS has graded 23 examples in MS67, with five coins (including this piece) in MS67+, and none finer (6/16). NGC ID# 22PZ, PCGS# 3921

**3445 1913-S Type Two MS64 PCGS.** The upper obverse of this near-Gem exhibits subdued blue toning, with the lower obverse and all of the reverse displaying brilliant gold toning. An exceptional example with generally bold design definition. NGC ID# 22R3, PCGS# 3923

**3446 1913-S Type Two MS64 PCGS. CAC.** Save for the various mint error varieties, the 1913-S Type Two Buffalo nickel is the key date of the series. This Choice example is singularly outstanding for the grade, showing full definition of the devices with mattelike golden-gray patina. A few trivial grazes that limit the grade are virtually unnoticed. NGC ID# 22R3, PCGS# 3923 *From The Craig and Jeff Lehrer Collection.*

### 1913-S Buffalo Nickel, MS65 Type Two Key Issue

**3447 1913-S Type Two MS65 PCGS.** The 1913-S Type Two Buffalo nickel is a scarce key issue and examples in high grade are especially challenging. This impressive Gem offers sharply detailed design elements and impeccably preserved surfaces, with vibrant mint luster and a few highlights of greenish-gold toning. Housed in a green label holder. PCGS has graded 37 numerically finer examples (6/16). NGC ID# 22R3, PCGS# 3923

**3448 1914-D MS65 PCGS.** The light nickel-gray surfaces display matte-like luster, especially on the obverse. Well-struck design features, including the braid and the bison's horn and tail heighten the coin's eye appeal. A trivial mark on the Indian's forehead is mentioned for complete accuracy. NGC ID# 22R5, PCGS# 3925

**3449 1914-D MS65 PCGS.** This well struck early branch mint Gem has lilac-gray and chestnut-tan toning. Essentially devoid of contact, although minor carbon is noted. Certified in a green label holder. *Ex: Fred Yee Collection (Heritage, 9/2012), lot 3672, which realized \$1,292.50. NGC ID# 22R5, PCGS# 3925*  
*From The Craig and Jeff Lehrer Collection.*

**3450 1914-D MS65 PCGS. CAC.** Impressively well-preserved, glistening mint luster shows warm golden hues throughout this thoroughly eye-appealing 1914-D Buffalo nickel. The strike is slightly soft on the central high points, and the recesses and fields show minor die erosion. Finer examples of this Denver issue are scarce. NGC ID# 22R5, PCGS# 3925

### 1914-S Buffalo Nickel, MS66 Distinctive Toning

**3451 1914-S MS66 NGC.** This distinctive Premium Gem has mottled orange and gold toning over its lustrous light gray surfaces with bold design motifs on both sides. The hair braid is sharp, LIBERTY is separate from the rim, the bison's head details are complete, the crease in the foreleg is sharp, and the tail is split. All are features indicating a bold strike. This is an important opportunity for the advanced collector as finer examples are rarely encountered. Census: 22 in 66 (1 in 66+, 1 in 66★), 5 finer (7/16). NGC ID# 22R6, PCGS# 3926

**1914-S Buffalo Nickel, MS66  
Vibrant Multicolor Toning**

- 3452 1914-S MS66 PCGS. CAC.** An impressive display of gold, violet, blue, and orange toning appears on each side of this colorful Premium Gem. The strike is needle-sharp with nearly full detail on all design motifs. Brilliant luster and full mint frost appear beneath the toning for dramatic eye appeal — a challenging branch mint nickel that is virtually unobtainable any finer. CAC endorsed. Population: 35 in 66 (6 in 66+), 2 finer. CAC: 15 in 66, 0 finer (6/16).  
Ex: *Chicago Signature (Heritage, 8/2011)*, lot 3437. NGC ID# 22R6, PCGS# 3926

**1915-S Nickel, Colorful MS66  
Conditionally Scarce**

- 3453 1915-S MS66 PCGS.** The 1915-S Buffalo nickel is available through MS65, but this Premium Gem example is something of a condition rarity. Finer coins exist but are prohibitively rare. This piece shows dominant yellow-gold toning with accents of lavender and ice-blue throughout. The strike is sharp. Population: 37 in 66 (1 in 66+), 3 finer (6/16). NGC ID# 22R9, PCGS# 3929

**1916 Doubled Die Obverse Nickel, VG8**

- 3454 1916 Doubled Die Obverse, FS-101, VG8 PCGS.** The doubling on the 1916 nickel is so pronounced it is a wonder it took until 1962 to be discovered. Of course, by that time not only were most 1916 nickels heavily worn, the vast majority had been pulled from circulation altogether. This is an original coin with even wear over the devices. Both dates are equally strong. NGC ID# 2TSS, PCGS# 145628 Base PCGS# 3931  
*From The Craig and Jeff Lehrer Collection.*

**1916 Nickel, Fine 15  
Doubled Die Obverse**

- 3455 1916 Doubled Die Obverse, FS-101, Fine 15 PCGS.** A moderately circulated example of this *Guide Book* variety with green-tinted pewter-gray patina and even wear. The motifs retain pleasing detail, and the surfaces are fairly smooth. Die doubling is plainly seen on the date and the Indian's feathers, despite its long time in circulation. NGC ID# 2TSS, PCGS# 145628 Base PCGS# 3931  
*From The Craig and Jeff Lehrer Collection.*

**1917-D Nickel, Sharp MS66  
Only One Coin Finer at PCGS**

- 3456 1917-D MS66 PCGS. CAC.** A probable early strike from fresh dies, this Premium Gem nickel is exceptional in strike, surface, and eye appeal for a 1917-D. Most examples of the date are weakly struck with below-par visual appeal. Lustrous and sharply struck, the coin is one of only four at the MS66 level with CAC endorsement. Champagne-gold toning joins satiny mint luster and an absence of marks for outstanding quality. Population: 22 in 66 (1 in 66+), 1 finer. CAC: 4 in 66, 0 finer (6/16). NGC ID# 22RE, PCGS# 3935

**1917-S Nickel, Sharp MS66  
None Finer at PCGS**

- 3457 1917-S MS66 PCGS.** The 1917-S is a better Buffalo nickel issue in high grade, and this Premium Gem is among the finest at PCGS. The strike is sharp, and the surfaces display mattelike luster with a hint of light golden toning. There are no bothersome abrasions. Population: 25 in 66 (1 in 66+), 0 finer (7/16). NGC ID# 22RE, PCGS# 3936

- 3458 1918/7-D FS-101 VG8 NGC.** The diagnostic diagonal die crack above the hair braid confirms the coveted overdate variety. The date is worn but the 8 is apparent. A cream-gray representative with charcoal toning in design recesses. A tick on the obverse rim at 8 o'clock provides an identifier. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**3459** 1918/7-D FS-101 VG8 PCGS. Within the final date digit, the downstroke of the 7 appears in the right half of the upper loop and the left half of the lower loop. This cream-gray key date nickel is smooth aside from faint horizontal hairlines on the high points. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**3460** 1918/7-D FS-101 VG10 NGC. CAC. A collectible silver-gray example. The broad crossbar and downstroke of the underdigit 7 remain evident despite wear appropriate for the grade. All four date digits are readable.

*Ex: San Diego Auction (California State Numismatic Association, 1965), lot 294; Houston Signature (Heritage, 12/2012), lot 3902, which realized \$1,527.50. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939 From The Craig and Jeff Lehrer Collection.*

**3461** 1918/7-D FS-101 Fine 12 NGC. CAC. A true plucked-from-circulation example of this key Buffalo nickel variety. Although moderately worn, the pewter-gray surfaces display excellent color without distracting abrasions. The overdate feature is clear. A small planchet lamination appears in the lower-left reverse field. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939 *From The Craig and Jeff Lehrer Collection.*

1918/7-D Nickel, Choice Fine  
FS-101, Famous Overdate

**3462** 1918/7-D FS-101 Fine 15 PCGS. All four date digits are clear on this key date Buffalo nickel. The crossbar and downstroke of the 7 are apparent. Cream-gray, sea-green, and wheat-gold toning blends throughout unblemished and attractive surfaces. Unlike the 1916 Double Date, the significance of the 1918/7-D was recognized early, and the variety appears in the first (1947) *Guide Book*. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918/7-D Nickel, Very Fine  
Key World War Overdate

**3463** 1918/7-D FS-101 VF20 NGC. A predominantly pearl-gray example with glimpses of charcoal toning in protected regions. This key date nickel has a clear date and bold reverse legends. The corner notch of the underdigit 7 is readily apparent. The surfaces are moderately abraded and occasionally have an orange-peel texture, due to long-in-use dies. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918/7 Nickel, XF45  
World War I Overdate

**3464** 1918/7-D FS-101 XF45 NGC. The overdate feature is prominent on this moderately circulated nickel. The surfaces are original and lightly toned, but there are three vertical marks located on the body of the bison. Light gray patina is seen over each side with a few darker speckles of color on the obverse. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918/7-D Nickel, Sharp AU Details

**3465** 1918/7-D FS-101 — Improperly Cleaned — NGC Details. AU. The 1918/7-D is one of the keys to the Buffalo nickel series, created when an outdated 1917 head die was rehubbbed with the 1918 date. This example is mostly unworn, although a light cleaning gives the surfaces a slightly muted battleship-gray patina. The coin is well-detailed, and the overdate feature is bold. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939 *From The Craig and Jeff Lehrer Collection.*

1918-D Buffalo Nickel, Scarce MS66

**3466** 1918-D MS66 PCGS. An original and stunning Premium Gem, this 1918-D nickel is destined to compete for the finest Registry set. Both sides display brilliant satin luster beneath pastel gold toning, with light gray at the centers. The strike is uniformly sharp, and the surfaces are almost pristine. Population: 25 in 66 (2 in 66+), 1 finer (7/16). NGC ID# 22RH, PCGS# 3938

**1918-S Buffalo Nickel, MS64**  
Well-Struck and Pleasing

**3467 1918-S MS64 PCGS.** An uncommonly well-struck example of this challenging San Francisco issue, showing near-brilliant luster and satiny surfaces. The 1918-S Buffalo nickel is usually obtainable in MS64, but eye appeal varies. Finer coins are seldom encountered and remain out of reach for the average collector. PCGS has seen 39 higher-grade submissions (6/16). NGC ID# 22RK, PCGS# 3940

**3468 1919 MS66+ PCGS.** CAC. Strong luster exudes from the bright surfaces of this high-end Premium Gem. The design elements are sharply defined, including LIBERTY, the braid, and the bison's horn and tail. There are no marks or spots of consequence. NGC ID# 22RL, PCGS# 3941

**3469 1919-D MS64 PCGS.** The 1919-D Buffalo nickel is seldom found sharply struck and it is elusive in Gem condition. This collectible near-Gem displays satiny golden-gray patina with a few trivial marks. The strike sharpness is above average for the issue. NGC ID# 22RM, PCGS# 3942  
*From The Craig and Jeff Lehrer Collection.*

**3470 1919-D MS64 PCGS.** CAC. This satiny near-Gem 1919-D Buffalo nickel is impressively sharp for the issue, showing mint-gold, champagne, and powder-blue hues throughout. The surfaces are uniformly well-preserved and appealing for the issue. NGC ID# 22RM, PCGS# 3942  
*From The Craig and Jeff Lehrer Collection.*

**3471 1919-D MS64 PCGS.** CAC. An impressively sharp 1919-D nickel, struck from fresh dies. The golden-gray surfaces display smooth, satiny luster and offer tremendous eye appeal for the grade. This is a coin that would fit in well with an otherwise Gem-quality Buffalo nickel collection. NGC ID# 22RM, PCGS# 3942

**3472 1919-S MS64 PCGS.** Delicate gold and iridescent toning appears on the bluish-gray surfaces of this lustrous Choice Mint State Buffalo nickel. Myriad carbon flecks are only visible with a loupe, and prevent a higher grade. PCGS has only certified 37 finer pieces (7/16). NGC ID# 22RN, PCGS# 3943  
*From The Craig and Jeff Lehrer Collection.*

**3473 1920-D MS64 PCGS.** CAC. Light walnut-brown and pale gray toning embraces this lustrous and minimally abraded branch mint near-Gem. The strike is generally good, although the curve of the tail is soft. A better date in all grades, and desirable in the present quality.

*Ex: West Palm Beach Signature (Heritage, 7/2009), lot 256; Dallas Signature (Heritage, 3/2013), lot 3232. NGC ID# 22RR, PCGS# 3945*  
*From The Craig and Jeff Lehrer Collection.*

**1920-S Nickel, Toned MS64**

**3474 1920-S MS64 PCGS.** CAC. Ribbons of rose and green toning run through olive-gold patina on this Choice 1920-S Buffalo nickel. The design elements are well-defined, and abrasions are minimal. This issue is available through MS64, but higher-grade pieces are rare. PCGS lists 23 finer submissions (6/16). NGC ID# 22RS, PCGS# 3946  
*From The Craig and Jeff Lehrer Collection.*

**1920-S Nickel, MS65 ★**  
Intense Border Patination

**3475 1920-S MS65 ★ NGC.** Concentric bands of fire-red, jade-green, and orange-gold alternate across the borders of this lustrous and mark-free Gem. We note a small spot above the bison, and minor inexactness of impression above the braid and on the bison's head. A conditionally rare branch issue at the MS65 level. Census: 16 in 65 (1 in 65+, 2 in 65★), 5 finer (7/16). NGC ID# 22RS, PCGS# 3946

**3476 1921 MS66+ PCGS.** A wonderful Premium Gem, this scarce Buffalo nickel exhibits satiny light gray luster with vibrant gold and light blue toning. PCGS has only certified 12 of these in MS66+ and just 28 finer examples (7/16). NGC ID# 22RT, PCGS# 3947

**3477 1921-S MS63 PCGS.** An unusual specimen, with bright yellow-gray toning and excellent detail from a strong impression. A light die crack horizontally crosses the cheek, with an obverse lamination problem at 4 o'clock. A strike-through mark obscured by the toning crosses the lower feather.

*Ex: Long Beach Signature (Heritage, 10/2001), lot 5805. NGC ID# 22RU, PCGS# 3948*

*From The Craig and Jeff Lehrer Collection.*

**3478 1921-S MS63 NGC.** Gold and bluish-violet toning appear on the lustrous gray surfaces of this pleasing Select Mint State Buffalo nickel. The strike is bold and overall eye appeal is excellent. NGC ID# 22RU, PCGS# 3948  
*From The Craig and Jeff Lehrer Collection.*

**3479 1921-S MS63 NGC.** This Select 1921-S Buffalo nickel is struck from eroded dies, showing extensive flowlines in the fields and recesses, but is nonetheless well-defined on the devices. Golden-gray toning warms each side, while a few trivial abrasions do not overly detract. NGC ID# 22RU, PCGS# 3948  
*From The Craig and Jeff Lehrer Collection.*

**1923-S Buffalo Nickel, MS65  
Few Known Finer**

- 3480 1923-S MS65 PCGS.** A well-struck Gem example of this better San Francisco issue, showing satiny nickel-gray luster with hints of light golden color throughout. The recesses and fields show metal flowlines, having been struck with eroded dies. There are no obtrusive abrasions. Examples are seldom seen this fine. Population: 54 in 65 (3 in 65+), 3 finer (7/16). NGC ID# 22RW, PCGS# 3950

**1924-D Buffalo Nickel, MS65  
Above Average Strike**

- 3481 1924-D MS65 PCGS.** This issue is typically found with a flat strike, but this Gem is above average with a bold hair braid on the obverse, and sharp bison details everywhere except at the front of the head. The surfaces are splendid with satin nickel-gray luster and delicate champagne toning. PCGS has only certified eight numerically finer examples (6/16). NGC ID# 22RY, PCGS# 3952

**1924-D Buffalo Nickel, MS65+  
Boldly Struck, Lustrous Example**

- 3482 1924-D MS65+ PCGS.** The 1924-D Buffalo nickel has a reputation as a strike rarity, but this high-end Gem shows only a touch of softness on the Bison's shoulder. Subtle hints of greenish-gold and ice-blue toning enliven the well-preserved surfaces and vibrant mint luster adds to the outstanding eye appeal. Housed in a new 30th Anniversary green label holder. PCGS has graded eight numerically finer examples (6/16). NGC ID# 22RY, PCGS# 3952

- 3483 1924-S AU53 PCGS.** The 1924-S Buffalo nickel is a better date in the series, from a small mintage of 1.4 million pieces. This AU53 example displays a touch of wear on the high points of the design elements, but all major detail remains intact and the surfaces are lightly abraded. NGC ID# 22RZ, PCGS# 3953

- 3484 1924-S AU55 PCGS. CAC.** This Choice AU 1924-S Buffalo nickel displays satiny luster with olive-gold toning overall. Struck from rusted dies with scattered microscopic lumps on the obverse. A pleasing coin for the grade. CAC-approved in a green label holder. NGC ID# 22RZ, PCGS# 3953  
*From The Craig and Jeff Lehrer Collection.*

**1924-S Repunched Mintmark Nickel, MS63**

- 3485 1924-S MS63 PCGS. Repunched Mintmark.** Listed as a "Minor Variety" on the insert, this RPM is not listed in the FS reference. The repunching is indeed minor, most easily seen on the upper serif. The strike is soft, as one would expect from this issue, but the mint luster is softly frosted and each side shows subtle shadings of golden-rose and lilac. NGC ID# 22RZ, PCGS# 3953  
*From The Craig and Jeff Lehrer Collection.*

**1924-S Nickel, MS64  
Fully Struck Reverse**

- 3486 1924-S MS64 PCGS. CAC.** The 1924-S is a well-known strike rarity from the 1920s. This coin has both a strong strike on the reverse and moderate softness on the obverse. We are tempted to suggest that this could be explained by the pairing of a new reverse die with an older obverse die. The soft mint luster is covered with even gray patina that shows faint underlying golden-lilac colors. NGC ID# 22RZ, PCGS# 3953  
*From The Craig and Jeff Lehrer Collection.*

- 3487 1925 MS66+ NGC. CAC.** Both sides of this amazing Premium Gem have frosty luster with brilliant gold, russet, and blue toning with a nearly full strike. Eye appeal is outstanding, even for this high grade. NGC has seen seven finer representatives (7/16). NGC ID# 22S2, PCGS# 3954

- 3488 1925-D MS64 PCGS. CAC.** Delicate steel-green toning, shading to rose and electric-blue at the borders. The strike is relatively well defined, for the issue, and there is a single rather unobtrusive mark on the bison's hind quarter. NGC ID# 22S3, PCGS# 3955  
*From The Craig and Jeff Lehrer Collection.*

- 3489 1925-D MS64 PCGS. CAC.** This well-preserved Choice example show satiny champagne-gray luster and moderately sharp design elements. The reverse has prominent metal flowlines in the fields, produced by an excessively worn die. NGC ID# 22S3, PCGS# 3955  
*From The Craig and Jeff Lehrer Collection.*

**1925-D Nickel, MS65+  
Colorful Peripheral Toning**

- 3490 1925-D MS65+ PCGS.** Vivid rainbow toning surrounds ivory-white interiors on this high-end Gem 1925-D Buffalo nickel. The strike is above-average for the issue, and the eye appeal also surpasses expectations. The reverse is rotated slightly counterclockwise. PCGS has seen 11 finer submissions (6/16). NGC ID# 22S3, PCGS# 3955

- 3491 1925-S MS64 PCGS.** The 1925-S is very challenging in the better circulated grades and is unquestionably scarce in Mint State. But it is even better known as one of the great strike rarities in the Buffalo nickel series. This particular piece is very close to full strike status on the obverse, and on the reverse only the slightest weakness on the bison's head keeps it from being completely detailed. Richly toned with gray-lilac and rose toning intermixed on each side, this is a well-defined, well-balanced example of this important Buffalo nickel issue.

*Ex: Long Beach Signature (Heritage, 6/2001), lot 7915; ANA Signature (Heritage, 3/2003), lot 5438. NGC ID# 22S4, PCGS# 3956 From The Craig and Jeff Lehrer Collection.*

**1925-S Buffalo Nickel, MS64+**

- 3492 1925-S MS64+ PCGS. CAC.** The 1925-S Buffalo nickel is a well-known strike rarity, but this high-end Choice specimen shows well-detailed design elements, with just a touch of softness on the bison's shoulder and head. The pleasing nickel-gray surfaces are well-preserved, with somewhat muted satiny mint luster. PCGS has graded 29 numerically finer examples (6/16). NGC ID# 22S4, PCGS# 3956

- 3493 1926 MS67 PCGS. CAC.** This incredible Superb Gem Buffalo nickel exhibits pinpoint definition on all design elements while the unmarked, brilliant-silver surfaces show fleeting shades of champagne-gold and ice-blue. Vibrant, satiny mint luster adds to the tremendous visual appeal. Other nickels may be its equal, but it is doubtful many can exceed the combination of outstanding eye appeal and Mint-fresh allure. Population: 37 in 67 (1 in 67+), 0 finer. CAC: 8 in 67, 0 finer (6/16).

*Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3183. NGC ID# 22S5, PCGS# 3957*

**1926-S Nickel, CAC-Approved AU58  
Semikey Buffalo**

- 3494 1926-S AU58 PCGS. CAC.** A better date, boasting a small mintage for the series of 970,000 coins. This near-Mint 1926-S Buffalo nickel displays bold detail with satiny pewter-gray patina that has wisps of gold throughout. The CAC green label confirms the eye appeal. This piece resides in the ideal collecting grade, just shy of the more expensive Mint State category. NGC ID# 22S7, PCGS# 3959 *From The Craig and Jeff Lehrer Collection.*

- 3495 1927-S MS63 PCGS.** The 1927-S is a semikey issue and one of the more challenging strike rarities from the 1920s. This is a well-struck example whose surfaces are muted gray-nickel with subtle underlying iridescence. NGC ID# 22SA, PCGS# 3962

**1927-S Buffalo Nickel, Condition Rarity  
Key Series Issue in Gem**

- 3496 1927-S MS65 PCGS.** While the 1927-S is often encountered in lower grades, Mint State coins have always been challenging to locate and Gem or finer examples are genuinely rare. The San Francisco Mint pushed die usage to its maximum in the 1920s, with the majority of Uncirculated survivors showing the effects to one extent or another. This lovely Gem example fared better than most, with only slight weakness at the lower reaches of the 19 in the date, and minor flattening at the letter tops of TED in UNITED and at STATES.

Overall, the strike is sharp across the central motifs and at the remaining edge devices. Each side of the coin presents deep-seated mint luster to complement attractive toning — the obverse with steel-blue shades and lavender overtones, with wheat-gold hues at the rims. The reverse extends the reach of wheat-gold toning, with reddish-gold highlights. PCGS reports just one numerically finer 1927-S nickel. Population: 36 in 65 (3 in 65+), 1 finer (6/16). NGC ID# 22SA, PCGS# 3962

**1934 Buffalo Nickel, MS67  
None Numerically Finer at PCGS**

- 3497 1934 MS67 PCGS.** A spectacular Superb Gem example of this popular date, with sharply detailed design elements throughout and especially vibrant mint luster. The impeccably preserved, mostly brilliant surfaces show a few hints of greenish-gold toning. Housed in a new 30th Anniversary green label holder. Population: 30 in 67 (2 in 67+), 0 finer (6/16). NGC ID# 22SL, PCGS# 3972

**1935 Buffalo Nickel, MS67+  
Only One Finer Coin at PCGS**

- 3498 1935 MS67+ PCGS.** A high-end Superb Gem representative of this popular date, with razor-sharp definition on all design elements and impeccably preserved lustrous surfaces. A few hints of pale gold toning augment the incredible eye appeal. Housed in a new 30th Anniversary green label holder. PCGS has graded a single example finer (6/16). NGC ID# 22SN, PCGS# 3974

**1935 Nickel, MS67+  
Lustrous and Unabraded**

- 3499 1935 MS67+ NGC.** Brilliant and lustrous with an exceptional strike. Only the hair above the braid shows any incompleteness. The mattelike surfaces appear devoid of contact, though we note one tiny fleck on the Indian's forehead. Census: 42 in 67 (4 in 67+, 5 in 67★, 1 in 67+★), 1 finer (7/16). NGC ID# 22SN, PCGS# 3974

- 3500 1936-D MS67 PCGS. CAC.** Ex: The Tom Mershon Collection. Bright luster emanates from impeccably preserved surfaces that display soft rose and ice-blue coloration. Intricate design detail is evident throughout. Strike doubling appears on the date and the Indian's profile. Population: 68 in 67 (1 in 67+), 2 finer. CAC: 14 in 67, 0 finer (6/16).  
Ex: *FUN Signature (Heritage, 1/2012)*, lot 5333. NGC ID# 22ST, PCGS# 3978

- 3501 1937 MS67+ PCGS. CAC.** Pastel rose-red, sky-blue, and jade-green shades endow this satiny and mark-free Superb Gem. The strike is full except on the hair above the braid. PCGS has only graded eight finer examples (7/16). NGC ID# 22SX, PCGS# 3980

- 3502 1937-D Three-Legged, FS-901, AU58 PCGS.** The granular back leg and die erosion on the field between the legs are diagnostic of the prized Three-Legged nickel. This lustrous olive-gray representative is free from relevant marks and will please the most demanding numismatist. Certified in a first generation holder. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3503 1937-D Three-Legged, FS-901, AU58 NGC.** Medium gunmetal-gray and lavender toning embraces this coruscating and lightly abraded key date nickel. All diagnostics are present, including the granular back leg of the bison, and a series of tiny die lumps beneath the bison's flank. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982  
*From The Craig and Jeff Lehrer Collection.*

- 3504 1937-D Three-Legged, FS-901, MS60 ANACS.** A coruscating silver-gray example of the famous lapped die mint error. Well defined and unabraded with a smattering of pinpoint carbon. Encased in a small-sized holder. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3505 1937-D Three-Legged, FS-901, MS61 ANACS.** A lustrous and essentially unabraded steel-gray and stone-white key date representative. A lens reveals moderate granularity and scattered pinpoint flecks. Certified in a small-sized holder. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3506 1937-D Three-Legged, FS-901, MS61 ANACS.** Vibrant cartwheel luster dominates this unblemished gunmetal-gray key-date nickel. The strike is bold aside from blending on the bison's hip. Peripheral die erosion is characteristic of the heralded variety. Housed in a small-sized holder. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Buffalo, MS63  
Guide Book Variety**

- 3507 1937-D Three-Legged, FS-901, MS63 PCGS. CAC.** A well-struck example of this scarce and always popular Buffalo nickel variety. There are a few small, stray marks on each side, and the luster is not quite fulsome enough to warrant a higher grade, being essentially untuned. The surfaces have an unusually high degree of the granularity, related to die erosion, which is common to this issue. This as struck feature of the coin does not, in theory, affect the technical grade of the piece.  
Ex: *Dallas Signature (Heritage, 7/2006)*, lot 506. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982  
*From The Craig and Jeff Lehrer Collection.*

**1937-D Three-Legged Nickel, MS64  
Sharp Strike, Smooth Satiny Appeal**

- 3508 1937-D Three-Legged, FS-901, MS64 NGC.** The Indian's braid knot and upper hair detail is strong, although as always, a few areas on the reverse are slightly weak from the single die pair that was used to create the famous variety. A string of raised die lumps (rust pits) extend between the fore and hind legs, curving up from the mound top to the crest of the left rear leg. Lilac accents join golden highlights and satiny luster for nice eye appeal. One or two minor nicks and some planchet roughness on the Indian's neck determine the near-Gem grade. NGC reports only 82 numerically finer examples of this classic Buffalo nickel anomaly (7/16). NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1938-D/D Buffalo Nickel, MS68**

- 3509 1938-D/D MS68 NGC.** Although overshadowed by the various 1938-D/S die varieties, the 1938-D/D is also impressive. The mintmark was initially entered tilted right, then entered level, southeast of the first impression. Evidence of the first mintmark includes a stand west of the prominent mintmark, and a curve inside the prominent mintmark. The present highly graded example displays rich lavender-red, apple-green, and apricot-gold toning. NGC ID# 22T2, PCGS# 93984 Base PCGS# 3984

**PROOF BUFFALO NICKELS**

**1913 Type One Buffalo Nickel, PR65  
Toned Proof Type Coin**

- 3510 1913 Type One PR65 PCGS Secure.** A razor-sharp matte proof type coin with rich olive toning and well-preserved surfaces. Eye appeal surpasses expectations for the PR65 grade level. The Type One 1913 proof is not a particularly rare issue in most grades, but its status as a one-year "bison on mound" type coin heightens collector demand. NGC ID# 278R, PCGS# 3988

**1914 Nickel, Delicately Toned PR67  
Lovely Luster and Eye Appeal**

- 3511 1914 PR67 PCGS. CAC.** This glistening Superb Gem proof is not quite as sharp on the central obverse as most matte proof Buffalo nickels, but the textured surfaces and broad rims do not deny its form of strike. Concentric pastel hues of yellow-gold, ice-blue, and pale lavender add considerably to the already strong eye appeal. The preservation is outstanding. Population: 89 in 67 (6 in 67+), 11 finer. CAC: 43 in 67, 3 finer (6/16). NGC ID# 278T, PCGS# 3991

**1915 Buffalo Nickel, PR67  
Razor-Sharp Matte Proof**

- 3512 1915 PR67 PCGS.** Chiseled design elements give this Superb Gem proof Buffalo nickel a sharp, rugged appearance, set aglow by the soft luster that is diagnostic of the matte finish. Each side is seemingly pristine and is cast in a pale pastel hue. Proof nickel coinage dropped to 1,050 pieces in 1915, and high-end examples are seldom seen. Population: 69 in 67 (10 in 67+), 4 finer (6/16). NGC ID# 278U, PCGS# 3992

**1915 Nickel, Delicately Toned PR67+  
Remarkable Proof Type Coin**

- 3513 1915 PR67+ PCGS. CAC.** From a small mintage of 1,050 pieces, this Superb Gem matte proof 1915 Buffalo nickel is nearly Condition Census quality. The strike is full, and the luster glistens on each side. Lovely pastel shades of ice-blue, lavender, yellow-gold, and mint-green adorn the surfaces, delivering exceptional eye appeal. Population: 69 in 67 (10 in 67+), 4 finer. CAC: 28 in 67, 3 finer (6/16). NGC ID# 278U, PCGS# 3992

- 3514 1936 Type One — Satin Finish PR67 PCGS.** The first proofs of 1936 employed a Satin finish, like the present coin. This impressive Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces radiate vibrant satiny mint luster. PCGS has graded 41 numerically finer examples (6/16). NGC ID# 278X, PCGS# 3994

- 3515 1936 Type Two — Brilliant Finish PR66 PCGS.** Lavender and light golden hues appear on each side of this Premium Gem Type Two proof 1936 nickel. The strike is full, and the eye appeal is pleasing. Finer examples exist, although the accessibility of the present coin makes it highly appealing. NGC ID# 278Y, PCGS# 3995

**1936 Type Two Nickel, PR67+ Brilliant Finish**

- 3516 1936 Type Two — Brilliant Finish PR67+ PCGS. CAC.** The population data for 1936 nickels show virtually identical numbers of Type One and Type Two proofs have been graded, suggesting they were production in about equal quantities. This Superb Gem proof exhibits a rainbow of toning from gold and amber, to green and violet. A stunning example for the connoisseur. CAC: 72 in 67, 5 finer (7/16). NGC ID# 278Y, PCGS# 3995

- 3517 1937 PR66 PCGS.** Pale ice-blue and glimmering champagne hues appear over the deeply mirrored surfaces of this Premium Gem 1937 proof Buffalo nickel. The strike is full, and the preservation matches the eye appeal. NGC ID# 278Z, PCGS# 3996

**1937 Nickel, Toned PR67+ Distinctive Coloration**

- 3518 1937 PR67+ PCGS. CAC.** Pistachio-green, pink, and yellow-gold hues intermingle over each side of this high-end Superb Gem proof 1937 Buffalo nickel. The strike is full, and the mirrored fields beautifully illuminate the patina. This issue is plentiful through PR67, but higher-grade coins are scarce. Thus the appeal of the present Plus-graded, CAC-endorsed representative. PCGS lists 31 finer submissions (7/16). NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

- 3519 1938 MS67 Full Steps PCGS.** The porch steps and all other details of Monticello are bold on this Superb Gem first-year Jefferson nickel. Both sides are brilliant and fully lustrous, exhibiting untuned light gray surfaces. PCGS has certified 25 coins in MS67 Full Steps, with a single Plus-graded example, and none finer (6/16). NGC ID# 22T4, PCGS# 84000

- 3520 1938-S MS68 PCGS.** An extraordinary Superb Gem, this is the single finest example that PCGS has certified (6/16). Both sides have satiny light gray luster with splendid blue, gold, and amber toning that is especially evident on the obverse. This coin is a must have example for the Jefferson nickel connoisseur. NGC ID# 22TB, PCGS# 4002

**1938-S Jefferson Nickel, MS67 Full Steps Registry-Grade Condition Rarity**

- 3521 1938-S MS67 Full Steps PCGS.** The 1938-S is challenging with Full Steps definition, and such coins are downright rare in Superb Gem condition. The present coin is among the finest certified. Softly frosted luster show light champagne toning, and the surfaces are delicately preserved. Population: 12 in 67 Full Steps, 0 finer (6/16). NGC ID# 22T6, PCGS# 84002

**1939 Jefferson Nickel, MS67+ Full Steps Reverse of 1940, Only One Finer at PCGS**

- 3522 1939 Reverse of 1940 MS67+ Full Steps PCGS.** The strongly impressed straight steps on Monticello identify the popular Reverse of 1940. This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and virtually pristine surfaces, with vibrant mint luster throughout. Attractive shades of champagne-gold and ice-blue toning add to the incredible eye appeal. Population: 53 in 67 (6 in 67+) Full Steps, 1 finer (6/16). NGC ID# 22T8, PCGS# 894003

**1939 Nickel, Glistening MS67 FS-801, Doubled Monticello**

- 3523 1939 Doubled Monticello, FS-801, MS67 PCGS. CAC.** Now considered scarce in Mint State, the 1939 variety with the doubled reverse die was unknown in Mint State until the last few decades years. A small number of rolls were discovered in the late 1980s, yet Dave Bowers writes "whatever the supply of Mint State coins may be, say fewer than 200, it is a drop in the bucket in comparison to the desire for them."

Sharply detailed with frosty mint luster, the surfaces of this piece exhibit pale blue and light champagne toning on each side. About four steps are still visible on Monticello. Population: 7 in 67 (1 in 67+), 0 finer. CAC: 2 in 67, 0 finer (6/16).  
*Ex: Baltimore Signature (Heritage, 7/2003), lot 6373; FUN Signature (Heritage, 1/2004), lot 5488; Summer FUN Signature (Heritage, 6/2008), lot 508.*

*From The Collection of Richard W. DeRobertis.* NGC ID# 22T8, PCGS# 38481 Base PCGS# 4004

**3524 1939-D Reverse of 1938 MS67 Full Steps PCGS.** Warm sun-gold toning accents the softly frosted surfaces of this top-grade Registry coin, while the strike is sharp and the preservation is outstanding. The Reverse of 1938 shows wavy steps on Monticello. High-grade Full Steps examples are rare. Population: 13 in 67 (1 in 67+) Full Steps, 0 finer (7/16). NGC ID# 22T9, PCGS# 84005

**3525 1939-D Reverse of 1938 MS67 Full Steps PCGS.** A Registry-grade example of the Reverse of 1938, showing soft, wavy steps on Monticello. This top-grade 1939-D nickel displays frosty, golden-toned luster and boldly rendered design elements. The preservation is outstanding. Population: 13 in 67 (1 in 67+) Full Steps, 0 finer (7/16). NGC ID# 22T9, PCGS# 84005

**3526 1939-D Reverse of 1938 MS67 Full Steps PCGS.** A wavy set of five Full Steps confirms the 1938 reverse, always less distinct than the 1940 reverse type. Perhaps 25% of the 1939-D issue was struck with the earlier reverse motif. The series key, very scarce with Full Steps and always in demand. This Superb Gem example displays flashy satin luster beneath stately golden-lilac toning and a relatively strong strike for the subtype. None are certified finer with confirmed Full Steps. Population: 12 in 67 (1 in 67+) Full Steps, 0 finer (7/16). NGC ID# 22T9, PCGS# 84005

**3527 1939-S Reverse of 1938 MS67 Five Full Steps NGC.** A vertical die crack bisects Monticello on the reverse of this sharply struck 1939-S Jefferson nickel. The sharply detailed porch steps are wavy on the Reverse of 1938. Both sides of this Superb Gem exhibit delicate champagne toning on lustrous light gray surfaces. Census: 1 in 67 Full Steps, 0 finer (7/16). NGC ID# 22TB, PCGS# 84006

#### 1940 Nickel, MS68 Six Full Steps The Single Finest at NGC

**3528 1940 MS68 Full Steps NGC.** A virtually flawless 1940 Jefferson nickel with tack-sharp definition of Monticello. This is the sole finest NGC-certified example, and it is tied with a single MS68 Full Steps coin at PCGS (6/16). The champagne-tinted, softly frosted surfaces are beautifully preserved, and the Registry appeal is unsurpassed. NGC ID# 22TD, PCGS# 74007

#### 1942 Type One Nickel, Good 6 On a Silver Alloy Planchet Extremely Rare Transitional Error

**3529 1942 Type One — Struck on a Silver Alloy Planchet — Good 6 PCGS Secure.** 4.7 gm. 1943-dated cents struck on copper planchets bring spectacular prices, but similar wartime wrong alloy transitional errors on Jefferson nickels are significantly rarer. Our online auction archives reveal only two examples, both 1944-P nickels struck on copper-nickel planchets (lot 5610 in our August 2001 Signature, and lot 10306 in our June 2004 Signature). The present lot is struck from sans-mintmark Type One dies, yet is struck in the silver alloy composition associated with the Type Two design bearing a large P mintmark above Monticello. This lightly marked cream-gray example displays wear on the motifs but the legends are fully readable and show only slight blending with the rim. Included with the lot is a two-page typed authentication letter, dated May 20, 1965, and signed in ink by Walter Breen, and a clipping of a June 16, 1965 Coin World article written by Breen that reported his determination. NGC ID# 22TL, PCGS# 4013

#### 1942-D Nickel, MS64+ Full Steps D Over Horizontal D, FS-501

**3530 1942-D D Over Horizontal D, FS-501, MS64+ Full Steps PCGS.** The *Cherrypickers' Guide* calls FS-501 "the rarest of the major Jefferson nickel varieties in Mint State." Beautiful orange-gold and sea-green toning competes for territory across this fully struck and lustrous near-Gem. A loupe is required to locate even the most inconsequential contact. Population: 1 in 64+ Full Steps, 7 finer (7/16). NGC ID# 22TL, PCGS# 38496 Base PCGS# 84015

**3531 1942-P Type Two MS67+ Full Steps PCGS.** Always a popular coin for type collectors, the Type Two was primarily a silver composition, created because nickel was more needed for the war effort. This is a lovely coin with subtle iridescence over each side. Fully struck and nearly abrasion-free. Population: 64 in 67 (5 in 67+) Full Steps, 0 finer (7/16). NGC ID# 22TM, PCGS# 84016

**3532 1942-S MS67 Full Steps PCGS.** Spectacularly toned in shades of ice-blue, lemon-yellow, lavender, and sea-green, this delightful Superb Gem offers vibrant mint luster and outstanding eye appeal. The design elements are sharply detailed, with Full Steps definition on Monticello. Population: 33 in 67 (1 in 67+) Full Steps, 0 finer (6/16). NGC ID# 22TN, PCGS# 84017

**3533 1942-S MS67 Full Steps PCGS.** This Superb Gem Registry coin displays softly frosted luster and a bold strike, with varying shades of golden toning spread over each side. Among the finest certified and conditionally scarce as such. Population: 33 in 67 (1 in 67+) Full Steps, 0 finer (7/16). NGC ID# 22TN, PCGS# 84017

- 3534 1942-S MS67 Full Steps NGC.** A blazing silver-white Superb Gem 1942-S Jefferson nickel and among the finest Full Steps coins at NGC. The dies that struck this piece were crudely lapped, showing extensive parallel striations that deliver a uniquely satiny appearance. Census: 23 in 67 (1 in 67 ★) Full Steps, 0 finer (7/16). NGC ID# 22TN, PCGS# 84017

**1943/2-P Jefferson Nickel, MS66 Full Steps  
Wartime Silver Composition Overdate**

- 3535 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS.** A 1942-P working die was repunched with a 1943-P master die. As a result, the diagonal of a 2 is clearly visible beneath the 3. Other evidence of the doubling is visible on LIBERTY and IN GOD WE TRUST, and in other areas on the coin. This is a fully struck example, brightly lustrous with a hint of lemon-gold tone over the wartime silver surfaces. Close to six full steps are visible on this coin. Population: 41 in 66 (5 in 66+) Full Steps, 5 finer (6/16). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

- 3536 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS.** This sought-after *Guide Book* variety was created when an outdated 1942 obverse die was rehubbbed with the 1943 date. Remnants of the underlying 2 in the date and slight doubling of the peripheral legends are products of the rehubbbing. This example displays frosty, fresh mint luster with the occasional hint of light golden color. The strike is sharp, and the surfaces are largely free of disturbances. NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

**1943/2-P Nickel, MS67 Full Steps  
Blazing Frost-White Luster**

- 3537 1943/2-P Doubled Die Obverse, FS-101, MS67 Full Steps PCGS.** This popular overdate also exhibits minute die doubling on the obverse legends. This Superb Gem is tied with four others as the finest at PCGS (6/16). The brilliant, vibrant surfaces showcase frosty luster, illuminating bold design elements. Close study fails to identify noteworthy abrasions. Metal flow lines are seen around the peripheries, but the overdate feature is clear. NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

- 3538 1943-P Doubled Die Obverse, FS-106, MS66 Full Steps PCGS.** The popular "Doubled Eye" *Guide Book* variety. Die doubling is also apparent on the obverse legends. Nicely struck and lustrous with light almond-gold patina. Population: 18 in 66 (1 in 66+) Full Steps, 4 finer (6/16). NGC ID# 22TP, PCGS# 38498 Base PCGS# 84174

- 3539 1943-P Doubled Die Obverse, FS-106, MS66 Full Steps PCGS.** Jefferson's eye is widely die doubled, diagnostic for the *Guide Book*-listed FS-106. The date and other obverse legends also exhibit a discernible clockwise spread. This sharply struck and lightly toned Premium Gem is virtually devoid of contact. NGC ID# 22TP, PCGS# 38498 Base PCGS# 84174

**1943-D Nickel, MS68 Full Steps  
Registry Set Quality**

- 3540 1943-D MS68 Full Steps PCGS.** This silver alloy war nickel displays multihued pastel toning atop vibrant, frosty mint luster. The strike is razor-sharp, and the preservation is unsurpassed. Although the 1940 Jefferson nickel is plentiful through MS67 Full Steps, this MS68 Full Steps coin is among only a handful of pieces that qualify for the Condition Census. Population: 4 in 68 Full Steps, 0 finer (6/16). NGC ID# 22TS, PCGS# 84020

- 3541 1944-S MS67 Full Steps PCGS.** Wisps of lavender-blue appear throughout the golden-toned, frosty surfaces of this Superb Gem Full Steps 1944-S nickel. The strike is sharp, and the eye appeal is pleasing. This conditionally scarce Registry coin is second to only a single numerically finer representative at both services combined. Population: 49 in 67 (5 in 67+) Full Steps, 1 finer (7/16). NGC ID# 22TW, PCGS# 84024

- 3542 1944-S MS67 Full Steps PCGS.** A beautifully preserved, golden-toned Superb Gem Full Steps example, ideal for Registry collections. A thin, bisecting die crack stretches vertically across the reverse from the B in PLURIBUS to the O in OF. This issue is scarce so well-preserved and almost unknown finer. Population: 49 in 67 (5 in 67+) Full Steps, 1 finer (7/16). NGC ID# 22TW, PCGS# 84024

- 3543 1944-S MS67 Full Steps PCGS.** Olive-gold toning dominates both sides, but blushes of steel-blue are noted near Jefferson's eye and the TS in CENTS. Population: 46 in 67 (4 in 67+) Full Steps, 1 finer (6/16). NGC ID# 22TW, PCGS# 84024

- 3544 1944-S MS67 Full Steps PCGS.** This frosty, Registry-grade Superb Gem displays primarily yellow-gold toning over lustrous surfaces, but wisps of pale lavender-blue appear in the lower-reverse fields. The 1944-S is elusive so fine with Full Steps and only a single piece is finer. Population: 49 in 67 (5 in 67+) Full Steps, 1 finer (7/16). NGC ID# 22TW, PCGS# 84024

**1944-S Nickel, MS67+ Full Steps  
Vibrant Rainbow Toning**

- 3545 1944-S MS67+ Full Steps PCGS.** A conditionally rare Registry-grade example of this wartime San Francisco issue, showing bold design elements and blazing luster. Vivid rainbow toning surrounds much of the reverse and appears along the left obverse border. The remainder of the obverse is ice-blue and champagne in color. Only a single coin is known finer. Population: 49 in 67 (5 in 67+) Full Steps, 1 finer (7/16). NGC ID# 22TW, PCGS# 84024

- 3546 1945-P MS67 Full Steps PCGS.** Lustrous silver-white surfaces provide both sides of this Superb Gem with immediate eye appeal. Closer examination reveals the clarity of the steps, further adding to the appeal. Areas of light toning are present, with hues of gold, lavender, and pale blue appearing on portions of the reverse along with a number of die lines. The mintmark exhibits repunching south. A couple of minuscule marks are not distracting. Population: 12 in 67 (2 in 67+) Full Steps, 0 finer (6/16). NGC ID# 22TX, PCGS# 84025

**1945-P Nickel, MS67 Full Steps  
Stellar Eye Appeal**

- 3547 1945-P MS67 Full Steps PCGS.** This final-year silver-alloy Jefferson nickel is among the finest certified and is conditionally rare as such. The present coin is sharp and beautifully preserved with a hint champagne color cast over frost-white mint luster. There are no distracting abrasions. Population: 12 in 67 (2 in 67+) Full Steps, 0 finer (6/16). NGC ID# 22TX, PCGS# 84025

- 3548 1946 MS66 Full Steps PCGS.** Attractive shades of pale gold and cerulean-blue toning enhance the virtually pristine, lustrous surfaces of this remarkable Premium Gem. The design elements are sharply detailed throughout, with Full Steps on Monticello. Population: 26 in 66 Full Steps, 0 finer (6/16). NGC ID# 22U2, PCGS# 84028

**1946-D Nickel, MS67+ Full Steps  
Tied for Finest at PCGS, Lovely Toning**

- 3549 1946-D MS67+ Full Steps PCGS.** A sharp Full Steps Superb Gem and one of only three Plus-designated pieces in this grade at PCGS (6/16). Smooth, satiny surfaces display lovely multicolor toning over each side, accentuating the immaculate preservation. Finer than the pieces in both of the current highest-rated Registry Set. Population: 14 in 67 (3 in 67+) Full Steps, 0 finer (6/16). NGC ID# 22U3, PCGS# 84029

**1946-D FS-501 Nickel, MS67  
D Over Inverted D**

- 3550 1946-D D Over Inverted D, FS-501, MS67 PCGS.** The mintmark was initially entered upside down, then corrected. The curve of the first D impression is apparent west of the upright. Beautiful caramel-gold, jade-green, and powder-blue toning endows this highly attractive Superb Gem. A tick on the left border of the stairs precludes a Full Steps designation. NGC ID# 22U3, PCGS# 38507 Base PCGS# 94029

- 3551 1946-D/D D Over Inverted D, FS-501, MS66+ Full Steps PCGS.** This popular *Cherrypickers'* variety shows the mintmark repunched over a previous, inverted D. The present coin is tied for the finest FS-501 coin attributed by the grading services. The strike is bold, and the satiny surfaces display warm golden-gray toning. Population: 11 in 66 (3 in 66+) Full Steps, 0 finer (7/16). NGC ID# 22U3, PCGS# 38508 Base PCGS# 894029

- 3552 1947 MS67 Five Full Steps NGC.** A lovely Superb Gem with a bold strike featuring five complete steps to Monticello's porch. This example has brilliant mint luster with frosty surfaces beneath light champagne toning. Census: 1 in 67 Full Steps, 0 finer (7/16). NGC ID# 22U5, PCGS# 84031

**1947-S Nickel, MS67 Five Full Steps  
Important Registry Entry**

- 3553 1947-S MS67 Five Full Steps NGC.** Light chestnut-gold toning visits the borders of this lustrous and magnificently preserved Superb Gem. As of (7/16), NGC has certified 15 1947-S nickels at the MS67 level, but only two of those pieces are certified as MS67 Five Full Steps. Additionally, NGC has certified eight pieces as Six Full Steps, but none finer than MS66. NGC ID# 22U7, PCGS# 84033

**1948 Jefferson Nickel, MS66+ Full Steps  
Registry Set Essential**

- 3554 1948 MS66+ Full Steps PCGS.** The design elements of this Plus-graded Premium Gem exhibit sharp definition throughout, including Full Steps detail on Monticello. The virtually pristine surfaces display highlights of greenish-gold and ice-blue toning, with vibrant mint luster underneath. Population: 16 in 66 (1 in 66+) Full Steps, 0 finer (6/16). NGC ID# 22U8, PCGS# 84034

**1948-S Nickel, MS67 Five Full Steps  
Among Finest Certified**

- 3555 1948-S MS67 Five Full Steps NGC.** Although NGC has certified (as of 7/16) 173 1948-S nickels as MS67 without a Full Steps designation, that service has certified just two examples as MS67 Five Full Steps. Three pieces have been certified as Six Full Steps, respectively at the PR64, PR65, and PR66 levels. None have been certified at the MS68 level. Thus, the present lot is tied with one other as the finest NGC-graded 1948-S nickel. It is a lustrous and pristine Superb Gem that boasts light almond-gold patina. NGC ID# 22UA, PCGS# 84036
- 3556 1949-D MS67 Five Full Steps NGC.** This sharply detailed Superb Gem exhibits frosty light gray luster with vibrant gold toning over two-thirds of the obverse and reverse surfaces, and wisps of iridescent overtones, mostly on the reverse. Census: 3 in 67 Full Steps, 0 finer (7/16). NGC ID# 22UC, PCGS# 84038

**1949-D/S FS-501 Nickel, MS67  
Exceptional Preservation**

- 3557 1949-D/S FS-501 MS67 NGC.** Cherrypickers' describes the overmintmark as "the top of the S is visible to the north of the D, with the upper left loop of the S visible to the west of the D." 1950-D/S and 1950-S/D quarters are also known from that era of indecision at the Mint. Lustrous and pristine with medium lime-green and wheat-gold toning. Census: 2 in 67, 1 in 67 Full Steps, 0 finer (7/16). NGC ID# 22UC, PCGS# 38511 Base PCGS# 4039

- 3558 1950-D MS67 Full Steps PCGS.** This extraordinary Superb Gem exhibits vibrant gold and iridescent toning over frosty gray surfaces with full cartwheel mint luster. This piece is sharply struck and exquisite. Population: 23 in 67 (3 in 67+) Full Steps, 0 finer (7/16). NGC ID# 22UF, PCGS# 84042

**1950-D Jefferson Nickel, MS67+ Full Steps  
Lovely Pastel Toning**

- 3559 1950-D MS67+ Full Steps PCGS.** Splendid multicolor hues adorn each side of this top-grade, Condition Census 1950-D Jefferson nickel. The 1950-D is the low-mintage key date of the series, and Superb Gems are rare. This piece displays lovely mint-green, ruby-red, gold, orange, and lavender-blue over each side. The strike is sharp, and the preservation is noteworthy. Population: 20 in 67 (3 in 67+) Full Steps, 0 finer (6/16). NGC ID# 22UF, PCGS# 84042

**1951-D Nickel, MS67+ Five Full Steps  
Single-Finest at NGC**

- 3560 1951-D MS67+ Five Full Steps NGC.** The present lot is the single highest NGC-graded 1951-D nickel, the sole example certified as MS67+ Five Full Steps. As of (7/16), NGC has yet to certify a 1951-D nickel as Six Full Steps. A lustrous and nicely struck Superb Gem medium caramel-gold toning. Inspection beneath a loupe shows only wispy contact on the left wing of Monticello. NGC ID# 22UH, PCGS# 84044

**1952 Jefferson Nickel, MS67  
Vivid Multicolor Toning**

- 3561 1952 MS67 PCGS.** This magnificent Superb Gem Jefferson nickel displays vivid shades of greenish-gold, powder-blue, and magenta toning, with vibrant mint luster and sharply detailed design elements underneath. Impeccably preserved surfaces add to the terrific eye appeal. Population: 3 in 67 (1 in 67+), 0 finer (6/16). NGC ID# 22UK, PCGS# 4046

## SMS JEFFERSON NICKEL

### 1965 SMS Nickel, SP67 Deep Cameo Registry-Grade Example

- 3562** 1965 SMS SP67 Deep Cameo PCGS. Deep Cameo 1965 Special Mint Set nickels are scarce. This conditionally rare Superb Gem example is among the finest certified. Monticello's steps are not sharp, but the strike is otherwise pleasing. Substantial field-device contrast and stark brilliant color provide ample eye appeal. Population: 12 in 67 Deep Cameo, 0 finer (6/16). NGC ID# 27AD, PCGS# 94197

## PROOF JEFFERSON NICKELS

### 1938 Jefferson Nickel, PR67 Cameo Extremely Rare as Cameo

- 3563** 1938 PR67 Cameo NGC. A brilliant, boldly struck, and immaculate example of the first-year proof Jefferson nickel. The portrait and Monticello are frosty. Proof coins from the 1930s and 1940s rarely exhibit cameo contrast. As of (7/16), NGC has certified just two 1938 nickels as Cameo, both at the PR67 level. NGC ID# 279W, PCGS# 84175

- 3564** 1940 PR67+ PCGS. CAC. A lovely Superb Gem proof, this light gray example has vibrant amber, blue, gold, and violet toning forming a veritable rainbow of color on both sides. PCGS has only designated 18 Plus examples and graded just three finer (7/16). NGC ID# 279Z, PCGS# 4177

### 1940 Jefferson Nickel, PR68 Among the Finest at Both Services

- 3565** 1940 PR68 PCGS. This near-flawless Jefferson nickel proof features the Reverse of 1940 with strengthened steps. A small number of coins were also struck with the Reverse of 1938, showing softly-defined steps. Proofs manufactured from the older hub are very rare, but the Reverse of 1940 is no slouch either in PR68 condition, where this piece is among the finest at both services. Ice-blue centers and lime-green rims dominate each side. Fully struck without a single flaw of note. Population: 3 in 68, 0 finer (6/16). NGC ID# 279Z, PCGS# 4177

- 3566** 1942 Type One PR68 PCGS. Eye-catching rose-red, apple-green, ocean-blue, and lemon-gold patina endows this pristine proof nickel. The obverse is particularly colorful. This coruscating beauty must be seen in person to be properly appreciated. Population: 19 in 68, 0 finer (6/16). NGC ID# 27A3, PCGS# 4179

### 1942 Jefferson Nickel, PR68 Type One Copper-Nickel Composition

- 3567** 1942 Type One PR68 PCGS. CAC. This is a conditionally rare and impressive representative of this proof Jefferson nickel, struck to the tune of just 29,600 pieces before the Wartime design change placed a large "P" mintmark on the upper reverse field. This example is fully struck and flawlessly preserved, with bright, highly reflective surfaces that seem pristine. Lovely hues of sky-blue and antique-gold adorn the beautifully clean surfaces. Population: 19 in 68, 0 finer. CAC: 11 in 68, 0 finer (6/16). NGC ID# 27A3, PCGS# 4179

- 3568** 1942-P Type Two PR68 NGC. Lovely blue and champagne toning appears on both sides of this extraordinary Superb Gem. Light contrast between the devices and fields is not sufficient for a Cameo designation, but imparts heightened eye appeal. Census: 24 in 68 (5 in 68★), 0 finer (6/16). NGC ID# 27A4, PCGS# 4180

- 3569** 1942-P Type Two PR68 PCGS. CAC. Light- to medium-intensity bluish-green and gold toning drapes both sides of this outstanding wartime nickel, complemented by well-struck design features. A small mark on the left portico is mentioned solely for identification purposes. Population: 14 in 68, 1 finer. CAC: 1 in 68, 0 finer (7/16). NGC ID# 27A4, PCGS# 4180

- 3570** 1954 PR67 Deep Cameo PCGS. Delicate champagne toning is mostly visible on the reverse of this Superb Gem Deep Cameo proof. Both sides have excellent contrast between the satiny devices and fully mirrored fields. Population: 12 in 67 Deep Cameo, 10 finer (6/16). NGC ID# 27A7, PCGS# 94186

1971 No S Nickel, PR68 Deep Cameo  
Modern Key Date

- 3571** 1971 No S, FS-501, PR68 Deep Cameo PCGS. Only 1,655 out of the 3.2 million proof sets issued in 1971 contained the widely sought-after No S nickels, created when the S mintmark was accidentally omitted from one of the proof dies shipped to San Francisco from the Philadelphia Mint. This near-flawless Deep Cameo representative is almost entirely brilliant with glimpses of faint champagne-gold color. An eye-catching modern key date with dramatic field-device contrast. Population: 11 in 68 Deep Cameo, 9 finer (6/16). PCGS# 569932 Base PCGS# 94204

1971 No S Nickel, PR69 Deep Cameo  
Tied for Finest at PCGS

- 3572** 1971 No S, FS-501, PR69 Deep Cameo PCGS. A flawlessly struck, virtually perfect No S proof 1971 Jefferson nickel, showing stark white-on-black contrast and immeasurable eye appeal. This *Guide Book* variety is missing the San Francisco mintmark that should appear on all proof coins of the year. Deep Cameo examples are scarce in any grade, and this piece is among the finest. Population: 9 in 69 Deep Cameo, 0 finer (6/16). PCGS# 569932 Base PCGS# 94204

## EARLY HALF DIMES

- 3573** 1794 V-4, LM-4, R.4 — Scratches — NGC Details. VF. An early die state, without the clashes and cracks seen on later impressions. Deep lavender and forest-green toning embraces this nicely defined Flowing Hair half dime. Both sides display criss-cross thin lines reminiscent of adjustment marks. We suggest bidders should personally evaluate the present piece to determine which straight lines on the coin preceded the strike. NGC ID# 22ZT, PCGS# 38584 Base PCGS# 4250

1794 V-4, LM-4 Half Dime, AU50  
Partial Mint Luster

- 3574** 1794 V-4, LM-4, R.4, AU50 NGC. A middle die state with cracks through star 2 and above the ear. A richly detailed first-year Flowing Hair type coin with aquamarine and stone-gray surfaces. A few specks of charcoal accompany the reverse legends, and a blush of lavender toning is noted near the profile. Marks are minimal for the designated grade. *From The GATOR Collection.* NGC ID# 22ZT, PCGS# 38584 Base PCGS# 4250

1796 Half Dime, Attractive XF40  
V-1, LM-1, LIKERTY

- 3575** 1796 LIKERTY, V-1, LM-1, R.3, XF40 NGC. LM-1 is the more plentiful of the two 1796 die varieties, but it is still a popular issue due to the LIKERTY die characteristic, showing a broken B in LIBERTY. This piece is boldly and evenly struck with light wear. The surfaces show original gunmetal-gray patina and problem-free surfaces. Eye appeal is excellent for the grade. NGC ID# 22ZX, PCGS# 38596 Base PCGS# 94254

1797 Half Dime, AU Sharpness  
15 Stars, V-2, LM-1

- 3576** 1797 15 Stars, V-2, LM-1, R.3 — Cleaning — PCGS Genuine. AU Details. V-2 is a *Guide Book* variety, since it is the sole 1797 die pair with 15 stars. This is a pleasing silver-gray example with slightly glossy but generally smooth surfaces. The centers are incompletely brought up, customary for the Small Eagle type. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

## BUST HALF DIMES

**3577** 1829 V-12, LM-13.1, R.1, MS64 PCGS. The 9 in the date is repunched north, and a spur extends from the scroll below the second S in STATES. This fully struck near-Gem displays pleasing lilac-red, apricot-gold, and olive-green toning. Marks are minimal and the eye appeal is exemplary.  
*From The GATOR Collection.* NGC ID# 232B, PCGS# 38628 Base PCGS# 4276

**3578** 1832 V-6, LM-13, R.3, MS64 PCGS. Star 12 is repunched, among the identifiers for this moderately scarce variety. Lustrous and well struck with vibrant forest-green, orange-red, and plum-mauve toning. No marks are conspicuous. Housed in an old blue label holder. NGC ID# 232E, PCGS# 38684 Base PCGS# 4279

### 1833 V-4, LM-3.3 Half Dime, MS66 Intermediate Die State

**3579** 1833 V-4, LM-3.3, R.2, MS66 NGC. The reverse die crack from the E of UNITED to the eagle's head and the scroll below the N is visible and the upper loop of the first S in STATES is filled on this intermediate die state. This lovely Premium Gem is sharply defined with frosty silver surfaces beneath gold and iridescent toning. NGC ID# 232F, PCGS# 38690 Base PCGS# 4280

### 1836 Half Dime, MS65 V-2, LM-4, Small 5C

**3580** 1836 Small 5C, V-2, LM-4, R.2, MS65 NGC. Diagnostics for the variety include a Small 5 in the denomination, repunching on star 1, and the last A in AMERICA touching the arrowhead. Eye-catching rose-violet, ice-blue, and sea-green patina encompass the obverse of this Gem half dime. The reverse features mottled golden-russet toning with considerable brilliance shining through. Fully struck. Census (all varieties): 35 in 65 (1 in 65+), 28 finer (6/16). NGC ID# 232J, PCGS# 38727 Base PCGS# 4288

## SEATED HALF DIMES

### 1838-O No Stars Half Dime, AU55 First New Orleans Issue

**3581** 1838-O No Stars AU55 ANACS. V-1. The sole branch mint No Stars issue is much scarcer than its Philadelphia predecessor, since only 70,000 pieces were struck. Most survivors are in VF or lower grades, but the present coin shows only a hint of wear. Generally cream-gray, although blue-green and golden-brown freckles congregate along the borders. Housed in a small-size holder.  
*From The GATOR Collection.* NGC ID# 232N, PCGS# 4314

**3582** 1838 Small Stars, No Drapery, MS64 PCGS. V-1A. 1838 was the first year of the Stars subtype. The stars were punched in, instead of hubbed, and star 3 is repunched. The obverse die rusted, most noticeably on Liberty's raised arm, and was lapped, attenuating the stars. V-1A and V-2 are both recognized as Small Stars varieties. V-1A shows a small die break near the first A in AMERICA, and V-2 has a radial crack through star 13. This is a boldly struck and well preserved near-Gem with sea-green toning aside from the wheat-gold central reverse. NGC ID# 232R, PCGS# 4318

### 1839 No Drapery Half Dime, MS67+ Rich Green, Gold, Gray Toning

**3583** 1839 No Drapery MS67+ PCGS. Forest-green margins encompass golden-brown and stone-gray centers. An immaculate example of the briefly issued Stars, No Drapery subtype. The strike is precise and the surfaces exude potent cartwheel sheen. The obverse rim has a series of small die breaks near 10:30, perhaps of interest to the specialist. Population: 6 in 67 (1 in 67+), 0 finer (3/15). NGC ID# 232S, PCGS# 4319

**3584** 1844 MS66 PCGS. CAC. Orange-red hugs the obverse border, and lime and stone-gray fill the centers. An original and lustrous representative with a nearly immaculate reverse and an unabraded obverse field. Liberty's waist displays faint contact. Population: 22 in 66 (2 in 66+), 11 finer (7/16). NGC ID# 2335, PCGS# 4333

**1849-O Half Dime, MS62  
Very Scarce in Mint State**

**3585 1849-O MS62 PCGS.** The 1849-O is a scarce and overlooked issue in the Seated half dime series, especially in any Mint State. The mintage of 140,000 pieces was moderate and numismatically unpreserved. This example is mostly brilliant with a few dark speckles on both sides. Struck from heavily clashed dies, a small scrape is noted beneath star 7 above Liberty's shoulder. Mint luster at the margins adds to the appeal of this conditionally rare, key New Orleans issue. Population: 1 in 62, 11 finer (6/16). NGC ID# 233E, PCGS# 4344

**3586 1852 MS66 PCGS.** Pleasing luster emanates from the bright silver surfaces of this Premium Gem half dime. Well-struck devices and minimal marks round out the coin's eye appeal. The 1852 is very challenging in this grade level and highly elusive any finer. Population: 11 in 66, 5 finer (7/16). NGC ID# 233K, PCGS# 4349

**1853-O No Arrows Half Dime, AU55  
Excellent Color and Detail**

**3587 1853-O No Arrows AU55 PCGS.** The 1853-O No Arrows half dime had a small mintage of 160,000 pieces, compared to more than 2 million coins for the With Arrows variety. This issue is scarce in all grades and a rarity in Mint State. The present Choice AU representative displays excellent detail and original lavender-gray toning. Eye appeal is outstanding for the issue. Population: 1 in 55, 8 finer (6/16).

*From The GATOR Collection.* NGC ID# 233N, PCGS# 4352

**3588 1857-O MS65 PCGS. CAC.** A refreshingly mark-free Gem. The satiny surfaces are bathed in blue-green, lilac, and cream-gray shades. Only occasional incompleteness of strike denies an even higher grade. Population: 21 in 65, 18 finer (7/16). NGC ID# 233T, PCGS# 4366

**1858 Half Dime, MS67  
Scarce This Fine**

**3589 1858 MS67 PCGS.** A common date in the absolute sense, the 1858 Seated half dime is rarely encountered at the Superb Gem level. This champagne-tinted, satiny example displays well-struck motifs and unabraded surfaces. Heavy clash marks are seen on each side, as usual. Population: 17 in 67 (1 in 67+), 3 finer (6/16). NGC ID# 233U, PCGS# 4367

**3590 1859 MS66 PCGS.** A sharp, satiny Premium Gem example of this popular Paquet-designed obverse type, which shows a slender Liberty surrounded by hollow-center stars. Olive-gold toning blankets each side. Any grade-limiting abrasions are trivial and unobtrusive. Population: 18 in 66 (2 in 66+), 39 finer (7/16). NGC ID# 233W, PCGS# 4371

**1860 Transitional Half Dime, MS65  
Judd-267, The 'Coin Without a Country'**

**3591 1860 Transitional MS65 PCGS. Judd-267, Pollock-315, R.4.** It is estimated that 100 examples of this curious issue were produced, all in circulation strike format. The old With Stars obverse was muled with the new reverse of 1860; thus creating a coin with no stated national identity. Undoubtedly they were produced for distribution to collectors in an attempt to obtain pieces for the U.S. Mint Collection. This Gem displays the diagnostic obverse die scratch from the left base of Liberty's rock to the rim. The surfaces are satiny and pristine with a moderate overlay of smoky-gray patina. A little softly impressed near the upper obverse and lower reverse borders.

*Ex: Long Beach Signature (Heritage, 10/2001), lot 5897.*

*From The GATOR Collection.* NGC ID# 2346, PCGS# 4373

**3592 1864 MS65 NGC.** An important Civil War era issue from a mintage of just 48,000 pieces, this Gem example ranks high in the population charts. Both sides exhibit prominent clash marks that are often seen on this issue. The frosty surfaces are fully lustrous beneath intense gold, blue, and violet toning. Census: 12 in 65, 8 finer (6/16). NGC ID# 234E, PCGS# 4384

**1866 Half Dime, MS67+  
Outstanding Preservation**

**3593 1866 MS67+ PCGS. CAC. Flynn-RPD-001.** Light straw-gold toning visits this thoroughly lustrous and well struck Superb Gem. Both sides exhibit clash marks but there is no indication of post-strike contact. The date is lightly repunched. Gresham's Law and fractional currency drove silver from circulation during 1866, and as a result only 10,000 commercial half dimes were struck. Population: 4 in 67 (2 in 67+), 0 finer (7/16). CAC Population: 6 in 67, 0 finer. NGC ID# 234J, PCGS# 4388

**3594 1868-S MS64+ PCGS. CAC.** The 1868-S half dime is elusive in Mint State. This high-end near-Gem is sharply struck from extensively cracked dies. The softly frosted surfaces display dusky golden toning, which masks a few scattered marks. Population: 20 in 64 (2 in 64+), 14 finer (7/16). NGC ID# 234P, PCGS# 4393

**3595 1871-S MS65 PCGS.** The 1871-S has a relatively small mintage among late-date half dimes (161,000 coins). Examples are very rarely seen in Gem condition or higher. Frosty, brilliant surfaces offer blushes of olive-gold patina throughout. The devices display strong detail with just minor incompleteness near Liberty's right arm. Population: 5 in 65, 6 finer (6/16). NGC ID# 234W, PCGS# 4399

**3596 1872-S Mintmark Below Bow MS66 PCGS.** A sharp, delightful Premium Gem with frosty mint luster and outstanding preservation. Wisps of light golden toning appear over each side. This issue is scarce in this grade and rare any finer. Population: 56 in 66 (5 in 66+), 9 finer (7/16). NGC ID# 2352, PCGS# 4401

## PROOF SEATED HALF DIMES

**3597 1858 PR64+ NGC. CAC.** The obverse of this Choice proof is mostly toned sea-green while the reverse is predominantly reddish-gold. Both sides have iridescent accents to enhance the eye appeal. Faint hairlines, only visible with a glass, limit the grade of this near-Gem. NGC has graded 23 coins in PR64, with this single example in PR64+, and 27 finer (6/16). NGC ID# 235N, PCGS# 4437

**3598 1859 PR65 PCGS. Flynn-RPD-001.** Variegated golden-brown and blue-green toning overlies flashy, smooth, and well struck surfaces. The base of the 1 and 9 are repunched. The ephemeral Paquet obverse subtype with hollow-centered stars and a distinctly different seated Liberty. Population: 26 in 65 (1 in 65+), 16 finer (7/16). NGC ID# 235P, PCGS# 4438

**3599 1859 PR65 PCGS. Flynn-RPD-001.** The curious and briefly used Paquet obverse subtype with hollow-centered stars and a modified engraving of Liberty. The glassy surfaces are brilliant. The strike is sharp except on the dentils. The base of the 1 and 9 are repunched. NGC ID# 235P, PCGS# 4438

**3600 1863 PR66 Cameo NGC.** A beautifully preserved, razor-sharp proof Cameo with frosty design elements and liquidlike mirroring in the fields. The obverse displays a warm blush of light golden toning, while the reverse remains brilliant. Cameo examples of the 1863 proof are scarce in all grades and are genuinely rare at the Premium Gem level. Census: 5 in 66 Cameo, 3 finer (6/16). NGC ID# 235Y, PCGS# 84446

**1868 Half Dime, Colorful PR67  
One-Sided Cameo**

**3601 1868 PR67 PCGS. CAC.** With a mintage of 600 pieces, the proof 1868 Seated half dime is a major rarity at the Superb Gem level. This CAC-endorsed example ranks among the finest non-Cameos known and displays a beautiful array of multicolor toning. As is sometimes seen on proof half dimes of this period, the upper-left portion of the wreath is softly struck. The obverse shows considerable cameo contrast, the reverse less so. Population: 3 in 67, 0 finer (6/16). NGC ID# 2365, PCGS# 4451

## EARLY DIMES

**1797 JR-1 Dime, VF Details  
16 Stars**

**3602 1797 16 Stars, JR-1, R.4 — Improperly Cleaned — NGC Details. VF.** The usual die crack crosses the top of the date from the lower left stars to the drapery on this example, but has not formed the retained cud seen on the latest die states. Both sides exhibit mottled steel-gray and brown toning with substantial bright silver from cleaning long ago. NGC ID# 236C, PCGS# 38748 Base PCGS# 4462

**1798 Dime, MS61  
JR-4 Large 8, Five Berries**

**3603 1798 Large 8, JR-4, R.3, MS61 NGC.** The common Normal Date or Large 8 variety, with five berries in the branch on the reverse. This impressive Mint State specimen shows lustrous, light-silver splashes among intermingled gold, russet, and steel-blue toning, creating a stunning display. The JR-4 is noted for its flat-top 1, small 7, and larger 8 versus other varieties, but it is the outsized 9 that dwarfs the other digits in the date. Census (Normal Date varieties): 4 in 61, 21 finer (5/16).  
Ex: FUN Signature (Heritage, 1/2013), lot 3921. NGC ID# 236E, PCGS# 38753 Base PCGS# 4466

**1800 JR-1 Dime, VF30  
Better Draped Bust Date**

- 3604** 1800 JR-1, R.4, VF30 NGC. Dusky gunmetal-gray fields accompany cream-white high points. Although the surfaces are moderately circulated, they show surprisingly few marks. Only two die marriages are known for this low mintage date. They share the same obverse die and have similar, but slightly different, reverse dies. A die break near the left (facing) wingtip identifies JR-1. NGC ID# 236H, PCGS# 38754 Base PCGS# 4470

**1803 JR-3 Dime, AU50  
Better Heraldic Eagle Date**

- 3605** 1803 JR-3, R.4, AU50 PCGS. Deep russet-gray toning blankets this lightly circulated and virtually unabraded early dime. The strike is good for the type despite blending on the right shield corner and the softness on the stars above the beak. A late die state with biplanar cracks near the ribbon, shoulder curl, and left scroll end. NGC ID# 236L, PCGS# 38764 Base PCGS# 4473

**BUST DIMES**

**1814 Dime, Toned MS64  
JR-3, Large Date**

- 3606** 1814 Large Date, JR-3, R.2, MS64 PCGS. Stars 1 and 2 are weak, but the remainder of each side displays razor-sharp definition. This satiny Choice 1814 Large Date dime displays deep olive-gray patina without any singularly obvious abrasions. The Large Date variety is more plentiful than its Small Date counterpart, ideal for date representation. Population (all Large Date varieties included): 25 in 64 (1 in 64+), 8 finer (7/16). NGC ID# 236W, PCGS# 38775 Base PCGS# 4488

- 3607** 1814 STATESOF, JR-5, R.3, VF25 NGC. CAC. The popular variety with inadequate spacing between STATES OF AMERICA. Apparently, the die engraver first entered UNITED STATES with too generous spacing, then made up for lost ground by crowding the remainder of the legend. A sea-green, stone-gray, and plum-mauve example with a diagonal mark on the horizontal shield lines. NGC ID# 236W, PCGS# 38777 Base PCGS# 4490

**1814 Dime, Deeply Toned AU53  
JR-5, STATESOF Reverse**

- 3608** 1814 STATESOF, JR-5, R.3, AU53 PCGS. The popular STATESOFAMERICA Guide Book variety. This issue is usually seen only in lower grades and is scarce this well-preserved. The present coin is sharply and evenly struck with excellent detail on the devices and strong border dentils. Each side exhibits satiny olive-gray patina that delivers original appeal. Population: 1 in 53, 6 finer (7/16). NGC ID# 236W, PCGS# 38777 Base PCGS# 4490

- 3609** 1821 Large Date, JR-6, R.2, MS62 PCGS. The repunched star 4 identifies JR-6. Light gold patina graces the peripheries of this nicely struck Capped Bust dime. Luster dominates the borders and motifs. Abrasions are limited to a thin horizontal mark near Liberty's mouth. NGC ID# 236Y, PCGS# 38796 Base PCGS# 4496

- 3610** 1824/2 Flat Top 1, JR-1, R.3, MS61 PCGS. Only two die marriages are known for 1824-dated dimes. JR-1 is scarce, and JR-2 is rare. They share the same overdated obverse die, but are readily distinguished by the different flags on the 1s in 10 C. This is a lightly toned example with unblemished surfaces and substantial bright luster. NGC ID# 2373, PCGS# 38805 Base PCGS# 4502

- 3611** 1827/7 Pointed Top 1, JR-1, R.2, MS62 PCGS. The 7 is clearly repunched at its base, but also shows doubling across its upright and serif. Sea-green, chestnut-gold, and dove-gray toning blankets this satiny, unblemished, and attractive Capped Bust dime. The strike shows softness on the claws and left-side stars. NGC ID# 2375, PCGS# 38824 Base PCGS# 4504

**1829 JR-2 Dime, MS64+  
Large 10C, Rich Multicolor Toning**

- 3612** 1829 Large 10C, JR-2, R.2, MS64+ PCGS. A die crack through Liberty's eye and a defective 1 in 10 C attribute the die marriage. Forest-green and lavender-gray toning encompasses this sharply struck and coruscating near-Gem. Contact is confined to a hair-thin field line near the beak. For all Large 10 C varieties, Population: 1 in 64+, 6 finer (7/16). PCGS# 38840 Base PCGS# 94511

**1835 JR-5 Dime, MS65  
Block 8 in Date**

- 3613** 1835 JR-5, R.1, MS65 NGC. There are no apparent clash marks, die cracks, or other signs of die use on this Gem Capped Bust dime. Both sides have frosty luster and bold design motifs beneath lovely dappled gold and blue toning. Census: 24 in 65, 8 finer (6/16), for all 1835 dime varieties. NGC ID# 4D5N, PCGS# 38883 Base PCGS# 4527

**1836 JR-1 Dime, MS64  
Delicately Toned, Fully Struck**

- 3614** 1836 JR-1, R.3, MS64 PCGS. The 0 in the denomination is low and leans left, confirming the JR-1 variety. A die crack travels from star 8 through Liberty's cap to stars 9 and 10. This is a frosty, Choice Uncirculated example with glimpses of autumn-gold toning over pearlescent, silver-gray surfaces. Fully struck throughout with just a few light marks. Population (all varieties): 22 in 64 (2 in 64+), 14 finer (6/16). NGC ID# 4DEF, PCGS# 38888 Base PCGS# 4528

**SEATED DIMES**

**1837 No Stars Dime, MS65  
Large Date**

- 3615** 1837 No Stars, Large Date MS65 PCGS. This captivating Gem exhibits bold design definition with subdued silver luster on the obverse beneath light champagne toning. The reverse has brighter frosty mint luster with similar delicate gold toning. A lovely example for the type collector or advanced specialist. Population: 25 in 65, 9 finer (7/16). NGC ID# 237R, PCGS# 4561

**1837 No Stars Dime, MS64  
Large Date Variant, Short-Lived Type**

- 3616** 1837 No Stars, Large Date, F-101a, R.2, MS64 PCGS. This variant of Fortin-101 shows minor repunching at the base of the 7 and the reverse is rotated 23 degrees. Warm silver-gray surfaces are devoid of any significant marks, and the design elements are sharply struck. The No Stars type was short-lived and is elusive in better Mint State grades. Population: 49 in 64, 34 finer (6/16). Ex: FUN Signature (Heritage, 1/2005), lot 6111. NGC ID# 237R, PCGS# 537635 Base PCGS# 4561

- 3617** 1837 No Stars, Large Date, F-101b, R.2, MS63 PCGS. Beautiful lilac-red, apple-green, and peach-gold toning endows the obverse. The brilliant central reverse is framed by cobalt-blue, ruby-red, and golden-brown patina. The base of the 7 is repunched, but the most interesting characteristics of F-101b are the "pie-shaped" radial die cracks on the lower obverse. NGC ID# 237R, PCGS# 537636 Base PCGS# 4561

**1845 F-108 Dime, MS66  
Unabraded, Splendidly Toned**

- 3618** 1845 F-108, R.3, MS66 NGC. Dusky peach-gold and dove-gray toning encompass the obverse. The reverse displays aquamarine throughout. Faint clash marks are prominent near the denomination, but abrasions are absent, even upon perusal beneath a loupe. Census: 5 in 66, 3 finer (6/16).

Ex: Central States Signature (Heritage, 5/2004), lot 6558; purchased from Jason Carter (11/2004); Eugene Gardner Collection, Part IV (Heritage, 10/2015), lot 98243. NGC ID# 238B, PCGS# 537830 Base PCGS# 4586

- 3619** 1859-O Medium O, F-103, R.3, MS65 PCGS. CAC. Golden-brown toning adorns the borders and encroaches upon the predominantly steel-gray fields and devices. Lustrous and unabraded with exceptional eye appeal. The strike is full except on the dentils. CAC Population: 4 in 65, 4 finer (7/16). NGC ID# 2395, PCGS# 538142 Base PCGS# 4620

- 3620** 1859-O Large O, F-104, R.3, MS65 PCGS. CAC. Dappled autumn-brown, powder-blue, and straw-gold toning embraces this well struck, coruscating, and essentially unabraded Gem. Usual for F-104, the surfaces exhibit minor clash marks along with a radial crack through the I in UNITED. PCGS# 538143 Base PCGS# 4620

- 3621** 1860-O F-101, R.3, VF20 PCGS. Gunmetal-blue and olive-green toning alternates across this moderately marked Very Fine example. A scant production of 40,000 pieces makes the 1860-O a semikey issue. New Orleans issued Legend Obverse Seated dimes only in the first and last years of the subtype, 1860 and 1891. PCGS# 538160 Base PCGS# 4632

**1861 Dime, Untoned MS66+  
Among the Finest Survivors**

- 3622** 1861 Type One, F-101, R.3, MS66+ PCGS. CAC. The Type One obverse has a single shield line above the E in LIBERTY. A die scratch in the lower left wreath confirms the Fortin-101 attribution. This important top-graded Premium Gem dime maintains entirely brilliant surfaces with an overlay of glistening, frosty luster. The strike detail is crisp despite a touch of softness on the sandal and upper left wheat stalks. Among the finest survivors. Population (all varieties): 8 in 66 (3 in 66+), 0 finer (6/16). PCGS# 538161 Base PCGS# 4633

- 3623** 1861 Type One, F-106, R.3, MS66 NGC. An outstanding Civil War type coin. Lustrous and pristine with only a hint of peripheral golden patina. The strike is sharp except on OF A. For all varieties, Census: 12 in 66 (1 in 66★), 2 finer (6/16). PCGS# 538170 Base PCGS# 4633

**1868-S Dime, Colorful Gem  
Very Rare So Well-Preserved**

- 3624** 1868-S F-101, R.4, MS65 NGC. A single die pair was used to strike 260,000 dimes at the San Francisco Mint in 1868. Incredibly, there are only 24 submissions at NGC and 60 at PCGS. Of those, 33 coins have been deemed Uncirculated, but only a handful meet the requirements for a Gem assessment. This important MS65 dime is colorfully toned in blue, violet, and gold hues with vibrant luster shining from the underlying surfaces. Well-struck with full kernels. Census: 6 in 65, 2 finer (6/16). PCGS# 538237 Base PCGS# 4648

**1871-CC Dime, VF Details  
Introductory Carson City Issue**

- 3625** 1871-CC F-101, R.4 — Damage — PCGS Genuine. VF Details. The sole die marriage for the issue. The Carson City Mint struck dimes for the first time in 1871. Most survivors show moderate granularity, as does the present charcoal-gray example. The obverse exhibits a number of pinpoint surface pricks, along with a thin diagonal mark across the shield. The reverse is relatively unabraded. NGC ID# 23A5, PCGS# 538268 Base PCGS# 4654

**1873-CC Arrows Dime, AU Details  
Old West Rarity**

- 3626** 1873-CC Arrows, F-101, R.4 — Improperly Cleaned — NGC Details. AU. A rising die crack through the mintmark is characteristic of F-101, the sole die marriage of the 1873-CC Arrows issue (a unique 1873-CC No Arrows dime is also known). Most survivors are well worn, but the present key date example has light wear and retains noticeable luster. The olive-gray surfaces are attractive upon cursory inspection, though a loupe reveals faint field scuffs above the N in ONE and below the DI in DIME. NGC ID# 23BH, PCGS# 538326 Base PCGS# 4666

- 3627** 1876-S Type One Reverse, F-103, R.3, MS66 NGC. Chin “whiskers” and a nearby die dot confirm the Fortin marriage. Forest-green and tobacco-brown toning embrace the obverse border of this intricately struck Seated type coin. The reverse is mostly brilliant but displays light brown peripheral patina. NGC ID# 23AK, PCGS# 538535 Base PCGS# 4681

1877-CC Dime, MS66+  
Type Two Reverse

- 3628** 1877-CC MS66+ PCGS. CAC. Type Two Reverse. The obverse of this Premium Gem exhibits peripheral die cracks that are similar to Fortin-105. The reverse is also similar, but neither die seems to exactly match that variety. Both sides of this beautiful Carson City dime exhibit brilliant and frosty white mint luster with no toning. The strike is bold and eye appeal is exceptional. Population: 64 in 66 (16 in 66+), 7 finer. CAC Green: 16 in 66, 2 finer (6/16). NGC ID# 23AM, PCGS# 4683

1878 Dime, Colorful MS67 ★  
Tied for Finest at NGC

- 3629** 1878 Type Two Reverse, F-102, R.3, MS67 ★ NGC. Arguably the finest of the three Superb Gems reported at NGC, set apart by its coveted Star designation and vivid toning. This piece is beautifully patinated, showing creamy-gold peripheries around ocean-blue margins with sun-gold and amber centers. The portrait and wreath are well-defined, and the surfaces are devoid of severe imperfections. Census: 3 in 67 (2 in 67 ★), 0 finer (6/16). PCGS# 538626 Base PCGS# 4685

1880 F-102a Dime, MS67  
Low-Mintage Issue

- 3630** 1880 F-102a, R.4, MS67 PCGS. ONE DIME exhibits die rust, the pick-up point for the proof Fortin-102 and its business strike successor Fortin-102a. Forest-green and lavender shades embrace this nicely struck, lustrous, and immaculate Superb Gem. Only 36,000 examples were issued, since Mint resources were consumed by high mintages of silver dollars, half eagles, and eagles. NGC ID# 23AT, PCGS# 538644 Base PCGS# 4688

1886-S Dime, MS65  
White and Lustrous

- 3631** 1886-S F-101, R.4, MS65 PCGS. Intricately struck and lustrous with only a trace of golden toning. The surfaces are refreshingly unabraded. A diagonal die crack passes through the mintmark, and a second crack underlines much of the bases of UNITED STATES. Neither crack is mentioned in the Fortin online reference. Population: 8 in 65, 15 finer (7/16). NGC ID# 23B4, PCGS# 538720 Base PCGS# 4697

- 3632** 1891-O F-130, R.4, MS65 NGC. CAC. Forest-green peripheries surround autumn-brown and stone-gray centers. Nicely struck and satiny with pleasing surfaces. The first New Orleans dime issue since 1860. Census: 26 in 65, 9 finer. CAC: 9 in 65, 6 finer (7/16). Ex: *Bowers and Merena* (11/1999), lot 1158; *Eugene Gardner Collection, Part IV* (Heritage, 10/2015), lot 98304. PCGS# 538955 Base PCGS# 4707

PROOF SEATED DIMES

1856 F-101 Dime, Gem Proof  
Doubled Die Obverse

- 3633** 1856 Doubled Die Obverse, F-101, High R.6, PR65 NGC. The shield and nearby drapery folds are nicely die doubled north. This untoned and fully struck Gem has mirrored fields and appears void of contact. A few minuscule strike-throughs (as made) are noted near the denomination. The proof 1856 dime mintage is unknown, but PCGS estimates that only 30 to 40 specimens are known. Census: 3 in 65, 4 in 66, 5 in 66 Proof Cameo, 1 in 68 Proof Cameo (6/16). PCGS# 538996 Base PCGS# 4745

**1858 Dime, PR66 Cameo  
Scarce Proof Date**

- 3634 1858 PR66 Cameo PCGS. CAC. F-101, R.5.** The sole 1858 proof marriage, per Gerry Fortin. The *Guide Book* estimates a mintage of 300+ proofs, fewer than any subsequent proof date of the series. Nicely struck and flashy with iridescent rose-red, butter-gold, and jade-green toning. PCGS Population: 2 in 66 Cameo, 0 finer (6/16). CAC Population: 2 in 66 Cameo, 0 finer (6/16). NGC ID# 23CC, PCGS# 84747

**1860 Seated Liberty Dime, PR68  
Outstanding Quality and Eye Appeal**

- 3635 1860 Doubled Die Reverse, F-101, R.3, PR68 NGC.** A fairly generous mintage of 1,000 proof Seated Liberty dimes was achieved in 1860, on the brink of the Civil War. This magnificent PR68 example possesses tremendous eye appeal and the highest available technical quality, with sharply detailed design elements and impeccably preserved surfaces that show attractive shades of pale gold and cerulean-blue toning. Census: 5 in 68 (1 in 68 ★), 0 finer (6/16). NGC ID# 23CJ, PCGS# 539007 Base PCGS# 4753
- 3636 1870 F-101, R.3, PR66 NGC.** A glossy and essentially pristine Premium Gem bathed in variegated fire-red and apple-green toning. The strike is good and the originality is unchallenged. Scarcer than implied by the proof mintage of 1,000 pieces. NGC ID# 23CU, PCGS# 539025 Base PCGS# 4763
- 3637 1884 PR66 Cameo NGC. F-101, R.3.** Honey-gold, cherry-red, and cobalt-blue toning visits the borders of this nicely struck and flashy Premium Gem. The seated Liberty exhibits considerable contrast with the glassy obverse field. Census: 20 in 66 Cameo (1 in 66+), 28 finer (7/16). NGC ID# 23D9, PCGS# 84781
- 3638 1888 PR66 Cameo NGC. F-101.** Blushes of cherry-red toning visit the peripheries of this nicely struck and flashy high-grade dime. Liberty's drapery, shield, and rock are lightly lapped. Census: 9 in 66 Cameo, 9 finer (6/16).  
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 471, which realized \$1,495.* NGC ID# 23DD, PCGS# 84785
- 3639 1891 PR66 Cameo PCGS. CAC. F-101, R.3.** Rose-red, autumn-gold, and jade-green toning visit the margins of this well struck and prominently mirrored Premium Gem. The frosty motifs ensure obvious cameo contrast. Population: 10 in 66 Cameo, 11 finer. CAC: 9 in 66, 10 finer (7/16). NGC ID# 23DG, PCGS# 84788

**BARBER DIMES**

**1892 FS-302 Dime, MS67  
Repunched Date Cherrypickers' Variety**

- 3640 1892 Repunched Date, FS-302, MS67 PCGS. CAC.** Brilliant and highly lustrous with a sharp strike and only trivial imperfections. The date is clearly repunched within the lower loops of the 8 and 9, and near the knob of the 2. The variety is undesignated on the PCGS holder. PCGS has certified only two examples of FS-302, as AU53 and MS64. PCGS# 145512 Base PCGS# 4796
- 3641 1893/2 AU58 PCGS. Breen-3479.** A diagonal line is apparent within the lower loop of the 3 in the date. The scarce variety is recognized by the *Guide Book*. A lustrous pearl-gray example with peach-gold toning near the rims. The portrait displays moderate marks. Population: 8 in 58, 31 finer (6/16). NGC ID# 23DP, PCGS# 4799

**1896-S Dime, MS66  
None Numerically Finer**

- 3642 1896-S MS66 PCGS.** A frosty, glowing Premium Gem, this 1896-S dime also boasts sharp design definition and shows warm cream-gold toning with small areas of deeper amber and russet color. A single tick above Liberty's eye is the only discernable surface flaw. The 1896-S is slightly underappreciated in comparison to its New Orleans counterpart, as both issues have comparable mintages of 575,056 and 610,000 pieces, respectively, but the 1896-O is the more highly acclaimed issue. Population: 11 in 66 (3 in 66+), 0 finer (7/16). NGC ID# 23E2, PCGS# 4811

---

**1902-O Barber Dime, MS66**  
**Among the Two Finest at PCGS**

- 3643 1902-O MS66 PCGS.** This outstanding piece is sharply struck, with satiny silver luster and pale gold toning about the obverse and hints of lilac noted on the reverse. An aesthetically pleasing example, despite a few minor ticks and hairlines on Liberty's neck and face. The 1902-O is a surprisingly challenging date to find in any Mint State grade, let alone Gem or finer. The collector of high-grade Barber dimes would do well to consider this opportunity carefully, for it combines high technical grade with outstanding aesthetic appeal. Population: 2 in 66 (1 in 66+), 0 finer (7/16). NGC ID# 23EK, PCGS# 4828

---

**1904 Dime, Colorful MS66**  
**Only One Coin Finer**

- 3644 1904 MS66 PCGS.** The 1904 is a plentiful issue through Gem condition, but this MS66 coin is conditionally rare. The strike is sharp, and each side displays satiny mint luster. A splash of amber-orange and blue toning appears in the upper-right obverse margin, while the remainder of each side is lavender-gray and pale champagne. Population: 13 in 66 (3 in 66+), 1 finer (6/16). NGC ID# 23GH, PCGS# 4833

- 3645 1905 MS66 PCGS.** Wisps of olive-gold and mint-green appear throughout lavender-gray surfaces on this Premium Gem 1905 Barber dime. The strike is bold, and there are no bothersome abrasions. Examples of the 1905 dime are rarely seen this well-preserved. Population: 9 in 66 (1 in 66+), 4 finer (7/16). NGC ID# 24FX, PCGS# 4835

- 3646 1911 MS67 ★ NGC.** A colorful Superb Gem that displays blushes of apple-green and orange-red throughout the fields. The high points are slate-gray. The strike is full and contact is negligible. Census: 11 in 67 (1 in 67★), 2 finer (7/16). NGC ID# 23FJ, PCGS# 4857

- 3647 1915 MS67 NGC.** A brash swath of olive-brown toning visits the silver-lilac, frosted obverse of this mark-free Superb Gem dime. The reverse repeats the frostlike silver-lilac tones but with just a hint of gold at the borders. Technically, this lustrous dime is near-perfect in its preservation and the assigned grade reflects its quality. Neither service has seen a finer example. Census: 1 in 67, 0 finer (7/16). NGC ID# 23FW, PCGS# 4868

---

**1915 Dime, Toned MS67**  
**One of the Two Finest Known**

- 3648 1915 MS67 PCGS.** One of only two MS67 coins certified (both PCGS) with none finer (6/16). This sharp, frosty 1915 Barber dime displays luminous, unabraded surfaces with mottled olive-gold patina around the obverse border and a pale champagne glaze over the reverse. This late-series issue is often selected for type representation in 20th century-focused collections. NGC ID# 23FW, PCGS# 4868

---

**1916-S Dime, Border-Toned MS67**  
**Tied for the Finest Known**

- 3649 1916-S MS67 PCGS.** This final-year S-mint Barber dime is a rare Condition Census example, showing a sharp strike and bright, brilliant luster. The central obverse and most of the reverse are silver-white, while the obverse borders show olive-gold and russet toning with tinges of red and orange. PCGS and NGC have each seen two pieces in this grade and none finer (7/16). NGC ID# 23FZ, PCGS# 4871

---

**PROOF BARBER DIMES**

- 3650 1895 PR66 PCGS.** As a Premium Gem, this piece is among the more conditionally scarce examples of the 1895 proof dime. The strike is tack-sharp, complementing fully mirrored fields. Slight cameo contrast is present. This piece shows mild russet toning around the peripheries, with splashes of lavender and amber also seen on the obverse. Population: 35 in 66, 12 finer (7/16). NGC ID# 23G8, PCGS# 4879

**1895 Dime, PR67 Cameo  
Attractively Toned**

- 3651 1895 PR67 Cameo NGC.** After the Barber dime's debut in 1892, annual proof coinage declined. In 1895, 880 proofs were struck. Cameo examples are elusive in high grade and rare at the Superb Gem level. This piece is fully struck with deep mirrors and mottled multicolor toning. The preservation and eye appeal are exceptional. Census: 16 in 67 Cameo (1 in 67+, 5 in 67 ★), 4 finer (6/16). NGC ID# 23G8, PCGS# 84879

**1897 Dime, PR67  
Generous Original Toning**

- 3652 1897 PR67 PCGS. CAC.** Extensively toned, this Superb Gem proof showcases hints of the contrast that appears on the best specimens of the time. Pale green-to-gold toning graces the obverse margins and interior reverse, while vivid blue and violet hues prevail over the rest of each side. Population: 18 in 67, 3 finer (6/16). NGC ID# 23GA, PCGS# 4881
- 3653 1898 PR65 Cameo NGC.** An impressive Gem Cameo proof, this example has brilliant and untuned silver surfaces with bold design motifs. The contrast borders on Deep Cameo, in our opinion. Census: 15 in 65 Cameo (1 in 65★), 51 finer (6/16). NGC ID# 26KV, PCGS# 84882
- 3654 1898 PR67 Cameo NGC.** An extraordinary Superb Gem Cameo proof, this 1898 Barber dime is fully brilliant and untuned with exceptional field-to-device contrast. NGC has graded 24 coins in PR67 Cameo, with another two examples with the ★ designation, and 10 finer (6/16). NGC ID# 26KV, PCGS# 84882

**1899 Dime, Toned PR67  
Only One Coin Finer at PCGS**

- 3655 1899 PR67 PCGS.** Pale mint-green, gold, and lavender hues appear over deeply mirrored fields on this sharp Superb Gem 1899 proof Barber dime. Both sides show modest field-device contrast, but the toning prevents a Cameo designation from PCGS. The 1899 proof is seldom seen this fine, and higher-grade pieces are rare. PCGS has graded 20 specimens in PR67, with 2 more in PR67+, and a single example finer (6/16). NGC ID# 23GC, PCGS# 4883

- 3656 1904 PR66 PCGS.** A crisp portrait and wreath show modest contrast with the gleaming fields of this Premium Gem proof, although blended olive-gold and amber-orange toning prevents a Cameo designation. This proof issue is seldom seen above the Gem grade level. Population: 31 in 66 (2 in 66+), 10 finer (7/16). NGC ID# 23GH, PCGS# 4888

**1904 Barber Dime, PR67 Cameo  
None Numerically Finer at Either Service**

- 3657 1904 PR67 Cameo PCGS.** Both sides of this example exhibit tremendous eye appeal, with the reverse arguably the more stunning. The cameo contrast is readily apparent. Subtle caramel and russet toning is present, primarily on the obverse along with a few splashes of jade and teal. An as-made lint mark appears at Liberty's jaw. Population: 3 in 67 (1 in 67+) Cameo, 0 finer (6/16). NGC ID# 23GH, PCGS# 84888
- 3658 1909 PR67 PCGS.** This boldly defined Superb Gem proof is an exquisite example with gold and iridescent toning over much of the obverse, and mostly brilliant on the reverse. An exceptional example for the advanced Barber collector. Population: 21 in 67, 1 finer (6/16). NGC ID# 23GP, PCGS# 4893
- 3659 1909 PR66 Cameo NGC.** Cameo examples of this proof Barber dime issue are scarce in all grades. The present Premium Gem displays a sharp strike and deep, glassy fields. The interiors are brilliant, but the peripheries show a hint of light golden toning. Census: 5 in 66 Cameo, 8 finer (6/16). NGC ID# 595Y, PCGS# 84893
- 3660 1911 PR65+ Cameo PCGS.** This boldly detailed Gem Cameo proof has excellent contrast with lustrous devices and deeply mirrored fields. Both sides are bright silver with untuned surfaces. Population: 16 in 65 (1 in 65+) Cameo, 23 finer (7/16). NGC ID# 23GS, PCGS# 84895

1913 Dime, PR67+ Cameo  
The Top-Graded Example at PCGS

- 3661** 1913 PR67+ Cameo PCGS. CAC. This PR67+ Cameo representative holds the top spot among Cameo proofs at PCGS, with three PR67 submissions trailing behind (6/16). The contrast on both sides approaches Deep Cameo, as the thickly frosted motifs stand markedly against the jet-black mirrors. Each side is brilliant throughout. From a mintage of 622 proofs, this is an ideal Registry Set candidate. NGC ID# 23GU, PCGS# 84897

MERCURY DIMES

1916-D Mercury Dime, VF25  
Excellent Color, Great Collector Coin

- 3662** 1916-D VF25 PCGS. A lovely midgrade example, this well-detailed 1916-D Mercury dime displays pleasing battleship-gray color with tinges of deeper toning in the corners of the fields. The mintmark is clear, and the surfaces are decidedly original. Eye-appealing 1916-D dimes in this grade level are seldom seen. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, VF25  
Appealing Collector Coin

- 3663** 1916-D VF25 PCGS Secure. CAC. This is a well-detailed mid-grade 1916-D Mercury dime with pleasing battleship-gray patina. Scattered light marks are consistent with the grade, including a few ticks on Liberty's throat. This key-date issue is always in demand, but mid-grade circulated pieces are seldom seen with pleasing eye appeal. The present coin will appeal to a range of collectors. NGC ID# 23GY, PCGS# 4906  
*From The Craig and Jeff Lehrer Collection.*

1916-D Mercury Dime, XF40  
Seldom Seen in This Grade

- 3664** 1916-D XF40 PCGS. Hints of gold, green, and lilac appear throughout the fields of this lightly circulated, mostly steel-gray 1916-D Mercury dime. The design elements are well-detailed. This first-year key issue is surprisingly elusive in the XF grade level. Typically, only heavily worn coins or pricey Mint State pieces are offered. NGC ID# 23GY, PCGS# 4906  
*From The Craig and Jeff Lehrer Collection.*

1916-D Mercury Dime, AU55  
Nearly Full Bands

- 3665** 1916-D AU55 PCGS. This Choice AU 1916-D Mercury dime displays tinges of glimmering luster in the protected areas, while showing light surface chatter and trivial high-point wear elsewhere. The strike is bold, and the fasces bands are almost completely separated. Attractive, original AU example of this issue are difficult to locate. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, AU58  
Sharp and Lustrous

- 3666** 1916-D AU58 PCGS. CAC. This mostly lustrous near-Mint 1916-D Mercury dime displays champagne-tinted surfaces with satiny fields and sharp design elements. The fasces bands are separated, although not designated as full on the holder. This CAC-endorsed key-date coin displays exceptional eye appeal for the grade. Seldom found in this sought-after grade. Population: 58 in 58, 54 finer. CAC: 7 in 58, 6 finer (7/16). NGC ID# 23GY, PCGS# 4906

- 3667** 1916-S MS67 PCGS. The 1916-S Mercury dime is rare in Superb Gem condition, with or without a Full Bands designation. This piece shows nearly complete separation of the horizontal bands and displays comparably bold peripheries. Satiny luster is unabraded and shows hints of ice-blue and champagne toning. Population: 12 in 67 (1 in 67+), 0 finer (6/16). NGC ID# 23GZ, PCGS# 4908

- 3668 1916-S MS66 Full Bands PCGS. CAC.** This popular first-year Mercury dime offers sharply detailed design elements and vibrant mint luster, with Full Bands definition on the fascies. The virtually pristine surfaces show speckled shades of greenish-gray and amber toning. Population: 85 in 66 (5 in 66+) Full Bands, 22 finer (6/16). NGC ID# 23GZ, PCGS# 4909

**1917-S Dime, Brilliant Superb Gem**

- 3669 1917-S MS67 PCGS.** Although the 1917-S claims a substantial mintage of 27.3 million coins, Superb Gems are very rare with or without Full Bands. Softly frosted luster issues from the all-brilliant surfaces of this early branch-mint Mercury dime. The central hair strands are a touch soft, and the bands, while nearly fully separated, are insufficiently so for a formal designation. Nevertheless, an appealing Registry-quality example. Population: 3 in 67, 0 finer (7/16). NGC ID# 23H4, PCGS# 4914

**1919-D Dime, MS64 Full Bands  
Late Die State**

- 3670 1919-D MS64 Full Bands PCGS.** An impressively sharp 1919-D Mercury dime, especially considering the eroded dies that have several radial cracks on the obverse and prominent flowlines on the reverse. Luster is luminous, and mottled golden-russet toning appears over each side. The preservation is excellent. PCGS lists only 20 finer Full Bands representatives (7/16). NGC ID# 23H9, PCGS# 4925
- 3671 1920 MS66+ Full Bands PCGS. CAC.** A razor-sharp, lustrous Premium Gem example, showing deep amber-gold, russet, olive, and reddish toning over each side. A single, tiny tick on Liberty's cheek is all that prevents a full Superb Gem designation. PCGS has seen 29 finer submissions (7/16). NGC ID# 23HB, PCGS# 4929
- 3672 1921 AU58 PCGS. CAC.** This is a fully struck coin with undesignated full bands on the fascies, although a faint brush of friction over the high points of the obverse portrait precludes a Mint State designation. A key-date coin, CAC-endorsed in a popular grade. Population: 41 in 58, 16 finer. CAC: 10 in 58, 2 finer (6/16). NGC ID# 23HE, PCGS# 4934
- 3673 1921 MS62 Full Bands PCGS.** Flecks of charcoal-gray run over both sides of this better-date Mercury dime. The design elements are sharply struck throughout, including the all-important middle bands. NGC ID# 23HE, PCGS# 4935

**1924 Dime, MS67 Full Bands  
Blazing Frost-White Luster**

- 3674 1924 MS67 Full Bands PCGS.** Brilliant, radiant mint frost adorns each side of this Superb Gem Full Bands 1924 dime, illuminating almost perfect surfaces and delivering incredible eye appeal. The 1924 is seldom seen this fine with a sharp strike, and none are numerically finer at PCGS. Population: 41 in 67 (1 in 67+) Full Bands, 0 finer (6/16). NGC ID# 23HJ, PCGS# 4943

**1926 Dime, MS67+ Full Bands  
The Finest Certified**

- 3675 1926 MS67+ Full Bands PCGS.** Even if only by the margin of the Plus designation, this Full Bands 1926 Mercury dime is the single finest example certified. Non-Plus-graded coins in this condition are themselves rare, but the present piece is uniquely significant. The strike is sharp, and each side exhibits satiny mint luster with dusky tan-gold toning. Population: 25 in 67 (1 in 67+) Full Bands, 0 finer (6/16). NGC ID# 23HR, PCGS# 4955
- 3676 1926-D MS65 Full Bands PCGS.** The 1926-D Mercury dime with Full Bands becomes a very challenging issue above the Gem level of preservation. Lustrous surfaces are nearly untuned. While the middle bands are fully struck, the lower diagonal band is somewhat weak. Population: 98 in 65 (2 in 65+) Full Bands, 49 finer (6/16). NGC ID# 23HS, PCGS# 4957
- 3677 1927-D MS64 Full Bands PCGS.** As is also the case with other denominations, the branch mint dimes from the 1920s are surprisingly scarce in nice Mint State grades. This lustrous and nearly unabraded Choice example shows only a wisp of green-gold toning. Encapsulated in a first generation holder. Population: 49 in 64 Full Bands, 45 finer (6/16). NGC ID# 23HV, PCGS# 4963

**1927-S Dime, MS65 Full Bands  
Conditionally Rare Branch Issue**

- 3678 1927-S MS65 Full Bands PCGS.** The delicate pink-red and lime-green surfaces display occasional russet freckles, particularly near the left obverse rim. A sharply struck and coruscating Gem of this lower mintage and relatively early branch issue. Smooth save for a solitary tick on the cheekbone. Population: 33 in 65 Full Bands, 23 finer (7/16). NGC ID# 23HW, PCGS# 4965

**1928-S Mercury Dime, MS66  
Scarce Example With Full Bands**

- 3679 1928-S MS66 Full Bands PCGS.** CAC. A spectacular Premium Gem with sharply detailed design elements, including fully split and rounded bands on the fasces. The well-preserved lustrous surfaces show hints of pale gold and ice-blue toning. Overall eye appeal is outstanding. Population: 38 in 66 Full Bands, 9 finer. CAC: 9 in 66, 3 finer (6/16). NGC ID# 23HZ, PCGS# 4971

**1928-S Dime, MS66 Full Bands  
Scarce Issue and Strike Rarity**

- 3680 1928-S MS66 Full Bands PCGS.** CAC. Small S. This is a bold and brilliant example whose snow-white surfaces show occasional dabs of golden-russet patina. The devices are fully struck on each side and nearly pristine. A beautiful Gem example of this scarce mintmarked dime from the 1920s that is a condition and strike rarity also. Population: 40 in 66 (1 in 66+) Full Bands, 9 finer (7/16). NGC ID# 23HZ, PCGS# 4971

- 3681 1929 MS67 Full Bands PCGS.** The 1929 Mercury dime is an available date in Full Bands, but this Superb Gem example is conditionally scarce. The strike is sharp, and each side yields vibrant, frosty mint luster. A dash of light golden toning appears on the central reverse. Population: 87 in 67 (6 in 67+) Full Bands, 1 finer (7/16). NGC ID# 23J2, PCGS# 4973

- 3682 1929 MS67 Full Bands PCGS.** CAC. Seldom seen so fine and extremely rare finer. This Superb Gem Full Bands 1929 Mercury dime showcases smooth, frosty surfaces and sharp detail. Rose-gold and champagne interiors yield to aquamarine and amber peripheral hues. Population: 87 in 67 (6 in 67+) Full Bands, 1 finer (7/16). NGC ID# 23J2, PCGS# 4973

- 3683 1929-D MS67 Full Bands PCGS.** CAC. This magnificent Superb Gem is sharply detailed throughout, with fully split and rounded bands on the fasces. The lustrous surfaces are well-preserved and show attractive shades of greenish-gold toning. Population: 53 in 67 (2 in 67+) Full Bands, 2 finer (6/16). NGC ID# 5LXC, PCGS# 4975

**1929-S Mercury Dime, MS67 Full Bands  
Virtually Unobtainable Any Finer**

- 3684 1929-S MS67 Full Bands PCGS.** This magnificent Superb Gem exhibits razor-sharp definition on all design elements, including fully split and rounded bands on the fasces. The brilliant surfaces are impeccably preserved and vibrant mint luster enhances the terrific visual appeal. Population: 44 in 67 (1 in 67+) Full Bands, 0 finer (6/16). NGC ID# 23J4, PCGS# 4977

- 3685 1930-S MS66 Full Bands PCGS.** The 1930-S is many times scarcer with Full Bands than without. This Premium Gem Full Bands dime lacks any indication of color. Brilliant, frosty surfaces feature strongly impressed design elements on each side. There are 18 finer submissions at PCGS (7/16). NGC ID# 84NT, PCGS# 4981

- 3686 1931 MS66+ Full Bands PCGS.** CAC. Entirely brilliant surfaces awash in coruscating mint luster draw the eye of the viewer. Closer inspection reveals seemingly pristine fields and pinpoint definition with fully rounded and separated bands. Population: 80 in 66 (4 in 66+) Full Bands, 20 finer (6/16). NGC ID# 5BZ2, PCGS# 4983

- 3687 1931-S Doubled Die Obverse, FS-101, MS65 Full Bands PCGS.** The date is lightly die doubled, most prominently on the tail of the 9. A well struck Gem with many tiny freckles of golden-brown toning accompanying lustrous surfaces. The reverse is pristine and the obverse shows only wispy contact. PCGS# 145444 Base PCGS# 4987

- 3688 1935-D MS67 Full Bands PCGS.** 30th Anniversary Green Label Holder. The attractive ruby-red, jade-green, and chestnut-gold toning is particularly prominent on the reverse. Lustrous and nicely struck with outstanding preservation. NGC ID# 23JD, PCGS# 4995

**1936 Dime, MS68 Full Bands  
None Certified Finer**

- 3689 1936 MS68 Full Bands PCGS.** Registry builders take note: this MS68 Full Bands dime is tied for finest at both services. That feat is made even more remarkable by the fact that 87.5 million dimes were struck in 1936. Splendid glints of orange, mint-green, and sky-blue patina adorn the peripheral areas, merging with brilliant centers. Razor-sharp and pristine. Population: 19 in 68 (2 in 68+) Full Bands, 0 finer (6/16). NGC ID# 23JF, PCGS# 4999

**1937-D Dime, MS68 Full Bands  
Brilliant, None Known Finer**

- 3690 1937-D MS68 Full Bands PCGS.** A conditionally rare Superb Gem 1937-D Mercury dime, among the finest certified by either service. This piece is sharply struck and brilliant with dazzling mint bloom. The preservation confirms the lofty grade, and the eye appeal is outstanding. Population: 15 in 68 (1 in 68+) Full Bands, 0 finer (7/16). NGC ID# 23JK, PCGS# 5007

- 3691 1938-S MS67+ Full Bands PCGS. CAC.** A stunning beauty, this Superb Gem Mercury dime exhibits frosty silver luster and bold design motifs with excellent eye appeal. Just nine examples have received the PCGS Plus designation, and only six pieces are graded finer (7/16). NGC ID# 23JP, PCGS# 5015

**1939 Dime, MS68 Full Bands  
Tied for Finest Certified**

- 3692 1939 MS68 Full Bands PCGS.** Iridescence intermingles throughout the light champagne surfaces of this high-end Superb Gem Full Bands example. The strike is full, and the eye appeal is remarkable. The 1939 Mercury dime is exceedingly rare this well-preserved, and none are known finer. Population: 12 in 68 Full Bands, 0 finer (6/16). NGC ID# 23JR, PCGS# 5017

- 3693 1939-D MS68+ Full Bands PCGS. CAC.** Remarkable cherry-red, lemon-gold, and forest-green toning occupies the obverse. The reverse displays blushes of powder-blue and golden-brown. Lustrous and well struck with exemplary preservation. NGC ID# 23JS, PCGS# 5019

- 3694 1939-S MS67+ Full Bands PCGS. CAC.** Satin luster illuminates light golden toning over each side of this Plus-designated Superb Gem 1939-S dime. The strike is strong throughout, and the eye appeal is pleasing. Finer examples of this issue are almost non-existent in the Full Bands category. Population: 48 in 67 (4 in 67+) Full Bands, 1 finer (7/16). NGC ID# 23JT, PCGS# 5021

- 3695 1942/1 FS-101 AU58+ PCGS. CAC.** Vibrant luster sweeps this momentarily circulated key date dime. The minimally marked surfaces display a hint of sun-gold toning. The strike is fairly sharp at the centers though the left-side legends show incompleteness. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

- 3696 1942 MS68+ PCGS.** 30th Anniversary Green Label Holder. Remarkable cherry-red, lemon-gold, and forest-green toning bathe the obverse. The reverse is aquamarine with a narrow peripheral band of fire-red. Immaculate save for a tick on the fasces below the central bands. NGC ID# 23K3, PCGS# 5034

## PROOF MERCURY DIMES

- 3697 1936 PR66+ PCGS. CAC.** This high-end Premium Gem represents the resumption of proof coinage at the Philadelphia Mint after a two decade hiatus. The design elements are razor-sharp and the well-preserved surfaces feature reflective fields with a few hints of freckled green, gold-brown, and violet toning. NGC ID# 27DG, PCGS# 5071

- 3698 1937 PR68 NGC.** Two distinct color palettes characterize each side of this near-flawless proof. The obverse displays rings of rainbow toning with a brilliant center, while the reverse is almost completely cobalt-blue with splashes of mauve and rose hues. A splendid Mercury dime proof, encapsulated in a former generation holder. NGC ID# 27DH, PCGS# 5072

## ROOSEVELT DIMES

- 3699 1949 MS67+ Full Bands PCGS.** This spectacular high-end Superb Gem displays impeccably preserved, lustrous surfaces, with vivid shades of greenish-gold and lilac toning. The design elements are sharply detailed, with Full Bands on the torch. Population: 17 in 67 (3 in 67+) Full Bands, 1 finer (6/16). NGC ID# 596K, PCGS# 85091

**1949-D Dime, MS68 Full Bands  
Tied for Finest Certified**

- 3700 1949-D MS68 Full Bands PCGS.** A condition rarity and among the finest 1949-D Roosevelt dimes known, this MS68 Full Bands coin displays full design definition and frosty, luminous mint luster. Crescents of lemon-gold and amber-orange appear along the upper-left peripheries, while the remainder of each side is mint-fresh. Population: 9 in 68 Full Bands, 0 finer (6/16). NGC ID# 23KV, PCGS# 85092

- 3701 1952-S MS67+ Full Bands PCGS.** Vivid rainbow-like toning runs over the obverse of this high-end Superb Gem, ceding to softer and more subtle ice-blue and tan on the reverse. Fully struck design elements further enhance the coin's outstanding eye appeal. Population: 62 in 67 (16 in 67+) Full Bands, 4 finer (6/16). NGC ID# 23L7, PCGS# 85102

- 3702 1952-S MS67+ Full Bands PCGS.** Attractive concentric bluish-green, rose, gold, and violet toning on the obverse border frames the untoned center, while the reverse displays a wave of light brown color at the margin. The design elements are sharply impressed and the surfaces are impeccably preserved. Population: 62 in 67 (16 in 67+) Full Bands, 4 finer (6/16). NGC ID# 23L7, PCGS# 85102

**1964-D Dime, MS68 Full Bands  
The Single Finest Certified**

- 3703 1964-D MS68 Full Bands PCGS.** Ex: Just Having Fun. This is the sole finest 1964-D Roosevelt dime certified with Full Bands (6/16). The luster is satiny and vibrant, and rich russet-orange, sun-yellow, and forest-green toning surrounds the margins. The centers remain brilliant. The Registry Set collector should not let this top-grade coin pass by. NGC ID# 23M3, PCGS# 85129

**SMS ROOSEVELT DIME**

- 3704 1967 SMS MS68 Ultra Cameo NGC.** This high-end Special Mint Set 1967 Roosevelt dime has all of the eye appeal and cameo contrast of a proof. The strike is sharp, and the coin is completely untoned. An outstanding Registry-grade example. Census: 11 in 68 Ultra Cameo, 1 finer (7/16). NGC ID# 22LK, PCGS# 95242

**TWENTY CENT PIECES**

- 3705 1875 MS63 NGC. BF-1, R.1.** Light golden-brown toning adorns the borders of this satiny and crisply struck Select example. Marks are refreshingly few, and confined to minor contact on the right obverse field. From a mintage of 38,500 pieces, the 1875 is scarcer than its San Francisco cousin. NGC ID# 23R5, PCGS# 5296
- 3706 1875 MS63 NGC. BF-1, R.1.** Forest-green toning dominates the obverse, though plum-red is apparent within the drapery folds. The reverse is primarily orange-gold but has a cobalt-blue and lavender border. A satiny first-year twenty cent piece with a good strike and minimal contact on the obverse field. NGC ID# 23R5, PCGS# 5296
- 3707 1875-CC AU53 PCGS. BF-2, R.1.** A pleasing AU example of this popular Carson City twenty cent issue, showing partial luster in the fields and light golden toning over each side. The upper portion of the eagle's left (facing) wing shows the usual strike weakness, although the obverse is well-defined. NGC ID# 23R6, PCGS# 5297
- 3708 1875-CC AU53 PCGS. BF-4, R.2.** Medium steel-gray and tan-brown toning embrace this minimally abraded Carson City type coin. The high points of the eagle and Liberty display minor wear. BF-4 is the Wide CC variety. Certified in a green label holder. NGC ID# 23R6, PCGS# 5297

**PROOF TWENTY CENT PIECES**

**1875 Twenty Cent, PR66  
First-Year Issue, Multihued Toning**

- 3709 1875 PR66 NGC.** The introduction of the twenty cent series saw a P-mint production of 38,500 coins for commerce, complemented by a run of 1,200 proofs. The facility would only manufacture circulation strikes again in 1876, while it continued to issue proofs through 1878. This marvelous Premium Gem twenty cent has mottled multihued toning that includes elements of orange, violet, blue, and green. Nearly unsurpassed preservation and an expectedly bold impression heighten the appeal. Census: 20 in 66, 1 finer (6/16). NGC ID# 27GZ, PCGS# 5303

**1876 Twenty Cent, PR64  
Modest Cameo Contrast**

- 3710 1876 PR64 PCGS. BF-2, R.2.** The 1876 is a popular proof issue in the twenty cent series, partly because of the scarcity of high-grade circulation strikes of this year. The present coin is sharply struck, with mirrored fields and considerable cameo contrast on the obverse. Mottled steel-blue and grayish toning appears over each side. Finer examples are scarce. NGC ID# 27H3, PCGS# 5304

**1877 Twenty Cent, PR64 Cameo  
Proof-Only Issue, 510 Coins Struck**

- 3711 1877 PR64 Cameo NGC. BF-1, R.3.** The Mint employed a single die pair to coin 510 twenty cent proofs in 1877. There was no demand for circulation strikes, and even the proofs on-hand failed to sell out. The new Brunner-Frost reference notes that the net mintage for the 1877 is reported to be 350 proofs after unsold coins were melted. This is the first of two proof-only issues in the series, and examples are scarcer than their 1878 counterparts. The surfaces of this brilliant Choice proof offer pronounced white-on-black contrast that verges on Ultra Cameo. Delicate obverse hairlines limit the grade. NGC ID# 27H4, PCGS# 85305

## EARLY QUARTERS

### 1804 B-1 Quarter, Good 4 Problem-Free Surfaces

- 3712** 1804 B-1, R.3, Good 4 PCGS. Tompkins Die State 2/2. The die scratch near obverse star 9 confirms the Browning marriage. A walnut-brown and cream-gray example of the very scarce introductory Heraldic Eagle date. The date is bold, as is LIBERTY and the stars. STATES OF is equally sharp, but UNITED and AMERICA are well-worn. No abrasions are consequential. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

- 3713** 1805 B-1, R.4 — Scratch — PCGS Genuine. AU Details. Rich aquamarine borders frame golden-brown and steel-gray centers. Wear from commerce is minimal, although portions of the design are incompletely defined. A pair of scratches, one in the right obverse field and the other from the 1 in the date to the rim, match the PCGS notation.  
*Ex: Harlan Page Smith; Byron Reed; City of Omaha, Nebraska; Durham Western Heritage Museum; Byron Reed Collection (Spink America/Christie's, 10/1996), lot 304. NGC ID# 23RC, PCGS# 38923 Base PCGS# 5313*

### 1805 B-3 Quarter, AU53 Partial Mint Luster

- 3714** 1805 B-3, R.1, AU53 PCGS. Tompkins Die State 5/3. Many die cracks and clash marks confirm the late die state of this lightly circulated Draped Bust type coin. Dove-gray and mahogany-brown shades adorn partly lustrous surfaces. Apparent marks are confined to a pair of thin lines within the eagle's neck and shield. The strike is generally good, although Liberty's tail causes softness on the E in LIBERTY. NGC ID# 23RC, PCGS# 38925 Base PCGS# 5313

- 3715** 1806 B-2, R.2, VF20 PCGS. Tompkins Die State 2/4. Charcoal-gray fields contrast with stone-white high points. A pleasing Very Fine Draped Bust type coin. There are no conspicuous marks, and although the shield shows softness, the remainder of the strike is consistent. NGC ID# 23RD, PCGS# 38928 Base PCGS# 5314

## BUST QUARTERS

### 1815 B-1 Quarter, AU55 ★ Enigmatic 'E' Counterstamp

- 3716** 1815 B-1, R.1 — "E" Counterstamp — AU55 ★ NGC. In the early 1880s, a quantity of better grade counterstamped Bust quarters emerged in the East Coast numismatic scene. Such pieces had either the letter "E" or "L" on the obverse field at 12 o'clock, and always on either 1815 B-1 or 1825 B-2 quarters. All four combinations are known. Over the years, various theories have appeared in print, all noble efforts but none fully convincing. This well struck and partly lustrous piece displays golden-brown and apple-green toning throughout the margins.  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 2624, which realized \$1,621.50. NGC ID# 23RG, PCGS# 38942 Base PCGS# 5321*

- 3717** 1818/5 B-1, R.2 — Cleaning — PCGS Genuine. AU Details. Tompkins Die State 2/2. This well defined early quarter has granular slate-gray fields. Liberty's cheek and neck exhibit wispy abrasions. The eagle's claws and a few of Liberty's curls have been strengthened. NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323

### 1818/5 B-1 Quarter, AU50 Attractive Rainbow Toning, Gold CAC

- 3718** 1818/5 B-1, R.2, AU50 PCGS. Gold CAC. Tompkins Die State 2/2. Iridescent multicolor toning visits both sides of this rainbow-toned, reflective coin. The overdate is visible with a lens, with the faint remnants of the flag of an underdigit 5 within the top loop of the second 8. Light lines, abrasions, and marks are likewise visible under magnification, but in-hand this example appears smooth and attractive with prooflike tendencies. High point rub exists from the brief circulation, yet the devices remain sharp. Housed in an old green label holder with the ultra-desirable CAC Gold endorsement. Population: 4 in 50, 57 finer (7/16). Gold CAC: 1 in 50, 0 finer (7/16).  
*Ex: Becker and Kuehnert (5/1990).  
From The Hamilton Collection. NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323*

**1815 B-1 Quarter, MS63  
'E' Counterstamp**

- 3719 1815/5 "E" Counterstamp, B-1, R.2, MS63 NGC.** Seen only on 1815 B-1 and 1825 B-2 quarter dollars, the E and L counterstamps have confounded numismatists since they were first noticed in the 1870s. Several different theories have been proposed since that time, but none have been proven. They may have been related to Pennsylvania's Harmony Society, dating to the 1830s. This Select Mint State piece exhibits lustrous central areas on the obverse and reverse, with intense peripheral gold, blue, and iridescent toning. *From The Hamilton Collection.* NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323

**1818 B-2 Quarter, AU55  
Boldly Clashed Dies**

- 3720 1818 B-2, R.1, AU55 PCGS. CAC.** Tompkins Die State 4/3. Olive-gold and cobalt-blue toning dominates the obverse, while the reverse displays multicolor shades of ruby-red, blue, lemon-gold, and silver-gray. The strike is sharp despite extensive die clashing on both sides and numerous die crack. Marks other than those of Mint origin are minor, and nice luster remains. Struck from a late state of the obverse and reverse, lacking only a long crack through the arrows to justify the latest-known die stage. Housed in a prior generation green label holder with CAC endorsement. *From The Hamilton Collection.* NGC ID# 23RH, PCGS# 38943 Base PCGS# 5322

- 3721 1819 Large 9, B-2, R.3, XF40 PCGS. Gold CAC.** Tompkins Die State 4/1. The S's in STATES and PLURIBUS are aligned. Cracks encircle the obverse. This was likely the final die pair used in 1819. The reverse die was saved and employed to strike coins in 1827. Blue and gold tones color each side of this pleasing representative, which CAC deems to be undergraded by at least one grade level. Undoubtedly well-defined for the assessment. Housed in an old green label holder, and the only such coin with a gold CAC sticker (7/16). *From The Hamilton Collection.* NGC ID# 23RK, PCGS# 38957 Base PCGS# 5326

- 3722 1820 Large 0, B-1, R.4, XF40 NGC.** The two 1820 Large 0 varieties, B-1 and B-2, share the same obverse die. But B-1 is much scarcer than its B-2, and is distinguished at a glance by its T-I alignment (the second T in STATES is directly above the I in PLURIBUS). This cream-gray, ocean-blue, and lavender Capped Bust quarter is smooth aside from a faint scuff above the final two date digits. NGC ID# 23RL, PCGS# 38960 Base PCGS# 5329

**1820 Large 0 Quarter, B-2, AU55  
Semiprooflike Fields, Splendid Toning**

- 3723 1820 Large 0, B-2, R.2, AU55 PCGS. CAC.** Tompkins Die State 1/1, struck from perfect dies. Peach-gold, violet, and cerulean blue shades cover semiprooflike surfaces of this Choice Large 0 quarter. Two varieties exist with the same obverse to account for all of the Large 0 production, with the Browning-1 variety slightly scarcer than this B-2 die pair. A sharp coin with only a few light abrasions and tiny marks, housed in an old green label holder with CAC endorsement. The eye appeal is excellent. Population (large 0 varieties): 4 in 55, 16 finer (7/16). CAC: 2 in 55, 16 finer (7/16). *Ex: "Cairns" (12/1887).* *From The Hamilton Collection.* NGC ID# 23RL, PCGS# 38961 Base PCGS# 5329

- 3724 1821 B-4, R.3, AU50 NGC.** A predominantly stone-gray representative with glimpses of tan toning and a blush of rich aquamarine patina on the lower reverse. Small marks are scattered but none are distracting. A die line from a leaf tip to the rim identified the moderately scarce B-4 variety. NGC ID# 23RM, PCGS# 38966 Base PCGS# 5331

- 3725 1824/2 B-1, R.3, VG8 PCGS.** The sole 1824-dated die marriage, and scarcer than suggested by the *Guide Book* mintage of 168,000 pieces, shared with the 1825-dated varieties. This example has a stone-gray center and rich sea-green and lilac-red margins. NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

- 3726 1828 B-1, R.1, XF40 PCGS.** Tompkins Die State 1/1. The 2 in the denomination has a curled base, and E in STATES is positioned over the B. This is the most often seen die marriage for 1828 (102,000 coins struck in all). Deep antique patina on the obverse lightens to gold and pale blue on the reverse. A sharply detailed Capped Bust quarter despite brief circulation. Certified in an old green label holder. *Ex: Becker and Kuehnert (1/1991).* *From The Hamilton Collection.* NGC ID# 23RV, PCGS# 38976 Base PCGS# 5342

**1831 Capped Bust Quarter, MS64  
Small Letters, B-4 Variety**

- 3727 1831 Small Letters, B-4, R.1, MS64 PCGS. CAC.** A radial die crack through the C in 25 C helps attribute this collectible Browning marriage. The present well-struck and impressively unabraded near-Gem displays powder-blue, wheat-gold, and lime-green toning. The reverse is rich ocean-blue aside from a blush of sun-gold near the left margin. Population: 62 in 64 (3 in 64+), 21 finer. CAC: 11 in 64, 12 finer (6/16). NGC ID# 23RW, PCGS# 38983 Base PCGS# 5348

- 3728 1831 Large Letters, B-7, FS-301, High R.5, VG10 PCGS.** B-7 is the rarest 1831 die marriage. Our online auction archives indicate just two appearances of a B-7, including the Good Details, Reverse Scratched Jules Reiver example that sold for \$1,092.50 in January 2006. The present tan-gold and steel-gray quarter is problem-free for the grade. STATES is softly defined due but the remainder of the legends are clear. PCGS# 38986 Base PCGS# 5349

**1832 B-1 Quarter, MS63**  
**Elusive in Uncirculated Condition**

- 3729 1832 B-1, R.1, MS63 PCGS.** Tompkins Obverse Die State 2, cracked. The 1832 is a slightly scarcer date in Mint State, and few pieces are known finer than the present Select example. The strike is sharp, and each side displays satiny mint luster with a hint of light golden toning. Grade-limiting abrasions are minimal. Population: 18 in 63 (1 in 63+), 15 finer (7/16). NGC ID# 23RX, PCGS# 38987 Base PCGS# 5351

**1834 B-2 Quarter, MS64**

- 3730 1834 B-2, R.4, MS64 PCGS.** B-1 and B-4 are the usually encountered 1834 quarter varieties. B-2 is very scarce, and the present Choice Uncirculated example is desirable. The untoned and coruscating surfaces display incidental contact, along with a small, shallow strike-through on Liberty's neck. The strike is precise except on the occasional star center. NGC ID# 23RZ, PCGS# 38993 Base PCGS# 5353

- 3731 1835 B-4, R.3, MS62 NGC.** Tompkins Die State 4/1. Deep gunmetal-gray toning encompasses most of the obverse. The reverse has a forest-green border, and a golden-brown and silver-gray field. The satiny surfaces are free from conspicuous marks, and the strike is bold except on the left-side obverse stars. NGC ID# BK5R, PCGS# 39000 Base PCGS# 5354

**1836 Quarter, B-4, MS64**  
**Moderately Prooflike Fields**  
**Early Quarter Dollars Plate Coin**

- 3732 1836 B-4, R.4, MS64 NGC.** This is the plate coin for the variety in *Early Quarter Dollars of The United States Mint*, the 2010 reference written by numismatic luminaries Rory R. Rea, Dr. Glenn Peterson, Bradley S. Karoleff, and John J. Kovach Jr. The coin is tied for the finest known B-4 with one other MS64 NGC example, lot 791 from our April 2008 Rosemont Central States auction. Lengthy radial die cracks on both sides help attribute this well-preserved Capped Bust quarter. The mildly prooflike surfaces are brilliant save for peripheral golden-brown. Study beneath a loupe fails to locate any grade-limiting abrasions. Minor retained laminations are noted on the D in UNITED, the C in 25 C, and the field beneath the beak. Combined Census for all 1836 varieties: 17 in 64, 0 finer (6/16).

Ex: *The Classic Sale* (ANR, 12/2003), lot 645; *Philadelphia Signature* (Heritage, 12/2012), lot 3256. NGC ID# 23S3, PCGS# 39008 Base PCGS# 5355

- 3733 1838 B-1, R.1, AU55 PCGS.** Gold CAC. This is the only die marriage for the final-year Capped Bust quarter issue from a mintage of 366,000 coins. This Choice AU survivor displays an overlay of steel-blue and tan patina. Strike detail is strong at the centers, although the marginal design elements are incomplete. Certified in an old green label holder with a rarely awarded gold CAC sticker. **From The Hamilton Collection.** NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357

- 3734 1838 Capped Bust, B-1, R.1, AU58 PCGS.** CAC. A sharply detailed, deeply toned near-Mint example of the final Capped Bust quarter issue, showing rich olive-gray and russet hues over each side with muted luster in the fields. Eye appeal is excellent for the collector who appreciates old-time patina. Population: 17 in 58, 57 finer (7/16). NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357

**1838 B-1 Bust Quarter, MS62**  
**Final Year of Type**

- 3735 1838 B-1, R.1, MS62 NGC.** Chestnut-gold and sea-green embraces the fields. The high points are lavender-gray. Lightly abraded and satiny with a few incompletely struck stars. B-1 is the only 1838 Capped Bust die marriage. The Seated Liberty design had already been implemented on half dimes and dimes the previous year. Quarters converted in 1838, half dollars in 1839, and silver dollars in 1840. NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357

## SEATED QUARTERS

**3736 1843 MS64 NGC.** Dusky autumn-brown and lavender toning encompasses this well struck and coruscating Choice quarter. The obverse is practically unabraded, while the reverse field exhibits a few hair-thin marks. Census: 14 in 64 (1 in 64+), 4 finer (6/16). NGC ID# 4B6W, PCGS# 5404

**3737 1843-O Large O, FS-501, VF35 PCGS. CAC.** Just one 1843-O reverse die shows the Large O mintmark, presumably intended for the half dollar denomination. This charcoal-gray representative lacks any noticeable abrasions and displays pleasing definition on LIBERTY and the eagle's plumage. The reverse field exhibits a few tiny die lumps, as made. NGC ID# 23SS, PCGS# 395927 Base PCGS# 5405

### 1844 Seated Quarter, MS64+ Richly Toned, Scarce So Fine

**3738 1844 MS64+ PCGS. CAC.** Ocean-blue, lavender-red, and olive-gold toning endows both sides of this satiny and lightly abraded Choice quarter. A single diagonal roller mark across the seated Liberty is as struck. An uncommon No Motto date in the Seated quarter series, especially in high grade. Population: 8 in 64 (2 in 64+), 2 finer. CAC: 5 in 64, 2 finer (6/16). NGC ID# 23ST, PCGS# 5406

### 1850 Quarter, Elusive MS64 FS-301, Misplaced Date

**3739 1850 Misplaced Date, Briggs 1-A, FS-301, Flynn-MPD-001, MS64 PCGS.** As always on the 1850 circulation strike, this Seated Liberty quarter displays the base of a misplaced 1 in the dentils below the date. The reverse is also heavily cracked through STATES OF, indicating the usual late die state. The coin is brilliant and satiny with well-struck design elements and minimally abraded surfaces. The 1850 quarter is seldom seen in any Mint State grade. Population: 4 in 64, 2 finer (7/16). NGC ID# 23T4, PCGS# 395929 Base PCGS# 5415

### 1853/53 No Arrows Quarter Low Mintage Old Tenor Issue

**3740 1853/53 No Arrows, Briggs 1-A, FS-301, XF45 PCGS.** The Philadelphia Mint struck more than 15 million quarters in 1853, the highest mintage of any U.S. issue up to that time. But the No Arrows production was only 44,200 pieces. Only a single No Arrows die marriage is known, the variety with clear repunching on the 53 in the date. This lightly circulated and moderately abraded example has mottled golden-brown, jade-green, and stone-gray toning. NGC ID# 23TA, PCGS# 395930 Base PCGS# 5421

**3741 1853 Arrows and Rays MS62 NGC.** The brilliant mint luster is subdued beneath grayish-gold toning on this pleasing Mint State one-year type issue. Both sides have bold details and relatively mark-free surfaces for the grade. NGC ID# 23U4, PCGS# 5426

### 1853/4 Arrows and Rays Quarter, MS64 Condition Census

**3742 1853/4 Arrows and Rays, Briggs 1-A, FS-1301, MS64 PCGS.** This enigmatic overdate shows a mistaken final-digit punch from the next year rather than the previous year. The die state of the present coin shows the upper portion of the 4 within the top of the 3 and also plainly displays the repunching above the right arrow shaft. Only 24 pieces have been certified in Mint condition by both of the major grading services combined. At the MS64 level, this coin is tied with just four others at PCGS with a single Gem finer (6/16). This is a lovely coin that has the usual strong mint luster one would expect on an 1853 quarter. The lustrous finish serves to backlight gray-olive surfaces that have a strong contrast of charcoal-gray over the devices. Sharply struck and seemingly defect-free. NGC ID# 23U4, PCGS# 395931 Base PCGS# 5427

**3743 1854 Arrows MS64 NGC. CAC.** A plentiful issue, ideal for type purposes. This Choice CAC coin displays a bold strike and satiny mint luster. Original ocean-blue and lavender peripheral toning surrounds nearly brilliant interiors. Census: 70 in 64, 27 finer. CAC: 15 in 64, 12 finer (6/16). NGC ID# 23U6, PCGS# 5432

**3744 1854-O Huge O, Briggs 1-A, FS-501 — Cleaning — PCGS Genuine. Fine Details.** It is an exaggeration to compare the Huge O mintmark to a Yap stone, but it is nonetheless crude and oversized. This silver-gray example shows each letter in LIBERTY, although the LI and TY are partial. A lens reveals wispy hairlines. NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

**1855 Arrows Quarter, MS64+  
Original Toning and Luster**

- 3745** 1855 Arrows MS64+ PCGS. CAC. Satiny mint luster illuminates sharp design elements and fairly well-preserved surfaces on this high-end near-Gem 1855 Arrows quarter type coin. The obverse displays blended olive-gold, greenish-gray, and lavender toning, while the reverse is slightly deeper orange-gold in the center. A small tick above the eagle's head and a thin scratch on Liberty's cheek are the only mentionable abrasions. Population: 19 in 64 (1 in 64+), 11 finer. CAC: 7 in 64, 4 finer (6/16). NGC ID# 23U8, PCGS# 5435

**1856-S/S FS-501 Quarter, VF30  
Rare Large Over Small S Variety**

- 3746** 1856-S/S Large Over Small S, Briggs 4-E, FS-501, VF30 PCGS. The Cherrypickers' manual deadpans, "this is one of the more desirable mintmark varieties in the Liberty Seated series." The first mintmark entered is much smaller and is from a punch likely intended for use on half dimes. FS-501 is rare in all grades. This moderately circulated example is nicely defined and has unblemished cream-gray and wheat-gold surfaces. Population: 1 in 30, 4 finer (6/16). PCGS# 395935 Base PCGS# 5441

- 3747** 1860-O MS63 PCGS. CAC. Briggs 2-B. Dappled cream-gray and blue-green toning embraces satiny and minimally marked surfaces. The strike is good except on the upper stars. The faint mintmark variant of this conditionally rare New Orleans issue. Due to the Civil War, the final quarter issue from the facility until 1891. NGC ID# 23TR, PCGS# 5452

**1861-S Quarter, XF40  
Challenging Civil War Issue**

- 3748** 1861-S XF40 PCGS. Briggs 2-B. In 1861, the San Francisco Mint struck close to ten times as many half dollars as quarters. Despite its scarcity, the 1861-S quarter was little-saved, due to the absence of West Coast collectors prior to the 20th century. This dove-gray and autumn-brown XF representative is evenly microgranular and only inoffensively abraded. Population: 7 in 40, 15 finer (7/16). NGC ID# 23TU, PCGS# 5455

- 3749** 1861-S — Damage — PCGS Genuine. AU Details. Briggs 1-A. This well-defined silver-gray better date quarter is moderately hairlined and has rim marks at 4:30 and 8:30 on the reverse. A vertical scrape affects the eagle's legs, the mintmark, and the U in QUAR. NGC ID# 23TU, PCGS# 5455

**1862-S Quarter, MS63  
Low-Mintage Branch Issue**

- 3750** 1862-S MS63 PCGS. Briggs 1-A. The San Francisco Mint struck 1,352,000 half dollars during the Civil War year of 1862, but the facility's production of quarters was much smaller: only 67,000 pieces. Despite the low mintage, no numismatic consideration was given to examples, and Uncirculated survivors are very rare. This lustrous and lightly toned example displays few marks. The strike is crisp except on the left-side stars. Population: 6 in 63, 2 finer (6/16). NGC ID# 23TW, PCGS# 5457

- 3751** 1867 VF35 PCGS. Briggs 1-A. For several years after the Civil War, quarters were hoarded from circulation, since paper money was prevalent and traded at a discount to silver coin. As a result, the 1867 quarter had a mintage of only 20,000 pieces. This is a problem-free silver-gray example with moderate wear. NGC ID# 23UD, PCGS# 5470

**1871 Seated Quarter, MS66  
Medium Golden Toning**

- 3752 1871 MS66 PCGS. Briggs 2-B.** At least four business strike die pairs are known, despite a scant mintage of 118,200 pieces. This lustrous and well preserved representative displays moderate obverse golden-brown and silver-gray toning. The reverse is closer to white but shows hints of tan patina near the rim. The strike is good although the upper obverse shows minor blending. NGC ID# 23UM, PCGS# 5478

**1874-S Arrows Quarter, MS66  
Outstanding, High-End Type Coin**

- 3753 1874-S Arrows MS66 PCGS. Briggs 1-A.** Forest-green and tobacco-brown toning accompanies the borders, while the fields and motifs are principally brilliant. A crisply struck, frosty, and thoroughly lustrous Premium Gem that boasts superior eye appeal. PCGS reports just five numerically finer examples. Population: 36 in 66 (2 in 66+), 5 finer (6/16). NGC ID# 23VY, PCGS# 5495

**1874-S Arrows Quarter, MS66  
Rich Multicolor Patina, Bold Luster**

- 3754 1874-S Arrows MS66 PCGS. Briggs 1-A.** Dusky peach-gold centers are bounded by broad steel-blue and reddish-lilac margins. This coruscating Premium Gem is free from consequential contact. The centers are boldly struck, and only the right-side stars show moderate inexactness of impression. The Motto, Arrows subtype was coined only for two years, and this colorful San Francisco representative offers terrific eye appeal for the type. Population: 36 in 66 (2 in 66+), 5 finer (6/16). NGC ID# 23VY, PCGS# 5495

**1876 Seated Quarter, MS67+  
Tied with One Other for Finest at PCGS**

- 3755 1876 MS67+ PCGS. CAC.** This amazing Superb Gem Centennial year Seated Liberty quarter is an impressive piece, and no finer PCGS certified example has been graded. The obverse had fine peripheral die cracks and faint clash marks, features that also appear on the reverse. This beauty has gold and green toning over frosty luster on both sides with bold design motifs. Population: 8 in 67 (2 in 67+), 0 finer. CAC: 6 in 67, 0 finer (7/16). NGC ID# 23V2, PCGS# 5501

**1877-S Quarter, MS67  
Lustrous and Richly Toned**

- 3756 1877-S MS67 PCGS. CAC.** The 1877-S quarter is a more available issue, from a large mintage of nearly 9 million pieces. However, few survivors can match the appeal of this magnificent MS67 specimen. Iridescent shades of greenish-gray, cerulean-blue, and violet toning blanket the prooflike surfaces of this high-end Superb Gem. The design elements are sharply impressed and overall eye appeal is outstanding. Population: 2 in 67, 0 finer. CAC: 2 in 67, 0 finer (6/16). NGC ID# 23V7, PCGS# 5506

- 3757 1879 MS65 PCGS. CAC. Briggs 1-A.** In 1879, large-scale silver dollar production led to token productions of the smaller silver denominations. Quarters were struck only at Philadelphia, with mintages limited to 13,600 commercial pieces along with 1,100 proofs. The present business Gem is smooth, nicely struck, and coruscating. Medium wheat-gold, ocean-blue, and cream-gray toning embraces both sides.  
*Ex: FUN Signature (Heritage, 1/2014), lot 4163, which realized \$1,762.50. NGC ID# 23VB, PCGS# 5511*

**1879 Quarter Dollar, MS66+  
Low-Mintage Circulation Strike**

- 3758 1879 MS66+ PCGS. CAC.** A tiny die dot between the second and third vertical stripes in the reverse shield identifies this piece as one of the 13,600 circulation strike quarters of 1879, according to Larry Briggs. Both sides exhibit brilliant satin luster with reflective fields and lovely peripheral gold toning. Population: 37 in 66 (4 in 66+), 26 finer. CAC Green: 12 in 66, 22 finer (6/16). NGC ID# 23VB, PCGS# 5511

**1880 Quarter, Colorful MS67**

- 3759 1880 MS67 PCGS. CAC. Briggs 1-A.** Type Two Reverse, as always. This rare Superb Gem displays frosty mint luster and well-struck design elements. Original multicolor toning blankets each side, delivering splendid eye appeal. The 1880 Seated quarter is a common date overall, but Superb Gems are seldom seen. Population: 16 in 67 (1 in 67+), 1 finer. CAC: 10 in 67, 0 finer (6/16). NGC ID# 23VC, PCGS# 5512
- 3760 1883 MS66 PCGS. Briggs 2-A.** Olive-green and caramel-gold blend throughout the obverse. The equally pleasing reverse displays medium golden-brown and powder-blue patina. The strike is sharp and both sides are splendidly preserved. Struck from a different reverse die than Briggs 1-A, the marriage used to coin proofs. Population: 20 in 66 (1 in 66+), 3 finer (6/16). NGC ID# 23VF, PCGS# 5515

**PROOF SEATED QUARTERS**

**1858 Quarter, PR64+ Cameo  
Attractive Toning, Modest Contrast**

- 3761 1858 PR64+ Cameo PCGS. CAC. Briggs 5-E.** The 1858 was the first proof Seated quarter issue marketed to the public, increasing sales and production over the trivial levels of years past. But examples of this issue are nonetheless scarce in all grades and highly sought-after. The present Cameo displays a full strike and deeply mirrored fields. A hint of champagne toning graces the interiors, while the borders show deeper amber, violet, and blue hues. Population: 7 in 64 (1 in 64+) Cameo, 1 finer. CAC: 3 in 64, 1 finer (7/16). NGC ID# 23WK, PCGS# 85554

- 3762 1859 PR64 PCGS.** Type One Obverse. Type Two Reverse. Briggs "1-B", a die combination unlisted in his classic reference. Orange-red and aquamarine tints encompass this intricately struck and minimally hairlined Choice proof quarter. 1859 was the first year that proof mintages were recorded for posterity. 800 were made. NGC ID# 23WL, PCGS# 5555

**1863 Quarter, Gem Proof  
Only 460 Proofs Struck**

- 3763 1863 PR65 PCGS. Briggs 4-D.** Deep ocean-blue toning dominates the obverse, though the margin exhibits narrow arcs of straw-gold. The reverse has a peach-gold and cherry-red field framed by peripheral cobalt-blue. Sharply struck and flashy with exemplary surfaces. A scant 460 proofs were produced for this Civil War date. NGC ID# 23WR, PCGS# 5559

**1864 Seated Quarter, PR65 Cameo**  
Only 470 Proofs Produced

- 3764 1864 PR65 Cameo NGC.** Only 470 proof quarters were struck in this Civil War year. Even though 93,600 circulation strikes were produced, high-grade examples are seldom seen. Cameo specimens are also scarce. Only seven other pieces have been so graded by NGC with six finer (6/16). This is a deeply mirrored piece with peripheral apple-green and plum-mauve toning on the reverse. The obverse has a blush of rose-red patina extending inward from star 9. NGC ID# 23WS, PCGS# 85560

- 3765 1865 PR62 Cameo PCGS. Briggs 3-B.** A fully struck Civil War proof quarter. The motifs are frosty and contrast with the prominently mirrored fields. Void of evident contact, although the obverse displays scattered small freckles of deep russet patina. The obverse rim exhibits cherry-red and cobalt-blue toning. NGC ID# 23WT, PCGS# 85561

**1868 Quarter, PR67**  
Exceptional Color, Repunched Date

- 3766 1868 PR67 NGC. Briggs 2-B, Flynn-RPD-001.** Spectacularly toned in rainbow shades of cobalt-blue to greenish-gold with royal blue and reddish-gold centers, this impressive Superb Gem proof quarter possesses eye-stopping color. The design elements are sharply detailed and the deeply reflective fields shine through the toning. A few faint lines are evident beneath the gorgeous patina, but they are microscopic in nature and the eye appeal is simply astounding. A die lump on the shield scroll at the B of LIBERTY is characteristic of the die pair, an unusual artifact to find on a proof. The 1 in the date is lightly repunched north. From a modest mintage of 600 pieces, this is the highest-graded non-cameo at either service. Census: 1 in 67, 0 finer (6/16). NGC ID# 23WZ, PCGS# 5567

- 3767 1869 PR65 NGC. Briggs 2-B, Flynn-DDO-001.** Liberty's shield displays minor die doubling. A brilliant and blatantly mirrored Gem with undesignated but unmistakable cameo contrast. A slight flan streak near star 1 is of mint origin. NGC ID# 29SH, PCGS# 5568

**1873 Arrows Quarter, PR65**  
Short-Lived Subtype

- 3768 1873 Arrows PR65 PCGS. Briggs 5-D.** Dappled aquamarine and rose-red toning blankets the obverse. The reverse exhibits outstanding eye appeal, since it features a frosty eagle, a glassy white field, and peripheral navy-blue, plum-mauve, and autumn-brown toning. Well struck and free from blemishes. An impressive specimen of this two-year proof subtype. NGC ID# 23XR, PCGS# 5574

**1873 Arrows Quarter, PR66+**  
Two-Year Design Subtype

- 3769 1873 Arrows PR66+ NGC. Briggs 5-D.** Vibrant ocean-blue toning fills the fields. The borders exhibit glimpses of autumn-gold patina. A flashy, fully struck, and undisturbed high-grade specimen. Proof quarters of the Arrows, Motto subtype are very scarce. 500 proofs were coined in 1873, and another 700 pieces struck in 1874. The No Arrows, Motto subtype resumed the following year. NGC ID# 23XR, PCGS# 5574

- 3770 1875 PR65 Cameo NGC. Briggs 4-E.** Type One Reverse. A thick overlay of frost blankets the devices, producing stark contrast against highly reflective mirrors throughout this Gem Cameo quarter. The surfaces are largely brilliant and show a handful of trivial contact marks under close examination. From a mintage of 700 proofs. Ex: *FUN Signature (Heritage, 1/2004)*, lot 6018; *Pittsburgh Signature (Heritage, 8/2004)*, lot 5954. NGC ID# 23X7, PCGS# 85576

1876 Quarter, PR66 Deep Cameo  
Eye-Catching Registry Set Contender

- 3771** 1876 PR66 Deep Cameo PCGS. CAC. Type Two Reverse. Brilliant and starkly contrasted, this Deep Cameo Premium Gem features seemingly endless depth in the fields that surround thickly frosted relief elements. The broad square rims and a needle-sharp strike are typical of a proof, and the aesthetic appeal is undeniable. From a reported mintage of 1,150 examples, there are none finer at either service. Population: 5 in 66 Deep Cameo, 0 finer (6/16). PCGS# 95577

1880 Seated Quarter, Toned PR67

- 3772** 1880 PR67 PCGS. Briggs 2-B. Type Two Reverse. Beautifully toned, as are many examples of this proof issue, but also remarkably well-preserved. The strike is sharp, and each is awash in mottled multicolor hues. Modest field-device contrast is seen at ideal angles. Superb Gem examples of this date are rare. Population: 9 in 67 (1 in 67+), 2 finer (6/16). NGC ID# 23XC, PCGS# 5581

- 3773** 1883 PR65 PCGS. Briggs 1-A, Flynn-MPD-001. Two misplaced date digits lurk in the dentils below the second 8 in the date. This fully struck and flashy Gem displays rich brick-red, ocean-blue, and olive-green toning. Devoid of detractions, and an original and desirable specimen. NGC ID# 23XF, PCGS# 5584

1884 Quarter, PR68 Cameo  
Deeply Reflective, Heavily Frosted

- 3774** 1884 PR68 Cameo NGC. Briggs 2-B. Writing about the 1884 proof quarters in his *Encyclopedia of United States and Colonial Proof Coins*, Walter Breen says: "... the first strikes I have seen have mostly shown inferior surfaces (often peppered with tiny nicks), poor borders and shallow relief details compared with any proofs of the period."

This PR68 specimen digresses significantly from Breen's profile. Sharply impressed, heavily frosted design elements stand amid deeply mirrored fields, and crisply defined, denticled borders that completely encircle the faces of both sides. Whispers of cobalt-blue, purple, and golden-tan patination gravitate around the rims, being better defined and displaying deeper hues on the obverse. A few tiny planchet flakes in the fields do not distract in the least. Census: 2 in 68 Cameo, 2 finer (6/16).

Ex: *Philadelphia Signature* (Heritage, 8/2012), lot 5123. NGC ID# AEZK, PCGS# 85585

1888 Quarter, Rim-Toned PR66 Cameo

- 3775** 1888 PR66 Cameo PCGS. Briggs 2-B. Nicely reflective surfaces show well-mirrored silver centers contrasting against copper-gold and pale blue patina at the rims on both sides. The devices display lavish mint frost, creating abundant cameo contrast. Interestingly, Walter Breen's *Proof Encyclopedia* reports 800 proofs rather than the usually given 832 pieces, noting that the others are "possibly" assay pieces. Population: 8 in 66 Cameo, 1 finer (7/16). NGC ID# 23XL, PCGS# 85589

1889 Quarter, PR66 Cameo  
Exceptional White-on-Black Contrast

- 3776** 1889 PR66 Cameo NGC. Briggs 2-B. A spectacular Premium Gem, brilliant and boasting imposing contrast between fields and devices. The demand for 1889 quarters is heightened by their low business production, and few specimens could surpass the eye appeal of the present lot. Census: 9 in 66 Cameo, 7 finer (6/16). Ex: *St. Louis Central States Signature* (Heritage, 5/2003), lot 6159, which realized \$2,990. NGC ID# 23XM, PCGS# 85590

**1890 Quarter, PR66 Deep Cameo  
Marvelous Black-and-White Example**

**3777 1890 PR66 Deep Cameo PCGS.** The 1890 mintage of 590 proofs ranks among the lowest totals of the commercial proof era. Deep or Ultra Cameo specimens are rare, especially as well-preserved as this marvelous black-and-white Premium Gem. The fields are exceptionally deep and reflective, while the devices feature a dense overlay of frost, resulting in unsurpassed eye appeal on both sides. A few toning specks appear on the reverse. Population: 7 in 66 Deep Cameo, 6 finer (7/16). NGC ID# 23XN, PCGS# 95591

**1890 Seated Quarter, PR66 Deep Cameo  
Low-Mintage Proof Issue**

**3778 1890 PR66 Deep Cameo PCGS. CAC.** The 1890 quarter began the ascent from yearly low mintages that began in 1879. Still, it was a gradual ascent with only 80,000 business strikes coined in 1890 and a paltry 590 proofs. The proof mintage was actually the smallest since 1877. This is a beautiful coin. It is also a better date for type purposes, but a great piece if a collector could snag it at the right price, but that may be a doubtful proposition. The fields are deeply reflective with thick mint frost over the devices, the combination yielding the always-desirable cameo effect. The centers are generally untoned (or lightly so) with light golden-russet patina surrounding the margins. Population: 7 in 66 Deep Cameo, 6 finer (6/16). NGC ID# 23XN, PCGS# 95591

**BARBER QUARTERS**

**3779 1892 MS66 PCGS. CAC.** This is a radiant Premium Gem, an ideal Barber type coin. The strike is razor-sharp and the fields reveal a suggestion of prooflike mirroring when tilted beneath a light. Both sides are attractively toned in aquamarine and pale gold hues, with lavender and gray also present around the outer peripheries. PCGS lists 36 finer representatives (6/16). NGC ID# 23XT, PCGS# 5601

**1892-O Barber Quarter, MS66+  
Ideal Branch Mint Type Coin**

**3780 1892-O MS66+ PCGS. CAC.** Type One Reverse. The 1892-O Barber quarter represents the first year of the design making it a popular choice of mintmark type collectors. This high-end Premium Gem exhibits a sharper-than-average strike and virtually pristine lustrous surfaces under shades of lavender-gray and golden-brown toning. Population: 20 in 66 (4 in 66+), 4 finer (6/16). CAC Population: 8 in 66, 3 finer (6/16). NGC ID# 23XU, PCGS# 5602

**1893 Barber Quarter, MS66  
Only One Finer at PCGS**

**3781 1893 MS66 PCGS. CAC.** The 1893 Barber quarter is a rare issue at the MS66 grade level, and finer examples are virtually unobtainable. This spectacular Premium Gem exhibits razor-sharp definition on all design elements and the impeccably preserved, lustrous surfaces are blanketed in attractive shades of lavender-gray toning with hints of pale gold at the rims. Population: 14 in 66 (2 in 66+), 1 finer (6/16). NGC ID# 23XW, PCGS# 5604

**1893-O Barber Quarter, MS66  
Outstanding Branch Mint Type Coin**

**3782 1893-O MS66 PCGS.** The New Orleans Mint struck a large mintage of nearly 3.4 million Barber quarters in 1893, the second year of the design. Few survivors can match the quality and eye appeal of the present coin, however. This spectacular Premium Gem exhibits well-preserved lustrous surfaces, under attractive shades of greenish-gold and lavender-gray toning. The well-detailed design elements show just a trace of the usual softness on the eagle's claw. Population: 13 in 66, 4 finer (7/16). NGC ID# 23XX, PCGS# 5605

**1897-S Quarter, MS65  
Sharp Strike**

- 3783 1897-S MS65 PCGS.** The 1897-S Barber quarter is a difficult acquisition in any level of preservation and Mint State pieces present a very real challenge. Dazzling luster emanates from this lovely Gem specimen, and a solid strike leaves complete delineation on the design features. Nearly untoned surfaces show a wisp or two of light peripheral gold-tan color under magnification. The few grade-consistent marks take nothing from the coin's overall appeal. Population: 10 in 65, 7 finer (6/16).  
*Ex: FUN Signature (Heritage, 1/2009), lot 2472; FUN Signature (Heritage, 1/2010), lot 927. NGC ID# 23YC, PCGS# 5618*

**1898-S Barber Quarter, MS64+  
Sharply Struck and Richly Toned**

- 3784 1898-S MS64+ PCGS.** The 1898-S is a better date in the Barber quarter series, perhaps because many coins were exported for use in the Philippines. This Plus-graded Choice example is sharply detailed throughout. Some clash marks show in Liberty's ear, a feature we have noticed on some other high-grade specimens of this issue. The well-preserved surfaces are blanketed in iridescent shades of golden-brown, gray, and violet toning. Housed in a new 30th Anniversary green label holder. Population: 10 in 64 (1 in 64+), 10 finer (6/16). NGC ID# 23YF, PCGS# 5621

**1899-S Quarter, Toned MS67  
Rare in This Lofty Grade**

- 3785 1899-S MS67 PCGS.** This is only the second individual MS67 example of the 1899-S Barber quarter that we have ever offered, with the other one bringing just shy of \$10,000 in its last appearance in June 2015. This piece is boldly struck and displays frosty luster. Each side shows mottled lemon-gold, olive, and lavender-gray toning. Rarely seen this fine and almost uncollectible finer. Population: 4 in 67, 1 finer (6/16). NGC ID# 23YJ, PCGS# 5624

**1900-S Quarter, Fully Struck MS65**

- 3786 1900-S MS65 NGC.** Mottled pinkish-gold and powder-gray tints appear on each side of this fully struck S-mint Barber quarter, one of four in MS65 with five finer at NGC (4/12). Even under a loupe there is no mentionable sign of contact, and the problematic right shield corner on the reverse is complete.  
*Ex: Long Beach Signature (Heritage, 5-6/2012), lot 3670. NGC ID# 23YM, PCGS# 5627*

**1902-O Barber Quarter, MS65  
Soft Champagne Luster**

- 3787 1902-O MS65 PCGS. CAC.** The gold-tinged silver surfaces are typical for an original Gem Barber quarter, with frosty rather than satiny luster. The strike above Liberty's forehead and on the eagle's right (facing) claw and arrow feathers are also typical, or perhaps a bit better. The piece retains plenty of appeal. A couple of intersecting die cracks appear through the date and bust truncation, the result of die fatigue. Population: 11 in 65, 10 finer (6/16).  
*Ex: The Southwest Collection / Long Beach Signature (Heritage, 2/2008), lot 414. NGC ID# 23YT, PCGS# 5632*

- 3788 1903-O MS64 NGC.** The 1903-O is a better date in Uncirculated condition. This Choice Mint State example displays satiny luster with light golden toning around the borders. A few scattered abrasions preclude Gem classification. This piece is well-struck and offers pleasing eye appeal for the grade. Census: 9 in 64 (1 in 64+), 7 finer (6/16). NGC ID# 23YW, PCGS# 5635

- 3789 1903-O MS64+ PCGS. CAC.** This 1903-O Barber quarter is well-preserved, although a few stray marks prevent Gem classification. The eagle's talons and the fletchings are weak, but the eye appeal remains pleasing. Varying shades of gold toning are seen on each side. Population: 29 in 64 (1 in 64+), 20 finer. CAC: 3 in 64, 9 finer (6/16). NGC ID# 23YW, PCGS# 5635

**1903-O Barber Quarter, MS65  
Underrated Issue**

**3790 1903-O MS65 PCGS. CAC.** David Lawrence wrote that the 1903-O Barber quarter is an underrated date in the series, with an R.6 rating in MS64 and higher grades. The present coin is a sharply struck Gem, with dappled gray and green toning. Vibrant mint luster radiates through the toning. Population: 11 in 65, 5 finer (9/10).

Ex: *Stamford Coinfest Signature (Heritage, 10/2010)*, lot 3616. NGC ID# 23YW, PCGS# 5635

**3791 1903-S MS65 PCGS.** This impressive Gem exhibits sharply detailed design elements throughout, with well-preserved lustrous surfaces that show a few highlights of greenish-gold and lavender-gray toning. Population: 23 in 65 (1 in 65+), 18 finer (6/16). NGC ID# 23YX, PCGS# 5636

**1904-O Quarter, Frosty MS65  
Uncommonly Sharp**

**3792 1904-O MS65 PCGS. CAC.** The 1904-O Barber quarter is a slightly better date in Uncirculated condition, and Gems are particularly scarce. This CAC-approved example displays unusually sharp design elements and remarkably frosty mint luster. The preservation is outstanding, and traces of champagne toning appear over each side. Population: 12 in 65, 16 finer (6/16). NGC ID# 23YZ, PCGS# 5638

**3793 1908-D MS66 NGC.** The Denver facility produced 5.7 million quarters in its third year of operation. Examples are rarely encountered in MS66. Dramatic russet and slate-gray toning covers the obverse, and radiant mint brilliance illuminates the reverse. Several stars show strike softness, but the usually weak right shield corner is bold. Census: 4 in 66, 5 finer (7/16). NGC ID# 23ZD, PCGS# 5650

**1908-S Quarter, Lustrous MS65  
Seldom Seen This Fine**

**3794 1908-S MS65 PCGS.** The 1908-S is among the scarcer Barber quarter issues in Mint State. This Gem example displays excellent preservation and vibrant, luminous luster. The strike is well-executed, and some faint amber toning appears over the reverse and around the obverse borders. Population: 14 in 65 (1 in 65+), 9 finer (6/16). NGC ID# 23ZF, PCGS# 5652

**3795 1909 MS66 PCGS. CAC.** Mottled golden-russet toning around the peripheries is most prominent on the lower right obverse. The innermost areas are frosty and gray-brilliant, devoid of any marks worthy of individual mention. A well-struck Premium Gem of nearly unimprovable technical and visual quality. Population: 21 in 66 (2 in 66+), 3 finer (7/16). NGC ID# 23ZG, PCGS# 5653

**1913 Quarter, Lightly Toned MS66**

**3796 1913 MS66 PCGS.** Uncirculated 1913 quarters can be found with little trouble through the Gem grade level but become rare beyond MS65. This Premium Gem exhibits frosty original luster with dusky golden-gray toning. Lightly struck on the central eagle and the high points of Liberty's hair curls and wreath. A tiny pedigree mark appears on the neck. Population: 8 in 66, 2 finer (7/16). NGC ID# 23ZU, PCGS# 5664

**3797 1913-S Good 4 PCGS.** An originally toned, problem-free circulation cameo with tan-gray relief elements and gunmetal-gray fields. Wear is even, and the rims are complete. An eye-appealing example for the grade, accessible by casual collectors. NGC ID# 23ZW, PCGS# 5666

**3798 1913-S VG10 PCGS.** The 1913-S boasts the lowest mintage of the three major Barber quarter keys, at only 40,000 pieces. This collectible VG example displays excellent original tan-gray hues with the devices slightly lighter than the fields. The LIB(ER)TY are mostly visible. The surfaces are problem-free. NGC ID# 23ZW, PCGS# 5666

**3799 1914-S AU55 PCGS.** Light wear visits the high points of this impressive Choice AU example, with bright silver surfaces that retain nearly full luster. Wispy champagne toning adds to the eye appeal. Population: 14 in 55, 72 finer (6/16). NGC ID# 23ZZ, PCGS# 5669

**3800 1914-S AU58 PCGS.** At 264,000 pieces, the 1914-S quarter dollar has the same mintage as the famous 1916-D Mercury dime, though the 1914-S quarter is of course far more affordable. This still-lustrous near-Mint representative remains radiant with just a touch of blue in the otherwise pale silver fields. Population: 10 in 58, 62 finer (6/16). NGC ID# 23ZZ, PCGS# 5669

**1914-S Barber Quarter, MS66  
Low-Mintage Rarity in High Grade**

- 3801 1914-S MS66 PCGS.** Only 264,000 Barber quarters were struck at the San Francisco Mint in 1914 and the issue seems to have been overlooked by contemporary numismatists, as Mint State examples are quite elusive today. This impressive Premium Gem displays lustrous, well-preserved surfaces with a few highlights of greenish-gold toning. Sharply detailed on the obverse, the reverse shows just a touch of the usual softness on the eagle's claw and arrow fletchings. Population: 6 in 66, 1 finer (7/16). NGC ID# 23ZZ, PCGS# 5669

**1916-D Barber Quarter, MS67  
Superb Luster and Surfaces**

- 3802 1916-D MS67 PCGS.** Blazing mint brilliance rolls over completely untuned surfaces on this Superb Gem 1916-D quarter. The strike is sharp, and the fields are virtually flawless. This final-year issue is among the most plentiful type-coin dates in the series, but high-end pieces such as the present representative are seldom offered. Population: 16 in 67, 0 finer (6/16). NGC ID# 2426, PCGS# 5674

**PROOF BARBER QUARTERS**

- 3803 1892 PR64+ Cameo PCGS.** Type Two Reverse. Brilliant save for a hint of peripheral mauve patina. Well struck and flashy with exemplary surfaces. The first and highest mintage proof issue of the type. PCGS has graded 39 coins in PR64 Cameo, with this coin and one other example in PR64+ Cameo, and 49 finer (6/16). NGC ID# CEF4, PCGS# 85678
- 3804 1894 PR66 PCGS.** Variegated blue, violet, and gold toning visits the obverse and reverse surfaces of this Premium Gem. An exceptional example with bold design motifs and excellent eye appeal. PCGS has graded 18 examples in PR66, with a single example in PR66+, and 13 finer (6/16). NGC ID# 2429, PCGS# 5680

**1895 Quarter, Sharp PR67  
Picturesque Obverse Toning**

- 3805 1895 PR67 PCGS.** A razor-sharp Superb Gem 1895 proof with mirrored fields and incredible old-time toning. The picturesque obverse displays almost unimprovable color in concentric rings of sun-gold, mint-green, ocean-blue and lavender around a champagne interior. The reverse is more deeply toned in blended olive-green, lavender, and gold hues. Both sides show modest contrast, although the obverse is more prominent. There is a microscopic mark in the right obverse field that limits the grade. PCGS has graded 10 coins in PR67, with four more in PR67+, and four finer (6/16). NGC ID# 242A, PCGS# 5681

**1896 Quarter, PR67+★ Cameo  
Eye-Catching Contrast**

- 3806 1896 PR67+ ★ Cameo NGC.** The eye appeal of this high-end Superb Gem Cameo 1896 proof quarter is undeniable. The coin catches the viewer's eye even from a distance. Stark white-on-black contrast accentuates the crystal clear mirroring of the fields, while the strike is razor-sharp. The preservation is nearly flawless, and the coin appears mint-fresh. This issue is rarely seen to fine. Census: 25 in 67 Cameo (1 in 67+, 2 in 67+★), 10 finer (6/16). NGC ID# 59JB, PCGS# 85682

**1897 Quarter, Iridescent PR67  
Immeasurable Eye Appeal**

- 3807 1897 PR67 PCGS. CAC.** A beautifully original Superb Gem 1897 proof, boasting incredible eye appeal. Measurable field-device contrast is a hallmark of each side, accompanied by razor-sharp detail and immaculate preservation. Iridescent toning consists primarily of champagne-gray, olive, lavender, and steel-blue hues, with occasional amber and lilac accents. The eye appeal is remarkable. Population: 10 in 67, 2 finer. CAC: 5 in 67, 1 finer (7/16). NGC ID# 242C, PCGS# 5683

**3808 1897 PR66 Cameo NGC.** Dusky bluish-green patina mixes with areas of brilliance on each side, allowing for a strong degree of field-device contrast. Charles Barber's design is fully brought up, as expected of a proof strike. Census: 18 in 66 Cameo (1 in 66+), 21 finer (7/16). NGC ID# 242C, PCGS# 85683

**1898 Quarter, Toned PR68  
Conditionally Elusive**

**3809 1898 PR68 NGC.** Deep shades of sea-green, olive, and lemon-gold blanket each side of this high-end Superb Gem 1898 Barber quarter. The strike is full, and the preservation is excellent. The obverse shows modest cameo contrast, although the reverse is a little too deeply toned to deserve such a description. Census: 18 in 68, 1 finer (6/16). NGC ID# 242D, PCGS# 5684

**3810 1898 PR66 Cameo PCGS.** Well-made, high-grade Cameo representatives of this date are slightly more plentiful than those of many other issues in the series, making the 1898 an ideal candidate for type purposes. This incredible Premium Gem displays strong black-on-white contrast from all angles, with boldly struck design elements and nearly unblemished surfaces. A faint creamy-golden hue graces each side, adding to the excellent visual appeal. Population: 10 in 66 (1 in 66+) Cameo, 19 finer (7/16). NGC ID# 242D, PCGS# 85684

**3811 1901 PR64+ Cameo PCGS. CAC.** A gleaming, essentially brilliant Cameo proof with sharp design elements. A few stray lines in the right obverse field are all that preclude a full Gem grade, although the Plus designation/CAC green label combination is nothing to be ignored. Population: 13 in 64 (1 in 64+) Cameo, 33 finer. CAC: 4 in 64 Cameo, 25 finer (7/16). NGC ID# 242G, PCGS# 85687

**3812 1902 PR66 NGC.** The satin devices and fully mirrored fields of this Premium Gem are clearly visible beneath golden-violet and iridescent toning. Census: 37 in 66 (1 in 66+, 1 in 66+★), 24 finer (7/16). NGC ID# 242H, PCGS# 5688

**3813 1906 PR66 PCGS.** Medium intensity bluish-gray patination runs over both sides of this Premium Gem proof. The design elements are boldly struck throughout and each side is impeccably preserved. Population: 42 in 66 (3 in 66+), 31 finer (6/16). NGC ID# 242M, PCGS# 5692

**3814 1908 PR66 PCGS.** A mintage of 545 proofs is the fourth-lowest in the series, and examples are correspondingly rare in high grades. Violet and cobalt-blue patina around the edges melds with dusky, cream-gray centers. Beautifully preserved. NGC ID# 242P, PCGS# 5694

**3815 1908 PR66 PCGS.** This brilliant Premium Gem exhibits obvious white-on-black cameo contrast, but is undesignated as such due to its green label holder, which precedes the PCGS extension of Cameo to the Barber series. The strike is sharp except on the right (facing) claw. NGC ID# 242P, PCGS# 5694

**1914 Quarter, PR67  
Ex: Childs Collection**

**3816 1914 PR67 PCGS. Ex: Childs Collection.** The 1914 has the lowest proof mintage of the Barber quarter series. Just 380 proofs were issued. This precisely struck and undisturbed Superb Gem has brilliant centers and hints of tobacco brown toning near the rims. The Childs Collection is best known today for its decades-long possession of the finest 1804 dollar.  
*Ex: Walter H. Childs Collection (Bowers and Merena, 8/1999), lot 309. NGC ID# 242W, PCGS# 5700*

## STANDING LIBERTY QUARTERS

### Preliminary Quarter Sketch by Hermon MacNeil The Adopted Reverse Design Initialed by Mint Director Robert Woolley Plated in Taxay and Burdette

**3817 Preliminary Reverse Sketch for the Standing Liberty Quarter, PCGS Genuine.** Paper: 8.75x12.25 in. Sketch: 7.75 in. dia. Surviving models and sketches by Hermon MacNeil for the Standing Liberty quarter are rare, and few are as significant as the present drawing. This is the adopted reverse design in its earliest conceptual form. Originally, only MacNeil's obverse design was chosen for the quarter, with the reverse of that denomination and both sides of the dime and the half dollar being collectively awarded to fellow sculptor Adolph Weinman. However, on March 4th, 1916, following an informal review of the selected designs at the request of Mint Director Robert Woolley, the Commission of Fine Arts expressed concern that five of the six designs chosen were by a single artist:

"It seemed to us that this was likely to lead to a certain monotony in the three coins; a monotony which might be avoided if Mr. MacNeil were given an opportunity to make some further studies for the reverse of the 25 ct. piece (of which his design for the obverse had been selected.)"

Director Woolley accepted the Commission's suggestion and instructed MacNeil to prepare new models for the reverse of the quarter. According to correspondence analyzed by Roger Burdette in *Renaissance of American Coinage, 1916-1921*, Woolley visited MacNeil on March 25th and examined the revised sketches. Among them was the present drawing, which the director liked and approved to be progressed into a plaster model. His notation: "O.K. for model / Woolley," appears on the upper-left corner of the paper.

The design is virtually identical to the one that was ultimately adopted for coinage in December 1916. However, instead of stars, this early sketch shows olive branches flanking either side of the eagle in similar fashion to those seen on the patterns that were later struck in early June. In this drawing, the olive branches have an extra sprig extending into the field and there are no ribbons tied to the stems. The stops seen here on either side of UNITED STATES were also omitted on the later patterns.

This sketch is in remarkably good condition considering its age with no obvious evidence of fading or smudging. Light foxing appears around the edges of the paper and occasionally throughout the interior. Plated in Don Taxay's *The U.S. Mint and Coinage* (1966) and Roger Burdette's *Renaissance of American Coinage, 1916-1921* (2005).

Ex: Hermon MacNeil; John A Coughlin; Eric P. Newman (c. 1960); Eric P. Newman Money Museum.

From *The Eric P. Newman Numismatic Education Society*.

**Preliminary Quarter Sketch by Hermon MacNeil  
The Adopted Reverse Design  
On Translucent Parchment Paper**

**3818 Preliminary Reverse Sketch for the Standing Liberty Quarter, PCGS Genuine.** Paper: 9.5x11.5 in. Sketch: 7.5 in. dia. This sketch by Hermon MacNeil for the reverse of the Standing Liberty quarter shows an early representation of the adopted design — which was selected by Mint Director Robert Woolley in late March — but it was likely composed at a slightly later date. Woolley chose the flying eagle reverse from a fairly advanced sketch that he examined at MacNeil's studio on March 25th. The present drawing appears to be a hastily prepared tracing of that earlier sketch. An overlay of this one onto the original reveals an exact match for dimensions and layout, and a near-identical match of the design elements. The present drawing differs in that the extra sprigs on the olive branches have been omitted. It is possible that this tracing was intended to give a quick visual representation of the approved design without the extra sprigs on the olive branches - a modification that was carried over to the first patterns that were struck in early June.

The sketch shows no obvious fading or smudging, but the paper is less well preserved than that of other sketches in this sale. There is no obvious foxing, but several hard creases span the breadth of the paper across the drawing. The paper is irregularly cut, as is expected for a piece of tracing paper from this period.

Ex: Herman MacNeil; unknown intermediaries; Eric P. Newman.

Preliminary Quarter Sketch by Hermon MacNeil  
Proposed Reverse Design  
Plated in Taxay and Burdette

**3819 Preliminary Reverse Sketch for the Standing Liberty Quarter, PCGS Genuine.** Paper: 8.75x12.5 in. Sketch: 7.25 in. dia. Many of the artifacts known to survive from Hermon MacNeil's studio after the sculptor's death in 1947 owe their preservation to MacNeil's neighbor, John A. Coughlin, a professional illustrator. Coughlin salvaged many artistic works and scrapbooks from the studio contents before they could be discarded. Among these items were several original flying eagle sketches that MacNeil composed in March 1916, as proposed designs for the reverse of the new quarter dollar.

This representative, as well as the others in this sale, is making its first public auction appearance, having formerly been on exhibit in the Newman Money Museum. This sketch is the only one of MacNeil's reverse quarter designs from late March that is known to have incorporated stars. The majestic flying eagle parts E PLURIBUS UNUM in the middle, and the motto is bordered above and below by a total of 13 stars. Two of the stars and the upper-left corner of the first U in UNUM are partially covered by the eagle's wings, and the wingtip also partially overlaps the E in STATES. MacNeil clearly favored the three-dimensional appeal of overlapping design elements, as many of his original sketches show this characteristic. This preliminary sketch exhibits wingtip feathers protruding below the eagle's breast, suggesting that partway through the drawing MacNeil decided to reposition the eagle's far wing.

The drawing itself is well-preserved, although scattered foxing is seen on the paper and around the edges. Plated in Don Taxay's *The U.S. Mint and Coinage* (1966) and Roger Burdette's *Renaissance of American Coinage, 1916-1921* (2005).

Ex: Hermon MacNeil; John A Coughlin; Eric P. Newman (c. 1960); Eric P. Newman Money Museum.

From *The Eric P. Newman Numismatic Education Society*.

**Preliminary MacNeil Sketch for the Reverse  
of the Standing Liberty Quarter  
Plated in Taxay and Burdette**

**3820 Preliminary Reverse Sketch for the Standing Liberty Quarter, PCGS Genuine.** Paper: 7.5x10 in. Sketch: 5.5 in. dia. Famously displayed in the Eric P. Newman Money Museum, this original Hermon MacNeil sketch of a proposed reverse for the Standing Liberty quarter was salvaged from the sculptor's studio after his death in 1947 by John A. Coughlin, a neighbor and professional illustrator. Per research by Roger Burdette, who plated this and other quarter sketches from this sale in *Renaissance of American Coinage, 1916-1921* (2005), Coughlin was also the source of MacNeil scrapbooks and related documents that now reside in the Smithsonian Archives in Washington D.C. This sketch was also plated by Don Taxay in *The U.S. Mint and Coinage* (1966).

This drawing was among those presented to Mint Director Woolley in late March 1916, as a proposed revision of the reverse design for the quarter. It incorporates the olive branches used on the later patterns, but they are shorter here and lack the ribbon ties. E PLURIBUS UNUM is tucked in the field above the eagle's wings with the other legends around the border. Wingtip feathers protruding downward from the eagle's body suggest that MacNeil repositioned the far wing partway through the execution of the sketch. Although many elements are individually different, the overall similarity of this design's layout to the reverse of the Saint-Gaudens double eagle may have contributed to Woolley not choosing it for the quarter. After all, having MacNeil revise his quarter designs after the end of the competition was intended to assure a distinctive appearance for each denomination.

The paper shows minor yellowing and foxing, particularly around three of the edges. The top is clean-cut; this sketch and another in this offering were drawn on one large sheet of paper but were cut apart for the purpose of certification at PCGS.

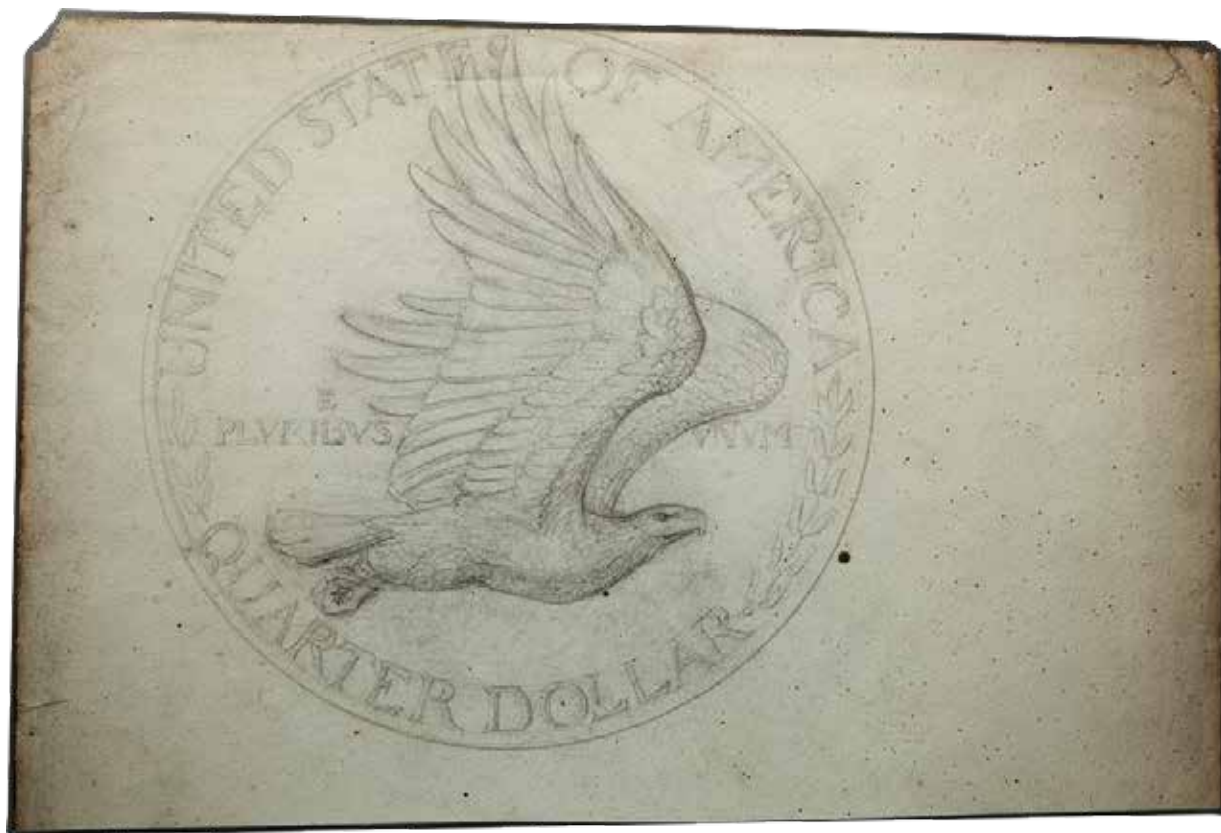

Ex: Hermon MacNeil; John A Coughlin; Eric P. Newman (c. 1960); Eric P. Newman Money Museum.

From *The Eric P. Newman Numismatic Education Society*.

---

**Preliminary Reverse Sketch  
for the Standing Liberty Quarter  
Plated in Taxay and Burdette**

**3821 Preliminary Reverse Sketch for the Standing Liberty Quarter, PCGS Genuine.** Paper: 6.5x10 in. Sketch: 6 in. dia. The original sketches, models, and patterns that were created throughout the design's development in 1916, rather than actual coin issues, are by far the rarest artifacts of the Standing Liberty quarter series. Most of the sketches that Hermon MacNeil submitted in the initial competition against Albin Polasek and Adolph Weinman are not known to have survived. The present sketch, as most others in this sale, was a proposed revision of the reverse design, composed by MacNeil in late March 1916, and presented to Director Woolley on the 25th of that month.

Aesthetically, this design is arguably superior to the spread-winged one Director Woolley ultimately chose for the reverse of the quarter. One wing of the eagle is extended, and E PLURIBUS UNUM stretches horizontally across the field on either side. Olive branches flank the eagle along the rims, and the wings partially overlap the ES in STATES and the first U in UNUM. Woolley's rejection of this design may have stemmed from the vertically positioned, centrally located eagle, which would have placed the high points of the reverse directly opposite the high points of Liberty's figure on the obverse - a design characteristic that was long known at the Mint to be impossible to strike up fully. Problems regarding the relief of MacNeil's models would later be among the complaints placed by Chief Engraver Charles Barber when die trials began.

This sketch was originally drawn on the same piece of paper as another in this sale but has since been separated for the purpose of individual certification. Light foxing is seen at the edges and faintly scattered over the interior. The upper-left corner of the paper is missing, and the upper-right corner is torn. Plated in Don Taxay's *The U.S. Mint and Coinage* (1966) and Roger Burdette's *Renaissance of American Coinage, 1916-1921* (2005).

Ex: Hermon MacNeil; John A Coughlin; Eric P. Newman (c. 1960); Eric P. Newman Money Museum.

1916 Standing Liberty Quarter, Fine Details  
Affordable Quality

- 3822** 1916 — Polished — PCGS Genuine. Fine Details. For the budget-minded collector who seeks an affordable example of the rare 1916 Standing Liberty quarter, this example will likely prove to be an ideal candidate. The date is complete and the design motifs are outlined, showing traces of the internal detail. While the surfaces are bright and glossy, both sides exhibit wisps of toning, light gold on the obverse and pale blue on the reverse. NGC ID# 43XR, PCGS# 5704

---

1916 Standing Liberty Quarter, Fine 15  
Clear Date, Outstanding Color

- 3823** 1916 Fine 15 PCGS. CAC. A problem-free collector-grade example of this first-year key date, showing battleship-gray surfaces that grow darker in the recesses to deliver a modest circulation cameo appearance. Fine details on Liberty's figure were likely worn away long before this coin reached the Fine grade level, but the date — the most important item of consideration on mid-to-low-grade 1916s — is clear. NGC ID# 43XR, PCGS# 5704 *From The Craig and Jeff Lehrer Collection.*

---

1916 Standing Liberty Quarter, VF25  
Solid Collector-Grade Example

- 3824** 1916 VF25 PCGS. The middle collector grades are always challenging for circulated 1916 Standing Liberty quarters, which tend to show inordinate wear in the important areas of the design such as the date and the central motifs. This VF25 example retains strong numerals and solid definition on Liberty and the eagle. Traces of mint luster persist to add a golden glow to the attractive silver surfaces. A glass reveals numerous small marks and pits that are microscopic in nature, but there are no major defects or distractions. Housed in a first-generation PCGS holder. NGC ID# 43XR, PCGS# 5704

---

1916 Standing Liberty Quarter  
XF Sharpness

- 3825** 1916 — Improperly Cleaned — NGC Details. XF. A well-detailed example of this debut Standing Liberty quarter rarity. The surfaces are bright and glossy with hints of gold toning around the borders. Liberty's forward thigh is worn flat on its crown. This 1916 was struck with a mildly rotated reverse in a clockwise orientation. NGC ID# 43XR, PCGS# 5704

---

1916 Standing Liberty Quarter, XF Details

- 3826** 1916 — Repaired, Cleaned — NGC Details. XF. This key-date Standing Liberty quarter is well-detailed with bright, glossy surfaces. Hints of light golden toning appear around the borders. A thorough cleaning of the surfaces partially subdues the visibility of minor tooling in the fields. From a famous low mintage of only 52,000 coins. NGC ID# 43XR, PCGS# 5704

---

1916 Standing Liberty Quarter, XF40  
Clear Date, Pleasing Surfaces

- 3827** 1916 XF40 NGC. Dusky battleship-gray toning appears on each side of this lightly circulated 1916 Standing Liberty quarter, giving the surfaces an old-time appeal. Hints of light golden color appear in the fields when tilted at certain angles. The date is clear, and the overall eye appeal is pleasing for the grade. The 1916 is seldom available in this grade, although heavily worn coins are common. NGC ID# 43XR, PCGS# 5704

### 1916 Standing Liberty Quarter, AU50 Details

- 3828** 1916 — Cleaned — ANACS. AU50 Details. This low-mintage date was released late in 1916 and ended up oftentimes mixed in with the newly released 1917 Type One pieces. Attrition from circulation had a much greater effect on the 1916. This example is still well-defined and the surfaces are bright (as expected) with scattered golden-rose toning across each side. NGC ID# 43XR, PCGS# 5704

### 1916 Quarter, AU Details Standing Liberty Key

- 3829** 1916 — Cleaning — PCGS Genuine. AU Details. This 1916 Standing Liberty quarter shows a bold strike and unusually well-defined head details, although a vigorous cleaning leaves the surfaces lightly hairlined and unnaturally bright. This is a suitable example of the first-year key for collectors seeking a sharply detailed coin but restricted to a budget. NGC ID# 43XR, PCGS# 5704

### 1916 Standing Liberty Quarter AU Details, Low-Mintage Key

- 3830** 1916 — Cleaning — PCGS Genuine. AU Details. The 1916 is the first and rarest regular issue of the Standing Liberty series. Only 52,000 pieces were struck, and lightly circulated examples are desirable. This slate-gray key date quarter has been dipped but offers coruscating luster and nearly unabraded surfaces. NGC ID# 43XR, PCGS# 5704
- 3831** 1917 Type One MS66 Full Head PCGS. This sharply detailed Type One Standing Liberty quarter shows full shield rivets and full definition on Liberty's head. The well-preserved lustrous surfaces radiate vibrant mint luster, with vivid shades of sea-green and amber toning. NGC ID# 242Z, PCGS# 5707

- 3832** 1917 Type One MS66 Full Head NGC. Vibrant luster and a sharp strike deliver strong eye appeal on this Premium Gem Type One Standing Liberty quarter. Liberty's head is a trifle below-average for sharpness but still qualifies for the Full Head designation at NGC. A few trivial ticks do not reduce the eye appeal. NGC ID# 242Z, PCGS# 5707

### 1917 Type One Quarter, MS67 Full Head Among the Finest Certified

- 3833** 1917 Type One MS67 Full Head PCGS. A sharp, frosty Superb Gem example of the favorite type-coin issue in the Standing Liberty quarter series. The surfaces are ivory-white with hints of champagne, olive, and russet toning around the borders. The 1917 Type One is a common date through MS66 but is infrequently seen in MS67. None are known numerically finer. PCGS has graded 81 coins in MS67 Full Head, with six more Plus-graded specimens, and none finer (6/16). NGC ID# 242Z, PCGS# 5707
- 3834** 1917-D Type One MS66 PCGS. This ivory Premium Gem exhibits frosty silver luster and dappled golden-brown toning that is most prominent on the reverse. Population: 26 in 66 (2 in 66+), 5 finer (7/16). NGC ID# 2432, PCGS# 5708
- 3835** 1917-D Type One MS65 Full Head PCGS. Golden-tan and gray patina gravitate to the margins of this lustrous D-mint Gem. The design elements are sharply struck, including the rivets and eagle's feathers, in addition to the Full Head. NGC ID# 2432, PCGS# 5709
- 3836** 1917-D Type One MS66 Full Head PCGS. The 1917-D is more elusive in Premium Gem Full Head than its Philadelphia counterpart. This example is sharp and well-preserved, showing luminous surfaces and mottled olive-gold and russet toning. An appealing coin for the collector seeking a bit of color. PCGS has seen 25 numerically finer Full Head coins (7/16). NGC ID# 2432, PCGS# 5709
- 3837** 1917-S Type One MS65 Full Head PCGS. In addition to the bold head details, the shield is completely defined, and all other design elements are boldly rendered. Both sides have considerable ivory luster with delicate gold and gray toning. A lovely Gem. NGC ID# 2433, PCGS# 5711
- 3838** 1917-S Type One MS65 Full Head NGC. This is a sharp Gem Full Head example of the S-mint Type One Standing Liberty quarter, showing satiny mint luster without bothersome abrasions. The coin exhibits primarily golden-russet toning, although a few wisps of powder-blue appear across the obverse, and the peripheries yield tiny bits of green and red. NGC ID# 2433, PCGS# 5711

**1917-S Standing Liberty Quarter, MS66 Full Head  
Popular Type One Issue**

- 3839 1917-S Type One MS66 Full Head PCGS.** Branch Mint type collectors prize this Standing Liberty quarter issue for its short-lived Type One design. This impressive Premium Gem exhibits sharply detailed design elements, with a full complement of shield rivets and Full Head definition. The well-preserved, lustrous surfaces are blanketed in shades of golden-brown and lavender-gray toning. PCGS has graded 15 numerically finer examples (7/16). NGC ID# 2433, PCGS# 5711

**1917-S Type One Quarter, MS67 Full Head  
Conditionally Rare**

- 3840 1917-S Type One MS67 Full Head PCGS.** The 1917-S is the most elusive Type One 1917 issue in high grade and is genuinely rare at the Superb Gem level. This Full Head example displays unabraded, frosty surfaces with a blush of lavender-gold toning. Moderate strike weakness is seen on the eagle, Liberty's waist, and the outer rim of the shield as it passes over the bust. Liberty's head and other peripheral elements are sharp. Among the finest certified. Population: 15 in 67 (2 in 67+) Full Head, 0 finer (6/16). NGC ID# 2433, PCGS# 5711

- 3841 1917 Type Two MS66 Full Head PCGS.** A bold head, shield, and date give this Premium Gem 1917 Type Two quarter impeccable eye appeal. Softly frosted luster rolls over each side beneath champagne toning, and the preservation is outstanding. Population: 88 in 66 (6 in 66+) Full Head, 14 finer (6/16). NGC ID# 2434, PCGS# 5715

- 3842 1917-D Type Two MS64 Full Head PCGS.** The 1917-D Type Two is notorious for having a flat head and poor internal strike. This Choice Full Head coin is above average in both regions. Each side shows golden-toned champagne luster with small amounts of deeper russet color tucked along the corners of the devices. NGC ID# 2435, PCGS# 5717

**1917-D Type Two Quarter, MS65 Full Head  
Finer Pieces Are Rare**

- 3843 1917-D Type Two MS65 Full Head PCGS.** The 1917-D Type Two is the first issue in the series (save for the 1916) that is significantly elusive in high grade Full Head. This Gem displays frosty original mint luster with dusky champagne toning. Liberty's head is sharp, although the shield rivets are not fully defined. A few trivial surface grazes are not out of line for the grade. Population: 69 in 65 Full Head, 28 finer (7/16). NGC ID# 2435, PCGS# 5717

- 3844 1917-S Type Two MS66+ PCGS. CAC.** A conditionally elusive high-end Premium Gem with luminous mint luster. The interiors display light champagne toning that cedes to more vivid gold and mint-green hues around the borders. Eye appeal is outstanding. Population: 31 in 66 (2 in 66+), 1 finer (7/16). NGC ID# 3TEN, PCGS# 5718

**1918 Quarter, MS66 Full Head  
Light Golden Toning**

- 3845 1918 MS66 Full Head PCGS.** A frosty, lustrous Premium Gem with warm golden toning. The strike is razor-sharp in most areas, even on the shield rivets, but lacks slightly along the lower obverse periphery left of the date. The 1918 is rarely seen in finer Full Head condition. Population: 51 in 66 (3 in 66+) Full Head, 14 finer (6/16). NGC ID# 2437, PCGS# 5721

**1918-D Walking Liberty Quarter, MS65  
Full Head Definition**

- 3846 1918-D MS65 Full Head PCGS.** Full Head definition is evident on this sharply detailed Gem, with just a touch of the usual softness on some of the shield rivets. The well-preserved surfaces radiate satiny mint luster, under delicate shades of champagne-gold and lavender toning. Population: 58 in 65 (3 in 65+) Full Head, 29 finer (6/16). NGC ID# 3TWU, PCGS# 5723

---

**1918-D Quarter, Frosty MS65 Full Head**

- 3847 1918-D MS65 Full Head PCGS.** Softly frosty mint luster appears on each side of this Gem Full Head 1918-D quarter. The reverse is nearly brilliant, while the obverse exhibits mottled olive-brown toning. Liberty's head just qualifies for the given designation from PCGS, while the shield rivets show the usual weakness. The date is sharp. Population: 59 in 65 (3 in 65+) Full Head, 29 finer (7/16). NGC ID# 3TWU, PCGS# 5723

---

**1918-D Quarter, MS65 Full Head  
Seldom Seen Finer**

- 3848 1918-D MS65 Full Head PCGS.** Liberty's head and the date are sharp on this Gem 1918-D Standing Liberty quarter, while the shield rivets and the leading edge of the eagle's left (facing) wing are typically soft. This piece shows satiny mint luster with an olive-gold reverse and lavender splashes on the obverse. Population: 59 in 65 (3 in 65+) Full Head, 29 finer (7/16). NGC ID# 3TWU, PCGS# 5723

- 3849 1918/7-S FS-101 — Reverse Damage — NGC Details. Fine.** This overdate example shows pleasing pewter-gray patina with a worn but readable date. Detail is adequate for the Fine grade level, although an old, toned-over scrape on the lower reverse below the eagle's breast precludes a numeric grade from NGC. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

- 3850 1918/7-S FS-101 — Cleaning — PCGS Genuine. VF Details.** This famous overdate is not only a cornerstone issue the Standing Liberty quarter series, it among the most widely sought-after and publicized varieties in 20th century American numismatics. Steel-gray surfaces are muted from an old cleaning, but the devices remain bold and the date is clear. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

- 3851 1918/7-S FS-101 — Improperly Cleaned — NGC Details. VF.** The overdate feature is clear on this thoroughly cleaned 1918/7-S quarter, which shows bright steel-gray surfaces. The coin is lightly worn, but much of the central design weakness is due to a deficient strike — a common issue with this popular *Guide Book* variety. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

---

**1918/7-S Quarter, AU Details  
Well-Detailed and Pleasing**

- 3852 1918/7-S FS-101 — Cleaned — ANACS. AU Details, Net XF45.** This is a boldly struck 1918/7-S quarter, showing a sharp date and good central detail. The surfaces are slightly glossy beneath lavender-gray and gold toning, suggesting an old cleaning. Eye appeal remains pleasing for the issue. A suitable coin for the budget-conscious collector assembling a nice AU-level collection. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726 *From The Craig and Jeff Lehrer Collection.*

- 3853 1919-D MS62 NGC.** A satiny Mint State example of this semikely Denver issue, showing unusually well-struck design elements for the issue. Liberty's head is a trifle weak at the temple, but the overall sharpness of the coin is far above average. Dusky golden-gray toning appears on each side. NGC ID# 243C, PCGS# 5730

- 3854 1919-D MS63 NGC.** For a non-Full Head 1919-D, this Select example is unusually sharp. Liberty's head is a trifle soft at the temple, but the strike is otherwise full throughout. Satiny luster displays light golden toning and pleasing eye appeal. NGC ID# 243C, PCGS# 5730

---

**1919-D Quarter, MS65  
Three-Quarters Full Head Detail**

- 3855 1919-D MS65 PCGS.** The 1919-D is one of the scarcest issues in this short-lived series in high grades and with full head definition. This particular piece shows approximately 75% of the head detail, making it a particularly good value for the collector of non-Full Head quarters. The mint luster is pronounced, as usual on coins from this series, and each side shows just a touch of light golden toning. NGC ID# 243C, PCGS# 5730

**1919-S Quarter, MS63 Full Head  
Uncommonly Well-Struck**

- 3856 1919-S MS63 Full Head PCGS.** Champagne toning warms satiny luster on this unusually well-struck Select 1919-S quarter. Liberty's head is well-defined, and the shield rivets are bold. Grade-limiting abrasions are minimal. The 1919-S is a scarce date in Full Head, regardless of numeric grade. Population: 33 in 63 Full Head, 49 finer (7/16). NGC ID# 243D, PCGS# 5733

**1920 Standing Quarter, MS67+  
Tied for the Finest Certified**

- 3857 1920 MS67+ PCGS.** An extraordinary Superb Gem, this Standing Liberty quarter has frosty and fully brilliant cents inside thick peripheral iridescent toning. Far finer than usual, the head details are virtually full, and the shield is nearly complete. Population: 23 in 67 (4 in 67+), 0 finer (7/16). NGC ID# 243E, PCGS# 5734

- 3858 1920-D MS65 PCGS.** The 1920-D is a better date in the finer Mint State grades. This Gem example displays satiny mint luster and uncommonly bold detail on the shield and eagle feathers. Liberty's head is nearly full, lacking only a complete hairline across the cheek. A blush of pale champagne toning graces each side. Population: 40 in 65 (1 in 65+), 37 finer (7/16). NGC ID# 243F, PCGS# 5736

**1920-S Quarter, MS66  
Frosted and Attractively Toned**

- 3859 1920-S MS66 PCGS. CAC.** Although more than 6.3 million pieces were struck of the 1920-S, it is a very scarce and underrated coin in the series. This example displays the usual thick mint frost seen on S-mint quarters and exhibits the typical soft strike. A toning streak extends upward from LAR of DOLLAR. Population: 17 in 66 (1 in 66+), 5 finer (7/16). NGC ID# 243G, PCGS# 5738

**1920-S Quarter, MS64 Full Head  
Pleasing for the Grade**

- 3860 1920-S MS64 Full Head NGC.** The 1920-S is a better date in the Standing Liberty quarter series, particularly in the Full Head grades. This near-Gem Full Head coin displays satiny luster and a hint of champagne toning. Slide marks over the high points of Liberty's figure define the grade. The shield rivets are weak, but the date is sharp. The head just qualifies for "full" at NGC. Census: 24 in 64 Full Head, 11 finer (6/16). NGC ID# 243G, PCGS# 5739

- 3861 1921 MS64 NGC.** The 1921 Standing Liberty quarter is a better date in the series, from a smallish mintage of 1.9 million pieces. This well-detailed Choice example offers vibrant mint luster and attractive shades of champagne-gold toning. NGC ID# 243H, PCGS# 5740

**1921 Quarter, Satiny MS66  
Seldom Seen in This Grade**

- 3862 1921 MS66 PCGS.** This Premium Gem 1921 Standing Liberty quarter is largely devoid of abrasions, giving the satiny lavender-gold surfaces pleasing eye appeal. The date and Liberty's head are slightly weak, as usual, but the shield is bold. This issue is scarce in such fine condition, and finer non-Full Head pieces are prohibitively rare. NGC ID# 243H, PCGS# 5740

- 3863 1921 MS61 Full Head ANACS.** Needle-sharp head and shield detail gives this lower-end Mint State 1921 quarter unusually strong appeal. The date numerals are also far sharper than usual. Satiny surfaces yield light golden toning. NGC ID# 243H, PCGS# 5741

- 3864 1923 MS67 PCGS. CAC.** The 1923 is one of the scarcer common dates in the series, especially in top grades. This highly lustrous Superb Gem has brilliant and untuned silver surfaces. The strike is bold with almost full head details, and a nearly complete shield on the obverse. Population: 83 in 67 (8 in 67+), 0 finer. CAC Green: 20 in 67, 0 finer (7/16). NGC ID# 243J, PCGS# 5742

- 3865 1923 MS64 Full Head ANACS.** This sharply struck 1923 quarter displays glistening rose-gold luster atop nickel-gray surfaces, with pleasing visual results. Faint slide marks over the high points of Liberty's figure preclude a full Gem grade. NGC ID# 243J, PCGS# 5743

- 3866 1923-S AU53 ANACS.** Olive gold toning on each side lightens toward the centers. This AU 1923-S Standing Liberty quarter displays pleasing detail with small hints of luster remaining in the protected regions of the fields. Housed in an old white, small size ANACS holder. NGC ID# 243K, PCGS# 5744

**1923-S Quarter, MS64**  
**Collector-Grade Example**

- 3867 1923-S MS64 PCGS.** A mostly untoned, near-Gem example of this key San Francisco issue, showing a well-executed strike and minimal abrasions — only a few ticks on the sash pulled across Liberty's chest are worthy of mention. Struck from flowlined dies but without significant hindrance to detail. NGC ID# 243K, PCGS# 5744

**1924-S Standing Liberty Quarter, MS66**  
**Brilliant Surfaces and Vibrant Mint Luster**

- 3868 1924-S MS66 PCGS. CAC.** This spectacular Premium Gem exhibits a better-than-average strike that falls just short of Full Head definition and shows a touch of the usual softness on a few shield rivets. The brilliant surfaces are impeccably preserved and radiate blazing mint luster from both sides. Eye appeal is extraordinary. Population: 43 in 66 (3 in 66+), 7 finer. CAC: 11 in 66, 3 finer (7/16). NGC ID# 243N, PCGS# 5750

**1927 Standing Liberty Quarter, MS67+**  
**Condition Rarity**

- 3869 1927 MS67+ PCGS. CAC.** The 1927 Standing Liberty quarter is heralded as an available date in Full Head, but the rarity of high-end non-Full Head pieces is curiously overlooked, leaving room for the astute specialist to acquire a rare piece at an affordable level. This Superb Gem is delightfully well-preserved with iridescent champagne luster. Liberty's temple is not fully defined, but the design sharpness is otherwise proportionate to the issue's reputation as a well-struck date. Population: 4 in 67 (2 in 67+), 0 finer (7/16). NGC ID# 243U, PCGS# 5760

**1927-S Quarter, MS62**  
**Excellent Value for the Collector**

- 3870 1927-S MS62 PCGS.** The 1927-S has long been recognized as a key to the Standing Liberty quarter series. Only 396,000 pieces were struck and few were saved in mint condition. This example shows softness in the centers, but the head of Liberty is curiously well-defined with nearly complete detailing. The brilliance seen over each side is only interrupted by occasional speckling on the reverse. NGC ID# 243W, PCGS# 5764

**1927-S Quarter, Satiny MS63**  
**Scarce Mint State Example**

- 3871 1927-S MS63 PCGS Secure. CAC.** An elusive Select Mint State example of this key San Francisco issue, showing satiny mint luster with slide marks on the high points of the devices that limit the grade. A light touch of champagne toning graces each side. Liberty's head and the inner shield rivets exhibit the typical softness of the 1927-S. Eye appeal is pleasing for the grade and issue. NGC ID# 243W, PCGS# 5764

**1928 Quarter, MS67 Full Head**  
**Conditionally Rare Philadelphia Issue**

- 3872 1928 MS67 Full Head NGC.** Faint streaks of honey color overlay the pastel rose and sky-blue surfaces of this highly lustrous Superb Gem. The strike is precise aside from the usual pair of shield rivets near the waist. A splendidly preserved representative of this conditionally elusive issue. Census: 11 in 67 (2 in 67 ★) Full Head, 2 finer (6/16).  
*Ex: Central States Signature (Heritage, 5/2004), lot 7143; Summer FUN Signature (Heritage, 7/2007), lot 805; FUN Signature (Heritage, 1/2009), lot 2703. NGC ID# 243X, PCGS# 5767*

**1928-D Quarter, MS67  
Thick Mint Luster**

- 3873 1928-D MS67 PCGS. CAC.** The 1928-D has an appealing low mintage of 1.6 million coins, but is surprisingly available in mint condition. That statement must be tempered, however, by the profound lack of Superb Gem examples such as this piece. The mint luster is thick and creamy and virtually unaffected by post-striking impairments. The head detail is approximately 75% complete, making this an excellent type choice. Population: 5 in 67, 0 finer (7/16). NGC ID# 243Y, PCGS# 5768

**1928-D Quarter, MS64 Full Head  
Well-Struck and Satiny**

- 3874 1928-D MS64 Full Head PCGS.** Although shield rivets lack complete definition, this Choice 1928-D Standing Liberty quarter shows bold head detail and a sharp eagle. Satiny luster yields light golden toning. A few trivial ticks define the grade. The 1928-D is scarce in high grade Full Head, although this near-Gem example remains within the grasp of the average collector. Population: 45 in 64 Full Head, 50 finer (6/16). NGC ID# 243Y, PCGS# 5769

**1928-D Quarter, MS65 Full Head  
Rarely Seen Sharp**

- 3875 1928-D MS65 Full Head NGC.** This lovely Gem exhibits frosty white luster with pristine surfaces that are fully brilliant and untoned. The head details are bold as expected, and the shield is sharp, showing only two weak rivets. The eagle detail on the reverse is similarly bold. An exceptional piece for the advanced collector. Census: 23 in 65 (1 in 65+) Full Head, 12 finer (7/16). NGC ID# 243Y, PCGS# 5769

- 3876 1928-S MS66 Full Head PCGS.** Although this issue is frequently seen with full head details, Premium Gem and finer examples are still elusive. This piece has frosty mint luster with fully brilliant and untuned silver surfaces. PCGS has only graded 22 numerically finer examples (7/16). NGC ID# 243Z, PCGS# 5771

**1928-S Quarter, MS67 Full Head  
Among the Finest at PCGS**

- 3877 1928-S MS67 Full Head PCGS.** The 1928-S is usually available in Full Head, but such pieces are scarce at the Superb Gem level. The present coin displays a sharp head and stars but with typical weakness on the shield rivets. Each side is frost-white and unabraded with excellent luster. Population: 22 in 67 (2 in 67+) Full Head, 0 finer (7/16). NGC ID# 243Z, PCGS# 5771

- 3878 1929-S MS66 Full Head NGC.** Beautiful pastel iridescence is intermixed with original brilliance on each side of this softly frosted, high grade S-mint quarter. Although Liberty's head is sharp, the central portion of each side is weakly defined. NGC lists 36 finer Full Head representatives (6/16).  
Ex: Long Beach Signature (Heritage, 9/2004), lot 6468. NGC ID# 2444, PCGS# 5777

**WASHINGTON QUARTERS**

- 3879 1932-D MS64 PCGS.** Well-struck and satiny with light golden toning, this Choice 1932-D Washington quarter shows a few trivial ticks that preclude a Gem designation. Eye appeal is pleasing for the grade. NGC ID# 2448, PCGS# 5791

**1932-D Washington Quarter, MS65  
Key First-Year Issue**

- 3880 1932-D MS65 PCGS.** A delightful Gem specimen of this low-mintage, first-year issue, with sharply detailed design elements and satiny mint luster, under medium-intensity shades of golden-tan and lavender-gray toning. The 1932-D is the acknowledged key to the Washington quarter series and examples in high grade are especially elusive. Population: 83 in 65 (3 in 65+), 2 finer (7/16). NGC ID# 2448, PCGS# 5791

- 3881 1932-S MS65 NGC.** While not quite as scarce in Gem grades as its Denver-issued counterpart, the 1932-S quarter is nonetheless elusive in MS65, and rare any finer. This example boasts vibrant, satiny mint bloom over each side, with small russet accents seen around the borders. The strike is sharp and the surfaces fail to reveal any noticeable flaws under close examination. NGC has graded 72 coins in MS65, one other Gem with the ★ designation, and six finer (6/16). NGC ID# 2449, PCGS# 5792

- 3882 1934 Medium Motto, FS-402, MS67+ PCGS. CAC.** Dappled golden-brown, jade-green, and fire-red toning invigorates a majority of this lustrous and splendidly preserved Superb Gem. The strike is precise and the eye appeal is undeniable. Population: 14 in 67+, 2 finer (6/16). PCGS# 146002 Base PCGS# 5793

**3883 1934 Medium Motto, FS-402, MS67+ PCGS. CAC.** Blushes of powder-blue and champagne-gold delicately drape each side of this Superb Gem Washington quarter. Abundant mint brilliance remains with frosty luster that illuminates sharply defined and impeccably preserved surfaces. Just two finer coins at PCGS. CAC: 28 in 67, 1 finer (7/16). PCGS# 146002 Base PCGS# 5793

**1935 Washington Quarter, MS68  
The Finest at NGC**

**3884 1935 MS68 NGC.** NGC and PCGS have each certified a single MS68 example of the 1935 Washington quarter (6/16). This NGC Superb Gem exhibits brilliant silver luster with intense mint frost. Both sides are bright white with a splash of gold toning. The strike is bold and the surfaces are pristine. An extraordinary example for the connoisseur. NGC ID# 244D, PCGS# 5797

**1935-S Quarter, MS67+  
Condition Census Registry Coin**

**3885 1935-S MS67+ PCGS. CAC.** This Plus-graded Superb Gem 1935-S Washington quarter, bearing a green CAC label, is at the top of the Condition Census ladder for Registry collectors. The strike is sharp, and the softly frosted surfaces yield unabraded, glowing mint luster. Wisps of pale champagne color appear on each side. Population: 75 in 67 (2 in 67+), 0 finer. CAC: 15 in 67, 0 finer (6/16). NGC ID# 244F, PCGS# 5799

**1936-D Quarter, Lightly Toned MS67  
Registry-Grade Condition Rarity**

**3886 1936-D MS67 PCGS.** A slightly better date in high grade, the 1936-D Washington quarter is genuinely rare at the Superb Gem level. This MS67 coin is among the finest certified. The strike is bold, and the softly frosted surfaces display traces of light golden toning. Population: 21 in 67 (1 in 67+), 0 finer (7/16). NGC ID# 244H, PCGS# 5801

**3887 1936-S MS67 PCGS.** Russet border toning accents frosty champagne interiors on this Superb Gem 1936-S Washington quarter. The strike is sharp, and the eye appeal is outstanding. Among the finest certified and scarce as such. Population: 53 in 67 (3 in 67+), 0 finer (6/16). NGC ID# 244J, PCGS# 5802

**3888 1937-S MS67 PCGS. CAC.** Traces of greenish-gold toning, with a few specks of amber, enhance the impeccably preserved surfaces of this attractive Superb Gem. Vibrant mint luster and sharply detailed design elements add to the outstanding visual appeal. Population: 42 in 67 (3 in 67+), 0 finer (6/16). NGC ID# 244M, PCGS# 5805

**3889 1938 MS67+ PCGS. CAC.** This Plus-graded Superb Gem exhibits sharply detailed design elements throughout, with impeccably preserved lustrous surfaces. Shades of light golden-tan toning, with slivers of magenta and sea-green at the peripheries, add to the outstanding visual appeal. Population: 66 in 67 (8 in 67+), 0 finer. CAC: 24 in 67, 0 finer (6/16). NGC ID# 244N, PCGS# 5806

**1938-S Quarter, MS67+  
Among the Finest Half-Dozen at PCGS**

**3890 1938-S MS67+ PCGS.** The mintage of 2.8 million pieces is low for a Washington quarter, making the 1938-S a better date in the series. Registry Set enthusiasts will note the PCGS Plus designation, which separates this coin from other Superb Gem examples and adds an important notch to its ranking among the finest pieces at that service. Speckled tan-gold patina yields to light wheat-gold hues buoyed by soft mint luster over sharply struck, pristine surfaces. Population: 6 in 67+, 0 finer (6/16). NGC ID# 244P, PCGS# 5807

**1939-S Quarter, MS67+  
Tied for Finest Known**

**3891 1939-S MS67+ PCGS. CAC.** This Plus-graded, CAC-endorsed 1939-S quarter displays glimmering satin luster that is virtually perfect with regards to preservation. Traces of champagne toning appear over each side, and the strike is sharp. This is as fine as the 1939-S is known to exist. Population: 83 in 67 (5 in 67+), 0 finer. CAC: 32 in 67, 0 finer (6/16). NGC ID# 244T, PCGS# 5810

**1940-D Washington Quarter, MS67+  
Lower-Mintage Denver Issue**

- 3892 1940-D MS67+ PCGS. CAC.** Quarter production was markedly smaller at the Denver Mint in 1940 than it was in Philadelphia or San Francisco. This high-end Superb Gem is sharply detailed throughout, with vibrant mint luster and subtle hints of greenish-gold toning. Housed in a new 30th Anniversary green label holder. Population: 51 in 67 (3 in 67+), 0 finer. CAC: 22 in 67, 0 finer (6/16). NGC ID# 244V, PCGS# 5812

**1941-S Quarter, MS67+**

- 3893 1941-S MS67+ PCGS. CAC.** Small S. Attractive orange-gold, ruby-red, and sea-green bands grace the obverse border. The reverse is comparatively brilliant. Lustrous and nicely struck with exceptional preservation. Among the finest certified examples of this World War II issue. Population: 83 in 67 (8 in 67+), 0 finer (7/16). CAC Population: 37 in 67, 0 finer. NGC ID# 244Z, PCGS# 5816

- 3894 1942-D MS68 NGC.** The immaculate surfaces of this magnificent Washington quarter are visited by vivid shades of sea-green and magenta toning. The design elements are sharply detailed throughout and especially vibrant mint luster adds to the incredible eye appeal. Census: 3 in 68 (1 in 68★), 0 finer (6/16). NGC ID# 2453, PCGS# 5818

- 3895 1943 MS67+ PCGS.** 30th Anniversary Green Label Holder. A dash of rainbow toning is imbedded in an olive-gold crescent along the upper-left obverse border, although the remainder of the coin is frost-white. This Superb Gem 1943 quarter is sharp and beautifully preserved. Only two finer coins are reported by PCGS (6/16). NGC ID# 2455, PCGS# 5820

- 3896 1943-D MS67+ PCGS. CAC.** This impeccably preserved Plus-graded Superb Gem shows vivid shades of sea-green, lavender-gray, and magenta toning, with vibrant mint luster and sharply detailed design elements underneath. Population: 80 in 67 (13 in 67+), 1 finer (6/16). NGC ID# 2456, PCGS# 5821

**1943-S Quarter, MS67+  
One Example Numerically Finer at PCGS**

- 3897 1943-S MS67+ PCGS. CAC.** Only a handful of this readily-available San Francisco date achieve the high-end Superb Gem level. Ice-blue surfaces are exquisite, faintly iridescent, and display a few patches of russet-gold toning, while the strike is pinpoint sharp. Satin mint luster flows across the near-flawless surfaces. CAC-endorsed, making this Plus piece with the green bean a serious Registry Set contender. Population: 5 in 67+, 1 finer. CAC: 24 in 67, 0 finer (6/16). NGC ID# 2457, PCGS# 5822

**1945 Washington Quarter, MS67+  
High-Quality, Rim-Toned Example**

- 3898 1945 MS67+ PCGS. CAC.** Quarter production dropped dramatically at the Philadelphia Mint in 1945. This magnificent Plus-graded Superb Gem displays a few hints of sea-green and magenta toning at the peripheries, with lustrous brilliant centers and sharply detailed design elements throughout. Housed in a new 30th Anniversary green label holder. Population: 44 in 67 (4 in 67+), 2 finer. CAC: 19 in 67, 0 finer (6/16). NGC ID# 245B, PCGS# 5827 Base PCGS# 5787

**1945-D Quarter, MS67+  
Top-of-the-Line at PCGS**

- 3899 1945-D MS67+ PCGS. CAC.** This CAC-approved, Plus-graded Superb Gem is as fine as the 1945-D quarter comes in a PCGS holder. The strike is sharp, and the beautifully preserved surfaces display delicate champagne luster that cedes to lime-green and gold around the obverse periphery. Population: 45 in 67 (5 in 67+), 0 finer. CAC: 21 in 67, 0 finer (6/16). NGC ID# 245C, PCGS# 5828

- 3900 1946 MS67 PCGS. CAC.** 30th Anniversary Green Label Holder. The right borders exhibit dramatic apple-green, ruby-red, and peach-gold patina. The obverse is especially colorful. Lustrous and practically immaculate. NGC ID# 245E, PCGS# 5830

**1946 Washington Quarter, MS67+  
None Certified Finer at PCGS**

- 3901 1946 MS67+ PCGS. CAC.** Attractive highlights of greenish-gold and magenta toning enhance the virtually pristine surfaces of this Plus-graded Superb Gem, with sharply detailed design elements and vibrant mint luster underneath. Few coins can match this combination of high technical quality and outstanding eye appeal, and none exceed it. Population: 41 in 67 (6 in 67+), 0 finer. CAC: 12 in 67, 0 finer (6/16). NGC ID# 245E, PCGS# 5830

**1949-D Quarter, MS68  
Intense Red and Green Toning**

- 3902 1949-D MS68 NGC.** Fully patinated in vibrant cherry-red and olive-green shades. The strike is precise, and surfaces imperfections are confined to wispy grazes on the right obverse field. A numerically unsurpassable candidate for the competitive Registry holding. Census: 5 in 68 (2 in 68★), 0 finer (7/16). NGC ID# 245R, PCGS# 5840
- 3903 1950-D MS67+ NGC.** An absolutely stunning Superb Gem, this 1950-D Washington quarter exhibits brilliant silver luster with untuned and frosty obverse and reverse surfaces. NGC has graded six in MS67+, seven in MS67★, and only one finer example (7/16). NGC ID# 245T, PCGS# 5842
- 3904 1950-D MS67+ PCGS. CAC.** This is one of the finest survivors from a mintage of 21 million D-mint quarters in 1950. Satiny surfaces are mostly brilliant with mottled peripheral toning in shades of crimson and russet. Impeccable preservation is the hallmark of this Registry-quality Superb Gem. Population: 74 in 67 (4 in 67+), 0 finer (6/16). NGC ID# 245T, PCGS# 5842

**1950-D/S FS-601 Quarter, MS66  
Scarce Overmintmark Variety**

- 3905 1950-D/S FS-601 MS66 PCGS.** The *Cherrypicker's Guide* reports that "the upper left curve of the underlying S is evident west and north of the D." Additionally, the Denver mintmark is strike-doubled due east. An 1950-S/D variety is also known, presumably the handiwork of the same inexperienced mint worker. This thoroughly lustrous and lightly toned Premium Gem is smooth aside from wispy grazes on the right obverse field. NGC ID# 245T, PCGS# 145638 Base PCGS# 5843
- 3906 1950-S/D MS66+ NGC.** The S mintmark is punched on top of the D mintmark, while the opposite also occurs on quarters identified as 1950-D/S. This lovely Premium Gem has a crescent of delicate gold toning on the obverse, with frosty white luster on both sides. Census: 15 in 66 (2 in 66+, 2 in 66★), 7 finer (7/16). NGC ID# 245V, PCGS# 5845
- 3907 1952 MS67+ NGC.** An impressive Superb Gem, this 1952 Washington quarter has brilliant and frosty silver luster with gorgeous peripheral gold and blue toning. NGC has certified one in MS67+, nine in MS67★, and four finer (7/16). NGC ID# 245Z, PCGS# 5849
- 3908 1954-S MS67+ PCGS. CAC.** The PCGS plate coin. Dappled hues of crimson, orange, forest-green, and blue appear over the obverse. The reverse is largely brilliant with mottled patina near the upper border and a faint tinge of powder-blue color throughout. Finer examples are nearly impossible to obtain, with just one MS68 submission at PCGS (7/16). NGC ID# 22FU, PCGS# 5857
- 3909 1957-D MS67+ PCGS. CAC.** The terrific eye appeal of this high-end Superb Gem is enhanced by vivid shades of sea-green and magenta toning, with vibrant mint luster and sharply detailed design elements throughout. PCGS has certified no coins in higher numeric grades (6/16). NGC ID# 246E, PCGS# 5863
- 3910 1959-D MS67 PCGS.** A top-graded MS67 example of this popular issue, with sharply detailed design elements, impeccably preserved surfaces, and vibrant mint luster throughout. Eye appeal is outstanding. Population: 15 in 67, 0 finer (6/16). NGC ID# 246J, PCGS# 5867

1964-D Washington Quarter, MS67+  
None Certified Finer

- 3911 1964-D MS67+ PCGS. CAC. A Plus-graded Superb Gem Washington quarter from the last year of the 90% silver composition, this coin exhibits lustrous, brilliant centers that yield to vivid shades of sea-green and magenta at the borders. The design elements are sharply detailed and overall eye appeal is tremendous. Population: 66 in 67 (9 in 67+), 0 finer. CAC: 27 in 67, 0 finer (6/16). NGC ID# 246V, PCGS# 5877

SMS WASHINGTON QUARTERS

1967 SMS Quarter, SP69 Cameo  
Tied for Finest

- 3912 1967 SMS SP69 Cameo PCGS. Tied with one other as the finest Cameo at PCGS (7/16), this virtually flawless Special Mint Set 1967 quarter displays spectacular preservation, mirroring, and contrast. A faint blush of light golden toning appears over each side. Eye appeal is remarkable. No Deep Cameos are finer than PR68 at this grading service (7/16). NGC ID# 2494, PCGS# 85999

1967 SMS Quarter, SP68 Deep Cameo  
Tied for Finest Certified

- 3913 1967 SMS SP68 Deep Cameo PCGS. Deep Cameo examples of the 1967 Special Mint Set quarter are scarce, and this high-end Superb Gem is tied with two others as the finest at PCGS (7/16). This magnificent Registry coin displays a full strike and gleaming fields. The devices are frosty and untoned. Eye appeal is outstanding. NGC ID# 4C6S, PCGS# 95999

PROOF WASHINGTON QUARTERS

- 3914 1936 PR66 PCGS. CAC. Proof coinage resumed in 1936, with the Mint striking 3,837 Washington quarter specimens. Dusky olive gold toning mixes with shades of crimson and blue over each side. A loupe reveals two minute flecks on the upper cheek. PCGS has seen 11 finer examples (6/16). NGC ID# 27HN, PCGS# 5975
- 3915 1942 PR67+ PCGS. CAC. The colorful toning that envelops this Superb Gem proof captures and holds the attention of the viewer. Shades include blue, green, gold, violet, and rose. Magnification fails to reveal any consequential contact marks. An exceptional example, technically surpassed by just 11 submissions at PCGS (7/16). NGC ID# 27HV, PCGS# 5981

1950 Quarter, PR68 Cameo  
None Finer at PCGS

- 3916 1950 PR68 Cameo PCGS. This virtually flawless 1950 proof quarter ranks among the finest Cameos certified. The strike is bold, and the toned surfaces yield extravagant field-device contrast. With the prohibitive rarity of PCGS-graded Deep Cameos, this piece is ideal for the Registry Set enthusiast. Population: 8 in 68 Cameo, 0 finer (7/16). NGC ID# 27VA, PCGS# 85982

1953 Quarter, PR68 Deep Cameo  
Doubled Die Obverse

- 3917 1953 Doubled Die Obverse, FS-101, PR68 Deep Cameo PCGS. Prominent die doubling is seen on the date, motto, and designer's initials on this *Cherry-pickers'* variety. As a 1953 proof, this Superb Gem Deep Cameo is starkly contrast and fully struck, showing frost-white motifs and mirrored fields. This is the only Deep Cameo FS-101 example attributed by PCGS (7/16). PCGS# 144448 Base PCGS# 95985
- 3918 1954 PR68 Deep Cameo PCGS. This stunning Superb Gem features brilliant white-silver surfaces with faint bluish tendencies. The devices are exquisite with frosty luster and the fields are fully and deeply mirrored. Population: 23 in 68 (1 in 68+) Deep Cameo, 0 finer (6/16). NGC ID# 27HY, PCGS# 95986
- 3919 1955 PR68+ Deep Cameo PCGS. A splendid Superb Gem Deep Cameo proof, this Washington quarter exhibits extraordinary field-to-device contrast with frosty and fully brilliant devices over deeply mirrored fields, presenting an excellent black-and-white appearance. Population: 26 in 68 (2 in 68+) Deep Cameo, 0 finer (7/16). NGC ID# 27HZ, PCGS# 95987

End of Session One

## COLONIALS

**(1615-16) Sommer Islands Sixpence, AU50  
W-11440, Small Portholes  
Sole-Finest Certified of the Variety**

**3920 Sommer Islands Sixpence, Small Portholes, W-11440, British Monetary Authority Type II, High R.6. AU50 NGC.** Known as the Bermuda Islands today, the Sommer Islands were uninhabited until discovered and eventually settled by means of a series of shipwrecks. The first recorded visit to the islands occurred in 1505 by Spanish explorer Juan Bermudez, who again sailed to the islands in 1532 and shipwrecked there.

Englishmen Henry May and Capt. Lancaster were shipwrecked on the islands in 1591, followed by a party of 500 English settlers led by Sir George Somers, Thomas Gates, and Capt. Christopher Newport, who in 1609 were blown off-course from a trip to Virginia by a hurricane and stranded there for more than a year. They were sustained, in part, by wild hogs originally brought to the islands by the Spanish explorers years earlier.

Sir George Somers would return to the islands again in 1610 with more settlers, where he soon died and the area was renamed in his honor. Sommer Islands coinage (as spelled on the 'Hogge Money') was introduced to the local island economy in about 1616 under the somewhat despotic authority of Daniel Tucker (Tucker), who served under the auspices of the Bermuda Company.

Brass pieces were introduced in denominations of twopence, threepence, sixpence, and shilling, with the numerals II, III, VI, and XII representing the values. Thin brass planchets were struck, then silvered, and used on the islands for their exchange value, but without any real intrinsic worth. Tobacco continued to be the main medium of exchange for larger monetary transactions.

This exceptional example of the Sommer Islands sixpence retains some of its original silver wash and much of the design motifs. It is the rare Small Portholes variant, with substantial detail remaining on the sailing ship motif on the reverse. Three of the four portholes are visible. The obverse "hogge" is sharply visible, as are the SOMMER ISLANDS legend and denomination. The never cleaned surfaces exhibit beautiful red and green oxidized patina that attest to this coin's originality.

Apparently unknown any finer, this About Uncirculated example exceeds all other Small Porthole sixpence coins reported by NGC, where the next finest is a VF example. A single XF40 coin is listed at PCGS of the Small Porthole type (6/16). Listed on page 38 of the 2017 *Guide Book*. NGC ID# AUBE, PCGS# 4

### 1662 Noe-31 Oak Tree Twopence, MS65 Plated in Noe, Salmon, Wurtzbach Likely Finest Known

**3921 1662 Oak Tree Twopence, Small 2, MS65 PCGS Secure. CAC. Noe-31, W-240, Salmon 1-A, High R.6.** Ex: Ford. 12.0 gn per its Ford appearance. This remarkable specimen is plated in the Noe, Wurtzbach, and Salmon references and is likely the finest known Noe-31. A beautifully patinated Gem that boasts apple-green centers and golden-brown borders. No abrasions are apparent, and the reverse centering is ideal. The obverse (tree side) is misaligned several degrees toward 7 o'clock, although the legends are complete. Both sides are moderately wavy, as produced by a rocker press.

All Oak Tree twopence were struck from the same pair of dies, which endured a series of recuttings and cracks. In 1947, American Numismatic Society curator Sydney P. Noe wrote the standard text on the series for many years. He identified five varieties (Noe-29 through Noe-34). In subsequent years, additional intermediate varieties were described, such as the Noe-31.5, Noe-32.1, and Noe-33.5 varieties that appeared in the January 2002 Hain Family Stack's auction.

In recent years, though, there has been a consolidation of the series. The 2009 Whitman Colonial Encyclopedia assigned all Oak Tree twopence to a single variety, W-240. Salmon (2010) separately lists only the Small 2 and Large 2 varieties, although small photographs are provided of six Noe varieties and Noe-31.5. Noe-31 has a small 2, unlike Noe-32 through Noe-34. The 2 has a lengthy "tail", unlike Noe-29, and has a lengthy break from the 2 through the A in ENGLAND, unlike Noe-30. The second 6 in the date is intact, unlike Noe-31.5. Such are the distinguishing characteristics of the rare Noe-31.

*Ex: Charles E. Clapp; Carl Wurtzbach; T. James Clarke; F.C.C Boyd; John J. **1652 Oak Tree Shilling, MS65  
IN at Left, Noe-1, W-430, Salmon 1-A  
Finest Known, Ex: Donald Groves Partrick**

**3922** 1652 Oak Tree Shilling, IN at Left, MS65 NGC. CAC. Noe-1, W-430, Salmon 1-A, R.3. 70.5 grains. Ex: Hanson/Donald G. Partrick Collection. Noe recorded this variety as being first among the Oak Tree shillings in his reference, and modern knowledge supports his placement. The operators of the Boston Mint gained little knowledge of rocker-press production during the Willow Tree period, and were still inexperienced in terms of die engraving. The die faces were convex, and had to produce a round coin. The solution was to engrave those dies in an oval shape. When those dies met a flan, the result was a round design on the finished coin. The evidence of all known Noe-1 Oak Tree shillings indicates that the obverse die was round, and the reverse die was oval, accounting for an off-center obverse and a centered reverse.

This highly lustrous Gem clearly shows the sinusoidal wave of rocker-press coinage, and has a distinctive oval shape, resulting in part from the strike and in part from crimping of the flan at the Boston Mint. The weight is a trifle light, but insufficiently so to suggest outside clipping after the coin was produced. The inwardly curved left side of this piece encroaches slightly upon the legend so that the tops of IN on the obverse and NDO on the reverse are absent. Otherwise, the legends are complete. Intermingled gold and pale blue toning heightens the eye appeal of his exceptional shilling. This is the finest Noe-1 shilling known to us, slightly better than the Eric P. Newman coin, or the Parmelee/Boyd/Ford example that Heritage handled in 2008. Following those two coins and the MS63 Partrick duplicate (ex: Eliasberg), the Condition Census falls sharply through the AU grades. Listed on page 41 of the 2017 *Guide Book*.

Ex: Jon Hanson; Donald Groves Partrick; Partrick Collection (Heritage, 1/2015), lot 5524, realized \$111,625. NGC ID# 36MK, PCGS# 45361

**1652 Pine Tree Shilling, MS64  
Large Planchet, Noe-2, W-700, Salmon 2-C  
Finest Known, Ex: Eliasberg**

**3923** 1652 Pine Tree Shilling, Large Planchet, No Pellets at Trunk, Noe-2, W-700, Salmon 2-C, R.5. MS64 NGC. 73.1 grains. No Pellets at Trunk. The Straight Tree. In a Ford:XII catalog description for a Noe-2 lot, the writer noted "the fact that none of the four Boyd-Ford coins are better than Choice EF shows that this is about as good as it gets for the variety."

The present lot proves an exception to the rule. Graded "MS-60 or finer" in its Eliasberg catalog appearance two decades ago, the coin was noted as "clearly a Condition Census contender" with the comment, "it would be difficult to imagine a finer example of N-2."

One can imagine a Noe-2 with complete peripheral legends, but that would be the sole consequential improvement over the present coin. The light-to-medium cream-gray and chestnut-gold surfaces are satiny. They are also unabraded, save for a solitary tick on the base of the first I in XII and a trivial hairline west of the lowest left tree branch. The strike is bold throughout, although about half of IN MAS is absent and several other letters, mostly on the reverse, are missing their upper tips. No Noe-2 Pine Tree shillings are known with complete legends.

Incomplete peripheral letters are characteristic of Large Planchet Pine Tree shillings, which were struck on dies that were oversize relative to the irregular diameter planchets, typically clipped down to standard weight at the Boston Mint. The current piece is larger than most Noe-2 examples. For example, it exceeds in weight three of the four Ford:XII pieces, and all five of the Hain Family coins.

As of (6/16), the NGC Census has recorded a total of 47 Large Planchet, No Pellets Pine Tree shillings. Among all varieties (Noe-1 through Noe-14), NGC has certified five pieces as MS64, two as MS65, and none finer. This example is the finest known Noe-2. Listed on page 41 of the 2017 *Guide Book*.

*Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 9; Donald Groves Partrick; Partrick Collection (Heritage, 1/2015), lot 5569, realized \$51,700. NGC ID# 5JDU, PCGS# 45370 Base PCGS# 23*

## Lord Baltimore Fourpence, Colorful VF35 Hodder 1-A, W-1010, Sharp Legends

**3924** (1659) Lord Baltimore Fourpence VF35 PCGS. CAC. Hodder 1-A, W-1010, R.6. The smallest silver denomination struck for the colony of Maryland was the fourpence, or groat. The groats, like their larger fellows, bore the portrait of Cecil Calvert, the second Lord Baltimore and first Lord Proprietor of Maryland. All legends are sharp on the present pleasing, Choice example, which is free from any visible post-strike marks. A diagonal line on the shield was on the planchet prior to the strike. The shield shows softness at the centers. Dove-gray fields and motifs are bounded by rich peripheral apple-green and mauve toning. Population: 1 in 35, 5 finer (6/16).

Ex: Loe L. Lauder (Doyle, 12/1983), lot 126; Atlanta ANA (Heritage, 2/14), lot 3690. NGC ID# 2U3J, PCGS# 32

## (1694) London Elephant Token, MS65 Brown W-12040, Lustrous with Glimpses of Red Finest at PCGS in Brown

**3925** (1694) London Elephant Token, Thick Planchet MS65 Brown PCGS. Hodder 2-B, W-12040, R.2. GOD PRESERVE LONDON reverse motif. Dagger vertical in upper left quadrant of shield. Struck in copper on a thick planchet. Elephant tusks close to border. A popular British token on both sides of the Atlantic, although the connection with colonial America is dubious and perhaps limited to the rare Carolina and New England varieties, some of which share the same pachyderm dies.

This high grade representative boasts a full strike and consistent medium brown toning. Glimpses of mint red linger in design crevices. Marks are absent aside from an inconsequential, wispy contact near the RE in PRESERVE. Listed on page 48 of the 2017 *Guide Book*. Population: 1 in 65 Brown, 2 in 65 Red and Brown, 1 in 66 Red and Brown (6/16). NGC ID# 2U3A, PCGS# 55

**1776 Continental Dollar, AU Details  
CURRENCY, Pewter  
Newman 1-C, W-8445**

**3926** 1776 Continental Dollar, CURRENCY, Pewter — **Cleaning** — **PCGS Genuine. AU Details. N. 1-C, W-8445, R.3.** Various theories have been presented concerning the origins and intended purpose of the Continental dollar. The most often described scenario indicates it is a pattern for replacing the paper Continental dollar with a crown-sized silver coin. Needless to say, the Continental Congress was unable to fund the Revolutionary War with a bullion currency. This partially lustrous pearl-gray representative has been dipped but is nonetheless well defined and attractive. We note a few thin marks and small spots on the reverse, usual for pewter examples. The obverse field between 12 and 3 o'clock exhibits unobtrusive abrasions. The late die state with a break above the GI in FUGIO. The dies are moderately rotated clockwise from medal turn. Listed on page 87 of the 2017 *Guide Book*.

## 1776 Continental Dollar, Exceptional AU58 Newman 2-C, Struck in Pewter Proper CURRENCY Spelling

**3927** 1776 Continental Dollar, CURRENCY, Pewter AU58 PCGS. CAC. Newman 2-C, Hodder 2-A3, W-8455, R.4. Presumably struck as an alternative to paper currency, Continental dollars always evoke an element of mystery alongside an aura of irresistibility for collectors. Current research indicates they were struck under the authority of the Continental Congress at the New York Mint in 1776 — prior to the fall of New York to the British in September of that year.

Other aspects about the coins are less clear. It is uncertain whether the brass and silver striking were patterns, die trials, or if they circulated alongside the pewter issues. While their rarity (and logic) suggests they were patterns or trials, the sequence of their strike and the fact that several circulated pieces survive give pause. Generally, the pewter issues were struck in larger quantities and clearly they were intended for circulation. Many of the pewter pieces may have been melted as a result of shortages of the metal during the Revolutionary War.

The current Newman 2-C variety struck in pewter is among the more available types for collectors. The obverse shows CURRENCY spelled correctly, without EG FECIT — which appears on the Newman 3-D variety — the signature of Elisha Gallaudet, who designed and engraved New York colonial paper currency of the day as well as the Continental dollar coins.

The present piece is nearly Mint State and exceeds many technically Uncirculated pieces in both surface quality and eye appeal. The pewter composition is susceptible to corrosion, planchet problems, and metal degradation, yet this example is virtually free of any such distractions. A lustrous silver sheen surrounds the devices on both sides, with pleasing warm-gray toning on the raised elements. The coin is free of any significant marks or spots. The reverse is rotated 45° (medal turn) and both sides are sharply struck and nicely centered. A more attractive pewter example for the grade is hard to imagine.

*From The Elbert Henry Gary Collection, Part II.* NGC ID# 2AYT, PCGS# 794

**1776 Continental Dollar, Unc Details  
Struck in Pewter  
CURRENCY, EG FECIT, Newman 3-D**

**1776 Continental Dollar, Unc Details  
Struck in Pewter  
EG FECIT, Newman 3-D, W-8460**

**3928** 1776 Continental Dollar, CURRENCY, Pewter, EG FECIT, Newman 3-D, W-8460, R.4 — Environmental Damage — PCGS Genuine. Unc Details. Although no official documentation has come to light, it seems likely that the 1776 Continental dollars were issued by the Continental Congress to take the place of paper money in the later part of 1776. The coins were struck in several different varieties and are known in brass, pewter, and silver composition. This coin represents the popular Newman 3-D variety, pewter, with the inscription EG FECIT (E.G. made it) added to the ring around the central devices. Eric P. Newman has identified E.G. as Elisha Gallaudette, the likely engraver of the dies. The design elements of this attractive piece are sharply detailed and the characteristic die crack through the lefthand rings on the reverse is prominent. The surfaces are lightly abraded and retain much original mint luster. A few areas of minor, localized corrosion are evident on both sides. Listed on page 87 of the 2017 *Guide Book*. NGC ID# 2AYU, PCGS# 795

**3929** 1776 Continental Dollar, CURRENCY, Pewter, EG FECIT, Newman 3-D, Breen-1095, Hodder 3-B, W-8460, Low R.4 — Scratch — PCGS Genuine. Unc Details. The presence of a few light pinscratches within the state rings on the reverse account for the PCGS Genuine grade, although on balance this is a splendid Uncirculated Continental Currency dollar with the desirable EG FECIT inscription. Elisha Gallaudet, the designer, added "E.G. made it" to the middle obverse ring to create the only Continental dollar variety with his signature, which also appears on the rare brass and silver versions struck from the same dies. The correct spelling of CURRENCY appears on the obverse.

By far, most Continental dollars are struck in pewter — a metal comprised of mostly tin, with a small amount of lead — which was susceptible to corrosion, oxidation, and environmental degradation (but much more available than silver for the early coinage). This example shows virtually no surface problems of the sort, and retains a pleasing silver sheen across both sides with deep-gray patina on the raised devices. The strike is virtually full throughout the coin. Here is an exceptional opportunity for collectors wishing to own what Jeff Garrett and Ron Guth identify as one of the dozen greatest U.S. Coins in their book, *The 100 Greatest U.S. Coins*.

***From The Elbert Henry Gary Collection, Part II.***

**1785 Confederatio Copper, VF30  
Small Circle Reverse, W-5635  
Only Eight or Possibly Nine Known**

**3930** 1785 Inimica Tyrannis Americana / Confederatio, Small Circle Cent Original VF30 NGC. Breen-1124, Whitman-5635, Low R.7. 142.8 grains, 99% Copper per NGC metallurgical tests. Experts may disagree regarding the obverse legend which translates to "Americana Opposed to Tyranny," although some will say that AMERICANA may be interpreted as a Latinized version of America. Whether it is correct or not, surviving examples are extremely rare, with eight known examples and one other that disappeared more than half a century ago. Slight surface roughness is evident on both sides of this example. However, the piece is attractive overall with maroon and steel patina on its light brown surfaces.

Collector and researcher John L. Howes provided a Condition Census that shows the present example in the fifth position. Interestingly, the eight coins listed in the Census with grades fall in the narrow range from Fine to AU, and six examples with known weights fall in the extremely narrow range of 138 grains to 148.6 grains, suggesting precision manufacture that may yield an additional clue as to the production location. Listed on page 58 of the 2017 *Guide Book*.

**1787 Immunis Columbia Copper, AU55 ★**  
**Rare Eagle Reverse, Broad-Flan, Breen-1136**  
**One of Four Known**  
**Ex: Parmelee, Ten Eyck, Newcomer, Green, Newman**

**3931 1787 Immunis Columbia, Eagle Reverse, Wide Planchet, Breen-1136, W-5680, R-7, AU55 ★ NGC.** 167.8 grains. Ex: Parmelee/Ten Eyck/Newcomer/Green/ Newman. Once called pattern issues to support a March 1787 coinage proposal, the Immunis Columbia pieces may actually have been struck for circulation at the end of the 1780s.

There are two formats known for the 1787 Immunis Columbia coins. The narrow planchet coins are typically 26 to 27 mm., with about 100 examples known. The wide planchet overstrikes, such as this piece from the Eric P. Newman Collection, are about 29 to 30 mm., with just four examples believed to survive. Typically, overstruck coins used random coppers pulled from circulation to provide additional planchet stock. However, each of the known wide planchet Immunis Columbia pieces are on identical New Jersey varieties, suggesting the “random copper” theory is incorrect. Instead, it is almost certain that these Immunis Columbia pieces were coined alongside certain New Jersey coppers.

In *New Jersey State Coppers*, Roger Siboni, John Howes, and Buell Ish identify the broad planchet overstrikes as 1) an example in the Col. Phares O. Sigler Collection; 2) the present Newman coin; 3) an example in the 1976 ANA sale; and 4) the Garrett specimen.

The most detailed study available for these coins is “The 1787 ‘New York’ Immunis Columbia, A Mystery Re-Ravelled,” by Michael Hodder, in *The Colonial Newsletter*, January 1991, pages 1203-1235. Hodder examined all aspects of the issue and determined that these pieces were struck at the end of the 1780s, from late 1788 to the middle of 1789. Matthias Ogden likely produced the Immunis Columbia pieces at the Rahway Mint, where he also coined the New Jersey 16-S and 26-S varieties. Hodder writes:

“It is probable that the entire issue was planned for circulation, and was not struck to support Matthias Ogden’s March 3, 1787 coinage proposal, but rather, to provide Ogden with another source of revenue free from the 10% seigniorage payable to the state on the New Jersey coinage.”

Eric P. Newman wrote on the back of his envelope “Pattern by Ogden to get Federal franchise.” Included in the envelope was an advertisement for the memorable example offered in this sale, offering pictures of the coin and saying:

1787 IMMUNIS COLUMBIA copper

Struck at the Rahway Mint as a pattern for Matthias Ogden’s March 23, 1787

Petition to strike coppers for Congress.

While they disagree about the intent of the coinage, pattern or business strike, Newman and Hodder agree that the coiner was Matthias Ogden at the Rahway Mint. Others have suggested that the Immunis Columbia pieces were coined by James F. Atlee. Hodder responds:

“The identification of James F. Atlee as the die cutter for the Immunis issue is reexamined and challenged, suggesting a reappraisal of his role in all other copper issues that have traditionally been ascribed to his hand.”

The present example is exceptionally original and high-end for the AU55 NGC grade, as indicated by the NGC Star designation. The coin was a highlight of the Eric P. Newman colonials, both for its rarity and its immaculate preservation. The oversized flan allows the Immunis Columbia design to be viewed in its entirety, including all dentilation, the legends, and a full date. Ample evidence of the undertype exists on both sides of the coin, especially at the margins where a second row of dentils remains from the undertype. Rich, medium-brown surfaces are glossy and softly lustrous - boldly struck, with hints of orange-brown patina around the sharp devices. It is believed James Atlee made the dies for this eagle-reverse variety as well as for a second design, the crudely made 1786-dated pattern, aptly dubbed the “pterodactyl” variety.

The 1787 broad-flan design is not to be confused with the more common Immunis Columbia pieces that were struck on smaller diameter planchets, with the legends and/or the date running off the too-small flans. Those coins are thought to have been struck later than the broad-flan coins, possibly at the Rahway mint in 1788 or perhaps even later, after Matthias Ogden established a new mint in Elizabethtown, NJ.

Ogden was a notable Revolutionary War figure and served as a member of the state’s legislative council in 1785. He supervised his partners at the Rahway mint and held a surety bond, which allowed him to take control of the Rahway mint’s assets and the firm’s New Jersey copper cent contract after a falling out of the partners doomed the Rahway operations. Listed on page 57 of the 2017 *Guide Book*.

Ex: Lorin G. Parmelee Collection (*New York Coin & Stamp*, 6/1890), Lot 596; James Ten Eyck; Albany Historical Society; James Ten Eyck (*B. Max Mehl*, 5/1922), Lot 845; Waldo Newcomer (circa 1931 via B. Max Mehl); “Colonel” E.H.R. Green; Green Estate; B.G. Johnson in the early 1940s; Eric P. Newman, purchased for \$50.00; Eric P. Newman Numismatic Education Society; Newman Collection, Part IV (*Heritage*, 5/2014), lot 30425, realized \$76,375. NGC ID# BFJL, PCGS# 841

**1787 Liber Natus Copper, AU50  
Excelsior Reverse, Breen-990, W-5795  
Third Finest Known**

**3932** 1787 New York Excelsior Copper, Indian and New York Arms, Breen-990, W-5795, High R.6, AU50 PCGS. CAC. Ex: Whitman / Newman. 171.4 grains. Previously certified by NGC and metallurgically analyzed as 99% copper. Two varieties of the Liber Natus, Excelsior coppers are known. The variety offered here combines the standing Indian obverse with the New York Arms reverse. Typical survivors are in higher grades, suggesting that the variety saw little circulation. Just over a dozen examples of this variety are known. Based on John Ford's notes, Michael Hodder presented a preliminary census of this issue in the May 2004 Ford catalog, recording nine examples. We have refined and expanded that census here:

1. **MS65.** Louis E. Eliasberg, Sr. Collection; Eliasberg Estate (Bowers and Merena, 5/1996), lot 58.
2. **AU.** Sarah Sophia Banks (1818); British Museum.
3. **AU50 PCGS.** Eric P. Newman Numismatic Education Society; Newman Collection, Part V (heritage, 11/2014), lot 3028, realized \$88,125. **The present specimen.**
4. **AU.** Lorin G. Parmelee (New York Coin & Stamp Co., 6/1890), lot 457; H.P. Smith (Chapman Brothers, 6/1906), lot 124; Col. James W. Ellsworth; John Work Garrett; Johns Hopkins University (Bowers and Ruddy, 11/1979), lot 601.
5. **XF.** F.C.C. Boyd Estate; John J. Ford, Jr. (Stack's, 5/2004), lot 312.
6. **XF.** Mickley Sale (W.E. Woodward, 10/1867); Bushnell Sale (Chapman Brothers, 6/1882), lot 888; Brand Collection.
7. **Fine.** William H. Woodin; Peter Gschwend (Thomas Elder, 4/1909); F.C.C. Boyd.
8. **Fine.** John G. Mills Collection (Chapman Brothers, 4/1904), lot 348.
9. **VG.** John Story Jenks (Henry Chapman, 12/1921), lot 5493.
10. **VG.** Norweb Collection, but not found in the catalogs of that collection.
11. **Good.** James Ten Eyck (B. Max Mehl, 5/1922), lot 816.
12. **Poor.** Thomas Warner (Chapman Brothers, 7/1891), lot 2094.
13. **Plugged.** New Netherlands Coin Co. (44th Sale, 6/1954), lot 71.
14. **Holed.** Matthew Stickney (Henry Chapman, 6/1907), lot 240.

Although this piece was cleaned many decades ago, both sides are now attractively and naturally toned to olive and light blue-steel. Trivial rim bruises are to be expected on these old coppers, but the obverse and reverse surfaces are outstanding. Listed on page 65 of the 2016 *Guide Book*.

Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part V (Heritage, 11/2014), lot 3028, realized \$88,125. NGC ID# 2B3R, PCGS# 436

## 1787 Nova Eborac Copper, MS63 Brown Large Head, W-5750 The Finest Known

**3933** 1787 Nova Eborac Copper, Large Head, Breen-985, W-5750, R.6, MS63 Brown NGC. Ex: Norweb. Like so many other contemporary colonial issues, there is much speculation and little knowledge about these coppers. The obverse legend refers to New York, so that city is likely the mintage location. Breen attributed the engraving to John Bailey and Ephraim Brasher, although this cataloger believes the design is crude, and the dies probably engraved by one or more individuals of less talent than Bailey or Brasher; others may disagree.

This impressive and finest known example has splendid olive-brown surfaces with full cartwheel luster. Both sides exhibit splashes of golden-tan, faded from original red. A few surface marks at the central obverse are likely original planchet marks that were not struck out. This example from the Norweb Collection is finer than any other Nova Eborac Large Head copper that we have encountered. We have handled just under a dozen of these in our past auctions, mostly in the Fine to XF range. The finest of those is an AU55 PCGS example that was formerly lot 296 in the Ford Sale, Part II. The Eric P. Newman Part IV coin that we sold in May 2014 was graded XF40 NGC. Here is an exceptional opportunity to acquire a high-grade and eye-appealing example of this important copper variety.

Ex: *New Netherlands* (1/1956); *Norweb Collection* (Bowers and Merena, 3/1988), lot 2676; *Marvin Browder*; *Ed Milas*; *Stack's*; *Jon Hanson* (8/8/1998); *Donald Groves Partrick Collection* (Heritage, 1/2015), lot 5663, which realized \$30,550. NGC ID# 2B4C, PCGS# 484

## 1787 Fugio Cent, MS64 Brown Newman 11-A, W-6780 Tied for Finest Certified

**3934** 1787 Fugio Cent, UNITED Above MS64 Brown PCGS. Newman 11-A, W-6780, R.6. Four Cinquefoils, Pointed Rays. UNITED Above STATES. A stunning, near-Gem example of this elusive single-variety type. Glossy chestnut-brown surfaces display substantial mint red with subtle blue overtones. The obverse is slightly off-center north, while the reverse is off-center south — as nearly always seen on the 11-A variety. Choice surfaces show a sharp strike with some streaky dark toning visible with a glass.

The surviving 11-A examples, estimated at fewer than two dozen pieces, in part come from the Bank of New York hoard. Most high-grade examples are likely hoard coins, which normally exist in AU or finer grades. This MS64 piece is tied for finest-known of the variety. Listed on page 90 of the 2017 *Guide Book*, where it is unpriced in Uncirculated condition. Population: 5 in 64 Brown, 0 finer (6/16).

From *The Elbert Henry Gary Collection, Part II*. NGC ID# 2B8L, PCGS# 901

### 1792 Washington President Cent, XF45 The Getz Pattern, Baker-25

**3935** 1792 Washington Getz President Pattern Cent, Plain Edge, XF45 NGC. Baker-25, Breen-1352, Pollock-5020, W-10775, R.5. 257.7 grains, 33.2 mm. Just over 50 of these survive in copper from an unknown production that some numismatists estimate at 100 pieces. Peter Getz of Lancaster, Pennsylvania, just 23 years old at the time, "is said to have aspired to the position of Mint engraver" according to George Fuld in *The Washington Pattern Coinage of Peter Getz*. His design closely followed the language of a coinage bill that Robert Morris introduced to Congress on December 21, 1791. Meanwhile, Getz became a successful goldsmith and jeweler who operated a business on Queen Street, "opposite Mr. Slough's tavern" according to a contemporary advertisement. He died at the age of 36 in 1804.

This lovely example has a slight high-point wear with lovely olive and steel-brown surfaces. The obverse has a minor rim bruise over the D of PRESIDENT and the reverse has a minuscule rim nick over the first A in AMERICA and left of the eagle's tail. The surfaces are outstanding for the grade.

**From The Palos Verdes Collection, Part II.** NGC ID# 2B7B, PCGS# 921

## 1792 Washington Silver Pattern, VF Details The Silver Getz Half Dollar, Baker-24 Struck over 1770 Germanic Half Thaler

**3936** 1792 Washington Getz Pattern Half Dollar, Small Eagle, Silver – Damaged – NGC Details. VF. Baker-24, W-10780, R.6. 208.3 grains, 34.5 x 35.4 mm. Struck over a 1770 Germanic half thaler, and apparently unique as such. The silver Getz pieces are nearly always found with undertype from world coins that circulated in and around Pennsylvania in the early 1790s. While several show undertype from various Mexican coins that were prevalent in the area, it is not surprising to find an example struck over a Germanic coin. Many German immigrants lived in Lancaster, Pennsylvania and the surrounding area at the time, including Jacob Saunders, the cataloger's sixth great grandfather, who lived near Lancaster in the middle and later 18th century.

On several surviving examples, the edge retains design from the undertype. According to the Fuld reference, *The Washington Pattern Coinage of Peter Getz*, five examples have the Circles and Squares edge of a Mexican 4 Reales, one example has a Lettered edge from a 1679 British half crown, and three pieces have twinned olive leaves on the edge, also from Spanish 4 Reales pieces. The remaining 13 examples, including that offered here, are described as Plain edge pieces. This piece has intermingled champagne, and steel toning on its light silver surfaces with a small area of surface scrapes at the upper reverse. The "70" from the undertype is visible, inverted, at the lower reverse to the right of the eagle's tail. Much additional undertype is evident, especially on the reverse. An important rarity, this offering is incredibly important to the advanced early American coinage collector.

*Ex: C.H. Stearns (Mayflower Coin Auctions, 12/1966), lot 290; Richard Picker; Kurt Krueger; Laird U. Park Collection (Stack's, 5/1976), lot 181; Julian Leidman.*

## The Unique 1796 Washington Dollar VG Details, Struck over Mexican Eight Reales Baker-33, Plated in Snowden, 1861

**3937 1796 Washington "Dollar," Baker-33, Unique. Silver-Damaged, Holed-NGC Details. VG.** 361.1 grains, 39.0 x 39.2 mm, specific gravity 10.4. Believed unique, this dollar-sized piece is struck over a Spanish 8 reales, likely from the Mexico City Mint. When James Ross Snowden published *The Medallic Memorials of Washington in the Mint of the United States* in 1861, he illustrated this piece on Plate XI. The Snowden plate shows the hole in exactly the same position, proving that this is the same piece. A little over a quarter century later, W.S. Baker described the piece in *Medallic Portraits of Washington* as his number 33. Baker noted that H. Drumheller of Schuylkill County, Pennsylvania was the owner of the piece in 1861, and that it was on loan to the Mint. Henry Drumheller was a merchant in North Mannheim, Schuylkill County, Pennsylvania in 1860. He was born in Pennsylvania about 1813.

Although dated 1796, the obverse is virtually identical to the 1792 Washington President pieces by Peter Getz, using the same device punch for the uniformed George Washington, and the reverse is from the identical die that Getz used for his 1792 Washington pieces. The specific gravity of 10.4 approximates .950 fine silver. We believe that the obverse and reverse of the pillar dollar were planed down before this example was struck, although traces of undertype are still visible, especially at CA of AMERICA. The ornamental squares and circles edge is still clearly visible around most of the circumference. The obverse and reverse have borders of rays that were hand punched after this piece was struck. The scalloped circle on the obverse, also hand punched, marks the edge of the die.

When this piece was holed is, of course, unknown. It may have been Peter Getz himself that placed the hole in this piece, perhaps for use as a fob or other decorative purpose. One cataloger suggested that the hole may have been placed for suspension on occasion of Washington's 1799 funeral procession. All we know for sure is that the piece was holed prior to its 1861 appearance in Snowden's book. The obverse shows considerable wear through the perimeter lettering, while retaining considerable detail on Washington's bust. Many of the fine scratches on the obverse are likely file marks remaining from the surface planing prior to striking. Others occurred later, and the same is true of the reverse. The central reverse is bulged as on the latest striking of the 1792 Getz copper and silver pieces. Attractive ivory and pewter-gray surfaces exhibit delicate champagne toning.

George Fuld and Eric P. Newman studied this piece at length in 1961, and they came to the conclusion that it is a medal, calling it a "development piece" that Getz used during the production of 1797 Masonic medals that also featured the likeness of George Washington. For their detailed report, see "Rediscovery of the 1796 Washington President Piece" in the April 1961 issue of *The Colonial Newsletter*.

*Ex: Henry Drumheller (Schuylkill County, Pennsylvania, circa 1861); later, Louis Karp (St. Louis, Missouri, circa 1960); 1962 ANA (James Kelly, 8/1962), lot 1976; Kagin's (1975); Bowers and Merena (9/1989), lot 31; Jack Collins Sale (Stack's, 4/1996), lot 41.*

**1820 North West Company Token**  
**Brass, W-9250, VF30**

**3938** 1820 North West Company Token, Brass, VF30 PCGS. **Breen-1083, W-9250, R.4.** The North West Company operated in present-day Oregon. Their tokens, usually in brass and very rarely in copper, purportedly could be redeemed at a company trading post for a beaver pelt. Breen (1988) states that a "couple of dozen" were dug up in the Umpqua River Valley hoard, circa 1976. Most survivors are well circulated and show evidence of corrosion. Nearly all are holed near 12 o'clock. Just two examples are known without holes, presumably never issued. The present holed piece is nicer than most survivors since it is free from corrosion. The green-gold surfaces are smooth aside from minor laminations on the beaver flank and between the OR in NORTH. Listed on page 80 of the 2017 *Guide Book*. NGC ID# 2B6H, PCGS# 952

**(1781) Libertas Americana Medal**  
**MS63 Brown**  
**Betts-615, Loubat-14, Bronze**

**3939** (1781) Libertas Americana Medal, Bronze, MS63 Brown NGC. **Betts-615, Loubat-14.** Augustin Dupre was arguably the best die engraver of the 18th century, certainly in France where these pieces were struck, and possibly anywhere in the world at the time. Designed after the concept of Benjamin Franklin, the beauty of this medal is equaled by its numismatic and historical importance. The Libertas Americana medal is considered one of the greatest medals ever produced, and it holds the number one position in *100 Greatest American Medals and Tokens*, by Katherine Jaeger and Q. David Bowers. This spectacular example features chestnut and golden-brown surfaces with fully reflective fields and bold design elements. Delicate blue overtones complete the picture of a spectacular French medal telling the history of America.

*Ex: 1983 ANA Sale (Kagin's, 8/1983), lot 258.*

**From The Palos Verdes Collection, Part II.** NGC ID# BLK2, PCGS# 151815

### Libertas Americana Medal, MS62 Brown Betts-615, Classic Franco-American Design

**3940** (1781) **Libertas Americana Medal, Bronze, MS62 Brown NGC. Betts-615.** Listed as the #1 item in the 100 *Greatest American Medals and Tokens* reference, the Libertas Americana medal had a major influence on early American coinage. In particular, the obverse of the 1793 half cent is derived from the medal. Commissioned by Benjamin Franklin, engraved by Augustin Dupré, and struck at the Paris Mint. The reverse design depicts the United States as the infant Hercules strangling a serpent while France as Minerva fends off the British lion. Struck from the original dies in bronze. A well struck and spot-free chocolate-brown medal with occasional moderate field marks and a few tiny ticks on Liberty's cheek. Census: 7 in 62 Brown, 6 finer (6/16). NGC ID# BLK2, PCGS# 151815

## HALF CENTS

### 1793 C-1 Half Cent First 1793 Half Cent Variety

**3941** **1793 C-1, B-1, High R.3, PCGS Genuine.** The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a AU specimen that has been cleaned.

Manley Die State 1.0. An elusive early die state without the usual rust streaks in the left obverse field, and with HALF CENT bold. The C-1 die pair is believed to be the first of four die marriages used in 1793, and the early die state means this is one of the first half cents ever coined at the Philadelphia Mint. This lightly cleaned example has variegated tan and olive-brown surfaces with good overall eye appeal. Our EAC grade VF20. NGC ID# 2222, PCGS# 35003 Base PCGS# 1000

## 1793 C-2 Half Cent, VF30 Scarce Single-Year Type Coin

**3942** 1793 C-2, B-2, R.3, VF30 PCGS. The 1793 half cent is a single-year type coin, made during the first year of regular operations at the Philadelphia Mint. This tan-brown representative is evenly struck and has pleasing definition. Granularity is absent, and the sole mentionable imperfections are a narrow planchet fissure (as made) above STATES and a small dig on the obverse border at 10 o'clock. The reverse is rotated 45 degrees clockwise, not unusual for C-2. All four 1793 die marriages are affordable, which makes it possible to assemble an impressive die state collection of the Liberty Cap, Head Facing Left type. Our EAC grade VF20.

**From The Palos Verdes Collection, Part II.** NGC ID# 2222, PCGS# 35006 Base PCGS# 1000

## 1793 C-2 Half Cent, XF40 Single-Year Type Issue

**3943** 1793 C-2, B-2, R.3, XF40 PCGS. CAC. The importance of the 1793 half cent is difficult to overstate as it was struck during the first year of Philadelphia Mint operations, and is a single-year design with a mintage of only 35,334 coins. There were four different die pairs utilized, and each is about the same rarity today, suggesting about the same initial production of less than 10,000 coins per marriage. Mottled reddish-tan, olive-brown, and steel-blue appear on the obverse with a small rim bruise at 9 o'clock. The reverse is light tan and olive with trivial greenish patina in the right branch of the wreath. Our EAC grade VF20. NGC ID# 2222, PCGS# 35006 Base PCGS# 1000

### 1793 Liberty Cap Half Cent, AU50 Popular First-Year Issue, C-4, B-4

**3944** 1793 C-4, B-4, Low R.3, AU50 PCGS. Manley Die State 2. A memorable AU specimen of this popular first-year issue that is seldom encountered in Mint State. Variety C-4, B-4, with the Y in LIBERTY close to the cap and the leaf pointing to the final A in AMERICA. The die flaw at the top of 7 in the date indicates the die state. A pair of planchet fissures shows in the upper right obverse field, but the surfaces show few post-strike distractions. Only a trace of actual wear is evident on the design elements. The smooth olive-brown surfaces exhibit a few highlights of original red patina and the overall presentation is most attractive. Our EAC grade VF30. NGC ID# 2222, PCGS# 35012 Base PCGS# 1000

### 1794 C-9 Half Cent, AU50 High Relief Obverse

**3945** 1794 High Relief Head, C-9, B-9, R.2, AU50 PCGS. CAC. Manley Die State 3.0 with a small rim break on the reverse at 6:30, although it is mostly hidden by the holder. Half cent mintages in 1794 picked up where they left off in 1793. With an accepted mintage of 81,600 coins in 1794, and nine die pairs known, the average was about 9,000 coins per die pair, almost exactly the same as in the previous year. Substantial mint gloss shimmers across this briefly circulated and impressive half cent. Richly defined aside from minor softness on the CE in CENT. The scattered tiny marks are invariably inoffensive. Much nicer than is usual for this early date. Our EAC grade VF30. NGC ID# 2223, PCGS# 35063 Base PCGS# 35054

## PROOF HALF CENTS

### 1831 B-1b First Restrike Half Cent Possibly Unique Shattered Reverse Die PR66 Brown, Ex: Missouri Cabinet

**3946** 1831 First Restrike, Reverse of 1836, B-1b, Low R.6, PR66 Brown PCGS. CAC. Ex: Missouri Cabinet. Breen Die State III, with the reverse die shattered. Richard T. Coleman, Jr. Die State VI. Three die cracks all meet at the L in HALF: through the T in UNITED, the wreath, and HA; through the F in OF and the wreath; and through the final A, the wreath, and NT of CENT. A branch from the first crack extends down through the C in CENT to the wreath and ribbon. Both sides of this Premium Gem exhibit bold design definition with golden-brown surfaces and delicate blue-violet overtones. Pristine surfaces exhibit deep mirrors that are essentially flawless. This is the only example that half cent researcher Richard T. Coleman, Jr. identifies as Die State VI, the latest die state in his record. Our EAC grade PR64.

Ex: Howard R. Newcomb (privately, 1935); B. Max Mehl (privately, 1935); Col. E.H.R. Green; Green Estate; Eric P. Newman and Burdette Johnson; B.G. Johnson; Johnson Estate; Anderson Dupont Sale (Stack's, 11/1954), lot 1119; Joseph Brobston; Stack's (1963 FPL); later, ANA Sale (Stack's, 8/1976), lot 179; Robison Family Collection (Stack's, 1/1982), lot 354; R. Tettenhorst; Missouri Cabinet (Goldberg Coins, 1/2014), lot 126. NGC ID# 2237, PCGS# 1189

### 1836 Half Cent, PR66 Brown First Restrike, B-1a

**3947** 1836 Restrike, Reverse of 1836, B-1a, Low R.6, PR66 Brown NGC. According to Breen, these elusive restrikes were produced from the original dies and can be differentiated from the originals by stronger detail at the rims and by a slight bulging from the obverse die. About 20 specimens are believed to exist, although several of these are permanently impounded in museums. While receiving a Brown color designation, this beautifully preserved, well-mirrored specimen maintains a generous amount of cherry-red color in the protected areas of the obverse. Our EAC grade PR62. Census: 3 in 66 Brown, 0 finer (6/16).

Ex: Long Beach Signature (Heritage, 9/2004), lot 5044. PCGS# 35315

**1840 Second Restrike Half Cent, B-3  
PR65 Red and Brown  
Ex: Eliasberg/Gardner  
Tied for Finest Certified**

**3948 1840 Restrike PR65 Red and Brown PCGS. CAC. B-3, High R.6.** Ex: Eliasberg. The remarkable Louis E. Eliasberg, Sr. cabinet contained a selection of proof-only half cents, including many Gem and near-Gem specimens. This immaculate piece displays diagnostic file lines most plainly above RIC, less so above A to confirm it is a Second Restrike. These Second Restrike proof half cents use a reverse die that PCGS labels “Reverse of 1856” — a Small Berries die that shows parallel die file marks on the rim above and right of RICA. Breen calls it “Reverse of 1860” in his half cent *Encyclopedia*.

The present Gem proof ranks high in the Condition Census and may qualify as the finest-known example of the 1840 Second Restrike half cent. It is boldly defined with pale lilac toning over brilliant-orange mint color on the obverse. Deeper lilac and blue toning appears on the reverse. PCGS has certified 12 1840 Restrike half cents, including three PR66 Brown (1 PR66+ Brown) and three PR65 Red and Brown. NCG has certified eight 1840 Restrikes, including one PR66 Red and Brown, one PR65 Red and Brown, two PR66 Brown, and one PR65 Brown. The population data for both services include First and Second Restrike half cents without further distinction. Our EAC grade PR64.

Ex: *Clapp Estate (1942)*; *Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 5/1996)*, lot 453; *in the estate of Osipowicz Tadek since 1996*; *Fort Worth Signature (Heritage, 3/2010)*, lot 92; *Eugene H. Gardner Collection, Part I (Heritage, 6/2014)*, lot 30012. Possibly earlier from Thomas Elder before 1907. NGC ID# 26Z5, PCGS# 1252

**1841 B-1b Half Cent, PR65 Red and Brown  
First Restrike, Reverse of 1856**

**3949 1841 First Restrike, Reverse of 1856, B-1b, High R.7, PR65 Red and Brown PCGS.** Ex: Missouri Cabinet. This Gem proof exhibits a bold strike and excellent eye appeal. The obverse has considerable rich orange mint color with deep blue toning. Old carbon spots are noted in the field next to Liberty's lips, at the border over star 10, and just above the inside point of star 11. The reverse is chocolate-brown with rich blue overtones. The 1841 First Restrike is one of the rarest of all the First Restrike issues, with only four known. There were five examples listed in Richard T. Coleman, Jr.'s census, but two of his individual records are for the same coin, that offered here. Our EAC grade PR63.

Ex: *Superior Stamp and Coin Co. (10/1977)*, lot 150; *Paramount (1978 FPL)*; *Richard H. Gross (8/1983)*; *R. Tettenhorst*; *Missouri Cabinet (Goldberg Coins, 1/2014)*, lot 154 PCGS# 35349 Base PCGS# 1258

## 1845 B-1b Half Cent, PR65 Brown First Restrike, Reverse of 1856

**3950** 1845 First Restrike, Reverse of 1856, B-1b, High R.7, PR65 Brown PCGS. CAC. Ex: Missouri Cabinet. Researcher Richard T. Coleman, Jr. has identified just four known examples of the 1845 First Restrike half cent, including the present specimen. The obverse has deeply faded orange mint color with subtle blue and violet overtones and a minuscule speck of carbon near the bust point. The reverse chestnut and mahogany-brown with rich sky-blue overtones. Both sides have sharp design details and moderate mirrors. Our EAC grade is PR62.

Ex: Dr. Charles A. Cass; *The Empire Sale* (Stack's, 11/1957), lot 111; Joseph Brobston; *Stack's* (1963 FPL); Philip M. Showers; *Stack's* (privately, 1969); Willis DuPont; Fred S. Werner (2/1976); *Superior Stamp and Coin Co.* (2/1976); Joe Flynn and Son Rare Coins (4/20/1976); R. Tettenhorst; *Missouri Cabinet* (Goldberg Coins, 1/2014), lot 173 PCGS# 35372 Base PCGS# 1281

## LARGE CENTS

## 1792 Silver Center Cent, Judd-1, SP35 First Coin Struck Inside the U.S. Mint Classic American Rarity

**3951 1792 One Cent, Judd-1, Pollock-1, High R.6 SP35 PCGS Secure. CAC.** The Silver Center cent is one of the most famous and iconic issues of American coinage. Most numismatists believe it was the first coin actually produced inside the walls of the first U.S. Mint, although a few other patterns were struck earlier, before the Mint was actually ready for coinage operations. Its historic importance can scarcely be overstated and examples have been prized by collectors since the earliest days of the hobby.

### Design

Liberty faces right with hair flowing behind. The obverse periphery reads LIBERTY PARENT OF SCIENCE & INDUSTRY, with 1792 just below the bust. The reverse has a wreath tied with a ribbon at the bottom; ONE CENT is within. Around the rim is UNITED STATES OF AMERICA with the fraction 1/100 below. Struck in copper with a silver plug in the center with a reeded edge. Medallion alignment. Average diameter is about 22.9 mm.

### Origin of the Silver Center Cent

The Silver Center cent was long thought to be the brainchild of Chief Coiner Henry Voigt, based on Thomas Jefferson's famous message to President George Washington on December 18, 1792:

"Th. Jefferson has the honor to send the President two cents made on Voigt's plan by putting a silver plug worth  $\frac{3}{4}$  of a cent into a copper worth  $\frac{1}{4}$  of a cent."

However, recent research by Len Augsburger, Joel Orosz, and Pete Smith for their coming book, *1792 Birth of a Nation's Coinage*, indicates the concept for the unique dual metallic composition of this piece may have originated with famous patriot and essayist Thomas Paine. Paine was living in London when he sent Jefferson a September 28, 1790-dated letter outlining his ideas for a national mint and coinage. Despite the obvious advantages of copper as a metal for coinage (inexpensive and easy to work with), Paine believed that "to give the cents the intrinsic value they ought to have by weight, they will be too heavy and bulky for the use they are intended for." He suggested three possible solutions to this problem:

"1st. Making silver and copper in fusion; 2d. Plating the copper with silver; 3d. Plugging the copper with silver. But against all of these, there are very capital objections."

The Mint would actually try two of Paine's three suggestions in 1792, in the form of the Silver Center cent (Judd-1) and the Fusible Alloy cent (Judd-2). As Paine predicted, both of these solutions proved impractical for actual coinage. The Fusible Alloy cents were indistinguishable from pure copper cents and thus highly vulnerable to counterfeiting, and the mechanical problems encountered when preparing and striking the copper cents with a silver plug were too great to overcome in high-volume coinage operations. The Mint recognized these difficulties almost immediately. It seems the few specimens actually struck were primarily intended as essay pieces, to demonstrate the design to President Washington and members of Congress. Modern testing reveals that most (if not all) of the Fusible Alloy cents were actually struck in pure copper and measurements of the silver plug on the Silver Center cent indicate it was too small to contain  $\frac{3}{4}$  cent worth of silver. No Silver Center cents were ever produced for circulation and no official mintage figures have ever surfaced. Today, we know of 14 surviving examples, most of them in relatively high grade, and a single copper setup piece struck without the silver plug.

### The Present Coin

The coin offered here is a fairly recent discovery, found in a pub in the 1960s. The first owner of record was named Nigel Willmott and it has one previous auction appearance in a Glendining's sale in 1997, where it brought 28,750 British pounds. It passed through a number of well-known American numismatists and coin dealers, including Kenneth Goldman, Stuart Levine, and Anthony Terranova, before finding a home with prominent collector Martin Oghigian. This piece has been in Oghigian's estate since his death in 1998.

This coin is well-centered on the reverse and slightly off-center to the south on the obverse, with only the top third of the dentils showing on the obverse. Actual wear is relatively light and the pleasing olive-brown surfaces show only scattered, minor abrasions, the worst being a small dig above the forehead in the obverse field. The design elements were strongly impressed on the obverse, while the reverse is sharp on the peripheries and soft in the center. The silver plug is bright and stands out in dramatic contrast to the copper planchet. Altogether, a most attractive specimen of this classic American rarity.

*Ex: Nigel Willmott; Glendining's Sale (1997); Kenneth Goldman, Stuart Levine, and Anthony Terranova; Larry Stack; Martin Oghigian; Oghigian Estate.*

**From The Palos Verdes Collection, Part II. PCGS# 11002**

**1792 Birch Cent, Judd-5, MS61 Brown**  
**Finer of Only Two Pieces Known**  
**Ex: Norweb, Partrick**

**3952 1792 Birch Cent, Judd-5, Pollock-6, R.8 MS61 Brown NGC.** Ex: Norweb, Donald G. Partrick Collection. 262.2 grains. Struck to the weight standard of the April 2, 1792 Mint Act, this high grade Birch cent is by far the finer of the two known specimens of this variety. It combines ultra-rarity with the highest quality that can be attained for the issue, establishing itself as a must-have example for the collector looking to build the finest possible set of early American coinage.

**The Birch Cent Engraver**

The identity of the engraver Birch is one of the oldest riddles in American numismatics. For that matter, none of the engravers of the 1792 patterns are known with much certainty, with the exception of the Eagle-on-Globe quarters (Judd-12 and Judd-13), for which there is evidence associated with the artist Joseph Wright. The prominent clue on the truncation of Liberty, BIRCH, should ostensibly resolve the issue for the Birch cents, but, even after 150 years of numismatic investigation, the mystery remains. A longstanding speculation, and a natural guess, has been the miniature painter and enamellist William Russell Birch (1755-1834).

Birch was a socially connected painter in Philadelphia especially known for portrait enamels of Washington based on the iconic Gilbert Stuart painting. The Historical Society of Pennsylvania holds the manuscript of Birch's autobiography, and in 2011 this document was published in *William Birch: Picturing the American Scene*. Unfortunately, Birch did not emigrate from Britain to the United States until October 1794. Carl Carlson, writing in the March 1982 *Numismatist*, was aware of the late emigration date but suggested that Birch made one or more visits to the United States in 1792.

Birch's autobiography argues against this. Although coverage of the period from 1791 to 1794 is thin, there is no discussion of the Mint in Philadelphia or die engraving. Furthermore, Birch's autobiography discusses letters of recommendation prior to the 1794 voyage. Had Birch already traveled in the United States and established contacts at the Mint, these would have been unnecessary. Birch did carry one letter of recommendation from the celebrated painter Benjamin West and that was sufficient to secure his initial employment in Philadelphia. Birch's first patron in America was William Bingham, whose wife, Anne Willing Bingham, has traditionally been cited as the model for the 1796 half dollar. (Researcher R. W. Julian disagrees with this idea and argues that the choice of Anne Willing Bingham, a Federalist ally of Washington, would have been politically inflammatory.)

William Birch seems to have been in the right place at the wrong time. But the more convincing case against Birch is found in his overall portfolio. Birch simply was not involved in the plastic arts. He painted, executed enamels, published collections of print engravings, and eventually settled into the occupation of landscape architect. In this capacity he designed the estates and gardens of "country seats," properties created by American elites to escape the bustle of nearby cities. If William Russell Birch had any involvement with the Birch cents, it was an isolated incident that escaped his autobiography.

Speculation has also fallen on Birch's son Thomas Birch (1779-1851). Thomas Birch was an accomplished marine painter, but placing him in Philadelphia, as a 13-year old engraving the Birch cent dies, stretches the known facts beyond a credible level.

In the December 2012 *Numismatist*, R. W. Julian noted a "Bob Birch" in the expense records of the Chief Coiner, Henry Voigt, for 1793. The payments, several dollars in total, are "on account," "for services," and "for medicine," suggesting that Birch was in some way connected with the care of the horses used to operate the rolling mill. Indeed, the July 20th entry, for one dollar ("Bob Birch on account"), is followed immediately by the July 22nd entry, for eight cents, "Ferriage for the hostler [horse groom or stableman]." The Birch entries were duly recorded and then later crossed out on the final quarterly accounts, for reasons unknown. This places a Birch in the Mint but says nothing about engraving dies in 1792.

Philadelphia city directories reveal only a Mathias Birch (alternately rendered "Matthew Burch"), "ship joiner" during the period of interest. From these scant records in the 1790s, the record is silent on the identity of Birch until 1843. In that year, Jonas McClintock, melter and refiner at the Mint, wrote the following in reference to 1791 and 1792 Washington cents, in the *Pittsburgh Morning Chronicle*:

"...Mr. Jno. Harper, (an extensive manufacturer of saws), then located on the corner of Sixth and Cherry streets, caused dies to be engraved under the direction of Mr. Robt. Birch, and which were it is believed, executed, by a German artist in his employment, with the exception of the *lettering*, which in all probability was done by himself."

McClintock (1808-1879) was almost certainly reciting oral history, and his most likely source was the retired Chief Coiner Adam Eckfeldt, who maintained an office at the Mint until his death in 1852. McClintock (or Eckfeldt) was mistaken on the matter of the 1791 Washington cents, as R. W. Julian, writing in *Seaby's Coin and Medal Bulletin* (October and November, 1962), demonstrated these originated in Birmingham, England, not Philadelphia. That aside, "Robert Birch" now becomes a possible identity for the enigmatic Birch. Although McClintock did not specifically mention the Birch cents, Philadelphia was a small town, and likely supported only a single Birch in the die-sinking business.

Don Taxay, in *The U.S. Mint and Coinage* (1966) identified a "B. Birch" working out of New York in the 1780s:

"Birch had evidently come to America from England after the Revolution. On November 25, 1784, he advertised his work in the *New York Packet* as follows:

'Likenesses (simply imitative of the originals) are painted in crayons, at one guinea each; with elegant oval frames included. Seals and Copperplates, Cyphers, Crests, Toys, Trifles, &c. Engraved. Hair Devices set in Rings, Lockets, &c. Watches Repaired: And any wheel, Arbor, Pevot, Spring, Cock, Slide, Figure-piece, verge, &c. made new and fitted. Watch glasses at one shilling each, and a quantity to be sold cheap for ready cash. Any curious Punch or Instrument made in steel, iron brass, &c. By B. Birch, from London.'

Note that "Robert Birch" is not specifically identified in the *Packet*, only "B. Birch." Taxay suggests the name "Robert 'Bob' Birch," and apparently felt that any qualified artisan with a closely matching name was a possibility. Taxay's suggestion is plausible but far from confirmed. Following Taxay, Carl Carlson took the next stab at identifying Birch in the March 1982 *Numismatist*. Carlson centered on William Russell Birch and apparently did not have access to the Birch autobiography discussed above. From there the trail stops and awaits the efforts of future researchers.

### 1792 Birch Cent (Judd-5) Roster

The Judd-5 Birch cent is represented by only two specimens. The present sale constitutes only the eighth opportunity in history to acquire an example of the variety at public auction and only the fifth chance to procure the present coin, which is considerably the finer of the two. This piece was long held by Donald G. Partrick, whose collection of 1792 patterns included an array of ultra-low population specimens. His collection will stand as one of unparalleled quality in the annals of American numismatics.

**1. MS61 Brown NGC.** 262.2 grains. San Francisco Collector (Stack's, 5/1946), lot 742; Theodore Grand (Stack's, 12/1947), lot 16, realized \$800; Hollinbeck Stamp and Coin Company private sale (1956); Norweb Collection (Bowers & Merena, 11/1988), lot 3395, realized \$59,400; Donald Groves Partrick Collection / FUN Signature (Heritage, 1/2015), lot 5505, realized \$564,000. **The present coin.**

**2. Fair 2 NGC.** 240.6 grains. Hollinbeck-Kagin (10/1958), lot 1392; Loe Lauder (William Doyle Galleries, 12/1983), lot 235, realized \$3,200; Stack's private treaty transaction (1983); Fritz Weber; Denis Loring; Stack's; Lemus Collection / Queller Family Part Two (Heritage Signature, 1/2009), lot 1501, realized \$86,250; Denis W. Loring and Donna Levin. This coin exhibits about half of the obverse lettering and is worn smooth on the reverse.

### Physical Appearance

Pleasing brown color highlights this well-detailed example of the Judd-5 Birch cent. There is a touch of softness in Liberty's curls and some strike weakness on the lettering to the right of Liberty. The protected areas of the obverse, among the letters and Liberty's hair, contrast nicely with the lighter fields. The obverse right field exhibits what appears to be, at first glance, a patchwork of light scratches. However, upon further examination, much of this disturbance is likely the result of a defective planchet. The planchet is centered and reveals sharp dentilation. The edge lettering reads TO BE ESTEEMED BE USEFUL \*, with the crucial single star distinguishing this from the more common Judd-4 Birch cent with the two star edge. Die alignment is 180 degrees (coin turn). The reverse is virtually perfect for the grade, with the slightly uneven engraving of ONE CENT adding to the charm of this exceptionally desirable specimen of the early Mint. NGC ID# BFH4, PCGS# 11014

## 1793 S-13 Liberty Cap Cent, VG10 Rarest First-Year Major Type

**3953** 1793 Liberty Cap, S-13, B-20, Low R.4, VG10 NGC. Specialists know that the Liberty Cap is rarest among the three major types of 1793 cents. Few examples were saved in better grades, perhaps because they did not stand out in commerce from their comparatively plentiful 1794 through 1796 Liberty Cap successors. This tan-brown example has sharp legends aside from minor softness on CENT. The surfaces are free from verdigris, and the only mentionable marks are a cluster of minute ticks below the I in LIBERTY and a small rim nick between the RI in AMERICA. Our EAC grade VG7. NGC ID# 223L, PCGS# 35489 Base PCGS# 1359

## 1794 S-48 Cent, VG Details Famous Starred Reverse

**3954** 1794 Starred Reverse, S-48, B-38, R.5 — **Environmental Damage** — PCGS **Genuine. VG Details.** Henry Chapman discovered the Starred Reverse large cent about 1877 or 1878. Since that time, collectors have spoken in awe of the variety, one of the keys to a complete Sheldon numbered collection of 1794 large cents. Although perhaps as many as 70 of these coins are identified today, they remain extremely popular and enjoy a separate listing in the *Guide Book of United States Coins*.

Like most surviving examples, this one has stronger obverse details, retaining a completely outlined Liberty with most of the lower hair strands still present. The reverse has a nearly complete border with most of the stars still visible, while the interior wreath details and lettering are partially visible. The steel-brown and tan surfaces exhibit minor corrosion that is scattered over both sides. Our EAC grade AG3. NGC ID# 223P, PCGS# 35705 Base PCGS# 1374

**1795 Liberty Cap Large Cent**  
**MS62 Brown**  
**Popular Plain Edge, S-78, Ex: Husak**

**3955** 1795 Plain Edge, S-78, B-8, R.1, MS62 Brown PCGS. Ex: Husak Collection. Several sets of weak clash marks are visible. Breen suggests that all clash marks are gone and the dies are polished, giving the surfaces a prooflike appearance that is seen here. Either the dies re clashed, or the die polishing procedure did not remove them entirely. Minor die buckling is visible in the right obverse field. The date and LIBERTY are closely spaced. ONE CENT is centered in the wreath and widely separated. The obverse appears only on S-78. The reverse appears only on S-78. The surfaces are glossy and retain nearly full cartwheel luster with slight reflectivity in the fields. Both sides have numerous tiny prestrike planchet nicks, and only a few other blemishes. Pleasing tan color with splashes of darker brown and minor reddish stains.

Sheldon-78 is a common variety that is usually available in all grades, although Mint State coins can be elusive. According to Breen, reverse F (S-78) is "a Gardner die copying reverse C." Reverse C is found on S-76b. If Breen is correct, Gardner's talents were poorly utilized copying the work of others. Our EAC grade AU55.

Ex: M.A. Brown (*Chapman Brothers*, 4/1897), lot 764; Ed. Frossard; Allison Jackman (*Henry Chapman*, 6/1918), lot 704; S.H. Chapman; later, Frank H. Masters, Jr. (*RARCOA*, 5/1971), lot 88; Milton Bentley; *Stack's* (3/1986), lot 1017, \$3,520; Anthony Terranova; Herman Halpern; Denis W. Loring (5/1986); Robinson S. Brown, Jr. (*Superior*, 1/1996), lot 111, \$7,975; The obverse and reverse are illustrated in Noyes (2007); Husak Collection (*Heritage*, 2/2008), lot 2081, where it brought \$16,100. NGC ID# 223T, PCGS# 35729 Base PCGS# 1380

**1803 Cent, MS63 Brown**  
**Small Date, Small Fraction, S-254**

**3956** 1803 Small Date, Small Fraction, S-254, B-13, R.1, MS63 Brown PCGS. CAC. Breen Die State IV. Sheldon-254 is readily identified by the heavy die crack through the bust tip. This is a lustrous light chocolate-brown Draped Bust cent that has glimpses of faded Mint pumpkin-gold within the reverse legends. Minor strike-throughs distributed on the right obverse and on the upper right reverse quadrant are of Mint origin, as is a small depression near the obverse rim at 8 o'clock. Contact is limited to faint ticks on the neck and on the reverse near 1 o'clock. Nicely struck, and a desirable type coin in such exemplary grade. Our EAC grade AU53.

Ex: West Palm Beach Signature (*Heritage*, 6/2008), lot 54. NGC ID# 224G, PCGS# 36377 Base PCGS# 1482

**1804 S-266 Cent, VF30  
Obverse and Reverse Breaks**

**3957** 1804 S-266, B-1, R.2, VF30 PCGS. The obverse die is broken over RTY and the reverse die is broken over MERI on this late die state 1804 cent. One of the three keys to the early cent series, the 1804 is the second rarest Draped Bust issue behind the 1799. Typical examples that appear in the market place are quite low grade and rather undesirable. Close examination reveals slightly rough surfaces with a few minor scratches. However, this piece has exceptional sharpness. Splashes of golden-tan color appear on the high points, accompanying the otherwise deep steel-gray surfaces. Our EAC grade Fine 12. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

**1852 N-8 Cent, MS66 Red  
Finest Known of the Variety**

**3958** 1852 N-8, N-19, R.2, MS66 Red PCGS. Grellman Die State b, early, with an extremely faint die crack from the rim to the lower hair curl just left of star 13. Although Grellman notes that high grade examples of this variety exist from a small hoard, the current population data clearly shows the rarity at the highest grade levels.

This amazing Premium Gem exhibits brilliant orange mint luster on both sides with a single dark toning spot (not carbon) on each side that will serve as pedigree markers. This piece is visually finer than the best of Ted Naftzger's coins, a PCGS MS65 Red that Grellman and Noyes each call finest known. Our EAC grade MS66.

Population: 3 in 66 Red, 0 finer (6/16), for all 1852 varieties. PCGS# 147252 Base PCGS# 1900

## PROOF LARGE CENTS

**1822 N-4 Cent, PR62 Brown  
Probably Unique in Proof**

**3959** 1822 N-4, R.8 in Proof, PR62 Brown PCGS. According to Denis Loring, who is tracking proof large cents, there are five different die varieties of 1822 that are known in proof, with a total population of only 10 to 12 examples for all five varieties. Newcomb-2, 4, and 8 are likely unique, N-6 might be unique or possibly two are known, and N-10 has a population of five or six proofs. Loring notes a second proof of this variety appeared in W.E. Woodward's December 1882 sale, but that coin has never reappeared, suggesting it may be the same as this piece.

This distinctive piece exhibits rich golden-olive surfaces with wispy bluish overtones and excellent eye appeal. Although not deeply mirrored, the fields are clearly reflective and the design elements are extremely sharp, much more so than on circulation strikes. Our EAC grade PR60.

Ex: Joseph J. Mickley (J.W. Haseltine, 1/1879), lot 2020; Richard Winsor (Chapman Brothers, 12/1895), lot 919; Charles Steigerwalt; Charles M. Williams (Abe Kosoff, 11/1950), lot 312; Willard C. Blaisdell; R.E. Naftzger, Jr. (9/1976); Del Bland; Eric Streiner; Twin Leaf Collection (Stack's, 7/2015), lot 2093. PCGS# 533806 Base PCGS# 1774

**1845 N-14 Large Cent, PR64 Brown  
From John Pittman's Cased Proof Set  
Previously from the Anderson Dupont Sale**

**3960** 1845 N-14, High R.6, PR64 Brown PCGS. CAC. The 1845 N-14 cent is a proof-only variety that shares a reverse die appearing in several different years. When David Akers described this coin, he noted that it is a "Very Choice Proof, a virtual Gem." PCGS concurs with their PR64 Brown grade, and we are just as fond of this piece as was Akers. When John Pittman assembled his 1845 proof set, he purchased all three gold coins from a single source, the "Memorable" sale of 1948. With those coins in place, he acquired the silver and copper coins from various sources. Pittman paid a total of \$1,041 for the 10 coins that were all purchased between 1946 and 1954. The set realized \$756,250 in 1998.

This near-Gem proof cent has considerable bright to faded mint red on each side with delicate blue overtones. A small spot on the point of the bust, and another below the diagonal of the N in ONE confirm the pedigree of this splendid cent. Our EAC grade PR63.

Ex: Charles Dupont; Anderson Dupont Sale (Stack's, 9/1954), lot 859; John Jay Pittman (David Akers, 5/1998), part of lot 1711. PCGS# 397605 Base PCGS# 1964

## CONFEDERATE STATES OF AMERICA

### 1861 Copper Restrike Confederate Cent PR64 Brown

**3961** 1861 CSA Cent, Copper Restrike PR64 Brown PCGS. Original Confederate cents continue to be one of the most debated and misunderstood areas in numismatics. The restrikes, less so. Whenever one chooses to believe Originals were struck, the production of Restrikes obviously followed them. The story, as we understand it, is John Haseltine and John Colvin Randall purchased the original dies from engraver Robert Lovett. Their intent was to strike 500 copper impressions, but the collar broke on the 55th coin. Restrikes are distinguished from Originals not only by the difference in metallic composition, but the presence of a die crack along the right side of the wreath on the reverse. A common tale is Restrikes all show a weak L on the cotton bale because Haseltine and Lovett used less pressure to produce the Restrikes. That does not appear to be the case on this coin, which shows a deeply impressed L. The surfaces are pleasing chocolate-brown with occasional hints of blue interspersed.

*From The Elbert Henry Gary Collection, Part II.* NGC ID# 2C4Z, PCGS# 340405

## INDIAN CENTS

### 1877 Cent, MS65 Red and Brown Considerable Red Surrounding the Devices

**3962** 1877 MS65 Red and Brown PCGS. In 1877 there was a glut of minor coinage in the country in 1877, which explains why there were no three cent nickel or five cent nickels struck in 1877 or '78. There was also minimal need for cents, but 852,500 pieces were struck. Not much attention was paid to mintages at the time, and few Uncirculated cents were set aside. It wasn't really until the No Cents nickels were struck in 1883 that the public first noticed regular issue coins and set aside considerable numbers of them. This is an attractive Red and Brown example that shows the devices outlined in red and medium brown elsewhere. The planchet shows the streakiness commonly seen on this year. The strike is strong throughout and there are no noticeable abrasions. Population: 75 in 65 Red and Brown, 5 finer (7/16). NGC ID# 2284, PCGS# 2128

**1891 Cent, MS66+ Red  
Top-Grade Registry Coin**

**3963 1891 MS66+ Red PCGS.** A rare top Condition Census full Red example of this otherwise plentiful Indian cent issue. The strike is sharp, and the frosty surfaces display luminous copper-orange luster. No obvious evidence of carbon spotting or other blemishes are seen. The 1891 Indian cent is readily available in toned condition, and full Red examples are usually accessible through MS65. But Premium Gem Red coins are rare. This piece is tied for the finest at either service. It is also the finest we have ever offered at auction, even if only by the margin of the Plus designation. Population: 15 in 66 (3 in 66+) Red, 0 finer (6/16). NGC ID# 228K, PCGS# 2180

**1901 Cent, MS67 Red  
Ideal Indian Type Coin**

**3964 1901 MS67 Red PCGS.** 30th Anniversary Green Label Holder. An apricot-gold representative with potent luster and unabraded fields. The strike is crisp except for minor blending on the right half of the shield. The sole post-strike imperfections are a minute fleck on the first A in AMERICA and wispy contact on Liberty's face. The 1901 cent has a mintage just shy of 80,000,000 pieces, but time has taken its toll, and full Red Superb Gems are very rare. Unsurpassable, and ideal for the competitive Registry holding. Population: 5 in 67 Red, 0 finer (6/16). NGC ID# 228W, PCGS# 2210

## PROOF INDIAN CENT

### 1864 Bronze Cent, PR64 Red and Brown Very Rare L on Ribbon Variety Snow-PR2

**3965** 1864 L On Ribbon PR64 Red and Brown PCGS. Snow-PR2. The proof 1864 L on Ribbon is the greatest *Guide Book* rarity of the Indian cent series, more elusive than either the Snow-1 1888/7 or 1873 Doubled LIBERTY. The traditional proof mintage is just 20 pieces, though the *Guide Book* places a plus sign after that figure, as it does with all bronze proof issues prior to 1874. NGC has certified just six examples in all grades. For many years, only one die variety (Snow-PR2) was associated with proofs, identified by a "long raised die line on neck ... just below the jaw" as described by Snow. Breen was the first to describe the diagnostic spine, in his 1977 *Proof Encyclopedia*. In 1984, he confirmed the existence of another die marriage (Snow-PR1) without the spine. In Rick Snow's 1859-1859 *Attribution Guide*, he lists seven specimens known for Snow-PR1, another 10 for Snow-PR2, and a presently unique example of Snow-PR3, which per Snow, "set a [then]-record price for any small cent when it sold in Heritage's June 2002 Long Beach sale for \$132,000."

The present specimen may be #6 in Snow's PR2 roster, the "East Coast collection" coin "said to have been acquired in the 1950s." It has an obverse fleck of carbon at 3 o'clock that would identify it from a quality photograph. The strike is intricate and the reflective fields display only minimal carbon, including a small spot at the center of the third headdress feather. The obverse is orange-red, the reverse more yellow-gold, and both sides are only slightly mellowed. An important opportunity to acquire this formidable rarity. NGC ID# 229G, PCGS# 2280

## LINCOLN CENTS

### 1909-S VDB Lincoln Cent, MS66+ Red CAC-Endorsed Premium Gem Rarity

**3966** 1909-S VDB MS66+ Red PCGS. CAC. The 1909-S VDB is an object of great desire in the Lincoln cent series, and its popularity even transcends the confines of that collector market. High-grade examples are often found among the holdings of rare coin investors, and key date accumulators almost always include a representative of this famous San Francisco issue. It is ranked 19th in Garrett and Guth's *100 Greatest U.S. Coins*, third edition.

The present example is a rare Plus-graded Premium Gem with full copper-gold luster. Red examples of this date are exceedingly rare any finer and such pieces are far out of reach for most collectors. This coin possesses tremendous eye appeal with glowing surfaces and a sharp strike. A superb example of the date. Population: 17 in 66+ Red, 14 finer. CAC: 29 in 66, 2 finer (6/16). NGC ID# 22B2, PCGS# 2428

## 1909-S VDB Lincoln Cent, MS67 Red Sought-After Key Date Tied for Finest at PCGS

**3967 1909-S VDB MS67 Red PCGS.** By the early years of the 20th century, Victor David Brenner, a native of Latvia who immigrated to the United States in 1890, had developed a reputation as a talented engraver. He was chosen to design silver medal issued by the American Numismatic and Archaeological Society to commemorate the 1902 visit of Crown Prince Heinrich of Prussia, produced a rectangular plaque of the navigator Amerigo Vespucci in 1903, and in 1907 created a round medal and rectangular bronze plaque of Lincoln in observance of the upcoming centennial of the slain president's birth.

Soon afterward Brenner proposed a design for a Panama Canal medal depicting Theodore Roosevelt. Roosevelt viewed the design favorably and chose Brenner to execute it. While posing for the medal, the two developed a rapport. Roosevelt particularly admired Brenner's Lincoln plaque design. Keep in mind, this was at a time when his "pet crime" of a coinage redesign was under way, showing preference for outside artists at the expense of Charles Barber.

By January 1909, Roosevelt had agreed for Brenner to design a portrait of Lincoln for an as-yet-unspecified denomination. Brenner proposed the cent, as quoted in *The Numismatist*:

"You see the life of a coin is 25 years, according to law, and the time for the cent and the five-cent piece has expired. It seemed to me that the nickel already had a very practical design, and so I turned my attention to what would be most fitting for the one-cent coin."

Roosevelt left office before the Brenner cents circulated. New dies were expected in the spring of 1909, but newly inaugurated President William Howard Taft suggested the addition of the motto IN GOD WE TRUST on the obverse (reminiscent of Saint-Gaudens' double eagle). There was also confusion about the presence of Brenner's name, V.D. BRENNER, on the obverse. Mint Director Frank Leach deemed it obtrusive, and Brenner changed the design to display his full name, BRENNER, spelled out along the lower reverse rim in tiny script letters.

Apparently, that was still too much for Charles Barber to handle. Roger Burdette explains that Barber "first made a galvano of Brenner's reverse model then cut a master hub (raised design) on the Janvier reducing lathe. He then carefully ground off the raised word BRENNER and struck a master die (raised design)" into which the chief engraver manually cut the V.D.B. initials.

Once production of the new design had begun in July 1909, the Philadelphia Mint struck some 28.4 million business strikes and San Francisco 484,000 pieces before the decision was made to remove even the small VDB initials. The rampant rumors that the Mint would recall the coins proved untrue, but both the P- and S-mint cents were much hoarded as a result. The popularity of the San Francisco Mint issue remains unabated today and the 1909-S VDB is still the most sought-after issue of the series.

This spectacular Superb Gem exhibits impeccably preserved original red surfaces, with blazing mint luster and no trace of carbon. The design elements are sharply detailed throughout and the all-important designer's initials are bold. This coin possesses a combination of high technical grade, outstanding eye appeal, and tremendous historical significance. It should find a home in the finest collection or Registry Set. Population: 14 in 67 Red, 0 finer (7/16). NGC ID# 22B2, PCGS# 2428

## 1914-D Lincoln Cent, MS65 Red Sought-After Key Issue

**3968 1914-D MS65 Red PCGS.** The 1914-D Lincoln cent claims a low mintage of 1.1 million pieces. Unfortunately, the issue was largely overlooked by contemporary collectors and few high-quality examples were saved at the time of issue. The 1914-D became highly sought-after in the 1930s, when the advent of coin albums made its elusive nature well-known. By then, most examples had circulated extensively and few would grade better than Fine-Very Fine by today's standards.

The present coin is a delightful Gem, with original red surfaces that show no mentionable flaws. Vibrant mint luster radiates from both sides and three microscopic specks of carbon show on the reverse. The design elements are sharply detailed throughout and eye appeal is terrific. Population: 70 in 65 (7 in 65+) Red, 6 finer (7/16). NGC ID# 22BH, PCGS# 2473

## 1925-S Cent, MS65 Red A Top-Tier Registry Coin

**3969 1925-S MS65 Red PCGS.** The 1925-S, even when full Red, is often represented with subpar eye appeal. As a result, pieces graded as Red are typically low grade. This Gem Red coin is a rare exception. It is among the finest certified, and the eye appeal exceeds normal expectations for this issue. The coin is boldly struck from fresh dies, not showing metal flowlines or blurry design elements from die wear. The surfaces are satiny and show rich copper-red color. Carbon flecks are faint and only a few are present. The overall visual impression is exceptional considering this date's reputation. This piece is a full grade point finer than the coin in the current highest-rated Registry Set. A must-have coin for the Lincoln cent specialist. Population: 11 in 65 Red, 0 finer (6/16). NGC ID# 22CH, PCGS# 2566

## PROOF LINCOLN CENTS

### 1909 VDB Cent, PR66 Red Among the Finest of This Rare Issue

**3970 1909 VDB PR66 Red PCGS Secure.** The 1909 VDB proof has long been regarded as the undisputed key to the matte proof series. This is somewhat curious since the mintage was 1,194 proofs for the VDB and only 600 proofs for the 1916. But a quick glance at population numbers shows that less than half of the total number of VDB proofs have been certified compared to 1916 proofs. Undoubtedly, collectors were unfamiliar with the new matte finish in 1909. They were the first minor coins to be struck with the new matte finish. Undoubtedly many were spent. Seven years later more collectors were familiar with the finish and saved the coins. Survivors are rare, especially so with full red luster. PCGS has only certified seven coins (minus resubmissions?) in PR66 Red, and a paltry two pieces are finer (7/16). Another reason for the low survival of matte proofs is common to all dates in the series — proofs were wrapped in sulfur-laden tissue paper in the Mint. Who knew at the time this would make the coins brown? Many collectors who did set aside their minor proof sets kept the coins in the original tissue paper. It was only the coins that were removed from the paper and then carefully preserved that retained their original red color.

The surfaces of this piece are truly extraordinary. Most of each side is bright, original orange-red, while the margins are cherry-red. Strike definition is nothing like a business strike, making proofs distinctively different. The rims are also high and squared off with sharp delineation between the rims and fields. This key date will bring a surprisingly high price, but waiting for another will only result in paying even more for the next one — and who knows when that will be?

***From The Wright Collection, The #3 Finest All-Time PCGS Registry Set of Matte Proof Lincoln Cents.*** NGC ID# 22KR, PCGS# 3302

## 1909 'Plain' Lincoln Cent, PR67 Red Bright, Original Mint Luster

**3971 1909 PR67 Red PCGS Secure. CAC.** After the VDB initials were removed from the lower reverse, another 2,618 proofs were delivered from the Medal Room to the Coin on August 17, 1909. As one would expect from a much higher-mintage issue (than the VDB), there are significantly more proof "Plain" cents that exist in all grades. This is especially noticeable in PR66 and better condition. Still, in PR67 Red this is the one of only five PR67, there is one Plus-graded coin, and one PR68. The collector who assembled this set definitely set the bar as high as possible before calling his set complete. As with the VDB proof above, this piece also has high, squared-off rims around each side. Much of the obverse retains bright orange-red color, especially on the left side with deeper, not-quite-cherry red on the right side. The reverse has a light overlay of deeper red color with orange glowing just beneath. Remarkably struck and just as remarkably preserved.

**From The Wright Collection, The #3 Finest All-Time PCGS Registry Set of Matte Proof Lincoln Cents.** NGC ID# 22KS, PCGS# 3305

## 1911 Matte Proof Cent, PR66+ Red The Finest Certified of This Date

**3972 1911 PR66+ Red PCGS Secure.** The mintage for 1911 proof cents was 2,411 pieces. Like all other dates in this series, the number of full Red proofs is woefully inadequate compared to the demand for such pieces. To repeat a story told before, this is because of the way the Mint packaged the coins, wrapped in sulfur-laden tissue paper. The sulfur reacted with the copper and turned most of the proof cents brown. This is an interesting study coin. The obverse has very fine grains in the matte finish, while the reverse shows a much more pronounced pebbly surface. The strike details are extraordinarily sharp with no areas of weakness on either side. The color is even from side-to-side with yellow tinted orange-red surfaces. This is the finest 1911 certified. The Plus gives it an edge over the other 11 PR66 proofs certified by PCGS.

**From The Wright Collection, The #3 Finest All-Time PCGS Registry Set of Matte Proof Lincoln Cents.** NGC ID# 22KU, PCGS# 3311

### 1913 Lincoln Cent, PR67 Red Tied for Finest

**3973 1913 PR67 Red PCGS Secure. CAC.** Production of matte proof Lincoln cents was high in 1913, with 2,983 pieces produced. Most likely this was from demand for the new Buffalo nickel. The two coins were paired together in minor proof sets, and demand for the nickel drove production of the cent. Like the 1911 above, the surface finish from side-to-side varies considerably. The obverse has a coarser granularity than in previous years, while the reverse is even coarser still. When one examines matte proofs over a period of years it is remarkable how much variance there is from year to year, sometimes from one batch to another in a given year, and in this case from one side of the coin to the other. This is another spectacular example of a full Red matte proof, the common theme of this collection. The obverse is even red, the reverse is lighter with a tinge of lilac or olive. Pinpoint strike definition throughout. Population: 7 in 67 Red, 0 finer. CAC: 2 in 67, 0 finer (7/16).

***From The Wright Collection, The #3 Finest All-Time PCGS Registry Set of Matte Proof Lincoln Cents.*** NGC ID# 22KW, PCGS# 3317

## 1914 Matte Proof Lincoln Cent, PR68 Red One of Only Three So Graded in the Series

**3974 1914 PR68 Red PCGS Secure.** This coin originated from a five-piece 1914 proof set. It is an incredible Lincoln cent that is absolutely stunning with flawless surfaces, tied for the finest of its kind. PCGS has only certified one other 1914 Lincoln cent as PR68 Red. In fact, the only other date in the matte proof Lincoln series to receive a PCGS PR68 Red grade is a single 1909 example. Only one glance at this amazing coin is required to recognize its unique status among its peers — it is one of the finest surviving matte proof Lincoln cents.

Almost all extant matte proof Lincolns have various shades of brown or red and brown color, often with strangely wonderful iridescent toning. Only about one-fourth of all matte proof pieces submitted to PCGS have received the Red designation, including all grades and dates. Consider that full Red pieces are most likely to be submitted or resubmitted, and this fact is even more impressive.

This specimen's outstanding technical quality and amazing aesthetic appeal are a combination of perfect strike and brilliant pale orange mint color, exactly as it left the dies. The surfaces have the typical pebbly matte quality associated with original, unimpaired examples. Splashes of deeper orange at the obverse and reverse borders enhance its overall appearance.

Our consignor from this coin's 2008 appearance noted that he purchased an entire 1914 proof set from a Bowers and Merena auction just to acquire this cent. It appears to be from the January 1989 Bowers and Merena auction of the Estate of Byron F. Johnson, Jr. Ex: *Central States Signature* (Heritage, 4/2008), lot 2249, where it brought \$126,500.

**From The Wright Collection, The #3 Finest All-Time PCGS Registry Set of Matte Proof Lincoln Cents.** NGC ID# 22KX, PCGS# 3320

### 1916 Lincoln Cent, PR66 Red Only Two Others So Graded, None Finer

**3975 1916 PR66 Red PCGS Secure.** The 1916 was the final year of issue for this short-lived series. Only 600 proofs were struck and very few were saved in Gem or finer condition. To put together a set, the path of least resistance would be to seek out colorful Red and Brown coins. This collector did not do that. With an unerring eye for quality and originality he only pursued full Red matte proofs. And from 1916, there are precious few of those that remain. PCGS has only certified three pieces PR66 Red, and none are finer (7/16). This example displays rich cherry-red color on the obverse with a contrasting bright orange-red reverse. Other than the original color and high grade, another aspect that immediately strikes the viewer is the absolutely complete strike definition over each side. Few collectors can complete a set of matte proof Lincolns, and this is a highly ranked Registry Set coin.

**From The Wright Collection, The #3 Finest All-Time PCGS Registry Set of Matte Proof Lincoln Cents.** NGC ID# 22KZ, PCGS# 3326

### 1938 Cent, PR67 Red Cameo Starkly Contrasted

**3976 1938 PR67 Red Cameo PCGS. CAC.** Dusky peach and reddish hues appear in the border regions of this otherwise copper-orange Superb Gem proof Cameo. The strike is full, and the preservation is outstanding. There is no carbon spotting, and both sides have uncommonly prominent cameo contrast. Red Cameo examples of the 1938 proof Lincoln cent are scarce, and examples grading this fine are rare. This piece is tied for the finest at either service, a strong Condition Census Registry coin with unsurpassed quality and eye appeal. The Registry enthusiast should not let this piece pass by. Population: 3 in 67 Cameo, 0 finer (6/16). NGC ID# 22L5, PCGS# 83341

## TWO CENT PIECE

**1872 Two Cent, MS64+ Red  
Full Red Rarity and Key Date**

**3977 1872 MS64+ Red NGC.** The 1872 is the key date to the circulation strike two cent series. The two-cent denomination was struck for only eight years and remains an often overlooked series among collectors. Many of the dates are quite rare in high grade but can still be acquired for reasonable prices. The 1872 is among the few true challenges to a complete set. This issue is rare in any full Red grade. The present coin displays semireflective fields with copper-gold and reddish hues. The strike is needle-sharp, and the preservation rivals that of many Gem-graded coins. A scattering of minor flecks on the reverse may account for the grade. Census: 2 in 64 (1 in 64+) Red, 2 finer (6/16). NGC ID# 22NG, PCGS# 3614

## PROOF TWO CENT PIECE

### 1864 Proof Two Cent, PR62 Red and Brown Rare Small Motto Issue

**3978 1864 Small Motto PR62 Red and Brown PCGS. FS-401.** Offered here is a landmark coin with a rarity and desirability that cannot be overemphasized. Perhaps 1,000 or so proof two-cent pieces were struck in 1864 (some sources errantly report just 100 proofs), and nearly all were the Large Motto type. Few were the Small Motto type, and estimates place the number of survivors at less than 20 pieces. This issue is part of a trio of proof rarities from the decade that also includes the 1864-L Indian cent and the 1867 Rays Shield nickel.

The two cent piece was hardly a new concept when it first appeared in 1864. Proposals for just such a denomination were made in Congress on two previous occasions, in 1806 and 1836. The second proposal included pattern issues that are highly collectible today. These first two proposals recommended coins of billon, a combination of copper and silver, but it was shown that such a combination was not practical, for it was easily imitated. The third proposal was initiated by the Mint, rather than by Congress. Mint Director James Pollock was successful with his bid, and the denomination was authorized by the Mint Act of April 22, 1864. This was the same legislation that authorized a change in the composition of the Indian cent, from copper-nickel to bronze.

The initial two-cent coins of 1864 included proofs and business strikes from the Small Motto dies, called prototype dies by Breen. In his *Complete Encyclopedia*, Breen noted that proof examples have ER of AMERICA doubled, although such a characteristic is not visible on this example. Although certified at a lower numeric grade, this example is a splendid proof with excellent eye appeal. Both sides have light hairlines and minor spots, but do not have any individually distracting blemishes. The fields are nicely mirrored with lustrous devices that provide a hint of cameo contrast. Both sides have pale orange mint color that is just beginning to acquire attractive brown toning. For the collector or dedicated specialist of two-cent coinage, this proof 1864 Small Motto piece is a coin for the ages. Housed in a first generation holder. Population: 1 in 62 Red and Brown, 6 finer (6/16).

*Ex: The Antigo Collection / Denver Signature (Heritage, 8/2006), lot 5078, which realized \$40,250.*

**From The Collection of Richard W. DeRobertis.** NGC ID# 274S, PCGS# 3625

## PROOF THREE CENT SILVER

**1856 Three Cent Silver, PR66  
Phenomenal Eye Appeal  
Tied for Finest Certified**

**3979 1856 PR66 PCGS Secure. CAC.** Breen originally thought that 30 to 40 1856 three cent silver proofs survived. It now seems likely that more than 40 but fewer than 50 specimens are extant. The discrepancy results from the lack of records kept before 1858, when the Mint began making proofs available to the public for face value. What is remarkable about this Premium Gem proof is that it is unquestionably among the finest known representatives. The fields are deeply mirrored with streaks of light reddish-russet patina over the centers on each side. Ice-blue toning encircles the margins, adding to the eye appeal. PCGS has only certified one other piece at this level with none finer (6/16). NGC ID# 27C3, PCGS# 3703

## SHIELD NICKEL

**1880 Shield Nickel, MS63  
Low-Mintage Key**

**3980 1880 MS63 PCGS.** From a series-low business-strike mintage of 16,000 pieces, the 1880 Shield nickel is an elusive issue in all grades. The coins were not needed in the national economy of the time and Mint Director A. Loudon Snowden struck a limited production run simply to satisfy collector demand. The exact number of business-strikes that have survived is open to question, as the same dies were used to strike proofs, and the two issues have often been confused over the years.

The present coin is an attractive Select specimen with sharply detailed design elements and well-preserved surfaces that show a few scattered, minor contact marks. Vibrant mint luster radiates from both sides and a few hints of pale gold toning add to the outstanding visual appeal. Population: 5 in 63, 15 finer (7/16).

**From The James E. Blake Collection.** NGC ID# 276E, PCGS# 3810

## LIBERTY NICKELS

### 1883 With Cents Nickel, MS67 The Ultimate Grade for This Scarce Issue

**3981 1883 With Cents MS67 PCGS.** It is difficult to write about the With Cents 1883 nickel without mentioning its predecessor, the No Cents nickel. After the fiasco of issuing a coin with no denomination, the word CENTS was placed at the bottom of the reverse and E PLURIBUS UNUM was dropped. The No Cents nickels were saved in large numbers because of the contemporary rumor that the Mint was planning on recalling them. Far fewer With Cents nickels were saved. MS67 is the ultimate grade at both services. This is a splendid coin that shows an interplay of lilac-green and rose patina with strong underlying mint luster. There are no observable abrasions. Population: 6 in 67, 0 finer (7/16). NGC ID# 22PH, PCGS# 3844

### 1885 Liberty Nickel, Rose-Gold MS66+ Engaging Luster

**3982 1885 MS66+ PCGS.** Fairly uniform rose-gold patina enlivens surfaces that dance with engaging luster and show near-immaculate preservation on this Premium Gem key-date Liberty nickel. The strike is extremely well brought up even on the lower-left wreath ear of corn, and only a small dark tick shows on Liberty's neck, not at all consequential. A virtually unimprovable example. This key-date Liberty nickel is conditionally scarce this fine, and higher-grade pieces are exceedingly rare. The Registry Set collector should give this coin close attention. Population: 34 in 66 (4 in 66+), 3 finer (6/16). NGC ID# 2773, PCGS# 3846

## BUFFALO NICKELS

**1886 Liberty Nickel, MS66  
None Are Finer**

**3983** 1886 MS66 PCGS. While the 1885 is the higher-visibility coin in the series, the 1886 is of nearly equal scarcity — and its rarity exceeds that of its more famous counterpart in Gem or finer grades. This Premium Gem example shows sharply defined features in all areas, including a moderate amount of detail on the ear of corn at the lower left portion of the wreath, as well as entirely sharp centers on the obverse stars. A thin veil of silver-gray toning covers each side with glowing, satin-like mint luster underlying the light layering of color. The present coin is an exceptionally well-preserved example with lovely, problem-free surfaces. Population: 9 in 66 (2 in 66+), 0 finer (6/16). NGC ID# 277U, PCGS# 3847

**1916 Doubled Die Nickel, Choice AU  
Nicely Toned, Good Remaining Luster**

**3984** 1916 Doubled Die Obverse, FS-101, AU55 PCGS. CAC. Pulling no punches, David Lange in *The Complete Guide to Buffalo Nickels* calls the 1916 doubled die “one of the most desirable varieties in this or any series.” The overall popularity of the Buffalo nickel series among collectors as a whole only serves to compound the desirability of the 1916 doubled die, by far the series key for any collection that includes varieties. While still not as well-known as the 1937-D three-legged — and what other U.S. coin variety is? — the 1916 doubled die is immeasurably rarer in any grade. The number of certified 1916 doubled dies at both NGC and PCGS, in all grades, just a few percent of the number of 1937-D three-legged nickels. This is an especially attractive, well-struck example of this key Buffalo nickel. Much luster remains on each side and there is significant gray and blue patina throughout. Population: 20 in 55, 11 finer. CAC: 5 in 55, 6 finer (6/16).

Ex: *FUN Signature* (Heritage, 1/2012), lot 3087. NGC ID# 2TSS, PCGS# 145628 Base PCGS# 3931.

From the Craig and Jeff Lehrer Collection.

### 1926-S Buffalo Nickel, MS64 Well-Preserved Condition Key

**3985 1926-S MS64 PCGS.** The 1926-S is a key primarily because of its low mintage (970,000 pieces, the smallest in the series). But the availability of Mint State examples is also noticeably less than that of many other dates from this period. Above MS64, this issue is genuinely rare. PCGS and NGC have each seen only 14 submissions in MS65 and finer (6/16). This near-Gem remains accessible for collectors but possesses surface quality that rivals that of some Gem-graded coins. The strike is slightly soft overall but still above-average for a branch mint issue from the 1920s. Satiny, champagne luster emits overtones of orange-gold and lavender, giving this piece pleasant eye appeal. NGC ID# 22S7, PCGS# 3959

*From the Craig and Jeff Lehrer Collection.*

### 1937 Nickel, Rare MS68 Top-Grade Registry Coin

**3986 1937 MS68 PCGS.** Only a few dates in the Buffalo nickel series are known to exist in the lofty MS68 grade, and all are rare at this level. The 1937 is a common date in all lower grades, but in MS68, only eight pieces are certified by PCGS with none finer (6/16). With 160 different Buffalo nickel Basic Sets in the PCGS Set Registry, the supply of top-grade coins is blatantly insufficient for demand. The present piece is boldly struck and displays frosty, glowing mint luster. Wisps of lavender and champagne accent lovely ice-blue toning on each side. The preservation is virtually flawless. NGC ID# 22SX, PCGS# 3980

## PROOF BUFFALO NICKEL

### 1937-D Three-Legged Nickel, MS65 Lustrous and Attractively Toned

**3987** 1937-D Three-Legged, FS-901, MS65 PCGS. CAC. Only a single die pair produced the 1937-D Three-Legged Buffalo nickels, the variety constituting a small fraction of the generous total mintage of 17.8 million coins for 1937-D nickels. The Three-Legged Buffalos were discovered soon after their release from the Denver Mint, so there is a plentiful supply of examples, save for the higher Mint State grades. Other examples stayed in play for a perceptible length of time, as coin collectors steadily plucked more and more survivors from circulation. Today most certified examples fall within the VF20 to AU55 grade range, although collectors can even find lower-Mint State examples easily enough, if they are willing to pay the price for such a popular, in-demand variety. Above the MS62 grade level, however, the populations begin to thin out rapidly. At the Gem level, Three-Legged nickels are definite condition rarities. This is a highly attractive piece whose satiny luster glows through the lilac and rose toning seen over each side. A shallow mark across the upper lip of the Native American gives him a moustache, but the coin is so superior for the grade it still is well deserving of the CAC designation. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

### 1916 Nickel, Concentrically Toned PR68 Tied for Finest Known

**3988** 1916 PR68 PCGS. With a mintage of only 600 pieces, the 1916 is the scarcest issue in the matte proof Buffalo nickel series. It is also the rarest in Superb Gem condition. Pieces grading PR68 are extremely rare, and none are known finer. Our Permanent Auction Archives show only two previous appearances of a PR68 example, the last of which was sold in the December 2008 Houston Signature sale for \$43,125.

The present coin is visually superior to that example, showing concentrically laid multicolor hues that include olive, gold, rose, and lavender around ice-blue interiors. The strike is full, and the preservation is outstanding. This gorgeous matte proof will please even the most discerning collector. Population: 8 in 68, 0 finer (6/16). NGC ID# 278V, PCGS# 3993

## EARLY HALF DIMES

---

### 1792 Silver Half Disme, Judd-7 Famous Introductory Federal Issue

**3989** 1792 Half Disme, Judd-7, Pollock-7, R.4, PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VG specimen that has been damaged. The 1792 half dime is the source of many numismatic tall tales involving Martha Washington. Her silverware is said to have been melted to provide the bullion for the issue, and a famous painting by John Dunsmore depicts her inspecting the pieces. Another story has the half dimes delivered personally to President Washington, who then distributed the coins as gifts to friends and associates. We do know that in his annual address to Congress, Washington referred to the issue as "a small beginning in the coinage of half dimes, the want of small coins in circulation calling the first attention to them." The present example is lightly toned in stone-gray and russet shades. The legends are bold except for a well-worn OF AM. Pleasing aside from a dig on the left obverse field, which is apparent opposite near AMERICA, and causes a localized bend.

**From The GATOR Collection.** NGC ID# 946T, PCGS# 11020

## 1792 Half Disme, VF25 Judd-7, Pollock-7 First Circulating U.S. Coinage Issue

**3990** 1792 Half Disme, Judd-7, Pollock-7, R.4 VF25 PCGS. CAC. OGH. Frank Meyer begins his 1954 article, "The Coins of the U.S.: Symbols of a People," as follows: "Coins of the United States serve not only as a medium of exchange, but also as an expression of the ideals and aspirations of a people." Perhaps no issue in American numismatics better represents the "ideals and aspirations" of this country than the 1792 half disme.

President George Washington famously referred to the half dismes as "a small beginning" in the nation's coinage in his address on November 6, 1792. The production of half dismes was a critical step in asserting the sovereignty of the young United States, which had to that point relied entirely on a hodgepodge of Spanish, British and other world coins, and privately struck tokens. According Carl Carlson's March 1982 *Numismatist* article, "Birch and the Patterns of '92," Washington, Jefferson, and David Rittenhouse all favored production of half dismes as a practical solution to the coinage shortage plaguing commerce at the time. Carlson explains that it is impossible to say definitively why half dismes were preferred, but he speculates:

"... twice as many half dismes as dismes could be struck from a given quantity of silver, and in a period when the total cost of transporting a heavy balance scale from Eckfeldt's place to the Mint itself was only nineteen cents, a disme represented a larger denomination than was probably needed for relief of the coin shortage at the lower levels of the economy."

On July 13, 1792, Thomas Jefferson recorded in his account book that he had received "1500 half dimes of the new coinage." Researchers largely agree that the quantity represents the entire mintage for the issue. The surviving population varies widely in its level of preservation, from heavily circulated to virtually flawless, indicating two things. The coins were intended to meet the commercial needs of the period and were not struck as patterns, and many were saved as mementos of the nation's first coinage. Now, as then, collectors cherish these diminutive half dismes for their unparalleled historical significance.

The present specimen is quite attractive, with sea-green and iridescent toning in the obverse fields and grayish-orange on the devices. The obverse fields and design elements have numerous tiny scratches and abrasions, yet the natural coloration so effectively masks them that they can hardly be seen. The reverse fields are grayish-gold with iridescent toning, and numerous tiny imperfections underneath. This 1792 half disme provides a remarkable opportunity for the advanced numismatist—or the collector who just want to own an example of this historic issue. Housed in an old green label holder.  
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 6097; Milwaukee Signature (Heritage, 8/2007), lot 1599. NGC ID# 946T, PCGS# 11020*

## 1792 Judd-7 Half Disme, Flattened Long Ago Historic Early Federal Issue

**3991 1792 Half Disme, Judd-7, Pollock-7, R.4 — Flattened — PCGS Genuine.** The holder suggests “Flattened” as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the coin has the details of an XF specimen that has been flattened, with a minor planchet fissure as a result. The diameter of a half disme is approximately 17 mm, while a disme measures approximately 22 mm. This coin has a diameter of 20 mm. So, after flattening it was closer to the diameter of a disme than a half disme. Even more interesting, the diameter of a 1796 dime is 19 mm — almost exactly the size of this coin. It seems likely that over two centuries ago, this piece was placed between two pieces of leather, then meticulously (and lightly) struck with a mallet. When it was wide enough to pass as an early dime, the industrious maker had completed the task.

All that considered, this is an unusually pleasing half disme. The flattening does not appear to have materially affected the major design elements. The hair of Liberty and the eagle’s breast feathers are significantly stronger than one usually sees, leading us to the conclusion that the flattening must have occurred shortly after the coin was produced. There is a curved scratch through LF and to the eagle’s right (facing) wing, and there is also an area of planchet cracking on the lower left portion of the reverse. Otherwise, the surfaces are attractive for a 1792 half disme and the coin shows only the small marks one would expect. Both obverse and reverse are light gray with deeper gray accents in the recesses and brightness over the high points. All in all, this is a remarkable first-issue half disme, undoubtedly with an interesting story to tell. NGC ID# 946T, PCGS# 11020

## 1792 Judd-7 Half Disme, XF40 Attractive, Lightly Colored Surfaces

**3992** 1792 Half Disme, Judd-7, Pollock-7, R.4 XF40 PCGS Secure. More than 200 years of legend and myth surround the striking of the 1792 half dismes. A great deal of embellishment and outright fabrication seem to have been attached to these coins in the 1850s and 1860s. More than likely the greatest perpetuator of these legends and myths was Mint Director James Ross Snowden. Two of the more fanciful and widely held beliefs are that Martha Washington was the model for Liberty and the coins were struck from George and Martha Washington's silver tableware.

In 2003, Joel Orosz and Carl Herkowitz separated much of the fact from fantasy regarding these coins in a well-researched article in the ANS' *American Journal of Numismatics*. Much of what we know today was based on an obscure tipped-in note found in a European coin book in 1943. The signature was faded, but the authors identified the author as John McAllister, Jr. McAllister was a close friend of Adam Eckfeldt, a primary source for the half dismes, as he was present at their striking. The note read:

"In conversation with Mr. Adam Eckfeldt (Apr 9, 1844) at the Mint, he informed me that the Half Dimes above described, were struck, expressly for Gen. Washington, to the extent of One Hundred Dollars, which sum he deposited in Bullion or Coin, for the purpose. Mr. E. thinks that Gen. W. distributed them as presents. Some were sent to Europe, but the greater number, he believes, were given to friends of Gen. W. in Virginia. No more of them were ever coined. They were never designed as Currency. The Mint was not, at the time, fully ready for being put into operation. The Coining Machinery was in the cellar of Mr. Harper, saw maker, at the corner of Cherry and 6th Sts, at which place these pieces were struck."

While half dismes were struck for "friends of Gen. W. in Virginia" many of them were used as currency at the time. This is obviously one of them. The surfaces show even wear over the high points and attractive light rose-lilac patina. A few shallow field marks are obvious when closely examined, but not apparent when viewed at arm's length. None of the usually encountered planchet flaws interrupt the surfaces of this attractive XF example.

**From The Palos Verdes Collection, Part II.** NGC ID# 946T, PCGS# 11020

### 1794 V-4, LM-4 Half Dime, MS65+ Struck in 1795 The Eliasberg Coin

**3993** 1794 V-4, LM-4, R.4, MS65+ PCGS. CAC. In all grades, PCGS and NGC have certified 350 1794 half dimes and 1,016 1795 half dimes. That relationship is important, as it estimates the ratio of surviving examples of the two dates. Almost exactly one-fourth of certified Flowing Hair half dimes are dated 1794. If the two dates survived at the same rate, a likely assumption, then the original mintage of 1794 half dimes was one-fourth the total.

Many years ago, Walter Breen suggested that the 7,756 half dimes delivered on March 30, 1795 were dated 1794, and that all later deliveries were dated 1795. However, die state evidence suggests that examples of the present variety, LM-4, were struck after examples of 1795 LM-1 and LM-2. Therefore, it is impossible to state anything beyond the fact that all 1794 half dimes were struck in 1795. It is likely that the production of 1794 half dimes was slightly more than 20,000 coins.

This example has a prominent obverse die crack from the rim to star 2, curl 4, Liberty's cheek, nose, the right obverse field, and star 10 to the rim. The reverse exhibits two of the three die cracks mentioned in the Logan-McCloskey reference. The die state of this example is later than 1795 LM-1 that shares the same reverse, and equivalent to 1795 LM-2, also from the same reverse. Since those two 1795 varieties are quite rare, they were struck in limited quantities, leading us to speculate that the present example was probably from the delivery of June 12, 1795, or possibly from the July 30 delivery. Breen's hope of correlating die marriages with delivery figures has proven impossible, although certain generalizations may be made.

This impressive Gem 1794 half dime features a bold strike, showing sharply delineated hair detail, strong wing definition, and even some of the eagle's breast feathers. The surfaces are pristine with frosty luster beneath golden-brown toning on the obverse and sea-green toning on the reverse. Population: 9 in 65 (2 in 65+), 1 finer (6/16).

*Ex: Louis E. Eliasberg Estate (Bowers and Merena, 5/1996), lot 887. NGC ID# 22ZT, PCGS# 38584 Base PCGS# 4250*

## 1796 V-1, LM-1, Half Dime, Choice AU Popular LIKERTY Variety

**3994** 1796 LIKERTY, V-1, LM-1, R.3, AU55 NGC. The defective B in LIBERTY is the source of the hobby nickname for V-1. The Y is repunched, and the B is widely spaced from its neighbor letters. On the reverse, ICA and NI are also spaced too widely. Such foibles from the early U.S. Mint contribute to the interest that its coins command from modern collectors. This lightly circulated representative has a golden-brown and lavender-gray obverse. The reverse is principally cobalt-blue. The surfaces are pleasing despite a single thin field mark near star 12.

**From The GATOR Collection.** NGC ID# 22ZX, PCGS# 38596 Base PCGS# 94254

## 1796/5 Half Dime, MS63 Rare V-2, LM-2 Die Marriage Outstanding Original Color

**3995** 1796/5 V-2, LM-2, R.6, MS63 PCGS. Remnants of a 5 beneath the 6 in the date identify LM-2. This is the rarer of the two 1796 half dime varieties. The 1796 as a date is seldom seen in high grade, and the overdate variety is rare across the spectrum. PCGS has slabbed only 23 examples in all grades, 11 of which are designated Mint State. The R.6 rarity rating in Logan-McCloskey seems slightly high according to modern certification numbers, but the fact that this die variety is universally rare remains unchallenged.

The present Select Mint State example is softly struck on the central portrait and the eagle, but the eye appeal is nonetheless pleasing. The stars, dentils, and wreath are sharp, and the surfaces display satiny luster. Original lavender-gray, gold, and sea-green hues appear concentrically over each side. The reverse fields have a hint of reflectivity. Population: 3 in 63, 2 finer (6/16). NGC ID# 22ZY, PCGS# 38595 Base PCGS# 4255

### 1797 16 Stars Half Dime, MS62 Rare V-3, LM-3 Marriage

### 1800 Half Dime, V-1, LM-1, MS63 Lustrous and Lightly Toned

**3996** 1797 16 Stars, V-3, LM-3, R.5, MS62 NGC. 1797 was a transitional year for star counts at the U.S. Mint. The first half dime variety (LM-1) had 15 stars, one for each state as it existed prior to the addition of Tennessee to the Union in 1796. LM-2 and LM-3 show the correct star count of 16. Finally, LM-4 has 13 stars, one for each of the 13 colonies, after the Mint decided that the small obverse of a half dime lacked sufficient room to accommodate an ever-expanding Union. LM-3 is likely rarest among the four varieties, though it commands a lower price than LM-4 since the latter is the sole 13 Star marriage. This LM-3 example is pearl-white with glimpses of charcoal toning. The satiny surfaces are nicely struck and refreshingly unmarked.

**From The GATOR Collection.** NGC ID# 22ZZ, PCGS# 38599 Base PCGS# 4259

**3997** 1800 V-1, LM-1, R.3, MS63 PCGS. The quaint 8 in the date is made from two small "o" punches, one atop the other. The 1 is close to the curl, the second 0 close to the bust. On the reverse, the eagle bites down on the top point of star 12 with his upper beak. This is a lovely and lustrous Select Mint State example with light die clashing on each side, noted above the date, before the neck, and within the star pattern on the reverse. Silver-gray areas complement rim toning in shades of pinkish-orange, mint, and sky-blue. The strike is adequate overall, save for a couple of upper stars and right-side clouds on the reverse. Population (all varieties included): 17 in 63 (1 in 63+), 16 finer (6/16).

**Ex:** FUN Signature (Heritage, 1/2014), lot 5177. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

**1800 Half Dime, MS61  
LIBEKTY, V-2, LM-3**

**3998** 1800 LIBEKTY, V-2, LM-3, R.4, MS61 NGC. 1800 half dimes pose a mixed bag for collectors, with two scarce but collectible varieties (V-1 and V-2), and two extremely rare die marriages (V-3 and V-4). This is a coruscating and minimally abraded example that shows full definition on Liberty's curls and the eagle's wings and shield. Lightly toned overall with hints of silver-gray in design recesses. One tiny spot is west of the O in OF. Although the LIBEKTY variety is unrecorded on the NGC insert, the letter's defective nature is apparent at first glance, since its upper crossbar is absent. An early die state without the buckling near the BUS in PLURIBUS often encountered on this variety.

**From The GATOR Collection.** NGC ID# 2326, PCGS# 38603 Base PCGS# 4265

## 1802 Half Dime, Well-Defined VF Details A Classic American Rarity, V-1, LM-1 The Menjou-Ebsen Coin

**3999 1802 V-1, LM-1, R.5 — Obverse Graffiti, Bent — NGC Details. VF.** The 1802 half dime is one of the classic rarities in United States numismatics. David Davis, in his 1998 extensive research on this issue, documented 167 appearances for the nearly 140-year period between 1859 and January 1998, an average number of only about one appearance per year. This severely limits the opportunity for a collector seeking to acquire an example of this elusive rarity.

It is obvious that not many 1802 half dimes survived the ravages of time. Indeed, 40 to 50 examples are generally thought to be extant. Our ongoing research into the rarity of this issue currently documents 31 distinct specimens, including the present offering. It is no wonder that even the most advanced collections, including many of the “big name” ones, lack this classic piece of Americana.

Not only are precious few 1802 half dimes known, but most exhibit one or more impairments. In fact, 23 of the 31 examples that we have documented to exist, more than 74 percent, show various problems. The most frequently seen impairment is some form of Damage such as cuts, dents, hits, digs, and gouges, followed by Deep Scratches and long or patches of Pincatches. Some examples have also been bent, are porous, have been cleaned or whizzed, or possess graffiti.

The present VF Details example displays attractive grayish-gold patina, imbued with soft violet and gold highlights on the reverse. The design elements are well defined for a mid-grade 1802 half dime. Specifically, the left margins on both sides (typically very weak) have an above-average strike. Additionally, Liberty's hair is strong, as is the eye and most of the shield lines. Clouds 4 and 5, elements that are often very weak or missing on most examples, display a modicum of detail. Ten of the reverse stars show, with the remaining three being virtually absent as seen on virtually all known examples. The planchet is slightly bent and the letters “GW” are faintly etched on the lower part of Liberty's portrait. The latter graffiti and minute contact marks on the chin and left of the mouth help to pedigree the coin, as do light horizontal adjustment marks on the lower part of the right (facing) wing. This is an infrequent opportunity to obtain a well-defined, attractively toned 1802 half dime that may well claim a numerical grade of VF25 Details.

*Ex: A.W. Jackman Collection (H. Chapman, 6/1918), lot 640; Adolf Menjou Collection (Numismatic Gallery, 6/1950), lot 97; Major Lennox Lohr Collection (Stack's, 10/1956), lot 240; Buddy Ebsen Collection (Superior Galleries, 5/1987), lot 459; Rich Uhrich Collection (Stack's, 2/2008), lot 1441.*

## PROOF BUST HALF DIME

**1830 Half Dime, Choice Proof  
V-5, LM-9.1**

**4000** 1830 PR64 NGC. CAC. V-5, LM-9.1, R.7 as a Proof. Golden-brown fields are accompanied by navy-blue and cherry-red margins. The high points are stone-gray. A razor-sharp Choice proof. Thorough examination confirms the eye appeal and fails to locate any remotely mentionable imperfections. A study of Heritage online archives reveals a few prior appearances of a proof V-5: January 2007, lot 848, same coin as February 2014, lot 5074; December 2008, lot 1039; August 2014, lot 5551, same coin as April 2015, lot 4971. Certified in a former generation holder. Census: 1 in 64, 1 finer (6/16). CAC Population: 1 in 64, 1 finer as 65 (6/16). NGC ID# 237N, PCGS# 4301

## SEATED HALF DIMES

### 1838-O No Stars Half Dime, Brilliant MS66+ Single Finest Certified Example

**4001** 1838-O No Stars MS66+ PCGS. CAC. V-1. It was a transitional year for half dime production in 1838. The New Orleans Mint struck the only No Stars half dimes produced at any mint for the year — just 70,000 pieces — and as a result, the 1838-O half dime is the only O-Mint of the No Stars type. While the Philadelphia Mint struck 2,225,000 half dimes in 1838, all were of the new With Stars design including both Large Stars and Small Stars varieties.

This is an all-brilliant example with extraordinary mint luster. The 1838 New Orleans half dimes are often associated with satiny or lackluster surfaces and low eye appeal, yet the present coin displays exceptional bright, frosted luster. It is from the Valentine-1 variety, easily attributed by the die crack through the bottom of the mintmark and by the first 8 in the date obviously recut north.

Three die cracks appear on the obverse. One travels from the edge of the coin to Liberty's right shoulder, one from the edge toward Liberty's nose, and a small one from the edge to the top of Liberty's head. No obvious imperfections occur on the reverse, although the die seems heavily rusted. Die clashing is visible to a small extent on both sides.

This is the sole finest example at either service, followed by a single MS65 at NGC as second-finest and four examples in MS64 at PCGS, suggesting it is likely an impossible task to exceed this coin as the finest 1838-O half dime known. Population: 1 in 66 (1 in 66+), 0 finer. CAC: 1 in 66, 0 finer (6/16).

*Ex: Joseph O'Connor (11/2005); The Eugene H. Gardner Collection Part II (Heritage, 10/2014 as MS66 PCGS, CAC, without the Plus designation), lot 98181. NGC ID# 232N, PCGS# 4314*

## 1853-O Seated Liberty Half Dime, MS65 Extraordinary No Arrows Example, Ex: Gardner

**4002 1853-O No Arrows MS65 PCGS. CAC.** The lustrous surfaces of this Gem display soft golden-tan and violet patina that assumes slightly deeper hues on the reverse. The design elements are sharply struck, including Liberty's head and foot, the shield, the star radials, and the wreath. The date digits 18 are soft, but even these elements are better-defined than typically seen on this issue. A few minute marks on the left (facing) shoulder are within the parameters of the grade and serve to identify the coin.

As with the 1853 No Arrows half dime, most of the 1853-O was melted. This date is very scarce in circulated grades and extremely rare in Mint State. Population: 2 in 65 (1 in 65+), 0 finer. CAC: 2 in 65, 0 finer (6/16).

*Purchased by Eugene Gardner from Jason Carter (2/2003); Gardner Collection, Part II (Heritage, 10/2014), lot 98194. NGC ID# 233N, PCGS# 4352*

## 1855 Arrows Seated Half Dime, MS68 Sole Finest Example at Either Service Unsurpassed Quality for the Type

**4003 1855 Arrows MS68 NGC. CAC.** The mint luster and eye appeal of this stunning half dime are nothing short of astonishing. The coin conveys the impression of full mint brilliance, yet it displays subtle patina that colors the obverse in sea-green and blue hues — strongest in a narrow crescent across the date and the rock base. The reverse shows raspberry-red and blue accents marginally that dissipates toward the centers without disturbing the frosty luster.

Incomparable visual appeal aside, the central strike is remarkably full for the issue. As always, the coin shows slight peripheral weakness at the dentils and star centers. Microscopic roller marks are evident on even the highest-graded pieces. The striations help capture the light and contribute to the forceful mint luster, a sure sign of the freshness of the dies used to strike this unequalled Superb Gem. Certainly, this is a coin destined for the finest type or series collection, a final-year representative of the three-year Arrows design. NGC and PCGS have yet to see a finer example or one that is its equal. Housed in a former generation holder with CAC approval. Census: 1 in 68, 0 finer (6/16). NGC ID# 2344, PCGS# 4360

## EARLY DIMES

### 1797 16 Stars Dime, JR-1, MS62 Light and Lovely Toning Condition Census Example

**4004** 1797 16 Stars, JR-1, R.4, MS62 PCGS. Both the JR-1 16 Stars obverse and the JR-2 13 Stars obverse share a common reverse and together they constitute the only two known die pairings for the 1797 dimes. Featuring a pointed 9 in the date (the JR-2 has a knobbed 9), the JR-1 is also known for the severe die break running from just below the bust through 17 in the date and beyond star 1.

Steel-gray device high points contrast nicely against the intermingled blue and gold in the fields on each side, with generous reflectivity and top-notch eye appeal. A few thin marks appear under a loupe, running through the neck and upper bust of Liberty. The strike is generally better on the right side of the obverse and the left side of the reverse. This piece is tied at the low end of the Condition Census for the variety. PCGS reports three submissions of the JR-2 in MS62 with four finer (5/16).

*Ex: Empire State Collection (Stack's, 1/1997), lot 507; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98223. NGC ID# 236C, PCGS# 38748 Base PCGS# 4462*

## 1800 JR-2 Dime, Remarkable MS64 Third Finest Known

**4005 1800 JR-2, R.5, MS64 PCGS Secure.** The combination of strike, quality, and originality will capture the connoisseur's attention when viewing the fully lustrous and Choice surfaces of this exceptional 1800 dime. Frosty silver sheen glows through the original gray-brown toning with shades of blue, gold, and iridescent hues on each side. The date is wide with the 1 far from the curl, and the final 0 nearly joined to the drapery. Star 12 is solidly joined to the eagle's beak, which is diagnostic along with a spine from the right shield tip into the field.

Traces of minor strike doubling appear at the right side of the reverse. A few insignificant marks are evident on the obverse. Slight weakness appears at the centers — as usual even on the finest specimens — yet all other devices are boldly defined. Both sides exhibit minor die rust, but no other signs of die deterioration.

This coin was offered in the January 1985 Superior sale of the Jerry Buss Collection. In a 1993 appearance as part of the Jim Matthews Collection, the cataloger wrote: "Only once in a great while does a coin of this caliber pop up on the market, and it will likely disappear into another collection for many years." Those words were written nearly two dozen years ago, and they are equally appropriate today.

Two finer pieces are known. One is the D. Brent Pogue Collection coin (Stack's Bowers, 5/2015) lot 1041, which realized \$141,000 as MS65 PCGS, exceeded only by the incomparable Eugene H. Gardner coin (Heritage, 6/2014), lot 30231 that realized \$352,500 as MS66 PCGS. We believe the present coin ranks third among 1800 JR-2 dimes, previously certified as MS65 NGC and now graded the sole MS64 PCGS in a Secure holder. Population: 1 in 64, 1 finer (5/16).

*Ex: Superior (1/1985), lot 509; Jim Matthews Collection (Superior, 1/1993), lot 267; Ed Price Collection (Heritage, 7/2008 as MS65 NGC), lot 1423; Joseph C. Thomas Collection, Central States Signature (Heritage, 4/2009 as MS65 NGC), lot 2214. NGC ID# 236H, PCGS# 38755 Base PCGS# 4470*

### 1802 JR-4 Dime, MS61 Duo-Denomination Reverse

**4006 1802 JR-4, R.4, MS61 PCGS.** The JR-4 die combination is the most plentiful of the four die pairs for 1802 dimes, and it is the only one obtainable in Mint State grades. The reverse die is one of seven duo-denomination dies that were used for dimes and quarter eagles. This reverse appeared, in order, on 1802 BD-2 \$2.50, 1802 JR-4 10C, 1804 BD-1 \$2.50, and 1804 JR-1 10C. The central obverse and reverse show noticeable strike weakness that is common on the variety and on the date. Both sides exhibit fully original pewter-gray patina with iridescent toning over satin luster. Population: 2 in 61, 4 finer (7/16), for all 1802 dime varieties. NGC ID# 236K, PCGS# 38761 Base PCGS# 4472

### 1804 JR-1 Dime, 13 Stars Reverse, XF45 Exceptional Surfaces and Color for the Grade

**4007 1804 13 Stars Reverse, JR-1, R.5, XF45 PCGS.** Two varieties of 1804 have different star counts on the reverse, with 13 Stars on the JR-1 and 14 Stars on the JR-2. Sometimes called the "Needle Beak," the eagle's lower beak is long and straight, extending entirely through the adjacent star on the JR-1 variety. The two 1804 varieties are each rare, and both are condition rarities in the series. The Draped Bust dimes of 1801 through 1804 are elusive dates that provide collectors with a major hurdle, although the three earlier dates require much less effort to locate.

This Choice XF example combines pewter-gray surfaces with lovely reddish-gold and pale-blue toning and a generous amount of remaining mint luster. The well-defined surfaces show just light abrasions, and a tiny reverse rim bruise at 6 o'clock causes no real distraction. Only a few other scattered marks are evident. The finest JR-1 PCGS-certified pieces include: XF45 (3), AU53 (2), and AU55 (2). That service has never examined a Mint State piece, and has only seen four submissions finer than the present specimen. The NGC Census Report tells a similar tale, with a single amazing MS63 coin. Others include: XF45 (2) and AU55 (2). Those totals include possible resubmissions (5/16). Spirited bidding is expected when collectors compete for this coin.

*Ex: Superior (7/2005), lot 952; FUN Signature (Heritage, 1/2012), lot 3135 which realized \$46,000. NGC ID# 236N, PCGS# 38766 Base PCGS# 4474*

## BUST DIMES

### 1809 Capped Bust Dime, JR-1, MS64 Low Mintage, Few Are Finer

**4008** 1809 JR-1, High R.3, MS64 NGC. The 1809, 1811, and 1822 Capped Bust dimes have the lowest reported mintages of the series and are generally considered the most challenging to find, especially in Select or better Uncirculated grades. Of these, the 1809 has the lowest mintage with 44,710 pieces delivered in 1809 and an additional 6,355 pieces in 1810 for a total of 51,065 for the date. It is arguably as rare in near-Gem and Gem conditions as the 1822 dime and is rarer than the 1811 issue or the 1807 Draped Bust dime in high Mint State grades.

This example is a brilliant, frosted coin with plentiful mint luster and a touch of golden-gray toning near the rims. Known for a strong strike in the centers, the 1809 is often found weak on the stars and dentils on the obverse and with peripheral weakness at UNITED and the eagle's leg on the reverse. The current example is boldly struck in these areas. Only minor flatness exists in a few of the stars and UNITED is bold — an important attribute when considering this condition rarity. Census: 4 in 64, 4 finer (6/16). NGC ID# 236U, PCGS# 38771 Base PCGS# 4486

### 1822 Capped Bust Dime, MS64 Underrated Key, JR-1

**4009** 1822 JR-1, R.4, MS64 NGC. The 1822 is the unheralded key date among Capped Bust dimes, and the consensus among series specialists is that 200 to 250 pieces survive in all grades. Mint records indicate a production of 100,000 coins, but Walter Breen noted in his *Encyclopedia* that those mostly consisted of 1821s. The recently published *Bust Dime Variety Identification Guide* by Zack, Scuderi, and Sherrill adds that the actual mintage "is likely as little as a quarter of what Mint records report ... The majority of 1822's known are in grades of VG or lower and many are damaged. Fewer than 30 examples are known in VF or better, including about ten in MS."

Golden-gray and olive tones shroud each side, enhanced by luminous original mint luster throughout this near-Gem 1822 dime. The design elements are well-struck overall with faint centers evident on the upper stars. Liberty's hair curls are boldly delineated, as are the dentils on the obverse and reverse. The fletchings are clear, and veins appear on several olive leaves. A handful of small marks are entirely unimportant relative to the significance and conditional rarity of this top-quality key date. Census: 2 in 64 (1 in 64★), 3 finer (6/16). NGC ID# 236Z, PCGS# 38801 Base PCGS# 4497

### 1830/29 Capped Bust Dime, MS65 JR-5, FS-301, Lustrous Original Surfaces

**4010** 1830/29 JR-5, FS-301, R.2, MS65 PCGS. Medium 10 C. Although the underdigits are faint, this Gem dime is an example of the 1830/29 overdate JR-5 variety. Only two varieties for the 1830 dimes share an unused obverse die from 1829 — paired with different reverses. The ME in AMERICA is level and separated on JR-5, and the scroll begins at the left side of D and ends at the center of M. On the similar JR-4 overdate, the scroll starts and ends further to the right. The final diagnostic is the second T in STATES, which rides high above the tops of A and E on JR-4, but is level on JR-5.

The overdate on the 1830/29 varieties is always obscure at best, and the feature is confirmed by the 0 in the date fully under the curl. JR-5 is a later state of the obverse, which makes the overdate even more difficult to discern. Slight repunching is visible on both the lower outside loops of 8 and 3, and a faint trace of the underdigit 9 peeks out above 0. Surface doubling from the initial 1829 punch is visible on the date. The overdate aside, any 1830 Capped Bust dime is rare and highly sought in Gem condition. Few coins are finer than this original and attractively toned example, with reddish-gold and lilac-gray toning enhanced by blue and lemon-yellow accents. The strike is a bit flat at the centers, as always seen on the JR-5 die pair. Bright mint luster glows beneath the toning, while the few minor marks are hidden beneath the natural patina. NGC ID# 4FA7, PCGS# 38848 Base PCGS# 4519

## SEATED DIMES

### 1838-O No Stars Dime, MS65 F-101a, Cuds and Repunched Mintmark

**4011** 1838-O No Stars, F-101a, R.5, MS65 PCGS. CAC. Light to medium wheat-gold toning graces this lustrous Gem. Nearly devoid of contact, and the strike is sharp save for blending on the lower left obverse dentils. The final No Stars issue, and among the first issues of any denomination struck at the fledgling New Orleans Mint. The rare late die state with obverse rim cuds at 2, 4, and 8 o'clock, although the latter cud is obscured by the holder. The mintmark is repunched south, and several die cracks traverse UNITED. Population: 6 in 65 (1 in 65+), 0 finer (6/16). CAC Population: 1 in 65, 1 finer. PCGS# 537644 Base PCGS# 4564

## 1841-O Dime, Fortin-101, MS62 A Rare Transitional Variety, Top 100 Listed

**4012 1841-O Closed Bud, Large O, F-101, FS-902, R.6, MS62 PCGS.** Fortin Top 100 Variety. Attributed by the Date Far Left, Large O Mintmark, Closed Bud Reverse. As noted in Greer: "High grade examples will show faint die cracks from the rim to nearly every letter in the legend." Greer also states: "Both (the Small O Closed Bud Reverse and the Large O Closed Bud Reverse) are keys for the variety collector."

Considerable luster is apparent on the golden-gray surfaces laced with interspersed areas of ice-blue toning. The design elements are well-struck and there are no serious contact marks. We mention a shallow, unobtrusive scrape below stars 9 and 10 solely for identification purposes, as well as two light linear marks on either side of the R in AMERICA.

Gerry Fortin reports on his website [seateddimevarieties.com](http://seateddimevarieties.com), "There are no established pricing guides for the 1841-O Closed Bud varieties other than the author's Top 100 Varieties pricing guide. Within the guide, AU50 examples are estimated at \$20,000 while MS60 grade is valued at \$35,000. These price estimates are based on transaction knowledge of the two finest known AU specimens in PCGS holders within the past 15 years." The present coin is the only Mint State example specifically listed by variety in the PCGS population report (7/16). NGC ID# 2385, PCGS# 145487 Base PCGS# 4580

## 1864 Seated Liberty Dime, MS66 Vividly Toned Reflective Fields

**4013 1864 F-102a, R.5, MS66 PCGS.** 30th Anniversary Green Label Holder. During the Civil War era, precious-metal coinage was widely hoarded or exported and seldom circulated in the domestic economy. This resulted in limited mintages for most silver coins during this time frame. Only 11,000 business-strike Seated Liberty dimes were struck at the Philadelphia Mint in 1864. Two obverse dies and two reverse dies have been identified, both used to strike coins in proof format as well as business-strike examples. Today, most examples seen are in grades from VF-AU. Mint State specimens are decidedly elusive.

The present coin is a delightful Premium Gem, with well-detailed design elements and reflective prooflike fields, under vivid shades of greenish-gold and cerulean-blue toning. The surfaces are impeccably preserved and eye appeal is terrific. NGC has certified only one other MS66, plus one in 66+, and there are three finer (7/16). NGC ID# 239M, PCGS# 538202 Base PCGS# 4639

**1865-S Seated Dime, MS64  
Finest at NGC, Ex: Gardner**

**4014** 1865-S F-101, R.4, MS64 NGC. Extensive circulation, exportation, and melting explain the incredible rarity of this issue in Uncirculated condition, given as High R.7. Only eight examples survive in Mint State from a mintage of 175,000 coins. Such pieces are highly prized and rarely appear at auction.

The issue is notorious for strike softness on Liberty's head and the lower wreath, evident even on this Choice example. Apart from the typical incompleteness, the remaining design features, including the upper wreath, are well-detailed. Mottled crimson, olive, and golden-tan hues intermingle with areas of brilliance. The coin is lightly abraded for the grade with no singularly distracting marks. Given the extreme Mint State rarity, we expect Seated dime specialists to quickly seize this opportunity. Census: 1 in 64, 0 finer (6/16).

Ex: Frog Run Farm Collection (*American Numismatic Rarities*, 11/2004), lot 602; The Eugene H. Gardner Collection, Part IV (*Heritage*, 10/2015, as MS63 NGC), lot 98266. NGC ID# 239R, PCGS# 538206 Base PCGS# 4642

**1873-CC Arrows Dime, XF40  
High Grade for the Issue**

**4015** 1873-CC Arrows, F-101, R.4, XF40 PCGS. The 1873-CC Arrows, with a mintage of 18,791 coins, is one of the key dates to the Seated Liberty dime series. Brian Greer, in his Seated Liberty dime reference, says the issue is "slightly more available in Good to VF than the 1871-CC, but more difficult to find in higher grades." Greer also notes that examples are "usually found with problems or porous surfaces."

Medium gray patination in the fields highlights the motifs on this problem-free XF40 example, that take on lighter gray hues. Aside from light wear on the highpoints, the design elements display sharp detail. Close examination reveals no mentionable blemishes on either side. The fine die crack that shows on all genuine pieces goes through the mintmark. Population: 2 in 40, 9 finer (7/16). NGC ID# 23BH, PCGS# 538326 Base PCGS# 4666

## PROOF SEATED DIMES

**1843 Seated Dime, PR66**  
**Ex: Pittman, Gardner**

**4016 1843 F-103, R.7, PR66 PCGS. CAC.** The proof 1843 dime is a formidable rarity. PCGS estimates that 8 to 12 examples are known, approximately the same degree of rarity as the costly and famous 1894-S dime. When Heritage auctioned the Phil Kaufman Collection of Early Proof Sets in July 2008, the pedigrees of known proof 1843 dimes were exhaustively researched for lot 1807 in that auction, and nine examples were confirmed. The present coin, held for a half-century in the John Jay Pittman Collection, was listed as second-finest, behind only the Kaufman specimen. It can be identified by a small spot above the diagonal of the 4 in the date. Otherwise, a flawless Premium Gem with straw-gold borders, sea-green fields, and a blush of lavender toning on the central reverse.

*Ex: 1946 ANA Sale (Numismatic Gallery, 8/1946), lot 266; John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 595; Bowers and Merena (8/1999), lot 105; Eugene H. Gardner Collection (Heritage, 6/2014), lot 30287. PCGS# 538984 Base PCGS# 4730*

**1853 Arrows Dime, PR66+**  
**Finest at PCGS, Ex: Kaufman/Gardner**

**4017 1853 Unhubbed Date and Arrows, F-101, R.8, PR66+ PCGS. CAC.** This is the finest certified 1853 proof Arrows dime at PCGS (6/16), previously from the Kaufman and Gardner collections. While the number and timing of proof strikes has long been debated, it is generally agreed just five Arrows and two No Arrows proof dimes were manufactured.

All genuine proofs show a diagnostic die lump above Liberty's right breast, and a smaller, less noticeable one near the right elbow. Proofs always display die clashing and spikelike artifacts beneath Liberty's chin — apparently, an unfinished area of the die.

Each side of this Premium Gem proof dime exhibits boldly struck design elements and deeply mirrored fields, along with a melange of medium-intensity champagne toning splashed with whispers of aqua-blue, brown, and violet. The obverse shows slightly lighter hues than the reverse. This well-cared-for specimen displays pleasing overall eye appeal, appropriately recognized by CAC.

*Ex: Kaufman Collection / ANA Signature (Heritage, 8/2007), lot 1784; Greensboro Collection, Part 1 / ANA National Money Show (Heritage, 10/2012), lot 3951; Eugene H. Gardner Collection, Part 1 (Heritage, 6/2014 as PR66 NGC), lot 30290; Houston Money Show (Heritage, 12/2014), lot 3519. PCGS# 538993 Base PCGS# 4742*

**1856 Dime, PR66 Cameo**  
**Spectacular Visual Quality**  
**Sole Finest at PCGS, CAC**

**4018** 1856 PR66 Cameo PCGS Secure. CAC. Fortin-101, High R.6. Obverse die doubling is evident on the shield and lower gown. This reverse die was used again in 1857, as confirmed by the die line through the R in AMERICA on both dates. PCGS has estimated that as many as 30 to 40 proofs may exist of the 1856 dime, a figure in line with Breen and Bowers' estimate of about 35 specimens. The fields on this piece are exceptionally deep and reflective, making cameo contrast even more pronounced against the frosted devices. The centers are nearly brilliant, while the margins display rich reddish patina around each side. This is the finest of three Cameo 1856 dime proofs certified by PCGS (6/16). NGC ID# 23CA, PCGS# 84745

## BARBER DIME

**1894-O Barber Dime, MS67**  
**Tied for Finest Certified**

**4019** 1894-O MS67 PCGS. Mintages for many U.S. silver coins were down in 1894, because of the far-reaching effects of the Panic of 1893. The 1894-O Barber dime claims a small production total of 720,000 pieces, making it scarce-to-rare in all grades. In addition, few examples were saved by contemporary collectors. As a result, the 1894-O is a key date in high-grade, although the issue has been somewhat overlooked outside of series specialists.

This incredible Superb Gem is tied with one other coin at PCGS and a single specimen at NGC for finest-certified honors (7/16). The design elements are sharply impressed and the impeccably preserved surfaces radiate vibrant mint luster on both sides. Attractive shades of greenish-gold and powder-blue toning enhance the tremendous eye appeal. This coin should find a home in the finest collection or Registry Set. NGC ID# 23DU, PCGS# 4804

## PROOF ROOSEVELT DIME

### 1951 Roosevelt Dime, PR68+ Deep Cameo Spectacularly Toned Registry Set Candidate

**4020 1951 PR68+ Deep Cameo PCGS.** Only 57,500 proof sets were issued in 1951, the year after the Mint resumed its commercial proof set offerings. Few survivors have been seen with Deep Cameo contrast, and coins in extremely high grade tend to have brilliant surfaces. This magnificent Plus-graded PR68 specimen displays vivid shades of burnt-orange, violet, and cobalt-blue toning over sharply detailed design elements and deeply reflective fields that contrast dramatically with the frosty devices. The stunning cameo effect is most unusual with richly toned coins. Eye appeal is tremendous, to match the unparalleled technical quality. Population: 3 in 68 (1 in 68+) Deep Cameo, 0 finer (7/16). NGC ID# 27EK, PCGS# 95226

## PROOF TWENTY CENT PIECES

### 1876 Twenty Cent, Toned PR66 None Finer at PCGS

**4021 1876 PR66 PCGS.** The Centennial year boosted both mintages and sales of proofs to a small extent, although the demand for 1876 twenty cent proofs today are more a function of the scarcity of business strikes for the year. Opinions vary on the exact number of proofs struck for the issue: the Guide Book reports 1,150 pieces, while the Brunner and Frost reference claims 1,260 pieces were minted. In PR66 condition, it matters little since the population is scant regardless of mintage.

A blend of rose-gold and pale olive toning over each side of this Premium Gem allows modest contrast to persist between the sharp, frosty devices and the mirrored fields. There are no contact marks present needing mention, and the few light hairlines are masked by the patina. This is an ideal coin for date representation in a high-grade set in light of the scarcity of high-end Philadelphia circulation strikes and the extreme rarity of the 1876-CC issue. NGC ID# 27H3, PCGS# 5304

## EARLY QUARTERS

### 1878 Twenty Cent Piece, PR66 Cameo Final, Proof-Only Issue

**4022** 1878 PR66 Cameo PCGS. CAC. The Seated Liberty twenty cent piece was an ill-conceived and short-lived issue that ended with a small proof-only mintage of 600 pieces in 1878. The present coin is among the finest survivors of that tiny production. The outstanding visual feature of this coin is its spectacular toning. The centers are lime-green and golden-brown, while the peripheries are deep blue and violet. The devices are sharply rendered, and the fields are deeply reflective beneath the toning. Eye appeal is tremendous. Population: 4 in 66 Cameo, 1 finer. CAC: 2 in 66, 1 finer (6/16). NGC ID# 27H5, PCGS# 85306

### 1796 B-2 Quarter, VF25 Problem-Free Single-Year Type

**4023** 1796 B-2, R.3, VF25 PCGS. CAC. Tompkins Die State 2/1. No type collection is complete without a 1796 quarter, a factor in the ongoing demand for the issue in all grades. Just 6,146 pieces were struck. The present coin represents the B-2 die pair with a high 6 in the date, which is about three times more available than the scarcer B-1 (low 6) variety.

This is a smooth and attractive VF example of the issue. Golden-gray toning deepens slightly at the margins and around the raised devices for excellent eye appeal while abrasions are muted by wear. The motifs show sharp definition for the grade, including the eagle's head that is only slightly weaker than the rest of its body. The legends, rims, dentils, and stars are well-defined and the date is crisp. Housed in a prior generation green label holder, the coin is CAC-endorsed for quality. CAC: 3 in 25, 23 finer (7/16).

**From The Hamilton Collection.** NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

## 1796 Draped Bust Quarter, AU55 Popular First Year of Denomination Single-Year Type Coin, B-2

**4024 1796 B-2, R.3, AU55 PCGS.** The *Mint Director's Report* of 1796 addresses many of the major concerns facing the facility at the time, with Director Elias Boudinot writing, "... the establishment is unnecessarily expensive, and less productive than was rationally expected by its advocates and friends." He explains that all operations are "executed at the public expense," while depositors are entirely indemnified from any costs associated with production, including assaying, refining, and wastage. Another important issue adversely affecting the Mint was the lack of a bullion fund for purchasing precious metals. Again, Boudinot writes:

"Depending upon depositors alone for the precious metals, it became necessary, for their encouragement and satisfaction, to coin every deposit, as soon as possible after it came into the treasury of the mint, to prevent its remaining unproductive to the depositor, by which means the clippings and grains were obliged to be melted and coined as they arose, often three or four times for one deposit.

"... whereas, could the bullion be purchased for the public at the market price, and kept in the vaults till a large quantity might be coined at once, or a capital of about ten thousand dollars be allowed to the mint, so as to anticipate the payments to depositors, without being obliged to an immediate coinage on every occasion, a very great public saving would take place, not only as to the wastage, but in the expenditure of the materials and labor used in the process, and no injury done to the United States, but in the loan of the money for a short time."

Unnecessary costs and production inefficiencies were not the only consequences of these practices. From a numismatic standpoint, depositors could demand the coins of their choosing. The Mint Act of 1792 had authorized the production of quarters, but apparently none were requested prior to 1796, as Spanish 2 reales had largely satisfied demand for coins of that size / denomination. The Mint struck 6,146 Draped Bust, Small Eagle quarters bearing the 1796 date, though 252 of them were manufactured in 1797. As with so many other low-mintage issues, minimal demand from contemporary depositors has a profound effect on the demand from today's collectors. Other factors that contribute to the widespread popularity of the 1796 quarter include its status as a single-year type and first-year issue, and the fact that it is the only 18th century United States quarter.

This impressive Choice AU specimen represents the slightly more available B-2 variety, with the high 6 in the date. Only minimal wear shows on the high points of the design elements, which are sharply detailed in most areas, but show the usual softness on the eagle's head and breast. The pleasing lavender-gray surfaces are free of large or distracting flaws. Housed in a green label holder. Population: 18 in 55, 51 finer (6/16). NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

### 1796 B-2 Quarter, Choice AU Colorfully Toned Reverse Unblemished Surfaces

**4025 1796 B-2, R.3, AU55 NGC.** The Small Eagle quarter ranks among the rarest silver types. It was struck only in 1796, due to the preference of bullion depositors for the dollar, the largest silver denomination. In 1804, the Mint Director stopped production of the dollar and ten dollar denominations, to compel depositors to select smaller denominations. These were needed in commerce, which had to make do with worn-out Spanish-American coinage. Although silver dollars did circulate in America, many were exported overseas, and often promptly melted to reclaim the silver in local form. While dollars were struck annually between 1794 and 1803, 1796 is the sole quarter date within that span.

The present 1796 quarter has impressive sharpness, especially on the portrait of Liberty. The eagle's breast shows a hint of wear. Incompleteness of strike on the eagle's head is customary for the date, since the head is opposite Liberty's shoulder, the high point of that side. The obverse field displays faint gold toning, as does Liberty's face, neck, and chest. The obverse border displays steel-gray, and the reverse field exhibits colorful aquamarine and pink-red patina. The high points of both devices are gunmetal-gray.

The die state is Tompkins 2/1, with light lapping on Liberty's shoulder curl, except the reverse has a delicate die crack through the F in OF, as seen on Tompkins Reverse Die Stage 3 for B-1. B-1 and B-2, the only two die varieties for the date, share the same reverse die but the obverse dies differ slightly. For example, on B-2, the base of the T in LIBERTY is above the base of the R, while the B-1, the two letters are level.

Thorough study beneath a lens fails to locate any remotely mentionable marks. The eye appeal is exceptional for the type. 1796 quarters are typically encountered well worn, and many have been cleaned or repaired, or exhibit graffiti. But this problem-free and attractive Choice AU example would be the highlight of most early type collections. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

## 1804 Draped Bust Quarter, VF20 Key Date, B-1 Variety

**4026** 1804 B-1, R.3, VF20 PCGS. Tompkins Die State 4/3. Struck from a mid-to-late stage of the dies, with die clashing on both sides and a bold crack through the 0 in the date. The 1804 is very scarce as a date — the scarcest of the four-year Heraldic Eagle early quarter series — with a mintage of just 6,738 pieces. This example is the Browning-1 die pair, one of two varieties needed to accomplish the small production. A prominent die scratch near star 9 and a Blunt 1 in the date confirm the B-1 obverse.

Moderate wear minimizes marks and abrasions but does not obscure any of the devices. Strong definition remains for the VF level with smooth fields and full rims. Warm-gray toning shows a golden hue with lighter tan-gray areas on the high points. This is a problem-free example with bold shield lines and strong wing feathers on the reverse, paired with a suitably well-defined obverse. Population (both varieties combined): 18 in 20, 50 finer (7/16).

**From The Hamilton Collection.** NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

## 1804 Quarter, Choice Very Fine, B-1 Compelling Original Surfaces

**4027** 1804 B-1, R.3, VF35 PCGS. CAC. Many collectors are bound to find the original surfaces to be a compelling feature of this Choice Very Fine B-1 1804 quarter, an issue that is probably second in popularity only to the first-year 1796. While the 1796 quarter is the only issue having the Small Eagle reverse, the 1804 is a first-year type, the forerunner of all the Heraldic Eagle issues that follow. This piece displays splendid medium blue and gray surfaces tinged with pink and gold. There are a few scattered marks on each side, none of any consequence and largely removed from the focal points. The prominent die mark by star 9 easily attributes the B-1 die variety. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

## 1805 Draped Bust Quarter, MS63 Finest-Known Browning-1 Example

**4028 1805 B-1, R.4, MS63 PCGS. CAC.** Tompkins Die State 2/2. We were pleasantly surprised to see this exceptional early quarter in the auction, not only for its stunning appearance, but also for the scarce variety. It is a Browning-1 specimen, definitively rare in Uncirculated grades and seldom seen as such. The B-1 variety trails only the B-5 in rarity among the five 1805 varieties. The obverse is identified by the flag of the 5 touching the bust, with missing serifs on the bottom-left of both the 1 in the date and the T in LIBERTY. The reverse shows the C in 25 C positioned wide of the tail and clear of the stem — the only 1805 die marriage with such positioning.

Further checking revealed an interesting sidenote in the Rea-Koenings-Haroutunian Census for the B-1 variety. The Census estimates the finest example as MS65 with the intriguing comment, “*Heritage Numismatic Journal* Fall-83 (MS65+ Not verified — where is it today?).” The next-finest specimen in the Census is listed as a MS61 PCGS coin, and clearly the present example is far finer. Could the present coin be the long-missing finest B-1 coin?

Previous appearances of the #1 coin are known. Many years ago, a B-1 listing in Stack’s section of Auction ‘83 realized \$13,750 as lot 630. There, it was described as follows:

“1805 B.1. Choice Brilliant Uncirculated. An exquisite example, just bordering on the gem category. The toning is breathtakingly beautiful. Russet blending to iridescence about the periphery. SEE COLOR PLATE.”

An earlier appearance of the same coin occurred in the S.H. & H. Chapman of the H.P. Smith Collection in 1906, where it was offered as lot 758 — purchased by “Darby” for the strong price of \$30.00, described thusly:

“Uncirculated. Bust bold and strong, but the milling around the border not struck up. A few infinitesimal and very light dents on edge. Probably the second finest known. Very rare in this preservation. Rev. 25 C with the ends of the arrows just touching the top. Letter C far from the end of Eagle’s tail. Plate.”

Fortunately, both of the auction appearances were plated, and we can confirm that this is indeed the unaccounted-for #1 coin in the Browning-1 Census, still housed in an old green label PCGS holder with CAC endorsement. It was assigned the MS63 grade many years ago. Vibrant and colorful as ever, the coin radiates eye appeal and flashy mint luster. No finer example of the B-1 1805 quarter is known. Ex: *H.P. Smith Collection* (S.H. & H. Chapman, 5/1906), lot 758; Auction ‘83 (*Stack’s*, 7/1983), lot 630; purchased privately from *Heritage*, 10/1987.

**From The Hamilton Collection.** NGC ID# 23RC, PCGS# 38923 Base PCGS# 5313

## 1806 B-2 Quarter, Toned MS64 Tied for Second in the Condition Census

**4029 1806 B-2, R.2, MS64 NGC.** Tompkins Die State 3/4. Browning-2 is an available variety for the year, confirmed by defects at the lower serifs of 1, I, and T, with star 13 distant from the bust. The C in 25 C touches both the eagle's tail and the final A in AMERICA. Die clashing shows below the bust and behind the hair near star 2, and on the reverse from the central cloud through OF. The B-2 is an available variety overall, but it is virtually unavailable any finer than the near-Gem condition of this coin.

Rose, mauve, and copper-violet hues display gleaming silver luster beneath the attractive patina. Bold die cracks on the reverse join the readily visible die clashing, but marks from contact and abrasions are minor. A sharp strike shows only slight blending on the central curls and at the eagle's head, breast, and wing tips. The Rea-Koenings-Haroutunian census in *Early Quarter Dollars* by Rea, Peterson, et al. identifies only two examples of the B-2 that are the numeric equal to this piece, plus one finer coin (7/16). NGC ID# 23RD, PCGS# 38928 Base PCGS# 5314

## 1806 B-9 Quarter, MS63 High Condition Census, Gold CAC

**4030 1806 B-9, R.1, MS63 PCGS. Gold CAC.** Tompkins Die State 3/5. With a mintage exceeding 200,000 pieces, the Mint must have been alarmed at the number of dies required and often pushed their limits. A bold, bisecting die crack on this Browning-9 example runs rim-to-rim from beneath 1 in the date, through Liberty's hair, to E of LIBERTY. Multiple areas of die clashing are untouched by lapping to identify the early-to-mid die state. On the reverse, the legend climbs the rim and shows associated rim cuds and some weakness at the field stars.

Still, this is a remarkably well-preserved early quarter with colorful iridescence and great eye appeal. CAC took note, and awarded the important gold CAC sticker. Few pieces grade finer than the Select Uncirculated level — certainly for the B-9 variety, but also for the 1806 date as a whole. We note a few light abrasions and reverse pinscratches with a glass, but the overall appeal this coin is outstanding. Housed in an old green label holder dating from the time of purchase by our consignor. Population (all 1806 varieties): 8 in 63, 15 finer. Gold CAC: 1 in 63, 0 finer (6/16).

Ex: Private purchase 2/1990.

**From The Hamilton Collection.** NGC ID# 23RD, PCGS# 38935 Base PCGS# 5314

## BUST QUARTERS

### 1818/5 Capped Bust Quarter, B-1, MS64+ Very Rare Any Finer

**4031** 1818/5 B-1, R.2, MS64+ PCGS. CAC. This late die state example has a heavy vertical die crack on the reverse, as well as other cracks, clash marks, and flow lines. Following the War of 1812 and the January 1816 fire that destroyed important equipment at the Philadelphia Mint, coinage production finally returned to normal by 1818. The copper cents of 1816 and 1817, and the half dollars dated 1817 were the only coins made during those two years. Quarter dollars and half eagles reappeared in 1818. This Choice Mint State piece has frosty antique-silver luster and lovely gold toning. The design motifs are bold. An exceptionally attractive Capped Bust quarter. Population: 2 in 64 (1 in 64+), 2 finer (6/16). NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323

### 1818 Capped Bust Quarter, B-2, MS65 Rarely Seen Any Finer

**4032** 1818 B-2, R.1, MS65 NGC. Tompkins Die State 2/1. The 1818 is among the most plentiful large size Capped Bust quarters in Mint State, ideal for type representation. Yet, Gem-quality examples are seldom seen, and anything finer is rare. This piece is essentially untuned with frosty luster and bold design elements. The obverse is cracked along the upper-right periphery, but neither die is yet clashed in this moderately early state. A few faint marks on Liberty's cheek are all that preclude an even finer designation. Due to the extreme rarity of higher-grade examples, many of the MS65 coins reported by the grading services may reflect resubmissions and not actual coins. Census (all varieties included): 22 in 65 (1 in 65+), 12 finer (6/16). NGC ID# 23RH, PCGS# 38943 Base PCGS# 5322

## 1821 B-3 Capped Bust Quarter Dollar Choice Mint State

### Lightly Toned, Condition Census for Variety

**4033** 1821 B-3, R.2, MS64 PCGS. CAC. Tompkins Die State 3/1. Die lines between stars 2 and 3 are lapped away, but die clashing of the shield lines near the ear remain. This is a frosty example with areas of prooflikeness interspersed along the obverse border. The reverse is fully frosty. Pearlescent silver luster at the centers melds with orange-gold toning at the rims. The strike is razor-sharp on the central devices and on the obverse stars except 5 and 6. Light die rust remains near the olive leaves.

Acquired by our consignor in January, 1988, the coin remains in its old green label holder graded MS64, now with CAC endorsement. As such, it is solidly at the high end of the Condition Census for the variety although not mentioned in the Rea-Koenings-Haroutunian Census. The attractive light toning and strong mint luster put it near the the finest of the variety both in technical merit and eye appeal. Population (all varieties): 10 in 64, 12 finer (7/16). CAC: 2 in 64, 2 finer (7/16).

*Ex: Heritage by private purchase 1/1988.*

**From The Hamilton Collection.** NGC ID# 23RM, PCGS# 38965 Base PCGS# 5331

## 1822 Quarter, Choice VF Rare 25 Over 50 C, B-2

**4034** 1822 25 Over 50C, B-2, R.5, VF35 NGC. The early U.S. Mint made far more half dollar dies than quarter dies, which helps explain the 25 Over 50 C blunder. The absent-minded engraver began entering the legend on the reverse die as a half dollar, before the error was corrected. Nonetheless, the die was put into use for the rare 1822 Browning-2 variety. It then rested in the Mint workshop for several years, before it returned to service to strike the equally rare 1828 Browning-3. The present 1822 example displays deep gunmetal-gray, powder-blue, and butter-gold toning. No marks are consequential, and wear is relatively even, since only the first U in PLURIBUS is faint. NGC ID# 23RN, PCGS# 38970 Base PCGS# 5333

## PROOF BUST QUARTER

### 1831 Capped Bust Quarter, PR65 Cameo Very Rare Early Proof Issue Large Letters, B-5 Variety

**4035** 1831 Large Letters PR65 Cameo PCGS Secure. B-5, R.7, as a proof. This coin represents the B-5 variety, with Tall 1s over Short 1s in the date and Large Letters in the reverse legend. Most proof 1831 Capped Bust quarters are this variety, but proofs of the B-1, B-2, and B-4 varieties have also been certified. The B-5 is the only proof variety with Large Letters on the reverse, a circumstance that makes it possible to classify examples in early auction catalogs where this feature is mentioned in the description, even if the coin is unplated.

Vivid shades of golden-brown, electric-blue, and violet toning blanket the peripheries of this spectacular Choice proof specimen, but the obverse center remains brilliant silver. The richly frosted silver-white portrait contrasts noticeably with the deeply mirrored, patinated fields, creating a distinct cameo effect. The design elements exhibit razor-sharp detail in most areas, but just a touch of softness shows on some star centers. Only minor signs of contact are evident, and the eye appeal is top-notch.

Quarters were struck on thicker, smaller-diameter planchets in 1831, and William Kneass made a few revisions to the design, most notably removing the scroll on the reverse in order to save room. Seven die varieties are known for the date, with six varieties listed as early as 1881 in Haseltine's Type Table, and the rare B-7 variety discovered by Walter Breen in the 1950s. Proofs were struck using four different die pairs, with most examples seen, including the present coin, representing the B-5 variety. The mintage figures were unrecorded, but PCGS CoinFacts estimates the surviving population at no more than 10-15 specimens in all grades. A roster of B-5 proofs known to us appears below, with nine examples confirmed and a few earlier appearances that may or may not duplicate citations in the roster. This coin possesses a combination of high technical quality, intense eye appeal, and absolute rarity that is seldom offered for public competition. The discerning collector will bid accordingly.

## Roster of 1831 B-5 Proof Quarters

**1. PR66 PCGS.** Paramount International Sales Corporation, purchased as part of a partial 1831 proof set in 1975; Auction '79 (Paramount, 7/1979), lot 154; Sixten Ehrling; David Akers; FUN Signature (Heritage, 1/2014), lot 5211.

Note from David Akers: "Sixten Ehrling (1918-2005) was a world renowned Swedish orchestra conductor, one of the last living conductors to have known both Igor Stravinsky and Jean Sibelius personally."

**2. PR65 Cameo PCGS.** Richard Picker in the late 1950s, Norweb Collection, Part II (Bowers and Merena, 3/1988), lot 1548; FUN Signature (Heritage, 1/2009), lot 3736; Larry Hanks, by sale; D. Brent Pogue Collection, Part I (Stack's Bowers, 5/2015), lot 1082.

**3. PR65 Cameo PCGS Secure.** Purchased by Eugene Gardner from John Dannreuther (11/2001). Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98355. **The present coin.**

**4. PR65 Cameo NGC.** Possibly F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 3/1945), lot 105; Jerome Kern; Golden Jubilee Sale (B. Max Mehl, 5/1950), lot 1416; John McNail, who assembled a partial 1831 proof set in a custom holder; ANA Convention Sale (Kagin's, 8/1977), lot 2185, as part of the assembled set; Frog Run Farm Collection (American Numismatic Rarities, 11/2004), lot 1151; Pre-Long Beach Elite Sale (Superior, 2/2005), lot 4123; Rarities Sale (Bowers and Merena, 7/2005), lot 442; Central States Signature (Heritage, 4/2009), lot 2334.

**5. PR64 NGC.** FUN Signature (Heritage, 1/1998), lot 6760.

**6. Choice Proof.** Numismatic Gallery; John Jay Pittman, purchased 7/15/1947; Pittman Collection, Part II (David Akers, 5/1998), lot 1286.

**7. PR63 PCGS.** New York Signature (Heritage, 10-11/2015), lot 3186.

**8. PR62 ANACS.** Dallas Signature (Heritage, 12/2005), lot 606.

**9. Proof-62.** Louis E. Eliasberg, Sr. Collection, Part II (Bowers and Merena, 4/1997), lot 1399; Lindesmith Collection (Bowers and Merena, 3/2000), lot 449.

## Other Appearances

**A. Proof 63 SEGS.** Pre-Long Beach Auction (Ira and Larry Goldberg, 2/2013), lot 1285, listed as "Ex: Mid America Sale # 523 as Proof 64, earlier from Kosoff 1946 ANA Sale Lot 430." Possibly a prooflike business strike.

**B. PR62 PCGS.** Club Cal Neva Sale (Superior, 9/1987), lot 1678.

**C. Brilliant Proof.** Peter Mougey Collection (Thomas Elder, 9/1910), lot 694; Dr. Christian Allenburger; Royal Sale (B. Max Mehl, 3/1948), lot 872; T. James Clarke; Forty-Seventh Catalog (New Netherlands, 4/1956), lot 1577.

**D. Brilliant Proof.** Davis-Graves Collection (Stack's, 4/1954), lot 338.

**E. Brilliant Proof.** Paramount FPL, Winter 1976, as part of a set (possibly the same as number 1 above).

**F. Proof.** Lorin G. Parmelee Collection (New York Coin & Stamp; 6/1890), lot 1006; Charles Steigerwalt. Noted as "Large Letters in legend" in the catalog.

**G. Proof.** Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 1341. Noted as "Large Letters on reverse" in the catalog.

**H. Brilliant Proof.** George Earle Collection (Henry Chapman, 6/1912), lot 3067. "Large letters" noted in the description.

**I. Proof.** An example purchased by Ard Browning for \$20 from the United States Coin Company in 1912, per Walter Breen. PCGS# 410001 Base PCGS# 5378

## SEATED QUARTERS

### 1839 No Drapery Quarter, Glowing MS66+ Sole Finest Certified of the Issue Ex: Gardner

**4036 1839 No Drapery MS66+ PCGS. CAC. Briggs 2-B.** The No Drapery Seated quarter type was struck for only three years — at Philadelphia in 1838 and 1839, and in New Orleans for part of 1840. The goal was to produce a United States Mint product that would depart from the aridity of previous designs on grounds of aesthetic appeal and artistic merit. The Seated Liberty motif, as adapted by Christian Gobrecht from drawings prepared by artist Thomas Sully, proved to be a welcome improvement over the earlier William Kneass designs, but Mint Director Robert M. Patterson soon saw room for further improvement. In 1839, Patterson secured the services of sculptor Robert B. Hughes to mildly remodel Gobrecht's Liberty. Hughes' modifications, first seen on the working dies of 1840, were thought to have increased the artistic merit of the portrait, most noticeably by adding a flare of drapery to the space near Liberty's right (facing) elbow. This With Drapery type was coined in one form or another for the next half century.

Modern collectors find superior artistic qualities in both designs, with many actually preferring the older No Drapery motif, partly due to its slightly more slender rendering of Liberty's figure. Of the three No Drapery issues, the 1838 and 1839 are the most often chosen for type purposes, as they are typically better struck than the similar New Orleans product of 1840. Of the two Philadelphia issues, the 1839 boasts the highest mintage (more than 491,000 coins), but is actually the scarcer coin in Mint State. Pieces grading MS61 to MS64 inclusive can be located with patience, but the certified population plummets dramatically at the Gem grade level, creating a significant challenge for the collector who must simply have nothing but the best.

This Plus-designated Premium Gem is a remarkable example of both the issue and the No Drapery type. Encapsulated by PCGS as MS66+ with a green CAC label confirming the high quality, it is the sole finest certified 1839 quarter, even if only by the margin of the Plus designation. There are two other MS66 coins reported at PCGS, but neither has received the Plus grade that sets this piece apart, and only a single MS65 coin trails; NGC contributes just one other MS66 piece (6/16). This makes of total of *no more than five Gem or better 1839 No Drapery quarters certified*, with the current coin being long-recognized as the sole finest.

Glowing luster proceeds from each side, highlighting the alternating areas of silver-white, lavender-gray, and copper-gold color that create intense eye appeal. Well-struck surfaces are noticeably free of even the smallest impairments. A few obverse stars are a trifle soft, but the remaining design elements are generally well brought up, further contributing to the visual quality. This high-end Premium Gem should certainly perform quite well at auction, given both its technical and aesthetic credentials as one of the finest No Drapery type coins available to collectors.

*Ex: Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98356. NGC ID# 23SF, PCGS# 5392*

## 1850-O Seated Liberty Quarter, MS66 Single-Finest Certified, Ex: Pittman

**4037 1850-O MS66 NGC. Briggs 2-C.** Ex: Pittman. A diagnostic die lump occurs under the arch of Liberty's foot, and the mintmark is barely left of center. From a mintage of 412,000 coins, the 1850-O is a scarce date, about on par with its contemporaries in circulated condition. In Mint State, however, the issue is conditionally rare. Larry Briggs assigns a rating of R.6, and perhaps 30 Uncirculated coins survive, most in the MS61 to MS63 range. This Premium Gem is in a class of its own. David Akers noted in the 1998 Pittman catalog: "I have never seen or heard of another 1850-O Quarter that compares to this one and, in my opinion, it is probably the finest known example of this rare issue ..."

Reddish-gold, violet, and blue elements color the obverse. The reverse is more golden-gray in tone with accents of mauve and a distinctive light toning streak from the S in STATES down through the eagle's wing to the L in DOLLAR. The well-struck motifs are lightly rusted and the dentils faint, as usual, but the date is clear. Frosty luster issues from surfaces that exhibit unmatched preservation. This is the sole finest example certified at NGC and PCGS combined (6/16).

Ex: Walrath Collection (Numismatic Gallery, 5/1948), lot 477, which realized \$5.00; John Jay Pittman; Pittman Collection, Part II (David Akers, 5/1998), lot 1318; Americana Sale (Stack's Bowers, 2/2015), lot 1511. NGC ID# 23T5, PCGS# 5416

**1855-O Arrows Seated Quarter, MS67**  
**Ex: Stickney, Eliasberg, and Gardner**  
**Finest Certified by Three Grade Points**

**4038 1855-O Arrows MS67 NGC. CAC. Briggs 1-B.** Ex: Eliasberg. This Superb Gem 1855-O Arrows quarter is by far the finest — by three grade points — example known of this, the lowest-mintage issue among the Arrows quarter dollars; struck to the extent of only 176,000 pieces and usually seen well-circulated with a miserable strike, to boot. The satiny luster on each side is complemented by lilac and gold toning, and showing a much-sharper strike on the head of Liberty and the obverse overall than usually seen.

Beyond its obvious aesthetic and numismatic allure, this coin boasts an unusually long pedigree dating back all the way to early numismatist Matthew Adams Stickney (1805-1894) of Salem, Massachusetts, one of the first Americans known to have systematically assembled collections of American coins in several series. Stickney is well-known for his 1843 visit to the U.S. Mint in Philadelphia, where he obtained an 1804 Class I silver dollar in exchange for other rare coins. One wonders how long he owned — and how he obtained — this early O-mint Seated quarter rarity, which would have been struck when Stickney was 50 years of age.

This piece was described in the Eliasberg catalog as “MS-66 or finer,” “a superb gem, a challenge to perfection,” and a “landmark coin,” among other superlatives. It is the sole finest certified at either leading service by three grade points and boasts the coveted CAC endorsement label. NGC and PCGS show two and three coins, respectively, in MS64 as the second-finest (6/16).

Ex: Matthew A. Stickney; *Stickney Collection* (Henry Chapman, 6/1907), lot 1195; John H. Clapp; *Clapp estate* (1942); Louis E. Eliasberg, Sr.; *Eliasberg Collection* (Bowers and Merena, 4/1997), lot 1460; later, purchased by Eugene Gardner from George Huang and Laura Sperber at *Legend Numismatics* (4/2008); Eugene H. Gardner *Collection, Part III* (Heritage, 5/2015), lot 98343. NGC ID# 49XK, PCGS# 5436

## 1857 Seated Liberty Quarter, MS67+ Only One Finer at PCGS, Ex: Gardner

**4039** 1857 MS67+ PCGS. CAC. Fabulous iridescent toning prevails on each side. The rim on the obverse displays concentric rings of varying shades of blue and then rose, with a golden-rose center. The reverse is sky-blue accented with rose-gold on each side. Bright underlying frosted luster only serves to make the color pop that much more. The strike is a bit soft on each side, but as expected for the extremely high grade, no mentionable contact marks appear.

This is the third time we have handled this same coin, although in its first two appearances it was in an NGC holder. It has now been crossed to PCGS at the same high grade and once again given the CAC approval — a marvelous piece, for which what we wrote twice previously still applies: “This one of those occasional numismatic treasures that we Heritage catalogers get to enjoy before the bidders — a coin that simply should not exist in so high a grade.” Population: 8 in 67 (2 in 67+), 1 finer. CAC: 9 in 67, 1 finer (6/16).

Ex: *Central States Signature* (Heritage, 4/2011), lot 5084, as MS67+ NGC, which brought \$10,350; *Eugene Gardner Collection, Part IV* (Heritage, 10/2015), lot 98436, as MS67+ NGC-CAC, realized \$10,575. NGC ID# 23TE, PCGS# 5442

## 1868-S Seated Liberty Quarter, MS64 Rare Branch Mint Issue in High Grade

**4040** 1868-S MS64 PCGS. Briggs 1-A. The 1868-S Seated Liberty quarter claims a mintage of 96,000 pieces, all struck from a single pair of dies. There was little interest in branch mint issues before about 1893, as most 19th century collectors were content to concentrate on date runs, acquiring a nice specimen from any Mint (often Philadelphia Mint proofs) to update their collection every year. As a result, few high-quality examples were saved by contemporary collectors and the 1868-S is very rare in high grade today.

The present coin is an attractive Choice specimen, with well-detailed design elements that show a touch of the usual softness on the upper stars and Liberty’s head. The well-preserved, lustrous surfaces show a few accents of amber toning, but no mentionable distractions are evident. Population: 6 in 64 (1 in 64+), 3 finer (7/16). NGC ID# 23UG, PCGS# 5473

**1873 Closed 3 Quarter, MS63  
The Single Finest Example  
Ex: Boosel, Bass**

**4041 1873 Closed 3 MS63 NGC.** The Philadelphia quarters of 1873 come in three separate variants: the 1873 Closed 3, the 1873 Open 3, and the 1873 With Arrows. Of these three varieties, the last has the highest mintage with over a million pieces struck. The 1873 Open 3 is one of the most available Motto quarter issues in Mint State despite a mintage of only 172,000 coins. The 1873 Closed 3 version is highly elusive with a total production of just 40,000 business strikes, and most survivors show some degree of wear. Although it undoubtedly underrated, collectors are aware of how elusive this issue is in mint condition. NGC and PCGS have certified a mere seven Mint State representatives between them, and the MS63 coin offered here is the single finest at both services combined (6/16).

This Select quarter is crisply defined on the design elements, and both sides exhibit luminous, glimmering luster. The obverse displays violet-inflected iridescence, while the reverse is essentially brilliant. A scattering of minor obverse marks precludes a finer designation.

*Ex: Harry Bass, Jr. Collection, Part I (Bowers and Merena, 5/1999), lot 2010 (Bowers and Merena catalogs report this coin is pedigreed to the Harry X Boosel "1873" Collection, RARCOA, 4/1972, lot 601, unplated); New York Signature (Heritage, 11/2003), lot 6188; FUN Signature (Heritage, 1/2008), lot 2785; FUN Signature (Heritage, 1/2009), lot 3753; Central States Signature (Heritage, 4-5/2009), lot 2344. NGC ID# 23UU, PCGS# 5484*

**1874-S Seated Liberty Quarter, MS67  
Exceptional Arrows Type Coin**

**4042 1874-S Arrows MS67 PCGS.** The 1874-S is one of the most plentiful issues in the brief With Motto, With Arrows Seated quarter type, a favorite for type purposes, but the number of examples surviving in MS66 or finer condition is impressively minimal. This Superb Gem is tied with four others as finest at PCGS; likely including one or more resubmissions, NGC contributes another eight coins in this grade, also with none finer (6/16). This piece is boldly struck and possesses beautifully preserved surfaces. Some light die rust on the reverse contributes to the overall frosty glow of the luster, while each side is graced by light champagne toning. Several reverse die cracks suggest a late die state. Among the finest coins known of the With Motto, With Arrows type. NGC ID# 23VY, PCGS# 5495

## PROOF SEATED QUARTERS

### 1840 Drapery Quarter, PR64+ The Eliasberg-Kaufman Coin Only Three Examples Known

**4043 1840 Drapery PR64+ PCGS. CAC. Briggs 1-A.** Ex: Eliasberg. Incorrectly identified in the Eliasberg catalog as Briggs 2-B. A remarkable and extremely rare issue, tied with the Pittman coin for the finest of just three known pieces and the only two that are available to collectors.

The modified With Drapery (at Liberty's elbow) hub was used for all 1840 quarters coined at the Philadelphia Mint. New Orleans coined both types, No Drapery and With Drapery. Inexplicably, Breen included an entry for 1840 "No Drapery" quarters in his 1977 *Proof Encyclopedia*. He also included another entry for 1840 With Drapery quarters. In his 1989 revised and corrected edition, Breen advised deletion of the No Drapery section. However, the reader is not told how to handle the deleted information. In the Eliasberg catalog, Dave Bowers elected to quote Breen's passage about the "No Drapery" quarters when this coin was offered, but failed to acknowledge the additional information provided for the With Drapery coins.

Regardless of who said what and when, the fact remains that the 1840 Seated quarter issue is exceedingly rare, likely Low R.8 with three known specimens, all With Drapery; accounting for the Smithsonian piece makes precisely two coins that are apparently available — at least theoretically — in the marketplace.

#### 1840 With Drapery Seated Quarter Roster

- 1. PR64+ PCGS. The present coin.** Louis E. Eliasberg, Sr. (Bowers and Merena, 4/1997), lot 1422; Phil Kaufman Collection / Milwaukee ANA Signature (Heritage, 8/2007), lot 1781, which realized \$149,500.
- 2. PR65 NGC.** Allenburger Collection (B. Max Mehl, 3/1948), lot 984; John Jay Pittman (David Akers, 5/1998), lot 1300; Superior (1/2004), lot 284.
- 3. Proof.** National Numismatic Collection; Smithsonian Institution.

A faint die crack from the second T in STATES to the top of the eagle's head positively identifies the reverse die. The die crack becomes extremely faint but can be followed through the eagle, shield, right wing, middle arrowhead, and finally to the lower right border.

Every feature that was engraved in the die is fully visible on this sharp proof. The fields have excellent depth of the mirrored finish. Light champagne and gold toning on the obverse is accented by peripheral lilac and blue. Deeper gray toning on the reverse is framed by peripheral blue, green, amber, and gold. This is the only PR64 certified by PCGS, and it is bettered only by one PR64+, none are finer (7/16). NGC ID# 23W3, PCGS# 5529

**1850 Seated Liberty Quarter, PR62**  
**One of Only Four Proofs**  
**Known, Ex: Gardner**

**1874 Arrows Quarter, PR67 Cameo**  
**White-on-Black Contrast**

**4044** 1850 PR62 PCGS. Briggs 3-C. Rose, amber-russet, and golden-gray patina lightly colors each side of this important proof rarity. Limitless depth in the fields, a full strike, and square rims affirm this coin's proof status. Scattered contact marks limit the grade. However, none are singularly distracting, nor do they diminish the importance of this offering. Housed in a green label holder.

**4045** 1874 Arrows PR67 Cameo PCGS. Briggs 5-D. The die line across the left border of the reverse shield identifies the Briggs pairing. Orange-red toning endows the lower margins of this fully struck and beautifully preserved Superb Gem. The motifs are icy and contrast with the glassy fields. Proof mintages for this two-year design subtype amounted to just 500 pieces in 1873 and 700 pieces in 1874. Arrows were added to signify a slight increase in weight from 6.22 to 6.25 grams, which made the new standard more compatible with the Metric system. Population: 2 in 67 (1 in 67+) Cameo, 0 finer (6/16). NGC ID# 23XS, PCGS# 85575

Like its 1841 counterpart, the 1850 proof Seated Liberty quarter survives to the extent of just four representatives. Gene Gardner purchased this coin as lot 156 in the August 1998 Rarities sale conducted by Bowers and Merena, where it was described as: "Fully detailed with complete mirrored fields. Unquestionably a Proof striking. Light ivory with splashes of blue and amber iridescence. A most attractive example of this extremely rare Proof issue ..." Population: 1 in 62, 1 finer (6/16).

Ex: Floyd T. Starr Collection (*Stack's*, 1/1993), lot 445; Rarities Sale (Bowers and Merena, 8/1998), lot 156; Gene Gardner; Gardner Collection, Part IV (*Heritage*, 10/2015), lot 98498.. NGC ID# 23WD, PCGS# 5544

## BARBER QUARTER

**1880 Quarter, PR68 Cameo  
Among Finest Certified**

**4046** 1880 PR68 Cameo PCGS. Briggs 2-B. Type Two Reverse with narrow feet on the As in the reverse legend. Forest-green toning dominates a majority of the obverse, leaving a window of brilliance across Liberty's waist and the left field. A narrow arc of plum-red serves as the transition between the toned and brilliant portions of the obverse. The reverse offers narrow but rich peripheral bands of autumn-brown, sun-gold, and ocean-blue. The remainder of that side is stone-white. A needle-sharp specimen with a pristine appearance and exceptional eye appeal. Of the two PR68 coins certified at PCGS of this date, one is PR68 and one is a Plus coin (6/16). NGC ID# 23XC, PCGS# 85581

**1901-S Barber Quarter, VF25  
Low-Mintage Key**

**4047** 1901-S VF25 PCGS. CAC. With a low reported mintage of 72,664 pieces, the 1901-S Barber quarter is the acknowledged key to the series, outdistancing even the famous 1896-S and the lower mintage 1913-S in terms of absolute rarity. Few examples were saved by contemporary collectors and high-grade specimens are sought-after rarities.

The present coin is a pleasing VF25 example that retains all major detail and much interior detail intact. On close inspection, LIBERTY and E PLURIBUS UNUM remain legible, but weak in places. The pleasing light gray surfaces are lightly abraded and the overall presentation is quite attractive for this challenging issue. Population: 10 in 25, 59 finer. CAC: 3 in 25, 8 finer (7/16). NGC ID# 23YR, PCGS# 5630

## PROOF BARBER QUARTERS

### 1896 Quarter, PR69 Deep Cameo The Sole Finest at PCGS Immeasurable Eye Appeal

**4048 1896 PR69 Deep Cameo PCGS.** Mind-blowing — there is no other way to describe the impact this 1896 proof makes on the eyes. Tack-sharp relief elements display genuinely glowing frost-white luster, while the depth of the mirroring in the fields seems almost unreal. Old-time sun-gold, violet, and ocean-blue toning hugs the borders, while the interiors remain nearly brilliant to accentuate the Cameo effect. A loupe exposes the flawless preservation of the fields.

Deep Cameo examples of the 1896 proof are infrequently seen and are rare at the Superb Gem level. This example is the sole finest at PCGS (6/16), a distinction that places it firmly as the top Registry Set example of the issue. A Cameo is also certified in PR69, but the present coin's remarkable contrast is not rivaled. PCGS has certified only seven proof Barber quarters at the PR69 numeric level across the entire series, only two of which are Deep Cameos (6/16). The sheer rarity of coins graded so fine would in and of itself place this 1896 proof at the top of any collector's want list, but the dramatic eye appeal that this coin delivers is arguably without equal.

The price record for this date was set back in our 2009 FUN Signature sale, where the NGC PR69 ★ Ultra Cameo coin realized \$34,500. Given the immeasurable eye appeal and top-of-the-line technical quality of this comparably graded PCGS coin, that price record may well be breached when this piece crosses the auction block. NGC ID# 242B, PCGS# 95682

## 1911 Barber Quarter, PR68 Richly Toned, Rare So Fine

**4049 1911 PR68 PCGS. CAC.** The 1911 proof quarter has the third lowest mintage in the series, only trailing the 1914 (380 proofs) and the 1914 (450 proofs). The 543-piece mintage for 1911 goes far toward explaining the lack of high-grade examples of this issue. Sky-blue, navy, lavender, and mint-green blend over the pristine surfaces of this high-grade 1911 proof Barber quarter — among the finest non-Cameos known. CAC has endorsed only four such pieces in PR68. This sharp 1911 is almost flawlessly preserved and offers appreciable contrast even through the blanketed toning. Population: 5 in 68, 0 finer (7/16). NGC ID# 242T, PCGS# 5697

## 1912 Quarter, Beautifully Toned PR68 Unacknowledged Cameo Contrast

**4050 1912 PR68 PCGS. CAC.** The 1912 proof is a great rarity at the PR68 level, with or without cameo contrast. Inexplicably, the mintage for 1912 rose from 543 proofs the previous year to 700 in 1912. However, this increased production has not yielded more high-grade 1912 proof quarters. This PR68 example is not designated a Cameo but nonetheless showcases stark field-motif contrast on both sides. The iridescent surfaces yield many colors, although sun-gold, violet, forest-green, and mint are the most prominent. Slight strike weakness is seen on the eagle's right (facing) talons and wing junction. CAC has awarded green labels to five pieces in this grade and none finer. Population: 3 in 68, 1 finer (7/16). NGC ID# 242U, PCGS# 5698

## STANDING LIBERTY QUARTERS

### 1916 Standing Liberty Quarter, AU58 Original Luster Remains

**4051** 1916 AU58 PCGS. High-end AU 1916 Standing Liberty quarters are more elusive than Full Head Mint State examples. Due to the mushy detail of the design, even slight wear can make a coin grade as low as XF. Many of the true AU58 pieces on the market have been dipped or otherwise brightened — usually to the detriment of eye appeal. This near-Mint example is decidedly original, showing moderate luster in the fields with light golden toning overall. Eye appeal surpasses expectations. Several toning specks around Liberty's head and on the central reverse will appeal to the pedigree-tracking enthusiast or serve as future provenance markers. If an AU-level 1916 is desired, none have been seen that surpass this example with regards to overall quality. NGC ID# 43XR, PCGS# 5704

### 1916 Standing Liberty Quarter AU58 Full Head Low-Mintage, First-Year Key

**4052** 1916 AU58 Full Head PCGS. CAC. The 1916 Standing Liberty quarter was struck late in the year and none were actually released until January 1917. The mintage was a paltry 52,000 pieces, but the low mintage figures failed to alert most contemporary collectors because the 1917-dated quarters began to appear at the same time. As a result, the 1916 Standing Liberty quarter did not receive the kind of attention most first-year issues enjoy, and few high-grade examples were saved. The 1916 would achieve prominence in the 1930s, when information was more available to the numismatic community, and it has been an acknowledged key ever since.

The present coin is an attractive near-Mint specimen, with just a trace of wear on the high points of the design elements and full definition on Liberty's head. The surfaces are lightly abraded and retain much original mint luster, under shades of golden-brown and magenta toning. NGC ID# 2AMV, PCGS# 5705

## 1916 Standing Liberty Quarter Lightly Toned MS63 Full Head

**4053 1916 MS63 Full Head PCGS Secure.** Ex: Michael F. Hayes. While there are many condition rarities known in the Standing Liberty quarter series today, there was a period from the late 1910s well into the following decades when the 1916 was far and away more sought-after than any other issue. Even the 1918/7-S was not publicized until the late 1930s, and the rarity of Full Head branch mint issues in high grade became only gradually apparent over the course of many years. The 1916 was famous from the beginning and has retained that significance to the present day. It is the most expensive key date in the series in low circulated grades, trumping even the overdate, and in Full Head Mint State ranks among the most challenging to acquire.

The 1947 *Guide Book* listed the 1916 Standing Liberty quarter at \$80 in Uncirculated condition. By 1963, Mint State pieces were cataloged at \$500, and in 1964 the *Guide Book* value spiked to \$900 and continued an upward climb after the conversion to clad coinage in circulation. The 1997 Bowers and Merena catalog of the Eliasberg Collection stated: "Today ... fame of the 1916 is widespread, and it immediately comes to mind whenever 20th century rarities are mentioned." The Uncirculated Eliasberg coin realized \$9,350, a strong price at the time but one that pales in comparison to those garnered by high-end examples today. The last MS63 Full Head PCGS representative we offered was in the Central States Signature sale (Heritage, 4/2016), which realized \$21,150. This Select Full Head example is well-defined for the issue with satiny luster and light golden toning. Grade-limiting abrasions are minimal.

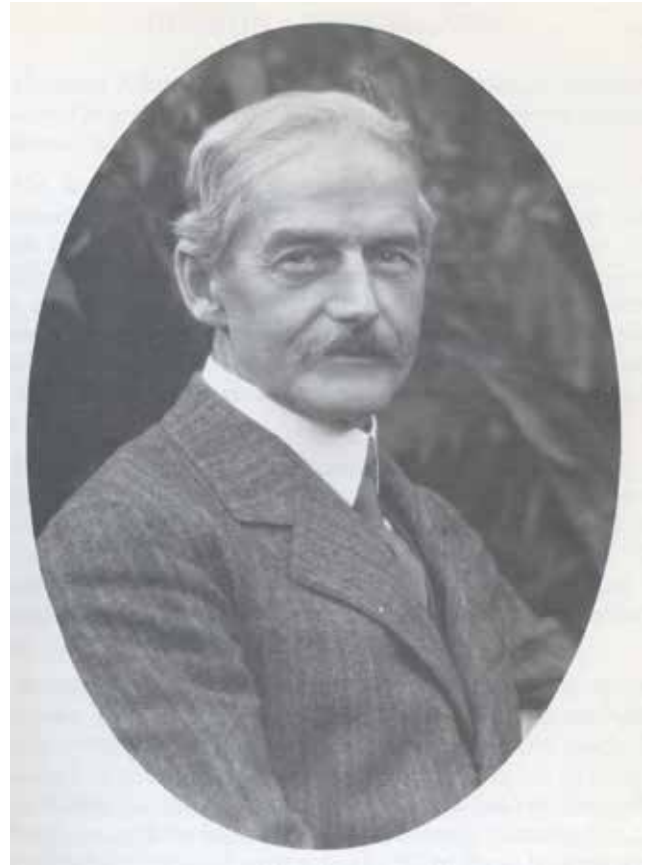

**From The Eagle One Collection, Part III.** NGC ID# 2AMV, PCGS# 5705

## 1916 Standing Liberty Quarter, MS63 Lightly Toned Full Head Example

**4054 1916 MS63 Full Head NGC.** Ex: Lehrer. Hermon MacNeil designed the Standing Liberty quarter to depict the United States' preparedness for the World War that was underway in Europe. The official press release of May 30th, 1916, stated: "The design of the Twenty-five Cent piece is intended to typify in a measure the awakening interest of the Country to its own protection." Liberty is depicted striding forward through the gate of the country, holding an olive branch of peace while at the same time uncovering a shield that symbolizes a desire and ability to defend. The design was altered in mid-1917 at the request of MacNeil, who added — among other modifications — chainmail armor to Liberty's torso. The design of the 1916 issue and the earliest 1917 coins show Liberty with a bare right breast — a reflection of MacNeil's classical tendencies in his allegorical figures. Despite numismatic legend, the design change of 1917 was not prompted by public disapproval of the seminude figure, but rather was begun at the request of MacNeil who felt that the Mint had "garbled" the execution of his design. The reason for the addition of chainmail armor is not recorded in any surviving records, although numerous theories have been proposed.

This Select Full Head 1916 Standing Liberty quarter boasts pleasing eye appeal for the grade, with satiny luster and a blush of light golden toning. Only a few trivial grazes are observed as grade-limiting flaws. Portions of the fields have an almost mattelike appearance, as is typical of the Type One coins. NGC ID# 2AMV, PCGS# 5705

**From the Craig and Jeff Lehrer Collection.**

*Herman MacNeil*

### 1917-D Type One Quarter, MS67+ Full Head Rarely Seen So Fine

**4055 1917-D Type One MS67+ Full Head PCGS.** The 1917-D Type One quarters were struck in abundant numbers (1.5 million piece) and probably 25% were struck with full head detail; yet its availability does not approach that of its Philadelphia counterpart. J.H. Cline estimated on many years of experience that the D-mint sells for only twice the price of the P-mint, but it is three to five times scarcer — an observation that of special importance to those looking for value in this popular series. This Superb Gem has a bold strike with frosty silver luster beneath wispy champagne toning, the reverse almost entirely untoned. Population: 24 in 67 (3 in 67+) Full Head, 1 finer (7/16). NGC ID# 2432, PCGS# 5709

## 1918/7-S Quarter, Beautiful MS67 Tied With One Other for the Finest Known Single Finest Overdate Ever Offered at Auction

**4056 1918/7-S FS-101 MS67 NGC.** No issue in the entire Standing Liberty quarter series is as much of a rarity in high grade as the 1918/7-S. The overdate was not discovered until nearly two decades after its creation, by which time collectors' best chance of finding an example was to pluck a worn piece from circulation. Bank rolls and other accumulations of Mint State 1918-S quarters yielded extremely limited results when searched for the overdate. By the late 1940s, the 1918/7-S was an established series key. The 1948 *Guide Book* listed the overdate at \$150.00 in Uncirculated condition — significantly higher than the other series key, the 1916, which was listed at only \$90 in the same condition. Today, the overdate remains the rarer and more valuable coin, particularly in Mint State.

The 1918/7-S also rivals the 1916 as the most poorly struck issue in the series. This issue is almost always seen with heavy clash marks in the recesses of Liberty's gown and evidence of die lapping in the fields. The shield is never seen sharp, and Full Head detail is present on only a fraction of the already scant Mint State population. When it comes to the 1918/7-S, it is challenging enough just to find a sharp date and well-struck eagle. And this without consideration of condition. A moderately well-struck coin in a middle or upper Mint State grade is an incredible rarity.

A number of resubmissions are likely reflected in the certified population figures for this issue, although the general clustering of Mint State coins in the MS62 to MS64 grade range is accurate. Gem or finer coins are extremely rare, and none this well preserved are in Full Head. The finest non-Full Head coin at PCGS is a single MS66, followed by three MS65s. At NGC, there are four MS65s, an MS66, and two MS67s — one of which is the present coin (7/16). The number of recent auction appearances of MS65 and MS66 pieces can be counted on one hand, and this is the first time that a Superb Gem 1918/7-S quarter has ever been likewise offered.

One glance at this piece and the astute collector will marvel. The luster is remarkably thick and frosty for an issue that often comes dull and satiny, with light champagne toning that accents the margins. The strike is also impressive: Liberty's head detail is far above average for the issue with the three sprigs showing plainly, and the shield shows at least partial definition on all rivets and lines. The central torso and the reverse eagle are also far better defined than is typical of the 1918/7-S. The eye appeal generated by the MS67-quality surfaces is stunning, with no obvious abrasions. This piece, when considered for rarity, quality, and eye appeal, is arguably just as important of a consideration for the advanced collector as one of the finest Full Head pieces. A 1918/7-S of simply unsurpassed quality. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

### 1918-S Quarter, MS66 Full Head Conditionally Rare

**4057 1918-S MS66 Full Head PCGS.** Full Head 1918-S quarters are plentiful in MS63 and MS64, and Gems are occasionally seen. But in MS66 Full Head, this slightly better San Francisco issue becomes a major rarity, and finer pieces are prohibitively scarce. In this grade, it is about on par with the 1926-D in terms of rarity, suggesting the issue is slightly underrated. The present example is sharply struck from worn dies that have subtle metal flowlines in the fields and recesses. A heavy die crack runs horizontally through the date. The coin displays satiny mint luster with dustings of olive-gold toning over portions of each side. Population: 14 in 66 (3 in 66+) Full Head, 1 finer (6/16). NGC ID# 2439, PCGS# 5725

### 1919-S Quarter, Beautifully Toned MS67 The Sole Finest Non-Full Head at PCGS

**4058 1919-S MS67 PCGS.** This is arguably the finest non-Full Head 1919-S quarter that we have ever offered, and it is the single finest certified by PCGS. NGC lists three coins numerically equal to this piece, also with none finer (6/16). Glimmering mint luster appears unblemished, and the strike is above-average for a non-Full Head 1919-S. Liberty's head is a trifle soft at the temple, but the shield and other central high points are remarkably sharp. The pastel toning on this coin is itself an eye-catcher. Blended lavender and ice-blue form a delicate swath across the central obverse and over the lower reverse, while much of the remainder of each side is champagne-gold. A ribbon of lemon-yellow stretches across the upper-right obverse rim. This magnificent coin is plated on PCGS CoinFacts, and is without a doubt the finest quality available of this date without the Full Head designation. A strong bid will not be poorly placed. NGC ID# 243D, PCGS# 5732

## 1919-S Quarter, MS65 Full Head Incredibly Sharp, Conditionally Rare

**4059 1919-S MS65 Full Head NGC.** Although not as rare as the 1927-S and the overdate, the 1919-S Standing Liberty quarter does rank among the top “stoppers” in the series in high-grade Full Head. Like its Denver counterpart, this issue is known for its weak strike and often lackluster appearance. Full Head coins are elusive in any grade but become genuine rarities at the Gem level.

The present example is an outstanding coin, showing razor-sharp head, shield, and date elements. A hint of light golden toning graces the satiny, lustrous surfaces. The fields are clean, and only a few trivial grazes along Liberty’s forward leg preclude an even finer designation. The last Gem Full Head coin we offered was a PCGS example in the Long Beach Signature sale (Heritage, 6/2013), lot 4481, which realized \$35,250. The present coin is noticeably sharper on Liberty’s head.

**From The Eagle One Collection, Part III.** NGC ID# 243D, PCGS# 5733

## 1921 Quarter, MS66 Full Head Condition Rarity

**4060 1921 MS66 Full Head PCGS. CAC.** The 1921 Standing Liberty quarter is semikey date in all grades, although most of its recognition is in regards to circulated pieces. In Full Head Mint State, the 1921 has to share the spotlight with numerous other condition rarities, and it all too often unfairly fades into the background. In MS66 Full Head, the 1921 quarter is genuinely rare, and finer pieces are prohibitively so. The present coin displays softly frosted, champagne-tinted mint luster with unabraded surfaces. The shield and other central elements are sharp, as usual on this issue, while Liberty’s head and the date — the usual weak spots on the 1921 — are remarkably well-defined. The CAC endorsement confirms the outstanding eye appeal. Population: 24 in 66 (2 in 66+) Full Head, 2 finer. CAC: 11 in 66, 3 finer (6/16). NGC ID# 243H, PCGS# 5741

## 1926-D Quarter Dollar, MS67 Full Head The Single Finest Full Head Certified

**4061 1926-D MS67 Full Head PCGS.** As Standing Liberty quarter specialist, J.H. Cline puts it: "The 1926-D is the classic in two categories: most available and most flat heads." The generally accepted reasoning for this issue's availability in lower Mint State grades is that many more bank-wrapped rolls of this date were saved than of any other. However, with Full Head examples, no amount of hoarding could preserve what hardly existed in the first place. Cline writes in the September 11th, 1998 edition of *The Coin Dealer Newsletter*:

"... the 1926-D is a very common coin in MS62 through MS65, having an original mintage of 1,716,000. However, when struck with a Full Head and with that notation on the holder it becomes one of the rarest pieces in the series - more so than the 1916!"

Due to the rarity of high-grade survivors, Full Head 1926-D quarters make rather large jumps in value between Mint State grade levels, resulting in numerous resubmissions that undoubtedly inflate the population data. In his book, *Standing Liberty Quarters*, fourth edition, Cline cites an occurrence when a friend of his resubmitted a single 1926-D at least seven times hoping for an upgrade. He then estimates that as much as half of the population totals are the result of break-outs, which, if accurate, would mean that only about 65 or 66 Full Head 1926-D quarters are extant in all grades.

This exceptional Superb Gem is in a class by itself as the single finest-certified Full Head 1926-D quarter (11/15). Exceptionally sharp definition on Liberty's head, chain mail, shield rivets, and the leading edge of the eagle's right wing leaves no doubt as to the designation. Rich teal, violet, and golden accents grace portions of the peripheries, while frosty, brilliant luster blankets the remainder of the surfaces. A couple tiny, faint ticks are noted on Liberty's forward leg, but in no way disrupt the visual appeal of this piece. A truly remarkable example of this notoriously poor-quality issue. NGC ID# 243S, PCGS# 5757

## 1927-S Quarter, Beautiful MS66 Early Die State Condition Rarity

**4062 1927-S MS66 PCGS.** Although Full Head coins absorb the bulk of the collector attention, non-Full Head 1927-S quarters in Mint State are themselves scarce. This issue had a low mintage 396,000 pieces and was not reserved in any significant quantity in Mint State. The 1927-S typically comes with satiny luster, rather than deeply frosted surfaces, and bagmarks are a detraction on many Uncirculated examples. Most representatives were struck with heavily clashed dies that show extensive mint-induced polishing lines in the fields from attempts to efface the clashes. The present Premium Gem is remarkably devoid of these lines and clash marks on the reverse, and the obverse shows only minimal traces of them around Liberty's torso. The surfaces are softly frosted and devoid of mentionable abrasions, all the while displaying a hint of light golden toning. Liberty's head and the shield show typical softness, but this is undoubtedly among the finer-known examples for the grade. Population: 33 in 66, 5 finer (6/16).

*From The Eagle One Collection, Part III.* NGC ID# 243W, PCGS# 5764

## 1928-D Quarter, MS67+ Full Head Finest Example We Have Offered

**4063 1928-D MS67+ Full Head NGC. CAC.** Little stands out about the 1928-D production total of 1.6 million coins. Specialists will acknowledge, however, that the issue is a semikey strike rarity with Full Head definition. The late J.H. Cline wrote in the fourth edition of his reference on the series: "Full Heads of this date are easily worth more than ten times flat head prices, or even more if the piece is outstanding." Such is the case with this MS67+ Full Head quarter. Satiny luster flows over brilliant surfaces virtually devoid of imperfection. A bold impression shows strong vertical shield lines and chainmail. The all-important temple is clear with three olive leaves. This is the finest example we have offered, according to our Permanent Auction Archives established in 1993. Census: 2 in 67 (1 in 67+) Full Head, 0 finer (6/16). NGC ID# 243Y, PCGS# 5769

## WASHINGTON QUARTER

**1950-S/D Quarter, MS67  
Among Finest Certified**

**4064** 1950-S/D FS-601 MS67 PCGS. CAC. Blushes of lavender-red, sea-green, and plum-mauve adorn the peripheries of this lustrous and nearly immaculate Superb Gem. The strike is crisp save for minor blending on the centers of the RICA in AMERICA and the RTY in LIBERTY, caused by curvature of the dies. *Cherrypickers'* refers to FS-601 as "certainly one of the most popular Washington varieties," and it has been listed in the *Guide Book* for many years. A 1950-D/S variety is also known, and one wonders whether the same mint worker was responsible for both blunders. Population: 6 in 67, 0 finer (6/16). CAC Population: 2 in 67, 0 finer (6/16). NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

## EARLY HALF DOLLARS

**1794 Half Dollar, O-101a, Fine 15  
Ideal First-Year Flowing Hair Type**

**4065** 1794 O-101a, T-7, High R.3, Fine 15 PCGS Secure. Tompkins Die State 1/5. A Choice Fine example of the latest die state of the O-101a (T-7) variety, with a die crack from the tip of the single olive leaf between STATES OF to the second S in STATES. Strong, full rims and dentils remain on both sides of this smooth and attractive early half. The O-101 in any die state is the overwhelmingly favored variety for 1794 type as the most available die marriage.

Warm-gray toning covers both sides with gold highlights beneath the patina. The reverse displays blue and reddish-gold overtones. Aside from smooth wear, the devices retain bold detail for the grade with hair and wing definition suggestive of an even finer grade. A glass reveals some light lines and a pair of small digs beneath the first A in AMERICA. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

## 1794 Flowing Hair Half Dollar, Fine 15 O-101a, First-Year of Design

**4066** 1794 O-101a, T-7, High R.3, Fine 15 PCGS. Tompkins Die State 1/5. Light silver-gray toning deepens slightly at the margins of this Choice Fine Flowing Hair half. The rims are full on both sides, with only minor loss of obverse milling between 3 and 5 o'clock. The reverse is particularly sharp for the grade with high, strong rims.

Struck from a late die state, the reverse shows a bold die crack beneath O in OF to the single leaf, with a faint extension of the crack to the last S in STATES. The date is bold despite moderate wear and a few light lines and abrasions from circulation. A pleasing example of this scarce and popular first-year issue. Housed in an old green label holder.

*Ex: Allstate Coin Co.*

**From The Hamilton Collection.** NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

## 1794 O-101a Half Dollar, VF25 Scarce First Year Type Coin

**4067** 1794 O-101a, T-7, High R.3, VF25 PCGS. Die cracks through the F in OF, and between nearby leaves, help attribute this first-year Flowing Hair half. The obverse has a cream-gray portrait along with an olive-gray field and glimpses of brick-red throughout the border. The reverse exhibit golden-brown near the letters, while the field is sea-green and the eagle and wreath display lavender toning. A pair of minor and parallel adjustment marks (as coined) cross the cheek, but abrasions are trivial aside from a slight rim knock at 5:30 and faded marks near star 7 and the IB in LIBERTY. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

### 1794 O-101a Half Dollar, VF25 Rich Original Toning, Problem-Free Surfaces

**4068** 1794 O-101a, T-7, High R.3, VF25 PCGS. CAC. Tompkins Die State 1/5. The availability of the variety puts the O-101a high on the list of type and date collectors needing a first-year example of the Flowing Hair type. The short-lived, two-year design was retired after the 1795 half dollars were struck. A reported mintage of just 23,464 pieces makes the 1794-dated coins scarce and always in strong demand.

This is a richly toned, deep-gray example with lighter grayish-tan toning on the high points. Blue and faint gold highlights add interest to the remarkably unabraded surfaces. Strong definition remains on the central motifs for the assigned grade. Housed in an old green label holder with CAC endorsement. Population (all 1794 varieties): 45 in 25, 69 finer (6/16).

*Purchased from "Williams" 2/1988.*

**From The Hamilton Collection.** NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

### 1794 Flowing Hair Half, XF45 O-101a, Sharp and Attractive

**4069** 1794 O-101a, T-7, High R.3, XF45 PCGS. Tompkins Die State 1/5. Still housed in the same old green label holder in which it made its last auction appearance in 1993, this delightful Choice XF 1794 half dollar retains its high aesthetic appeal. Colorful border toning includes gold, sea-green, and blue shades that merge with attractive, lilac-gray centers that display hints of mint luster behind the rich patina. A tiny, deep-gray toning spot near the chin pedigrees the coin, which is well-struck and well-centered. Faint adjustment marks are visible with a loupe in the reverse fields, but they largely avoid the raised devices.

When offered 23+ years ago, this piece was the third-finest known of the variety and solidly within the Condition Census for the die pair. Today, the market better understands the scarcity and importance of 1794 half dollars. Many grading events have altered both the number of candidates and the grades recorded, with the recent Steve Herrman Condition Census reporting three Mint State examples of the O-101a — including the Pogue coin, which realized \$763,750 in MS64. Several About Uncirculated coins occupy the lower end of the Census. The present coin is not listed, but it holds down a place in the top 10 for the variety. It would be no surprise if that position improves at some point in the future. PCGS Population (all 1794 varieties): 5 in 45, 12 finer (6/16).

*Ex: John A. Van Arsdall, M.D. and Antelope Valley Sale (Bowers & Merena, 1/1993), lot 466.*

## 1794 Flowing Hair Half Dollar, Fine 15 Important First-Year Issue, O-105, T-3

**4070** 1794 O-105, T-3, R.5, Fine 15 PCGS. A modest mintage of 23,464 Flowing Hair half dollars was accomplished in 1794, the first year of the denomination. Eleven different die varieties are known for the date. This coin represents the O-105 variety, with star 2 attached to the lowest curl and the leaf attached to the right base of I in AMERICA. This piece shows extensive wear on the design elements, but the hair ends are bold and some interior detail in the hairlines remains intact. The pleasing lavender-gray surfaces are lightly abraded, with some light planchet adjustment marks on the upper reverse. The 1794 is always popular with first-year type collectors, as well as series specialists. NGC ID# 24E6, PCGS# 39206 Base PCGS# 6051

## 1794 Flowing Hair Half Dollar, XF40 Rare O-106 Example

**4071** 1794 O-106, T-4, Low R.6, XF40 NGC. This very rare die pairing is attributed by star 2 touching the lowest hair curl on the obverse. The berries are arranged 10 left, 11 right on the reverse, a leaf pair between O and F in OF, and the M in AMERICA is lower at the bottom than the adjacent A. This piece as yet shows no sign of the O-106a obverse die state, showing a bisecting crack through LI and the top of Liberty's head. The deeply toned surfaces on this piece show extensive planchet adjustment marks in the central obverse that intermingle with a few of what appear to be post-Mint scrapes. The reverse shows no mentionable contact or file marks. NGC ID# 24E6, PCGS# 39208 Base PCGS# 6051

## 1795 2 Leaves Half, O-105a, MS62 Attractive, Condition Census Coin

**4072** 1795 2 Leaves, O-105a, T-25, R.4, MS62 NGC. CAC. Tompkins Die State 3/3. While the O-105a variety ranks about equal to several other 1795 die pairs in terms of availability, at the MS62 level no Flowing Hair half can be considered common. The present coin is not only of high technical grade, the eye appeal exceeds all but a handful of Mint State compatriots in terms of luster and surface quality regardless of variety. Soft luster resides beneath a cloak of light umber and champagne-gold toning on the obverse, while the reverse is particularly lustrous amid golden toning and a swath of cerulean-blue that angles across the eagle's legs. The coin is one of just six 1795 halves to be awarded CAC endorsement at the MS62 grade.

The strike is a bit up and down on the variety, perhaps a function of the late die stage. Numerous die cracks encircle the obverse stars and intrude radially from the rims. The reverse shows advanced cracks through AMERICA and a diagnostic radial crack from the rim near I of UNITED to the wing. Sharp definition on Liberty's hair strands offsets minor weakness at the forehead and blending of several star centers. The eagle's leg and tail area show a similar uneven strike.

Fewer than 100 Mint State grading events are reported by PCGS and NGC combined for 1795 half dollars, including all 31 varieties. The Tompkins reference estimates a total mintage of just under 320,000 half dollars for the year, some of which may have been dated 1794. By any measure, the survival of an Uncirculated Flowing Hair half is an extremely rare occurrence and a buying opportunity not to be missed by any advanced collector. NGC Census (all varieties): 20 in 62, 21 finer (6/16). CAC 6 in 62, 7 finer.

**1795 Flowing Hair Half, MS61  
O-110, Rare Uncirculated Example**

**4073** 1795 2 Leaves, O-110, T-21, R.3, MS61 PCGS. Tompkins Die State 2/1. The O-110 variety is identified in later die states by a pair of curved, multi-level die cracks between RTY of LIBERTY and stars 10 and 11. The Tompkins reference points out that the reverse actually cracked first — at ED of UNITED. Since this example shows no die cracks on either side, the early die state is confirmed. Bold die clashing on both sides precludes a perfect state of the dies.

In all, PCGS reports fewer than 50 grading events for Mint State 1795 Flowing Hair halves of any variety. The Steve Herrman and Donald Parsley references suggest only a handful of the O-110 variety exist in Uncirculated condition, where MS63 is the finest-reported example. The present coin is clearly Mint State with an exceptional sharpness on Liberty's hair strands and on the eagle's plumage. The strike is less sharp on the obverse stars, which often lack their centers on the O-110. The breast feathers are complete. Both sides display deep, slate-gray patina. Streaky, brownish-gold toning runs across the obverse. Housed in an old green label holder.

*Ex: Allstate Coin Co. (10/1991).*

## 1796 15 Stars Half Dollar, O-101 Conservatively Graded Fine 12 The Norweb Specimen

**4074 1796 15 Stars, O-101, T-1, R.5, Fine 12 PCGS. Amato-133.** Light gray toning imbued with hints of soft gold runs over both sides of this 1796 15 stars half dollar. Relatively strong definition on the design features is apparent for the designated grade. Specifically, the lower portion of Liberty's hair displays considerable detail as does the eye and the drapery lines. In the opinion of this cataloger (JPA) the obverse of this coin can lay claim to a Fine 15 level of preservation. Likewise, the reverse definition is strong for the grade designation, especially the feather detail on the right (facing) wing that is virtually complete (save for light high-point wear) and that on the tail. The cloud and wreath detail and all letters in the legend exhibit nice definition. The reverse might well fall into the Very Fine category. The surfaces are quite clean for a large silver coin having experienced moderate circulation. A shallow scrape between star 8 and the L in LIBERTY and a toning spot on the rim above the T, while not in the least detractive, will help to identify the coin. Housed in a first generation holder, perhaps helping to account for the conservative Fine 12 grade.

**Variety:** O-101, R.5. The 1796 15 Stars obverse is paired with the first of two reverses that were used to produce Draped Bust Small Eagle half dollars.

**Population Data (7/16):** PCGS shows 10 pieces graded Fine 12 and 41 submissions finer.

**Commentary:** Our ongoing research into the Draped Bust Small Eagle half dollar series indicates that the 1796 15 Stars variety has the second largest number of examples in all grades behind the 1797 Overton-101 variety (which includes the O-101 and O-101a die state).

**Provenance:** *B. Max Mehl, 1/1937 to the Norwebs (per Bowers and Merena, 11/1988); Norweb Collection, Part III (Bowers and Merena, 11/1988), lot 3025; Superior Galleries (1/1990), lot 3420.*

**From The Hamilton Collection.** NGC ID# 24E9, PCGS# 39261 Base PCGS# 6057

## 1796 15 Stars, Well-Defined VF30 The Ten Eyck Specimen, O-101

**4075** 1796 15 Stars, O-101, T-1, R.5, VF30 PCGS. Amato-126. Dark gray patina around the borders frames the lighter gray centers that shows hints of lavender on the obverse and soft green on the reverse. Liberty's hair is well-defined as are the drapery folds, and the eyebrow and pupil show clearly. The eagle's wings, clearly separated from the torso, display considerable feather detail, especially throughout the right (facing) wing. Both sides are remarkably devoid of mentionable marks. A planchet defect is visible on the rim above the B in LIBERTY and another between ER. A faint pinscratch from the beak to the tip of the adjacent palm leaf helps to identify the coin, as do two small toning spots on the torso. This coin is housed in an old green label holder.

**Variety:** O-101, R.5. This 15 star obverse is paired with the Overton Reverse A, the first of two reverses that were used to coin the Draped Bust Small Eagle half dollars.

**Population Data (7/16):** PCGS reports eight 1795 15 Stars submissions in VF30 and 17 examples finer.

**Commentary:** The Draped Bust Small Eagle half dollar bearing the date 1796 or 1797 is one of the rarest U.S. type coins, behind only the 1796 No Stars and 1808 quarter eagles. Not only is a 1796 or 1797 half dollar necessary for the completion of a type set (which would undoubtedly be an advanced set), but the 1796 15 Stars issue is necessary for a date or variety collection. The present coin pedigrees to the famous James Ten Eyck Collection

**Provenance:** *James Ten Eyck Collection* (B. Max Mehl, 5/1922), lot 432; *James A. Stack Collection* (Stack's, 3/1975), lot 314; *Moreira Collection, Part 3* (Superior Galleries, 1/1989), lot 4418; *Bowers and Merena* (9/1992), lot 1034.

## 1796 16 Stars Half Dollar, VF25 The Frontenac Specimen, O-102

**4076** 1796 16 Stars, O-102, T-2, High R.5, VF25 PCGS. CAC. **Amato-216.** The light gray surfaces of this VF25 Small Eagle half dollar exhibit well-defined design features. Considerable detail is apparent in Liberty's hair strands, eye, and drapery folds, and the eagle's wing and tail feathers, the clouds, and palm and laurel wreath. The dentilation shows clearly over both sides and the devices are well-centered on the planchet. A thin diagonal toning streak from the tip of the right (facing) wing to the rim at 5:30 identifies the coin, as does a mark on the cloud beneath the left (facing) wing. The die crack from the rim through stars 1 to 4 that is seen on about one-third of the known surviving 1796 16 Stars specimens is absent on this piece. Housed in an old green label holder.

**Variety:** O-102, High R.5. The 1796 16 Stars was the second obverse paired with Overton's Reverse A.

**Population Data (7/16):** PCGS has seen four submissions in VF25 and 12 coins finer. The present coin was given a sticker by CAC as were two pieces grading higher.

**Commentary:** The 1796 O-102 die marriage is the only one of the four Draped Bust Small Eagle half dollars to show 16 stars. Walter Breen (1988) writes: "... the 16-star die must have been completed either anticipating or following the the celebration at that time" (Tennessee's June 1, 1796 admission to the Union). Contemporary evidence in newspapers (such as an August 25, 1794 editorial in the *Knoxville Gazette* calling for statehood), along with the 1795 results of a census enumeration, suggest that the 1796 16 Stars obverse die was likely engraved several months prior to Tennessee's June 1, 1796 admission.

**Provenance:** *Paramount* (8/1974), lot 98; *Kensington Collection* (Bowers and Ruddy, 12/1975), lot 480; *Frontenac Sale* (Bowers and Merena, 11/1991), lot 3017.

**From The Hamilton Collection.** NGC ID# 24EA, PCGS# 39262 Base PCGS# 6058

## 1797 Half Dollar, Originally Toned VF20 O-101a

**4077 1797 O-101a, T-1, High R.4, VF20 PCGS. CAC. Amato Unlisted.** Light- to medium-gray original toning imbued with whispers of gold and purple shows over both sides of this VF half dollar. Liberty's hair displays considerable hair-strand detail, and the drapery is well-defined, including clear delineation of the drapery line with the chest. The eyebrow and pupil are strong, and the eagle is fully outlined and feather detail is visible in the tail and somewhat in the left (facing) wing. The expected marks associated with moderate circulation are noted on each side. Housed in a first generation holder.

**Variety:** O-101a, High R.4. Overton's Reverse A, that began to crack when it was paired with the 1796 15 and 16 star obverses, continues to show more cracks. In particular, a crack now extends from the upper part of the left (facing) wing to the rim, from the rim above the first T in STATES to the upper neck, and a crack through the bottom of ST connecting the previous two. It is this series of cracks that differentiates the 1797 O-101 from the O-101a die state. Subsequently, Reverse A was replaced with Reverse B that was then paired with the 1797 obverse (O-102).

**Commentary:** How many late die state 1797 half dollars (O-101a) are known in comparison to 1797 O-101 coins? Our research indicates that of the 100 or so 1797 O-101 variety pieces that we have documented, about two-thirds fall into the late die state (O-101a) category. This is an important coin for the variety specialist collecting by die state.

**Provenance:** Acquired from Heritage Auctions Inventory on June 23, 1988.

**From The Hamilton Collection.** NGC ID# 24EC, PCGS# 39265 Base PCGS# 6060

## 1797 Half Dollar, Well-Defined Fine 15 Elusive Overton-102 Variety

**4078** 1797<50C> O-102, T-2, Low R.6, Fine 15 PCGS. Amato-511. This Choice Fine example displays highly attractive, uniform battleship-gray toning, and its design features are well-defined for the designated grade. Liberty's hair shows considerable detail, as does the drapery around the bust, and the shoulder is clearly separated from the hair. The reverse is also relatively strong, with the eagle's right (facing) wing exhibiting nearly all the feather detail, and nearly complete separation of the torso, wings, and left (facing) leg. Much of the coin's design detail is actually Very Fine. Indeed, PCGS may have downgraded this piece because of an old, unobtrusive "X" mark lightly etched into the lower-right obverse field. This does not detract, but only serves to identify the piece, as does a tear-drop planchet void below the eye. A nice, originally toned coin for the type collector or the date/variety specialist.

**Variety:** O-102, Low R.6. Draped Bust, Small Eagle half dollars, bearing the date 1796 or 1797, were produced using three obverse and two reverse dies. The first reverse was paired with the 1796 15 Stars obverse (Overton-101 variety), the 1796 16 Stars obverse (Overton-102), and the 1797 obverse (Overton-101). A light crack first developed through the tops of ES in STATES of the reverse die during its use with the 1796 15 Stars obverse. Additional cracks developed causing this reverse to shatter. The 1797 obverse was then paired with a new reverse die (Overton-102) that differed slightly from the first reverse in terms of the wreath alignment with respect to the peripheral lettering. The Low R.6 rarity rating of the 1797 Overton-102 variety is the highest of all four 1796-1797 half dollar varieties. Specifically, about 35 examples of the O-102 variety are known, most all in the low- to mid-grade levels.

**Commentary:** The Draped Bust Small Eagle half dollars of 1796-1797 saw a paltry mintage of 3,918 pieces. Very few type collections of U.S. coins include an example of this classic rarity.

**Provenance:** *Stack's* (11/1968), lot 716; *ANA Signature* (Heritage Auctions, 8/2011), lot 7137.

## 1797 Half Dollar, Pleasing VF30 The Rare O-102 Variety

**4079** 1797 O-102, T-2, Low R.6, VF30 PCGS. Amato-504. This pleasing mid-grade example displays light silver-gray surfaces with traces of pale violet and olive-gold toning gravitating to the margins. Appropriate high-end Very Fine definition shows on the design elements, including Liberty's hair and drapery, and the eagle's wing and tail feathers. A mark between the bridge of Liberty's nose and star 10 will help to identify the coin, as will an upper-left to lower-right pinscratch on the eagle's lower neck. An excellent choice for a mid-to high-grade type collection. Housed in a green label holder.

**Variety:** O-102, Low R.6. Subsequent to the shattering of Overton's Reverse A, a new reverse (Reverse B) was paired with the 1797 obverse. The Overton Reverse B is easily distinguished by the position of the leaf below the second T in STATES. The 1797 O-102 variety is the rarest of the four Draped Bust Small Eagle half dollar varieties.

**Commentary:** Of the 270 Draped Bust Small Eagle half dollars documented in the Heritage-published *The Draped Bust Half Dollars of 1796-1797*, only 35, or about 13 percent, are classified as 1797 O-102.

**Provenance:** Robert Arnel Collection (*Stack's*, 1/1967), lot 65; *Stack's* (5/1974), lot 209; *Heritage Auctions* (7/1997), lot 6334; *Superior Galleries* (2/1998), lot 2164; *Superior Galleries* (8/2002), lot 1661; *Benson Collection* (Ira and Larry Goldberg, 2/2003), lot 515; *Heritage Auctions* (7/2003), lot 7336.

**From The Hamilton Collection.** NGC ID# 24EC, PCGS# 39266 Base PCGS# 6060

**1801 O-101 Half Dollar, AU50**  
**Partially Prooflike**  
**Much Mint Luster Remains**

**4080 1801 O-101, T-2, R.3, AU50 PCGS.** Reflective fields and considerable remaining mint luster join natural copper-gold toning with bluish-gray overtones on this sharp and attractive Draped Bust half. Two die pairs combined to strike just 30,289 pieces of the important early series date. Two die marriages share the same obverse, leaving the reverse die to define the O-101 (T-2) and O-102 (T-1) varieties. O-101 shows AM of AMERICA joined at the base, with the first A close but not touching a wing feather. Die rust is prominent in the left reverse field.

Both the 1801 and 1802 halves were struck in similar quantities and they share a similar cachet for series specialists. Each date always commands substantial collector demand and both issues are notably scarce in About Uncirculated and finer grades. This 1801 is housed in an old green label holder with high quality surfaces and sharp hair definition on Liberty's hair strands. A short scrape near the curls above star 2 and another above the 8 in the date are the only marks of note. The reverse field stars show the usual incompleteness, yet this original half exudes eye appeal and the vibrant surfaces are suggestive of an even finer grade. Population (both varieties): 5 in 50, 11 finer (6/16). NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1802 Draped Bust Half Dollar, AU50**  
**O-101, T-1, Only Dies for the Date**

**4081 1802 O-101, T-1, R.3, AU50 PCGS. CAC.** Tompkins Die State 1. A nominal mintage of 29,890 Draped Bust half dollars was accomplished in 1802, with a single die variety known for the date. The dies feature a large high date and 12 arrows in the eagle's claw on the reverse. The 1802 is a better date in the series and high-grade specimens are very rare.

This attractive AU specimen is sharply detailed in the centers, but shows a touch of the usual softness on the eagle's head and some flatness on the obverse star centers. Just a trace of actual wear is evident and abrasions are minimal, but some planchet adjustment marks are visible on the shield and upper reverse. Vivid shades of champagne-gold, lavender-gray, and cerulean-blue toning blanket the pleasing surfaces, with original mint luster underneath. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

**1802 Half Dollar, O-101, AU53**  
**Ex: Eliasberg, Rare Early Issue**

**4082** 1802 O-101, T-1, R.3, AU53 PCGS. The coin was believed to be among the three finest 1802 halves when it sold in the 1997 Eliasberg auction, there described as “quite possibly the finest known.” Since then, of course, the services have seen many more grading events. Three Uncirculated coins are listed by PCGS — the finest grades MS62.

The current piece has lost none of its appeal over the years, and the quality remains obvious. Slight weakness at the wing tips is mostly from strike rather than rub, because the eagle’s breast feathers are full and sharp and Liberty’s hair strands show only a hint of wear. The fields are somewhat reflective and iridescent, where brownish-gray toning prevails with blue and orange-gold accents. Two or three light marks in the left obverse field pedigree the piece — one at star 4 past the ribbon, and a pair of minor abrasions to the right of stars 1 and 2. This is a remarkable example of the 1802 issue, with just 29,890 pieces struck and few high-grade survivors. Housed in a green label holder. Population: 10 in 53, 13 finer (6/16).

**From The Hamilton Collection.** NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

**1807 O-105a Draped Bust Half**  
**Lustrous MS63**  
**Scarce Advanced Die State**

**4083** 1807 Draped Bust, O-105a, T-4, R.4, MS63 PCGS. CAC. Tompkins Die State 4/5. A conditionally rare example of the the Overton sub-variety O-105a, here with a multitude of die cracks, die clashing, die chips, lumps, and internal cuds that are too numerous to mention in their entirety. A pronounced die crack and lump between ED in UNITED is the most visible pick-up point for the late die stage. A separate crack with chipping runs through F in OF through the eagle’s head, and the combined effects of those two die failures contribute to weakness at the scroll, eagle’s head, and left (facing) wing shoulder.

Despite the near-terminal die state, the coin is remarkably sharp in other areas and it is well-deserving of the Select Uncirculated grade. The obverse stars are drawn to the edge but sharp. Liberty’s drapery folds show bold definition and only slight blending of the temple hair strands is seen. Likewise, the eagle’s breast feather definition is sharp except where the associated scroll weakness intrudes. Most of the field stars are well brought up. Gleaming silver surfaces display faint orange-gold and lilac-gray accents amid plentiful frosty luster. Housed in a first generation holder. Tied at the top of Steve Herrman’s Condition Census for the late die state variety. PCGS population (all 1807 Draped Bust varieties): 18 in 63 (1 in 63+), 22 finer (7/16). CAC: 5 in 63, 8 finer (7/16).

**From The Hamilton Collection.** NGC ID# 24EM, PCGS# 39344 Base PCGS# 6079

## BUST HALF DOLLARS

### 1807 Capped Bust Half Semireflective MS62 O-113, Sole Small Stars Variety

**4084** 1807 Capped Bust, Small Stars, O-113, R.2, MS62 NGC. CAC. The initial John Reich Capped Bust design turned out to be just a two-year type, with Liberty's portrait remodeled in 1809 in an effort to alleviate striking problems. Softness of strike is often visible on the upper portion of the eagle and on some of Liberty's central hair curls. This Mint State example is better-struck than most, with only minor blending at the wing junction beneath the beak and on some Liberty's tresses along the neck. Iridescent toning visits the semireflective fields with shades of blue, forest-green, and peach gold. The start of a faint die crack above STATES OF suggests an intermediate state of the dies, since the crack does not extend to AMERICA.

The variety displays horizontal cross lines within the E PLURIBUS UNUM lettering on the reverse and at LIBERTY on the obverse. It is the Small Stars design, though, that attracts the most interest from type and series specialists, making O-113 the most popular of the 1807 Capped Bust halves save for the famous Bearded Goddess variety. The present coin is smooth and lustrous, with faint die clashing on both sides but no large marks or abrasions. Housed in a prior generation NGC holder. It ranks at the lower-end of the Condition Census for the variety according to both Steve Herrman and Donald Parsley.

**From The Hamilton Collection.** NGC ID# 24EN, PCGS# 39359 Base PCGS# 6087

### 1808/7 Capped Bust Half, MS63 O-101, Exceptional Originality

**4085** 1808/7 O-101, R.1, MS63 PCGS. CAC. Blue and gold accents enliven a comprehensive speckling of olive-gray toning over the smooth surfaces of this Select Uncirculated half. Silver luster peeks through the thick, original patina. This popular overdate kicks off a succession of interesting and highly collected overdates in the Capped Bust series, and represents the second year of the two-year John Reich original design that was modified a year later in 1809.

Other than Mint-related die breaks, this sharply struck example shows very few marks or anomalies even under strong magnification. A few tiny lines and ticks are well-hidden in the toning. The overdate is crystal-clear. Housed in a first generation holder with CAC endorsement, specialists are sure to take note of its quality and the fact that it has been unseen at auction for nearly 30 years or more. Population: 9 in 63 (1 in 63+), 9 finer (7/16). CAC: 2 in 63, 3 finer (7/16).

## 1809 Bust Half, Colorfully Toned MS65 O-109b, III Edge, Tied Finest for the Variety

**4086** 1809 III Edge, O-109b, R.4, MS65 NGC. CAC. A die crack through the reverse legend becomes severe at AMERICA in the late die stage, with the crack extending past the arrowheads where small internal cuds form at the top two arrow tips. The frosty and lustrous Gem surfaces of this sharply defined half display peach-gold and blue toning on the obverse, while the reverse shows vibrant indigo-blue, lemon-yellow, and amber-gold shades. Only the eagle's talons and a few high point curls show any lack of completeness. The coin is virtually free of any post-Mint abrasions or marks.

Changes in the Capped Bust design were implemented in 1809. The figure of Liberty and several reverse elements were modified to lessen the issues encountered when striking the 1807 John Reich design. Those problems were solved, but others arose with the new design including frequent weakness at Liberty's curls. This well-struck and carefully preserved example shows the new design at its best result, and features the experimental III Edge. This piece is tied at the top of Steve Herrman's Condition Census for the variety with two others — the Ebsen coin, and the Pogue example that brought \$47,000 in September, 2015. It is housed in a prior generation NGC holder with CAC endorsement.

*Ex: Marin Numismatics 6/94.*

**From The Hamilton Collection.** PCGS# 39388 Base PCGS# 6094

## 1811/10 O-101 Half Dollar, Appealing MS64 Beautifully Toned, Dramatic Double Profile

**4087** 1811/10 O-101, R.1, MS64 NGC. CAC. Resplendent azure-blue and bronze-gold toning combine with smooth, mark-free surfaces for the Choice appeal of this "Punctuated Date" half dollar. Liberty's portrait is dramatically strike-doubled at the nose, lips, chin, and neck. The strike is for the most part razor-sharp, although the left-side stars are without the central definition — a characteristic of the O-101 die pair that helps distinguish it from the similar O-102, which has sharp left-hand stars. Cartwheel mint luster beams brightly across both sides.

Old-time collectors still call this the "18 dot 11" variety, since the overdate lacks all but a few tiny remnants. A sharp spike in the cap is an equally noticeable feature of the variety. Housed in a prior generation NGC holder without barcode, this piece ranks near the top of the Condition Census for the O-101 based on Steve Herrman's current listing and the Parsley reference and it displays the green CAC endorsement sticker. NGC Census (both 1811/10 varieties): 5 in 64, 1 finer (7/16). CAC: 4 in 64, 0 finer (7/16).

**From The Hamilton Collection.** NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

### 1811 O-106 Half Dollar, MS65 Small 8, Tied Finest for the Variety

**4088** 1811 Small 8, O-106, R.3, MS65 NGC. CAC. More than 1.2 million 1811 half dollars were struck from 13 die pairs. The O-106 is one of the scarcer die marriages, utilizing the same reverse as O-107 but with the sole use of a different obverse. The lack of obverse milling with the stars drawn to the edge helps identify the obverse, as does Liberty's forecurl widely separated from the headband.

This example is a stately and lustrous battleship-gray Gem, with lilac and blue overtones melding into a silver sheen at the borders. While the obverse milling is partially missing on this coin (as expected for the variety), the stars are less-drawn to the edge than usual. The strike is razor-sharp throughout, lacking completeness only on stars 11 to 13. The fields and central motifs show only two or three tiny contacts under magnification. Housed in a prior generation, early 1990s NGC holder lacking the bar code, this example is tied at the top of the Condition Census for the O-106 variety. CAC endorsed. NGC Census (all varieties): 20 in 65 (1 in 65+), 15 finer. CAC: 4 in 65, 6 finer (6/16).

*Ex: Tangible Investments (5/1990).*

**From The Hamilton Collection.** NGC ID# 24EU, PCGS# 39429 Base PCGS# 6097

### 1812/1 Small 8 Half, Multicolor MS64 Tied for Finest of the O-102a Late Die State

**4089** 1812/1 Small 8, O-102a, R.2, MS64 NGC. Two overdate varieties exist for the 1812 date — the scarce Large 8 logotype, and the somewhat more-available Small 8 variety. This near-Gem Small 8 example ranks near the top of the O-102a die state Condition Census according to the Steve Herrman listing. Delightful, multicolor toning presents a dappled appearance across both sides of the coin. Sea-green and ocean-blue shades surround reddish-gold, lavender, and tan central toning.

Deeply struck on most of the devices, the coin shows only minor incompleteness at the center of star 8, as well as blending on a few of the high points of Liberty's hair curls and at the eagle's talons. The late die state is confirmed by a diagnostic crack at the base of the second 1 to the stand of the overpunched 1. A later die state exists (not listed by Overton) with die clashing above the date and pronounced die fatigue, although this Choice coin shows neither of those characteristics. NGC Census (Both early and late die states): 3 in 64, 1 finer (6/16).

*Purchased from Delaware Valley Coin 9/94.*

**From The Hamilton Collection.** NGC ID# 24EY, PCGS# 39444 Base PCGS# 6101

## 1813 Capped Bust Half Dollar, MS65 O-108a, Top of the Census by Two Points

**4090** 1813 O-108a, R.2, MS65 NGC. Listed as R.2 in the references, the O-108a variety — and its even-scarcer early die state O-108 — are seldom seen in our auctions. Both the Parsley reference and Steve Herrman's Condition Census list the finest-known example of either die state as MS63. To see an example in Gem condition is nothing short of astounding.

The present coin is clearly from a late state of the dies. Both sides show heavy die cracks and die clashing, and weakness at the eagle's head, the nearby scroll, and the eagle's left wing shoulder are noted. Nevertheless, in terms of eye appeal and surface quality the coin is exceptional. Mint luster glows beneath attractive, coppery-gold and blue toning. The obverse is sharply struck with needle-sharp stars and nice detail on the drapery folds and Liberty's cap. The fore-mentioned weakness at the central reverse is understandable given the state of the dies, and this remarkable coin is sure to elicit strong bids from knowledgeable Bust half specialists as the finest of its variety by two points. NGC ID# 24EZ, PCGS# 39470 Base PCGS# 6103

## 1814/3 O-101a Half Dollar, MS64 In-Demand Overdate

**4091** 1814/3 O-101a, R.2, MS64 PCGS. CAC. As usual, die cracks traverse the date, bust, and stars on the obverse of this popular overdated half. The underdigit 3 is bold beneath the primary 4 in the date. A few examples exist without any obverse die cracks, but they are extremely rare and nearly unobtainable.

Subtle iridescence visits both sides of this near-Gem example, with sea-green, rose, and robin's-egg blue toning bolstered by bright mint luster. The strike is sharp despite multiple die cracks and triple die clashing. The reverse is rotated 270°. A Choice coin near the Condition Census, housed in an old green label holder with CAC endorsement. Population: 2 in 64, 0 finer (6/16). CAC: 2 in 64, 2 finer (7/16).

**From The Hamilton Collection.** NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

**1815/2 Capped Bust Half, AU55  
Low-Mintage Key, O-101**

**4092** 1815/2 O-101, R.2, AU55 PCGS. Because of the unique economic stresses of the War of 1812, precious-metal coinage was widely hoarded and silver deposits at the U.S. Mint were few-and-far-between in 1815. A small mintage of 47,150 Capped Bust half dollars was accomplished late in the year, using an overdated obverse die from 1812 and a single reverse die to strike the entire mintage. The coins were all delivered on January 10, 1816, one day before a fire destroyed much of the Mint's equipment and severely limited coinage for the rest of that year. This attractive Choice AU specimen shows just a touch of actual wear on the well-detailed design elements and dramatic clash marks are evident on both sides. The lightly abraded surfaces retain much original mint luster, under pleasing shades of lavender-gray and champagne-gold toning. Population: 25 in 55, 24 finer (6/16). Population: 25 in 55, 24 finer (6/16).

**From The Eagle One Collection, Part III.** NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

**1815/2 Half Dollar, O-101, AU55  
Beautiful Color, Gold CAC**

**4093** 1815/2 O-101, R.2, AU55 NGC. Gold CAC. The British invasion and destruction of Washington, D.C. in 1814 had a devastating psychological and financial effect on commerce and banking. One ramification was the Philadelphia Mint received virtually no silver deposits throughout 1814 and 1815, and the coining presses sat unused for any mintage of half dollars, which were the staple of the banking industry. Finally, near the end of 1815 enough silver was on hand for a small mintage and an 1812 die was repurposed for resumption of half dollar coinage. Just 47,150 pieces were struck — all with the 1815/2 overdate. Shortly after delivery, the Mint burned and no more half dollars were struck until 1817.

It is challenging to find an 1815/2 half dollar with any degree of eye appeal. They are by and large a dull lot, and many of the surviving pieces are impaired in one way or another. The present coin is a wonderful exception. Originally toned in attractive blue, violet, and tangerine-gold toning, both sides are brightly lustrous and sharply struck. Aside from the inevitable die clashing, there are no marks of consequence. Housed in an early generation NGC holder from about 25 years ago (with hologram but without the barcode), this Choice About Uncirculated coin carries the CAC gold sticker indicating it is undergraded by at least one level. Census: 18 in 55, 58 finer. Gold CAC: 1 in 55, 0 finer (6/16).

*Ex: Allstate Coin Co. (6/1989).*

**From The Hamilton Collection.** NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

## 1817/3 O-101a Bust Half, MS63 Outstanding Luster and Eye Appeal

**4094** 1817/3 O-101a, R.2, MS63 NGC. CAC. Housed in a prior generation NGC holder (pre-bar code), this Select example of the 1817/3 is sharply struck and extremely lustrous on both sides. Album-toned in steel-blue, violet, and amber-gold shades, the surfaces are free of any large or distracting marks and only the diagnostic die cracks and myriad die clashing that characterize the O-101a late die state are in evidence.

The prominence of the overdate makes this 1817 variety a collector favorite. In terms of rarity it pales when compared with the seldom-available 1817/4, but for sheer charisma the 1817/3 is eagerly sought, especially in high grades. When last seen in a 1991 Bowers & Merena auction, this coin was the third-finest according to Al Overton's then-recently published 1990 edition. Other examples have moved up on the grading scale in the intervening years, and while the present coin receives no mention in the current Steve Herrman roster, it would be no surprise if it steps up in class since the eye appeal alone is suggestive of a finer grade. As it is, the coin is the sole CAC-endorsed MS63 example at either service. NGC Census: 4 in 63, 7 finer. CAC: 1 in 63, 4 finer (6/16).

Ex: *Frontenac Sale* (Bowers & Merena, 11/1991), lot 3094.

**From The Hamilton Collection.** NGC ID# 24F7, PCGS# 39512 Base PCGS# 6111

## 1817/3 Capped Bust Half Dollar, MS64 Near-Gem Example, Late Die State, O-101a

**4095** 1817/3 O-101a, R.2, MS64 NGC. With a reported mintage of more than 1.2 million pieces, the 1817 Bust halves are readily available in lower grades, and even Select or finer Mint State coins can be obtained at a price. Several *Guide Book* varieties make the date popular with collectors — among them, the Dotted Date, the Single Leaf, and the overdates. The 1817/4 is the paramount rarity not only for the date, but for the entire series with just 8 pieces known. By comparison, the 1817/3 is hardly a poor man's overdate, yet it is significantly more obtainable. In all, there are 13 die marriages for 1817 not including the early and late die states that push the number of collectible Overton numbers past 20 varieties for the year.

This Choice specimen is the late die state 1817/3 overdate, struck from cracked and clashed dies. The underdigit 3 beneath the primary 7 is sharp and easily visible with the naked eye, adding to its allure. Deep, gunmetal-blue toning at the margins surround tawny reddish-gold shades at the centers for the preferred bullseye toning pattern often produced by long storage in a coin board or early Wayte Raymond coin album. The strike is sharp with only slight blending on a few curls and wing shoulders. A lustrous, near-Gem example, the coin sits firmly the Condition Census for the variety where it is tied second-finest with several other examples. NGC Census: 6 in 64, 1 finer (6/16).

**From The Hamilton Collection.** NGC ID# 24F7, PCGS# 39512 Base PCGS# 6111

**1819/8 O-102 Half Dollar, MS65  
Large 9, Splendidly Toned**

**4096** 1819/8 Large 9, O-102, R.2, MS65 PCGS. Booming cartwheel luster traverses this beautiful Capped Bust Gem. Rich forest-green borders cede to autumn-brown fields and dove-gray high points. Pristine save for an incidental tick on Liberty's neck. Edgar Souders, in his reference *Bust Half Fever*, estimates a mintage of 833,200 pieces for the 1819/8 overdate, which comprises several die marriages. Nonetheless, Overton-102 is readily attributed by the space between dentils below the 0 in 50 C. Incorrectly designated by PCGS as the Small 9 overdate, i.e. O-101. NGC ID# 24FC, PCGS# 39556 Base PCGS# 6119

**1820/19 Capped Bust Half, MS64  
O-102, Curl Base 2 Variety**

**4097** 1820/19 Curl Base 2, O-102, R.1, MS64 NGC. CAC. As the sole variety with the bold 1820/19 overdate and a Curl Base 2, the O-102 is in demand from variety, type, and Bust half collectors of every ilk. The clear two-digit overdate is easily identified with or without a glass, while the Curl Base 2 makes the attribution easy. The overdated issues aside, 1820 Bust halves are generally underappreciated by collectors. The mintage of just over 750,000 pieces is the third-lowest for the Capped Bust series.

This lustrous and appealing example displays even amber-gold toning with blue overtones on both sides. Mint luster radiates strongly from beneath the attractive patina. Choice surfaces show only a few widely scattered light lines and tiny ticks beneath the toning. A single MS65 example sits atop of the Steve Herrman Census for the O-102 variety, with this coin tied for second place in the listing. NGC Census (Both Square Base and Curl Base varieties combined): 5 in 64, 3 finer (6/16).

**From The Hamilton Collection.** NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126

## 1835 Capped Bust Half, MS66 Condition Census O-109 Example

**4098** 1835 O-109, R.2, MS66 NGC. Among the 10 varieties known for the 1835 halves, it seems unbelievable that 5.3 million total coins were struck. Either more die pairs exist, or a majority of the coins were produced from worn and overused dies. The population of Gem or finer coins suggest that the latter scenario may have occurred. Recutting on star 7 and a series of protruding die lines below the eagle's left (facing) wing confirm the O-109 variety, which is one of the few 1835 varieties to show any MS66 or finer coins.

While the central devices are sharp, some peripheral weakness and graininess in the fields trace to suspected die wear. The scroll is incomplete at URIB of PLURIBUS, and most of the stars lack central detail. Still, this Premium Gem example offers excellent eye appeal with vibrant mint luster and variegated rainbow toning. The eye appeal is off the charts. Tied near the top of both the Parsley and Herrman Condition Census listings for the variety. NGC Census (all 1835 varieties): 5 in 66, 1 finer (6/16). NGC ID# 24FZ, PCGS# 39935 Base PCGS# 6168

## PROOF BUST HALF DOLLAR

### 1826 O-101 Half Dollar, PR64 Extremely Rare in Proof Format

**4099 1826 PR64 PCGS Secure. O-101, R.8 as a Proof.** We believe that only two or possibly three proof 1826 O-101 half dollars exist, along with two proof O-102 half dollars. Creating an exact census of early proof coins, especially among Capped Bust half dollars, is extremely challenging, as many prooflike business strikes have been called proofs in the past. Even famous numismatic researcher Walter Breen was incorrect regarding some coins that he called proofs. In the Pittman catalog, David Akers continued with a census of proof 1826 half dollars, which we have updated here:

**1. O-101 PR65+ NGC.** Noblesse Collection (Heritage, 9/2013), lot 6431.

**2. O-101 PR65 NGC.** Thomas Cleneay (Samuel and Henry Chapman, 12/1890), lot 1162; Colonel E.H.R. Green; Adolph Freidman Collection of Half Dollars/1946 ANA (Abe Kosoff), lot 786; Gustav Lichtenfels Collection (Kreisberg-Schulman, 2/1961), lot 2763; John Jay Pittman (David Akers, 5/1998), lot 1485; Heritage (1/2006), lot 3187; FUN Signature (Heritage, 1/2013), lot 5632.

**3. O-101 PR64 PCGS.** 1997 ANA (Heritage, 8/1997), lot 6351; 2005 ANA Sale (Heritage, 7/2005), lot 10206; 2012 FUN (Heritage, 1/2012), lot 3231; Philadelphia Signature (Heritage, 8/2012), lot 5146; FUN Signature (Heritage, 1/2013), lot 5631.

**4. O-102 PR63 Uncertified.** Heritage (9/1996), lot 5600. Believed to be ex: Ira Reed; T. James Clarke (New Netherlands, 47th Sale).

**5. O-102 PR60.** Gilhousen Collection (Superior, 10/1973), lot 930; Ruby Collection (Superior, 2/1975), lot 696; Hoffecker Collection (Superior, 2/1987), lot 3154; Worrell Collection (Superior (9/1993), lot 1279.

**A. Proof.** Allenburger Collection; McPherson Collection (Stack's, 2/1953); Empire Collection (Stack's, 11/1957), lot 1320. Unplated in the Empire catalog.

One of the most appealing aspects of this rarity is the phenomenal color. The margins have splendid cobalt-blue accents while the centers are primarily pearl-gray and golden-rose. The major design elements are frosted and provide ample contrast with the subtly reflective fields. Beneath the bust of Liberty, a few pinscratches are west of the date, and they will serve to identify this coin in the future. An important rarity for the advanced Bust half dollar collector. NGC ID# 27SF, PCGS# 6203

## REEDED EDGE HALF DOLLAR

**1837 Reeded Edge Half, MS66  
Short-Lived Type, GR-20**

**4100** 1837 GR-20, R.3, MS66 NGC. The change from the 50 CENTS reverse of 1836-37 to the HALF DOL. reverse of 1838 created a distinct two-year type for the first steam-power halves, and while the 1836 has a minuscule mintage, the 1837 is much more available and the issue of choice for type collectors. Even though a number of examples were saved and Mint State pieces appear on the market with some regularity, the presence of a Premium Gem such as this is a far less frequent event. Sharply struck with powerful luster, this captivating, slightly satiny coin displays warm reddish-tinged orange patina over most of the fields. Small untinted sections further enliven the appearance of the piece. An immensely desirable coin and an exquisitely preserved, tangible memento of an exciting chapter in Mint history.

*Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 1685; FUN Signature (Heritage, 1/2008), lot 2875; Long Beach Signature (Heritage, 9/2012), lot 4567. PCGS# 531068 Base PCGS# 6176*

## SEATED HALF DOLLARS

**1839 No Drapery Half Dollar, MS64+  
Important Design Type, Few Are Finer**

**4101** 1839 No Drapery, WB-101, MS64+ NGC. CAC. The No Drapery portrait of Liberty was the initial Christian Gobrecht design. Early 1839 saw its introduction on the half dollar denomination, although the basic design had been used on other silver denominations earlier. The half dollar did not undergo the additional modifications that were implemented on the other Seated Liberty denominations, and it is the only denomination of the type that retained at least most of Gobrecht's original portrait until the series' end in 1891. Later in the 19th century, first-year types were saved in large numbers, but the scarcity of Uncirculated No Drapery halves indicates that relatively few coins were set aside at the time of issue.

At the near-Gem level, No Drapery halves become major condition rarities; coins that transcend their general unavailability for type purposes and take on the mantle of one of the major condition rarities in the Seated half series. This example displays bright, frosted mint luster that glows beneath the layers of blue-lilac and rose-yellow toning seen over each side. The strike details are strong on the obverse, with just a bit of softness noted on the eagle's left (facing) wing and leg on the reverse. At the MS64+ level, only four pieces have been certified by NGC and a mere three pieces are finer (7/16). None of the higher-graded pieces display the CAC endorsement seen on this high-end, Choice coin. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

### 1849 Seated Half, MS65 Tied for Finest Certified

**4102** 1849 Repunched Date, WB-104, MS65 PCGS. 30th Anniversary Green Holder. The 1849 Seated Liberty half dollar is a better date in the series, from a mintage of 1.2 million pieces. This coin shows a very lightly recut 1 in the date and a die crack through the bottom of the numerals in the date, identifying the WB-104 variety. Randy Wiley and Bill Bugert rate the WB-104 as a High R.7 issue in Mint State.

This sharply detailed Gem displays vibrant mint luster and mostly brilliant centers, with attractive accents of golden-brown and lavender toning in peripheral areas. The design elements show sharp definition on Liberty's foot support and hair, with just the slightest softness on the eagle's left (facing) claw. Only two MS65 coins have been certified by PCGS of all 1849 varieties and none are finer (7/16).

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$7.50; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection Part II (Heritage, 11/2013), lot 4918. PCGS# 572071 Base PCGS# 6262

### 1853-O Arrows and Rays Half Dollar, MS64 Rich Multicolor Toning

**4103** 1853-O Arrows and Rays, WB-101, Die Pair Unlisted, MS64 PCGS. Fire-red, butter-gold, and sea-green toning endow this coruscating one-year type coin. The strike is good aside from minor blending on Liberty's high points. Marks are trivial save for a single hair-thin field line near Liberty's left (facing) shoulder. The reverse matches WB die A. The obverse is clashed, and distinctive due to multiple cracks through stars 11 to 13, but these do not match any varieties listed in the New Orleans Mint WB reference. Arrows and rays were added in 1853 to identify coins with the newly reduced silver content. In 1854, the rays were removed, but the arrows remained on the obverse through 1855. Population: 8 in 64, 1 finer (6/16). NGC ID# 24JK, PCGS# 572086 Base PCGS# 6276

## 1855-O Arrows Half Dollar, MS66+ Exceptional Multicolor Toning

**4104** 1855-O Arrows, WB-101, Die Pair 5, R.3, MS66+ PCGS. The California Gold Rush of 1849 disrupted the traditional silver-gold ratio, making silver coins worth more than their face value. By the early 1850s, they were hoarded from commerce and melted. In 1853, the weight of half dimes through half dollars was reduced. Newly struck coins remained in circulation, since their face value exceeded their bullion content. But the old tenor coins needed to be replaced, and as a result, the New Orleans Mint was striking half dollars about as quickly as they could during 1855. MS66+ examples, though, are very rare. This lustrous high-grade example displays rich sea-green, lilac, and orange-gold toning. The strike is good, and the sole mentionable mark is a line below star 10. Radial die cracks at stars 9 and 13 promptly attribute the Wiley-Bugert die pairing. Population: 6 in 66 (1 in 66+), 2 finer (7/16). NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

## 1856-S WB-101 Seated Half, MS64 Mint State Rarity, None Certified Finer

**4105** 1856-S WB-101, Die Pair 2, R.4, MS64 PCGS. 30th Anniversary Green Holder. A very scarce variety with the date far left and diagnostic die lines above AMERICA. All six die pairs for the issue are R.4 or higher. The 56 in the date is recut north. Boldly struck and lustrous, this Select Uncirculated example is one of the few survivors in Mint State from a low production of just 211,000 pieces. The entire mintage circulated in the specie-starved West Coast commerce, with the exception of a handful of well-preserved examples. This coin is among the finest certified and displays abundant silver flash beneath peach-gold and lilac toning.

The 1856-S is an underrated San Francisco issue and is extremely rare in the better grades of Mint State, as are several Seated halves from the 1850s and 1860s. The eye appeal and bold strike of this coin set it apart from other known Uncirculated examples. For all varieties of 1856-S halves: Only two MS64 examples have been certified at PCGS of all varieties of the 1856-S half and none are finer (7/16). PCGS# 572098 Base PCGS# 6289

**1859 Half Dollar, MS66  
Fully Toned, Fully Struck**

**4106** 1859 Type One Reverse, WB-101, MS66 PCGS. CAC. Sea-green, rose-gold, and steel-gray toning encompasses this satiny and intricately struck Premium Gem. Refreshingly devoid of contact, and the sole identifier is a small, unobtrusive gray spot on the reverse rim at 1:30. Housed in an old green label holder. The 1859 often trades as a common date but is much scarcer in Uncirculated grades than its 1858 immediate predecessor. Most 1859 half dollars have a Type One Reverse, identified by a close space between the tops of the LF in HALF. Population: 3 in 66, 1 finer (6/16).

Ex: *San Francisco ANA Signature (Heritage, 7/2005)*, lot 6305. NGC ID# 24HY, PCGS# 572128 Base PCGS# 6296

## CONFEDERATE STATES OF AMERICA

**1861 Confederate Restrike Half Dollar  
MS63, Struck in 1879  
One of 500 Pieces Produced**

**4107** 1861 Scott Restrike MS63 PCGS. These "Confederate restrikes" gained a foothold in numismatic lore through the efforts of the well-known coin and stamp dealer J.W. Scott, who purchased the rusty, original C.S.A. reverse half dollar die in 1879 from Ebenezer Locke Mason, Jr. In addition to striking white metal tokens (an enterprise done in partnership with fellow New York coin dealer David Proskey, according to the Bugert reference), the fragile Confederate obverse die was used to strike 500 federal 1861 half dollars with planed-off reverses to receive the impression.

Struck on a screw press in a collar with an underlay of forgiving copper to temper the force of the strike, numerous challenges ensued. The obverse was somewhat flattened by the reverse strike, with buckling of the flan visible on most examples. The present coin shows these characteristics, as well as ample evidence of the drill and lathe work done to prepare the reverse, where circular lines from the planing process are not fully eliminated by the strike. This attractive Select Uncirculated example ranks near the top of high-grade survivors. The Confederate side is untuned and brilliant, while the federal obverse shows faint golden-gray patina that deepens at the margins. The eye appeal is excellent for the issue. Population: 19 in 63, 10 finer (6/16).

From *The Elbert Henry Gary Collection, Part II*. NGC ID# 2C4R, PCGS# 340402

## SEATED HALF DOLLAR

**1880 Seated Half Dollar  
Rainbow-Toned MS67  
WB-102, Tied for Finest Graded**

**4108 1880 Closed Bud, WB-102, MS67 PCGS.** The Philadelphia Mint used one obverse and two reverse dies to manufacture 8,400 business strike half dollars in 1880. Despite the low mintage, the 1880 is not particularly rare in an absolute sense. The story changes in the highest available grade, where only eight coins survive in MS67 — two pieces at PCGS, six examples at NGC — and none are finer at either service (7/16).

Every design feature on this Superb example exhibits razor-sharp detail, and the original toning is breathtaking in its kaleidoscopic display of colors. Cobalt-blue, salmon-pink, olive-gold, powder-blue, and lavender-gray shades cover both sides in a targetlike fashion. Isolated areas of near-brilliance also occur around the obverse devices. The semiprooflike finish readily appears at direct angles, and the surfaces are free of even the most trivial disturbance. NGC ID# 24KT, PCGS# 572262 Base PCGS# 6362

## PROOF SEATED HALF DOLLARS

**1855 Arrows Seated Half Dollar, PR65  
Rare Normal Date Arrows Proof**

**4109 1855 Arrows PR65 NGC.** This 1855 proof Seated Liberty half dollar is a well-detailed Gem from the final year of the Arrows design. The deeply mirrored fields are blanketed in vivid shades of smoky gray and cerulean-blue toning, with hints of pale gold and silver. The well-preserved surfaces show no mentionable distractions, and eye appeal is outstanding.

The present coin traces its pedigree back to the legendary “Colonel” E.H.R. Green Estate, and then to the renowned Eric P. Newman Collection. It displays a normal date, identifying the WB-101 variety. Randy Wiley and Bill Bugert estimate 20 examples of normal date proofs survive today in all grades. We feel that this figure may be too high based on combined grading events and the number of traceable examples. No non-Cameo proof is numerically finer at either service. NGC Census: 4 in 65 (1 in 65+), 0 finer (7/16). NGC ID# 5PNW, PCGS# 6408

### 1861 Seated Half, PR66 Cameo Fully Struck and Well-Preserved

**4110 1861 PR66 Cameo NGC.** This coin boasts remarkable preservation for a large proof coin that is now 155 years old, struck in the first year of the Civil War hostilities. Both the 1860 and 1861 half dollars saw largish (for the era) proof emissions of 1,000 pieces each, minus approximately half that number melted as unsold at year's end. Most certified survivors grade no better than Choice proof, however. This Premium Gem Cameo example shows notable eye appeal in the form of excellent preservation and a full strike throughout. Field-device contrast is perceptible, despite light patina in shades of amber and pinkish-gold, with light blue rim accents. A great example of this early Seated half proof. Census: 3 in 66 Cameo, 0 finer (7/16). NGC ID# 27TL, PCGS# 86415

### 1862 Seated Half, Peripherally Toned PR67 Finest at PCGS or NGC

**4111 1862 PR67 PCGS.** This proof half exhibits extraordinary quality for a coin struck during the bleakest days of the Civil War. The 1862 is a lower-mintage date as well, with only 550 proofs produced. The obverse shows light accents of pinkish-gold toning at the center with an outline of violet and deep blue around the margins.

The reverse retains much of its original brilliance and shows just the faintest accent of amber around the periphery. The strike is pinpoint sharp on all of the motifs, with thick mint frost on the raised surfaces. This coin remains the single-finest specimen certified by PCGS, and one of just eight total No Motto Superb Gem proof halves in non-Cameo or Deep Cameo format. Population: 1 in 67, 0 finer (6/16).

*Ex: ANA Signature (Heritage, 8/2001), lot 6207; Daryl J. Haynor Collection/Chicago Signature (Heritage, 8/2011), lot 7180. NGC ID# 27TN, PCGS# 6416*

## 1862 Seated Half, PR66 Cameo Exceptional Visual Appeal

**4112 1862 PR66 Cameo PCGS.** Essentially untoned save for a beautiful ring of steel-blue, violet, and caramel-gold toning at the margins, this Premium Gem Cameo proof is razor-sharp and richly contrasted. The frosted figure of Liberty and the needle-sharp eagle appear snowy-white against the glassy fields, which are pristine save for a few microscopic lines intermixed with the Mint's die polish lines.

Just 550 proofs were struck to augment the low 253,000-piece business strike mintage for the Civil War year. Only three Cameo proofs are numerically finer at either service combined. Population: 2 in 66 Cameo, 1 finer (7/16). NGC ID# 27TN, PCGS# 86416

## 1865 Half Dollar, Exceptional PR67 Ex: Chrismor, Tied for Finest at PCGS

**4113 1865 PR67 PCGS Secure.** Just 500 proofs were struck in 1865, with only two survivors achieving the Superb Gem grade at PCGS. Deep lilac toning distinguishes the razor-sharp fields and devices of this amazing coin. The intensity of the toning lessens at the obverse center, where an icy silver hue reveals the near-perfect central strike and the wholly unmarked raised elements. The reverse is equally sharp with blue toning at the border and ceding into shades of pale-lavender.

The fields are deeply reflective. When viewed at an angle, the glassy-mirrored quality becomes fully apparent. A loupe reveals a few faint toning interruptions but no surface imperfections. It is incredible such a coin could survive in such pristine condition for more than 150 years. Population: 2 in 67 (1 in 67+), 0 finer (6/16). NGC ID# 27TS, PCGS# 6419

### 1875 Seated Half, Superb PR67 Richly Toned, Tied for Finest at PCGS

**4114 1875 PR67 PCGS. CAC.** While proof half dollar production was fairly substantial in 1875 (700 pieces struck), it was just a tiny number of coins compared to the ample circulation strike coinage which totaled more than 6 million pieces. Both formats are popular for type representation, although the proof variant becomes conditionally scarce above the PR65 grade level.

Rich lavender-charcoal toning envelops both sides and lightens a little over the right central obverse. Cobalt-blue undertones backlight the former shade, and a blush of orange-gold color is noted on the obverse near stars 4 and 5. Sharp in virtually all areas, the strike definition is fully appreciable in the absence of noteworthy blemishes. This coin pedigrees to two of the finest collections sold in the past dozen years. Population: 3 in 67, 0 finer (7/16). NGC ID# 27U9, PCGS# 6436

### 1876 'Dropped C' Half Dollar, PR67 The Only Superb Gem Graded by PCGS

**4115 1876 "C" in Neck, FS-401, PR67 PCGS. CAC.** Several years ago Dick Osburn told us approximately half of the proof halves from 1876 show evidence of a "Dropped C" at the base of Liberty's neck. We are uncertain if that percentage has changed. The top of the C is plainly evident on this piece and requires only light magnification. Few proofs of any denomination show such an interesting Mint-created "flaw." Aside from that, this is the finest 1876 proof half known. The surfaces glow with mirrored reflectivity that shines brightly through the reddish center on the obverse that is surrounded by deep blue. The reverse actually retains a small portion of original brilliance in the center and is then surrounded by the same shadings as seen on the obverse. We hesitate to claim technical perfection for a coin that is 140 years old. We will leave it to prospective bidders to locate post-striking defects because they are not apparent to us. For all 1876 proof halves, this is the only PR67 certified by PCGS (7/16). NGC ID# 27UA, PCGS# 413733 Base PCGS# 6437

## BARBER HALF DOLLARS

**1893-S Half Dollar, MS65  
Reflective Fields**

**4116 1893-S MS65 PCGS. CAC.** The low-mintage 1893-S half (740,000 pieces) had a comparably small survival rate, making Mint State examples highly desirable. Gem-quality coins are in fact quite rare, and above this level the date is almost unknown. Soft golden-tan coloration is joined by sky-blue, apple-green, and lavender around the obverse margins. The design features are sharply impressed except for the often-seen softness on the fletchings and adjacent claw. Trivial marks preclude Gem status. Population: 8 in 65, 1 finer. CAC: 4 in 65, 0 finer (6/16).

*Ex: Central States Signature (Heritage, 4-5/2010), lot 956. NGC ID# 24LM, PCGS# 6467*

**1897-S Barber Half Dollar, MS68  
Single-Finest Certified Example**

**4117 1897-S MS68 NGC.** The 1897-S is well-known as a scarce issue in Mint condition, and especially so in MS65 and better grades. The mintage was only 933,900 pieces, and apparently the vast majority were dropped into circulation and stayed there. Of the coins that were set aside, a great many '97-S halves have been cleaned and stripped of their original surfaces; thus, it is difficult to locate a coin with original color. There are exactly 100 coins (including an unknown number of resubmissions) in Mint State at both of the major services combined. Above MS65, the certified population drops to only 14 submissions (6/16).

This is the sole finest example at either NGC or PCGS (6/16). The surfaces on this piece are nothing short of extraordinary, as one would expect from a coin in this superior grade. The fields are bright and prooflike with moderate mint frost over the devices. Each side shows a delicate interplay of blue and rose coloring, while the mirroring in the fields makes the array on this piece especially vibrant. The striking details are especially bold. An exceptional Barber half and a landmark coin for the issue.

*Ex: FUN Signature (Heritage, 1/2007), lot 995; Greensboro Collection, Part V / ANA Signature (Heritage, 8/2015), lot 4077. NGC ID# 24M2, PCGS# 6479*

### 1903-O Barber Half Dollar, MS66+ Single-Finest Certified at NGC

**4118** 1903-O MS66+ NGC. CAC. From a mintage of 2.1 million pieces, the 1903-O Barber half dollar is not difficult to locate in circulated grades, and lower Mint State examples can be found with a little patience, but the issue is quite elusive at the MS65 grade level, and finer coins are extremely rare. Almost all examples seen are lightly struck on the right side of the reverse to some degree.

The present coin is a delightful Plus-graded Premium Gem, with impeccably preserved surfaces and vibrant mint luster, under attractive shades of jade-gold, silver-gray, powder-blue, and lavender toning. The design elements are sharply detailed in most areas, with just a touch of the usual softness on the shield point and adjacent area of the eagle's wing. An interesting die crack runs from the 3 in the date through the point of the bust. Eye appeal is outstanding. Census: 5 in 66 (1 in 66+), 0 finer (6/16). NGC ID# 24MK, PCGS# 6496

### 1904-O Barber Half Dollar, MS66 Beautiful Color and Surfaces Ex: Duckor, Akers

**4119** 1904-O MS66 PCGS Secure. Ex: Duckor/Akers. Incredibly so for the issue, this Premium Gem 1904-O half is fully struck on both sides. The coin is arguably sharper than the outstanding Dr. Price specimen that David Akers said was "much more sharply struck than normally seen." The brilliant silver surfaces are incredibly smooth and free of problems, other than a few inconsequential ticks. The surfaces are highly lustrous, with satiny fields resulting from die lapping. Both sides have delicate peripheral rainbow toning, including gold, russet, violet, and blue.

This piece compares favorably to all past offerings of 1904-O half dollars. The strike and grade are at least equal to the Price coin and finer than the Pryor-Hugon, Eliasberg, and Nichols specimens. It is also finer than the Norweb example. The Buddy Byers coin had a similar strike but was of inferior technical quality. The Gem specimen in the Queller Family Collection is nearly as fine as the present piece. Population: 6 in 66 (2 in 66+), 2 finer (6/16).

Ex: David Akers (3/29/2003); The Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection / ANA Signature (Heritage, 8/2010), lot 3210. NGC ID# 5EPG, PCGS# 6499

## PROOF BARBER HALF DOLLARS

### 1912-S Barber Half Dollar, MS67 Tied for Finest Certified

**4120** 1912-S MS67 NGC. This coin and the Eliasberg piece both show faint raised die finish lines through the bases of the OLL in DOLLAR. These lines are less prominent on this particular coin, but then the fields are not as obviously reflective as are those of the Eliasberg piece either, indicating this piece is a slightly later strike but still from the same die pair that produced the Eliasberg coin. From a technical and aesthetic viewpoint, this piece is superior to the Eliasberg coin as that piece graded "only" MS66 PCGS. The brilliant surfaces of this example, certified MS67, give the viewer an unrestricted view of the flashy, semiprooflike fields and equally bright, satiny devices. Fully struck on the obverse, there is only the slightest softness evident on the reverse in the usual places: the eagle's right (facing) talons and shoulder. Census: 3 in 67, 0 finer (7/16).

Ex: *FUN Signature* (Heritage, 1/2005), lot 4263. NGC ID# 24NJ, PCGS# 6526

### 1910 Barber Half Dollar, PR68 Stunning Color, Superb Quality

**4121** 1910 PR68 PCGS. CAC. This is one of two PR68 examples of the 1910 Barber half certified by PCGS (6/16), and it possesses eye appeal in spades to go with the impressive technical grade. The obverse flashes a silver crescent, with vibrant ochre, steel-blue, and violet shades predominating elsewhere. On the reverse the color palette is similar, but all-encompassing and spectacular.

The strike is as bold as ever seen on a 1910 Barber half, with only minuscule blending on the right shield corner. Certified in a green-label holder with CAC endorsement, this marvelous, Superb Gem proof is as good as it gets.

Ex: *Central States Signature* (Heritage, 4/2008), lot 2324; *The Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection* (Heritage, 8/2010), lot 3252. NGC ID# 26A4, PCGS# 6557

### 1915 Barber Half, Crisp PR68 A Visual Treat, Numerically Unsurpassed

**4122** 1915 PR68 NGC. This gorgeous Superb Gem proof is really something special. In addition to its unsurpassed technical quality, it possesses a bold strike throughout and is beautifully patinated in rich multicolor hues. Both sides are awash in a vibrant array of aquamarine, violet, amber-gold, champagne, and ivory, with occasional glimpses of forest-green and cherry-red. The term “eye-catching” comes to mind when looking at this coin.

Proof Barber half dollar production had one last hurrah in 1915, with a delivery of just 450 pieces to round out the series. Among proof issues, this date ranks as one of the more challenging overall, especially in high grades, and is also popular for its final-year status. For the patient collector, a handful of “monster” coins survive, such as the present piece. NGC reports eight non-Cameo proofs in this highest numeric grade (one in PR68 ★), while the finest at PCGS grade PR67+ (6/16).

*Ex: Pre-Long Beach Auction (Ira & Larry Goldberg, 1-2/2010), lot 1129; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98550. NGC ID# 24PK, PCGS# 6562*

## WALKING LIBERTY HALF DOLLARS

### 1916-S Walker, Remarkable MS66 Just Two Coins Numerically Finer

**4123** 1916-S MS66 PCGS. CAC. Blue and forest-green shades occupy the obverse margins, while ivory-gold toning and drifts across the satin-smooth fields of this lustrous and attractive first-year Walking Liberty half. The reverse shows tan-gold and blue shades at the borders. The strike lacks fullness at the centers, yet the coin is nevertheless quite sharp for a 1916-S.

Scarcest of the three 1916 issues, the S-Mint production of only 508,000 pieces accounts in part for its rarity in Premium Gem condition. Population reports show the 1916-S is nearly unobtainable in a finer grade. By definition, any MS66 example is tied for third in the Condition Census since only two MS67 coins are known (one at each service). This stunning example is second to none in eye appeal and surface quality. As expected, the coin is CAC endorsed. Population: 13 in 66, 1 finer. CAC: 4 in 66, 2 finer (6/16).

*From The Ray Levoi Collection, Part II. NGC ID# 24PN, PCGS# 6568*

## 1917 Walking Liberty Half, MS67 Bright Mint Luster

**4124** 1917 MS67 PCGS. CAC. PCGS has certified only two other examples of this little-saved second-year issue as MS67 with none finer (6/16), and one of the three certified is this frosty example that is housed in a second-generation holder. The central design features, such as Liberty's hand, and the more peripheral features, such as her head are equally well-defined — certainly better than the norm for this issue. The interior of each side is generally silver; while dappled blue, violet, gold, and maroon hues present at the margin of the obverse. Barely any color is seen over the reverse. An absolutely smooth coin with eye appeal in spades.

*Ex: FUN Signature (Heritage, 1/2011), lot 5597.*

**From The Ray Levoi Collection, Part II.** NGC ID# 24PP, PCGS# 6569

## 1917-D Reverse Walker, Gleaming MS65 Scarcer of the Two D-Mints From This Year

**4125** 1917-D Reverse MS65 PCGS. CAC. Despite a higher mintage, the 1917-D Reverse (1.9 million pieces) is more difficult to locate in Mint State than its similarly dated Obverse Mintmark counterpart (765,400 pieces). Apparently, fewer Reverse Mintmark examples were preserved at the time of issue. A conditionally rare offering, the present Gem is bursting with frosty luster. There is a little light color in a few peripheral areas, but the outward appearance is basically one of silver-white brilliance. Were it not for a single abrasion over Liberty's thigh, this coin would probably warrant an even higher grade. Population: 49 in 65 (1 in 65+), 5 finer. CAC: 9 in 65, 0 finer (6/16).

*Ex: Long Beach Signature (Heritage, 6/2002), lot 6295; Long Beach Signature (Heritage, 2/2009), lot 1421.*

**From The Ray Levoi Collection, Part II.** NGC ID# 24PS, PCGS# 6571

### 1917-S Walking Liberty Half, MS65 Scarce Obverse Mintmark Example

**4126** 1917-S Obverse MS65 PCGS. CAC. Ex: The Dakota Collection. Obverse mintmark. Mint records show just 952,000 1917-S half dollars were struck with the obverse mintmark, followed by more than five times that quantity with the reverse mintmark. Among the early-date Walkers, the 1917-S Obverse ranks as one of key issues both by the number of grading events and certainly by its strong demand.

This is a frosty example with pale-gold toning across both sides and irrepressible mint luster. Hints of rose color appear at the high points and along the obverse margin. Only tiny marks are seen even with a glass — in hand, the surfaces appear impeccable. PCGS reports just four coins in numerically finer grades. Population: 38 in 65, 4 finer. CAC: 7 in 65, 1 finer (6/16).

*From The Ray Levoi Collection, Part II.* NGC ID# 26G7, PCGS# 6572

### 1917-S Walking Liberty Half Dollar, MS65 First Year With the Reverse Mintmark

**4127** 1917-S Reverse MS65 PCGS. CAC. The mintmark was moved to the reverse partway through the year in 1917. Although the San Francisco Mint struck a substantial total of more than 5.5 million Walking Liberty half dollars with the new placement, the 1917-S Reverse is surprisingly difficult to locate in high grade today. Most of the coins were released into circulation and few high-quality examples were saved for numismatic purposes.

The present coin is an attractive Gem, with a better-than-average strike that shows some slight separation between Liberty's thumb and fingers on the wreath hand. The well-preserved surfaces radiate vibrant mint luster, under low-intensity shades of lavender-gray and pale gold toning. Housed in an old green label holder. Population: 51 in 65, 10 finer. CAC: 15 in 65, 3 finer (6/16).

*From The Ray Levoi Collection, Part II.* NGC ID# 24PU, PCGS# 6573

## 1918 Half Dollar, Frosty MS66 Overlooked Early Series Rarity None Certified Finer

**4128 1918 MS66 PCGS. CAC.** Some speckled rainbow toning near the rims yields to lilac-silver hues at the centers of this resplendent 1918 half. Although generally available in lesser grades, the 1918 is an unsung rarity in MS66 and it is unavailable any finer. In keeping with other dates and mints in the early Walking Liberty series, nearly all of the issues are rare in high Mint State grades, perhaps causing collectors to overlook the 1918 with its “large” mintage of more than 6.6 million pieces. Obviously, fewer pieces were saved than with the lower-mintage earlier issues.

A crisp strike on Liberty’s head and branch hand join moderate feather definition on the eagle’s leg. A few light abrasions are visible among the skirt lines. Mint luster glows brightly beneath the attractive patina — all factors that contribute to the accompanying CAC endorsement. Population: 9 in 66, 0 finer. CAC: 4 in 66, 0 finer (6/16). Population: 9 in 66, 0 finer. CAC: 4 in 66, 0 finer (6/16).

**From The Ray Levoi Collection, Part II.** NGC ID# 24PV, PCGS# 6574

## 1918-D Half Dollar, MS65 Lustrous and High-End for the Grade

**4129 1918-D MS65 PCGS. CAC.** This early issue from the Denver Mint is an important condition rarity among early Walkers. Nearly all of the 3.8 million half dollars produced entered circulation. Gem examples are seldom encountered. PCGS has certified 28 examples in MS65, with only three examples graded higher than the present coin (6/16). Strike quality was also a problem at the Denver Mint in this last year of World War I, as the facility apparently had a policy of lowering the strike pressure to extend die life. This example, although a bit soft on the skirt lines and the eagle’s left leg, has well-struck details elsewhere. Bright mint luster radiates from the brilliant, mostly untuned surfaces, with some tiny dark toning spots on both sides seen only under magnification. There is a hint of yellow-orange near the rising sun toward which Liberty confidently strides, while the reverse has a touch of copper and indigo near the motto. A few grade-limiting marks on Liberty’s head and right arm are also noticeable only with a glass. Absolutely appealing, and virtually unobtainable finer.

*Ex: FUN Signature (Heritage, 1/2006), lot 3204.*

**From The Ray Levoi Collection, Part II.** NGC ID# 24PW, PCGS# 6575

### 1918-S Walking Liberty Half Dollar, MS66 Only One Finer Coin at PCGS

**4130 1918-S MS66 PCGS.** The U.S. economy was experiencing a wartime boom in 1918, as World War I reached its climax. As the largest silver denomination being produced at that time, there was a great demand for half dollars in the national economy. Accordingly, the San Francisco Mint struck an enormous mintage of 10.2 million fifty cent pieces that year. The great majority of the huge production total was released into circulation to fulfill its intended purpose and few examples were saved by contemporary collectors. As a result, the 1918-S is easily located in lower circulated grades today, but it is a prime condition rarity in high grade.

In addition to its low availability in Mint State, the 1918-S is known as a weakly struck issue. Almost all examples seen show some incompleteness on Liberty's head and wreath hand, and the eagle's leg seldom shows fine detail in the feathers. Fortunately, the 1918-S typically shows strong mint luster, to compensate for the typical softness on the devices. Although a number of coins exist with vibrant mint luster and minimal surface marks, these examples tend to have flat strikes, and very few have been graded finer than MS65.

The present coin is a spectacular Premium Gem, with a much better-than-average strike. Although some areas show touches of the softness this issue is known for, there is at least some emerging detail on Liberty's head and wreath hand. The well-preserved surfaces radiate strong, satiny mint luster, under attractive shades of champagne-gold toning. We expect intense competition from series specialists when this lot is called. Housed in a new 30th Anniversary green label holder. Population: 2 in 66, 1 finer (6/16). NGC ID# 24PX, PCGS# 6576

## 1919 Walking Liberty Half, MS66 Exceptional Preservation, Seldom Finer

**4131 1919 MS66 PCGS. CAC.** Brilliantly lustrous and essentially untuned, the Premium Gem surfaces of this low-mintage early issue display sharp eye appeal and only a few tiny, trivial marks that are visible with magnification. Only the 1921 issue claims a lower mintage among the P-Mint Walking Liberty halves.

A solid strike for the 1919 date exists here — particularly on Liberty's often-weak head — combined with smooth and lustrous surfaces. Few rivals of similar or finer quality remain among the survivors from its six-figure mintage. PCGS reports a mere five finer representatives — a situation that has not changed in at least seven years, when we last offered this same exceptional coin. Population: 23 in 66, 5 finer. CAC: 6 in 66, 4 finer (6/16).

*Ex: Joseph C. Thomas Collection, Central States Signature (Heritage, 4/2009), lot 2839.*

**From The Ray Levoi Collection, Part II.** NGC ID# 24PY, PCGS# 6577

## 1919-D Half Dollar Highly Lustrous, Choice Mint State

**4132 1919-D MS64 PCGS. CAC.** A condition rarity in the Walking Liberty series, the 1919-D invariably is known for one of the poorer strikes of the early dates. This near-Gem example is sharper than many, with weakness through the centers but it is less pronounced than expected. The surfaces are lightly toned and iridescent showing light-blue and translucent champagne-gold hues on both sides that meld into rainbow colors at the margins.

Mint luster shines brightly across both sides satin-smooth fields and terrific eye appeal. A few tiny marks appear where the strike is incomplete, and some light lines are noted near the eagle's beak, yet the overall quality is excellent as confirmed by the well-deserved CAC endorsement. Few examples of this challenging Denver date are finer. Population: 77 in 64 (3 in 64+), 12 finer. CAC: 20 in 64, 2 finer (6/16).

**From The Ray Levoi Collection, Part II.** NGC ID# 24PZ, PCGS# 6578

### 1919-S Half Dollar, MS66 Condition Census CAC Coin A Major Series Condition Rarity

**4133 1919-S MS66 PCGS. CAC.** Ex: Charles Schultz. The 1919-S is a better date among Walking Liberty half dollars, and Gem-quality coins are particularly scarce. This CAC-endorsed Premium Gem is at the top of the ladder for a PCGS-graded coin, and only a single NGC piece is numerically finer (6/16). The strike is a trifle soft on Liberty's branch hand and the eagle's trailing leg, as usual. But the satiny mint luster and its delicate lavender and champagne toning imparts pleasing eye appeal. The coin is well-preserved.

Including at least a couple of duplications, our Permanent Auction Archives show only six previous offerings of a Premium Gem 1919-S half dollar. The only one of those appearances in the recent past was a PCGS CAC coin that was sold in the ANA Signature sale (Heritage, 8/2015), lot 4128, for the amount of \$42,300. The present coin is every bit as significant in terms of rarity and quality, and the eye appeal is arguably superior. Population: 11 in 66, 0 finer. CAC: 3 in 66, 0 finer (6/16).

**From The Ray Levoi Collection, Part II.** NGC ID# 24R2, PCGS# 6579

### 1920-D Half Dollar, MS65 Underappreciated Early Issue

**4134 1920-D MS65 PCGS.** The 1920-D half is an underappreciated early issue in the Walking Liberty series. The mintage is not especially low (1.5 million struck) but it is scarcer than other early issues, such as the 1919 and 1921. Strike detail can vary widely on the 1920-D, and this is one of the better-struck pieces we have seen recently. The skirt lines are irregular but mostly present and there is a split between the thumb and forefinger, but the head of Liberty and the eagle's feathers display softness. The mint luster is thick and frosted, uninterrupted by any noticeable abrasions. Brilliant throughout. Population: 45 in 65, 6 finer (7/16).

**From The Good Karma Collection.** NGC ID# 24R4, PCGS# 6581

## 1920-D Walking Liberty Half, MS65 Frosty and Razor-Sharp

**4135 1920-D MS65 PCGS. CAC.** The feathers are sharply defined on the eagle's trailing leg — nearly 90% full — and some thumb separation is visible on the obverse for this Gem '20-D Walker. Frosty mint luster shines brightly through a faint patina of clear, pale-gold. Although slightly more available and noticeably sharper than its predecessor, the 1919-D, the 1920-D is very scarce in Gem condition and rare any finer.

This example is housed in a green label holder and is at the upper end of its grade level as confirmed by the CAC endorsement. A few tiny, scattered marks are unseen in-hand and visible only with a loupe. The coin appears mint-fresh and free of most distractions that plague the early Denver issues of the series. Population: 45 in 65, 6 finer. CAC: 7 in 65, 3 finer (6/16).

**From The Ray Levoi Collection, Part II.** NGC ID# 24R4, PCGS# 6581

## 1920-S Walking Liberty Half, MS65 Challenging Issue in High Grade

**4136 1920-S MS65 PCGS. CAC.** In *Collecting & Investing Strategies for Walking Liberty Half Dollars*, Jeff Ambio notes of this issue, "When viewed in the wider context of the Walking Liberty Half Dollar series ... the 1920-S is a rare coin in grades through MS-63 and very rare any finer." Offered here is an attractive and important Gem. The strike on the central "column" (head to hand) of Liberty shows typical softness, but the bright, softly frosted luster in the fields is delightful. Both sides show layers of patina, mainly light silver-gray at the interiors with ample yellow-to-orange colors at the margins as well as prominent blue-to-violet peripheral elements on the reverse. Population: 52 in 65 (1 in 65+), 7 finer. CAC: 15 in 65, 4 finer (6/16). Ex: *FUN Signature* (Heritage, 1/2011), lot 5602.

**From The Ray Levoi Collection, Part II.** NGC ID# 24R5, PCGS# 6582

### 1920-S Walking Liberty Half, MS66 Seldom-Offered, Registry Opportunity

**4137 1920-S MS66 PCGS.** Although the 1920-D half dollar issue tends to command more attention than its San Francisco counterpart, the 1920-S is just as rare in this lofty grade. A comparison of the certified population at PCGS shows six 1920-D examples in MS66 and only seven S-mint representatives in the same grade. Neither issue claims a Superb Gem representative at that service (6/16).

The surfaces of this Premium Gem are essentially all-brilliant with intermittent whispers of faint golden-tan shading. Softly frosted luster coruscates over each side. Liberty's head displays good definition, while the branch hand, upper skirt lines, and the eagle's leg show a touch of typical softness. Pristine and eye-appealing. This Premium Gem example presents a seldom-offered opportunity for the advanced Walking Liberty Registry specialist. NGC ID# 24R5, PCGS# 6582

### 1921 Walking Liberty Half Dollar, MS65+ Low-Mintage Key Philadelphia Issue

**4138 1921 MS65+ PCGS. CAC.** Flanked by its equally rare mintmarked counterparts, the 1921 Philadelphia issue claims the second-lowest mintage of the series at just 246,000 pieces. Only the 1921-D shows a lower mintage (208,000 pieces struck). All three 1921 issues are exceptionally rare in Gem or finer condition when sharply struck with exceptional eye appeal like this lustrous example.

One of the few coins to receive both the PCGS Plus designation and CAC endorsement, the coin is frosty with ice-blue highlights and pale rose-gold accents across both sides. Liberty displays a well-defined head and branch hand, while feather detail on the eagle's leg is faint but present. Mint luster flows beneath the attractive patina. A few tiny ticks need a lens for viewing. Population: 57 in 65 (3 in 65+), 4 finer. CAC: 12 in 65, 2 finer (6/16).

**From The Ray Levoi Collection, Part II.** NGC ID# 24R6, PCGS# 6583

## 1921-D Walking Liberty Half, MS65 Important Key in High Grade

**4139 1921-D MS65 PCGS. CAC.** The 1921-D has the lowest mintage of the famous triumvirate of Walking Liberty halves from this year, but the 1921-S, with a higher mintage, is the rarest Walking Liberty half in Mint State. The 1921-D is nonetheless rare in its own right: Jeff Ambio, in his recent treatise, says, "The 1921-D is not quite as rare as the 1919-D, 1919-S, or 1921-S in terms of total number of Mint State coins known. On the other hand, this issue is rarer than the 1919-S in high grades. A 1921-D that grades even MS-62 or MS-63 represents an extremely important buying opportunity in any numismatic market."

The present impressive Gem offers pale, even golden-lilac patina over each side, with exceptionally strong underlying mint luster. The strike, although generally bold, is just a trifle soft on the head of Liberty and the eagle's foreleg. The surfaces overall are remarkably clean and show no obvious marks. Population: 32 in 65, 3 finer. CAC: 11 in 65, 2 finer (6/16).

*Ex: Central States Signature (Heritage, 4/2009), lot 2513.*

**From The Ray Levoi Collection, Part II.** NGC ID# 24R7, PCGS# 6584

## 1921-S Walking Liberty Half, MS64 Low-Mintage Key Issue

**4140 1921-S MS64 PCGS. CAC.** From a low mintage of 548,000 pieces, the 1921-S Walking Liberty half dollar is the most elusive issue of the series in absolute terms. Apparently, contemporary numismatists were not alerted by the small production total and few high-quality examples were saved at the time of issue. Perhaps collectors concentrated on the Philadelphia and Denver issues of this date, which have even lower reported mintage totals, but are slightly more available in today's market. In any case, the 1921-S is very scarce at the MS64 grade level and finer coins are rare.

The present coin is an impressive Choice specimen that shows better detail on Liberty's head and wreath than usually seen on this issue, which is known as a strike rarity. The brightly lustrous surfaces show only minor signs of contact, with attractive highlights of champagne-gold and lavender-gray toning. Population: 51 in 64 (2 in 64+), 18 finer. CAC: 8 in 64, 5 finer (6/16).

**From The Ray Levoi Collection, Part II.** NGC ID# 24R8, PCGS# 6585

### 1923-S Walker, Border-Toned MS65 Elusive in High Grade

**4141 1923-S MS65 PCGS.** The 1923-S is a challenging issue in Gem condition, and finer pieces are rare. The typical Mint State example grades MS63 or MS64 and has scattered abrasions. This PCGS-graded Gem shows ivory-white interiors surrounded by deep amber-gold and russet border toning. Eye appeal is outstanding. The strike is weak on the central high points, as usual, but the fields are well-preserved. The 1923-S is among the last dates in the series that are truly elusive in MS65. The present piece will fit in nicely with a Gem or finer collection. Population: 44 in 65 (4 in 65+), 9 finer (6/16).

*From The Ray Levoi Collection, Part II.* NGC ID# 24R9, PCGS# 6586

### 1927-S Walking Liberty Half, MS66 None Finer at PCGS

**4142 1927-S MS66 PCGS. CAC.** The 1927-S was the first half dollar issued in four years with the exception of commemoratives. While most of the early half dollars were not needed for commerce, the expanding economy of the late 1920s necessitated the resumption of the denomination. Due to the sudden increase in demand, the vast majority of 1927-S halves were poorly struck and saw extensive circulation. Thus, while easily located in most grades, the 1927-S is scarce in high grades and truly rare in Premium Gem.

Mottled lavender and rose-gold patina enhances the surfaces of the present coin. The strike is above-average with only a touch of weakness on the central devices. A couple of tiny handling marks are nearly imperceptible without magnification. Impressive satiny luster enhances the eye appeal. Population: 8 in 66, 0 finer. CAC: 4 in 66, 0 finer (6/16).

*Ex: Central States Signature (Heritage, 4/2009), lot 2521; Los Angeles Signature (Heritage, 8/2009), lot 1694.*

*From The Ray Levoi Collection, Part II.* NGC ID# 24RA, PCGS# 6587

**1935-D Walking Liberty Half, MS67  
Almost Fully Struck  
Finest Certified at NGC**

**4143 1935-D MS67 NGC.** The 1935-D is a stopper for the collector assembling a set of fully struck Walkers. They just don't exist. At least we have never seen one. However, this piece is as close as we can remember to being fully struck. There is one break in the skirt lines, the thumb-forefinger separation is complete, and 80% of the detail on Liberty's head is present. That in itself makes this a special 1935-D. Additionally, the surfaces are brilliant and highly lustrous and do not show any mentionable abrasions on either side. Exceptional quality for the advanced collector of Walkers. Census: 1 in 67, 0 finer (7/16). NGC ID# 24RK, PCGS# 6596

**1940-S Half Dollar, MS67  
Registry-Grade Quality**

**4144 1940-S MS67 PCGS.** The 1940-S Walker is available in the absolute sense, but Registry Set collectors and other enthusiasts seeking a top-grade Superb Gem will encounter a significant challenge. Only two dozen Superb Gems are reported at PCGS and NGC combined, and none are finer than MS67+ (6/16). This is a date that most high-ranking PCGS Registry sets actually lack in Superb Gem condition.

The present example displays an impressively bold strike and satiny luster with clean fields. A hidden graze on Liberty's torso is literally the only detectable abrasion. A halo of russet and gold toning surrounds the borders, leaving the interiors ivory-white. Eye appeal is expectedly strong. Population: 13 in 67 (3 in 67+), 0 finer (6/16). NGC ID# 24S2, PCGS# 6610

## FRANKLIN HALF DOLLARS

### 1951 Franklin Half, MS67 Full Bell Lines Rare So Well-Preserved Registry Set Must-Have

**4145 1951 MS67 Full Bell Lines PCGS.** The Franklin half dollar series is an exceedingly popular ambition for Registry collectors, as there are no absolute key dates, and most issues are available in high grade without breaking the bank. But conditionally rare exceptions exist, and the 1951 Philadelphia issue is such a coin. PCGS has seen only six submissions in MS67 Full Bell Lines and none finer. NGC shows two coins in this grade and none finer (6/16). The present example is an absolutely remarkable coin, showing luminous, frosty mint luster with a dusting of lavender-blue toning that shows wisps of gold and mint-green near the borders. Unlike many other high-grade Franklins, this Superb Gem lacks any small abrasions or die debris marks on the bell and cheek. The surfaces are beautiful, and the strike is sharp. NGC ID# 24SY, PCGS# 86658

### 1960 Franklin Half, MS67 Full Bell Lines The Single Finest Certified

**4146 1960 MS67 Full Bell Lines PCGS. CAC.** A Registry collector's dream coin, this Superb Gem Full Bell Lines 1960 Franklin half dollar is the sole finest at PCGS, and it is a full grade point finer than the best FBL examples at NGC (6/16). This is the absolute finest example of the date that has ever been offered at auction — look for the price record to be shattered when this beautiful coin crosses the auction block. The coin is very nearly flawless when viewed beneath a loupe, and radiant, frosty luster rolls effortlessly over each side. Most of the interiors display ice-blue toning, while the borders have deeper forest-green, crimson, gold, and russet coloration. Eye appeal is as superb as the preservation. NGC ID# 5H6J, PCGS# 86678

## PROOF FRANKLIN HALF DOLLARS

### 1950 Franklin Half, PR66 Ultra Cameo Top Series Rarity in Ultra Cameo

**4147 1950 PR66 Ultra Cameo NGC.** A rare Ultra Cameo example of the debut Franklin half dollar proof. This is a coin that is almost essential for a high-ranking Registry Set, as there are only 14 dates in the proof series, and high-grade Ultra/Deep Cameos are universally the most difficult examples to acquire. In fact, the 1950 is the rarest proof Franklin in Ultra/Deep Cameo in series, with the sole exception of the 1956 Type One, which is not required for a standard date set. Across all grades, NGC and PCGS combined have seen only 31 Ultra/Deep Cameo 1950 proofs. The present example displays stark white-on-black contrast with no toning, and the mirrored fields glimmer like liquid beneath a light. The strike is full, and the preservation is outstanding. Census: 3 in 66 Ultra Cameo (1 in 66+), 2 finer (6/16). NGC ID# 27VA, PCGS# 96691

### 1954 Half Dollar, PR68 Deep Cameo Very Scarce With Such Strong Contrast

**4148 1954 PR68 Deep Cameo PCGS. CAC.** Most 1954 half dollars were struck from heavily repolished dies. The striations across the portrait of Franklin are often mistaken for post-striking impairment, but they are found on a high percentage of 1954 halves. The status of this year was best assessed by Rick Tomaska:

“... the vast majority of these coins [cameos] are only moderately contrasted off repolished dies. Ultra-heavy examples are occasionally encountered. They are a real sleeper in this condition.”

This is an all-brilliant half that shows shimmering mirrored fields, which set up much of the contrast against the heavily frosted devices. Population: 10 in 68 Deep Cameo, 0 finer. CAC: 5 in 68, 0 finer (7/16). NGC ID# 27VE, PCGS# 96695

## SMS KENNEDY HALF DOLLAR

---

### 1967 Half Dollar, MS69 Ultra Cameo Special Mint Set Issue

**4149** 1967 SMS MS69 Ultra Cameo NGC. When silver coinage was discontinued at the end of 1964, the government also discontinued issuing proof and mint sets, and they stopped putting mintmarks on coins. Beginning in 1965, special five coin sets were issued under the new name of Special Mint Set. These special sets were issued through 1967, and regular proof sets were again produced in 1968, but now at the San Francisco Mint. While the Special Mint Set coins were substantially higher quality than regular circulation-strike coins, they were not the same quality as proof coins, and for that reason, examples are rarely seen at the top grade levels. This amazing, nearly perfect, Superb Gem has brilliant silver surfaces with extraordinary field-to-device contrast. This is the only MS69 Ultra Cameo at NGC with nothing comparable at PCGS. NGC ID# 24WJ, PCGS# 96847

## EARLY DOLLARS

### 1794 Dollar, Still-Pleasing XF Details B-1, BB-1, Historic First-Year Issue The Former Westchester Specimen

**4150 1794 B-1, BB-1, R.4 — Altered Surfaces — PCGS Genuine. XF Details.** We estimate perhaps 140 to 150 1794 Flowing Hair dollars survive in all grades from a reported mintage of 1,758 pieces. Equipped with a screw press best suited for minting half cents, cents, and other coppers, the fledgling Mint somehow managed a production of 5,300 Flowing Hair half dollars and then a brief mintage of silver dollars. While the half dollars were issued primarily for commerce and were at once a staple of the early circulating coinage, the silver dollars had a dual role — they did circulate, but they were also showpieces to confirm the viability of the federal Mint and the country's burgeoning financial wherewithal.

On the Mint's part, the production of silver dollars did not come easily. Many — if not most — pieces had planchet and strike problems of one sort or another. Striking pressure was inadequate for the large coins, unable to fully strike up the design and minimize planchet imperfections and file marks. Die alignment was a problem, causing large portions of the mintage to be weak in the date area and left side of the obverse and reverse. Many coins were rejected outright as unacceptable, and few pieces measured up to the Mint's standard of quality.

The few surviving 1794 dollars each has a story to tell, much of it through the strike and preservation of the individual coins. Yeoman work was done by Jack Collins, who spent a quarter of a century researching and documenting the 1794 dollars. The fine reference by Martin A. Logies, *The Flowing Hair Silver Dollars of 1794*, provides an invaluable study of every 1794 dollar known at the time of its publication in 2010.

The present coin is listed on page 128 of that reference as the Westchester specimen. It appeared in the 1987 Bowers and Merena auction of The Westchester Collection, then graded XF40/40 (ANACS 10/17/86), there described:

"An attractive specimen of one of America's great numismatic classics, albeit with the usually seen peripheral weakness (at lower left of the obverse and corresponding part of the reverse) and mint-caused adjustment marks. The centers are well struck, especially so, with the hair detail, eye, lips, nose, ear, and other features of Miss Liberty bold. The reverse is as similarly well detailed as the obverse."

The coin is currently encased in a PCGS Genuine holder with XF Details, with "Altered Surfaces" the reason (or one of the reasons) it did not receive a numeric grade. There are no overt signs of surface alteration other than a silver-gray patina that is perhaps overly light for a 1794 dollar. Some faint hairlines indicate an old cleaning, but they are barely visible on the coin. Several Mint-related adjustment marks appear at the obverse margins, with strike weakness along the left border and incompleteness at STATES on the reverse. A moderate rim bump at 4 o'clock on the reverse is noted, as are three linear planchet streaks in the right obverse field from star 12 to the neck. Two or three small planchet flaws exist, not unexpected for this early dollar.

The hair definition is strong and Liberty's cheek full and rounded. Likewise, the eagle's wing feathers and tailfeathers are individually sharp, and the eagle's head is well-formed. Now slate-gray in color with some deep-gray accents, the surfaces retain considerable appeal. The few collectors fortunate enough to seek a 1794 dollar will find this a suitable representative of the classic American issue, our nation's first silver dollar coinage.

**From The Palos Verdes Collection, Part II.** NGC ID# 24WY, PCGS# 39972 Base PCGS# 6851

### 1794 Dollar, XF Sharpness B-1, BB-1, Ex: Moore-Guggenheimer

**4151** 1794 B-1, BB-1, R.4 — Obverse Repaired — NCS. XF  
**Details.** Bowers-Borckardt Die State III with shortened curls from a Mint attempt to efface clash marks, which are still evident on the field near the mouth and beneath the jaw. As a rule, silver dollars from this year are rarely offered at public auction, and the demand for these coins far outdistances the supply. This particular coin is whizzed, and stars 13 to 15 are affected by a repair. A planchet flaw near star 8 has been wiped, and a second (and lesser) planchet flaw is concealed within the lower hair curls.

Numismatists for many generations have been willing to accept or overlook these defects, as this piece has been in major collections since the 1870s. The surfaces are medium gray with lighter accents over the highpoints on the reverse. Weakly struck on the obverse stars, as always, with the left side of the reverse also weak from having been struck from misaligned dies. The only mentionable abrasion is a diagonal scratch across the eagle's neck that continues into the field below. Liberty's cheek is full and round, while Liberty's flowing hair strands retain Choice definition. A well-detailed and historic 1794 dollar — always desirable and important — listed on page 136 of the 2010 Martin Logies reference, *The Flowing Hair Silver Dollars of 1794*.

Ex: Michael Moore Collection (Edward Cogan, May 1-2, 1879), lot 611; John C. Lighthouse Collection (J. C. Morgenthau & Co., February 18-19, 1936), lot 208; F. S. Guggenheimer Collection (Stack's, January 22-24, 1953), lot 945; June Long Beach Signature (Heritage, 6/04), lot 6106; Long Beach Signature (Heritage, 9/2007), lot 1847 which realized \$86,250.

## 1795 Flowing Hair Dollar, Exceptional VF30 B-3, BB-11 With Silver Plug

**4152** 1795 Flowing Hair, Two Leaves, Silver Plug, B-3, BB-11, R.5, VF30 PCGS. Ex: Miller. Elusive as a variety, the BB-11 is eagerly sought by collectors for its Head of '94 and Two Leaves type. When found with a Mint-inserted silver plug, the allure of such a coin increases exponentially. The Mint experimented with silver plugs as a way to bring underweight planchets up to standard early on in its operations, in lieu of rejecting an off-weight planchet outright. In many ways, the rudimentary plugs were a more sophisticated solution to planchet irregularities than the way of solving the opposite problem: overweight planchets, which were brought back to the proper weight with a file — usually with the resultant adjustment marks.

This example shows the circular plug clearly, visible on both sides of the coin. Although the coin is richly toned in pleasing, olive-gray shades, the plug area varies in toning as a result of its slightly different composition. Overall, the coin is sharply defined for the VF30 grade with a wealth of detail remaining on the motifs. Bold rims surround perfectly centered devices and smooth fields, which are remarkably unabraded and problem-free. NGC ID# 24WZ, PCGS# 39990 Base PCGS# 6854

## 1795 B-4, BB-14 Flowing Hair Dollar, AU50 'Hidden Star' Variety, Scarce This Fine

**4153** 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4, AU50 PCGS. Bowers Die State I. Two Leaves, Head of '94. Struck from a perfect state of the dies, from an early impression with a small lump beneath the chin of Liberty and a short die flaw between stars 10 and 11 near the rim. This is an originally toned example with pleasing silver-gray surfaces accented by olive-gray, gold, and blue shades with traces of mint luster remaining throughout both sides. A pair of bold centering dots appear below the ear — an oddity of the BB-14 variety — which is also highly sought by specialists for its unusual star arrangement. Star 13 is tucked below Liberty's neck truncation, a location not seen on any other Flowing Hair dollars, earning the variety its "Hidden Star" nickname.

The BB-14 die marriage is known for sharp strikes on the central motifs. Even well-circulated pieces retain some definition where other varieties are worn smooth, a result of high rims that protect the devices. This AU coin is particularly strong at Liberty's hair detail and some of the breast feathers remain on the rounded breast. The wing, leg, and tail plumage are sharp. A few light lines from circulation need a glass to view, and there are no significant marks or defects to report. Perhaps the Mint took extra care with the BB-14 strikes since they were among the earliest dollars produced by the new Mint in 1795. Housed in an old green label holder. Population (all Two Leaves varieties): 18 in 50, 75 finer (6/16).

*Purchased privately from Heritage (8/1987).*

**From The Hamilton Collection.** NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853

### 1795 B-7, BB-18 Three Leaves Dollar, MS61 Near the Condition Census

**4154 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, MS61 PCGS Secure.** Bowers Die State I, the usual die state of this variety with two extensions from the end of the left ribbon. Central weakness is minimal on this well-struck 1795 dollar that features exceptional centering with full obverse and reverse borders. The surfaces exhibit myriad minuscule marks that limit the grade. Both sides are brilliant and untuned with semi-reflective fields around the lustrous devices. Chief coiner Henry Voigt and his team got this one right, as there are no adjustment marks visible on either side. This highly appealing 1795 Three Leaves dollar will make a nice addition to a type set or specialized collection.

The second edition of the *Bowers Silver Dollar Encyclopedia* records seven Mint State examples among the notable specimens section for the variety. The present piece makes an eighth example, appearing in the Bowers list at its former AU58 grade level. The top examples of the variety include coins graded MS66 PCGS, MS65 PCGS, MS65 NGC, MS64 PCGS with a silver plug, MS64 PCGS, MS63 Uncertified, MS61 PCGS, and MS60 Uncertified. In all grades, the B-7, BB-18 silver dollar is relatively plentiful with survival estimates ranging in the 500 to 800 coin range. However, only eight are known in Mint State at the present time. This is an extremely important opportunity for the early silver dollar connoisseur.

*Ex: Frontenac Sale (Bowers and Merena, 11/1991), lot 2202 as AU58 PCGS. NGC ID# 24WZ, PCGS# 39973 Base PCGS# 6852*

## 1795 B-1, BB-21 Dollar, Sharp AU53 Popular Choice for Two Leaves Type

**4155** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, AU53 PCGS. CAC. Bowers Die State I. The attractive, original toning and sharply struck motifs combine to give this Flowing Hair dollar extraordinary eye appeal. Glimpses of amber-gold mint luster peak through protected areas to enliven the rich patina. The coin is free of adjustment marks or, for that matter, any standout marks whatsoever — the smooth fields and design high points harbor only inconsequential contact and faint abrasions for the assigned grade.

Struck from the B-1, BB-21 dies, slight rub exists but it is not to the detriment of the striking detail, which remains strong. The BB-21 dies are noted for high relief of the central devices, making them vulnerable to quick wear, yet Liberty's hair strands are bold and traces of the eagle's breast feathers remain. The CAC endorsement confirms the natural quality that is blatantly obvious to any connoisseur of early dollars.

**From The Eagle One Collection, Part III.** NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

### 1795 Flowing Hair Dollar, Lustrous MS61 B-1, BB-21, Two Leaves Reverse

**4156** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, MS61 NGC. The blundered obverse has the 7 in the date recut over an errant 1. This is the second most plentiful 1795 silver dollar variety known, behind the B-5, BB-27 die combination. Probably 70% or more of all 1795 Flowing Hair dollars are one of those two varieties.

Given the number surviving today, the original mintage necessarily must have been substantial, but all observed examples seem to be from perfect dies. For example, careful examination of this piece fails to reveal any clash marks, die cracks, lapping, or other die imperfections. That leads to the natural question: Why was use of the die discontinued? At the time, dies were normally used until they became so damaged that they could not remain in the press any longer. In some cases, dies were still used even after that became unserviceable, if no replacement dies were available.

The present specimen is a remarkable Mint State example with a sharp and well-centered impression. Both sides are fully lustrous with light silver surfaces and splashes of rose-brown toning. The surfaces are pleasing overall, exhibiting only slight abrasions that are consistent with the grade. We conservatively estimate that about 1,000 examples of this variety still exist, but probably only six or seven are known in the various Mint State grades. This extraordinary piece will clearly please the specialist.

*Ex: Houston Signature (Heritage, 12/2008), lot 798. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853*

## 1795 Flowing Hair Dollar, Choice XF B-5, BB-27, Three Leaves

**4157** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF45 PCGS. The Flowing Hair silver dollar was struck for only two years, and since the 1794 is a costly rarity, most early type collectors instead select a 1795 example. Bolender-5 is easily attributed by the slender "bar" behind the highest neck curl, and represents the type in more holdings than any other Flowing Hair variety. This charming Choice XF example offers medium steel-gray and chestnut-gold toning. A lens fails to locate any distracting abrasions, and we note a brief diagonal line below the TE in STATES only as aid to identification. Moderate wear on Liberty's curls and the eagle's breast is commensurate with the third-party grade.

**From The Palos Verdes Collection, Part II.** NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

## 1795 Flowing Hair Dollar, AU53 B-5, BB-27, Sharp Three Leaves Dollar

**4158** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, AU53 NGC. Bowers Die State III. The BB-27 variety is easily attributed by the familiar die line just to the left of the uppermost curl toward the point of the fifth star, three leaves under each wing, seven berries on the left branch and six on the right, and four leaves below the first S of STATES.

A mix of steel-blue, golden-tan, and gray patination occupies the obverse, while the reverse is mostly a golden-tan. All of the dentils are bold, as are the stars. Good definition is also visible in Liberty's hair, the eagle's wing feathers, and the leaves. The surfaces on both sides are quite smooth. A couple of adjustment marks are visible on Liberty's upper neck, and what appears to be a small lamination is located above the ear. All in all, a pleasing About Uncirculated Flowing Hair dollar with lovely natural patina and sharply defined motifs.

**Ex: Dallas Signature (Heritage, 11/2007), lot 931.** NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

## Unique 1795 Double Plug Dollar, AU53 The Only B-5, BB-27 With a Silver Plug First of Any Variety Seen With Two Silver Plugs

**4159 1795 Flowing Hair, Three Leaves, Two Mint Silver Plugs, B-5, BB-27, R.1, AU53 NGC.** Michael Kolman of Federal Brand Enterprises in Cleveland, Ohio described lot 3061 in the 1964 ANA sale as a new discovery, a 1795 Bolender-1 silver dollar with an 8 mm. diameter plug. "The coin has a plug about 8 mm., or about 9/32" in diameter in size, clearly defined through the high cheek and hair of Miss Liberty's face, and this was done, in my opinion, at the mint." Kolman suggested that the planchet had a hole in it that was plugged and then struck. In fact, his opinion is now known as fact. What he didn't know at the time was that multiple examples exist, and that the hole in the planchet was purposely put there so that the silver plug would adjust the weight.

The next published notice of these Mint-plugged silver dollars came almost 30 years later when Q. David Bowers and Kenneth E. Bressett discussed these coins in the 1993 Bowers reference, *Silver Dollars and Trade Dollars of the United States*. Bowers suggested that the plug was intended to adjust the weight of the coins:

"It may have been that during the weighing process, certain planchets were found to be slightly too light. Rather than go through the process of melting the planchets, casting the metal into ingots, rolling strips from the ingots, and making new planchets, it may have been deemed more expedient to drill a small hole in the center of the lightweight planchet and insert a silver plug, extending slightly above and below the planchet surface; a plug with enough extra weight to compensate for the drilled hole and also the deficiency in the original planchet weight. The planchet-with-plug was then struck by dies, flattening the plug and producing coins as observed."

These plugged dollars, first described in 1964, were known to a few numismatic students since the early 1980s. Some had suggested that the plugs might have been intended to adjust the fineness of the silver dollar planchets rather than the weight. However, most students today agree that these plugs were intended to adjust the weight.

A decade after the U.S. Mint experimented with silver plugs, a visitor to the Lima (Peru) Mint described a similar process. Amasa Delano described the process in *Narrative Voyages and Travels in the Northern and Southern Hemisphere*, published in Boston in 1817:

"The next process is the weighing; the person who performs this has a little square box containing silver pins that are no longer than the thickness of a dollar, and of different weights and sizes; the dollars are thrown one by one into the scales, but it is seldom that any of them are too heavy. When they are, they generally pass them without notice, but if any are too light, a pin is thrown into the scale, which brings it to the standard weight. The dollar is then put under a screw that has a pointed instrument in the end of it, which is screwed down and pierces a hole in the dollar sufficiently large to receive the pin; then it is placed under another screw, with a smooth end, which completely fastens the pin in the coin; they are then passed into another room and scoured ... (after the pieces were coined ... the master stepped to the pile and took a handful which he brought to me to inspect, and shewed me where the pins were put in to make up the weight, which were very plain to see."

While we don't know the exact process used at the Philadelphia Mint in 1795, we must assume it was similar. An underweight planchet was pierced and a silver pin was fastened to the planchet by means of smooth "dies" in a screw press. Once the planchet was prepared in this manner, it was reweighed and then introduced to the production line where it was struck with the silver dollar dies. It would appear that in this case the usual first plug in the center did not raise the weight sufficiently to meet the legal standard of 26.96 grams, and that a second plug was then inserted, bringing this coin up to its weight of 26.98 grams - virtually the perfect legal weight called for. Some silver plugs are visible only on the obverse, while others are visible on both sides. If the silver pin that is inserted into the piercing is loose and the combination is introduced into the press with smooth dies, the pin would be flush with the planchet surface and when affixed to that planchet, would only be visible on one side. However, a tight fitting silver pin would extend out of the piercing on both sides, and then would show on both sides of the planchet.

Many 1795 silver dollars, along with a single 1794 dollar, and a small number of 1795 half dollars, show evidence of a Mint inserted silver plug. Since the design details flow over the plugged planchet, we are certain that this process took place at the Mint prior to striking.

Today, for the first time ever, we have a 1795 Flowing Hair dollar that has two mint inserted silver plugs, one at the center of the obverse and the other at the lower reverse. Each of the two plugs have a diameter of about 4 mm. The obverse plug is located on Liberty's neck, tangent to the jaw line which appears through the plug. The plug's outline is ragged or uneven, and clearly on the same plane as the surrounding surface, and that is another feature that points to its authenticity as a mint inserted silver plug. Similarly, the reverse plug that is located between the ribbon ends, has a ragged, uneven outline that is also on the same plane as the surrounding surface. The right ribbon end overlaps the plug, and the prominent die flow lines that are typical of the Bolender-5, BB-27 dollar, are clearly visible outside and through the plug.

Our consignor, who wishes to stay anonymous, identified this Double Plug dollar and submitted the piece to us for study and analysis. The coin was also examined at Hallenbeck Coin Gallery in Colorado Springs where metallurgical testing was conducted. The obverse and reverse fields average 88.13% silver, the obverse plug tested at 93.66% silver, and the reverse plug tested at 90.69% silver. NGC also conducted testing with similar results: an average of 88.75% silver in the fields, 91.64% silver at the obverse plug, and 90.77% silver at the reverse plug.

This example has lovely pewter-gray, pale blue, and rich gold toning on its satin surfaces with a few trivial contact marks that are consistent with the grade. Both sides exhibit light clash marks, and the reverse has a die crack from the second T in STATES to the left terminal leaf and the top inside leaf pair on the right. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

### 1795 Flowing Hair Dollar, AU55 Three Leaves, B-5, BB-27

**4160** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, AU55 NGC. Ex: Durango Collection. Bowers-Borckardt Die State III. A relatively large mintage of 160,295 Flowing Hair dollars was accomplished in 1795, with 19 die varieties known for the date. It is possible that some 1795-dated coins were struck in later years, as the number of extant specimens is greater than the reported mintage would suggest.

The present coin is an attractive Choice AU specimen of the BB-27 variety, with the "bar" in the obverse field, near the highest curl. The BB-27 is the most available variety of the Flowing Hair type. This was the only use of the obverse die, but the reverse was also used to strike the BB-25 and BB-26 varieties of the date. The lightly abraded surfaces show vivid shades of cerulean-blue, golden-brown, and lavender-gray toning, with original mint luster underneath. The design elements show only light wear, but the high relief of the bust caused that feature to be softly impressed. A few light planchet adjustment marks appear in the lower obverse dentils. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

### 1795 Flowing Hair Dollar, AU58 Three Leaves, B-5, BB-27

**4161** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, AU58 PCGS. A high-grade representative that retains a generous amount of luster in the fields and is well-defined except for the nearly obligatory softness over Liberty's middle curls and on the eagle's breast. The surfaces are lighter toned silver-gray, although an isolated stained area is noticed in the upper left portion of the reverse. Expect strong interest in this near-Mint example. For this variety: Population: 2 in 58, 3 finer (6/16).

Ex: ANA Signature (Heritage, 7/2005), lot 10235; Dallas Signature (Heritage, 11/2005), lot 2185. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 B-14, BB-51 Draped Bust Dollar,  
Choice XF, Gold CAC  
Old Green Label Holder**

**4162** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, XF45 PCGS. Gold CAC. Bowers Die State I. Apparently, many examples of Gilbert Stuart's design were saved as souvenirs when the Draped Bust first appeared on 1795 silver dollars. Several Mint State coins survive, and many coins were saved after brief circulation. The present piece may be such a coin, judging by the partially prooflike fields and the overall lack of wear. The fields are lightly toned with a pale-gold patina that merges with orange and grayish-blue accents at the margins. Marks are limited to a few light abrasions and faint field lines.

The BB-51 variety is the Off-Center Bust obverse, with Liberty's top-most curl centered beneath the B of LIBERTY. The coin is well-struck for the type, particularly on the vulnerable reverse motifs and on the obverse stars. Liberty's hair strands are equally sharp. Graded Choice XF by PCGS in an old green label holder, **this is the sole 1795 Draped Bust dollar to receive the coveted gold CAC endorsement in any grade.** Visually and from a technical standpoint, we agree with CAC that the coin is undergraded. Only minor wear exists on the high points, with plentiful mint luster remaining and terrific eye appeal. Here is an important find for early dollar and type collectors. Population: 30 in 45, 46 finer (716). Gold CAC: 1 in 45, 0 finer (716).

**From The Hamilton Collection.** NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1795 Draped Bust Dollar, AU55  
Bust Off-Center, B-14, BB-51**

**4163** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, AU55 NGC. Ex: Durango Collection. Although many silver dollars of the Flowing Hair design were struck earlier in the year, only 42,738 Draped Bust dollars were reportedly minted that year, with two die varieties known for the date. It may be that some 1795-dated coins were struck in later years, as the issue is more available than the small production total would suggest.

The present coin represents the BB-51 variety, with the bust placed off-center, to the left. This was the only use of the obverse die, but the hardy reverse was used to strike five more varieties from 1796-1798. Only the slightest touch of actual wear is evident on the drapery at the shoulder and the eagle's breast. Some clash-marks from the bust show in the upper reverse field. The lightly abraded surfaces retain significant amounts of original mint luster and show attractive highlights of pale gold and lavender toning. The design elements are sharply detailed and there is no evidence of planchet adjustment marks. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

### 1796 Draped Bust Dollar, B-4, BB-61, XF45 *Guide Book*, Small Date, Large Letters

**4164** 1796 Small Date, Large Letters, B-4, BB-61, R.3, XF45 PCGS. Bowers Die State II. The curl to the left of the date is sharp and complete, while Liberty's forecurl is weak and detached from partial lapping of the die. BB-61 is the only collectible example of this *Guide Book* variety featuring the Small Date paired with a Large Letters reverse. (A second variety, BB-64, is unavailable with just three pieces known.)

A Choice silver-gray example with smooth, minimally marked fields and devices, we note three faint, hair-thin lines that run from near Y in LIBERTY to the portrait. A fourth such line runs from star 15 to the drapery. The coin is well-struck with sharp stars on the obverse and an exceptionally bold reverse, which is often weak on the 1796 dollars. Some breast feathers remain on the eagle. Housed in a prior generation green label holder.

**From The Hamilton Collection.** NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

### 1796 B-5, BB-65 Dollar, Choice AU Large Date, Small Letters

**4165** 1796 Large Date, Small Letters, B-5, BB-65, R.2, AU55 NGC. Bowers Die State II. The diagnostic die lump from the I in AMERICA approaches the letter C but does not touch it. The borders display light to medium tan-brown toning, most apparent beneath the bust tip, throughout OF, and below the wreath ribbon ends. A generous amount of luster illuminates the legends, curls, eagle, wreath, and stars. A few unobtrusive minor marks on the right obverse field merit only passing mention. Light wear is noted on the curls above the ear, and on the eagle's right (facing) leg. BB-65 is the only 1796 Large Date variety and is typically encountered in VF grades. A problem-free Choice AU example is both rare and desirable.

**From The Palos Verdes Collection, Part II.** NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

## 1797 Draped Bust, Small Eagle Dollar, AU53 10x6 Stars, Large Letters, B-3, BB-71

**4166** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, AU53 NGC. Bowers-Borckardt Die State III. The 1797 Draped Bust dollar boasts the lowest reported mintage of the type, at a minuscule 7,776 pieces, with three die varieties known for the date. Although the 1797 is scarce as a date, it is much more available than the small mintage would suggest. It seems likely that many 1797-dated dollars were actually struck in 1798 and were included in the large reported mintage figures for that year.

The present coin represents the BB-71 variety, with the obverse stars arranged in a 10x6 pattern. This was the only use of both the obverse and reverse dies. Only light wear shows on the bust shoulder and eagle's breast, but Liberty's curls and the leaves on the right side of the wreath show some incompleteness of detail, due to lapping. The pleasing surfaces are richly toned in shades of golden-brown and lavender-gray, with traces of original mint luster underneath. No large or distracting abrasions are present, but some planchet adjustment marks are evident on the bust and a couple of minor rim bruises show at 3 o'clock on the obverse. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1797 Draped Bust Dollar, MS62**  
**10x6 Stars, B-3, BB-71**  
**Ex: Cardinal Collection**

**4167** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, MS62 PCGS. Ex: Cardinal Collection. Bowers-Borckardt Die State III. A die dot to the right of the second digit in the date appears to make the date read 17.97. The reverse has large letters in the legend, and there are eight berries in the left branch, with the lowest berry near the ribbon bow on the outside of the wreath. A leaf ends under the middle of E in STATES. There are three leaves below the left (facing) wing. Die State III shows relapping on both sides—the highest wave of hair under the upright of B in LIBERTY is incomplete, as are the right edges of several palm leaves. This is the die state usually seen.

The silver-gray luminous surfaces of this MS62 example display occasional splashes of light golden-tan and bluish-violet. A relatively well executed strike imparts strong definition to the design features, including most of the star centrils, Liberty's hair strands and drapery, the branch leaves, and the eagle's plumage, with the exception of weakness in the lower right breast and right (facing) leg. Light diagonal adjustment marks run from upper right to lower left through Liberty's portrait, terminating in the 1 of the date and in stars 1 through 4. Light clash marks are visible in the right obverse field. A few minor handling marks are noted on each side, but these do not detract from the overall appeal of this attractive early dollar. This coin traces its history to several famous collections, including the R.L. Miles Collection and the Cardinal Collection. Population: 2 in 62, 3 finer (6/16).

Ex: R.L. Miles Collection (*Stack's*, 4/1969), lot 1532; Public Auction Sale (*Stack's*, 9/1975), lot 299; ANA Signature (*Heritage*, 8/1998), lot 8028; Cardinal Collection (*American Numismatic Rarities*, 6/2005), lot 20; Central States Signature (*Heritage*, 4/2009), lot 2543. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1797 Draped Bust Dollar, AU50**  
**9x7 Stars, Large Letters, B-1, BB-73**

**4168** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, AU50 NGC. Bowers-Borckardt Die State II. Based on the number of surviving specimens, Q. David Bowers suspects that the true mintage of 1797-dated Draped Bust dollars was close to 60,000 pieces, rather than the 7,776 examples reportedly struck in 1797. If the dies were still useable at the end of 1797, the Mint would have continued to strike coins with them the following year, until they wore out. Thus, most 1797-dated dollars were probably actually struck in 1798 and were included in the 327,536 silver dollars reportedly produced that year. Three die varieties are known for the date.

The present coin represents the BB-73 variety, with the obverse stars arranged in a 9x7 pattern and Large Letters in the legend on the reverse. The obverse die was used earlier to strike the scarce BB-72 variety of this date and the reverse was used again to produce the BB-82 variety the following year. Only light wear shows on the drapery at the left shoulder and the eagle's breast, but some localized softness is evident in Liberty's hair and forehead and the corresponding area on the reverse. The pleasing surfaces are lightly abraded and retain traces of original mint luster. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

**1798 B-23a, BB-105 Bust Dollar, AU55**  
**Natural Silver-Gray Patina**  
**Nice Luster Remains**

**4169** 1798 Large Eagle, Pointed 9, Wide Date, B-23a, BB-105, R.3, AU55 PCGS. CAC. Bowers Die State III. The Bowers list of Notable Specimens ranges from AU55 to MS65, an indication of the scarcity of the BB-105 variety in higher grades — an unexpected circumstance, since the die marriage is one of the most-available Draped Bust dollars of any date or variety in lesser grades.

Struck from a late die state, this example is sharp and attractive. Silver luster gleams brightly at the margins and in protected areas around the central devices. Elsewhere, the medium silver-gray patina is natural and largely undisturbed by the coin's brief stint in circulation. Only small abrasions and marks are visible with a glass, none of which are individually apparent when viewed in-hand. The strike is sharp on the outer elements and stronger on the central motifs than many survivors. Housed in an old green label holder with CAC endorsement.

*Purchased privately from Heritage 7/1987.*

**From The Hamilton Collection.** NGC ID# 24X6, PCGS# 40022 Base PCGS# 6877

### 1798 Heraldic Eagle Dollar, MS61 Wide Date, Pointed 9, B-23, BB-105

**4170** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, MS61 PCGS. CAC. Bowers Die State II. A Mint State example of the Guide Book's Pointed 9, Wide Date category, with four lines per vertical shield stripe. Several small die flaws dot the surfaces, some of which are attributable to die rust. The 8 in the date firmly touches the drapery.

Intermittent multicolor toning covers both sides with significant amounts of silver luster showing through. Shades of amber-orange, reddish-gold, lilac, and purplish-gray bespeak the originality of the surfaces. The strike is sharp, lacking only at the eagle's breast feathers and head. Numerous light lines and small abrasions are distributed across the fields and devices. Housed in an old green label holder with CAC endorsement.

Ex: *Heritage* (1/1988).

**From The Hamilton Collection.** NGC ID# 24X6, PCGS# 40022 Base PCGS# 6877

### 1798 Large Eagle Dollar, AU58 B-30a, BB-116, Pointed 9, Late Die State

**4171** 1798 Large Eagle, Pointed 9, Close Date, B-30a, BB-116, R.5, AU58 PCGS. Ex: Miller. Bowers Die State VI. The Bowers *Encyclopedia* plate coin for BB-116. Among the finest of the variety, listed in the second position on the Bowers list of Notable Specimens. The strike is razor-sharp on Liberty's upper curls and at the star centers, with some weakness on the central field stars above the eagle's head due to die bulge. Slight wear from brief circulation joins a few light lines and abrasions on both sides. Mint luster remains in the form of tawny-gold toning at the margins merging beneath blue and deep-lilac shades across the central motifs.

The late die state is represented by a bold die crack from the rim through the first A in AMERICA to the nearby wing feathers. On this example, the crack is bold but less "bloblike" than other late-state coins. Both sides are deeply struck with prominent rims and dentils, although the reverse is minimally off-center northeast. The eye appeal is exceptional. NGC ID# 24X6, PCGS# 40033 Base PCGS# 6873

**1798 Bust Dollar, MS62  
B-9, BB-121, Among the Finest Known**

**4172** 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4, MS62 NGC. This is a scarce die marriage that is usually found in lower grades. Prior to the appearance of this example nine years ago, the variety was unknown in Mint State grades. At that time, the Cardinal Collection contained an AU58 example that was described as tied for finest known of the variety. This piece shows a few faint scratches on the obverse that prevent an even higher numerical grade. The surfaces have frosty luster with pleasing ivory color that is splashed by deeper gold and steel toning. This is a top-rate example of this variety as well as one of the finer 1798 silver dollars known.

*Ex: Long Beach Signature (Heritage, 2/2007), lot 3610. NGC ID# 24X6, PCGS# 40038 Base PCGS# 6873*

**1799/8 Draped Bust Dollar, AU58  
15 Stars Reverse, B-3, BB-141**

**4173** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, AU58 NGC. *Ex: Durango Collection. Bowers-Borckardt Die State IV.* The 1799 Draped Bust dollar claims the largest mintage of the series, at 423,515 pieces. Based on current availability, it seems likely that some of the coins were actually struck from 1798-dated dies that were still serviceable in 1799. Twenty two die varieties are known for the date, with three varieties struck using a single overdated obverse die from 1798.

The present coin is an attractive near-Mint specimen of the popular BB-141 *Guide Book* variety, with the overdated obverse and the 15 star reverse. The engraver must have impressed 15 stars on this reverse die in error, and then attempted to cover the first star on the left and last star on the right by enlarging the two nearest clouds to cover up these errant devices. Despite his best efforts, two star points still protrude from the bottoms of these clouds. In addition, the dentils on the lower right obverse of this coin are strongly doubled, the result of an offset clashing with the reverse die. Only a trace of actual wear shows on the well-detailed design elements, and the lightly abraded, lustrous surfaces show a few hints of pale gold and lavender-gray toning. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

### 1799/8 B-3, BB-141 Dollar, MS62 15 Stars Reverse, Bold Overdate

### 1799/8 Dollar, Lustrous MS63 B-1, BB-142, Tied For Finest Known

**4174** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, MS62 PCGS. Bowers Die State II. Both type and series specialists are attracted to the engraving anomalies on the BB-141. The obverse overdate is pronounced, with an underdigit 8 clearly visible beneath the final 9. On the reverse, the well-known engraver's blunder of the field stars required oversized clouds to hide two extra stars — one behind cloud 1, the other behind cloud 8. The lower-most points of the extra stars peek out from the clouds. BB-141 is the earliest variety of three overdated 1799 dollars, which include BB-142 and BB-143. The 15-Stars Reverse actually occurs in an earlier die state on BB-153, which must have been struck before the overdates.

This Mint State example of BB-141 is one of a small number of Uncirculated coins known for the die pair. This sharply struck representative is semireflective with lustrous iridescence on both sides. Pale-blue and champagne-gold hues predominate. A few tiny, scattered marks and several Mint-related die flaws are visible on both sides when viewed with a lens. Population (for the 15-Star Reverse varieties): 5 in 62, 5 finer (6/16). NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

**4175** 1799/8 13 Stars Reverse, B-1, BB-142, R.4, MS63 NGC. This incredible coin is one of the finest known examples of the variety. Like the Eliasberg coin, this piece shows fully defined peripheral stars on the obverse. The centers, however, have just a bit of weakness on each side. The surfaces are satiny and generally free from any distracting marks. The obverse is untuned except for a bit of golden color beneath the date, while the reverse is toned around the margins in rich shadings of russet and blue, otherwise brilliant. A rare opportunity for the early dollar specialist.

*Ex: FUN Signature (Heritage, 1/2004), lot 2098. NGC ID# 24X8, PCGS# 40065 Base PCGS# 6884*

## 1799 B-23, BB-159 Dollar, MS61 Famous 8x5 Stars Obverse Tied for Second Finest Known

**4176** 1799 8x5 Stars, B-23, BB-159, R.3, MS61 NGC. Ex: "Col." E.H.R. Green/Eric P. Newman Collection. Bowers Die State II. This attractive Mint State specimen shows bright silver luster at the centers, with some design weakness behind the forehead and on the top edge of the wings. Both sides display splashes of original champagne toning with deep peripheral iridescence on the obverse. Struck from the usual die state for the variety, showing a delicate die crack down through the E and B of LIBERTY, but lacking the late-state die crack across the lower obverse. The obverse star arrangement is diagnostic for the BB-159. This is the only early dollar variety with the unusual, unbalanced 8x5 star layout, an arrangement also seen on gold coins of the year. Some believe the star alignment to be an engraver's blunder, while others suggest it was a Mint experiment that was not well received.

With a population estimated at more than 500 coins, the 1799 8x5 Stars dollar is relatively plentiful. However, its importance as a distinctive design type trumps the substantial population. In addition, the existence of only four certified Mint State examples adds considerably to its cachet. The present coin is tied with an MS61 NGC example in the Warren Miller Collection as the second finest known 1799 8x5 Stars dollar. NGC Census: 2 in 61, 0 finer (6/16).

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman; Eric P. Newman Numismatic Education Society (Heritage, 11/2013), lot 33509. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

## 1799 B-12, BB-160 Bust Dollar Pleasing MS62 Exceptionally Sharp Strike

**4177** 1799 7x6 Stars, B-12, BB-160, R.3, MS62 PCGS. Bowers Die State III. This is a beautiful early dollar — crisply struck, evenly toned, and unquestionably original in all regards. Viewed at an angle, deep-seated shades of blue and coppery-gold emerge amid soft mint luster. The raised elements are deeply impressed and pinpoint sharp. A glass reveals no imperfections beyond a few tiny ticks, which are invisible to the naked eye. The coin is well-centered with high rims and full dentils.

The BB-160 variety is noted for its "No Berries" reverse, which claims its own listing in the *Guide Book*. The sharpness of the strike reveals three stems and one weak berry on this coin (although some may argue the fact). No matter. The high quality of the piece takes center stage, and it delivers an impressive performance. Housed in an old green label holder.

Ex: Heritage 5/1988.

From The Hamilton Collection. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

### 1799 B-12, BB-160 Bust Dollar, MS62 'No Berries,' Star 1 Distant

**4178** 1799 7x6 Stars, B-12, BB-160, R.3, MS62 PCGS Secure. Ex: Miller. Bowers Die State III. The first of two varieties with the No Berries reverse (the other is BB-161), a *Guide Book* variety. The obverse displays many bold die cracks, closely approaching the Die State IV. While the BB-160 obverse die struck BB-160 only, the reverse die was lapped and relapped through five uses, resulting in the No Berries feature.

Variegated royal-blue, steel-gray, and orange-gold toning covers the obverse, while the reverse exhibits alternating areas of light and deep silver-gray patina. Silver mint luster shines throughout both sides beneath the toning. Liberty's curls are well-defined, with minor high point blending at the shoulder and the central reverse field stars. This is an attractive and obviously original Mint State early dollar with few marks of any kind. Previously in the fine Warren Miller Collection. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

### 1799 B-10, BB-163 Dollar, AU58 Late Die State, Semireflective Fields

**4179** 1799 7x6 Stars, B-10, BB-163, R.2, AU58 PCGS. Ex: Miller. Bowers Die State IV. The Bowers plate coin for the latest die state of BB-163. An available variety in lesser grades, yet Mint State and near-Mint coins are scarce for the die pair — a fact that suggests the coins were well-used in commerce. This example displays a translucent sheen of russet-gold toning over brightly lustrous, semireflective silver surfaces.

The strike is remarkably sharp given the near-fatal state of the reverse die. Multiple die cracks criss-cross the margins. The O in OF shows an internal cud from intersecting die cracks. A few faint adjustment marks run across the shield from the eagle's left (facing) wing. Only the high points of the portrait and the eagle's breast feathers show actual wear from circulation, along with infrequent small marks and lines visible with a lens. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

## 1799 Bust Dollar, MS61 B-8 BB-165, 7x6 Stars Variant

**4180** 1799 7x6 Stars, B-8, BB-165, R.3, MS61 NGC. Ex: Durango Collection. Die State II. The inner ray of star 10 is doubled, and the N of UNITED repunched over an inverted N. The N of UNITED was first punched in upside-down, or the I was punched too close as an extra serif shows on the lower right of the N. The reverse die shows light clash marks near OF from Liberty's drapery, and a light die crack shows through star seven into LIB of LIBERTY. Attractive steel-gray and golden patina shows over each side and is accented with mottled russet color near the base of the obverse. A substantial amount of spotty russet-blue toning has accumulated on the reverse. The peripheral details are sharp and well-defined. Some weakness is noted above the eagle's head and on Liberty's hair. The underlying fields exhibit bright, satiny luster. Bust dollar enthusiasts will pay close attention to this important offering.

Ex: *Denver Signature (Heritage, 8/2006)*, lot 5300. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

## 1799 Dollar, Exceptional AU58 7x6 Stars, Scarce B-21, BB-169

**4181** 1799 7x6 Stars, B-21, BB-169, R.3, AU58 PCGS. Ex: Hesselgesser-Miller. Bowers Die State V. Struck from rusted dies. Extensively cracked obverse nearing its terminal state, the sole use of the die. Essentially full mint luster beams from both sides of this near-Mint coin, beneath iridescent toning featuring grayish-blue and fawn-gold hues. A hint of rub on Liberty's temple curls and the eagle's breast provide little distraction from the sharply struck elements.

BB-169 is rare in Uncirculated condition. The Bowers Encyclopedia lists only three Mint State coins — an MS62 and a pair of MS60s. Along with three other AU58 examples, this coin joins the Condition Census for the variety. The surfaces are just about devoid of marks, making the attractive toning the most reliable pedigree marker for future reference. The present example is the Bowers plate coin for the variety. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

### 1801 B-2, BB-212 Dollar, Attractive AU55 Strong Strike, Minimal Marks

**4182** 1801 B-2, BB-212, R.3, AU55 PCGS. Ex: Miller. Bowers Die State II. The Bowers *Encyclopedia* plate coin. Die clashing on the obverse includes a “double collar” at the top of Liberty’s bust and wavelike clashes above the date. The BB-212 variety is often weakly struck at the centers, yet this Choice About Uncirculated example is well-defined on both sides. The eagle’s head detail and the breast feathers are above average, and Liberty’s portrait is sharp. The field stars are fully brought up.

Die progression reveals the BB-212 dollars were struck after 1802, later than some of the 1802 varieties but before the 1803 dollars were struck. The reverse was hubbed with only twelve arrows, with a 13th arrow added by hand. Nice luster remains on both sides of this lightly toned golden-gray dollar. Slightly deeper color at the borders frames the appealing silver centers. A scarce issue in the series, with a reported mintage of 54,454 pieces but many of those were likely dated 1800. Population: 14 in 55, 32 finer (6/16). NGC ID# 24XA, PCGS# 40084 Base PCGS# 6893

### 1802 Draped Bust Dollar, MS61 Narrow Date, B-6, BB-241

**4183** 1802 Narrow Date, B-6, BB-241, R.1, MS61 PCGS. Ex: Durango Collection. Bowers-Borckardt Die State III. The reported mintage of silver dollars in 1802 was a meager 41,650 pieces, with seven die varieties known for the date. It is possible that some 1802-dated dollars were struck in later years, as the date is more available than that small production total would suggest. Five varieties were struck using overdated obverse dies from 1801, while two varieties used “perfect date” dies from 1802. Many years later, a few specimens of this date were struck in proof format, using a different set of dies that were prepared in the 1830s.

The present coin is a rare Mint State representative of the BB-241 variety, with a “perfect date” obverse and the leaf pointing to the left corner of the base of I in AMERICA. The right foot of T in LIBERTY is broken. The pleasing surfaces are blanketed in attractive shades of greenish-gold, lavender-gray, and russet toning, with strong mint luster underneath. Only minor signs of contact are evident and there is no sign of planchet adjustment marks. The design elements are sharply rendered, aside from some minor incompleteness in the curls, due to lapping. The overall presentation is most appealing. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

## 1803 Draped Bust Dollar, AU55 Popular B-5, BB-252 Variety

**4184** 1803 Small 3, B-5, BB-252, R.3, AU55 PCGS. Bowers-Borckardt Die State I. The BB-252 variety is identified by the small numeral 3 placed high in the date and a spur on the outside lower-right curve of the D in UNITED. This was the only use of the obverse die, but the hardy reverse was used to strike six other varieties from 1801-1803. With a surviving population of 500-950 coins, the BB-252 is relatively easy to locate in lower circulated grades, but the issue is very scarce in AU.

The present coin is an attractive Choice AU specimen with well-detailed design elements that show just a trace of wear on the high points of the design. The pleasing lavender-gray and golden-brown surfaces are lightly abraded and retain flashes of original mint luster, with a few hints of amber on the reverse. Population: 14 in 55, 16 finer (6/16).

**From The Eagle One Collection, Part III.** NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

## 1803 Small 3 Dollar, B-4, BB-254, AU55 Sharp and Appealing

**4185** 1803 Small 3, B-4, BB-254, R.3, AU55 PCGS Secure. Ex: Miller. Bowers Die State I. Semiprooflike surfaces display an attractive, natural patina that glows with faint iridescence. Blue, slate-gray, and reddish-gold shades are evenly dispersed across the obverse, while the reverse shows vibrant peach-gold, lime-green, and pale-blue hues. As usual, the BB-254 is sharply struck on both sides. A single die state exists utilizing the perfect obverse die, while the reverse saw multiple uses over several years.

Only a few Uncirculated examples of the variety are known. This Choice About Uncirculated example makes the Bowers roster of Notable Specimens at the lower end, but with high-end eye appeal. The motifs are deeply impressed and contrast nicely with the colorful, reflective fields. The average BB-254 survivor grades VF or so, a grade far exceeded by this attractive and well-produced example. Population (all Small 3 varieties): 16 in 55, 20 finer (6/16). NGC ID# 24XD, PCGS# 40099 Base PCGS# 6900

### 1803 Draped Bust Dollar, AU55 Guide Book Large 3 Variety, B-6, BB-255

**4186** 1803 Large 3, B-6, BB-255, R.2, AU55 PCGS. CAC. Bowers-Borckardt Die State II. According to Mint records, 66,063 Draped Bust dollars were struck in 1803. Many numismatists believe the 19,570 dollars reportedly struck in 1804 were actually dated 1803, since no circulation-strike 1804 dollars have ever surfaced. It seems likely that most of these coins were dated 1803, but it is certainly possible that some 1801 and 1802-dated dies were used in this production, as well. Six die varieties are known for the date. This coin represents the BB-255 variety, the only variety with a large 3 in the date. Walter Breen believed the Large 3 coins were struck in 1804.

The present coin is a well-detailed Choice AU specimen that shows just a trace of wear on the high points of the devices. The pleasing reddish-gray surfaces show a few highlights of champagne-gold and are free of large or distracting abrasions. Light traces of planchet adjustment marks can be seen in the date and Liberty's hair, and a hairline die crack connects stars 10 and 11. Traces of original mint luster shine through the toning. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

## GOBRECHT DOLLAR

### 1836 Gobrecht Dollar, Lightly Toned PR50 Judd-60, Die Alignment I

**4187** 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1 PR50 PCGS. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the DO in DOLLAR). The often-seen diagonal die clash is plainly evident at the top of the eagle's wing, dating this piece to the last half of the final week of 1836. The Gobrecht dollar was the precursor to the long-lived Seated Liberty design that endured until 1891. However, the original design by Christian Gobrecht was only produced for three years and is a very scarce and highly sought-after type coin. Many are holed, damaged, or heavily toned and as such are rendered uncollectible to many collectors. This piece, however, displays light, even golden-rose toning across both sides. The fields show significant reflectivity (more Prooflike than proof, but tradition dictates the pieces be called proof). Very few post-striking marks can be found on either side. For the collector looking for a nice-looking, problem-free Gobrecht, this piece is well worth examination and stretching to obtain. NGC ID# BLWV, PCGS# 11225

## SEATED DOLLARS

### 1840 Seated Dollar, MS63 Only Three Finer at PCGS

**4188 1840 MS63 PCGS Secure.** Following Christian Gobrecht's pattern dollars struck in 1836, 1838, and 1839, the Seated Liberty design debuted among silver dollars in 1840. This Select Mint State piece has lustrous gray surfaces with splashes of iridescent toning on both sides. Strong design elements are noted, along with slightly reflective fields. Scattered surface marks on both sides are hidden under the toning. The obverse die exhibits fine die lines along the border right of the date, and the reverse has similar die lines over IC of AMERICA. Population: 10 in 63, 3 finer (5/16). NGC ID# 24YA, PCGS# 6926

### 1844 Silver Dollar, MS63 Only Four Certified in Finer Grades

**4189 1844 MS63 PCGS Secure.** The 20,000 Seated dollars minted in 1844 and the 15,000 minted in 1848 are the two lowest mintages of the decade. Not surprisingly, Mint State survivors of those two issues are elusive, and PCGS has only graded 31 such examples of the 1844. This piece has delicate champagne toning over reflective fields that gently contrast with the lustrous devices. This example shows the "quad-stripes" of circulation strike 1844 Seated dollars, and it clearly shows doubling of other elements within the shield on the obverse. Proofs were from a different obverse die that has normal shield details. The reverse die has myriad criss-cross die lines below both wings. An important opportunity for the advanced Seated Liberty dollar collector to obtain a fine example. Population: 8 in 63, 3 finer (5/16). NGC ID# 24YE, PCGS# 6930

### 1850-O Seated Liberty Dollar, MS62 Rare Issue in Mint State

**4190** 1850-O MS62 PCGS Secure. OC-1, R.2. A small mintage of 40,000 Seated Liberty dollars was accomplished at the New Orleans Mint in 1850. Most of the coins were released into circulation at the time of issue and few were saved for numismatic purposes. As a result, the 1850-O is very rare in all Mint State grades today. A single pair of dies was used to strike the entire mintage and this was the only use of both the obverse and reverse dies.

The present coin is an attractive MS62 example, with well-detailed design elements and lustrous surfaces that show a scattering of minor contact marks on both sides. A few subtle hints of greenish-gold toning enhance the considerable eye appeal. Population: 5 in 62, 5 finer (5/16). NGC ID# 24YN, PCGS# 6938

### 1850-O Seated Dollar, MS62 Lustrous With Moderate Patina

**4191** 1850-O MS62 NGC. OC-1. The 1850-O Seated dollar issue was only the second of the series for New Orleans, and the first since the 1846-O. Despite the generous-for-the-series mintage of 40,000 coins, most survivors today appear to have circulated heavily, leaving an average certified grade somewhere between XF40 and XF45. The present MS62 example is far finer, one of four submissions in this grade at NGC with four finer (6/16). The original surfaces are still bright with mint luster under a moderate-intensity layer of iridescent toning, with olive-green and sunset-orange predominating. The strike is fairly sharp and there are no overt marks, although a sprinkling of light field hairlines and tiny abrasions define the grade.

Ex: *Philadelphia Signature* (Heritage, 8/2012), lot 5185. NGC ID# 24YN, PCGS# 6938

## 1853 Seated Dollar, MS64 Rich Original Toning

**4192** 1853 MS64 PCGS. CAC. OC-1, R.2. OC Die State d/b. Designated as a Top 30 variety by Dick Osburn and Brian Cushing, due to the "Chin Whiskers" vertical die lines below Liberty's jaw. No Motto Seated dollars are available in bagmarked Uncirculated grades due to a hoard of 1859-O and 1860-O examples distributed during the early 1960s. But near-Gems of any date are rare. The present golden-brown and cream-gray representative has good luster and a precise strike. Minor parallel roller marks (as issued) cross Liberty's legs, and the upper reverse field displays unimportant contact. Population: 17 in 64 (1 in 64+), 4 finer (6/16). CAC Population: 4 in 64, 4 finer (6/16). NGC ID# 24YS, PCGS# 6941

## 1859-S Seated Dollar, MS62 Scarce San Francisco Issue

**4193** 1859-S MS62 PCGS. OC-1. OC Die State a/b. The base of the 18 is lightly repunched. The reverse border exhibits numerous delicate die cracks. A dove-gray representative of the only No Motto San Francisco issue. A scant 20,000 pieces were struck, primarily for export to the Orient, where the coins were valued strictly as silver bullion. The 1859-S is very scarce in all grades, but sufficient problem-free circulated examples exist to suggest that not all of the issue was exported. A portion of the mintage must have entered West Coast commerce. Uncirculated examples are rare, with the two finest known certified as MS64+ PCGS and MS65 NGC. The present MS62 1859-S dollar displays silver-gray toning. Marks are minimal, though as an identifier we note a small rim knock at 6 o'clock. Mint-made minor flan streaks pass through Liberty's neck and raised arm. Population: 8 in 62, 9 finer (7/16). NGC ID# 24YZ, PCGS# 6948

## 1863 Silver Dollar, MS65 Among the 10 Finest

**4194 1863 MS65 PCGS.** Silver and gold hoarding during the Civil War forced the government to suspend specie payments, and the only silver dollars minted, 27,200 in 1863, were struck on account of private depositors of silver bullion. Banks, bullion dealers, and merchants purchased coins at a premium for use in foreign trade, mostly to Latin American and East Indian ports. The result of the low mintage and high exportation was a minuscule supply that were available for numismatic purposes, and most of those that were preserved were proof examples from the 460 such pieces minted.

Perhaps as many as 75 Mint State 1863 Seated dollars survive from the 27,200-coin mintage. That is an extremely low survival rate, and among those that do survive, the typical example grades MS63 or MS64. PCGS and NGC, combined, have certified 108 submissions in the various Mint State grades, including an unknown number of resubmissions. A total of 69 of those are in the two aforementioned grades and only 13 are in higher grades through MS67 (7/16).

This impressive Gem features a bold strike with every detail impressively rendered. The head details, skirt lines, and stars on the obverse are fully defined. All of the eagle's feathers, claws, the shield, and the leaves are crisply detailed. Both sides exhibit satin surfaces with full cartwheel luster beneath splendid toning. The pewter-gray obverse displays splashes of gold and steel-blue, while the reverse has vibrant gold, blue, and violet toning. An extraordinary piece for the advanced specialist. Population: 3 in 65, 5 finer (7/16). NGC ID# 24Z6, PCGS# 6953

## 1871-CC Seated Liberty Dollar, AU58 Low-Mintage Branch Mint Key

**4195** 1871-CC AU58 NGC. OC-1, High R.4. Among Seated Liberty dollars from the Carson City Mint, the 1871-CC claims the lowest mintage, at 1,376 pieces. The 1871-CC is an elusive issue in all grades and the acknowledged key to the Carson City series, although the 1873-CC is almost equally rare. A single die variety was used to strike the entire mintage. This was the only use of the obverse die, but the reverse had been used previously, to produce one variety in 1870.

The present coin is an attractive Near-Mint specimen that shows just a trace of wear on the high points of the well-detailed design elements. The lightly abraded surfaces exhibit much prooflike reflectivity in the fields and display a few hints of greenish-gold toning. Census: 8 in 58, 4 finer (6/16). NGC ID# 24ZH, PCGS# 6967

## 1872-CC Seated Liberty Dollar, MS61 Vivid Multicolor Toning

**4196** 1872-CC MS61 NGC. OC-1, High R.3. The 1872-CC Seated Liberty dollar claims a low mintage of 3,150 pieces, making the issue historically elusive in all grades. Dick Osburn and Brian Cushing note that the 1872-CC has experienced a recent surge in auction activity, as though a small hoard has been recently filtered into the market. Despite the apparent increase, the supply of Mint State examples remains entirely inadequate to satisfy collector demand. Although the leading grading services have seen a few more submission events, it is likely that fewer than 20 examples exist in all Mint State grades today.

Like most high-grade examples, the present coin shows traces of prooflike reflectivity in the fields. The design elements are well-detailed, with just a touch of the usual softness on Liberty's head and the star centers. Delightful shades of greenish-gold, lavender, and cerulean-blue toning blanket the pleasing surfaces, which show the minimum number of minor contact marks for the grade. Census: 5 in 61, 7 finer (6/16). NGC ID# 24ZK, PCGS# 6969

## PROOF SEATED DOLLARS

### 1873-CC Seated Liberty Dollar, VF35 Sought-After, Low-Mintage Key

**4197** 1873-CC VF35 PCGS Secure. OC-1, High R.4. Only 2,300 Seated Liberty dollars were struck at the Carson City Mint in 1873, making the issue scarce-to-rare in all grades today. A single pair of dies was used to strike the small mintage. The reverse die was previously used to strike dollars in 1870 (OC-8), but went unused in 1871 and 1872. Of course, this was the only use of the obverse die.

The present coin is an attractive Choice VF specimen that shows some wear on the shield ribbon, but retains most of the letters in LIBERTY intact. The lightly abraded surfaces are blanketed in subtle shades of golden-brown toning. Population: 10 in 35, 42 finer (5/16). NGC ID# 24ZN, PCGS# 6972

### 1855 Seated Dollar, PR64+ Glossy Patina, Excellent Eye Appeal Perhaps 40-60 Pieces Survive

**4198** 1855 PR64+ PCGS. Deeply mirrored fields showcase vivid ocean-blue, violet, and champagne hues over each side of this razor-sharp near-Gem proof. The devices exhibit satiny luster, with the coin displaying a distinctly glossy appearance overall. Any grade-defining hairlines are undetectable to the unaided eye, and the visual appeal is exceptional.

The exact number of proof 1855 Seated dollars struck is unknown, though the most often seen estimate is just 60 coins. Of these, most are believed to survive (40 to 60 examples, per the PCGS website), but the issue is still among the most elusive proof issues in the Seated dollar series. Due to the rarity of high-grade business strikes of this date (heavily exported for trade purposes and presumably later melted), surviving proof examples such as this piece, however rare, are in high demand among date collectors.

*Ex: Rarities Sale (Bowers and Merena, 8/1996), lot 234. NGC ID# 2529, PCGS# 6998*

## 1856 Seated Liberty Dollar, PR63 Scarce and Elusive Proof Issue

**4199** 1856 PR63 PCGS. CAC. OC-P1, High R.5. Osburn-Cushing Die State a/a. Most 1856 proof dollars were probably issued as part of silver proof sets, which in that year were starting to have a wide following among numismatists. The approximately 40 examples thought by Breen to exist are more or less in line with the 60 or so seen by PCGS and NGC, after discounting resubmissions and crossovers. Recent research shows a single die pair struck the 1856 proofs, notable for the reverse die that was also used for some 1851 and 1852 proof restrikes, likely produced in the late 1850s.

Both sides of this Select example display soft golden-tan color accented with whispers of electric-blue and lavender at the margins. A well executed strike delivers sharp definition to the design elements, with no areas revealing even hints of weakness. A few faint hairlines are visible with a glass. Housed in an old green label holder. Population: 9 in 63, 12 finer. CAC: 3 in 63, 3 finer (6/16).

Ex: Long Beach Signature (Heritage, 2/2010), lot 1308. NGC ID# 252A, PCGS# 6999

## 1867 Seated Liberty Dollar, PR65+ Rare Deep Cameo Example

**4200** 1867 PR65+ Deep Cameo PCGS. OC-P1, R.3. Dick Osburn and Brian Cushing note a single die pair was used to strike all 750 proof Seated Liberty dollars in 1867. This is in sharp contrast to Walter Breen's earlier research, which suggested there were three different die marriages for this issue. This was the only use of the obverse die, but the reverse was used to produce at least one proof variety every year from 1866 through 1870.

This Plus-graded Gem exhibits razor-sharp definition on all design elements, typical of this well-produced issue. Despite some attractive greenish-gold toning, a rich coat of mint frost creates intense cameo contrast with the deeply mirrored fields. The well-preserved surfaces add to the stellar eye appeal. Population: 1 in 65 (1 in 65+) Deep Cameo, 2 finer (6/16). NGC ID# 252N, PCGS# 97015

## TRADE DOLLARS

### 1871 Seated Liberty Dollar, PR66 Cameo Tied for Finest at PCGS

**4201** 1871 PR66 Cameo PCGS. CAC. OC-P2. Deeply frosted grayish-gold devices on each side of this high-end proof type coin contrast well against the reflective fields, offering primarily pinkish-gold coloration with accents of ice-blue closer to the rims. A total of 960 proofs were reportedly struck this year, but this piece is definitely among the upper echelons of survivors, both in terms of preservation and contrast. A loupe reveals no mentionable marks among the light patina, and the strike is full, or essentially so, throughout both sides. This Cameo Premium Gem is one of only three such at PCGS, and none are finer (6/16). An excellent candidate for a fine type or Registry Set. NGC ID# 252T, PCGS# 87019

### 1874-CC Trade Dollar, MS64 Popular Carson City Issue

**4202** 1874-CC MS64 PCGS. CAC. All Trade dollars are hard to locate in Choice and Gem condition, even when they purport to be common dates. Although there are exceptions, the San Francisco Mint issues are most plentiful, followed by Philadelphia, and then Carson City. This example is from a reverse die with the two letters of the mintmark closely spaced. It is highly lustrous with exceptional surface quality and only a few minor abrasions. Wisps of lilac and rose toning are most evident on the obverse. CAC-approved in a green label holder. Population: 22 in 64 (1 in 64+), 2 finer. CAC: 5 in 64, 1 finer (6/16).

*Ex: Long Beach Signature (Heritage, 9/2005), lot 3783. NGC ID# 2532, PCGS# 7035*

## MORGAN DOLLARS

**1878-S Trade Dollar, MS66  
Golden-Brown Border Toning**

**4203 1878-S MS66 PCGS.** Peach-gold and apple-green toning endows the margins of this otherwise brilliant high-grade type coin. Precisely struck and highly lustrous with a pristine reverse and minimal obverse contact. Die variety researchers should take note of the die lump on the border of the left (facing) wing and a flat curved projection (as made) from the border of the right wing. 1878 was the final year of business strikes. 4,162,000 pieces were struck at San Francisco prior to the arrival of Morgan dollar dies. PCGS has certified 15 MS66 coins and an additional 10 MS66+ pieces with only three pieces finer (7/16). NGC ID# 253G, PCGS# 7048

**1878-CC Morgan Dollar, MS66+  
Rarely Encountered Finer**

**4204 1878-CC MS66+ PCGS. CAC.** Razor-sharp and frosty, this first-year Carson City Morgan is completely untuned and displays original mint-fresh luster. The preservation is superb — the only grade-limiting flaws are a few faint grazes below Liberty's eye. The cartwheel effect is radiant. The 1878-CC Morgan commands a mintage of more than 2.2 million coins, but this date is not nearly as available in high grade as are Carson City issues from the early 1880s that were more heavily represented in the GSA sales of the early 1970s. This high-end Premium Gem is among the finest most collectors will be able to acquire, as Superb Gems are exceedingly rare. Population: 32 in 66+, 6 finer. CAC: 51 in 66, 0 finer (6/16). NGC ID# 253M, PCGS# 7080

### 1878-CC Silver Dollar, Mark-Free MS66+ Pastel-Toned Obverse

**4205** 1878-CC MS66+ PCGS. CAC. Magnificent pastel aqua-blue, lime-green, plum-red, and gold toning alternates across the obverse. The reverse is untoned, save for hints of peach near the rims. The surfaces are boldly impressed, lustrous, and splendidly mark-free. This is the highest grade level effectively obtainable for the 1878-CC Morgan dollar, as PCGS reports only six submissions finer in MS67 (6/16). This Carson City issue experienced distribution from the Treasury in the decades leading up to the major releases of the early 1960s. But the quality of the coins was seldom strong. This piece will please even the most discerning collector.

*Ex: Central States Signature (Heritage, 4/2008), lot 2571. NGC ID# 253M, PCGS# 7080*

### 1879-CC Morgan Dollar, MS64+ First Carson City Key

**4206** 1879-CC MS64+ PCGS. Only 756,000 Morgan dollars were struck at the Carson City Mint in 1879, the second year of the series. It seems likely that many of these coins were melted in 1918 under the provisions of the Pittman Act, as the issue was not well-represented in the famous GSA sales, even though large quantities are known to have been stored in Mint and Treasury vaults in the early 20th century. Today, the 1879-CC is the second rarest Morgan dollar from the Carson City Mint. The present coin is a Plus-graded Choice example, with well-detailed design elements and lustrous, brilliant surfaces that show only minor signs of contact. Eye appeal is outstanding and finer coins are very scarce. NGC ID# 253U, PCGS# 7086

## 1879-CC Morgan Dollar, MS64+ Elusive Carson City Issue

**4207** 1879-CC MS64+ PCGS. CAC. The 1879-CC Morgan dollar is a sought-after, low-mintage key in the series and examples in MS64 condition are somewhat scarce, even in absolute terms. In the context of the Carson City series, the elusiveness of the 1879-CC is exceeded only by the famous 1889-CC. It is likely that the small mintage of 756,000 pieces was further reduced by melting in the World War I era, as relatively few examples surfaced in the 1960s Treasury releases and GSA sales.

This Plus-graded Choice example offers well-preserved surfaces, with vibrant mint luster and subtle shades of champagne-gold toning. Sharply detailed in most areas, there is some localized softness on the eagle's claws that suggest a partially clogged die. Overall eye appeal is outstanding. NGC ID# 253U, PCGS# 7086

## 1879-CC Dollar, MS64 Deep Mirror Prooflike Rarely Seen Cameo Contrast

**4208** 1879-CC MS64 Deep Mirror Prooflike PCGS. The 1879-CC Morgan dollar is a semikey within the Carson City short set, and most collectors never even consider trying to acquire a Deep Mirror Prooflike example — such coins are scarce in any grade, and well-preserved ones are rare. This Choice Deep Mirror Prooflike representative is finer than is typically seen, showing stark cameo contrast and deeply mirrored fields. The strike is sharp, and only a few trivial grazes on the cheek and in the fields preclude a full Gem designation. Wisps of pale champagne toning on the frosty design elements and around the rims attest to the originality of the surfaces. Population: 20 in 64 (1 in 64+) Deep Mirror Prooflike, 2 finer (6/16). NGC ID# 253T, PCGS# 97087

## GSA DOLLAR

### 1879-CC GSA Dollar, MS63+ VAM-4, White and Lustrous Original Certificate and Box

**4209** 1879-CC GSA MS63+ NGC. CAC. VAM-4. Among the rarest Carson City Morgan issues, the 1879-CC becomes even more desirable within a GSA holder. Unlike CC-mint dates from the 1880s, most '79-CC dollars were released into Old West commerce instead of saved in bags. This lustrous and lightly toned example exhibits smooth fields and the expected number of minor to moderate facial marks. The original box and certificate accompanies the lot. The right C in the mintmark is lightly repunched, and a die chip is lodged at the left center of the 8 in the date, but VAM-4 is nonetheless most memorable for the vertical die scratch down from Liberty's nostril. NGC ID# 253T, PCGS# 518848 Base PCGS# 407086

## MORGAN DOLLAR

### 1880-CC Morgan Dollar, MS67 Strong Registry Set Contender

**4210** 1880-CC MS67 PCGS. The 1880-CC Morgan dollar claims a low mintage of 591,000 pieces, and few examples were saved for numismatic purposes. As a result, specimens in MS67 condition are quite elusive in today's market. The coin offered here is a delightful Superb Gem, with well-detailed design elements and impeccably preserved surfaces that radiate vibrant mint luster. The slanting top arrow feather identifies the more available Reverse of 1879. A few hints of golden-tan toning add to the outstanding eye appeal. This coin should find a home in a fine collection or Registry Set. Population: .34 in 67 (1 in 67+), 0 finer (6/16). NGC ID# 2542, PCGS# 7100

## GSA DOLLAR

### 1880-CC GSA Morgan, MS66+ Remarkable Quality

**4211 1880-CC GSA MS66+ PCGS. CAC. VAM-3.** The lucky bidder from a GSA auction decades ago must have been delighted when the present Carson City dollar arrived in the mail. The thoroughly lustrous surfaces display wisps of straw-gold toning. The obverse field is pristine, and the cheek is remarkably smooth. The hair above the ear shows minor blending, customary for the die pairing. VAM-3 is a “pitted reverse” variety with die rust near the mintmark. VAMworld.com credits Walter Breen as the discoverer, in October 1964. No box or certificate is included. Population: 8 in 66 (3 in 66+), 0 finer (7/16). NGC ID# 2542, PCGS# 518851 Base PCGS# 407100

## MORGAN DOLLARS

### 1881-O Silver Dollar, MS66 Important Condition Rarity

**4212 1881-O MS66 PCGS.** Other than 8,350 eagles, minting silver dollars was the sole task of the New Orleans Mint in 1881. More than 5.7 million pieces were struck and despite substantial Treasury releases, remarkably few high-grade coins survive. The 1881-O becomes an important rarity in MS66 condition. Fewer than 50 examples are so-graded by both services combined, and neither PCGS nor NGC report any coins in higher grades for this conditionally challenged O-Mint issue.

A crescent of multicolor toning graces the lower-right obverse border on this Premium Gem dollar, while the remainder of each side remains mostly brilliant. Luster is satiny yet vibrant, and there are no major abrasions. The 1881-O is not a notorious “strike rarity” as far as New Orleans dollars go, but few coins combine outstanding surface quality with eye appeal and a sharp strike. In that regard, this example stands above nearly all others. Population: 34 in 66 (3 in 66+), 0 finer (7/16). NGC ID# 2548, PCGS# 7128

### 1882 Morgan Dollar, MS67 Toned Condition Rarity

**4213 1882 MS67 PCGS.** As with previous Morgan dollar issues from the Philadelphia Mint, the 1882 is a rarity in Superb Gem condition. Among pre-1883 issues, only San Francisco and a couple of Carson City dates are usually available in this high level of preservation. The 1882 Philadelphia issue is rare in this grade and unknown finer. Previously, we have only offered an MS67 example on four different occasions, and all were white, brilliant coins. The present representative displays beautiful multicolor toning. Sea-green, crimson, and sun-gold cling to the margins, while lavender-gray and soft amber hues appear over the interiors. The strike is sharp, and the preservation of the surfaces is outstanding. Population: 10 in 67 (1 in 67+), 0 finer (6/16). NGC ID# 254A, PCGS# 7132

### 1883-CC Morgan Dollar, MS67+ High-Quality Branch Mint Type Coin

**4214 1883-CC MS67+ PCGS. CAC.** The 1883-CC Morgan dollar claims a smallish mintage of 1.2 million pieces, but most of the modest production total was never released into circulation. The great majority of the coins were stored in Mint or Treasury vaults and gradually released into mostly numismatic hands in the 20th century. Although some bags were paid out earlier, the 1883-CC was well-represented in the famous GSA sales. A relatively available issue in high grade, the 1883-CC is a favorite choice of branch mint type collectors.

This magnificent Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and vibrant mint luster radiates from both sides. The impeccably preserved surfaces show vivid shades of greenish-gold and cerulean-blue toning on the obverse, while the reverse displays just a trace of pale gold. Eye appeal is terrific. Population: 12 in 67+, 5 finer (6/16). NGC ID# 254J, PCGS# 7144

## 1884-S Dollar, Lightly Toned MS61 Nice Semireflective Appeal

**4215 1884-S MS61 PCGS.** A lustrous Uncirculated example of this better San Francisco issue, showing light golden toning over each side and tinges of blue around the obverse periphery. Slight strike weakness occurs over the eagle's breast and the hair above Liberty's ear, as normal, although only a few light lines and tiny marks dot the smooth, semireflective surfaces.

The scarcity of the issue is well-known, and it remains a significant rarity in high grades. The mintage of 3.2 million pieces was only moderately low, yet what happened to all of the 1884-S dollars remains a mystery. Theories abound, ranging from hidden hoards to mass melting under the Pittman Act, to much of the mintage being shipped to India and converted to rupees. The present coin is a strong survivor for the grade with substantial eye appeal. NGC ID# 254P, PCGS# 7156

## 1884-S Dollar, MS62 Scarcely Seen So Well-Preserved

**4216 1884-S MS62 PCGS.** The 1884-S is one of the great condition rarities in the Morgan dollar series. While the original mintage was more than 3 million coins, nearly all entered circulation, with just a handful preserved in high grades. There were few collectors in San Francisco at the time, and Eastern collectors were generally uninterested in ordering coins from the branch Mints before Augustus Heaton wrote his treatise on mintmarks in 1893. A few bags remained in storage as late as the 1950s, but there was no quantity of 1884-S dollars paid out during the Treasury release of the early 1960s.

This softly frosted Mint State dollar is one of the few that have survived. It is fully brilliant with little toning on either side. The strike is typical with slight central indistinctness. Surface marks are minimal, confined primarily to the reflective fields.

*Ex: Karschner Collection of Morgan Dollars / FUN Signature (Heritage, 1/2011), lot 5656.*

**From The Bowler Collection of Morgan Dollars.** NGC ID# 254P, PCGS# 7156

### 1885-CC Dollar, MS67 Virtually Pristine

### 1889-CC Dollar, MS63+ Most Desirable Carson City Issue Exceptional Aesthetic Quality

**4217 1885-CC MS67 PCGS. CAC.** Although the 1885-CC had the lowest mintage of any Morgan dollar at that Mint, it is not the rarest issue. A significant portion of the 228,000-coin production remained in Mint and Treasury vaults for nearly 100 years until the GSA sales of the 1970s. More than 148,000 of those coins, representing two-thirds of the original production, were distributed to the public at that time. This example is far finer than most others, as the PCGS population data reveals. Both sides are boldly struck and brilliant with frosty mint luster and a total absence of toning. Virtually pristine. Population: 77 in 67 (3 in 67+), 1 finer (4/16).

*Ex: Long Beach Signature (Heritage, 6/2014), lot 4661.*

**From The Bowler Collection of Morgan Dollars.** NGC ID# 254S, PCGS# 7160

**4218 1889-CC MS63+ PCGS. CAC.** The 1889-CC Morgan dollar is far and away the rarest Carson City issue in the series — much rarer, even, than its low mintage of 350,000 pieces would suggest. (By comparison, the 1879-CC, the second-rarest Carson City, had a mintage of 756,000 pieces.) Rusty Goe asserts in *The Mint on Carson Street* that only 4,000-7,500 pieces survive in Uncirculated condition today, the result of a melting of a large portion of the production. This MS63+ coin, with the added CAC green label, enjoys incredible appeal and top-notch aesthetic quality. Lavish cartwheel luster rolls over brilliant surfaces that show a touch of gold at the extreme rims. Abrasions are extremely minor and well-separated from the focal points, save for a small tick on Liberty's nose. The strike is sharp throughout, but the thick, rolling luster is this coin's strong suit.

*Ex: Long Beach Signature (Heritage, 6/2011), lot 4017.*

**From The Bowler Collection of Morgan Dollars.** NGC ID# 2559, PCGS# 7190

## 1889-CC Morgan Dollar, MS64 Prooflike Incredible Rarity, In a Green Label Holder

**4219 1889-CC MS64 Prooflike PCGS.** The 1889-CC Morgan dollar was struck in October, November, and December 1889, to the tune of 350,000 pieces. This was the first silver dollar coinage at the Carson City Mint since 1885, and a significant number of pieces were distributed into circulation. Worn coins are common today. However, very few Mint State pieces have survived.

The bulk of the Uncirculated Carson City dollars that survived the Pittman Act melts of 1918, were distributed through the GSA sales of the early 1970s. The government inventory at the start of the sales was about 2.9 million CC dollars of various production years. Almost all of these coins were dated from 1880 to 1885. Later Carson City issues were barely represented by comparison or almost nonexistent. The 1889-CC falls into the last group, with only a single coin reported from the entire 2.9 million-coin inventory. This issue's rarity in the finer Mint State grades ranks it as one of the biggest keys in the series, and it is the rarest of the Carson City Morgans.

Prooflike pieces are occasionally seen, but abrasions are a problem. Choice Prooflike examples are exceedingly rare, and finer pieces are almost unknown. At PCGS, the present piece is as fine as has been seen in Prooflike, and it being housed in a green label holder even furthers its appeal. The glassy surfaces possess deep mirroring and are untuned save for a few irregular splashes of peripheral color on the obverse. A touch of light chatter is seen here and there in the fragile fields, while a few shallow facial disturbances rule out a higher numeric classification. This is one of the finer examples of this well-known Morgan dollar rarity that we have offered in quite some time. Population: 8 in 64 Prooflike, 0 finer (6/16).

*Ex: Long Beach Signature (Heritage, 6/2004), lot 6139. NGC ID# 2559, PCGS# 7191*

### 1891-O Morgan Dollar, MS65+ Tied for the Finest at PCGS

**4220 1891-O MS65+ PCGS.** The New Orleans Mint Morgan dollars struck in the 1890s typically featured poor strikes and modest luster, but this Gem representative is an outstanding exception to that rule. While there is some slight central weakness, most notably among the hair strands directly over the ear, the overall detail is much sharper than usually encountered. Both sides are fully brilliant with frosty silver luster and untuned surfaces. Despite the presence of a singular mark on Liberty's cheek, the surfaces are virtually flawless and the eye appeal is first-rate. This is one of only five examples to receive the Plus designation, and PCGS has never certified a finer submission (7/16). NGC ID# 255J, PCGS# 7208

### 1892-S Silver Dollar, AU58 Rarely Offered in Higher Grades

**4221 1892-S AU58 PCGS.** After the 1893-S, the 1892-S is the rarest date in the Morgan dollar series in Uncirculated condition. The present near-Mint example is itself scarce, although it presents a much more affordable option for the casual collector of this series. Moderate amounts of luster remain in the fields, and each side is mostly untuned. The strike is bold, and almost no perceptible wear is seen. Light chatter on Liberty's cheek is the most obvious hindrance to a Mint State designation, although even this is minimal. PCGS has seen 64 Mint State representatives finer (6/16), although a few resubmissions are likely represented in that data. This piece will satisfy most any collector and will fit in well with an otherwise Uncirculated silver dollar collection. NGC ID# 255P, PCGS# 7218

## 1892-S Morgan Dollar, MS62 California Rarity in Uncirculated Condition

**4222 1892-S MS62 PCGS. CAC.** The 1892-S has been undeservedly overlooked for a couple of reasons. There is little doubt that some of the limelight has dimmed in the reflected glory of the 1893-S. While the 1893-S had a mintage of exactly 100,000 coins, the 1892-S had an original mintage of 1.2 million pieces — 12 times as many as its S-mint sibling. Moreover, while the elusive 1893-S is the object of fervent demand in any grade from Poor through MS67, the 1892-S is sufficiently available in lower grades that examples can still be found in coin dealers' bullion purchases of bulk circulated Morgan dollars.

When the vast Treasury releases began in the early 1960s, no Mint State examples were forthcoming. The few pieces on the market that were truly Mint State saw ever-higher price levels, and more than a few AU coins were sold at inflated prices, creating a market disparity in the range of AU50 to MS60 and inflating demand for high-grade circulated examples.

In MS62 the 1892-S Morgan dollar is remarkably elusive, as might be expected from the foregoing. PCGS has certified 26 coins in this grade, and there are 29 pieces certified finer at that service (4/16). Duplications and resubmissions likely represent a considerable portion of those population totals.

Radiant frost emanates from each side of this lovely key-date Morgan dollar. Light steel-gray patina fails to subdue the effulgent luster. A series of reeding marks through Liberty's hair below the Y in LIBERTY, with some smaller signs of contact on the cheek, account for the grade. The eye appeal is tremendous.

*Ex: ANA Signature (Heritage, 7-8/2008), lot 1786.*

**From The Bowler Collection of Morgan Dollars.** NGC ID# 255P, PCGS# 7218

### 1893-CC Dollar, Untoned MS64 Dazzling Cartwheel Luster

**4223 1893-CC MS64 PCGS.** The 1893-CC Morgan dollar was produced in the final year of the fabled Carson City Mint and has always been a collector favorite, according to Bowers' *Silver Dollars and Trade Dollars of the United States, A Complete Encyclopedia* (1993). Bowers also notes: "In terms of availability, it is the third rarest after 1889-CC (rarest) and 1879-CC" (among CC-mint issues).

Dazzling luster is the hallmark of this remarkably fine 1893-CC dollar, with a splendid cartwheel sheen that rolls over glistening fields. The frosty surfaces are entirely brilliant and untoned, and there are only a handful of faint, trivial marks on each side that preclude an even finer grade assessment. PCGS reports 14 finer submissions (4/16).

Ex: Dallas Signature (Heritage, 10/2008), lot 1391.

**From The Bowler Collection of Morgan Dollars.** NGC ID# 255S, PCGS# 7222

### 1893-S Morgan Dollar, AU50 Low-Mintage Series-Key

**4224 1893-S AU50 PCGS.** The Panic of 1893 had far reaching economic effects, including the repeal of the Sherman Silver Purchase Act, which mandated the large production of silver dollars that were not needed in the national economy. Mintages of silver coins dropped precipitously after the repeal, and no production was more dramatically reduced than the Morgan dollar mintage at the San Francisco Mint. With its record-low mintage of 100,000 pieces, the 1893-S is the most sought-after issue of the Morgan dollar series.

This attractive AU specimen exhibits just a touch of wear on the high points of the design elements, like the hair above the ear and the eagle's breast. The surfaces show no large or distracting abrasions and retain traces of original mint luster. Mostly brilliant, this piece displays subtle hints of jade-gold and lavender toning. NGC ID# 255U, PCGS# 7226

## 1893-S Dollar, AU53 Classic San Francisco Key-Date

**4225 1893-S AU53 PCGS.** The 1893-S is the classic key-date in the Morgan dollar series thanks to its record-low mintage of 100,000 coins. The average grade for an 1893-S is a fraction higher than VF20, as most coins were released into Western commercial channels. About Uncirculated representatives are very scarce. This example exhibits a touch of light rub over the high points and presents lovely silver-gray surfaces. The fields retain nearly full luster. While this San Francisco issue is virtually unknown with fully prooflike surfaces (PCGS reports a single example as of (4/16)), moderate semiprooflikeness is visible in the protected areas, suggesting this piece may very well have been prooflike when it was struck. Regardless, it is a highly appealing capstone dollar that will surely fit well into any carefully assembled set.

*Ex: Central States Signature (Heritage, 5/2007), lot 2181.*

**From The Bowler Collection of Morgan Dollars.** NGC ID# 255U, PCGS# 7226

## 1893-S Silver Dollar, AU53 Series Key in All Grades

**4226 1893-S AU53 PCGS.** Show a complete Morgan dollar date and mintmark set to a knowledgeable dealer or collector, and one the first things they will do is look to see how nice the 1893-S is. The quality of the key-date coins is often viewed as a gauge by which the significance of the entire collection is judged. In most Morgan dollar sets, the 1893-S will grade in the VF range or lower. The issue is seldom seen in XF or AU, and Uncirculated coins are rare and far out of reach for the typical collector.

This bright AU representative will fit in well with an otherwise Mint State Morgan dollar collection or it will be a highlight addition to a circulated collection. Hints of luster remain in the fields, and the surfaces are smooth and problem-free. Traces of champagne toning appear over each side, and the design elements are well-detailed. NGC ID# 255U, PCGS# 7226

### 1894-O Morgan Dollar, MS64+ Challenging Branch Mint Issue in High Grade

**4227 1894-O MS64+ PCGS. CAC.** The 1894-O Morgan dollar claims a smallish mintage of 1.7 million pieces and the issue was not well-produced, with weak strikes and excessive bagmarks on most examples seen. Q. David Bowers notes, "Mint State examples of the 1894-O dollar are often wretched in appearance." Fortunately, this Plus-graded Choice specimen is an exception to the rule. As usual, the design elements show a touch of softness on the hair above the ear and on the eagle's breast, but the strike is sharper than average in other areas. The well-preserved brilliant surfaces radiate vibrant mint luster throughout and overall eye appeal is outstanding. PCGS has graded 12 numerically finer examples (7/16). NGC ID# 255W, PCGS# 7230

### 1895-O Morgan Dollar, MS61 New Orleans Semikey

**4228 1895-O MS61 PCGS.** Ex: Michigan Collection. The 1895-O Morgan dollar is readily available in circulated grades, including Extremely Fine and About Uncirculated. Mint State pieces are much more difficult to locate, and when found are apt to be MS63 and below. Moreover, regardless of grade, "... most are casually if not lightly struck and have dull, insipid luster" (David Bowers, *A Guide Book of Morgan Silver Dollars*).

The present MS61 offering is an exceptional piece in the above regards. Its strike is well above average, evidenced by the near-full detail in the hair above Liberty's ear. The eagle's breast feathers, though more incomplete than the obverse center, also show good detail. The luster is nearly complete on both sides, and though not dazzling, is certainly not "insipid." Finally, while we notice a few small marks on its essentially untuned surfaces, the coin is far from being "beaten up" as is the case for most MS60 and MS61 pieces. All in all, a nice piece for the designated grade.

Ex: FUN Signature (Heritage, 1/2010), lot 2628.

**From The Bowler Collection of Morgan Dollars.** NGC ID# 255Y, PCGS# 7236

**1899 Morgan Dollar, MS62  
Popular VAM-31, Micro O**

**4229** 1899 Micro O, VAM-31, Top 100, MS62 PCGS. Ex: Michigan Collection. A Top 100 Variety. A curious, but extremely popular variety, with the mintmark punched approximately the size seen on a dime. The VAM-31 is a very elusive, distinctive variety that collectors prize in all grades and conditions. This attractive MS62 specimen exhibits well-detailed design elements, ample satiny mint luster, and lightly toned gold and lavender surfaces, with a few minor abrasions on the obverse that influence the assigned grade. Population: 5 in 62 (1 in 62+), 3 finer (6/16).

Ex: *Palm Beach Signature* (Heritage, 12/2004), lot 10150..

**From The Bowler Collection of Morgan Dollars.** NGC ID# 256C, PCGS# 133949 Base PCGS# 87260

**1900-O/CC Dollar, MS66+  
VAM-11, Top 100**

**4230** 1900-O/CC VAM-11 MS66+ PCGS. CAC. A Top 100 Variety. Grover Cleveland, a Democrat, ended coinage at Carson City in 1885. He was succeeded by Republican Benjamin Harrison in 1889, who resumed coinage at the facility. Cleveland returned to the White House in 1893, and again stopped production at Carson City. No doubt, that city hoped that McKinley, a Republican, would allow the presses to again stamp silver and gold coins in 1897, but that never happened. Instead, leftover Carson City Morgan dollar dies were shipped to Philadelphia. There, the reverse dies were overmintmarked, and sent to New Orleans in 1900. This lustrous and splendidly preserved silver dollar has light golden-brown peripheral patina. The centers show only minor incompleteness of strike. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

### 1901 Morgan Dollar, MS63 Challenging Issue in High Grade

**4231 1901 MS63 PCGS.** Ex: Michigan Collection. The 1901 Morgan dollar claims a substantial mintage of nearly 7 million pieces, but the issue circulated widely and few examples were saved by collectors. Q. David Bowers considers the 1901 the second rarest Morgan dollar in Gem Mint State condition. The present coin is an attractive Select specimen, and population data supports Bowers' conclusion about high grade rarity, as PCGS has certified only 37 coins in higher numeric grades (6/16).

The coin offered here is a well struck specimen, with just a touch of softness on the eagle's breast. The mostly brilliant surfaces show light hints of gold toning and bright frosty mint luster. A few minor, grade consistent abrasions are scattered over the surfaces.

Ex: Long Beach Signature (Heritage, 9/2010), lot 4720.

**From The Bowler Collection of Morgan Dollars.** NGC ID# 256J, PCGS# 7272

### 1901 Morgan Dollar, AU58 VAM-3, Shifted Eagle

**4232 1901 Doubled Die Reverse, VAM-3, AU58 PCGS.** Ex: Michigan Collection. A Top 100 Variety. The VAM-3 is unlisted above MS60 in the *Guide Book*. Only a few Mint State pieces exist, the highest an MS62+ PCGS example that sold for over \$40,000 in our August 2013 Signature Sale. This near-Mint example presents clearly doubled tailfeathers diagnostic of this rare variety. The surfaces are white and brightly lustrous on the obverse, with a more subdued, frosty reverse. All 1901 Morgan dollars are desirable above AU. Here is an opportunity to acquire the ultra-rare "Shifted Eagle" in a more affordable grade. Population: 14 in 58, 3 finer (6/16).

**From The Bowler Collection of Morgan Dollars.** NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

## 1903-S Dollar, Brilliant Gem 20th Century Semikey

**4233 1903-S MS65 PCGS. CAC.** The certification totals confirm the extent to which the 1903-S circulated in the West. Coins were paid out slowly over time from the San Francisco Mint, and the typical survivor grades VF35. The issue has long been considered a semikey date in the series, and most Uncirculated coins derive from several mint bags that were discovered in November 1953, per Bowers' *Silver Dollar Encyclopedia* (1993). This 1903-S Morgan dollar is a sharply struck and highly lustrous Gem that boasts fully brilliant and untuned surfaces. The resulting eye appeal is spectacular, accounting in part for the CAC endorsement.

*Ex: Carson Silver Collection / Los Angeles Signature (Heritage, 8/2009), lot 2042.*

**From The Bowler Collection of Morgan Dollars.** NGC ID# 256T, PCGS# 7288

## 1921-S Morgan Dollar, MS66+ High-Mintage, Low-Availability in High Grades

**4234 1921-S MS66+ PCGS. CAC.** This high-mintage S-mint dollar represents the final issue in the long-lived Morgan dollar series. In lower Uncirculated grades there are plenty of 1921-S dollars to go around, but high-grade examples are remarkably scarce, especially relative to how many were produced. Fewer than a hundred MS66 coins have been certified by each of the major services. This is a thickly lustrous example that still retains much original brilliance. Light accents of color are seen around the margins. The hair above Liberty's ear is complete, but that would be expected of most 1921s. The design was changed from 1904, and the area of striking weakness is seen on the lower wreath on the reverse. Population: 84 in 66 (5 in 66+), 0 finer. CAC: 13 in 66, 0 finer (7/16). NGC ID# 256Z, PCGS# 7300

## PROOF MORGAN DOLLARS

### 1878 Morgan Dollar, 8 Tailfeathers, PR66 Only One Finer Coin at PCGS

**4235 1878 8TF PR66 PCGS.** From a modest estimated mintage of just 500 pieces, this 1878 proof Morgan dollar represents the first year of the denomination and the only date to feature the 8 Tailfeathers reverse. This spectacular Premium Gem proof is crisply struck on all design elements and is patinated across both sides in lavish shades of autumn-gold, ice-blue, and gunmetal-gray. Excellent preservation has kept the piece from acquiring any unwanted hairlines or bothersome contact marks. We expect intense competition from series specialists and first-year type collectors when this lot is called. Population: 9 in 66, 1 finer (7/16). NGC ID# 2572, PCGS# 7311

### 1878 8TF Morgan, PR65 Cameo Rare With Field-Device Contrast

**4236 1878 8TF PR65 Cameo PCGS.** Neither the eight tailfeathers nor the seven tailfeathers varieties of the proof 1878 Morgan dollar are common in high grade, although for date representation, the eight tailfeathers variant will be more easily acquired. Nonetheless, the present Gem Cameo is distinctly rare with its considerable field-device contrast. PCGS has seen only 26 Cameos across all grades and no Deep Cameos at all. This piece displays a sharp strike and liquidlike mirroring in the fields. Sea-green and orange-gold peripheral toning surrounds the light champagne interiors. A few faint hairlines, seen at certain angles with a loupe, are all that limit the grade. Population: 2 in 65 Cameo, 5 finer (6/16). NGC ID# 2572, PCGS# 87311

## 1880 Morgan Dollar, PR67 Cameo Nicely Toned and Well-Contrasted

**4237 1880 PR67 Cameo PCGS.** This splendid Superb Gem Cameo proof is well-mirrored throughout both sides. Portions of each side show a light wash of copper-gold patina, but the majority is covered in pastel orange, brown, aqua, and violet hues that nonetheless allow the sprightly luster to percolate upward. One thin contact mark requires a good loupe to see, running diagonally downward through the 0 in the date. The plentiful mintage of proofs was 1,355, but few survive either in so fine a grade, with so much contrast, or with such eye appeal. Population: 10 in 67 Cameo, 8 finer (6/16). NGC ID# 27Z4, PCGS# 87315

## 1884 Morgan Dollar, PR66 Vivid Multicolor Toning

**4238 1884 PR66 PCGS. CAC.** The present coin is a beautiful multicolored Premium Gem proof, from a mintage of 875 pieces. The obverse shows some near-untoned silver-white at the center ranging through orange, pink, and medium sky-blue at the peripheries, while the reverse shows a similar palette save that there are no untuned areas. Despite the moderately deep color, much reflectivity radiates from beneath the toning. A sharp strike (not full, but close) and lack of mentionable marks make this an attractive potential acquisition for the advanced collector. Population: 6 in 66, 4 finer. CAC: 3 in 66, 0 finer (6/16). NGC ID# 27ZB, PCGS# 7319

**1887 Morgan, PR66 Cameo  
Rare High-End Cameo  
Beautiful Peripheral Toning**

**1892 Morgan Dollar, PR67+ Cameo  
Conditionally Rare**

**4239 1887 PR66 Cameo PCGS. CAC.** PCGS has not certified a single Deep Cameo example of the 1887 proof Morgan, and Cameos are seldom seen in any grade. Most of the listed submissions are clustered in the PR63 to PR65 range, with Premium Gems and Superb Gems being in the rare minority. Our Permanent Auction Archives show 34 previous appearances of a Cameo proof 1887, although only seven were of PCGS-graded coins. Of those seven, not one was numerically finer than PR65. This Premium Gem Cameo is the finest PCGS coin we have ever offered. The strike is full, and appreciable contrast is seen on each side. The mirrors are deeply reflective. Vivid amber-gold, russet, violet, and navy-blue peripheral toning frames the unmarked devices and fields. Population: 5 in 66 Cameo, 2 finer. CAC: 2 in 66, 1 finer (6/16). NGC ID# 27ZG, PCGS# 87322

**4240 1892 PR67+ Cameo PCGS. CAC.** With Deep Cameos being prohibitively rare, high-end Cameo 1892 proof Morgan dollars are typically the finest available to collectors. This is a rare CAC-endorsed, high-end Superb Gem Cameo, showing original ocean-blue and lavender toning around the borders with lighter gold and champagne hues in the centers. The strike is full, and the fields are deeply reflective. Despite the lovely toning, each side shows appreciable cameo contrast. Higher-graded Cameos are extremely rare, and we doubt more than a few actually surpass this coin with regards to eye appeal. Population: 2 in 67 (1 in 67+) Cameo, 4 finer. CAC: 3 in 67, 1 finer (6/16). NGC ID# 27ZM, PCGS# 87327

## 1894 Morgan Dollar, PR65+ Deep Cameo Stark Field-Device Contrast

**4241 1894 PR65+ Deep Cameo PCGS. CAC.** The 1894 Morgan dollar is always a popular date due to the low mintage of business strikes, a meager 110,000 pieces. Gem examples of the 1894 business strikes are so expensive that many collectors may find the present Deep Cameo Gem proof a more than acceptable alternative. This is a coin that certainly needs no apology, with marvelous, rich contrast between profoundly mirrored fields and thickly frosted devices. The surfaces are untoned, the strike is full throughout, and only a couple of minor contact marks on Liberty's lower neck appear to preclude an even finer grade. This is the only PR65+ Deep Cameo at PCGS, with four coins graded finer (6/16).

*Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3918. NGC ID# 2577, PCGS# 97329*

## 1898 Morgan Dollar, PR66 Deep Cameo Exceptionally Well-Produced Issue

**4242 1898 PR66 Deep Cameo PCGS.** A limited mintage of 735 proof Morgan dollars was accomplished in 1898, but quality control was excellent and Mike Fuljenz notes, "This date was probably the best made in the entire series." The coins were produced at intervals throughout the year, with the largest number struck in December, probably to serve as Christmas gifts.

The present coin is a delightful Premium Gem, with razor-sharp definition on the frosty design elements and deeply mirrored fields with dramatic cameo contrast. The impeccably preserved surfaces are blanketed in attractive shades of greenish-gold toning, with a single amber alloy spot on Liberty's cap. Population: 10 in 66 Deep Cameo, 18 finer (6/16). NGC ID# 27ZW, PCGS# 97333

### 1898 Morgan Dollar, PR67 Deep Cameo Tremendous Cameo Contrast

**4243 1898 PR67 Deep Cameo PCGS.** The Philadelphia Mint struck a smallish mintage of 735 proof Morgan dollars in 1898, and most numismatists consider this year the high-water mark in classic proof coin production. Proofs of this date are uniformly sharply struck, with excellent cameo contrast and outstanding eye appeal. The present coin is a worthy example of this quality, as the design elements are fully brought up and have a rich coat of mint frost that makes them appear to float on the deeply reflective liquid fields. The surfaces are impeccably preserved, with subtle shades of pale gold toning that complete the terrific visual presentation. Population: 17 in 67 (2 in 67+) Deep Cameo, 1 finer (7/16). NGC ID# 27ZW, PCGS# 97333

### 1899 Morgan Dollar, PR67 Cameo Richly Frosted and Sharply Detailed

**4244 1899 PR67 Cameo PCGS. CAC.** If the proof Morgan dollars of the mid-1890s are the apex of production quality, then the best examples of a date such as the 1899 are not far behind. While the contrast on this Superb Gem specimen is not "black-and-white," owing to gold-gray patina at the obverse margins and well into the fields on the reverse, the icy frost across boldly defined devices is marvelous. Carefully preserved surfaces seem close to perfect to the unaided eye, and inspection under magnification reveals just how close this is to the truth. A small hazy spot is noted under Liberty's chin. Population: 5 in 67 (1 in 67+) Cameo, 3 finer (6/16). NGC ID# 27ZX, PCGS# 87334

## 1899 Morgan Dollar, PR68 Cameo Registry Set Essential

**4245 1899 PR68 Cameo PCGS.** A nominal mintage of 846 proof Morgan dollars was accomplished in 1899, with deliveries distributed throughout the year. Most of the coins were struck in either the first or last quarter, for inclusion in proof sets or use as Christmas gifts. The 1899 proofs were well-produced and suffer only in comparison with the 1898 issue, which was probably the best of the series.

This magnificent PR68 issue exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices to create a dramatic cameo effect. The virtually pristine surfaces show only one possible pedigree marker, a minute planchet flaw between the O in ONE and the wreath on the reverse. Attractive, low-intensity shades of pale gold toning enliven the surfaces of both sides. Eye appeal is incredible. Population: 3 in 68 (1 in 68+) Cameo, 0 finer (7/16). NGC ID# 27ZX, PCGS# 87334

## 1921 Zerbe Dollar, Attractive Gem Special Strike Scarce VAM-1AG Variety

**4246 1921 Zerbe PR65 PCGS. CAC. VAM-1AG.** The PCGS terminology "Zerbe Special Strike" — now used to describe the controversial Zerbe proofs — is a clever bit of fence-riding that may indeed provide some room for compromise among feuding factions of the numismatic community. Both the die pair and the in-hand appearance of this example suggest some sort of special strike. Liberty's hair is never sharper, and the surfaces (especially the obverse) display definitive prooflike character.

Attractive autumn-gold shades with dusky-brown accents convey unquestioned originality of the surfaces. Diagnostic die polish lines run through the obverse legend in the proper configuration for a Zerbe strike. Very scarce in Gem condition, this example carries the important CAC endorsement as well to confirm technical quality and eye appeal. Population: 13 in 65 (1 in 65+), 12 finer. CAC: 2 in 65, 4 finer (7/16). NGC ID# 257A, PCGS# 7341

## PEACE DOLLARS

### 1928 Peace Dollar, Sharp MS66 Original Appeal, Tied for Finest Certified

**4247 1928 MS66 PCGS.** Not only does the 1928 issue have the lowest mintage of the Peace dollar series, it trails only the three 1927 issues (1927 P, D, and S) and the 1928-S in the number of certified examples in Premium Gem condition or finer as reported by PCGS. Collectors of high-grade Peace dollars need to look no further than the 1927 and 1928 issues to identify the clear condition rarities of the series.

A faint presence of powder-gray toning is visible on this example — mostly at the margins, where pale olive-gold highlights attest to the coin's original surfaces. This is a remarkably well-struck and unabraded coin, with soft silver luster shining through to provide nice eye appeal. Only a few minor marks visit the surfaces, visible with a glass but mostly unnoticed in-hand. PCGS has graded 17 pieces in MS66 and one MS66+ (7/16). NGC ID# 257V, PCGS# 7373

### 1928 Peace Dollar, MS66 High-End Toned Example

**4248 1928 MS66 NGC.** The 1928 had a mintage of only 360,649 coins, far the lowest production of any issue in the Peace dollar series. Although other issues are conditionally rarer in top grades, the 1928 is the key issue across all grades. The 1921, 1928, and 1934-S are undoubtedly the three most recognized issues of all Peace dollars. This Premium Gem is tied for the finest certified by either NGC or PCGS. The surfaces are pristine with original ivory surfaces, satin luster, and toning splashes that range from light gold to rich golden-brown. The strike is crisp and the eye appeal is exceptional. Census: 6 in 66, 0 finer (7/16). NGC ID# 257V, PCGS# 7373

## EARLY PROOF SETS

## 1862 Proof Set, PR64-65, Most Richly Toned All Certified by NGC and Endorsed by CAC

**4249 1862 Seven-Piece Proof Set NGC. CAC.** This mostly Gem set is all certified by NGC and each coin is CAC endorsed. Included are:

**Cent PR65. CAC.** The fields are brightly reflective and the overall surfaces demonstrate why the 1862 is such a popular date for type coin collectors who need a copper-nickel cent. Each side is yellow-gold with light overtones of rose. A few tiny flyspecks are seen on the reverse and there is the faintest trace of a fingerprint on the left part of the obverse.

**Three Cent Silver PR64. CAC.** Both sides are covered with deep charcoal and blue with traces of rose. The toning is of sufficient depth that much of the flash from the mirrored fields has been subdued unless held at a certain angle beneath a light. Fully struck throughout, there are no mentionable contact marks on either side.

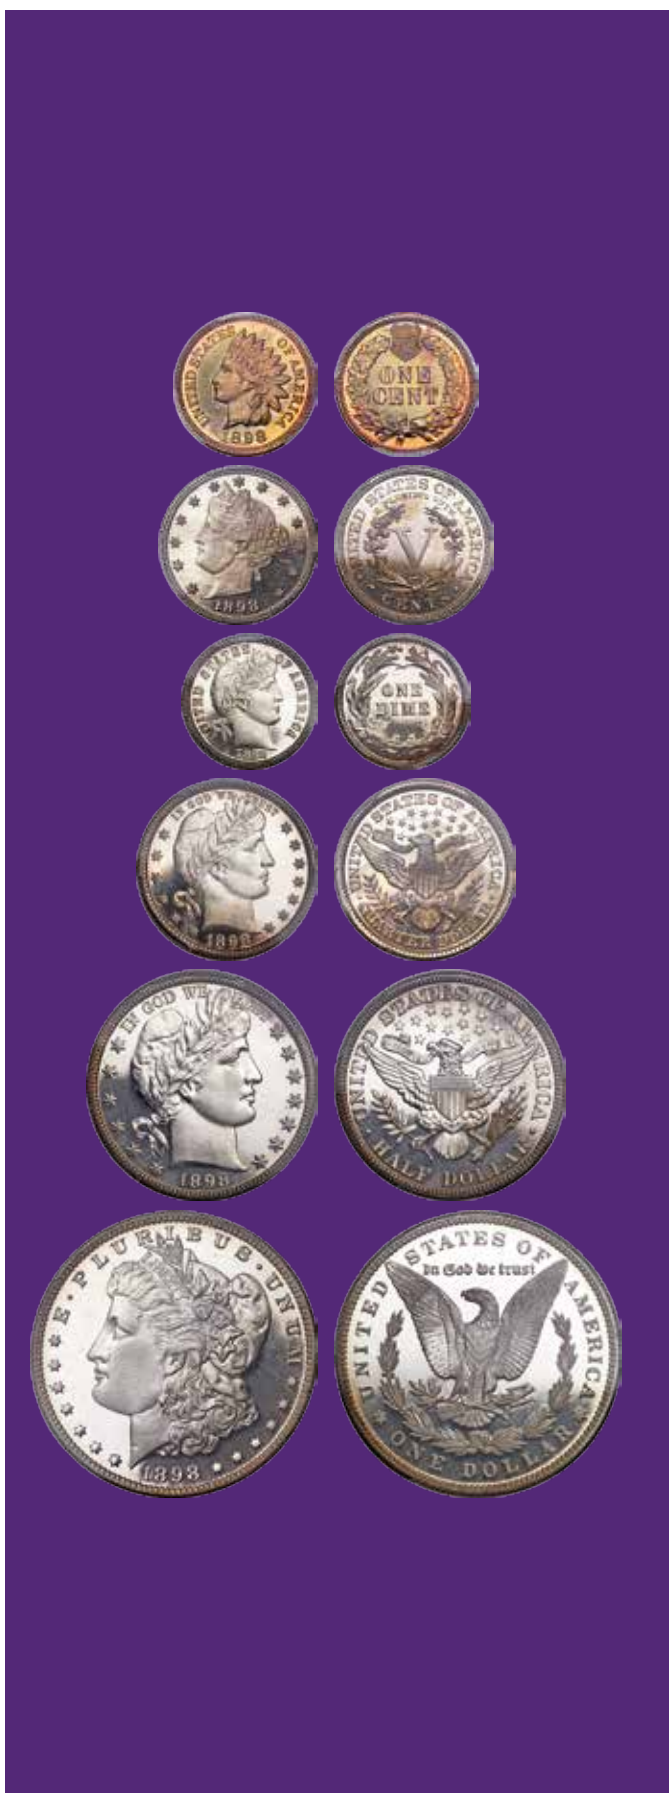

**Half Dime PR65. CAC.** Another richly toned proof striking, but this piece has mirrored fields that flash forcefully through the blue, red, and citrine toning that is splashed across each side. Fully struck in all areas.

**Dime PR64. CAC.** Deep reddish patina characterizes the surfaces of this near-Gem, with occasional splashes of pale blue intermixed, especially around the obverse margins. Fully brought up throughout.

**Quarter PR65. CAC.** The bright reflectivity in the fields is fully apparent through the variegated light blue and rose-golden toning that is seen in differing degrees on each side. A couple of tiny horizontal marks on the face of Liberty are all that prevent an even higher grade of this fully struck Gem.

**Half Dollar PR65. CAC.** This is a lovely Gem proof half that exhibits blue in the centers of each side, surrounded by bright rose at the margins. The only mentionable mark is Mint-made, a small planchet flake in the upper left obverse field. The devices show pinpoint striking definition.

**Dollar PR65. CAC.** The fields show moderate reflectivity through the multiple layers of green, blue, gray, and rose toning. The devices are sharply defined, and there are no obvious post-striking defects. (Total: 7 coins)

## 1898 Six-Piece Proof Set, PR63-PR67 All PCGS-Certified

**4250 1898 Six-Piece Proof Set, PCGS-Certified.** This is a lovely, well-matched proof set. Included are:

**Cent PR65 Red and Brown.** Much original orange-red color remains, especially around the margins. The central portions of each side are muted olive with some red showing beneath. Pinpoint strike definition.

**Nickel PR64 Cameo.** The contrast is remarkable and immediately apparent on this piece. While the obverse is brilliant, the reverse has a thin layer of milky-reddish patina in the center. Fully struck.

**Dime PR65 Cameo.** Like the nickel above, the contrast is immediate and in this case startling. The centers on each side are brilliant with a thin ring of russet patina at the margins. Fully defined in all areas. This is a lovely coin that looks finer than the stated grade.

**Quarter PR66+ Deep Cameo.** As proof type collectors are well aware, the 1898 quarters and halves are among the finest brilliant proofs produced in the Mint (perhaps second only to the 1896). This quarter is deeply mirrored with snow-white, frosted devices. Generally brilliant, the obverse is encircled with light russet patina, while the reverse has muted reddish-gray toning in the center.

**Half Dollar PR63.** Most of the other coins in this set are Cameo. This one displays moderate contrast, but it is unacknowledged on the insert. Lightly hairlined, each side is mostly brilliant with a faint accent of peripheral golden-brown toning.

**Dollar PR67 Deep Cameo.** Astonishing white-on-black contrast is seen on each side. Like several of the other coins in this set, the faces of each side are brilliant except for a thin ring of golden-brown peripheral color. As one might expect from the grade, the surfaces are nearly perfect. (Total: 6 coins)

## GOLD DOLLARS

### 1854-S Type One Gold Dollar, MS64 First Year of the New California Mint

**4251** 1854-S MS64 PCGS. CAC. Struck in the first year the San Francisco mint opened, Garrett-Guth theorize gold dollars were produced as “a relief to handle when compared to a pinch of gold dust.” It must have been only a moderate relief as a mere 14,632 gold dollars were struck this year. The primary focus of the new mint was on double eagles, of which 364,866 pieces were produced. Few gold dollars are known today in near-Gem or finer grades. This is a bright yellow-gold example that is fully struck in all areas. There are a few small abrasions scattered over each side, but none that are singularly mentionable. Population: 8 in 64, 2 finer (7/16). NGC ID# 25C2, PCGS# 7527

### 1855-C Gold Dollar, Near-Mint Single-Year C-Mint Type

**4252** 1855-C AU58 NGC. Variety 2. The Type Two gold dollar failed to strike well, due to the relatively high relief of the Liberty portrait. It lasted only three years, with the final year coined only at San Francisco. The Charlotte Mint struck the type only in 1855, and the meager mintage of 9,803 pieces resulted in only a few hundred survivors. Those coins are in strong demand from Southern gold type and issue collectors, and from gold dollar specialists. The present near-Mint example has unmarked caramel-gold surfaces. The obverse field is clashed, usual for the type, and a small strike-through (as coined) is above the second L in DOLLAR. The planchet had a granular texture, largely effaced by the strike, though hints of the planchet surface linger on or opposite high points, such as the CA in AMERICA and the ribbon bow, all as made.

*Ex: Long Beach Signature (Heritage, 6/2004), lot 6169. NGC ID# 25C5, PCGS# 7533*

## EARLY QUARTER EAGLES

### 1796 Capped Bust Quarter Eagle, AU53 Popular No Stars, BD-2 Variety First-Year Mintage of 897 Pieces

**4253** 1796 No Stars on Obverse, BD-2, R.4, AU53 PCGS. Bass-Dannreuther Die State c/b. Quarter eagles were authorized by the Mint Act of April 2, 1792, but the first two and a half dollar gold coins were only struck four years later. At the time, they represented the nation's smallest gold denomination and held that title until the gold dollar was introduced in 1849. The small size of the new quarter eagles challenged a traditional practice at the early Mint, that of adding new stars for every state that joined the burgeoning Union. By 1796, the number of American states had grown to 16 — too many to represent with stars around the obverse without throwing off the balance of the design.

A simple solution was reached: All obverse stars were eliminated, making this the first silver or gold coinage issue without such devices on that side. Robert Hilt has suggested an alternative reason for the lack of stars. He notes four 1796 quarter eagle obverse and reverse dies were produced, that the star punch broke after the first obverse had been punched with 16 stars, and that the defective starless obverse was used first. However, the Dannreuther-Bass reference dismisses the possibility, stating “there is no reason to believe that they would *not* use a die that already had stars on it because the star punch had broken. They could have obtained a star punch in a few days from an outside source!”

The 1796 No Stars Obverse quarter eagle was produced in the reported amount of 963 pieces between two known varieties. BD-1 is believed to represent the first delivery of 66 quarter eagles on September 21, 1796. The variety shows arrowheads extending past the left foot of the N in UNITED. BD-1 examples are extremely rare with only six or so pieces known. The remaining 897 coins are of the BD-2 variety, issued on December 8, 1796, showing the arrowheads in line with the foot of the N. Probably 100 to 125 BD-2 quarter eagles survive in all grades.

The present coin is a pleasing AU53 example that shows just a touch of wear on the well-detailed design elements. Like most coins from this die state, this piece displays some incompleteness of detail on the obverse, due to lapping, and a spidery obverse die crack from the rim at 9 o'clock. The antique-gold surfaces exhibit only minor abrasions, but some planchet adjustment marks are evident on the eagle and shield. Traces of original mint luster are evident and the overall presentation is most attractive. Population: 9 in 53, 30 finer (6/16). Population: 9 in 53, 30 finer (6/16).

**From *The Elbert Henry Gary Collection, Part II*. NGC ID# 25F2, PCGS# 45501 Base PCGS# 7645**

## 1802/1 Quarter Eagle, MS62 Possible Finest-Known Example of BD-2

**4254 1802/1 BD-2, High R.5, MS62 NGC.** Among the cleverest innovations from the early days of the U.S. Mint was the dual use of reverse dies — lacking any denomination stamped on them — for both silver dimes and gold quarter eagles. The dual-purpose dies were used from 1797 until 1807. In that 11-year period, there were seven reverse dies used for both denominations, producing a total of 23 separate dime and quarter die marriages — 11 quarter eagles, 12 dimes.

Famed collector Ed Price was fascinated by these dual-use dies and assembled complete die variety sets of both denominations—the only collector who has ever accomplished that goal. The reverse of the present BD-2 quarter eagle was also used to produce the BD-1 1804 13 Stars quarter eagle, and the 1802 JR-4 and 1804 13 Stars JR-1 dimes. The 1802 is usually identified as an overdate, but Garrett and Guth comment that “the attribution is tentative and the ‘1,’ which is barely visible (even under magnification), may be just an artifact.”

Of the three 1802 quarter eagle die varieties, the BD-2 is by far the rarest (estimated 20-25 known). As we wrote in the Ed Price Collection, this piece is “A wonderful example with brilliant green-gold luster on both sides. The obverse is frosty, and the reverse is satiny with reflective fields. A few scattered marks are entirely insignificant. Like most 1802 quarter eagles, the central obverse and reverse design elements are weak. This is possibly the only Mint State example of the variety known.”

*Ex: Bowers and Merena (11/2002), lot 3064; The Ed Price Collection of Early Dime and Quarter Eagle Varieties (Heritage, 7-8/2008), lot 1457, which realized \$40,250; Long Beach Signature (Heritage, 2/2009), lot 2401; Central States Signature (Heritage, 4-5/2009), lot 2669 PCGS# 45507 Base PCGS# 7650*

**1808 Quarter Eagle, AU53  
Only 2,710 Pieces Struck  
of This One-Year Type  
BD-1, The Sole Variety**

**4255 1808 BD-1, R.4, AU53 PCGS.** John Reich redesigned the quarter eagle denomination in 1808, introducing his popular Capped Bust Left motif on the obverse and replacing the Heraldic Eagle on the reverse with a more naturalistic eagle with outspread wings. The quarter eagle denomination was not popular in the early 19th century, as its face value was too high for most everyday transactions, while banking transactions were better handled by the larger half eagle coins. As a result, no quarter eagles were coined in the years between 1808 and 1821. The Capped Bust Left design was modified when coinage resumed in 1821, leaving the 1808 as a one-year design type.

The recorded mintage for the 1808 was a meager 2,710 pieces, with a single die variety known for the date. Like most gold coins of the era, the 1808 suffered a high attrition rate over the years. Experts estimate the surviving population at no more than 125-150 pieces in all grades. Most examples seen are in higher circulated grades, and Mint State specimens are quite rare.

The 1808 proved to be popular with collectors at an early date, and examples began to appear at auction at least as early as the Fifth Semi-Annual Sale (W. Elliot Woodward, 10/1864), lot 1665, "1808 Very fine, uncirculated, scarce." The lot sold for \$9.50, a strong price at the time, to a collector named Smith. More recent sales include the attractive AU53 PCGS example we sold in July 2008 for \$103,500. This is a remarkably attractive example that displays orange-gold color over each side. The strike details are strong overall, and the only marks of any consequence are a tiny cluster of three in the left obverse field and other, less-obvious ones close to stars 5 and 6.

*Ex: The Collection of Donald E. Bently, sold for the benefit of the Bently Foundation (Heritage, 3/2014), lot 30210. NGC ID# BFBZ, PCGS# 45515 Base PCGS# 7660*

## 1808 Quarter Eagle, AU53+ Only 2,710 Pieces Struck Sought-After One-Year Type BD-1, The Sole Variety

**4256 1808 BD-1, R.4, AU53+ PCGS.** Bass-Dannreuther Die State b. After newly hired Mint assistant engraver John Reich redesigned the workhorse half dollar and half eagle denominations in 1807, in 1808 he turned his considerable talents and attention to the cent and quarter eagle. The Mint's striking of 2,710 quarter eagles dated 1808 would constitute the entire mintage for the Capped Bust to Left, Large Size type (in *Guide Book* terminology), one of the rarest U.S. gold coin types.

Like its predecessor, the 1796 No Stars, the 1808 quarter eagle is both a one-year and first-year type, the last utterance of the denomination from the Mint until 1821, by which time another obverse design had been created, one the *Guide Book* dubs the Capped Head to Left motif.

The quarter eagle denomination was unloved and little-used throughout most of its early decades, partly explaining the rarity of both the 1808 specifically and the denomination generally. Harry W. Bass, Jr., with his interest in die states, had little to say about his coin, other than to note the ubiquitous die crack running from the rear of Liberty's cap through the right-side stars, which likely appears on every example — probably the product of die manufacture rather than of prolonged use.

David Akers writes of the issue in his 1975 and 1988 references on the series:

"Although not the great rarity it is sometimes made out to be, the 1808 quarter eagle can certainly be considered to be rare, particularly in high grade. Because this is a one-year-only type, it is also unquestionably one of the most popular U.S. gold coins, and therefore, generally brings proportionally higher prices than other dates that are less rare but also less desirable. As the data clearly indicates, most available specimens are in the very fine to extremely fine range. The majority of pieces that I have seen also have edge nicks or rim bruises to some extent, and although most examples of this date are fairly well struck on the figure of Liberty and on the eagle, they are also weakly struck at the borders. Typically, the stars are flat and there are no denticles visible. ..."

This Plus-graded AU53 example shows very little actual wear, but the peripheral devices exhibit some of the softness Akers mentions and the eagle's claws are softly rendered. The dentils exhibit the typical weakness on both sides. The design elements are well-detailed in other areas and the die crack from the cap is also easily seen on this piece. The antique-gold surfaces retain considerable amounts of original mint luster and only scattered minor abrasions are evident. Population: 6 in 53 (1 in 53+), 31 finer (6/16).

**From *The Elbert Henry Gary Collection, Part II*.** NGC ID# BFBZ, PCGS# 45515 Base PCGS# 7660

**1826/5' Quarter Eagle, BD-1, AU58**  
**Remarkable Eye Appeal and Sharpness**  
**Rare in Any Grade**

**4257 1826/5' BD-1, High R.5, AU58 PCGS.** Bass-Dannreuther Die State b/b, clashed, as was the Bass Core Collection coin. This is the only variety of the 1826 quarter eagle, and it is rare with only 30 to 35 pieces known. The combined PCGS and NGC certified population is only 26 pieces, including possible resubmissions at the AU58 level. Uncirculated examples are extremely rare, with only three reported — all at PCGS (6/16). The present near-Mint example is remarkably sharp from the rims to the central devices. Some original reflectivity in the fields accentuates the straw-gold patina, and a few touches of violet are seen on the highest points of the devices. There is no obvious wear, although light chatter can be seen in the fields. Eye appeal is remarkable for the issue and grade.

This issue has in the past been referenced as an 1826/5 overdate, but it is now thought to just be a recut 6 in the date. The *Guide Book* lists it as 1826/6, and NGC and the Bass-Dannreuther reference share this opinion. PCGS takes a more neutral stance, labeling it 1826/5'. The *Guide Book* mintage of 760 coins may be slightly low, as it is probably that some of the early 1827 quarter eagle production was produced with this die pair. Still, the issue's rarity is undeniable. Population: 4 in 58, 3 finer (6/16). NGC ID# BFW5, PCGS# 45521 Base PCGS# 7665

## 1829 Quarter Eagle, MS64 First Close Collar Issue, BD-1 Scarce, Low-Mintage Date

**4258** 1829 BD-1, High R.4, MS64 PCGS. CAC. Bass-Dannreuther Die State a. The close collar technology was introduced on the quarter eagle in 1829, making the diameter of the coin slightly smaller and the thickness correspondingly thicker. The reeded edge was struck into the coin by the collar, with the result that all coins were perfectly circular, with uniform diameter. William Kneass made some slight modifications to the obverse design, resulting in the rather unglamorous “Fat Head” nickname for the type. The beaded dentils at the border were also something new. The reduced diameter type continued until 1834, when both the design and composition of all U.S. gold coins was modified to stop the large scale hoarding and melting that kept U.S. gold from circulating.

Only 3,403 quarter eagles were struck in 1829, the smallest production total of any year of the reduced diameter type. A single pair of dies was used to strike the entire mintage. A single die state is known, but this was the only use of both obverse and reverse dies, so it is possible that an example with some reverse die damage may be discovered in the future. The 1829 quarter eagle is very scarce in today's market, with an estimated surviving population of 70-90 examples in all grades. PCGS has graded six examples in MS64 condition, with two finer, while NGC has certified eight coins in MS64, with a single specimen finer (6/16).

The present coin is a delightful Choice example, with sharply detailed design elements in most places and just a touch of the usual softness on the eagle's claw and lower shield. The attractive lemon-yellow surfaces display semiprooflike reflectivity with minimal signs of contact. Eye appeal is terrific. This coin will be a welcome addition to a fine collection or Registry Set.

**From The Elbert Henry Gary Collection, Part II.** PCGS# 45523 Base PCGS# 7669

## CLASSIC QUARTER EAGLES

**1830 BD-1 Quarter Eagle, MS62**  
**Low-Mintage Date**

**4259** 1830 BD-1, R.4, MS62 NGC. CAC. Ex: "Col." E.H.R. Green. Bass-Dannreuther Die State a/a. The reduced-diameter Capped Head Left series (1829 to 1834) consists of only low-mintage issues, representing a challenging subset for any collector of early Mint State gold. This brilliant, semiprooflike example was struck from obviously polished dies, with the swirling, raised polish lines still evident and undiminished by die use.

The coin displays sharp medium-gold coloration with deeper orange patina forming at the margins and high points of the motifs. A bold strike shows only slight weakness at Liberty's curls above and adjacent to the ear, and likewise at the eagle's left (facing) wing at the shield junction. Mint luster is pervasive and strong, as is the eye appeal confirmed by the CAC approval.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$65.00; Eric P. Newman Numismatic Education Society; Newman Collection, Part V (Heritage, 11/2014), lot 3199, realized \$24,675. NGC ID# BFW8, PCGS# 45524 Base PCGS# 7670

**1836 Classic Head Quarter Eagle, MS64**  
**Head of 1835, Breen-6143, Variety 11**

**4260** 1836 Script 8 MS64 PCGS. CAC. Breen-6143, Head of 1835, Variety 11, R.2. From a later state of the dies as evinced by the fine die break extending from the rim, through star 6, across the L of LIBERTY, over Ms. Liberty's hair, and finally terminating in the field between the final two stars. It is all too often stated that the 1836 Script 8 two and a half is more commonly encountered than the Block 8 variant. While this is true in a broad sense, the two subvarieties are quite comparable in rarity in grades of MS64 or finer. In fact, the PCGS *Population Report* indicates a scant population of only 13 examples of the Script 8 type in MS64 with two pieces finer—in MS65. The Block 8 entry shows seven coins at the near-Gem level, with another in MS64+, and four better specimens, including an MS66 quarter eagle (6/16).

The current example exhibits frosty surfaces and rich, apricot-gold coloration throughout. Save for the typical weakness in the reverse shield, this piece is well-struck and—all positive attributes combined—exudes ample eye appeal.

Ex: FUN Signature (Heritage, 1/2009), lot 4008. NGC ID# 25FU, PCGS# 7694

## 1836 Classic Head Quarter Eagle, MS64 Scarcer Block 8, Variety 15 Issue

**4261** 1836 Block 8, Second Head of 1837, Breen-6144, Variety 15, R.2. MS64 PCGS. CAC. A substantial mintage of 547,986 Classic Head quarter eagles was accomplished in 1836, with eight die varieties known for the date. The varieties are divided into two main subtypes, five with a Script 8 in the date and three with a Block 8. This coin represents the Second Head of 1837 Variety 15, with a Block 8 date style and a detached berry in the olive branch on the reverse. In general, the Block 8 varieties are much more elusive than their Script 8 counterparts. This coin is a well-detailed Choice example, with a touch of the usual softness on the eagle's leg. The antique-gold surfaces show only minor signs of contact and retain much of their original mint luster. Population: 8 in 64 (1 in 64+), 4 finer. CAC: 2 in 64, 1 finer (6/16). NGC ID# 25FU, PCGS# 97694

## 1837 Classic Head Quarter Eagle, MS64 Low-Mintage Issue, Variety 16

**4262** 1837 MS64 PCGS. CAC. Breen-6145, Variety 16, R.2. Mintage of Classic Head quarter eagles dropped to only 45,080 pieces in 1837, less than one-tenth the production of the previous year. Half eagle production was reduced by approximately 50% as well. Perhaps miners in the Southern gold fields held off shipping their holdings to Philadelphia in anticipation of the opening of the branch mints in 1838. Whatever the reason for the low mintage, both Walter Breen and David Akers report the 1837 is a "very scarce" date today. Jeff Garrett and Ron Guth opine, "Mint State examples are very rare and tend to settle at the lower end of the Mint State spectrum." Population data confirms this statement, as only two examples have been certified at the MS64 level by PCGS, with two finer, while NGC has graded no coin in MS64, and none finer (6/16).

Three die varieties are known for this date. The present coin is an example of Variety 16, distinguished by having three distinct lines in each vertical stripe on the shield and the lowest arrowhead touching the second A in AMERICA. This coin is an extremely impressive example, with notably prooflike fields and a sharp strike. There is some softness on the central curls, as always seen on this issue. A small, circular planchet flaw shows beneath the first T in STATES. The only mentionable marks are some thin scratches in the left reverse field, under the eagle's wing. Slight reddish patina around the margins accents the usual orange-gold color. A visual treat, and one of the finest known specimens of this low-mintage date. NGC ID# 25FX, PCGS# 7695

**1839 Quarter Eagle, MS61**  
**Vibrant Luster, Strong Eye Appeal**  
**Rarely Seen in Mint State**

**4263** 1839 MS61 PCGS. CAC. Breen-6148, Variety 21, R.3. The 1839 is the rarest Philadelphia issue in the Classic Head quarter eagle series, and it is actually scarcer than a couple of the branch mint issues. Fewer than 100 coins have been certified by PCGS in all grades, and only eight are Uncirculated. The NGC population is similarly small (6/16). This MS61 coin displays an unusually sharp central strike with trivial softness on the left-hand star centers. Light chatter in the fields limits the grade, but a rare amount of luster rolls around in a cartwheel on each side. Liberty's portrait shows a blush of peach-orange color, while the remainder of each side is brighter yellow-gold. As the CAC endorsement suggests, this 1839 Classic Head quarter eagle is noticeably finer than the typical lower-end Mint State example, as it is devoid of the high-point slide marks and rub that usually appear on coins of this numeric level. Population: 7 in 61, 1 finer. CAC: 4 in 61, 0 finer (6/16). NGC ID# 25G3, PCGS# 7698

**1839-C Quarter Eagle, MS61**  
**Conditionally Rare Charlotte Issue**

**4264** 1839-C MS61 NGC. Breen-6149, Winter-3, Variety 24, R.4. The rare early die state, before the branch was weakened by lapping. The 1839-C is the more plentiful of the two Classic Head quarter eagles from the Charlotte Mint, although neither issue is readily available in Mint State. Doug Winter writes of the 1839-C in *Gold Coins of the Charlotte Mint*: "In high grades ... it is scarce and underrated. In fact, it is a rarer coin in Uncirculated than the more heralded 1838-C quarter eagle." This conditionally rare MS61 1839-C displays a sharp strike and bright yellow-gold surfaces. The fields are satiny and show trivial chatter that defines the grade. Census: 9 in 61, 4 finer (6/16). NGC ID# 25G4, PCGS# 7699

## LIBERTY QUARTER EAGLES

### 1840-D Two and a Half, MS60 One of Four Mint State Coins Certified First to Appear at Auction in Nearly a Decade

**4265 1840-D MS60 NGC. Variety 1-A.** "In properly graded About Uncirculated-50 and above, it is probably the rarest quarter eagle from this mint": Thus Doug Winter writes of the 1840-D in *Gold Coins of the Dahlonega Mint*. This debut Liberty Head D-mint issue had a paltry mintage of 3,532 pieces, of which only 60 to 80 examples are thought to be extant. In Mint State, Winter supposes only one or two truly unworn coins exist, while NGC lists three (this MS60, one MS61, and one MS62) and PCGS records one (an MS61) (6/16). The last of these to have been offered at auction were the MS61 NGC coin, which sold in the Milwaukee Elite Collection (Superior, 8/2007), lot 659, for \$31,050, and the MS62 NGC coin, which appeared in ANA (Heritage, 4/2006), lot 1495, and realized \$74,750. These are the only Mint State examples known to have been auctioned in third-party certification holders.

The present Mint State coin is a little soft on the eagle's neck but is otherwise surprisingly well-struck for the issue. The surfaces are lightly abraded and display bright yellow-gold patina. Some reflectivity is seen in the protected regions of the fields. It has been nearly a decade since a Mint State 1840-D quarter eagle was last offered at auction, and we anticipate strong interest in this example. NGC ID# 54TT, PCGS# 7719

### 1848 CAL. Quarter Eagle, XF Details Historic Gold Rush 'Commemorative' Issue

**4266 1848 CAL. — Repaired — PCGS Genuine. XF Details.** Irrepressibly popular for its connection to the California Gold Rush, the 1848 CAL. quarter eagles were struck from the first deposit of California gold to reach the Philadelphia Mint in 1848. Incuse letters were counterstamped on 1,389 quarter eagles from a slightly curved prepared punch to commemorate the historic gold finds in the West, making the coins the first quasi-official commemorative issue and adding fuel to the burgeoning great Gold Rush.

This is a well-detailed example with an area of repair on and around the eagle's head, as well as faint tooling and hairlines in the surrounding field. The obverse shows the expected small marks for a circulated quarter eagle but no further areas of smoothing or repair. Greenish-gold patina survives, with the CAL. lettering intact and Genuine as confirmed by PCGS. One of the *100 Greatest U.S. Coins* according to the Garrett and Guth book, eagerly sought in all conditions by numismatists and a broad contingent of the collecting public. Ex: Bebee Collection (Bowers and Merena, 8/1987), lot 1309.

**From The Hamilton Collection.** NGC ID# 25HA, PCGS# 7749

### 1848 CAL. Quarter Eagle, AU Details Famous Gold Rush Commemorative

**4267** 1848 CAL. — Improperly Cleaned — NGC Details. AU. The CAL. 1848 quarter eagle is an iconic 19th century rarity, struck in December of that year to commemorate the discovery of gold in California. The bullion used to strike the small 1,389-coin mintage was taken from a special shipment of 230 ounces of newly mined California ore, which Mint Director Robert M. Patterson was instructed to use for the special issue. The coins were struck from ordinary dies but were impressed with a CAL. punch before being removed from the press. Because the CAL. was entered by hand, its placement varies minutely from coin to coin.

Due to the circumstances and purpose of its coinage, the 1848 CAL. quarter eagle is widely regarded as the United States' first commemorative, despite the fact that the official commemorative series did not begin until the coinage of the 1892 and '93 Columbian half dollars. Examples of the CAL. quarter eagle are highly coveted, regardless of condition. This example has AU details with hairlined honey-gold surfaces that have been lightly cleaned. The coin is otherwise pleasing, despite minor strike weakness on the central devices. NGC ID# 25HA, PCGS# 7749

### 1888 Two and a Half, MS67 The Sole Finest Known First Recorded Auction Appearance

**4268** 1888 MS67 NGC. The 1888 quarter eagle is an often overlooked condition rarity. Gems are scarce, and Premium Gems are exceedingly rare. This Superb Gem is the sole finest example known (6/16), and it is here making its first known appearance at public auction. Our analysis of auction records reveals that MS65 coins are typically the finest available, and MS66 offerings are extremely few and far between, with only one in our Permanent Auction Archives. This MS67 NGC piece is without compare. The glowing yellow-gold surfaces deliver vibrant mint luster that glistens beneath a light. The eagle's left (facing) leg shows some unimportant softness on the feathers. There is a tiny tick next to Liberty's upper lip and there are a couple of faint grazes above the eagle's head, being all that deny perfection for this lovely little quarter eagle. NGC ID# 25LC, PCGS# 7840

## PROOF LIBERTY QUARTER EAGLE

### 1903 Two and a Half, PR66 Rarely Encountered This Fine

**4269 1903 PR66 PCGS.** Proof gold during the 1890s and early 1900s ranged from a low of 93 pieces in 1890 to a high of 205 proofs in 1901. The 1903 comes in at the upper end of that rather tight range with a mintage of 197 pieces. Once attrition is factored in, there may be as many as 100 examples remaining of the proof 1903 in all grades. However, most have not survived in PR66 condition, and only six pieces are finer (combining the data from both services). This example displays remarkable depth of reflectivity in the fields. The surfaces show both bright yellow-gold color as well as accents of reddish patina around the margins. An outstanding piece of 20th century gold. Population: 9 in 66, 1 finer (7/16). NGC ID# 288T, PCGS# 7929

## INDIAN QUARTER EAGLES

### 1914-D Quarter Eagle, MS65 Among the Finest at PCGS Key Condition Rarity

**4270 1914-D MS65 PCGS.** According to the certified population figures, the 1914-D is the rarest Indian quarter eagle in Gem condition or finer. However, in terms of the frequency of auction appearances, it is the third-rarest in MS65. The 1914 Philadelphia issue is seen slightly less often at auction in high grade, and the much more famous 1911-D is seen so fine only about half as often. In either case, the 1914-D is one of the three leading condition rarities in the series, and with the exception of a single Superb Gem at NGC, this MS65 example is among the finest known. Wisps of rose and mint-green appear throughout the otherwise frosty yellow-gold surfaces. The strike is weak on the lower headdress feathers, but the reverse is sharp. Eye appeal is outstanding. Population: 51 in 65, 0 finer (6/16). NGC ID# 2899, PCGS# 7947

## THREE DOLLAR GOLD PIECES

### 1855 Gold Three Dollar, MS65 Condition Census Rarity

**4271 1855 MS65 NGC.** With a mintage of 50,555 pieces, the 1855 three dollar gold is among the more plentiful issues in the series in Mint State. Examples can be found with little difficulty through MS63, and Choice coins are occasionally obtainable. The same cannot be said of Gems. In MS65, NGC has seen only a single coin — the present example — and that service lists one Premium Gem finer; PCGS records two MS65s and another MS66 (6/16). Does a resubmission exist in these numbers? Our Auction Archives show no previous offerings of a Gem-graded 1855 three, although the NGC MS66 coin has traded hands several times prior to its last appearance in 2009. The PCGS MS66 coin is from the Pogue Collection, and it realized \$35,250 in the D. Brent Pogue Collection, Part III (Stack's/Bowers, 2/2016), lot 3092. This MS65 NGC coin is beautifully preserved and boldly struck, showing rich original luster in peach and orange-gold hues. Luster just shimmers in the fields when rotated beneath a light. NGC ID# 25M6, PCGS# 7972

### 1868 Three Dollar Gold, MS64 Sharp and Prooflike Conditionally Rare

**4272 1868 MS64 PCGS.** This Choice 1868 three dollar gold piece is not a proof, but it is fully prooflike and shows nearly enough sharpness to compete with a proof. Cameo contrast appears on each side through rich orange-gold patina. A few stray marks in the fields are all that preclude a Gem designation. The visual impact of the abrasions would be almost unnoticed were the fields not so deeply reflective. Eye appeal is superb for the grade.

The 1868 had a small mintage of 4,850 coins but was not as well saved as were later low-mintage dates. Most Uncirculated survivors grade in the MS61 to MS63 range, making this Choice coin rare. Finer examples are exceedingly rare. Still, a visually comparable 1860s type coin of any other date will prove even more difficult to locate. Thus, the appeal of this piece seems to stem from numerous directions. Population: 15 in 64, 7 finer (6/16). NGC ID# 25MP, PCGS# 7989

**1874 Three Dollar Gold, MS66**  
**Remarkable Surfaces, Conditionally Rare**

**4273 1874 MS66 PCGS.** The 1874 gold three dollar piece is a widely recognized type coin, but what is often overlooked is this issue's conditional rarity at the Gem and finer grade levels. In stark contrast to lower grades, PCGS and NGC have recorded just eight MS66 pieces combined, and none are finer at either service (7/16). Compared to the several hundred Gem or better 1878 coins certified, high-end 1874 three dollar gold pieces are conditionally underappreciated. This shimmering, frosted example displays rich reddish-gold luster and remarkably unabraded surfaces. The wreath bowknot is soft, as usual, but the remaining design elements are well-defined. Population: 6 in 66, 0 finer (7/16). NGC ID# 7KDE, PCGS# 7998

### 1878 Three Dollar Gold, MS67+ Outstanding 19th Century Type Coin Registry Set Essential

**4274 1878 MS67+ PCGS.** The 1878 three dollar gold piece boasts the second-highest business-strike mintage of the series, at 82,304 pieces. The background for this large production total is interesting, from an economic point of view. The U.S. government planned to resume specie payments in 1879. For the first time since the early days of the Civil War, it would be possible to exchange gold coins at par with paper money. Anticipating a great demand for small-denomination gold coinage, the Mint produced larger than normal totals of quarter eagles and half eagles in 1878, along with the landmark mintage of three dollar coins.

While the Mint's attempt to be proactive was commendable, it was ultimately unnecessary, as no great demand for gold coins developed. It seems the majority of the population, those living outside the Western portion of the country, had become accustomed to using the more convenient paper money over the preceding two decades. When they realized they could exchange the bills for gold at any convenient time, they had no desire to do so. Many coins distributed to banks remained stored in the vaults for years, until numismatic interest in three dollar gold pieces developed after the denomination was cancelled in 1889. Dealers like Thomas Elder made a market in three dollar gold coins in the early 20th century, when many small hoards surfaced. Today, the 1878 is the most available three dollar gold piece in high grade, and a favorite choice of type collectors.

The present coin is a magnificent Plus-graded Superb Gem, one of the finest specimens seen at either of the leading grading services. The impeccably preserved yellow-gold surfaces show a few hints of teal blue, with vibrant satiny mint luster on both sides. The design elements are boldly rendered and the overall presentation is outstanding. This coin is tied with one other specimen for finest certified at PCGS (7/16). How it compares to the three MS67 ★ examples at NGC is hard to determine, but it is difficult to imagine a coin with better eye appeal than this piece. This coin should be the centerpiece of the finest collection or Registry Set. NGC ID# 25MZ, PCGS# 8000

## PROOF FOUR DOLLAR GOLD PIECES

## 1879 Flowing Hair Stella, Judd-1635, PR67 Among the Finest Known

**4275 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR67 PCGS Secure.** There have been so many conflicting stories about the existence of so-called “original” 1879 Flowing Hair stellas that it seems virtually impossible to sort out truth from fiction. The mere notion of what would constitute an original, should it exist, has been debated. Certain scholars believe the coins are identifiable by weight, others by striations, and others still by metallic composition.

On November 12, 1879, Mint Director Horatio Burchard tasked Philadelphia Mint Superintendent A. Loudon Snowden with the production of Goloid dollar, Metric dollar, and stella patterns: “You will cause twenty pieces to be struck of each denomination and forwarded to this office together with your bill for the value of the metal contained in the same.” Two months later on January 12, 1880, Treasury Secretary John Sherman expressed that he wanted 25 Flowing Hair stellas struck rather than 20, presumably as gifts for President Hayes and other top-ranking officials.

Judd believed 15 stellas were originally struck, possibly based on S.K. Hartzfield June, 30 1880 sale of an 1879 stella, a Goloid dollar, and a Metric silver dollar, where he wrote: “This is one of the *original* 15 sets, submitted to Congress.” It is unclear where Hartzfield got that quantity, whether it is a typo or the result of misinformation. The Burchard and Sherman letters should serve as the basis for the argument that a small number of original stellas were struck. The question is if they are distinguishable from later productions, and if so, how?

Weight is one consideration. Judd argued that original 1879 Flowing Hair stellas weighed 109 grains and that restrikes ranged in weight from 103 to 109 grains, most of them weighing 108 grains. However, Michael Hodder argues in “The Mystery of the Stella Solved,” that “the distinction is not very helpful to the collector or numismatic researcher, however, if the majority of 1879 Flowing Hair Stellas seen are within one grain of the weight of so-called ‘originals.’”

Hodder also rejects the notion put forth by Breen, Taxay, and others that striations are indicative of restrikes. Instead, he argues that all stellas were struck on half eagle planchet stock adjusted to the appropriate thickness. Any examples without striae were simply struck from closely spaced dies that obliterated the parallel lines. He concludes, “it appears plain now that there is no certain way of distinguishing, from the coin itself, one of the handfuls of 1879 Flowing Hair Stellas struck in 1879 from the same 1879-dated dies in 1880.”

Hodder’s 1987 article is convincing, yet like most articles on the stella, it raises as many questions as it answers. The suggestion that 1879 stellas were struck on half eagle planchets composed of .900 fine gold presents a couple of issues. On October 4, 1879, Mint Director Burchard wrote to A. Loudon Snowden: “You will cause an amount of alloy to be prepared of the fineness designated by the respective bills, sufficient to strike twenty pieces of each denomination.” That is, the stellas were to be struck on planchets composed of 6 grams of gold, 0.3 grams of silver, and 0.7 grams of copper. Metallurgical testing by NGC confirms that at least two stellas tested conform closely to those specifications, including the Newman example we offered in November 2014. That would seem to suggest at least a few of 1879 Flowing Hair stellas were struck in the proper composition.

Ultimately, unless new evidence comes to light, it seems that the existence or non-existence of original 1879 Flowing Hair stellas will remain a mystery. Nevertheless, it is important that numismatists take into account the evidence on hand (i.e. historical records, metallurgical testing) to come to a reasonable determination.

This is an immaculate stella. The surfaces are bright yellow-gold and the fields nicely reflective, and the usually seen die striations are present. A couple of minor contact marks below the star on the reverse are the only post-striking impairments we see. Population: 2 in 67 (1 in 67+), 0 finer (6/16).

**From The Commander Collection.** NGC ID# 28AZ, PCGS# 8057

## 1880 Flowing Hair Stella, Judd-1657 PR65 NGC Only 15 Pieces Estimated Stuck

**4276 1880 Flowing Hair, Judd-1657, Pollock-1857, R.6, PR65 NGC.** The four dollar gold piece, also known as the stella, was an international coinage experiment that took place in 1879 and 1880. Like other similar attempts, the concept was a single coinage that would be recognized by several European countries as well as the United States. Until recently, none of those experiments were successful, and even the modern-day euro, widely accepted throughout Europe, has not met the needs of U.S. citizens.

The earliest attempt at a joint coinage acceptable to multiple nationalities followed a June 1867 international monetary convention held in Paris. Representatives of the participating nations agreed that the French franc would be the logical choice for an international coinage. Following that meeting, a coinage proposal was introduced in this country for a dual-denomination gold piece valued at five dollars and 25 francs. Although patterns were produced, Congress defeated the coinage proposal.

Dana Bickford, a New York businessman, proposed the next attempt at an international coinage and even designed his own pattern issue to illustrate the concept. The Bickford patterns were produced by the Philadelphia Mint in 1874. Those pieces carried a denomination of 10 dollars, and also expressed the equivalent value in the coinage of various European nations, calculated at the prevailing exchange rate for each different coinage. One problem with the coinage was the ever-changing exchange rate for currency, meaning the international coinage issue would become obsolete with the first adjustment. Bickford's coinage proposal suggested that each of the six representative nations would produce coins of their own design on one side, and a variation of the standard design on the other side. An article in the February 1876 issue of *The Coin & Stamp Journal*, quoted by Andrew Pollock, explained in part: "each government can fully display its design and value on one side, and on the other show the value of the coins in the currencies of the different nations, also the fineness of the metal and number of grammes without altering their values, and but slightly changing the designs."

After those attempts met with failure, the Honorable John Kasson was the next to propose an international coinage. Kasson was the U.S. Minister to Austria, and he was also a former member of the Committee of Coinage, Weights, and Measures. Those connections put him in a unique position to propose an international coinage. His goal was a coin that was close in value to eight florins in the Austrian coinage system, thus he chose the four dollar gold piece, to be called the stella. Today, that coinage is the most famous and widely recognized international coinage pattern, due mostly to its inclusion in the *Guide Book*.

An extensive issue took place in 1879, with a total mintage of several hundred coins for the Flowing Hair design prepared by Charles Barber. Historically, the mintage was reported as 415 coins, with some scholars suggesting that there were 15 "originals" followed by 400 "restrikes." More recently, others have suggested the total mintage was in the range of 700 to 800 coins. A second design with Liberty's hair coiled in braids was prepared by George Morgan and also issued in 1879, but in a much smaller quantity, perhaps two or three dozen at the most. A few additional pieces of each design were coined in 1880, strictly for numismatic purposes. For many years, the reported mintages were 415 examples of the 1879 Flowing Hair, 10 of the 1879 Coiled Hair, 15 of the 1880 Flowing Hair, and 10 of the 1880 Coiled Hair. Those recorded mintages were for examples actually struck in gold, and an additional unknown quantity of off-metal pieces were struck in copper, aluminum, and white metal. While there is no doubt that the 1879 Flowing Hair pieces are far more plentiful than any of the other varieties, there is also no doubt that the number known for each variety exceeds the recorded "mintage" figures. At least two hundred 1879 Flowing Hair pieces survive, along with more than a dozen each of the others.

The 1880 Flowing Hair issue is slightly more plentiful than either of the Coiled Hair varieties. This magnificent Gem proof is struck in light yellow-gold with excellent proof qualities including deeply mirrored fields and lustrous devices. Diagonal striae can be seen on each side, down to the right on the obverse and down to the left on the reverse, or in the same relative direction on each side of this coin-turn piece. The diagonal marks on the surface are a result of the planchet preparation process, as the strip was reduced minutely in thickness by a rolling operation. The four dollar gold pieces were coined from half eagle planchet stock that was made slightly thinner by the operation, then the planchets were cut with the half eagle planchet punch, with the result that the coins were the same diameter as the half eagles. This avoided the necessity of preparing new planchet cutters for an almost imperceptible difference in diameter that would have otherwise been required for the denomination. Undoubtedly, such equipment would have been made if the coinage proposal was passed by Congress, but the coins were strictly produced as patterns or Congressional samples, and the actual legislation was not approved. Census: 4 in 65, 2 finer (5/16).

*Ex: Dallas Signature (Heritage, 11/2007), lot 1694. NGC ID# 2AJG, PCGS# 8059*

## EARLY HALF EAGLES

### 1795 Small Eagle Five, AU53 Rare BD-12 Die Marriage

**4277** 1795 Small Eagle, BD-12, High R.6, AU53 PCGS. Bass-Dannreuther Die State a/a. BD-12 is a very rare variety — John Dannreuther estimates as few as 12 to 15 pieces are extant in all grades. Although struck with 1795-dated dies, this variety may have been coined during 1796. Dannreuther suggests that the single 1796-dated variety is far too scarce to have had a mintage of more than 6,000 pieces, as is the number of half eagles struck in that year. Thus, the later 1795-dated die marriages may have occurred in 1796. Using outdated but still serviceable dies into later years was common practice at the early Mint, which was starved for time and resources and did not want to waste perfectly good dies just because they were outdated.

This AU example of the BD-12 Small Eagle five is boldly detailed, with bright yellow-gold surfaces and some prooflike reflectivity in the protected regions of the fields. Eye appeal is pleasing for the issue, and given the rarity of this die pairing, there is nothing to complain about.

**From *The Elbert Henry Gary Collection, Part II*. PCGS# 519861  
Base PCGS# 8066**

**1795 Heraldic Eagle Five, Original AU58  
Rare BD-14 Variety, Only 14 to 18 Pieces Known  
Possibly Unique Terminal Die State Example**

**4278 1795 Large Eagle, BD-14, High R.6, AU58 NGC.** Bass-Dannreuther Die State d/d. BD-14 is one of the great rarities of the Draped Bust half eagle type, and has long been recognized as such, even since before die varieties of early half eagles had been significantly studied. Henry Chapman's June 1912 sale of the George Earle Collection identified a Large Eagle 1795 half eagle therein that had a "Close date, but a different die from any preceding. ... Ex. rare. *Plate.*" The coin was called "Very Fine," but in the plate looked significantly better by modern grading standards, at least AU. That example of the BD-14 die pairing garnered \$125.00, while an equally graded Small Eagle five realized only \$31.00.

BD-14 is one of the three odd-ball die pairings for the 1795 half eagle which employ a Large Eagle reverse that was not itself put into production until 1797. Thus, all examples of BD-13, -14, and -15 were coined in either late 1797 or early 1798. Of the three, BD-15 is the most likely to be offered at auction, with as many as 35 pieces extant; BD-14 (here represented) survives in numbers no greater than 14 to 18 pieces, and BD-13 is represented by just a single coin.

The rarity of BD-14 is actually even greater than might be expected, even for its paltry survival rate. An examination of recent auction appearances reveals that possibly as few as seven individual coins have changed hands in the last few decades, including, among others, a piece pedigreed to the Woodin, Newcomer, Green, and King Farouk Collections, and another from J.F. Bell. The "glittering prooflike" coin from Kagin's 50th Anniversary Sale (5/1978), lot 1062, is an earlier appearance of the MS63 Prooflike NGC coin we offered in our June 2004 Signature Sale. Our Permanent Auction Archives contain only seven previous appearances of this variety over the span of more than two decades, with just five different coins therein represented. Some of this can be explained by certain coins having fallen into strong hands — the Harry W. Bass, Jr. coin, for example, has been permanently removed from availability, retained for the Core Collection — yet, in the end, the lack of availability for BD-14 comes down to one glaring obstacle: This issue is *unequivocally rare*.

The currently offered coin is something of a Prodigal Son, here returning to the public auction scene for only the second time in *more than half a century*, having previously appeared as lot 4155 in Federal Brand Enterprises' January 1963 Million Dollar Auction Sale. It is also in a class by itself when compared to other BD-14 representatives, as it is the only example known in the terminal die state, and is quite possible *the only such piece in existence*. It was described in the 1963 Federal Brand sale as having a "die break from Liberty's chin to the edge," and showed, in the plate, a reverse rim cud over ME in AMERICA. This catalog description, as well as a derivative notation in Walter Breen's half eagle monograph, were the entire basis for John Dannreuther's terminal die state diagnostics as published in his 2006 reference work, *Early U.S. Gold Coin Varieties*. Neither he nor Bass had ever personally seen an example of this die state, and no representatives other than the present piece surfaced in our study of plated auction listings. Even the Earle coin was an early die state example.

The surfaces are beautifully original, showing remnants of semiprooflike mirroring in the fields and warm coppery-gold overtones on the high points of the devices, denoting trivial cabinet friction. The strike is evenly executed, but lacking in sharpness in the centers; the upper-left portion of the shield is ill-defined and there are remnants of adjustment marks in Liberty's hair curls. Nonetheless, the eye appeal is exceptional. As described in the 1963 FUN sale, a heavy die crack extends from the rim between star 15 and the bust to Liberty's nose, and a heavy rim cud caps the ME in AMERICA; there are no other discernible die flaws unique to this state. This is an old-time gold rarity of incredible importance to the early gold varieties specialist. We anticipate significant interest in this magnificent numismatic treasure.

*Ex: Million Dollar Auction Sale / FUN (Federal Brand Enterprises, 1/1963), lot 4155; Long Beach Signature (Heritage, 6/2015), lot 4232. NGC ID# 25NK, PCGS# 519868 Base PCGS# 8075*

### 1798 Large Eagle Five, MS61 Rare BD-8 Marriage, Small 8

### 1800 Half Eagle, Reflective MS62 BD-3, Seldom Seen Die Pairing

**4279** 1798 Large Eagle, Small 8, BD-8, R.5, MS61 NGC. Bass-Dannreuther Die State a/b. A mildly reflective light gold example of this scarce date and rare die variety. Three Small 8 dies were utilized. BD-8 is identified by the low location of the 8 in the date, furthest from the bust truncation. (Bass-Dannreuther refers to these dies as "Normal 8s.") A well-struck piece, save for the eagle's breast feathers and the hair northwest of the ear. No relevant marks are present, although a few short mint-made lint marks are noted, and a trivial lamination, also as made, is found near the T in LIBERTY. The significance of this offering is obvious to the specialist, since another Uncirculated example of this variety may not appear again at auction for several years.

Ex: Long Beach Signature (Heritage, 9/2005), lot 4549; Central States Signature (Heritage, 4-5/2009), lot 2708. NGC ID# BFX5, PCGS# 507328 Base PCGS# 8079

**4280** 1800 BD-3, High R.6, MS62 PCGS. Bass-Dannreuther Die State c/a. This is a rare die variety, with perhaps twenty pieces known (John Dannreuther estimates 18 to 25 examples). The key diagnostic is on the reverse, where there are nine arrowheads instead of the usual eight. The Bass-Dannreuther reference on early U.S. gold includes the following comments: "The key identifier for this variety is the extra arrow that extends past the normal bunch of eight arrows used for all Large Eagle reverse dies to this point. This extra arrow was added by hand; this particular nine-arrow formation is not seen on any other reverse."

This is a fine Mint State specimen with well-struck devices, rich green-gold coloration over both sides, and noticeable prooflikeness in the fields. Die clash marks are noted beneath Liberty's ear and adjacent to her throat. There are a couple of small, red-orange alloy spots and a normal number of minor abrasions on each side, for the grade.

Ex: Central States Signature (Heritage, 4-5/2009), lot 2710. PCGS# 45593 Base PCGS# 8082

## 1802/1 Half Eagle, AU58 Very Rare BD-4 Variety

**4281** 1802/1 BD-4, R.7, AU58 NGC. Bass-Dannreuther Die State c/b. A very rare die marriage with two pick-up points. A leaf tip points between the RI in AMERICA, and the 1 underdigit is centered within the 2. The date is double clashed within STATES, and the left obverse border is slightly buckled. Probably no more than 10-12 examples of the BD-4 remain extant in all grades. This is a generally lustrous straw-gold half eagle with a strong strike and only a hint of friction, limited to the forehead and cloud centers. Despite the recent publication of the well-done Bass-Dannreuther reference, collecting early half eagles by die pairing has yet to catch on. Nonetheless, varieties of the greatest rarity have enormous market potential, and the present piece should be the subject of enthusiastic bidding.

*Ex: Long Beach Signature (Heritage, 9/2008), lot 3580; Long Beach Signature (Heritage, 2/2013), lot 3949. PCGS# 45599 Base PCGS# 8083*

## 1803/2 Capped Bust Right Five, MS64 BD-2, Scarcest Variety of the Date Very Rare Any Finer

**4282 1803/2 BD-2, R.5, MS64 PCGS Secure.** Bass-Dannreuther Die State d/c. A nominal mintage of 33,506 Capped Bust Right half eagles was accomplished in 1803, with four different die varieties known for the date. Two obverse and two reverse dies were combined to strike these four varieties. Both obverse dies were leftover from 1802 and overdated. This coin represents the BD-2 variety, with an imperfect T in LIBERTY and two points of the lowest star touching the ribbon on the reverse. The BD-2 is the scarcest variety of the date, with a surviving population of 40-50 examples in all grades. The BD-2 probably accounted for 2,000-3,000 pieces of the reported mintage. The obverse die was used to strike the BD-1, BD-2, and BD-3 varieties of 1803. This was the only use of the reverse die.

Early collectors were often confused by the Mint's practice of overdating leftover dies and using them in subsequent years. Since all half eagle dies actually used in 1802 were overdated from 1801, and all half eagles struck in 1803 were produced using overdated unused dies from 1802, the situation was especially confusing. Prominent coin dealer W. Elliot Woodward offered an example of the 1803/2 in lot 1632 of his Fifth Semi-Annual Sale (10/1864), where he noted:

"1803 Over 1802; splendid impression, almost proof. This variety is very rare. Although the 2 appears very plainly in the date, I have never met with an 1802 from this die."

The coin sold for \$13, a respectable price for the time, to New York collector J. Osborn Emery. The identification of die varieties and the emission sequence for half eagles of the 1802-1804 era remained confusing down to modern times, as noted by John Dannreuther in his *Early U.S. Gold Coin Varieties*. For many years, the BD-4 variety of 1803 was misidentified as BD-3 by most catalogers and the emission sequence of these coins is extremely complicated, with several possible remarriages of the same dies clouding the situation.

The present coin is an attractive Choice example with well-detailed design elements and vibrant mint luster throughout. The reverse shows the "bitten cloud" effect, caused by the deeply impressed letters in STATES OF that removed the uppermost layer of the clouds below. From a late state of the dies, a bisecting die crack runs from the rim near U in UNITED, all the way across to E in STATES. The well-preserved orange-gold surfaces show only minor signs of contact, but a few faint planchet adjustment marks are evident on the bust. Population (all varieties): 13 in 64, 3 finer (7/16). PCGS# 504949 Base PCGS# 8084

**1806 BD-6 Half Eagle, MS63  
Knob 6, 7x6 Stars**

**4283** 1806 Knob 6, 7x6 Stars, BD-6, R.2, MS63 PCGS. CAC. Bass-Dannreuther Die State d/f, or perhaps later. This piece exhibits all of the die characteristics for the latest die state recorded in the Bass-Dannreuther reference, and shows additional faint obverse die cracks not mentioned in that reference. A lovely select Mint State piece, this half eagle has brilliant yellow surfaces and frosty luster. Most of the design elements are bold, with weakness only evident at the left claw and arrows. The BD-6 die pair is by far the most available of the 1806 half eagles, and it is more plentiful than any variety of the Draped Bust design. For that reason, this variety is highly recommended for the type collector who seeks only one example of the design type. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

**1807 Capped Bust Left Half Eagle, MS64  
Popular First-Year Type, BD-8**

**4284** 1807 Bust Left, BD-8, R.2, MS64 PCGS. Bass-Dannreuther Die State d/b, showing an arcing die clash mark on Liberty's jawline, just before the centering dot on the obverse. The 1807 Capped Bust Left half eagles and the 1807 Capped Bust, Lettered Edge half dollars were new first-year-of-type designs from John (Johann) Reich, a German indentured servant-engraver hired by the Mint in 1807. The first tasks he took on were redesigning the most important denominations in gold and silver, respectively. This near-Gem offers deep, mellow amber-gold color with a few trivial spots but top-notch eye appeal overall. Contact marks are trivial and widely scattered, the strike is quite sharp, and copious luster dominates throughout both sides. A great type coin. Population: 23 in 64, 4 finer (6/16). NGC ID# CKLH, PCGS# 507607 Base PCGS# 8101

### 1812 Half Eagle, BD-1, MS63 Lustrous Type Coin

**4285** 1812 BD-1, R.3, MS63 PCGS. Bass-Dannreuther Die State a/a, unclashed. BD-1 is the more plentiful of the two 1812 half eagle varieties, ideal for type purposes. This is a high-end coin, graded Select Mint State by PCGS. Original, frosty luster remains in the fields, and only light chatter in the exposed regions precludes an even finer grade. This piece is slightly soft in strike on the central devices, showing remnants of mint-made adjustment marks on Liberty's cheek and bust. The die impression is nonetheless even and well-centered. Eye appeal is pleasing for the type. A heavy, curving die line in the horizontal reverse shield stripes is a ready aid in identification of this variety. NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

## **1814/3 Capped Bust Left Half Eagle, MS64 Very Scarce BD-1, Only Dies for the Date None Certified in Numerically Finer Grades**

**4286 1814/3 BD-1, High R.4, MS64 PCGS. CAC.** Bass-Dannreuther Die State c/d. According to Mint records, a nominal mintage of 15,454 Capped Bust Left half eagles was accomplished in 1814, using a single pair of dies. The obverse die was leftover from 1813 and the remnants of the undertype 3 can be faintly seen at both sides and the top of the 4 in the date. This was the only use of the obverse die, but the reverse was used previously to strike the BD-2 variety of 1813, and it would be used again to produce all of the famous 1815 half eagles the following year. The 1814/3 has always been popular with collectors, and it is a very scarce issue in absolute terms, but its overall rarity has often been exaggerated in the past. The surviving population probably numbers 80-100 examples in all grades, and high-quality specimens are very rare. The issue appears at auction an average of two or three times per year. PCGS has graded three coins (including this piece) in MS64, with one example in MS64+, and none finer. Meanwhile, NGC has certified eight specimens in MS64 with none finer (5/16). These totals include an unknown number of resubmissions and crossovers.

The present coin is a spectacular Choice example, struck from a late state of the dies. Prominent clash marks are evident on both sides, with the parallel bars from the reverse shield showing plainly in Liberty's ear and the surrounding hair. Clashing from the banner is easily seen in the date area, and more clash marks can be seen on either side of the bust. The reverse is clashed above both wings and below the banner. The lustrous orange-gold surfaces show a thin vertical die line in the right obverse field, along with a few minor contact marks and luster grazes. Overall eye appeal is outstanding. This coin will be a welcome addition to the finest collection or Registry Set. PCGS# 519908 Base PCGS# 8117

### 1818 BD-2 Half Eagle, MS62 Popular STATESOF *Guide Book* Variety

**4287** 1818 STATESOF, BD-2, R.4, MS62 PCGS. Bass-Dannreuther Die State c, identified by a slender die crack that bisects the obverse from star 6 to the second 8 in the date. This lemon-gold early half eagle exhibits glowing luster and needle-sharp strike detail. The sole area of incompleteness occurs along the left shield border. Clean surfaces reveal a small patch of faint vertical pinscratches in the right obverse field. The dies are rotated clockwise 45 degrees. This STATESOF variant is a popular *Guide Book* variety, caused when the engraver spaced the TAT in STATES too widely. To compensate, the O in OF had to be placed close to the final S in STATES. Population: 8 in 62, 6 finer (6/16).

Ex: *FUN Signature* (Heritage, 1/2006), lot 3474; *Central States Signature* (Heritage, 4-5/2009), lot 2715. NGC ID# BFXV, PCGS# 519912 Base PCGS# 8121

### 1818 Five Dollar, BD-2, MS63 High-End Type Coin

**4288** 1818 STATESOF, BD-2, R.4, MS63 PCGS. CAC. Bass-Dannreuther Die State c. The usual late die state with a bisecting crack from star 6 through the bust to the rim below the second 8 in the date. The 1818 half eagle is a scarce issue, although BD-2 is the most plentiful of the three known die marriages. This variety survives to the extent of 100 to 125 pieces, but attractive Mint State examples are rare. The present CAC-endorsed Select representative displays a bold, even strike with frosty yellow-gold luster. Liberty's cheek shows minor grazes, being all that limit the grade. The cartwheel effect is for more vibrant than is typical of half eagles from this early period. Population (all varieties included): 13 in 63 (1 in 63+), 9 finer. CAC: 4 in 63, 1 finer (6/16).

From *The Elbert Henry Gary Collection, Part II*. NGC ID# BFXV, PCGS# 519912 Base PCGS# 8121

## CLASSIC HALF EAGLES

**1823 BD-1 Half Eagle, AU55**  
**Rare Capped Head Issue**

**4289** 1823 BD-1, High R.4, AU55 PCGS. Bass-Dannreuther Die State a/a. BD-1 is the only variety of the 1823 half eagle, and it is scarce. This date and most others from the 1820s were heavily melted before the weight reduction of this denomination in 1834. The 1823 survives to the extent of fewer than 100 coins, after having a mintage in excess of 14,000. This variety was produced with an old reverse die that was first employed for the last of the 1820-dated coinage. The same tail die was used to strike the legendary 1822 half eagle. This reverse was finally retired at the end of the 1824-dated coinage.

Due to their heavy gold weight, examples of this issue did not see widespread circulation and were eventually melted. The typical survivor grades in the AU or lower Mint State range, as does the present AU55 example. This piece shows excellent detail and bright yellow-gold patina with hints of deeper orange in the reverse fields. Some reflectivity is seen in the protected areas. Some adjustment marks along the upper-right obverse rim appear mint-made. Population: 7 in 55, 26 finer (6/16). NGC ID# BFY4, PCGS# 519932 Base PCGS# 8131

**1836 Classic Head Half Eagle, MS64+**  
**Second Head, Large Date, McCloskey 4-D**  
**Ex: Pogue**

**4290** 1836 MS64+ PCGS. Second Head, Large Date, Breen-6509, McCloskey 4-D, R.2. Ex: D. Brent Pogue Collection, in the custom PCGS holder. A substantial mintage of 553,147 Classic Head half eagles was accomplished in 1836, with nine different die varieties known for the date. This coin represents the McCloskey 4-D variety, with a Block 8 in the date and the lowest arrowhead away from the final A in AMERICA. This was the only use of the obverse die, but the reverse was also used to strike the McCloskey 5-D variety of this date. The McCloskey 4-D variety was probably first recognized by William Woodin and Edgar Adams in the early 20th century. Woodin described three varieties of the 1836 half eagle in the catalog for the 1914 ANS Exhibition, where his collection was on display. The McCloskey 4-D was described as having the 1 in the date high, and the reverse "5D wider spaced, one berry in branch."

The present coin claims a historic pedigree to the famous D. Brent Pogue Collection, certainly a mark of distinction for any coin. The design elements are sharply detailed throughout and the well-preserved orange-gold surfaces radiate vibrant mint luster. A small diagonal mark in the left obverse field, parallel to the nose, is the only noticeable pedigree marker. Overall eye appeal is tremendous. Population: 18 in 64 (2 in 64+), 2 finer (7/16).

Ex: Allison Park Collection (*American Numismatic Rarities*, 8/2004), lot 1010; D. Brent Pogue, *Pogue Collection, Part IV (Stack's Bowers*, 5/2016), lot 4053, realized \$22,912.50 NGC ID# 25RY, PCGS# 8174

## LIBERTY HALF EAGLES

### 1838-D Classic Five Dollar, AU55 Key D-Mint Issue in the Series

**4291** 1838-D AU55 PCGS. Variety 1-A, R.3. The Classic half eagle series is a highly collectible one, especially in AU. There are only three scarce to rare issues: the 1834 Crosslet 4, the 1838-C, and the 1838-D. Many collectors overlook the Crosslet 4 because of the diminutive nature of how it differs from the Plain 4. The Dahlonega issue also has much to recommend it beyond just being a key to the Classic series. It is the first year of issue from the Dahlonega mint and it also has the mintmark placed on the obverse. Within the Classic series, it is the only D-mint. A mere 20,583 pieces were struck. This may sound substantial at first, but these coins were heavily circulated in Georgia and the Carolinas during the gold rush of the 1830s. This is a well-detailed example with faint remnants of mint luster still evident around the devices. There are numerous small, but individually insignificant abrasions present. Population: 16 in 55, 33 finer (7/16). NGC ID# 25S6, PCGS# 8178

### 1840-O Half Eagle, Sharp MS61 Rarely Seen in Mint State

**4292** 1840-O Narrow Mill MS61 PCGS. Variety 3. Although silver coinage had begun in New Orleans in 1838, half eagles were not struck until January 1840. The Southern branch mint produced 40,120 pieces with this date, of which only 150 to 175 are thought to still exist. Half eagles circulated in the South during this period, and most survivors of the 1840-O five are in the VF to XF grade range. Doug Winter estimates only "seven to nine Uncirculated pieces" are known, although the certified population figures would suggest that there are a few more. Nonetheless, Mint State 1840-O half eagles are major rarities regardless of numeric level. This MS61 coin is sharp, as expected for the Narrow Mill variety, showing satiny orange-gold luster and pleasing eye appeal for the grade. Scattered surface chatter limits the grade. Population: 3 in 61, 5 finer (6/16). NGC ID# 25SK, PCGS# 8200

## 1844-O Half Eagle, MS63 Condition Rarity, Reflective Fields

**4293 1844-O MS63 NGC. Variety 1.** With the exception of perhaps the 1847, all half eagles from the 1840s are rare in Mint State, including the 1844-O. Interestingly, however, the '44-O is the most available New Orleans issue in the series. But most examples are circulated. Doug Winter writes of the issue: "It is scarce in MS60 to MS61, very scarce in MS62, rare in MS63 and very rare above this." The present Select Mint State example is boldly struck but from polished dies that have weakened peripheral stars. The reflective fields offer excellent eye appeal, however, and the yellow-gold surfaces are minimally abraded. A couple of slanting, shallow depressions in the obverse fields on either side of the portrait are mint-made. A rim cud appears above the ATE in STATES on the reverse. Census: 13 in 63, 6 finer (6/16). NGC ID# 25TA, PCGS# 8222

## 1855 Half Eagle, MS64 Rare Top-Grade Example

**4294 1855 MS64 PCGS. CAC.** This near-Gem representative ties with 11 others for numeric finest in the combined certified population of PCGS and NGC(6/16). The central devices are bold overall, if a trifle softly struck at the eagle's neck, and the peach-tinged yellow-gold surfaces offer impressive luster. Only a few wispy flaws near the margins keep this coin from Gem status.

In 1855, half eagle production was distributed surprisingly evenly between five Mints, though Philadelphia struck the lion's share and was the only facility with a six-figure production. As with many other mid-19th century gold issues, the 1855 half eagle is available in circulated condition but highly elusive with no trace of wear. Population: 5 in 64 (2 in 64+), 0 finer. CAC: 2 in 64, 0 finer (6/16).

*Ex: Long Beach Signature (Heritage, 9/2002), lot 8160; Portland Signature (Heritage, 3/2004), lot 6215; ANA Signature (Heritage, 7-8/2008), lot 1971. NGC ID# 42AP, PCGS# 8261*

### 1861-D Five Dollar, Reflective AU53 Civil War-Period Dahlonega Rarity

**4295** 1861-D AU53 PCGS. Variety 46-JJ. The 1861-D is the final half eagle struck at the Dahlonega Mint before the facility was seized by the Confederacy during the Civil War, and it is one of the most in-demand issues from this mint of any denomination. The federal coinage of the 1861-D was 1,597 pieces, but a similar number of coins were later struck with remaining bullion after the mint had fallen into confederate control. Regardless of how many were struck in total, fewer than 85 pieces are believed to exist today in all grades. The combined PCGS and NGC population of 105 coins is likely inflated by resubmissions.

The present coin is comparable in quality to the AU55 piece in the Smithsonian Institution (graded by Garrett and Guth). The eagle's talons and the fletchings are poorly defined, but the strike is otherwise sharp. Each side displays satiny patina in rich orange-gold and violet hues, and some reflectivity in the fields. A brush of high-point friction accounts for the grade, while the eye appeal is strong. Population: 10 in 53, 20 finer (6/16). NGC ID# 25VM, PCGS# 8290

### 1863 Five Dollar, AU58+ Only 30 to 40 Survivors Among the Finest Certified

**4296** 1863 AU58+ PCGS Secure. This is one of the top 10 most elusive Liberty Head half eagles in the entire series. The Mint accomplished a token production of 2,442 coins, and virtually all of them have been lost to time. PCGS estimates a survivorship of 30 to 40 examples across all grade levels. Of those, perhaps one or two are in Mint State. This AU58+ half eagle follows behind them as one of the finest examples the series specialist can hope to obtain.

Orange-gold surfaces display semiprooflike reflectivity that is unsurprising for such a low-mintage issue. Every coin was essentially a "first strike." Each side features complete design detail that adds to the appeal. This piece falls fractionally shy of an extremely rare Mint State designation, according to PCGS. However, signs of friction are practically indiscernible even under close inspection. Scattered specks do nothing to diminish the importance of this key date No Motto five. Population: 5 in 58 (1 in 58+), 1 finer (7/16). NGC ID# 25VS, PCGS# 8294

## 1902-S Five Dollar, MS67 High-End Condition Rarity

**4297 1902-S MS67 NGC.** The luster, preservation, and coloration of this coin are all remarkable. A satiny sheen radiates over each side, where lovely shades of green-gold and rose adorn the blemish-free surfaces. The strike details are generally crisp throughout, except on the centrils of a few obverse stars. The 1902-S is a plentiful issue overall, but its availability begins to decline above MS64, and it drops off sharply at the Premium Gem level. This Superb Gem is a major condition rarity. An impressive and visually pleasing half eagle. Census: 8 in 67 (1 in 67+), 1 finer (6/16).

*Ex: FUN Signature (Heritage, 1/2007), lot 5963. NGC ID# 25YZ, PCGS# 8406*

## 1906 Five Dollar, MS67 Among the Finest Known

**4298 1906 MS67 NGC.** The 1906 Liberty five is a common date in the absolute sense, but high-grade examples are rare. Premium Gems are rarely offered at auction, and Superb Gems are exceedingly scarce. The last appearance of an MS67 example in our Permanent Auction Archives was in the FUN Signature sale (Heritage, 1/2016), lot 5592, which realized more than \$18,000. The present coin is among the finest certified. The strike is sharp, and the softly frosted luster glows with medium yellow-gold hues. The preservation is outstanding. Census: 10 in 67 (1 in 67+, 1 in 67 ★), 0 finer (6/16). NGC ID# 25Z9, PCGS# 8413

## PROOF LIBERTY HALF EAGLES

### 1895 Liberty Half Eagle, PR66 Deep Cameo Only 81 Pieces Struck Outstanding Registry Set Candidate

**4299 1895 PR66 Deep Cameo PCGS.** Only 81 proof Liberty half eagles were struck in 1895, a minute production total in absolute terms, but not unusually small in the context of the series. It seems likely that the coins sold well, as the Mint raised the mintage to 103 pieces the following year. Unfortunately, the mid-1890s were not banner years for coin collecting in general. Many of the great collectors of the late 19th century were either recently dead (T. Harrison Garrett and R.C. Davis) or getting out of coins (Lorin G. Parmelee) and the great gold collectors of the early 20th century, like Virgil Brand and William H. Woodin, were just starting to hit their stride as collectors. The Panic of 1893 had far-reaching economic effects, including the repeal of the Sherman Silver Purchase Act, which drastically reduced the number of Morgan dollars the U.S. Mint produced every year. These and other factors had a dampening effect on coin collecting during that era.

Although gold proofs were known to be rare, they were not held in high esteem by the average collector at the turn of the century. They could be obtained for face value, plus a small surcharge and shipping cost from the Mint every year, but the average collector could not afford to tie up large amounts of money in an extensive gold collection. Proofs brought only modest premiums when offered at auction. The complete four-piece gold proof set of 1895 offered in lot 355 of the David S. Wilson Collection (S.H. Chapman, 3/1907) brought only \$60, and that was one of the better results of that decade. During hard times, owners of gold proofs were often reduced to spending the coins at face value or selling them to bullion brokers for a small profit. As a result, only a fraction of the original mintage of any 19th century gold proof coin still exists today. The 1895 proof Liberty half eagle has a surviving population of about 20-25 examples in all grades.

The present coin is a spectacular Premium Gem, with razor-sharp definition on all design elements. The devices are richly frosted and the fields are deeply mirrored, creating a stunning black-on-gold cameo flash when the coin is tilted in the light. The vivid orange-gold surfaces are impeccably preserved and eye appeal is terrific. This coin will be a welcome addition to a fine collection or Registry Set. Population: 2 in 66 Deep Cameo, 1 finer (6/16). NGC ID# 28CZ, PCGS# 98490

**1898 Five Dollar, PR68 Deep Cameo**  
**Only 75 Pieces Struck**  
**The Sole Finest at PCGS**

**4300 1898 PR68 Deep Cameo PCGS Secure.** According to Mint records, only 75 proof Liberty half eagles were struck in 1898, a slightly smaller mintage than the year before. Fortunately, the 1898 issue enjoyed a higher survival rate than most proof dates of this era, and the surviving population probably numbers 30-40 examples in all grades today, including several coins in institutional collections. The reasons for the high survival rate are unknown, but it may be that the lower mintage figure caused contemporary collectors to prize this date more highly than coins of surrounding years, preserving them when they disposed of other issues that they perceived as more common when hard times forced them to sacrifice some of their assets.

The design elements are fully detailed, and the bright yellow-gold surfaces are virtually flawless. The date is slightly low and the eagle's beak is closed, with evidence of die polish between the arrow heads. The frosty devices seem to float on the deeply mirrored fields, which show the slight orange-peel texture of the very best 19th century proofs. Overall eye appeal is simply incredible. This is the single finest example certified at PCGS (6/16).

CAC. NGC ID# 28D4, PCGS# 98493

## INDIAN HALF EAGLES

### 1909-D Five Dollar, MS65+ Virtually Uncollectible Any Finer

**4301** 1909-D MS65+ PCGS. CAC. The 1909-D is the quintessential type coin in the Indian Head five dollar series. Choice examples are readily available, and Gems are scarce but obtainable. Coins of this quality with a Plus designation and CAC approval are important rarities on the verge of matching the finest-certified representatives of the issue. Light rose-gold hues and satin luster adorn each side, accompanied by occasional accents of pale green. The design elements exhibit needle-sharp detail throughout, including the lower headdress, breast, and wing feathers. The mintmark is bold. A marvelous, high-end Gem fully deserving of the added recognition from PCGS and CAC. There are four MS65+ submissions, five Premium Gems, and none finer at PCGS (6/16). NGC ID# 28DJ, PCGS# 8514

### 1909-O Half Eagle, AU58 Only New Orleans Indian Gold Piece

**4302** 1909-O AU58 PCGS. The Indian Head design quarter eagles, half eagles, and eagles were, with a single exception, minted at Philadelphia, Denver, and San Francisco. The single exception, of course, is the 1909 Indian half eagle coined at New Orleans. Total production for the issue was just 34,200 coins, and only a few of those have survived. PCGS and NGC have certified a total of 1,612 examples in all grades, including just 209 Mint State pieces. All of those coins enjoy significant collector demand.

This near-Mint example represents an ideal grade for collector consideration. According to the PCGS Price Guide, the price of this issue doubles from AU58 to MS61, while the difference in actual quality is virtually nil. This piece exhibits a trace of friction on its highest design points, and retains virtually full light yellow mint luster on each side. This outstanding example will easily fit in an otherwise complete Mint State set of Indian half eagles. NGC ID# 25ZK, PCGS# 8515

**1909-O Half Eagle, AU58**  
**Sole New Orleans Indian Five**

**4303 1909-O AU58 PCGS. CAC.** The 1909-O Indian half eagle claims a low mintage of 34,200 pieces, struck during the final year of coinage operations at the New Orleans Mint. The issue is the rarest coin in the series in absolute terms, and the only Indian half eagle struck at the famous Southern mint. It seems that a few high-quality coins were saved by contemporary collectors, or perhaps for novelty value by the general public, as a few dates in the series are more difficult to locate in high grade. Still, the 1909-O is definitely scarce in AU58 condition and the issue is always in demand.

This attractive Near-Mint example shows just the slightest trace of high-point friction over the sharply detailed design elements. The pleasing, deep orange-gold surfaces are lightly abraded and retain most of their original mint luster. This coin should find a home in a fine date collection or branch mint type set. NGC ID# 25ZK, PCGS# 8515

**1916-S Five Dollar, MS64**  
**Challenging in High Grade**

**4304 1916-S MS64 PCGS. CAC.** In 1916, only the San Francisco Mint struck half eagles. Although gold coinage in general was not halted until 1933, there would only be one other production run of this denomination, and it would take place at the Philadelphia Mint in 1929. Commercial demand for gold had largely been replaced by paper currency, and bullion backing for gold certificates was more easily performed by double eagles. The 1916-S half eagle is sought-after in any condition, but it is notably elusive in pleasing Mint State grades. The present Choice example is considerably finer than the typical representative but it is not as rare as the prohibitively expensive Gems. The strike is bold, and each side displays satiny yellow-gold mint luster. A few light, scattered ticks determine the grade. PCGS has seen only 16 numerically finer submissions (7/16). NGC ID# 28DY, PCGS# 8532

## PROOF INDIAN HALF EAGLE

### 1911 Matte Finish Five Dollar, PR67 Nearly Perfect, Finely Granular Surfaces

**4305 1911 PR67 NGC.** The Mint experimented with several proof finishes in the early years of the 20th century. The matte proof finish used on medals for decades by the Mint was little appreciated by collectors of regular issue coinage. In 1911, the Mint abandoned the so-called "Roman Proof" finish used in the previous two years, and returned to the matte proof format begun in 1908. The coins exhibit a finely grained surface texture and the expected fullness of detail. Unfortunately, collectors continued to reject these innovations, as they preferred the old brilliant proof format.

The proof mintage of 1911 was a mere 139 coins. Despite the small mintage, this issue is still the second most available proof date of the series, behind the 1908. Walter Breen notes proofs of 1908-1915 are much rarer than those of the preceding decade. Even the small recorded mintage totals do not convey the true rarity of these issues. Breen suspects the pieces were not recognized as proofs by many heirs, who may have unwittingly spent them, or turned them in during the Gold Recall of 1934.

Bela Lyon Pratt was the designer of this attractive and realistic design, but many numismatists did not appreciate the reduced relief design feature. Samuel Hudson Chapman alleged the design was unhygienic and the coins would not stack. These allegations proved false, and the basic design remained unchanged until half eagle production was discontinued in 1929.

The present coin is a marvelous representative of this rare issue. The bright orange-gold matte finish seems to enhance the quality of realism Pratt aimed for with this design. The detail is crisp and impressive on all devices, and is especially notable on the usually soft headdress and eagle's wing. Virtually unimprovable. Census: 10 in 67, 4 finer (6/16). NGC ID# 28E5, PCGS# 8542

## EARLY EAGLES

**1797 Capped Bust Right Eagle, MS61  
Final Small Eagle Reverse, BD-1  
Very Rare in Mint State**

**4306 1797 Small Eagle, BD-1, R.5, MS61 PCGS Secure.** Bass-Dannreuther Die State c/b. A die crack runs from the obverse rim below star 16 to the field near the throat, where it splits faintly into a U shape. The surfaces of this Mint State piece are largely wheat-gold and surprisingly free of mentionable distractions for the assigned grade. One thin straight line through Liberty's face is possibly a planchet adjustment mark, although we see no others on that side. Only with magnification do a few other scattered marks and ticks appear, but there is plenty of eye appeal on this piece. The Small Eagle on the reverse is remarkable for its sharpness of detail, with crisp, fully delineated breast and neck feathers. Few examples, even other Mint State specimens, show such fine detail in these areas. Leaves 6 and 7 on the left side of the wreath are also finely detailed, another feature that is almost always weak on Small Eagle tens. Most of the planchet adjustment marks are on the reverse dentils at the left and right sides, and an upside-down V-shaped scrape shows in the left reverse field. The surfaces are uniformly prooflike..

The year 1797 was one of transitions. George Washington finished his second term in office, refused a third, and retired to his beloved Mount Vernon, resulting in the election of John Adams as president. After Tennessee became the 16th state to join the Union on June 1, 1796, dies for some coins were produced showing 16 stars, joining the supply of dies with 15 stars. Accordingly, there exist both 15-Star and 16-star varieties of the 1796 half dollar, representing the first year of the extremely rare Draped Bust, Small Eagle design type. Afterward, Mint Director Elias Boudinot, perhaps in consultation with Chief Engraver Robert Scot, realized that it was not practical to continue adding a star for every new state to join the Union. Accordingly, 13-star dies were the standard after 1797, to signify the "Original 13" colonies. Of course, there are many exceptions to the 13-star rule, for various reasons, both from the Mint's early days and in the modern era.

As can be seen by the R.5 designation, 1797 Small Eagle BD-1 tens are rare in absolute terms, not just condition rarities. Gold and silver designs were both in transition in 1797, from the Small Eagle reverse to the Heraldic Eagle (or Large Eagle) reverse. The Small Eagle tens of 1797 combine a leftover reverse die that was first used for the 1796 BD-1 13 Leaves variety, here combined with an awkwardly designed obverse showing a 12x4 star arrangement. There are so many stars on the left-hand side that the lowest star, star 1, actually collides with the 1 in the date, and star 12 is stuck in the top of Liberty's hat like a pincushion. The other three 1797 eagle die marriages show the Large Eagle reverse, comprising the large majority — likely on the order of 80% to 90% — of the mintage for this date. The rarity of the 1797 BD-1 eagle was appreciated by numismatists at least as early as W. Elliot Woodward's Sixth Semi-Annual Sale (3/1865), where the coin in lot 2736 was described as, "1797 Small eagle rev., four stars facing; in splendid condition, and of the highest rarity." The lot realized a substantial \$38 to New York collector J.O. Emery, the highest price of any early eagle in the sale.

Emphasizing the Mint State and overall rarity of this issue, PCGS has seen just two examples in MS61, this coin and the D. Brent Pogue specimen, with none finer (5/16). As might be expected, comparable examples seldom become available at auction, and when they do, competition from series specialists is intense. The record price realized for this issue belongs to the MS61 PCGS Pogue example, which realized \$440,625 when it sold in 2015. This coin should find a home in the finest collection or Registry Set.

**From The Collection of Richard W. DeRobertis.** NGC ID# BFIN, PCGS# 45716 Base PCGS# 8555

### 1799 Capped Bust Right Eagle, AU53+ Small Obverse Stars, BD-6

**4307** 1799 Small Obverse Stars, BD-6, R.5, AU53+ NGC. CAC. Bass-Dannreuther Die State e/b. A substantial mintage of 37,449 Capped Bust Right eagles was accomplished in 1799, with 10 die varieties known for the date. This coin represents the BD-6 variety, with the 17 in the date closely spaced and the star away from the eagle's beak on the reverse. The BD-6 has a surviving population of just 35-45 examples in all grades, and probably accounted for 1,500-2,000 pieces of the reported mintage. This was the final use of the obverse die, which was previously used to strike the BD-4 and BD-5 varieties of this date. The reverse was used here for the first time and later used to strike the BD-7 variety.

This coin offers well-detailed design elements and lightly abraded orange-gold surfaces, with no trace of planchet adjustment marks. From a late state of the dies, the obverse shows an extensive network of die cracks, the most prominent being the crack through star 8 and down the left side of the cap. The reverse shows some incomplete detail due to lapping. Census: 6 in 53 (2 in 53+), 25 finer (6/16). NGC ID# 2623, PCGS# 45729 Base PCGS# 98562

### 1799 Ten Dollar, Near-Mint BD-8, Small Obverse Stars Rare Variety

**4308** 1799 Small Obverse Stars, BD-8, R.5, AU58 PCGS. Bass-Dannreuther Die State c/b, terminal reverse. The heaviest die cracks run through AMERICA, identifying this rare variety. BD-8 has a surviving population of only 45 to 55 pieces in all grades, making it one of the scarcer Small Stars die pairings. Typically, BD-7 is the variety acquired by type collectors, but the present BD-8 coin certainly has the quality and eye appeal to be considered for such a purpose with the added bonus of absolute rarity. The strike is sharp and evenly executed. Some luster remains in the protected regions of the fields, while leaving the bulk of each side with rich orange-gold patina. Slight friction over the high points of the devices and in the exposed areas of the obverse fields precludes a Mint State designation. Eye appeal is excellent.

*From The Collection of Richard W. DeRobertis.* NGC ID# 2623, PCGS# 45731 Base PCGS# 98562

**1801 BD-2 Ten Dollar, AU55  
Partially Lustrous Type Coin**

**4309** 1801 BD-2, R.2, AU55 PCGS Secure. Bass-Dannreuther Die State a/a, unclashed. This Choice AU BD-2 eagle shows the usual vertical spines in Liberty's cap. This is an available variety and is often chosen for type purposes. BD-2 is the only use of this obverse and the first of two uses for this reverse. As many as 40,000 coins may have been struck from this die pair, which is unusual considering that previous die pairings from this period often cracked quickly, even after only a few hundred strikes.

This coin is boldly rendered and retains hints of mint luster in the protected portions of the fields. Minor high-point friction accompanies pleasing straw-gold patina and strong eye appeal. An outstanding early eagle type coin.

**From The Collection of Richard W. DeRobertis.** NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

**1803 BD-5 Eagle, AU50  
Old-Time Eye Appeal  
Star on Cloud Reverse**

**4310** 1803 Large Reverse Stars, Star on Cloud, BD-5, High R.4, AU50 NGC. Bass-Dannreuther Die State g/b. An outstanding AU example of this less often seen variety, showing thick old-time patina in shades of copper-gold, orange, and lavender. The strike is even, and wear is minimal. The surfaces are smooth and problem-free.

No ten dollar gold pieces were struck in 1802, but six varieties of 1803 eagles are known. BD-5 is the second most often seen, but it is noticeably scarcer than BD-3. Fewer than 110 examples are believed extant in all grades. This variety is distinctive for a small star that is punched into the upper-right corner of the last cloud on the reverse. It is worn weak on this example but remains discernible. Due to the scarcity and demand of 1804-dated coins, this 1803 eagle is an ideal late-series type coin. The old-time look will appeal to range of collectors. NGC ID# 262A, PCGS# 45739 Base PCGS# 88565

### 1804 Capped Bust Right Eagle, Unc Details Elusive Crosslet 4, BD-1 Variety

**4311** 1804 Crosslet 4, BD-1, High R.4 — Improperly Cleaned — NGC Details. Unc. Bass-Dannreuther Die State b/b. From a small mintage of 3,757 pieces, the 1804 Capped Bust Right eagle has always been a very scarce issue. The mintage of 1804-dated coins was even smaller than the reported production total suggests, as die evidence confirms the BD-6 variety of 1803 was actually struck after the 1804 BD-1 coins, using the same reverse die. Thus the 1803 BD-6 coins must have been included in the mintage figures for 1804, as well. The BD-1 has a surviving population of 80-100 coins in all grades.

The only 1804-dated eagles actually struck in 1804 are the BD-1 coins, but the extremely rare BD-2 variety was struck in proof format in 1834-1835 for inclusion in the diplomatic presentation sets that also featured the 1804 dollars. Coinage of eagles was discontinued after 1804, because of widespread exportation and melting, and no more ten dollar coins were struck for circulation until 1838.

The present coin exhibits strongly impressed design elements in most areas, with just a touch of softness on the centers and a die bulge in the left obverse field. From a late state of the dies, the obverse shows a die crack from star 1 to the date and the reverse displays a series of arcing cracks from the last A in AMERICA, through the eagle's tail, and on through the letters in UNITED. Abrasions are minimal, but some planchet adjustment marks are evident on the bust and in the obverse field. The luster has been dimmed by a cleaning long ago, but the orange-gold surfaces remain attractive. NGC ID# BFYU, PCGS# 45741 Base PCGS# 8566

## LIBERTY EAGLES

### 1838 Ten Dollar, AU58 Highly Collectible Two-Year Subtype

**4312** 1838 AU58 PCGS. CAC. After a hiatus of 34 years, the ten dollar gold piece was reintroduced to American commerce in 1838. The design was engraved by Christian Gobrecht. It is substantially the same one used until 1907, but there are enough differences to make the tens from 1838 and 1839 a distinct subtype. The mintage was low in 1838 with only 7,200 pieces produced, creating an absolute as well as a condition rarity. Seldom is this date found in near-Mint condition. The fields retain much of their original polish, giving the piece a strong semiprooflikeness. Rich orange-gold color is seen throughout, and there are no mentionable abrasions. This is a high-grade example of this scarce subtype and a coin that is unlikely to be bettered anytime soon. Population: 7 in 58, 4 finer (7/16). NGC ID# 262D, PCGS# 8575

## 1865-S Liberty Eagle, AU53 865 Over Inverted 186

**4313 1865-S 865 Over Inverted 186 AU53 NGC.** Large S. To the novice this variety looks like 1865 over 981, but the latter digits are in reality an inverted 186 date logotype that the engraver first entered upside-down, then corrected. Both the Normal Date and Inverted Date varieties are condition rarities, understandably given the low mintage for both combined, 16,700 pieces. The Normal Date is actually a tad rarer but the curiosity factor of the blundered-date variety makes it popular, as does its separate *Guide Book* listing. This apricot-orange piece is surprisingly unabraded, but both moderate strike softness and light high-point wear are confined largely to the central devices. Excellent eye appeal. Census: 3 in 53, 10 finer (6/16). NGC ID# 28ED, PCGS# 8643

## 1890 Liberty Eagle, MS65 Single-Finest Certified at PCGS

**4314 1890 MS65 PCGS.** The 1890 Liberty eagle claims a modest mintage of 57,980 pieces, but the survival rate for the issue is surprisingly high. The 1890 can be found in lower Mint State grades without much trouble, making the issue popular with type collectors, but the population drops off sharply at the MS62 level. Examples in Gem condition, like the present coin, are extremely rare.

This delightful Gem exhibits sharply detailed design elements, with razor-sharp definition on Liberty's hair and the eagle's claws. The well-preserved peach-gold surfaces show no mentionable flaws and vibrant, satiny mint luster radiates from both sides. Eye appeal is terrific. Population: 1 in 65, 0 finer (7/16). NGC ID# 266R, PCGS# 8717

### 1890-CC Eagle, MS63 Semiprooflike Surfaces

**4315 1890-CC MS63 PCGS.** A frosted portrait of Liberty and semireflective fields give the obverse of this Select 1890-CC Liberty eagle a decidedly prooflike appearance. The reverse shows a similar effect. These qualities are characteristic of a low-mintage issue like the 1890-CC ten, struck to the extent of merely 17,500 pieces. Luster swirls over orange-gold surfaces tinged with elements of violet. A pinpoint-sharp strike and minimal abrasions add to the allure of this Uncirculated Carson City eagle. This issue is occasionally seen in Mint State, but pieces grading as fine as the present coin are rare. Population: 7 in 63 (1 in 63+), 1 finer (6/16). NGC ID# 266S, PCGS# 8718

### 1895 Liberty Eagle, MS65+ Tied for Finest at PCGS

**4316 1895 MS65+ PCGS. CAC.** The 1895 Liberty eagle is readily available through MS63, but Choice representatives become suddenly scarce. The two leading certification services combined list only eight pieces in MS65 or finer and, at PCGS, this Plus-designated Gem is tied with one other for the finest (6/16). With such a low high-grade population, the availability of this issue falls far behind that of most later Philadelphia emissions from the 1890s.

This piece displays razor-sharp design elements set against frosty green-gold surfaces that are beautifully devoid of bothersome abrasions. Cartwheel luster shimmers over each side when rotated beneath a light, and the corresponding eye appeal is almost captivating. An ideal combination of type-coin quality and conditional rarity. Population: 4 in 65 (2 in 65+), 0 finer. CAC: 2 in 65, 0 finer (6/16). NGC ID# 2678, PCGS# 8732

**1899-O Eagle, Reflective MS64  
Conditionally Rare O-Mint Issue**

**4317** 1899-O MS64 PCGS. CAC. Variety 2. From a mintage of 37,047 pieces, the 1899-O Liberty ten dollar is the scarcest New Orleans eagle struck after 1883. The typical submission at the leading certification services grades a fraction shy of MS60, and all Mint condition examples are scarce. The 1899-O becomes very rare at the Select grade level, and Choice representatives generally appear at auction once every few years or so, with some exceptions. The opportunity presented here is not to be missed. This high-end Select example exhibits sharply detailed design elements and lightly marked orange and rose-gold surfaces. Vibrant mint luster and a few areas of prooflike reflectivity complete the appeal. Population: 5 in 64, 1 finer (6/16). NGC ID# 267K, PCGS# 8743

## INDIAN EAGLES

### 1907 Indian Eagle, MS65 Wire Rim Prototype, Judd-1774 Only 500 Examples Struck

**4318 1907 Wire Rim MS65 PCGS. Judd-1774.** The Wire Rim tens and High Relief twenties were each a curious blend of the tried and tested and the experimental. The designs for each borrowed heavily from previous commissions completed by Augustus Saint-Gaudens. However, the bright, satiny finish on the Wire Rim tens was clearly experimental for the Mint. The Mint did have decades of experience striking medals in high relief. They could also strike them in different finishes and colors. But medal production was a very slow process and limited to tiny numbers when compared to coinage intended for circulation. Problems arose, however, when designers made assumptions about what could be accomplished for circulating coinage, and when Mint officials attempted to second-guess how a design would be received by the public. Mint Director George Roberts solicited advice from San Francisco Mint Superintendent Frank Leach about the proposed standing-eagle reverse design. Leach was apparently unaware that the design had been previously used on Theodore Roosevelt's privately produced 1905 inaugural medal with the reverse designed by Adolph Weinman. His blunt assessment was it was not a faithful representation of the national bird and its legs much too long. "This design inclines one to the impression of a crane in masquerade wearing pantaloons and a cutaway coat." Apparently his artistic critique went no further than Robert's desk, and the standing-eagle design proceeded and was adopted for the reverse of the ten dollar. The obverse was an adaptation of Augustus Saint-Gaudens' Nike, seen on the Sherman Group at the southern entrance to Central Park. This obverse / reverse pairing survived the experimental Wire Rim strikings, the Rolled Rim patterns, and was slightly lowered for the circulation strike tens that finally entered production. Only 500 specimens of the Wire Rim design were produced and the issue is prized by pattern collectors and series specialists alike.

The present coin is a delightful Gem, with well-detailed design elements and well-preserved orange-gold surfaces that show few signs of contact. Vibrant satiny mint luster radiates from both sides and eye appeal is outstanding. Population: 68 in 65 (6 in 65+), 23 finer (5/16).

**From The Conch Collection.** NGC ID# 26F2, PCGS# 8850

## 1907 Wire Rim Ten Dollar, MS65 Bright Yellow-Gold Surfaces

**4319 1907 Wire Rim MS65 NGC.** The Wire Rim tens and High Relief twenties were each a curious blend of the tried and tested and the experimental. The designs for each borrowed heavily from previous commissions completed by Augustus Saint-Gaudens. However, the bright, satiny finish on the Wire Rim tens was clearly experimental for the Mint. The Mint did have decades of striking experience with medals in high relief. They could also strike medals in different finishes and colors. But medal production was a very slow process and limited to tiny numbers when compared to coinage intended for circulation. Problems arose, however, when designers made assumptions about what could be accomplished for circulating coinage, and when Mint officials attempted to second-guess how a design would be received by the public. Mint Director George Roberts turned to advice from San Francisco Mint Superintendent Frank Leach about the standing-eagle design. Leach was apparently unaware that the design had been previously used on Theodore Roosevelt's privately produced 1905 inaugural medal with the reverse designed by Adolph Weinman. His blunt assessment was it was not a faithful representation of the national bird and its legs much too long. "This design inclines one to the impression of a crane in masquerade wearing pantaloons and a cutaway coat." Apparently his artistic critique went no further than Robert's desk, and the standing-eagle design proceeded and was adopted for the reverse of the ten dollar. The obverse was an adaptation of Augustus Saint-Gaudens' Nike, seen on the Sherman Group at the southern entrance to Central Park. This obverse / reverse pairing survived the experimental Wire Rim strikings, the Rolled Rim patterns, and was slightly lowered for the circulation strike tens that finally entered production.

Original Wire Rim tens all have a distinctive appearance. The surfaces are uniformly bright yellow-gold with little (or none) of the reddish patina usually seen on High Relief twenties. The wire rim or "fin," in Mint parlance, is distinctive and completely surrounds each side. Examination with a magnifier shows only the slightest evidence of post-striking contact with other coins. There is, however, a distinctive but tiny spot of reddish-brown (probably an alloy spot) in the center of the cheek of the Indian. It is difficult to discern without a loupe, though. NGC ID# 26F2, PCGS# 8850

**1907 Indian Eagle, MS66+ ★**  
**Rare Rolled Rim, Periods Variant**  
**Judd-1903, Only 50 Examples Distributed**

**4320 1907 Rolled Rim MS66+ ★ NGC. Judd-1903.** Like its more famous double eagle counterpart, Augustus Saint-Gaudens' original design for the 1907 Indian eagle proved impractical for use in high speed, regular-issue coinage. The first model of the new design (Judd-1901), known as the Wire Rim type today, had high relief on the design elements and no border around the edge of the coin. As a result, metal was extruded through the narrow gap between the die and collar when the coins were struck, forming a narrow fin, or rim around the circumference. This made the coins impossible to stack for counting purposes and raised concerns that the narrow rim would wear away quickly, causing the coins to be underweight. Clearly, significant modification was needed and Chief Engraver Charles Barber advocated adding a protective rim around the edge of the coin to solve these problems. Barber's modification of the design is known as the Rolled Rim type today. In the September 10, 2007 edition of *Coin World*, Roger W. Burdette and Jeff Reichenberger discussed the necessity for the Rolled Edge coins and their characteristics:

"The first version of [Saint-Gaudens] \$10 coin had no properly defined rim, made a wobbly stack when the experimental pieces were piled, and required the use of a medal press to bring up the design.

"To remedy these defects, [Chief Engraver Charles] Barber made a new set of hubs and dies from the same set of models as before. But this time, he cut a well defined rim into the hubs. Experimental pieces demonstrated that the relief was low enough that the coins could be struck on ordinary presses. These were shown to the Treasury secretary and President Roosevelt and approved.

"This second gold eagle version had the design in slightly higher than normal relief. The fields ended at a well defined rim on which the coins could sit when stacked. On the reverse, the legends had small text stops - usually called periods - at ends of each inscription, just as on the first version.

"The Philadelphia Mint struck 31,500 pieces of the second version on normal coinage presses in late September 1907 and the coins seemed destined for release across the country."

Unfortunately, significant detail was lost in the process of lowering the relief on the Rolled Rim coins. Superintendent John Landis noted the coins "are indefinite in detail and outline, not being at all sharp and looking like imperfect coins or coins that have been sweated." A third version of the design had been prepared by Saint-Gaudens' assistant Henry Hering in the meantime, with lower relief and no periods on the reverse. Landis believed the coins from these dies were superior to the Rolled Rim production and convinced acting Mint Director Robert Preston to cancel the release of the Rolled Rim specimens, and use the No Periods dies for regular coinage. President Theodore Roosevelt approved the No Periods design in early October. In November of 1907, new Mint Director Frank Leach ordered the destruction of most of the 31,500 Rolled Rim eagles that had been struck, saving only 50 coins for numismatic purposes. The 50 survivors were parceled out to Mint officials, museums, and influential insiders. Although the Rolled Rim coins were clearly intended for circulation, the fact that they were not released has influenced many numismatists to consider them patterns and they are widely collected as part of the pattern series, with the designation Judd-1903.

The present coin is a magnificent Plus-graded Premium Gem, with the Star designation for outstanding eye appeal and quality. The design elements are well-detailed throughout, showing some of the characteristic softness on the headdress feathers, but with better-than-average detail for the issue. The light orange-gold surfaces are impeccably preserved and radiate vibrant mint luster on both sides, adding to the incredible visual appeal. This coin possesses a combination of absolute rarity, high technical quality, and outstanding eye appeal that has seldom been matched. It may be years before a comparable specimen becomes available. The 1907 Rolled Rim eagle is listed among the *100 Greatest U.S. Coins*. Census: 4 in 66 (1 in 66+, 1 in 66+★), 3 finer (6/16). NGC ID# 268C, PCGS# 8851

### 1907 Indian Eagle, MS67+ Final No Periods Design Only One Finer Coin at PCGS

**4321 1907 No Motto MS67+ PCGS.** Despite its acknowledged beauty, Augustus Saint-Gaudens' original design for the 1907 Indian eagle proved impractical for high-speed regular-issue coinage. Mint Engraver Charles Barber and Saint-Gaudens assistant Henry Hering modified the initial 1907 design by removing the triangular stops (periods) from around the motto E PLURIBUS UNUM and lowering the relief of the devices. They also reshaped the branch slightly. The earlier Wire Rim and Rolled Edge patterns were distributed to Treasury insiders and VIP's, but this No Periods design was the first version seen by the general public.

The "Indian" head is actually a representation of Liberty, wearing the uniquely American headdress of a native American that President Theodore Roosevelt insisted on. The design was adopted from the Nike head Saint-Gaudens had sculpted for the Sherman Monument in Central Park. A rumor that the model for this iconic American design was an Irish waitress named Mary Cunningham caused a brief scandal in the contemporary press, but there was no basis for the report and the clamor soon subsided. Many high-quality specimens of this first-year issue were saved by contemporary collectors for numismatic purposes and for their novelty value by the general public. As a result, the 1907 No Periods Indian eagle is an available date today in grades up to the Premium Gem level. The issue is very rare in MS67, however.

This spectacular Plus-graded Superb Gem displays lustrous orange-gold surfaces imbued with traces of light tan. The design elements are well-struck, and each side is free of significant abrasions. A small mark in the middle of the eagle's tail may help to identify this piece. Population: 10 in 67 (1 in 67+), 1 finer (7/16). NGC ID# 28GF, PCGS# 8852

## 1908 Indian Eagle, MS65 Low-Mintage No Motto Issue

**4322 1908 No Motto MS65 PCGS.** The design of the Indian eagle was modified to include the motto IN GOD WE TRUST in 1908. The Philadelphia Mint only produced 33,500 No Motto ten dollar gold pieces before switching to the new type. Despite the limited production figure, the 1908 No Motto is not too difficult to locate in lower Uncirculated grades, but examples in MS65 condition are rare.

This impressive Gem exhibits sharply detailed design elements, with fine detail in the feathers of the eagle's wing. The well-preserved orange-gold surfaces display vibrant mint luster throughout. A single, small alloy spot is evident in the field, near the date. Population: 28 in 65, 16 finer (6/16).

**From The Conch Collection.** NGC ID# 28GG, PCGS# 8853

## 1908-D Indian Eagle, MS64 Condition Rarity in Finer Grades

**4323 1908-D No Motto MS64 PCGS.** The 1908-D No Motto Indian eagle is an underrated issue, from a small mintage of 210,000 pieces. The 1908-D also represents the only issue of the short-lived No Motto design from the Denver Mint, an important consideration for mintmark type collectors. The 1908-D is scarce in lower Mint State grades and very rare above the MS64 grade level.

This attractive Choice example is well-detailed, with just a touch of the typical softness on the central obverse. The vivid orange-gold surfaces show a few hints of rose, with unusually vibrant mint luster. Eye appeal is terrific. Population: 51 in 64 (4 in 64+), 8 finer (6/16).

**From The Conch Collection.** NGC ID# 28GH, PCGS# 8854

### 1908 Indian Eagle, MS66 First-Year With Motto Type Coin

**4324 1908 Motto MS66 PCGS.** The 1908 Indian eagle is a popular date for type collectors. It has the highest overall survival of any With Motto issue before 1910, particularly in Gem condition. IN GOD WE TRUST was first incorporated into the ten dollar gold piece design in 1866, because of religious sentiment that followed the bloodshed of the Civil War, but when Saint-Gaudens' Indian Head design debuted in 1907, the motto was omitted at the will of President Roosevelt. He wrote in November 1907:

"My own feeling in the matter is due to my very firm conviction that to put such a motto on coins, or to use it in any kindred manner, not only does no good but does positive harm, and is in effect irreverence, which comes dangerously close to sacrilege."

Congress reacted to the omission of the motto with disapproval, and in mid-1908 passed legislation that actually mandated IN GOD WE TRUST appear on all U.S. coins of a physical size large enough to accommodate it.

This Premium Gem example of the debut With Motto Indian eagle displays a sharp strike and vibrant yellow-gold luster. The obverse is virtually pristine, but a few trivial grazes on the reverse account for the grade. Eye appeal is superb. Population: 35 in 66, 9 finer (6/16). NGC ID# 28GJ, PCGS# 8859

### 1908-D Motto Indian Eagle, MS65 Surprisingly Challenging in High Grade

**4325 1908-D Motto MS65 PCGS.** Ex: Harbor View. A substantial mintage of 836,500 Indian eagles was struck at the Denver Mint in 1908 after the Mint switched to the new design with the motto IN GOD WE TRUST on the reverse. Paradoxically, the 1908-D Motto is one of the most challenging issues of the series in high grade. Of course, branch mint type collectors prize the 1908-D as the first year of the Motto design.

The present coin is an attractive Gem, with well-detailed design elements and vibrant mint luster throughout. Only the most insignificant signs of contact are present and eye appeal is top-notch. Population: 13 in 65, 9 finer (6/16).

**From The Conch Collection.** NGC ID# 28GK, PCGS# 8860

## 1908-S Indian Ten, MS64 First Year With Motto

**4326 1908-S MS64 PCGS.** The low mintage of the 1908-S eagle was a shade less than 60,000 coins, but there are some remarkably high-grade survivors, and it is an extremely well-produced issue overall. This near-Gem shows the bold strike typical of the issue, with flashy luster and the strong eye appeal that usually characterizes the 1908-S. The surfaces are mostly apricot-gold. The cheek of Liberty is fairly clean and free of all but a couple of small marks, and a few small ticks appear on the reverse as well, on the upper eagle's wing. From the first year of the Motto design. Population: 38 in 64 (2 in 64+), 36 finer (6/16).

**From The Conch Collection.** NGC ID# 28GL, PCGS# 8861

## 1909 Eagle, MS65 Underrated and Conditionally Rare

**4327 1909 MS65 PCGS. CAC.** The 1909 eagle is far scarcer in Gem Mint State than any of the 1910 to 1915 tens, and it ranks behind only the 1907 Wire Edge and 1907 Rolled Edge varieties as well as the rare 1933 in terms of overall series scarcity. This example is clearly near the upper end of the Gem category with problem-free, sharply struck surfaces and radiant cartwheel mint luster. The medium-gold color flashes reddish-orange and lime-green highlights when rotated in light.

Obvious abrasions or marks are nowhere to be found. A few microscopic ticks on the highest points of the eagle are noted but they are require a strong glass and do not detract in the least. The strike is sharp on the headdress and eagle's plumage, with slight blending on a few hair strands but these, too, are minor. Simply put, this is a magnificent Gem eagle worthy of a bold bid. CAC endorsed. Population: 18 in 65 (1 in 65+), 11 finer. CAC: 5 in 65, 2 finer (6/16).

**From The Conch Collection.** NGC ID# 28GM, PCGS# 8862

### 1909-D Indian Eagle, MS65 Underrated Issue in High Grade

**4328 1909-D MS65 PCGS.** The 1909-D Indian eagle claims a mintage of 121,540 pieces but the issue is surprisingly difficult to locate in high grade. PCGS has graded only four examples in MS65, with six finer, while NGC has certified five specimens at the Gem level, with four finer (6/16). Even these small totals may include some resubmissions and crossovers. The elusive nature of the 1909-D in high grade is not generally recognized, outside of series specialists.

The present coin is a delightful Gem, with sharply detailed design elements and vibrant, frosty mint luster on both sides. The pleasing orange-gold surfaces are well-preserved and overall eye appeal is outstanding. This coin should find a home in a fine collection of Indian gold. NGC ID# 28GN, PCGS# 8863

### 1909-S Indian Eagle, MS64+ Seldom Encountered in Finer Grades

**4329 1909-S MS64+ PCGS. CAC.** The 1909-S Indian eagle claims a moderate mintage of 292,500 pieces, but examples in Mint State condition were quite elusive before the issue surfaced in a hoard in the late 1970s. Unfortunately, the hoard coins were mostly lower grade Uncirculated examples, so the 1909-S remains very scarce at the MS64 grade level.

This Plus-graded Choice specimen offers well-detailed design elements and well-preserved surfaces with no large or distracting flaws. The pleasing orange-gold surfaces display vibrant mint luster with outstanding eye appeal. Population: 60 in 64 (5 in 64+), 31 finer. CAC: 12 in 64, 8 finer (6/16).

**From The Conch Collection.** NGC ID# 28GP, PCGS# 8864

## 1910 Indian Ten Dollar, Very Scarce MS66 Impressive Color and Luster

**4330 1910 MS66 PCGS.** Typically well-produced and attractive, the 1910 eagle is scarce (but not rare) in Mint State grades through MS65. Any finer, the 1910 is conditionally rare. The issue seldom appears at auction in Premium Gem or finer grades, meaning the present coin is sure to capture the interest of ten dollar specialists not only for its high numeric grade, but also for the vibrancy of its surfaces.

The finely textured fields and devices are normal for Philadelphia tens, but they seldom display the deep frosty luster of this coin. The strike is pinpoint-sharp while bagmarks — the bane of the issue — are nearly unseen on this coin. A wispy mark on the cheek and a couple of tiny contacts on and near the eagle's wing are imperceptible in-hand. Greenish-gold and orange highlights flash across the attractive surfaces. Population: 25 in 66 (1 in 66+), 3 finer (6/16).

**From The Conch Collection.** NGC ID# 28GR, PCGS# 8865

## 1910-D Indian Eagle, MS66 Well-Produced and Well-Preserved

**4331 1910-D MS66 PCGS.** The 1910-D eagle is an extremely popular issue, one of the better-produced and overall better-preserved mintmarked dates within the Indian Head series. It also makes a great type coin acquisition, given that its production qualities lead to a relative abundance of survivors in high grade. This Premium Gem example boasts sumptuous luster over beautiful reddish-orange surfaces that exhibit a bold strike throughout. This grade level is essentially the finest obtainable, as PCGS has certified only three coins numerically finer. Population: 44 in 66 (9 in 66+), 3 finer (6/16).

**From The Conch Collection.** NGC ID# 28GS, PCGS# 8866

### 1911-D Indian Eagle, MS62 Low-Mintage Condition Rarity

**4332 1911-D MS62 PCGS.** With a minuscule mintage of 30,100 pieces, the 1911-D Indian eagle is the leading condition rarity of the series. Even in lower Mint State grades the 1911-D is seldom encountered, and the issue is very scarce in grades above MS62.

The obverse of this attractive MS62 example is sharply detailed, but a touch of the usual softness is seen on the leading edge of the eagle's wing and leg feathers. The lustrous orange-gold surfaces show the minimum number of minor contact marks for the grade and visual appeal is quite strong. Population: 79 in 62, 56 finer (6/16).

**From The Conch Collection.** NGC ID# 28GU, PCGS# 8869

### 1911-D Ten Dollar, MS63 'Undisputed Condition Rarity'

**4333 1911-D MS63 PCGS.** The 1911-D enjoys the lowest mintage in the Saint-Gaudens ten dollar series by more than 20,000 coins. Although not a melt rarity like some late-date emissions, this Denver issue is the "undisputed condition rarity in the series," to quote Garrett and Guth's *Gold Encyclopedia*. PCGS has seen 178 Uncirculated submissions, with the most frequently awarded grade being MS62. Virtually all examples fall within the MS61 to MS63 range. The service reports 18 higher grading events (7/16), but years can pass before anything finer than this comes up for sale.

Rose and green-gold hues accent light orange-gold surfaces that glimmer softly with satin luster. Detail is notably bold on the two lowest headdress feathers, while the hair strands and eagle's shoulder tip show a hint of incompleteness. Small marks on the cheek and in the lower obverse field define the grade. Still, this Select offering will hold a place of considerable importance in a fine set of Indian Head eagles. NGC ID# 28GU, PCGS# 8869

## 1911-S Indian Eagle, MS66 Top-Grade Rarity, Remarkable Color

**4334 1911-S MS66 PCGS Secure.** Ex: Kutasi. The 1911-S Indian ten is elusive in all Mint State grades, but the present Premium Gem example is at the top of the ladder. This piece is tied with just 11 others as the finest known of the issue. The 1911-S eagle had a mintage of only 51,000 pieces — the second-lowest in the With Motto portion of the series. Most known examples of this issue grade in the XF-AU range or at the low end of the Mint State category. Mike Fuljenz, in *Indian Gold Coins of the 20th Century* (2010), writes: "PCGS has graded nine examples of this date in MS66 with none better but it is unlikely that this many superb pieces actually exist." Our Auction Archives show only nine previous offerings of a Premium Gem example, including two previous appearances of this piece and duplicate appearances of at least one other example. The last top-grade 1911-S ten that we handled was a PCGS coin in the Chicago Signature sale (Heritage, 8/2011), which realized \$38,812.50.

The present example displays a bold strike and glistening mint luster that glows in the beautifully preserved fields. Only a few faint grazes below Liberty's chin and near the final A in AMERICA prevent an even finer designation. Each side displays vivid rose, lavender, and tangerine-gold hues, delivering exceptional eye appeal. Population: 10 in 66, 0 finer (6/16).

Ex: Baltimore Signature (Heritage, 7/2003), lot 10534; The Kutasi Collection / FUN Signature (Heritage, 1/2007), lot 3175.

**From The Conch Collection.** NGC ID# 28GV, PCGS# 8870

## 1912-S Ten Dollar, MS64+ Rarely Encountered Finer

**4335 1912-S MS64+ PCGS. CAC.** The 1912-S is a better date in Uncirculated condition, and most such pieces grade MS63 or lower. At the Choice level, this issue is scarce, and finer examples are rare. The present Plus-graded, CAC-endorsed near-Gem balances on the threshold between affordability and superior quality. A few stray grazes prevent the Gem designation, but the preservation is far finer than is typical for the MS64 level. The strike is sharp, and the satiny yellow-gold surfaces offer pleasant luster. This is a coin that will fit in well with a Gem-quality collection. Population: 77 in 64 (23 in 64+), 14 finer. CAC: 24 in 64, 3 finer (6/16).

**From The Conch Collection.** NGC ID# 269G, PCGS# 8872

### 1913-S Indian Ten Dollar, MS63 Linchpin Key to a High-Grade Set

**4336 1913-S MS63 PCGS.** Exceeded only by the 1911-D in scarcity at the Select Uncirculated or finer grades, the 1913-S lives up to its reputation as a high-grade series key. Just 66,000 pieces were struck at the San Francisco Mint. Blazing luster radiates from this example's orange-gold surfaces, which are richly frosted and only lightly marked for the grade. The portrait and headdress are fully brought up, as is the eagle's feather definition.

The 1913-S is almost always abraded. While this example shows scattered tiny contacts, there are no individually distracting marks and the eye appeal is exceptional. We seldom see a 1913-S with the visual allure of the present Select coin. Population: 27 in 63, 17 finer (6/16).

**From The Conch Collection.** NGC ID# 28GZ, PCGS# 8874

### 1914 Indian Eagle, MS67 Condition Census Rarity

**4337 1914 MS67 PCGS.** "Although generally perceived as another common Philadelphia Mint issue, the 1914 is scarcer than generally believed": Thus begins Mike Fuljenz's narrative on this issue in *Indian Gold Coins of the 20th Century*. The date is particularly rare above the Gem grade level. The grading services list 26 pieces in MS66 or MS66+, but with only 11 appearances of such a coin at auction in our Permanent Auction Archives, including reappearances of previously offered examples, one begins to question the accuracy of the certification data. In MS67 — the finest grade achieved — PCGS lists three coins and NGC one (6/16). Only one of these has ever appeared in our auctions, being sold 14 years ago to the tune of \$23,000. The most recent auction record we have for a high-end 1914 eagle is a PCGS MS66+ example in lot 4807 of the Central States Signature sale (Heritage, 4/2016), which realized an impressive \$44,650. The present coin surpasses that piece in technical quality and eye appeal. The strike is bold, and the satiny, unabraded surfaces are vibrantly lustrous. The original yellow-gold surfaces glisten when rotated beneath a light.

**From The Conch Collection.** NGC ID# 28H2, PCGS# 8875

## 1914-D Ten Dollar, MS65 Sharply Struck and Richly Lustrous

**4338 1914-D MS65 PCGS.** While the 1914-D is generally considered an available branch mint eagle for type, it suddenly becomes scarce in Gem Mint State or finer conditions. Much of the 343,500-piece mintage was exported, and some pieces were melted during the Gold Recall. Overall, few examples were preserved in the finest grades.

This MS65 coin survived with fulsome, frosty luster and a sharp strike. The finely granular surfaces add to the intense cartwheel luster, with few abrasions visible anywhere in the fields. A couple of small ticks on the cheek require magnification but do not detract from the all-encompassing eye appeal. Population: 27 in 65 (1 in 65+), 9 finer (6/16).

**From The Conch Collection.** NGC ID# 28H3, PCGS# 8876

## 1914-S Ten Dollar, MS64 Better Date in High Grade

**4339 1914-S MS64 PCGS.** Few Indian eagles rival the 1914-S issue for eye appeal, while the 208,000-piece mintage yields an adequate supply for collectors through the MS63 grade. Any finer, the issue is a serious challenge for collectors. This example is a Choice representative with visual impact that exceeds its technical grade. Sun-gold surfaces radiate cartwheel mint luster beneath olive-green overtones. The reverse is especially colorful, adding orange and lemon-yellow colors to the palette.

Fully frosty and lustrous with sharp design elements, a few light lines and marks in the left obverse field and some ticks on the cheek account for the assigned near-Gem grade. Nevertheless, few 1914-S eagles exceed this example in charisma, and it will fit seamlessly in any high-grade Indian gold or type set. Population: 66 in 64 (3 in 64+), 13 finer (6/16).

**From The Conch Collection.** NGC ID# 28H4, PCGS# 8877

### 1915-S Indian Eagle, MS64 Underrated Low-Mintage Issue

**4340 1915-S MS64 PCGS. CAC.** The 1915-S ten dollar has the second lowest mintage (59,000 pieces) of all Indian eagles struck at the San Francisco Mint. Most examples are seen through the AU55 grade level. Uncirculated coins through MS62 can be found with patience and searching while Select and near-Gem pieces are scarce. MS65 and finer specimens are highly elusive. PCGS and NGC combined have graded 35 coins in MS64 and just 12 pieces finer (5/16).

Radiant luster emanates from both sides of this yellow-gold near-Gem and a solid strike leaves excellent definition on the design features, though the eagle's shoulder shows some softness. A few light marks and scuffs are visible, more so on the reverse. All in all, this piece yields pleasing eye appeal. Population: 23 in 64 (1 in 64+), 8 finer. CAC: 4 in 64, 3 finer (5/16).

**From The Conch Collection.** NGC ID# 28H6, PCGS# 8879

### 1916-S Ten Dollar, MS64 Frosty Texture, Brassy-Gold Surfaces

**4341 1916-S MS64 PCGS.** A brassy-gold example with soft mint luster glowing beneath a bold San Francisco Mint strike. The 1916-S was the final eagle produced for the duration of the war-torn decade. Orange accents join a faint-green tinge across the obverse and fine granularity adds faceted appeal to this near-Gem ten. Most 1916-S examples show numerous abrasions that limit the grade, and the present coin has a few minor marks, yet the reverse displays particularly nice luster and smooth surfaces that enhance the orange-gold highlights.

Just 138,500 pieces were struck. Scarce in Select or finer Mint State, the 1916-S is the final affordable S-Mint eagle given the rarity of the 1920-S and 1930-S. Slight blending at the eagle's shoulder and forward talon are seldom sharp for the issue. Population: 40 in 64 (3 in 64+), 23 finer (6/16).

**From The Conch Collection.** NGC ID# 28H7, PCGS# 8880

## LIBERTY DOUBLE EAGLES

### 1852-O Twenty Dollar, MS60 Among the Finest Known

**4342** 1852-O MS60 PCGS. *Variety 1*. In the Type One series of twenties, the 1852-O is the second most available O-mint. It is occasionally available in Choice AU, but is rarely seen finer. One of the problems in locating an 1852-O is finding a piece that lacks the heavily abraded surfaces seen on most survivors. This coin certainly qualifies in that regard. The strike details on this piece are surprising strong also; the only area of weakness is the usual one at the top of Liberty's head. The surfaces are remarkably clean and there is still a glimmer of semiprooflikeness surrounding the devices on each side. Of the 1000-1250 pieces estimated known in all grades, only 15-20 Uncirculated coins are estimated extant. Population: 5 in 60, 12 finer (7/16). NGC ID# 268L, PCGS# 8907

### 1853/2' Double Eagle, AU58 Blatantly Original

**4343** 1853/2' FS-301 AU58 NGC. CAC. Die diagnostics of the 1853/2' double eagle include a raised die dot below the R in LIBERTY, repunching on the 1 in the date, and what may be the remnants of a 2 within the lower loop of the 3. There is an ongoing debate as to the nature of this variety, whether or not it is a true overdate. Doug Winter believes that it is, and the variant remains listed in the *Cherrypickers' Guide*. Origins of the variety aside, researchers agree that examples are decidedly rare. This near-Mint No Motto double eagle has blatantly original orange-gold surfaces with distinct khaki-gold elements. Considerable luster remains in the protected regions. Typically struck with minor marks throughout. Census: 45 in 58, 5 finer (6/16). NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

**1856-S Liberty Twenty, MS62**  
**Outstanding Type One**  
**Example in High Grade**

**1856-S Twenty Dollar, MS62**  
**Ex: S.S. Central America**  
**Full Serif, Left S, Variety 17B**

**4344** 1856-S MS62 PCGS Secure. In 1856, the San Francisco Mint was hard at work producing double eagles, and it exceeded the million-coin mark for the first time. Although S-mint twenties were being struck en masse, most pieces entered into circulation on the West Coast, and mint condition representatives were rare prior to the discovery of the Fort Capron Hoard in the early 1970s and the S.S. *Central America* in 1988.

This Uncirculated example boasts lustrous orange-gold surfaces with mint-green accents and moderate granularity, probably indicative of a seawater coin. The design motifs are boldly defined with full star centers. A few wispy grazes are scattered over each side, but they are undistracting. Population: 18 in 62, 13 finer (6/16). NGC ID# 2692, PCGS# 8919

**4345** 1856-S MS62 PCGS. CAC. Variety 17B. Ex: S.S. *Central America*. SSCA 5143. The "Full Serif, Left S" die variety, as assigned by SSCA numismatist Robert Evans. The U in UNITED has a complete left serif, and the mintmark is entered somewhat left, relative to the N in TWENTY directly below. Evans assigned 28 different varieties of '56-S twenties, with the present die pair in 11th place relative to the quantity recovered from the shipwreck by Tommy Thompson's expedition. This is a sharply struck and highly lustrous example that boasts pleasing and consistent orange-gold color. Marks are much fewer than expected for the MS62 level, particularly on the reverse. Housed in a gold label holder. NGC ID# 2692, PCGS# 8919

**1857-S Double Eagle, MS64  
Semiprooflike, 'Spiked Shield'**

**4346** 1857-S MS64 PCGS. Variety 20A. Ex: S.S. Central America. SSCA 3728. The "Spiked Shield" variety, familiar to specialists due to its prevalence in high grade within the recovered SSCA bounty. A fully struck peach-gold representative with myriad die polish lines on the obverse field, as coined. The surfaces are semiprooflike and exhibit minimal marks. Housed in a gold label holder. Included with the lot is a brown faux Ship of Gold book and a certificate of authenticity signed by Tommy Thompson, leader of the Columbus-America Discovery Group, the nautical expedition that first recovered the shipwreck circa-1989. NGC ID# 2696, PCGS# 8922

**1857-S Double Eagle, MS65  
From the S.S. Central America Treasure  
Spiked Shield Variety**

**4347** 1857-S MS65 PCGS. Variety 20A. Ex: S.S. Central America. SSCA 0780. Scientist Bob Evans had plenty of time on his hands off the coast of North Carolina during the S.S. Central America recovery operations. With literally thousands of 1857-S double eagles recovered, he set about studying the reverse for die varieties. More than 5,000 of these treasure pieces appear in the PCGS Population Report, representing eight different reverse variants. More than 40% of those coins are the Spiked Shield variety offered here, and for that reason this is the perfect variety to represent the 1857-S in a date or type set. This Gem has fully brilliant and highly lustrous yellow surfaces with peripheral lemon-yellow patina. The surfaces are exceptional with only trivial, grade-consistent marks. An impressive piece for a high level Liberty double eagle collection. Housed in a green label holder. NGC ID# 2696, PCGS# 8922

**1858 Double Eagle, MS61  
Underrated No Motto Issue  
Lovely CAC-Endorsed Example**

**4348 1858 MS61 PCGS. CAC.** This issue has the second-lowest mintage among Philadelphia twenties struck during the denomination's first decade of production (211,714 coins). Doug Winter's [doubleeaglebook.com](http://doubleeaglebook.com) estimates 800 to 1,000 examples survive in all grades, but only 20 to 30 pieces remain in Mint condition. Boldly struck devices showcase strong detail on the stars and the central reverse. Liberty's upper and lower curls are a tad soft, but that is expected. Rose-gold surfaces display glimpses of green coloration in the obverse fields, and frosty luster rolls over each side. There are a couple of prominent ticks on Liberty's cheek, and a reeding mark between the U in UNITED and the T in TWENTY. Other abrasions are small and unimportant. A marvelous example of this underrated Type One issue. Population: 8 in 61, 8 finer (6/16). NGC ID# 2697, PCGS# 8923

**1859 Double Eagle, AU50  
Gold CAC-Approved**

**4349 1859 AU50 PCGS. Gold CAC.** The Philadelphia Mint halted production after just 43,597 double eagles were minted, and that was the lowest production of any Type One issue at the Pennsylvania coin factory. Of course, survivors are rare, with only 96 PCGS certified examples in all grades. This pleasing AU piece is housed in an old green-label holder and exhibits wisps of pale blue toning on its rich honey-gold surfaces. Both sides have the usual grade-consistent handling marks, but none are singularly apparent. Population: 13 in 50, 53 finer. Gold CAC: 1 in 50, none finer (6/16). This is the only 1859 double eagle to receive a Gold CAC sticker. NGC ID# 269A, PCGS# 8926

**1863-S Twenty Dollar, MS61  
Scarce in Uncirculated Grades**

**4350** 1863-S MS61 PCGS. Breen-7217. Small S. The double eagle was, in practice, the unit of account in the West Coast economy. The coins were struck in considerable number by the San Francisco Mint, but all went into commerce, and none were saved for numismatic purposes until decades later. The 1863-S is known in Mint State, since some emerged from the *S.S. Republic* shipwreck, and other pieces were likely early arrivals in the burgeoning foreign bank holdings of U.S. gold coins. U.S. paper money was held in little regard overseas during the Civil War, and imports had to be purchased with gold coin. Nonetheless, examples such as the present piece with ample luster, original apricot color, and relatively few bagmarks, are very scarce and in demand. Population: 30 in 61, 22 finer (7/16). NGC ID# 269R, PCGS# 8940

**1864-S Double Eagle, MS63  
Condition Census Quality  
Ex: *S.S. Brother Jonathan***

**4351** 1864-S MS63 NGC. Ex: *Brother Jonathan*. Most high-end examples of the 1864-S double eagle owe their survival to the salvaged treasure of the *S.S. Brother Jonathan* and *S.S. Republic* shipwrecks. Garrett and Guth, in their *Gold Encyclopedia*, write: "The *SS Brother Jonathan* contained 108 of these coins, which ranged in grade from AU to MS-63." The present piece is not only one of the finest representatives of the shipwreck find, it is also within the Condition Census for the issue. NGC and PCGS combined have seen only 12 submissions in MS63 and finer condition, including possible duplication. This piece is in an older NGC holder with the *Brother Jonathan* pedigree. The strike is sharp, and the frosty orange-gold surfaces yield rich luster. Some faint grazes on the cheek and in the adjacent field are the only grade-limiting flaws, although their visual impact is trivial. At least one of the two finer NGC coins is from the *S.S. Republic* treasure. Census: 7 in 63 (1 in 63 ★), 2 finer (6/16). NGC ID# 269T, PCGS# 8942

### 1865-S Twenty Dollar, MS64

**Ex: S.S. *Brother Jonathan***

**4352 1865-S MS64 PCGS.** Ex: *Brother Jonathan* 482. The *S.S. Brother Jonathan* was a paddle steamer that sank off the coast of California in late July 1865, while carrying a payload of freshly minted double eagles from the San Francisco Mint. In recent years, more than 500 1865-S twenties were salvaged from the shipwreck, accounting for the majority of the high-grade pieces known today. Prior to the salvage of the *S.S. Brother Jonathan* and the *S.S. Republic* (another sunken ship that carried a payload of gold), it was difficult to find an 1865-S double eagle that graded better than XF.

This Choice Mint State shipwreck coin displays the frosty, glowing orange-gold luster common to shipwreck-salvaged U.S. gold pieces, while also exhibiting impressively well-preserved surfaces. The strike is sharp, and the eye appeal is outstanding. PCGS lists 24 finer submissions (6/16). NGC ID# 269V, PCGS# 8944

### 1867 Twenty Dollar, MS62

**Popular Type Two Issue**

**4353 1867 MS62 PCGS.** The 1867, along with the 1872, are among the most frequently encountered Type Two issues. They can occasionally be found in lower Uncirculated grades, but are very rare any finer. A case in point is this issue: In MS62 PCGS has certified 52 pieces, but only two are finer; the situation is no better for NGC-certified pieces with 41 coins certified in MS62 and a mere three finer (7/16). This is a bright yellow-gold example with just a trace of reddish patina present and mild reflectivity in the fields. A few abrasions on the obverse account for the grade, but a loupe will be required to find the tiny marks on the reverse. NGC ID# 269Z, PCGS# 8951

**1867-S Double Eagle, MS61  
Mint State Rarity**

**4354 1867-S MS61 NGC.** The 1867-S double eagle is a recognized rarity in Mint State, as is seen by even a glance at the certified population data. But it may actually be rarer in Uncirculated condition than generally thought. The combined NGC and PCGS census reports 52 Mint State representatives but this likely includes numerous resubmissions. In the last two-plus decades, we have handled only 13 Uncirculated coins, including some reappearances of previously offered pieces — none graded finer than MS61. This piece is vibrantly lustrous with yellow-gold surfaces that show warm peach and orange overtones. Scattered abrasions limit the grade but none are individually obtrusive. Eye appeal is pleasing. Census: 16 in 61, 9 finer (7/16). NGC ID# 26A2, PCGS# 8952

### 1869 Liberty Double Eagle, MS64+ Conditionally Rare Type Two Issue Near the Top of the Condition Census

**4355 1869 MS64+ PCGS.** From a mintage of 175,155 pieces, the 1869 Liberty twenty is the “second rarest Type Two double eagle struck at the Philadelphia Mint during the 1860s” according to Mike Fuljenz and Doug Winter. Like most Type Two twenties, the 1869 circulated heavily near the time of issue and very few were saved by contemporary collectors. Collecting large-denomination gold coins would not become popular in this country until the late 1930s, as the face value of each individual coin represented a large sum of money in the 19th century. Few collectors could afford to tie up enough cash to complete an extensive date run of double eagles, and the ones who could were usually satisfied to obtain a proof example from the Mint every year to update their collections. Today, the 1869 is easily located in VF-XF grades, but Mint State examples are very rare.

The 1869 double eagle was a well-produced issue, with better detail in Liberty’s hair and sharper star radials than on many earlier issues. This may have been the work of William Barber, who succeeded James Barton Longacre as chief engraver in 1869. This coin is near the top of the Condition Census for the issue, as PCGS has graded two coins in MS64+, a single example in MS65, and none finer. NGC has graded no coin better than MS63 (7/16). The MS65 specimen is the coin that was once featured in Norman Stack’s type set. It brought a record price of \$299,000 when it was offered in lot 3319 of the FUN Signature (Heritage, 1/2008). The other MS64+ example is the coin from the famous Harry Bass Collection. We do not know of any prior appearances of the present coin. It has apparently been off the market for some time and should be a surprising treat for advanced collectors.

This coin exhibits razor-sharp definition on all design elements and the well-preserved orange-gold surfaces are remarkably free of mentionable flaws. Both sides are awash in vibrant mint luster and overall eye appeal is truly extraordinary. This coin should find a home in the finest collection or Registry Set. NGC ID# 26A5, PCGS# 8955

## 1870 Type Two Twenty, MS61 Challenging Philadelphia Issue

**4356 1870 MS61 PCGS.** The 1870 Liberty double eagle claims a fairly low mintage of 155,150 pieces, and the issue is definitely ranks among the better Philadelphia dates. Like most Type Two twenties, the 1870 circulated widely and few examples were saved for numismatic purposes. The 1870 is particularly elusive in Mint State condition.

The lustrous, medium yellow-gold surfaces of this attractive MS61 double eagle show the minimum number of minor contact marks for the grade. Well-detailed design elements exhibit just a touch of softness over Liberty's hair. Population: 19 in 61, 22 finer (6/16). NGC ID# 26A7, PCGS# 8957

## 1872-CC Twenty Dollar, AU55 Scarce Early Carson City Issue

**4357 1872-CC AU55 NGC. Variety 1-A.** Double eagle coinage at the Carson City Mint was minimal through 1873, making these early issues elusive in high grade. The 1872-CC had a mintage of only 26,900 coins, most of which has been lost to attrition. This date is exceedingly rare in Mint State, and appealing AU examples are themselves scarce. The present Choice AU representative displays bold motifs and retains hints of luster in the protected regions of the fields. Moderate surface chatter appears on each side, including some noticeable abrasions. Early Carson City double eagles typically come heavily abraded, particularly when examined in the AU grade range. This piece has pleasing appeal considering the issue's reputation. NGC ID# 26AE, PCGS# 8964

### 1881 Liberty Double Eagle, MS60 Low-Mintage Philadelphia Issue Overlooked Mint State Rarity

**4358 1881 MS60 PCGS Secure.** During the 1880s, the Philadelphia Mint followed a policy of encouraging the use of small-denomination gold coins in the national economy. As a result, Philadelphia mintage of double eagles was minimal for most of the decade, starting in 1881. A meager mintage of 2,199 Liberty double eagles was accomplished that year and all were released into circulation near the time of issue. It seems that none were saved for numismatic purposes, as the 1881 is very rare in Mint State and unknown in grades above MS62 (6/16). Jeff Garrett and Ron Guth estimate the surviving population at fewer than 40 examples in all grades.

Few 19th century collectors could afford to collect date runs of double eagles, as the face value of each coin represented a significant amount of money in that era. The few wealthy collectors who did collect twenty dollar gold pieces were usually satisfied with ordering a single proof from the Mint every year to update their collections. Collecting large denomination gold coins was never popular in this country until after the Gold Recall of 1933, when astute numismatists realized that a collection of double eagles was one of the few remaining legal methods of investing in gold. As a result, the 1881 double eagle was rarely seen in public auctions before the 1940s. The rarity of the 1881 double eagle was not appreciated during that era, and it remains somewhat overlooked today.

The present coin is an attractive Mint State specimen, with well-detailed design elements and pleasing orange-gold surfaces that show the expected number of minor contact marks for the grade. The fields display prooflike reflectivity throughout, no doubt because of the small mintage. This coin is somewhere at, or near, the bottom of the Condition Census for the issue, as both PCGS and NGC have graded three specimens in finer numeric grades, possibly including some resubmissions and crossovers. Housed in a new 30th Anniversary green holder. Population: 1 in 60, 3 finer (6/16). NGC ID# 26BC, PCGS# 8994

## 1884-CC Double Eagle, MS61 Razor-Sharp Strike

**4359 1884-CC MS61 PCGS. Variety 1-A.** The Carson City origin of this double eagle issue accounts for ever-strong demand for examples across all grade levels. With a mintage of 81,139 coins and a survival rate of approximately 3,000 coins, most collectors can obtain a representative in some form or another with a little patience. However, it will require more than patience to procure a Mint condition example. Uncirculated 1884-CC twenties are very scarce, particularly in relation to the interest in them. This frosty MS61 double eagle showcases full stars and crisp hair strands. Rose-gold surfaces exhibit an expected number of scattered abrasions, but they are unobtrusive. NGC ID# 26BK, PCGS# 9001

## 1884-CC Twenty Dollar, MS62 Conditionally Scarce

**4360 1884-CC MS62 NGC. Variety 1-A.** In addition to the challenge of a complete Carson City collection, CC-mint double eagles are heavily sought as type coins. The 1884-CC is among the more plentiful dates from this mint, suitable for type purposes. Uncirculated examples, however, usually come heavily abraded and grade no finer than MS61. In MS62, this issue is scarce, and finer coins are rare. The present representative displays razor-sharp design elements with vibrant, frosty yellow-gold luster. Light, scattered grazes on the obverse limit the grade, but the eye appeal is hardly affected. An important opportunity to acquire a Mint State Carson City double eagle in a grade finer than is typically seen. Census: 50 in 62, 6 finer (6/16). NGC ID# 26BK, PCGS# 9001

### 1889-CC Double Eagle, MS61 Charm of the Old West

**4361 1889-CC MS61 PCGS.** This cataloger recently visited Carson City and nearby Virginia City, Nevada, and witnessed the charm of the old west that is represented by this lovely Mint State double eagle. Virginia City, especially, retains much of its authentic historic charm. The Carson City Mint produced 30,945 double eagles in 1889, all from a single die pair. Mint State survivors are elusive, with just 140 such pieces certified by PCGS, and more than half of those grading just MS60 or MS61. That service has only examined 63 coins in higher grades, including 56 that grade MS62, six in MS63, and a single MS64. This lovely example has brilliant and fully lustrous mint frost with scattered marks primarily on the obverse. The reverse, if graded separately, would likely enjoy an MS63 assessment. According to the PCGS Price Guide, MS62 examples are priced 50% higher than MS61, and MS63 are double the MS61 price. This example that is graded MS61 provides an excellent combination of grade and price. NGC ID# 26BV, PCGS# 9011

### 1903 Liberty Double Eagle, MS66 Among the Finest Certified

**4362 1903 MS66 NGC.** The 1903 Liberty double eagle claims a nominal mintage of 287,270 pieces. Like other high-denomination gold issues of the time, the 1903 was primarily used in foreign trade or as currency reserves. Beginning after World War II, a number of coins surfaced in European and Central American holdings, increasing the supply of attractive specimens in today's market. The repatriated coins are often found in Mint State condition, but they usually exhibit some surface marks from rough storage and transport. At the MS66 grade level, the 1903 is a very rare issue.

The present coin is a remarkable Premium Gem, with sharply detailed design elements and well-preserved orange-gold surfaces that show only the most insignificant signs of contact. Vibrant mint luster radiates from both sides, adding to the outstanding eye appeal. Census: 12 in 66, 0 finer (7/16). NGC ID# 26CW, PCGS# 9043

## PROOF LIBERTY DOUBLE EAGLE

**1907-D Liberty Double Eagle, PR62**  
**Unique Branch Mint Proof**  
**Ex: Farouk**

**4363 1907-D PR62 NGC.** Only one branch mint proof double eagle is known to have been produced of the 1907-D, and that was on September 30, 1907. Undoubtedly, these coins were struck to commemorate the end of the long-running Coronet design, which was first struck for regular coinage in 1850.

For a mint that had only been in operation for two years, this coin shows that the Denver facility was able to produce a remarkably high-quality proof. It is, in fact, consistent in quality with proofs struck in the Philadelphia Mint in the early years of the 20th century. There is no contrast evident on either side, but many Philadelphia proofs showed no contrast either during this period, and none were purposely made that way beginning in 1902. Die polish is complete and covers all areas of the fields right up to the rims and all the devices, something that is not seen on all branch mint proof dollars from the New Orleans or Carson City mints. Close examination with a magnifier shows tiny lint marks that were struck into the coin, evidence that the dies were wiped with a cloth, and because of static electricity, some of the lint from the cloth adhered to the dies, thus being transferred onto the coin. As one would expect from a multiply struck proof, the design elements are completely brought up in all areas.

This piece was once a part of the King of Egypt's collection of coins. According to John Pittman, King Farouk had a conservator who cleaned his coins. Not all of Farouk's coins were cleaned, though, and we are unsure what criteria the "conservator" used to select the coins to be cleaned, but this piece was one of them. The surfaces are noticeably hairlined on each side. That said, the hairlining is just about the only detracting technical element keeping this coin from a higher grade. The only surface flaws worth mentioning are a vertical milling mark on Liberty's neck and a short planchet flaw in the field by star 12.

Branch mint proofs are among the rarest of the rare in U.S. numismatics. They are incompletely understood even by experts as so few pieces are known, and some grading services shy away from encapsulating certain issues. However, the coins speak for themselves, and it is apparent they were specially prepared and an attempt was made to produce a proof product that would be comparable to that struck in the Philadelphia Mint. This is a unique offering from the Denver Mint. It has been three years since this piece was offered at public auction, and it may be many more before it is offered again.

*Ex: Palace Collection / Farouk (Sotheby's, 2-3/1954), lot 184, part of a 34-coin lot; Kreisberg-Schulman (10/2/1959), lot 1844; Kreisberg-Schulman (2/1960), lot 2931; Ronnie Carr; Strong Museum (Stack's, 9/2001), lot 1041, where it brought \$34,500; FUN Signature (Heritage, 1/2004), lot 3227, where it brought \$71,875; FUN Signature (Heritage, 1/2013), lot 5944, where it brought \$188,000. PCGS# 800190*

## HIGH RELIEF DOUBLE EAGLES

### 1907 Twenty Dollar High Relief, MS63 Wire Rim, Softly Frosted Surfaces

**4364** 1907 High Relief, Wire Rim MS63 NGC. CAC. Augustus Saint-Gaudens' Sherman Monument was dedicated on May 30, 1903. The *New York Times* published a short article the next day describing what is now regarded as one of the artist's crowning achievements. Of the Angel of Victory, *The Times* noted:

"Instead of the palm of victory one prefers to consider the token in Victory's hand a laurel branch of peace, that being a nobler prize for such a high and strenuous endeavor. Once likes to think that by this angel and by what she proffers the sculptor means to symbolize a deeper thought than any conveyed by a Victory to the Greeks and Romans, the thought which animated so many millions of the North during those fateful years, the conviction that one great war once settled on the side of union would prevent a series of petty wars for the following century."

The statue of Victory, modeled after Saint-Gaudens' favorite model, Hettie Anderson, served as inspiration for the striding figure of Liberty on the twenty dollar gold coins issued four years later. Saint-Gaudens simplified the design, eliminating the wings and headdress, and added a torch to light the way toward a century of progress. Struck in high relief, it resembled the three-dimensional

figure of Victory from the Sherman Monument. The surfaces of this piece are remarkable, and differ somewhat from other High Relief twenties. Rather than the usual satin surface, this piece exhibits more of a soft, frosted appearance. Each side has the usual light reddish patina seen on most examples, and there are only the tiniest contact marks visible when examined with a loupe. NGC ID# 26F2, PCGS# 9135

Courtesy of the Saint-Gaudens National Historic Site

## 1907 Wire Rim High Relief Twenty, MS63 Rich Satiny Surfaces

**4365** 1907 High Relief, Wire Rim MS63 PCGS. Gold CAC. Theodore Roosevelt was particularly satisfied with the coinage designs of Augustus Saint-Gaudens. In later years, when he reflected on Saint-Gaudens' Sherman Monument at the entrance to Central Park and also the two gold coins the sculptor produced, he praised Saint-Gaudens for showing the soul within his subjects. He asserted the sculptor reflected more than just beauty; rather, they showed the spirit inside. This is especially difficult to achieve in a small format such as a coin. Saint-Gaudens began with greater-than-life models for the Sherman group, then plaster models reduced to 12 1/2-inches, and finally the fine sculptural details were transferred to the size of a double eagle. Reductions and transfers took a year and a half, but the results were spectacularly successful. The High Relief twenties are unquestionably the most artistically accomplished coins ever produced. This MS63 example fully brings forth all the sculptor wished to communicate on an artistic level to the American public. The strike details are complete in all areas, the reddish-tinged luster is rich and satiny, and there are no obvious or detracting contact marks present. In a green label holder. Combined Gold CAC for Wire Rim and Flat Edge: 2 in 63, 2 finer (7/16). NGC ID# 26F2, PCGS# 9135

## MCMVII Double Eagle, MS64 Wire Rim Variant

**4366** 1907 High Relief, Wire Rim MS64 PCGS. When one studies the works of Augustus Saint-Gaudens, it is remarkable how the striding figure of Liberty on the 1907 High Relief twenty is so similar to other monumental sculptural works Saint-Gaudens did over his lifetime. This would not be surprising to the art historian, but if the collector is only familiar with this one work by the sculptor it is remarkable how similar in pose and thematic presentation the figure of Liberty is to the figure of Victory leading General Sherman, The Pilgrim, even the wind-swept figure of Admiral Farragut. In each case, the central figure is striding forward, battling an unseen but well-known foe. The central figure on the High Relief twenty is posed similarly to these other monumental sculptures; yet the figure is not battling an unseen-foe, rather Liberty is boldly striding into the future — the future of the 20th century — a future that would become known as The American Century. The forward-looking figure of Liberty on the High Relief was struck in much higher relief than Charles Barber was comfortable with, and it was only accomplished by a direct presidential order. The satiny surfaces on this example are bright and show just the slightest reddish tinge of color. A few tiny contact marks can be seen with magnification; otherwise, the surfaces appear near perfectly preserved. NGC ID# 26F2, PCGS# 9135

### 1907 Double Eagle, High-End MS64 Wire Rim Variant

### 1907 High Relief, Wire Rim Twenty, MS65 Very Scarce in Finer Grades

**4367 1907 High Relief, Wire Rim MS64 NGC.** Theodore Roosevelt was intent on advancing the United States to a position of greatness on the world's stage. He brokered the truce between Russia and Japan (and won the Nobel Peace Prize), he sent the Great White Fleet around the world, began the digging of the Panama Canal, and regulated big business. But Roosevelt also wished to announce to the world that the United States had arrived culturally. One way to do this was to produce coinage that would project artistic greatness. Roosevelt had known sculptor Augustus Saint-Gaudens for several years before he invited him to the White House for dinner in December 1904. He was well aware of Saint-Gaudens' abilities, most recently displayed by the Sherman Group at the southern entrance to Central Park. Ultimately, Saint-Gaudens chose the figure of Liberty that was leading General Sherman as the model for his striding figure on the obverse of the twenty dollar gold piece. These large gold coins were produced in massive numbers until 1933 and were shipped worldwide for export payments. Each coin, even in its lowered relief version, was a reminder to whomever viewed it that the United States had indeed arrived as a cultural equal to the older, more established European powers. The High Relief twenties were undoubtedly the finest ambassadors of America's arrival on the artistic stage. This example is especially noteworthy for its clean surfaces and even reddish-tinted satiny luster. The strike details are strong throughout. The coin's wire rim, or "fin" in Mint parlance, is especially notable and almost complete around both sides. NGC ID# 26F2, PCGS# 9135

**4368 1907 High Relief, Wire Rim MS65 PCGS.** In 1907, soon after the release of the High Relief double eagles, the *American Journal of Numismatics* published an article entitled, "The New Gold Coinage." The lengthy essay addressed the historical importance of numismatic artistry from Ancient Greece and Rome to the early 20th century. The unknown author, identified only by the initial "M," wrote: "It has too long been a popular delusion that an artistic treatment of the types upon our national coinage is a matter of little consequence; that if these comply with the law that our gold and silver, and our minor coins as well, shall bear 'the emblem of liberty, that is enough.'" Augustus Saint-Gaudens' High Relief twenty dollar gold coins changed all that, ushering in what has been called "The Renaissance of American Coinage," a period that also saw the implementation of James Earle Fraser's Buffalo nickel, Adolph Weinman's Mercury dime and Walking Liberty half dollar, and Hermon A. MacNeil's Standing Liberty quarter. Presciently, the 1907 *A/N* article exclaimed, "The new issues of gold show that at least we are travelling in the right direction."

This delightful Gem exhibits sharply detailed design elements and the pronounced Wire Rim seen on most High Relief double eagles. Later in the year, this feature was eliminated by adjusting the dimensions and milling of the planchets. The pleasing orange-gold surfaces show no mentionable distractions, with vibrant mint luster on both sides. Eye appeal is terrific.

**From The Conch Collection.** NGC ID# 26F2, PCGS# 9135

## 1907 Saint-Gaudens Double Eagle, MS65 High Relief, Wire Rim

**4369** 1907 High Relief, Wire Rim MS65 NGC. Ex: Las Vegas Collection. The Saint-Gaudens High Relief double eagles served multiple purposes after their issuance late in 1907. Coins were sought-after as not only as numismatic collectibles and Christmas gifts, but also as speculative investment instruments. The new double eagles were distributed to banks and sub-Treasuries in limited quantities, and brokers took advantage of both the coins' scarcity and rampant public interest. According to the January 1908 edition of *The Nummatist*, "During the second week in December active trading in the new twenties was carried on in the various Curb Markets in the country, prices quoted ranged from \$26 to \$35. Telegraph and long distance telephone orders were executed on the N.Y. Curb for deliveries in other cities." Today, Saint-Gaudens' twenty dollar gold pieces trade hands with frequency, but the prices they achieve suggest far greater demand than the original supply of 12,367 coins could ever accommodate.

The present coin shows the usual fin, or wire rim, around the circumference of the coin, caused by metal being extruded through the tiny gap between the die and collar when the coin was struck. Most High Relief twenties display this feature. The design elements are sharply detailed and the lustrous orange-gold surfaces show no mentionable distractions. NGC has graded 32 numerically finer examples (6/16). NGC ID# 26F2, PCGS# 9135

## 1907 Saint-Gaudens Twenty, MS64 High Relief, Scarcer Flat Edge Type

**4370** 1907 High Relief, Flat Rim, MS64 PCGS. Charles Barber and Augustus Saint-Gaudens first worked together on the Columbian Exposition medal of 1893, though their cooperation was more coerced than voluntary. Saint-Gaudens was initially responsible for designing the medal, but after his controversial reverse was rejected, the sculptor's obverse was paired with a Barber design. In the first draft of a letter addressed to Treasury Secretary Carlisle, who had made the decision to pair the men's work, Saint-Gaudens wrote that his actions would result in an "intolerable, deplorable, vulgarity, hopeless, inane, offensive combination, absurd grotesque, patchwork." A decade later, Saint-Gaudens and Barber would once again team up, albeit reluctantly, this time to design and produce the most impressive gold coins ever issued — the 1907 High Relief double eagles, of which only 12,367 pieces were minted.

This impressive Choice specimen displays the Flat Edge that is characteristic of coins produced late in the year, after the planchet dimensions and upsetting had been adjusted to eliminate the Wire Rim seen on most High Reliefs. The design elements are sharply detailed and the vivid orange-gold surfaces show just a few minor contact marks, mostly in the obverse field. Vibrant mint luster adds to the outstanding visual appeal.

**From The Conch Collection.** NGC ID# 26F2, PCGS# 9136

### 1907 High Relief Twenty Dollar, MS65 Scarce Flat Rim Variant

**4371 1907 High Relief, Flat Rim, MS65 NGC.** When High Relief twenties are discussed, most of the attention is focused on the obverse with its magnificent striding figure of Liberty. But the reverse also has a prominent feature with its naturalistic eagle in flight. Saint-Gaudens stated the figure was based on the Flying Eagle cents produced from 1856 to 1858. He apparently was unaware that the eagle on the Flying Eagle cents was in turn based on Christian Gobrecht's eagle flying "onward and upward" on his 1836 Gobrecht dollar. Mint Director Frank Leach criticized the eagle on the reverse of the new ten dollar gold piece stating, "This design inclines one to the impression of a crane in masquerade wearing pantaloons and a cutaway coat." He also weighed in with criticism of the eagle on the reverse on the twenty dollar gold piece, stating that the eagle was stiff-legged. In Michael Moran's book *Striking Change* he explains:

"Leach just could not bring himself to like Saint-Gaudens's artistic eagles. He had no idea that Theodore was a naturalist at heart. His comment earned the Mint director a trip to the presidential woodshed - in this case, the Rock Creek Aviary. Leach returned with a new respect for Theodore Roosevelt, having learned that eagles did indeed fly with their talons extended."

Both sides of the High Relief twenty give the central devices a three-dimensional appearance. This is especially apparent on this piece with the figure of Liberty caught in mid-stride and the eagle soaring across the reverse. The surfaces are softly frosted and show just the slightest reddish patina with no contact marks evident. Late in 1907, Mint personnel made adjustments to the dies and collar to eliminate the wire rim seen on most High Relief twenties. It is seldom seen completely eliminated, but this piece is as close as we have seen in recent memory. NGC ID# 26F2, PCGS# 9136

## 1907 Flat Rim High Relief Twenty, MS66+ Glowing Mint Luster

**4372** 1907 High Relief, Flat Rim, MS66+ NGC. When one considers the High Relief twenties it is customary to associate Augustus Saint-Gaudens and Theodore Roosevelt together. Both men towered above their contemporaries in their respective fields. As an artist, Augustus Saint-Gaudens changed the course of American art. He introduced actual Classicism to a public that had been accustomed to the perceived Classical influence that began in the mid-18th century with the birth of Neoclassicism. The simplicity and naturalism he introduced in his monumental sculptural works paved the way for the later developments of modern art in the 20th century. Theodore Roosevelt was a dynamic politician who sought to revitalize American life, and he believed a small part of that revitalization could be achieved through the redesign of the nation's coinage. As often happens, greatness that transcends an individual's limited field is not fully realized until the course of current events demands it. Both men were great in their fields, and with the president's request of the sculptor to redesign the banal mid-19th century designs he saw in circulation, greatness was eventually achieved in the largest of the country's gold coins with the striking of High Relief twenties in late-1907. This is a magnificent example of that transcendence, a coin that remains unequalled to this day. The surfaces glow with soft, frosted mint luster that shows just the slightest tinge of reddish patina. As one would expect from a coin in this grade, there are no detracting contact marks. Flat Rim High Relief twenties are several times scarcer than their Wire Rim counterparts and this particular piece shows an almost complete flat rim around each side. NGC ID# 26F2, PCGS# 9136

## SAINT-GAUDENS DOUBLE EAGLES

### 1908 Saint-Gaudens Double Eagle, MS68 Burdette Type 1, Ex: Wells Fargo Hoard

**4373 1908 No Motto, Wells Fargo Nevada, MS68 PCGS.** Ex: Wells Fargo Nevada Gold. Charles Barber modified both the obverse and reverse designs on Saint-Gaudens' beautiful double eagle in 1908. The reverse modification, the addition of the motto IN GOD WE TRUST, is well-known, but the obverse change was more subtle and has gone unnoticed by most present-day numismatists. Roger W. Burdette recently researched the Saint-Gaudens series for an upcoming book and noted that the coins struck in 1907 and early 1908 have relatively short rays on the obverse, while coins struck later in 1908 have much longer obverse rays. He classified the Short Rays, No Motto coins as Type 1, the Long Rays, No Motto coins as Type Two, and the Long Rays, With Motto coins as Type 3. No Short Rays, With Motto coins were produced, so we know the Long Rays obverse was introduced before July 1, 1908, when the With Motto reverse became standard.

The present coin represents the Type 1 design, with short rays on the obverse and no motto on the reverse. Like most coins from the famous Wells Fargo Hoard, the lovely orange-gold surfaces are impeccably preserved. The design elements of this remarkable specimen were strongly impressed, although most coins of the Type 1 variety are not as sharply detailed as their Long Rays counterparts. Overall eye appeal is terrific. Population: 99 in 68, 10 finer (6/16).

**From The Conch Collection.** NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

### 1908-D Saint-Gaudens Double Eagle, MS66 Short Rays, No Motto Variant

**4374 1908-D No Motto MS66 PCGS.** The Denver Mint struck 663,750 No Motto Saint-Gaudens double eagles in 1908. Roger W. Burdette estimates 40% of those coins were produced with the original Short Rays obverse of 1907 (Type 1), while the majority show the new Long Rays obverse (Type 2). The present coin is a spectacular Premium Gem representative of the Type 1 design, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster. Overall eye appeal is fantastic. This coin should find a home in the finest collection or Registry Set. Population: 12 in 66 (1 in 66+), 0 finer (6/16). NGC ID# 26F7, PCGS# 9143

## 1908 Saint-Gaudens Twenty, MS66 Popular Long Rays, With Motto Variant

**4375 1908 Motto MS66 PCGS.** The motto IN GOD WE TRUST was added to the reverse of the Saint-Gaudens double eagle in 1908 and all coins struck after July 1 of that year feature this reverse. It is worth noting that the obverse die was also modified in 1908, and all the With Motto coins were struck in combination with the new Long Rays obverse. Roger W. Burdette classifies the Long Rays, With Motto coins as Type 3 Saint-Gaudens double eagles. Only 156,258 Type 3 double eagles were struck at the Philadelphia Mint in 1908 and most Mint State survivors have been repatriated from foreign holdings over the years. Examples in MS66 condition are very rare.

The present coin is a spectacular Premium Gem, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster from both sides. Eye appeal is tremendous. Population: 12 in 66 (1 in 66+), 1 finer (6/16).

**From The Conch Collection.** NGC ID# BNAK, PCGS# 9147

## 1908-D Saint-Gaudens Twenty, MS66 Burdette Type 3, Long Rays, With Motto

**4376 1908-D Motto MS66 PCGS.** By Congressional order the motto IN GOD WE TRUST was added to the design of the double eagle late in 1908. A smallish mintage of 349,500 pieces was accomplished at the Denver Mint, making the issue quite elusive in higher Mint State grades. This With Motto coin exhibits long rays on the obverse, a combination classified as Type 3 Saint-Gaudens double eagles by Roger W. Burdette. Examples can be found with some patience in grades up to the Gem level, but MS66 specimens are definitely rare.

This delightful Premium Gem exhibits sharply detailed design elements throughout. The vivid orange-gold surfaces display vibrant mint luster, with no mentionable signs of contact. Eye appeal is terrific. Population: 31 in 66 (2 in 66+), 4 finer (6/16).

**From The Conch Collection.** NGC ID# 26F9, PCGS# 9148

### 1908-S Saint-Gaudens Twenty, MS66 Low-Mintage Branch Mint Issue Seldom Seen in High Grade

**4377 1908-S MS66 PCGS.** The remarkably low mintage for the 1908-S twenty dollar (22,000 pieces), was explained by Roger Burdette's Mint archival research: "San Francisco was the last mint to receive dies and collars for the new double eagles. Blueprints were sent from Philadelphia on March 17 and a month later it was discovered that the presses did not have enough clearance to allow the edge collar mechanism to operate. Once the dies were on hand, the mint still had considerable difficulty in adapting their presses to the segmented edge collar. It wasn't until September 10 that double eagles again flowed from the western mint, but they managed to produce only 22,000 of the new coins by year's end."

As with some other San Francisco dates, but unlike many other Saint-Gaudens issues in general, there was apparently an effort to place 1908-S twenties into circulation, as a larger number of AU58 and lesser-graded examples than Uncirculated ones are in the marketplace.

The MS66 representative we present here displays the thick mint frost and rich orange-gold color that are typical of this issue. Further enhancing the coin's eye appeal are the sharply defined features of Liberty, the Capitol building, and the eagle. Much of this sharpness of detail likely comes from a strengthened obverse hub that is seen on twenties beginning with the 1908 With Motto issue. Both sides of this lovely example are impeccably preserved, and reveal no flaws that might be considered detracting. We simply point to a minute mark in the field beneath Liberty's flowing hair and another at the top of the ray closest to her left (right facing) breast, both of which may help to identify the coin. Population: 10 in 66 (1 in 66+), 4 finer (5/16).

*Ex: Kutasi Collection / FUN Signature (Heritage, 1/2007), lot 3265; Oliver Collection; Chicago Signature (Heritage, 8/2011), lot 7690.*

**From The Conch Collection.** NGC ID# 26FA, PCGS# 9149

## 1909-D Saint-Gaudens Double Eagle, MS65 Low-Mintage Branch Mint Issue

**4378 1909-D MS65 PCGS.** This issue's original mintage of 52,500 pieces is the fourth lowest in the Saint-Gaudens series after the 1907 High Relief, 1908-S, and 1913-S. At one time, numismatists considered that the '09-D was virtually unobtainable in Mint State. The emergence of a hoard in Central America in 1983 now means that advanced collectors can acquire a BU or Select quality representative with some patience and a decent amount of money. Near-Gems and Gems are still, however, rare, and even the right amount of money does not guarantee that one will be able to acquire an example in a reasonable amount of time. That said, advanced double eagle collectors would be wise to take full advantage of the opportunity that this PCGS-certified Gem represents. The luster is well frosted throughout with a rich endowment of reddish-gold color. For the type, the strike is bold, and, although lightly abraded, both sides are uncommonly smooth for a gold coin of this size. Population: 17 in 65, 7 finer (6/16).

**From The Conch Collection.** NGC ID# 26FD, PCGS# 9152

## 1909-S Saint-Gaudens Double Eagle, MS66 Only One Finer Certified

**4379 1909-S MS66 PCGS.** Nearly 2.8 million Saint-Gaudens double eagles were struck at the San Francisco Mint in 1909. Most of the coins were used in foreign exchange, with the majority going to European destinations. A considerable minority were sent to Central and South America, however. Many examples have been repatriated over the years and have found their way into major collections. The coins from European holdings usually show signs of rough storage and repeated counting, while those with Central and South American pedigrees are better-preserved.

This delightful Premium Gem exhibits virtually pristine orange-gold surfaces, with radiant mint luster on both sides. The design elements are sharply rendered and overall eye appeal is fantastic. Population: 15 in 66, 1 finer (6/16).

**From The Conch Collection.** NGC ID# 26FE, PCGS# 9153

### 1910-D Saint-Gaudens Twenty, MS66+ Very Rare Any Finer

**4380 1910-D MS66+ PCGS. CAC.** The United States Mint tried to modernize its equipment in 1910, installing automated weighing machines and shaker-hoppers, while laying off adjusters and other staff. As might have been expected, problems arose with the new machinery, which had not been extensively tested before installation. As a result, volume of gold coinage was less than expected. Production of double eagles was delayed until September at the Denver Mint, and a relatively modest mintage of 429,000 Saint-Gaudens twenties was accomplished by the end of the year. The 1910-D has a relatively high survival rate and specimens are generally available in grades up to the Gem level, but examples in MS66 condition are very scarce, and finer coins are extremely rare.

This Plus-graded Premium Gem exhibits razor-sharp definition on all design elements and the well-preserved orange-gold surfaces show no mentionable flaws. Vibrant mint luster adds to the exceptional eye appeal. PCGS has graded only two numerically finer examples (6/16). NGC ID# 26FG, PCGS# 9155

### 1911 Double Eagle, MS65+ Well-Preserved, Lustrous Surfaces

**4381 1911 MS65+ PCGS.** A modest mintage of 197,250 business-strike Saint-Gaudens double eagles was accomplished at the Philadelphia Mint in 1911, with coins produced on January 17 and from April 25 to May 1. Most of the coins were eventually sent to Europe, and the typical survivor shows the effects of coin-to-coin contact during shipping and repeated counting and repackaging. Most examples seen are in low-to-mid Uncirculated grades and the 1911 is very scarce at the Gem level.

This Plus-graded Gem offers well-detailed design elements and well-preserved orange-gold surfaces. A few minor contact marks on the sun are the only mentionable flaws. The surfaces radiate vibrant mint luster and eye appeal is outstanding. Population: 46 in 65 (3 in 65+), 13 finer (6/16).

**From The Conch Collection.** NGC ID# 26FK, PCGS# 9157

## 1911 Saint-Gaudens Double Eagle, MS66 Only One Numerically Finer at PCGS

**4382 1911 MS66 PCGS.** The 1911 Saint-Gaudens double eagle is an underrated issue from a small Philadelphia mintage of 197,250 pieces. Most examples seen have been repatriated from European sources and grade no better than MS63. Specimens are very rare at the MS66 grade level. This delightful Premium Gem exhibits needle-sharp definition on all design elements and close inspection with a loupe reveals no mentionable surface flaws. The pleasing orange-gold surfaces radiate vibrant mint luster on both sides and eye appeal is tremendous. Population: 12 in 66 (2 in 66+), 1 finer (6/16). NGC ID# 26FK, PCGS# 9157

## 1911-S Saint-Gaudens Double Eagle, MS66 Sharply Detailed, With Vibrant Mint Luster

**4383 1911-S MS66 PCGS.** Despite a Mint-wide reduction in personnel, the San Francisco Mint struck a respectable mintage of 757,750 Saint-Gaudens double eagles in 1911. These coins served as export commodities, according to Roger W. Burdette, and approximately 450,000 examples were eventually sent to European destinations, and another 250,000 were exported to Latin America. In 1983, a hoard of 47,000 United States double eagles surfaced in Central America, including many examples of the 1911-S.

The present coin is a delightful Gem, with vibrant mint luster and vivid orange-gold surfaces that show no mentionable distractions. The design elements are sharply detailed throughout and overall visual appeal is terrific. Population: 37 in 66 (2 in 66+), 1 finer (6/16).

**From The Conch Collection.** NGC ID# 26FL, PCGS# 9159

### 1912 Saint-Gaudens Twenty, MS65 Lower-Mintage Philadelphia Issue

**4384 1912 MS65 PCGS.** The 1912 enjoys great demand due to its small mintage and the absence of double eagles at the branch mints throughout the year. Slightly fewer than 150,000 double eagles were minted in Philadelphia in 1912 and few examples were saved by contemporary collectors. Gem examples are extremely rare, and finer coins are practically non-existent. This lovely specimen has frosty yellow-gold luster with splendid surfaces showing a few minuscule marks on each side. A generally bold strike shows a trifle weakness at the centers, but this coin retains excellent eye appeal. Population: 41 in 65 (2 in 65+), 6 finer (6/16).

**From The Conch Collection.** NGC ID# 26FM, PCGS# 9160

**1913 Twenty Dollar, Rare MS65  
Tied for Finest at PCGS  
A Leading Condition Rarity of the Series**

**4385 1913 MS65 PCGS.** "Beginning in MS-65 ... the 1913 develops into one of the leading condition rarities in the entire Saint-Gaudens Double Eagle series. In fact, it is easier to locate a high-grade 1929, 1931, or 1932 than it is to find a similarly graded 1913": Thus David Akers writes of this issue in his *Handbook of 20th Century United States Gold Coins*, second edition. The 1913 double eagle is among the more elusive Philadelphia issues from the early part of the series. Many of the Mint State pieces known today survived the 1930s gold melts via foreign bank hoards, partly in Central America, and were returned to the U.S. numismatic market in the 1960s and '70s. But foreign trade coins were seldom well-preserved, and numerous bagmarks are the norm. Thus the rarity of Gems.

Collecting double eagles by date and mintmark was not widely popular in 1913, due to the high intrinsic value of the denomination, and any beginning interest in such an activity in the following years was cut short by the Great Depression of the 1930s, particularly after current gold coins in circulation and banks were withdrawn and destroyed under the famous Executive Order 6102. The 1913 double eagle in circulation-strike format did not become popular with collectors until the mid-1940s, per Roger Burdette's analysis of auction records. At the time, high-end Mint State coins were extremely rare, and that rarity persists to the present day.

This representative is among the finest at PCGS, and only one coin is technically finer at NGC (6/16). The strike is razor-sharp, and the glistening yellow-gold surfaces display clean fields with only trivial ticks on portions of the devices. Eye appeal is about as strong as is possible on this conditionally rare Philadelphia issue. Population: 14 in 65, 0 finer (6/16). NGC ID# 26FN, PCGS# 9161

### 1915 Double Eagle, MS65 None Numerically Finer at PCGS

**4386** 1915 MS65 PCGS. In an unusual turn of events, probably caused by the economic conditions of World War I, more gold was imported into the United States than exported in 1915. Business-strike double eagle production was delayed until the final quarter of the year at the Philadelphia Mint, where a modest mintage of 152,000 pieces was accomplished after September 17. Roger W. Burdette estimates approximately 10% of the mintage was released into circulation in this country, accounting for the unusually high proportion of circulated coins in today's market. The rest were exported to European or Latin American destinations. Perhaps as many as 2,500 examples were repatriated to the U.S. after World War II.

The present coin is a delightful Gem, with sharply defined design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces exhibit only minor signs of contact, with a short scratch on Liberty's knee the only mark of note. Overall visual appeal is outstanding.

*From The Conch Collection.* NGC ID# 26FV, PCGS# 9167

### 1915 Saint-Gaudens Twenty, MS65 Conditional Rarity From This Decade

**4387** 1915 MS65 PCGS. The 1915 is usually located in the lower grades of Mint State and Gems are widely recognized as important and highly collectible condition rarities. With a large portion of the coins that left the Mint actually going into circulation, it is easy to see why the smallish mintage would not be sufficient to make this a common coin in Gem condition. In fact, of the seven finest known examples to us, six are MS65. This is a lovely piece with soft, frosted mint luster and subtly colored reddish-tinted yellow-gold surfaces. As one would expect from a Gem, there are no obvious or detracting abrasions present. Population: 50 in 65 (2 in 65+), 0 finer (7/16). NGC ID# 26FV, PCGS# 9167

## 1920-S Saint-Gaudens Twenty, MS63 Prime Condition and Absolute Rarity Only 18 Coins Certified Finer at PCGS

**4388 1920-S MS63 PCGS Secure.** The 1920-S is a classic rarity in the Saint-Gaudens double eagle series, boasting a history replete with political and economic turmoil. In 1916, production of twenty dollar gold coins came to a halt as European powers were engaged in The Great War and the United States debated whether or not it should enter the conflict. Although double eagles circulated to some extent in the Western states before the war, most of the twenty dollar coins were used as currency reserves, or for large overseas payments of government obligations or foreign trade. Large shipments of gold to foreign destinations were drastically curtailed during the war, and the existing supply of double eagles was adequate to meet domestic needs, making the mintage of twenty dollar coins unnecessary after 1916.

The signing of the Armistice in 1918 and the Treaty of Versailles in 1919 signaled the end of the war, but a post-war recession limited foreign trade and reduced the need for large denomination gold coins. Economic recovery finally brought the resumption of double eagle coinage in 1920, with an ample mintage of 558,000 pieces accomplished at the San Francisco Mint. However, the 1920-S, like a number of branch mint double eagles struck during the 1920s, experienced minimal circulation. The only examples available to collectors were the remnants of the 543 pieces left from the Annual Assay Commission work and the 144 pieces paid out by the San Francisco Mint Cashier immediately after production ended. No hoards have ever appeared of this rare issue. A few circulated examples are known, suggesting a small number of coins served as a medium of exchange. Virtually the entire mintage was melted when Franklin Roosevelt signed the Gold Recall of 1933 into law, establishing the 1920-S as one of the preeminent issues of the Saint-Gaudens twenty dollar series.

The present coin is an attractive Select specimen with well-detailed design elements and vibrant mint luster throughout. The pleasing yellow and rose-gold surfaces show a few scattered, minor contact marks that define the grade. Overall visual appeal is outstanding. Population: 12 in 63, 18 finer (5/16).

**From The Conch Collection.** NGC ID# 26FZ, PCGS# 9171

## 1921 Saint-Gaudens Double Eagle, MS63 Classic Melt Rarity Seldom Encountered Finer

**4389 1921 MS63 PCGS.** Collectors are most familiar with the 1921 double eagle as a major melt rarity, released only in dribs and drabs and never found in quantity in the collectible era. What is not so well known is that the 1921 double eagle almost was not produced at all, and its creation and the survival of a relative handful of specimens derive from a complex sequence of events.

The 1920s were bookended by a pair of economic depressions. The second, the Great Depression, is far more famous and linked to the late-date Saint-Gaudens double eagles from 1929 on, all of which were heavily melted and difficult to obtain today in varying degrees. At the start of the 1920s, however, the United States was experiencing an economic downturn following World War I. As seen with other major wars, when the period of wartime production ended, a series of shocks hit the economy: manufacturers of tin-hats and M1903 Springfield rifles saw their orders plummet, for example, and formerly conscripted soldiers returned to civilian life, resulting in a glut of labor and the failure of many men to find work right away.

With the slowdown in business activity came a corresponding decrease in the demand for coinage. Low-mintage dates abound up and down the denominations in U.S. coinage between 1919 and 1921, particularly for dimes and half dollars, but gold production too was affected. The 1921 double eagles, for example, were not struck until the last two months of the year, as the government had no need of the coins themselves as circulating money, nor as backing for an issuance of Federal Reserve notes redeemable in gold, until the depression was over.

The 1920 double eagles too were struck as part of the “Reserve Funds,” kept separate or “under seal,” as noted in correspondence between Dr. Thomas Louis Comparette, keeper of the Philadelphia Mint Cabinet, and the custodians of the Connecticut State Library collection of U.S. Coins, first original owner Joseph P. Mitchelson and later Connecticut State Librarian George S. Godard. (Excerpts from their letters appear in Roger W. Burdette’s *Renaissance of American Coinage* series.)

Burdette writes: “The 1920 \$20 coins were eventually released into circulation; however the 1921 pieces were retained in treasury vaults as Reserve Funds until they were melted during the mid-1930s. The 1921 double eagle remains one of the great rarities of the Saint-Gaudens series.” It is worth noting that from 1922 until 1928, none of the Philadelphia issues is a prime rarity; in fact, dates such as the 1924, 1927, and 1928 are synonymous with type collecting. Only the 1921 double eagle, struck only to balance the Treasury’s books and never meant to be seen by the public, stands out among the Philadelphia issues of the early to middle 1920s.

The 1921 double eagle is scarce in the aggregate and a condition rarity in Mint State, owing to the unusual pattern (in this gold series) of circulated coins making up a significant proportion of survivors. As an MS63 representative, this Select coin falls just outside the uppermost tier of survivors but provides a plenty rare prize for the dedicated Saint-Gaudens enthusiast. Striking softness on torch-hand and foot is as often seen for the issue, while softly frosted yellow-gold luster adds tints of peach and orange. The reverse is pleasingly preserved by MS63 standards, but the obverse has a grade-defining diagonal cut on the left (facing) side of the gown and smaller marks elsewhere. Nonetheless, the eye appeal is strong on the whole, making this a valuable survivor sure to be chased by collectors. Population: 10 in 63, 7 finer (5/16).

**From The Conch Collection.** NGC ID# 26G2, PCGS# 9172

## 1924-D Saint-Gaudens Twenty, MS64 Conditionally Rare in Finer Grades

**4390 1924-D MS64 PCGS.** The 1924-D is a well-known melt rarity in the Saint-Gaudens double eagle series, falling just outside the top ten most elusive issues by certain counts. Most survivors were repatriated from European holdings after 1950. The date is available for a price in grades through MS63, but it is scarce in MS64 and conditionally rare any better. This near-Gem representative offers decent detail, if a bit lacking on Liberty's torch hand, and aside from light marks in the left obverse field and near the flowing hair, the overall surface preservation is solid. PCGS has encapsulated only 11 numerically finer examples (6/16).

**From The Conch Collection.** NGC ID# 34VF, PCGS# 9178

## 1924-S Saint-Gaudens Double Eagle, MS64 Rarely Encountered in Finer Grades

**4391 1924-S MS64 PCGS.** From a substantial mintage of 2.9 million pieces, the 1924-S Saint-Gaudens double eagle is one of the most enigmatic issues of the series. The great majority of the coins were stored in banks and Treasury vaults, and melted after the Gold Recall of 1933. Numismatists of the 1940s believed the 1924-S was the single-rarest Saint-Gaudens double eagle. A relatively small number of coins had been used in foreign exchange, however, a fact that remained unknown to contemporary collectors until a trickle of specimens began emerging from European sources in the 1950s. Roger W. Burdette estimates as many as 500 coins may have been repatriated from foreign holdings over the years, making the 1924-S only scarce, rather than extremely rare, in today's market. Most of the coins recovered from foreign holdings show signs of rough storage and repeated counting, however. As a result, the 1924-S remains very rare in grades above MS64.

The present coin is an attractive Choice example, with well-detailed design elements that show just a trace of softness on the Capitol and torch hand. The lustrous orange-gold surfaces show a few very minor scattered contact marks and eye appeal is outstanding. PCGS has graded five numerically finer examples (6/16).

**From The Conch Collection.** NGC ID# 26G9, PCGS# 9179

## 1924-S Saint-Gaudens Twenty, MS65+ Heavily Melted Branch Mint Issue Condition Census Example

**4392 1924-S MS65+ NGC.** The 1924-S Saint-Gaudens double eagle was produced in large numbers, with a reported mintage of more than 2.9 million pieces. Unfortunately, most of the large production total was held in government vaults as currency reserves, and melted into gold bars for storage at the Bullion Depository at Fort Knox after the Gold Recall of 1933. Research by Roger W. Burdette indicates only about 250,000 pieces were ever released into circulation, with the majority of those coins exported to European or Latin American destinations. Numismatists believed the 1924-S was the single-rarest Saint-Gaudens double eagle in the 1940s. B. Max Mehl captured the contemporary thinking about the 1924-S in his description for lot 879 of the Charles W. Green Collection in 1949:

"This coin has never been in circulation, but it does show slight evidence of having been handled with other coins. It has practically full mint luster, especially on the reverse. Of excessive rarity. Such great collections as the Bell and the 'World's Greatest' did not have a specimen. This is only the second specimen that has passed through my hands. The other one was the one in the Berenstein Collection which I purchased some two years ago. I sold the 1924-S at private sale for \$1,600.00. I understand that as much as \$3,000 was asked for a single specimen. To the best of my knowledge, only three specimens are known to exist."

While Mehl had a good grasp of the number of coins extant in this country, he had no way of knowing that a small number of specimens was safely hidden in foreign holdings. These coins were eventually discovered by numismatists like Paul Wittlin, and returned to the U.S. after World War II. Today, the 1924-S is still a scarce issue, especially in high grade, but it no longer ranks as excessively rare.

As the only Plus-graded Gem at NGC, with a single coin certified finer, this piece ranks high in the Condition Census. Similarly, PCGS has graded one example in MS65+, with one finer (7/16). It is even possible that some duplication exists among these four citations. Certainly, the present coin is second-to-none in terms of eye appeal. The virtually pristine yellow and orange-gold surfaces radiate vibrant mint luster and vivid color on both sides. The design elements are well-detailed, with just a touch of the typical softness on the Capitol. Altogether, a most appealing example of this challenging date. NGC ID# 26G9, PCGS# 9179

## 1925-S Double Eagle, MS63 Underrated Branch Mint Issue

**4393 1925-S MS63 PCGS.** The 1925-S Saint-Gaudens double eagle claims a large mintage of more than 3.7 million pieces, but it is seldom available in dealer's stocks and examples are infrequently offered for public auction. Undoubtedly, the great majority of the large production was melted after the Gold Recall of 1933 and only a relatively small number of survivors are available to satisfy collector demand today. Historically, the elusive nature of the 1925-S has not been recognized outside of series specialists, as it has always been overshadowed by some even rarer branch mint issues of the 1920s. Despite the best efforts of students of the series, the 1925-S remains something of a "sleeper" today, especially in high grade.

The present coin is an impressive Select specimen, with vivid orange-gold surfaces that show a few scattered, minor signs of contact. Vibrant mint luster radiates from both sides and the design elements are well-detailed, with just a touch of softness on the eagle's belly. This coin will be a welcome addition to a fine collection of Saint-Gaudens twenties. PCGS has graded 26 numerically finer examples (6/16).

**From The Conch Collection.** NGC ID# 26GC, PCGS# 9182

## 1926-D Saint-Gaudens Double Eagle, MS64 Heavily Melted Branch Mint Issue

**4394 1926-D MS64 PCGS. Secure.** A nominal mintage of 481,000 Saint-Gaudens double eagles was accomplished at the Denver Mint in 1926, with all the coins produced in the first quarter of the year. Most of this mintage was held in banks or Treasury vaults and never released. The great majority of these coins were melted after 1933, leading numismatists of the 1940s to believe that the 1926-D was a great rarity. A small number of coins surfaced in European holdings after World War II, but no really high-grade examples were ever repatriated. The overall availability of this issue has increased since the 1940s, but the rarity of high-grade examples remains virtually unaffected since the days when the 1926-D was considered the second-rarest Saint-Gaudens twenty.

The present coin is an attractive Choice specimen, with well-detailed design elements and lightly marked orange-gold surfaces. Vibrant mint luster adds to the outstanding visual appeal. Population: 23 in 64 (1 in 64+), 5 finer (6/16).

**From The Conch Collection.** NGC ID# 26GE, PCGS# 9184

### 1926-S Saint-Gaudens Double Eagle, MS65 Very Rare Any Finer

**4395 1926-S MS65 PCGS.** Pleasing luster and light shades of green-gold and rose toning endow this conditionally elusive Gem with significant eye appeal. The surfaces are minimally abraded, and marks are difficult to detect, even under magnification. A series of minor disturbances along the upper reverse rim appear to be as struck. The 1926-S was heavily melted, and relatively few have emerged from overseas holdings. This offering represents an important opportunity to acquire a Gem example of this popular San Francisco issue. Population: 36 in 65, 4 finer (6/16).

*Ex: Jay Brahin; Long Beach Signature (Heritage, 2/2007), lot 5290.*

**From The Conch Collection.** NGC ID# 26GF, PCGS# 9185

### 1927 Double Eagle, MS67 Unknown in Finer Numeric Grades

**4396 1927 MS67 PCGS.** Yellow-gold luster is bold with touches of apricot and orange. Even for an issue that is known to “come nice” and has Gem examples available by the thousands, this Superb Gem stands out with its remarkably untouched surfaces that show just a few luster grazes and a small mark hidden in the right-side rays on the obverse, all of which pale in comparison to the overwhelming eye appeal. Despite the 1927 double eagle’s reputation as a type issue, the date is a remarkable condition rarity at the Superb Gem level. Population: 19 in 67 (2 in 67+), 0 finer (6/16).

**From The Conch Collection.** NGC ID# 26GG, PCGS# 9186

## 1927 Saint-Gaudens Twenty, MS67 Strong Registry Set Contender

**4397 1927 MS67 PCGS.** For type purposes, a Superb Gem Saint-Gaudens double eagle is virtually essential. Only a few dates in the series are collectible at this lofty tier, among them the 1927. PCGS-certified pieces account for only about a fourth of far less than 100 Superb Gems known of this date, and there are none finer than the MS67 numeric level at either service. This conditionally rare type coin boasts intense, frosty luster in deep orange, peach, and rose-gold hues. The strike is boldly executed, and the surfaces are devoid of distracting abrasions. This coin should find a home in the finest collection or Registry Set. Population: 19 in 67 (2 in 67+), 0 finer (6/16). NGC ID# 26GG, PCGS# 9186

## 1927-S Saint-Gaudens Twenty, MS63 Impressive Branch Mint Rarity

**4398 1927-S MS63 PCGS.** In the 1930s and 1940s, the 1927-S was considered the fourth-rarest issue in the series behind the 1924-S, 1926-D, and 1926-S respectively, according to David Akers. In subsequent decades the discovery of European hoards significantly altered the rarity landscape of the series. Today, for example, the 1920-S and 1921 have superseded the previously mentioned issues in terms of availability, or rather lack thereof. Nevertheless, the 1927-S undoubtedly ranks among the most elusive dates in an already challenging series. Nearly the entire 3.1 million-coin mintage was melted after 1933, and only 3,750 pieces were officially released according to Dr. Charles W. Green.

The present coin is an attractive Select specimen, with well-detailed design elements that show a touch of the usual softness on the Capitol. Aside from a couple of short scratches in the right obverse field, the lustrous orange-gold surfaces are remarkably free of mentionable distractions. Overall visual appeal is quite strong. Population: 29 in 63, 15 finer (6/16).

**From The Conch Collection.** NGC ID# 26GJ, PCGS# 9188

### 1928 Double Eagle, MS67 Exceptional Type Coin

**4399 1928 MS67 PCGS.** The year 1928 marked the last time double eagles were produced and released in bulk quantities. Significant numbers of coins from the record Philadelphia mintage of 8.8 million pieces were exported, but most of the coins went to Central and South American countries, rather than European destinations. This was a fortunate distribution for future collectors, as the coins that went to Latin American countries did not suffer as much from transportation, rough storage, and melting as their European counterparts. Today, many high-quality examples have been repatriated and are available in almost any grade. The 1928 enjoys great popularity with type collectors, as well as series enthusiasts. This spectacular Superb Gem exhibits sharply detailed design elements and virtually pristine orange-gold surfaces that radiate vibrant mint luster. Eye appeal is off-the-charts. Population: 85 in 67 (3 in 67+), 0 finer (6/16).

**From The Conch Collection.** NGC ID# 34VK, PCGS# 9189

### 1928 Saint-Gaudens Twenty, MS67 Impeccably Preserved, Lustrous Specimen

**4400 1928 MS67 PCGS.** A series-record mintage of 8.8 million Saint-Gaudens double eagles was accomplished at the Philadelphia Mint in 1928, but none were struck at the branch mints. Undoubtedly, many of these coins were melted after the 1933 Gold Recall, but a substantial percentage of the large production total was released into circulation, with many pieces sent to Latin American destinations. As a result of this wide distribution, the 1928 is readily collectible in most Mint State grades today, although no coins have been certified in grades above MS67.

This magnificent Superb Gem exhibits sharply detailed design elements throughout, and the light orange-gold surfaces are impeccably preserved. Vibrant mint luster radiates from both sides and eye appeal is terrific. Population: 85 in 67 (3 in 67+), 0 finer (6/16). NGC ID# 34VK, PCGS# 9189

## 1931 Saint-Gaudens Double Eagle, MS65 Classic Late-Series Rarity

**4401 1931 MS65 PCGS.** The 1931 is among several key late-date issues in the Saint-Gaudens double eagle series. Only a handful of representatives were paid out in the thick of the Great Depression. Nearly the entire mintage remained locked away in Treasury vaults when President Roosevelt issued Executive Order 6102 on April 5, 1933, "forbidding the hoarding of gold coin" and leading to the mass melting of those gold pieces left unissued at the Treasury and Federal Reserve branches.

By 1931, over a year and a half had passed since the stock market collapsed on October 29, 1929, plummeting the American economy into the most trying financial crisis the country had ever experienced. President Herbert Hoover's reluctance to use the power of the federal government to reduce unemployment and stimulate growth resulted in a series of inadequate measures that mostly catered to the business elite and failed to increase demand among the general population. Deflation continued to spiral out of control as prices decreased, and the need for coinage remained low, especially for large denominations like the double eagle. In fact, the Mint was not immune to the negative effects of the Great Depression. According to the 1931 *Mint Director's Report*:

"The small demand for coin has made it possible to refrain from filling a number of positions which became vacant by reason of retirement, death, and resignation, with the result that the roster of mint service employees is shorter than for a long series of years. The number on the rolls June 30, 1931, was 612, which compares with 652 one year earlier, a reduction of 40."

Roger W. Burdette recently used Treasury records to confirm that at least 22 specimens of the 1931 double eagle were sold to collectors and institutions through official channels by 1933. Balancing mintage figures (2,938,250 examples struck) with assay records (158 coins destroyed) and the number of coins stored in Treasury vaults and later melted (2,937,750 pieces) leaves a total of 342 possible survivors. Burdette notes another 32 coins were confirmed destroyed on February 21, 1934. This leaves a maximum surviving population of 310 pieces, as of the mid-1930s. Some of these coins were undoubtedly exchanged by Treasury employees for common-date twenties and then sold to New York and Philadelphia dealers for a profit, adding to the number of survivors today. The current certified population data suggests that perhaps 100 to 150 examples are extant. The 1931 is usually found sharply struck and nicely preserved — when it is found that is. Most survive in Choice to Gem condition, as the issue was apparently spared from shipment overseas.

The desirable Gem offered here not only boasts wonderful eye appeal, but it is an equally well preserved example whose surfaces show smooth champagne-gold color and frosty texture. The reverse is free of the die crack that bisects the eagle's beak on many 1931 double eagles and there are no bothersome post-production distractions. High-end quality for the assigned grade and a definite find for the discriminating gold specialist. Population: 27 in 65, 10 finer (5/16).

Ex: *FUN Signature* (Heritage, 1/2007), lot 3830.

**From The Conch Collection.** NGC ID# 26GN, PCGS# 9192

## COMMEMORATIVE SILVER

### 1921 Alabama 2x2 Half, MS67 Among the Finest Known

**4402** 1921 Alabama 2X2 MS67 PCGS. Exact mintage and distribution figures for the Alabama Centennial half dollar are unknown, but it is generally accepted that the earlier 2x2 variant had a mintage of either 6,006 or 15,014 coins, including pieces struck for assay. The 2x2 notation was originally to denote Alabama as the 22nd state to be admitted into the Union, separated by a St. Andrew's cross taken from the state flag. The notation's removal later on was purely to create a second variety to market to collectors.

This fabulous coin appears to have been perfectly preserved over the years. There are none of the distracting blemishes that usually plague most of the survivors of this key issue. Each side is also toned in rich, variegated shades of rose, golden, and lilac, and the coin is sharply defined in all areas. Population: 8 in 67 (2 in 67+), 0 finer (6/16).

Ex: New York Signature (Heritage, 7/2002), lot 5042. NGC ID# BYEZ, PCGS# 9225

### 1936 Elgin Half Dollar, MS68 Tab-Toned

**4403** 1936 Elgin MS68 PCGS. Ex: JFS/Jewell. This commemorative celebrates the 100th anniversary of the founding of Elgin, Illinois. The 2017 *Guide Book* indicates that: "The year 1673 bears no relation to the event but refers to the year in which Joliet and Marquette entered Illinois Territory."

Both sides exhibit exuberant luster and a coating of light speckled apricot patina, while a band of deep red-orange iridescence resides near the left obverse border. Well-preserved and free of distracting elements, the coin is sharply struck for the issue, although the reverse always lacks detail on some of the faces as always. Just one or two inoffensive ticks are visible on the otherwise pristine surfaces. Only seven MS68 coins have been certified by PCGS, and none have been seen any finer (6/16).

Ex: Central States Signature (Heritage, 5/2007), lot 2418. NGC ID# BYGL, PCGS# 9303

## COMMEMORATIVE GOLD

### 1915-S Panama-Pacific Fifty, Unc Details The Key to the Classic Commemoratives

**4404 1915-S Panama-Pacific 50 Dollar Round — Filed Rims — PCGS Genuine. Unc Details.** The Panama-Pacific fifty dollar gold pieces are far and away the keys to the classic commemorative series. Both the round and octagonal versions were struck with mintages of only 1,500 coins, of which most were later melted as unsold. The round variant is the scarcer of the two, with a net distribution of only 483 pieces.

The phrase “affordable Pan-Pac fifty” is something of an oxymoron, but the present coin is about as affordable as this issue can come, with few exceptions. This unworn round Pan-Pac “slug” is details-graded by PCGS due to some faint file marks on the rims — file marks that are mostly hidden by the PCGS holder and therefore have virtually no effect on the visual presentation. The coin is well-struck, with satiny yellow-gold surfaces that show some faint hairline handling marks in the fields and on Minerva’s cheek. A pleasing example for a details-graded coin. NGC ID# BYHP, PCGS# 7451

### 1915-S Panama-Pacific Octagonal Fifty Choice AU A Highly Collectible Grade

#### 4405 1915-S Panama-Pacific 50 Dollar Octagonal AU55 PCGS.

A handful of American commemorative issues have distinguished themselves among their peers. Some are known for being “firsts,” such as the Columbian halves or the Louisiana Purchase gold dollars; some are famous for their innovations, such as the bimetallic Library of Congress ten dollar pieces; and still others have gained notoriety for their associations with boondoggle, such as the Cincinnati halves and Special Olympic dollars. A single issue, however, stands apart with its assortment of firsts and features. The 1915-S Panama-Pacific Octagonal fifty dollar piece is perhaps the most distinctive of the American commemoratives.

The coins are impressive and imposing, and merely holding an example is an interesting experience. Their weight and substance are unlike anything else in the series, and for those who have had the privilege to handle an example outside of a holder, the flat, reeded edges and corners are a source of tactile fascination. The present piece offers a handful of unusual characteristics as well, chief of which is wear. While a number of worn or otherwise impaired examples of the Panama-Pacific fifty dollar octagonal coins are known, most such coins are ineligible for encapsulation. By contrast, the present coin, which may have worn slightly from being kept as a pocket piece, shows only light rub on the helmet, the rims, and the wing and legs of the owl. Abrasions are also present, namely one on Liberty’s cheek and another on the right side of the owl, but the fields are comparatively well-preserved. Primarily yellow-gold surfaces offer occasional glints of green.

Ex: *West Palm Beach Signature* (Heritage, 6/2008), lot 1678. NGC ID# BYHP, PCGS# 7452

## 1915-S Panama-Pacific Octagonal Fifty Dollar, MS64 A Coin Reminder of This Historic Exposition

**4406 1915-S Panama-Pacific 50 Dollar Octagonal MS64 PCGS. CAC.** Nine years after the devastating earthquake of 1906, San Francisco hosted what can only be described as one of the most opulent and ambitious world exhibitions before or since. The Panama-Pacific International Exposition covered 635 acres and spanned two miles with an average width of a half-mile. An information pamphlet for exhibitors described the layout:

“Viewed from the Bay, to the east will stand the sixty acres of Amusement Concessions; to the west will be grouped the buildings of the States of the Union and the Foreign Government pavilions; while the fourteen vast palaces, in which the various exhibits will be displayed, will form the center.

“The general impression of this central group will be that of a vast enclosed palace. The walls will be pierced only by the superb entrances and archways forming the approaches to the interior Courts, the introduction of which marks an important departure in Exposition architecture.”

The expansive setting was designed to showcase recent advances in liberal arts, education, horticulture, agriculture, transportation, industry, metallurgy, and other scientific endeavors. Highlighting the “best productions of the brush and pencil” and sculpture from all nations since 1905 was another objective of the fair. Distinguished artists from the United States and around the world were commissioned, their works on display throughout the exhibition. Concluding its informative section on the department of fine art, the pamphlet declared: “By reason of this Exposition’s universal character, its artistic influence is bound to remain an enduring reality of the broadest possible scope long after the physical features shall have become only a pleasant memory.”

That prophecy came true thanks in large part to the fifty dollar gold coins, known affectionately as slugs, designed by California sculptor Robert Aitken. Issued in Round and Octagonal formats, both coins depict the Roman goddess Minerva and her owl. The Octagonal coins, of which 645 pieces were sold to the public, feature dolphins around the periphery, symbolic of the Panama Canal waterway. Composed of more than 2.4 troy ounces of gold, these Pan-Pac fifties are impressive reminders of the grandeur of the PPIE, the technological and artistic progress made around the turn of the century, and the importance of gold in the development of the West Coast economy.

This near-Gem example exhibits soft, frosted mint luster and there are only the tiniest contact marks present. The strike details are strong, the only exception being the centers of each side. An outstanding memento of this historic exposition. NGC ID# BYHP, PCGS# 7452

### 1922 With Star Grant Gold Dollar, MS68 Tied for the Finest Known

**4407** 1922 Grant Gold Dollar, With Star, MS68 PCGS. Tied with just two others as the finest With Star Grant gold dollar at PCGS and finer than any No Star coin at that service (7/16). Grant Memorial gold dollars of both varieties are usually available for a price, but in MS68, this issue becomes a sought-after rarity. Recently, a numerically comparable MS68 With Star coin from the Paul Denby Collection realized \$18,800 in our Central States Signature sale (Heritage, 4/2016), lot 4870. The present piece is arguably finer in regards to eye appeal, showing beautiful yellow-gold, peach-orange, and pale rose hues over glistening, flawless surfaces. The strike is sharp. A finer With Star Grant gold dollar may simply not exist. NGC ID# BYPS, PCGS# 7459

## MODERN BULLION COIN

### 2009 Ultra High Relief, MS70 Prooflike First Strike

**4408** 2009 Ultra High Relief, First Strike MS70 Prooflike PCGS. The one-ounce Ultra High Relief Gold Eagle was the most talked about coin issue of 2009. Despite the high price tag of \$1,189 and the ordering limit of one coin per household, a respectable total of 115,178 examples was eventually sold, with coins dribbling out of the Mint at irregular intervals throughout the year. Modeled after the extremely rare 1907 gold patterns, Judd-1917, the coins were struck on 27 mm planchets that were twice as thick as the standard one-ounce Gold Eagle.

The present technically perfect coin has been certified as a First Strike by PCGS. The design elements are fully struck, showing Augustus Saint-Gaudens original widely praised design to good effect. Although the coin was struck in Mint State format, the surfaces of this piece are brightly reflective, as indicated by the Prooflike designation from PCGS. Few examples have been certified in this ultimate grade, with the Prooflike designation. Population: 72 in 70 Prooflike, (7/16). NGC ID# 26S4, PCGS# 506614

## TERRITORIAL GOLD

**1851 Humbert Fifty, XF40  
Reeded Edge, 887 Thous., K-7**

**4409** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. XF40 NGC. K-7, R.4. The U.S. Assay Office of Gold produced the popular octagonal fifty dollar slugs that have become more solidly identified with the early Gold Rush era than any other numismatic issue. Augustus Humbert acted as assayer for the firm and the slugs (or ingots) served the economy well in the days before California was officially admitted to the Union. The Assay Office sold their facilities and machinery to the U.S. government at the end of 1853, to be used as the basis for the first San Francisco Mint, which opened in 1854. As soon as the Mint was fully operational, most of the fifty dollar pieces were turned in and melted for recoinage into double eagles.

The slugs were issued with several different edge treatments and compositions, and slightly modified designs. This coin represents the K-7 variety, with a reeded edge and .887 fineness, with small concentric circles at the center of the reverse. This attractive XF specimen shows light wear on the design elements, but the still-lustrous orange-gold surfaces are lightly abraded for such a large gold coin. NGC ID# ANH9, PCGS# 10214

**1852 Assay Office Ten Dollar, AU53  
K-12a, Ex: S.S. Central America**

**4410** 1852 Assay Office Ten Dollar AU53 PCGS. K-12a, R.4. Ex: S.S. Central America. SSCA 7100. Although 1857-S double eagles were recovered in great quantity from the *S.S. Central America*, territorial gold coins with a SSCA pedigree are much rarer. Only 92 Assay Office tens were recovered in 1989 from the shipwreck. The present green-gold representative displays wear on the fletchings but the plumage and legends show luster. The obverse field exhibits the moderate marks expected of light circulation in the Gold Rush economy. Housed in a gold label holder. Accompanying the lot is a black faux Ship of Gold book and a certificate of authenticity signed by Tommy Thompson. Listed on page 394 of the 2017 *Guide Book*. NGC ID# ANGV, PCGS# 10001

### 1855 Wass, Molitor & Co. Fifty Dollar, VF30 Historic Gold Rush Issue, K-9

**4411 1855 Wass Molitor Fifty Dollar VF30 PCGS. K-9, R.5.** Wass, Molitor & Co. was a well-respected San Francisco assay firm, founded by Hungarian emigrants Count Samuel Wass and Agoston P. Molitor in October of 1851. Both men had extensive experience in the mining industry in Europe, before coming to California. They issued private gold coinage in several denominations at various times in the early-mid-1850s, mostly as a result of direct petitions from local businessmen seeking to resolve chronic coin shortages that crippled the regional economy throughout this period. Far from seeking to take advantage of their position, independent assays of Wass, Molitor & Co. coins revealed they often contained more than face value in precious metal.

Although their five, ten, and twenty dollar issues were all worthy coins, Wass, Molitor & Co. is best known today for their iconic round fifty dollar gold pieces. These coins were produced in 1855, when a shortage of parting acids limited the output of the new San Francisco Mint. The firm also struck ten and twenty dollar coins in 1855, but the big fifties were uniquely useful in settling large transactions, as there was no circulating paper currency in California. Once the San Francisco Mint resolved its difficulties, Wass, Molitor & Co. ceased coinage operations and many of the large fifty dollar pieces were turned in at the Mint for recoinage into double eagles. The coins are scarce today, and examples are prized by Territorial collectors in all grades and conditions.

The present coin is an attractive VF30 specimen, with some moderate wear showing on the well-detailed design elements. The pleasing orange-gold surfaces are lightly abraded for such a large gold coin, and show a few hints of red, with traces of original mint luster. Altogether, an attractive specimen of this historic issue. Listed on page 401 of the 2017 *Guide Book*. NGC ID# ANJU, PCGS# 10363

## 1854 Kellogg & Co. Twenty, AU58 Scarce K-2 Example

**4412** 1854 Kellogg & Co. Twenty Dollar AU58 NGC. K-2, R.4. The California economy suffered from an acute shortage of coinage after the United States Assay Office closed in late 1853, until the San Francisco Mint began coinage operations on a large scale in 1854. Even after the Mint was officially established, shortages sometimes limited production, putting extreme pressure on the small supply of coinage available to meet the needs of the burgeoning economy. To fill the gap, Kellogg & Co. produced 20 dollar gold pieces in large numbers during 1854 and 1855.

The Long Arrows on the reverse and the position of CO in the coronet centered under two beads identifies the scarce K-2 variety. This attractive near-Mint example shows just a trace of actual wear on the sharply detailed design elements and the pleasing orange-gold surfaces retain traces of original mint luster. Aside from a few contact marks on Liberty's cheek, the surfaces are remarkably free of large or distracting abrasions. A minor rim bruise is evident on the reverse at 4 o'clock. NGC ID# ANHY, PCGS# 10222

## 1850 Mormon Five Dollar, XF Details K-5, Significant Territorial Issue

**4413** 1850 Mormon Five Dollar — Mount Removed — NGC Details. XF. K-5, High R.5. The Mormon gold coinage was struck at the Deseret Mint set up in the home of dentist Dr. William Sharp in Salt Lake City. Donald Kagin explains that it is uncertain when the 1850 five dollar gold coins were minted, but production probably occurred shortly after March 15. This bright orange-gold example retains bold detail on each side. The reverse legends are clear, while evidence of soldering obscures THE, (L)OR(D), and (H)OL(INESS) on the obverse. Listed on page 404 of the 2017 *Guide Book*.

### 1851 Twenty Dollar Copper Die Trial State of California MS66 Brown, K-4a

**4414 1851 State of California \$20 Copper Die Trial, MS66 Brown PCGS. K-4a, Low R.7. Probable Specimen Strike.** This twenty dollar design pairs a facsimile Liberty double eagle obverse with an agricultural enhancement of the California state seal. On page 119 of Kagin's territorial reference he states these patterns are among the most artistic of all private coinage. Don Taxay mentions a ten dollar hub with this name that he believed was made in San Francisco by an English company, this belief being based on an English pedigree for the ten dollar hub.

There is substantial circumstantial evidence this was struck by the Heaton mint in Birmingham, England, rather than in San Francisco. The high quality of workmanship was in line with English production rather than anything made in San Francisco in the 1850s. Ralph Heaton II acquired minting machinery from the Soho mint from the estate of Matthew Boulton through an auction on April 29, 1850. He proceeded to produce pattern coins for countries as diverse as France, Chile, Australia, and India. This piece was most likely a promotional piece used to show the capabilities of new mint. The high quality of the die engraving and depth of mirroring in the fields sets it apart from any coins produced in California for commercial distribution. The Heaton mint is best remembered today for the large quantities of Dominion of Canada coinage with the famous H mintmark.

This piece has been classed as a Specimen by Don Kagin, and we agree. In addition to the extensive die striations in the fields (that produce the mirrored effect), the devices are heavily frosted, yielding a stark cameo contrast. The die-cutter's original tooling marks are clearly visible on this extraordinary coin. PCGS has called the piece Brown, but it is so much more. On each side, the fields are deep blue, surrounded by faded mint red. This is a splendid example of both Western Americana and British mint capabilities from the 1850s.

## ***S.S. CENTRAL AMERICA GOLD BARS***

---

## Kellogg & Humbert 55.44-Ounce Gold Ingot A Large Size Ingot From the S.S. *Central America*

**4415 Kellogg & Humbert 55.44-Ounce Gold Ingot. CAGB-518.** "So many bricks lay tumbled upon one another at myriad angles that the thirty-foot pile appeared to be the remnants of an old building just demolished. Except these were bricks of gold ... ." So describes the wreck of the S.S. *Central America* in Gary Kinder's retelling of the sinking and discovery of the ill-fated sidewheel steamer, *Ship of Gold in the Deep Blue Sea*. A bounty for historians and numismatists, the glittering treasure represented and continues to represent not only the storied California Gold Rush, but a catastrophic tragedy that claimed nearly 500 lives and wrought economic havoc at home and abroad.

### Ship of Gold

Christened the S.S. *George Law* in 1853 and renamed in 1857, the *Central America* was a 280-foot-long United States Mail Steamship Company sidewheeler that traveled between New York and Aspinwall (now Colon, Panama) with stops at New Orleans and Havana. The mail ship made 43 trips between October 1853 and September 1857, carrying an average of 500 passengers (sometimes more than 800), most of whom were either bound for or returning from California. Astoundingly, the vessel had carried more than one-third of all the gold that passed through the Panama route over that period.

The S.S. *Central America* left Havana for New York on the morning of September 8, 1857, transporting about 492 passengers and 105 crew members along with \$1.2 million in registered gold (the actual amount is probably higher). By the evening of September 12, the ship, its cargo, and most of those on board had perished in a hurricane 160 miles off the coast of Cape Hatteras.

### Aftermath: The Panic of 1857

The sinking of S.S. *Central America* sent shockwaves up and down the East Coast, to California, and Western Europe. While the economy was admittedly on shaky footing, the event had an immeasurable impact on worsening the crisis. Bankers in New York and elsewhere depending on the arrival of gold assets became unable to pay creditors, provide wages for their employees, or back the paper currency put out by their financial institutions. October brought about bank runs, and coins stopped being paid out. According to Dave Bowers' *U.S. Liberty Head \$20 Double Eagles*: "By the end of the year several thousand companies were bankrupt. There were many failures of banks and other financial institutions. Nearly all of those that remained solvent (these being the far majority) continued to have problems."

The effects of the Panic of 1857 lasted through the onset of the Civil War, and the memory of the S.S. *Central America* remained fresh in the minds of those who lived through it. However, the treasure lost at sea soon became lost to time. As Walter Breen put in in his July 1990 article in *The Numismatist*, "For more than a century, the *Central America* lay forgotten except among historians and treasure buffs."

### Ingots Recovered

The discovery and recovery of the S.S. *Central America* began in 1988 and would eventually yield a numismatic treasure trove of proportions previously unseen and likely never to be seen again. Excluding thousands of federally and privately minted coins, the wreckage contained 6,000 ounces of gold in the form of more than 500 ingots from five different assayers, including Blake & Co., Henry Hentsch, Harris, Marchand, & Co., Justh & Hunter, and Kellogg & Humbert. Dave Bowers writes in his monumental 2002 opus, *A California Gold Rush History*:

"Kellogg & Humbert bars are the most numerous, some 343 in all. It is perhaps providential from a marketing and demand viewpoint that of all of the names associated with the ingots, John Glover Kellogg and Augustus Humbert are the best known in numismatic circles, the principals having had distinguished careers as private minters and assayers. Many of the firm's bars are large and impressive in size, attesting to the assay office's reputation as a major depot for gold deposits."

### A Tangible Piece of Gold Rush History

For students of the Gold Rush, few properties convey the immediate sense of significance and excitement as Kellogg & Humbert ingots like the one offered here. They are products of an integral moment in American history, cast by two of the most respected assayers of their time. Each bar is unique, and their survival an tragic accident of history. Comparable examples always generate spirited bidding, and we expect nothing less of this lot.

### Physical Description

This ingot is significant in size and has considerable heft in the hand. It is listed in the Bowers' reference among Large Size Ingots (55.01 to 100.00 ounces). The surfaces are bright yellow-gold with no traces of rust from the ship's hull present. The ingot is laid out with the K&H logo at the top / 55.44 OZ / 878 FINE / \$1006.23, and it measures 42 x 98 x 23 mm.

**‘Very Large Size’ Kellogg & Humbert Gold Ingot  
114.65 Ounces, Recovered From  
The ‘Ship of Gold,’ S.S. *Central America***

**4416 “Very Large Size” Kellogg & Humbert 114.65-Ounce Gold Ingot. CABG-614.** Serial number 808, mold K&H-04. This is a 114.65-ounce (just about 9.5 troy pounds) Kellogg & Humbert gold ingot, with an 1857 face or nameplate value stamped thereon of \$2109.31. It is listed, like all of the ingots from five different assayers recovered from the *S.S. Central America*, in Appendix IV of Q. David Bowers’ massive tome, *A California Gold Rush History*, on pages 989-1032. Bowers classifies all of the several hundred gold ingots recovered by order of weight, in these categories:

- Very small size. Up to 10 ounces.
- Small to medium size. 15 to 25 ounces.
- Medium size. 25.01 to 40 ounces.
- Medium to large size. 40.01 to 55 ounces.
- Large size. 55.01 to 100 ounces.
- Very large size. 100.01 to 500 ounces.
- Colossal size. Over 500.01 ounces.

The present ingot thus falls into the “Very large size” category, the largest ranking save for the five ingots that fall into the “Colossal” category. The ingot’s top face reads, in a vertical orientation: No 808 / (Kellogg & Humbert logo) / 114.65 OZ / 890 FINE / \$2109.31. There are no imprints on the sides, but the ingot number is repeated at the top of the back side in a different font. There is no trace of rust from the *S.S. Central America*’s iron hull, and the gold ingot is also free from patination, with bright orange-gold coloration. The surfaces are free of visible defects, other than slight porosity from the pouring and casting process. The normal assay chips are seen as two small triangular cutouts on two opposing corners of the ingot.

For readers unfamiliar with the legend — a true legend — the *S.S. Central America* sank in a hurricane in September 1857 while carrying California gold from Panama to New York City. The sunken ship and large portions of its golden treasure were recovered well over a century later from the depths of the Atlantic Ocean. Among her cargo were many thousands of double eagles and other gold coins; the freshly minted 1857-S double eagles alone numbered in the thousands. Also aboard were a wealth of gold assayer’s ingots — more than 400 in all — from Kellogg & Humbert, Justh & Hunter, Henry Hentsch, Harris, Marchand & Co., and Blake & Co., ingots that were almost previously unknown to the numismatic community. The golden hoard also comprised various privately minted California gold coins, ranging in denomination from ten to fifty dollars and dated from the early to mid-1850s.

As a particularly fine (in every sense) and attractive example of the most prevalent and important California assayers, this ingot should produce fervent bidding when it crosses the auction block.

*Ex: Long Beach Signature (Heritage, 9/2010), lot 5832, where it brought \$253,000.*

## COINS OF HAWAII

### 1883 Hawaii Half Dollar, MS66 Condition Census Example

**4417 1883 Hawaii Half Dollar MS66 PCGS. CAC.** Through MS64, the 1883 Hawaii half dollar is usually available, but Gem or finer coins are rare. This Premium Gem CAC coin is well within the Condition Census. The strike is sharp, and the softly frosted surfaces display blatantly original milky-gray toning with tinges of deep russet around the relief elements. There are no mentionable abrasions.

The half dollar and other silver issues of 1883 bear the portrait of King Kalakaua, who was elected to the throne in 1874 and reigned until his death in 1891. The silver coinage of 1883, produced for the Pacific island nation by the San Francisco Mint, are a numismatic window into Kalakaua's efforts to establish a growing kingdom. Rarely is an example of any denomination offered in such fine condition as the present half dollar. Population: 4 in 66 (1 in 66+), 0 finer. CAC: 5 in 66, 0 finer (6/16). NGC ID# 2C5B, PCGS# 10991

### 1883 Hawaii Dollar, MS65 Conditionally Rare Type Coin

**4418 1883 Hawaii Dollar MS65 PCGS. CAC.** The silver Hawaii issues of 1883 form a short but challenging collection in Mint State. The San Francisco Mint struck dimes, quarters, halves, and dollars for the island kingdom using designs prepared by Charles Barber. The issues circulated minimally before Hawaii became a U.S. Territory in 1900, at which time most of the middle-six-figure mintages were withdrawn and melted, being replaced with federal coinage. Of the surviving Hawaii coins, the silver dollars are the scarcest in Mint State, and Gem-quality examples are rare. This CAC-endorsed MS65 PCGS coin displays a sharp strike and satiny mint luster. Mottled lavender-gray, gold, and sea-green toning encompasses each side, delivering a distinctly original appearance. Population: 16 in 65 (1 in 65+), 6 finer. CAC: 8 in 65, 0 finer (6/16). NGC ID# 2TGD, PCGS# 10995

**1887 Grove Ranch Plantation Token**  
**Kauai, Hawaii, 12 1/2 Cents**  
**MS62 Brown, Medcalf TE-17**

**4419** 1887 Grove Ranch Plantation 12 1/2 Cents MS62 Brown PCGS. M. TE-17. The 1887 Grove Ranch Plantation bit ranks among the rarest 19th century Hawaiian token varieties. According to Medcalf, the Kauai plantation “covered 3,870 acres. In 1885 the plantation employed 110 men and produced 1,300 tons of sugar. 110 yoke oxen were used to provide the work power.” One-bit tokens were struck dated 1886 and 1887, and the latter is rarer. The present piece is tied with one other for finest seen at PCGS (6/16). Die lines throughout the reverse field confirm Uncirculated status. The walnut-brown surfaces are unabraded and display minor laminations, as made. The centers are well struck while the borders show softness, typical for this blacksmith-made variety. Listed on page 421 of the 2017 *Guide Book*. NGC ID# 2UC3, PCGS# 600524

**Seven-Ounce 1959 Hawaii Statehood**  
**Gold Medal**  
**With Silver and Bronze Medals**

**4420** Three-Piece Set of 1959 Hawaii Statehood Medals NGC. Each 63.5 mm medal is separated holdered with consecutive certification numbers. The lot includes: **Gold MS68 NGC, Medcalf 2MS-3**, approximately 216 gm of .900 fine gold, edge-marked number 30 of 50 pieces struck; **Silver MS68 NGC, Medcalf 2MS-2a**, elusive NII HAU error, 0.916 fine silver, edge-marked number 70 of 3,000 pieces struck; and a **Bronze MS69 NGC, Medcalf 2MS-1a**, scarce NII HAU error. This was the official statehood medal series, struck by Medallion Art Co. of New York. 100 gold medals were authorized, but only 50 were struck, and some were undoubtedly melted during the bullion bull markets of later decades. (Total: 3 coins)

## PATTERNS

### 1836 Gobrecht-Designed Gold Dollar Judd-67, PR65

**4421** 1836 Gold Dollar, Judd-67, Pollock-70, R.5 PR65 PCGS. CAC. The obverse features a Liberty cap surrounded by numerous glory rays, similar in design to certain contemporary Mexican issues. The reverse features the denomination "1 D." within a coiled palm frond, with the date below and UNITED STATES OF AMERICA above. Christian Gobrecht is credited with both designs. Struck in gold alloy with a plain edge. Judd-67 has considerable historical importance, as it is the first Federal gold pattern as well as the first gold dollar issue. Originals are likely quite rare, although a number were restruck in the 1860s, one of which was struck over an 1859 gold dollar. This bright yellow-gold Gem has a needle-sharp strike and highly reflective fields, while the reverse has bold mint-made striations.

*Ex: November Signature (Heritage, 11/2003), lot 11001; Long Beach Signature (Heritage, 6/2004), lot 6413. NGC ID# 26VC, PCGS# 11260*

### 1836 Liberty Cap Gold Dollar in Gold Judd-67 Original, PR66+ Cameo

**4422** 1836 Gold Dollar, Judd-67 Original, Pollock-70, R.5, PR66+ Cameo PCGS. The design was engraved by Christian Gobrecht and the obverse was Mexican influenced with a Liberty cap surrounded by rays of glory. The reverse features the denomination 1 D. within a coiled palm frond, with the date below and UNITED STATES OF AMERICA above. Struck in gold with a 10% copper alloy with a plain edge. Coin alignment. This design was also struck at a later date, and in other metals. The restrikes are believed to be in medallic alignment. One was overstruck on an 1859 gold dollar, which would definitively date restrikes to 1859 at the earliest. The originals were struck by March 14, 1836, according to Walter Breen. This is the first gold pattern, and is highly collectible as such. The surfaces display rich reddish-gold color and the fields show remarkable depth of reflectivity, which is set against the frosted devices. Exceptional quality along with historical and numismatic significance. NGC ID# 26VC, PCGS# 411795

## 1863 Two Cent Pattern PR66 Red and Brown Judd-316, Large Motto

**4423** 1863 Two Cents, Judd-316, Pollock-381, High R.6, PR66 Red and Brown PCGS. CAC. The design is that of the issued 1864 Large Motto two cent piece, but dated 1863. A true 1863 transitional pattern would exhibit a Small Motto. Per USPatterns.com, Judd-316 is “a novodel produced circa 1869 through the early 1870s. It does not appear in any pre-1870 auction catalog.” The N in IN is repunched. Struck in copper with a plain edge. The present specimen is encased in a first generation holder **without a color designation**. The PCGS number corresponds to Brown but both sides display extensive peach-red. Some fading toward steel-gray is noted on the reverse field near the large 2. Fully struck and devoid of contact.

Ex: Superior (5/1993), lot 1218. PCGS# 60473

## 1866 Washington Five Cents in Nickel Judd-464, PR65

### Only Two Pieces Believed Privately Known

**4424** 1866 Five Cents, Judd-464, Pollock-558, R.8, PR65 PCGS. CAC. The obverse features the profile of George Washington facing right with IN GOD WE TRUST around and the date below. The reverse displays the denomination represented by a “Dutch 5” centered in a laurel wreath, with the motto IN GOD WE TRUST above. Struck in nickel with a plain edge. While the central obverse device is the same as Judd-461-463, the addition of the motto around the upper obverse and the reverse with its notably different-styled 5 make this a distinctly different (and much rarer) Washington pattern. Only three or four examples are believed extant of this pattern, and it appears this may be the first we have offered at public auction since we last sold this piece in 1984. One piece is held in the Mitchelson Collection in the Connecticut State Library. Only two others are known in private collections (this being one of them). The surfaces are untuned and the fields deeply reflective with starkly contrasting mint frost over the devices.

Ex: Mid-Winter ANA Signature (Heritage, 2/1984), lot 522; anonymous buyer to the present collector. PCGS# 60659

**1868 Dual Denomination Pattern in Aluminum**  
**Judd-659, PR63 Cameo**  
**Ex: Queller**

**4425** 1868 Dual Denomination \$5-25 Francs, Judd-659, Pollock-732, Low R.7, PR63 Cameo NGC. Anthony Paquet's design for an international five dollar coin equal to the value of a proposed 25 franc piece. The obverse depicts Liberty, facing left, with her hair bound by a ribbon and star at the front. The reverse is simply inscribed 5 / DOLLARS / 25 / FRANCS in the center with a laurel and oak wreath surrounding. Struck in aluminum with a plain edge. Examples of this pattern were coined in copper and aluminum, each with either a plain or reeded edge. The four varieties are identified as Judd-656 through Judd-659, and about a dozen of each are known, according to USPatterns.com.

Paris was the site of a June 1867 international monetary convention that convened to discuss an international gold coinage based on the French franc. The result was a coinage bill that was introduced to produce a U.S. five dollar-25 franc gold coin with a weight of 124.45 grains, rather than the standard 129 grains. The blue-gray fields are fully mirrored around lustrous, darker gray devices, creating excellent cameo contrast. Both sides show a few scuffs and hairlines, along with minor corrosion that is mostly limited to the outer rims.

Ex: Auction '87 (RARCOA, 8/1987), lot 1323; Lemus Collection, Queller Family Collection Part Two / FUN Signature (Heritage, 1/2009), lot 1683. PCGS# 416279

**1869 Aluminum Nickel Pattern, Judd-688**  
**PR67 Cameo, Regular Dies Strike**  
**Ex: Newman**

**4426** 1869 Five Cents, Judd-688, Pollock-769, High R.7, PR67 Cameo NGC. CAC. The regular Shield nickel design without rays. Magnification reveals nearly imperceptible date repunching, especially inside the tops of 869. Struck in aluminum with a plain edge. Heavy reverse die polishing matches the reverse of the 1865 Judd-418 from the Newman Collection. Only five pieces are certified, and the Newman specimen is the finest of those. It is likely that only four or five pieces exist.

This boldly defined Superb Gem is fully brilliant with white surfaces characteristic of the aluminum composition. The fields are deeply mirrored around lustrous devices, resulting in a distinct cameo appearance.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$25; Eric P. Newman Numismatic Education Society; Newman Collection / Central States Signature (Heritage, 4/2013), lot 3972; Long Beach Signature (Heritage, 9/2013), lot 6977. PCGS# 404168

**1870 Standard Silver Half**  
**PR64 Deep Cameo**  
**Judd-928, The First We Have Offered**

**4427** 1870 Standard Silver Half Dollar, Judd-928, Pollock-1033, High R.7, PR64 Deep Cameo PCGS. Ex: Denali Collection. William Barber's always-popular Seated Liberty design. The obverse has Liberty seated left, surrounded by 13 stars with the date below. Liberty supports a shield with her right hand, and holds an olive sprig with her left hand. The shield is inscribed with the banner LIBERTY. The reverse displays a wreath of cotton and corn. 50 CENTS is located high within the wreath, and STANDARD is centered above. Struck in silver with a plain edge. This is a magnificent example with strong contrast between the frosted devices and deeply mirrored fields. Almost brilliant, there is just the vaguest suggestion of light reddish patina on each side. PCGS# 800052

**1870 Indian Princess Dollar in Silver**  
**Judd-1015, PR65**

**4428** 1870 Dollar, Judd-1015, Pollock-1149, Low R.7, PR65 PCGS. CAC. William Barber's Indian Princess obverse shows Liberty seated, with her left hand resting on a globe and right hand holding a Liberty pole with cap on top. There are two conjoined flags behind, one ornamented with 22 stars. The reverse is the regular-issue Seated dollar design. Struck in silver with a plain edge. This majestic design was struck in silver, copper, and aluminum and each metal has a plain edge and reeded edge variant. In silver and with a plain edge, there are fewer than a dozen examples known. This original pattern has brightly mirrored fields and the devices are surrounded by deeper shades of russet-golden and blue toning. The surfaces are free from obvious contact marks; however, there is a distinctive pair of small planchet flakes out of the upper reverse field below the right end of the scroll. NGC ID# 29ZY, PCGS# 61263

### 1871 Longacre Starless Quarter in Silver Judd-1093, Indian Princess Design, PR63 Gold CAC Designation

### 1871 'Indian Princess' Half in Silver Judd-1111, Magnificently Toned PR66

**4429** 1871 Quarter Dollar, Judd-1093, Pollock-1229, High R.7, PR63 PCGS. Gold CAC. Longacre's Indian Princess design, in a starless field with date 1871 in exergue, as reworked by William Barber posthumously after Longacre's death on January 1, 1869. The reverse is the regular die of the 1871 Seated quarter dollars. Struck in silver with a reeded edge. These pieces were sold as part of sets from half dime through the silver dollar. Approximately a half dozen are known in silver. A few pieces were also struck in copper and a couple in aluminum. This is a clean obverse design, one that is more suggestive of a medal than a coin. The fields are deeply reflective and the strike is complete throughout. A loupe reveals a few light hairlines, but their impact is so insignificant that the coin at first looks like there are none; thus, the Gold CAC sticker. Of more than 1800 patterns that have received CAC designation, **only 14 have been awarded a Gold CAC sticker.** PCGS# 61352

**4430** 1871 Standard Silver Half Dollar, Judd-1111, Pollock-1247, Low R.7, PR66 NGC. Ex: Bass. The obverse has Longacre's Indian Princess (second) design for the Seated Liberty motif with thirteen stars on the flag and thirteen stars around the periphery. The reverse has 50 CENTS in the center surrounded by a wreath of cotton and corn with STANDARD above. Struck in silver with a reeded edge. This is the most frequently seen of the four Longacre designs from 1871 with slightly over a dozen known. A complete set of this design is in the Smithsonian, and the Eliasberg set was sold individually. Deep blue and lilac toning surrounds bright rose colored centers. The surfaces are remarkably clean and problem-free, and the coin is gorgeous to behold.

Ex: Abner Kreisberg's "Quality Sales" (November 30, 1970), lot 1301; Bass I (Bowers and Merena, 5/99), lot 1212; ANA Signature (Heritage, 7-8/2008), lot 2743. NGC ID# 2A4D, PCGS# 61370

**1874 Bickford Ten in Copper**  
**Judd-1374, PR66 Brown**

**4431** 1874 Bickford Ten Dollar, Judd-1374, Pollock-1519, Low R.6, PR66 Brown NGC. The obverse depicts a bust of Liberty facing left with the legend UNITED STATES OF AMERICA above and the date below. Liberty wears a diadem inscribed with the word LIBERTY and ornamented with six stars. The weight 16.72 GRAMS, the standard of the metal 900 FINE, and the word UBIQUE are centered on the reverse. Around the periphery is the U.S. denomination DOLLARS 10 and the following international equivalents: STERLING (Pound) 2.1.1; MARKEN 41.99; KRONEN 37.31; GULDEN 20.73; and FRANCS 51.81. Struck in copper with a reeded edge. It is estimated that more than a dozen examples are known of this international coinage pattern in copper; however, most lack any trace of red and several have gilt surfaces to resemble the extremely rare gold strikings. This piece displays deep chocolate-brown surfaces with just the faintest remnants of original red still evident on the reverse. Fully struck throughout, the surfaces also appear to be carbon-free. NGC ID# 2AAG, PCGS# 61678

**1875 'Sailor Head' Twenty Cent in Silver**  
**Judd-1392, PR66**

**4432** 1875 Sailor Head Twenty Cents, Judd-1392, Pollock-1535, R.6, PR66 NGC. Designed by William Barber and nicknamed the Sailor Head design, it is nearly identical to the design of certain 1875 half eagle and eagle patterns. A coronet inscribed LIBERTY adorns a head of Liberty, her hair tied back with a ribbon. The reverse has a shield with 20 recessed and the word CENTS at the lower border. Arrows, leaves, and a glory of rays embellishes the shield with UNITED STATES OF AMERICA around. Struck in silver with a plain edge. More than a dozen separate examples are known of this popular twenty cent pattern. This is a lovely, deeply mirrored specimen that is mostly rose colored on each side with emerald-green accents surrounding the devices.

Ex: ANA Signature (Heritage, 8/2007), lot 2749. NGC ID# 6MA6, PCGS# 61699

**1875 'Sailor Head' Ten Dollar, Gilt  
Judd-1444a, PR65 Cameo  
The Only Piece So Certified**

**4433** 1875 Sailor Head Ten Dollar, Judd-1444a Gilt, Pollock-1588, R.6, PR65 Cameo NGC. William Barber's Sailor Head obverse is paired with a reverse design similar to that of the issued Trade dollar. Differences from the Trade dollar reverse, other than the denomination, include the motto IN GOD WE TRUST beneath the eagle within a scroll. E PLURIBUS UNUM lacks the scroll seen on the Trade dollar, as first issued in 1875. Struck in copper with a reeded edge. Probably gilt in the Mint as the field-device contrast is so pronounced. This really does look like a gold pattern, lacking the subdued surfaces usually seen on gilt pieces. Since there are only two known gold examples from these dies (Judd-1443), and none have appeared at auction in over twenty years, even the most advanced pattern specialists will have to settle for a specimen of Judd-1444. (The aluminum and white metal varieties, Judd-1445 and Judd-1445a respectively, are unique.) This flashy piece is fully struck and shows beautiful orange-yellow toning. The preservation is exemplary, and the gilding is well-executed, with no indication of the underlying copper, even over the high points. This is the sole Gilt Cameo example certified of this popular pattern. NGC ID# 2AC9, PCGS# 81753

**1877 Paquet-Designed Copper Half Dollar  
Judd-1541, PR65 Brown  
Only Two Pieces Know That Are  
Medallic Alignment and Bronzed**

**4434** 1877 Half Dollar, Judd-1541, Pollock-1712, Low R.7, PR65 Brown PCGS. CAC. Medallic Die Alignment. Liberty faces left with her hair tied in a bun at the base of the head, a headband inscribed LIBERTY and ornamented with a star. The date is below the bust and 13 stars are evenly spaced along the border. The reverse has a fanciful eagle with a square shield, olive branch, and three arrows in the claws. The legend UNITED STATES OF AMERICA surrounds the border with the denomination HALF DOL. below. Struck in copper with a reeded edge. There are seven pieces listed on the roster for Judd-1541. To our knowledge, only one other piece was bronzed and struck in medallic alignment. The bronzing makes this an especially interesting and attractive pattern. The Mint had long struck matte proof medals on the screw press. Perhaps these two pieces were struck — also like medals in medallic alignment — as test pieces to see how a coin would look with a bronzed, matte surface. The strike details are generally strong, but there is some softness in definition on the hair of Liberty, undoubtedly from die opposition with the eagle on the reverse. Each side displays even mahogany-brown color with just the slightest underlying hint of reddish patina.

*Ex: The Rarities Sale (Bowers and Merena, 8/1996), lot 480; Heritage FPL (8-10/1997); Bowers and Merena (6/2001), lot 1522; FUN Signature (Heritage, 1/2007), lot 1542; FUN Signature (Heritage, 1/2008), lot 3482. PCGS# 61883*

## 1879 'Washlady' Quarter in Copper Judd-1591, PR65 Red and Brown

**4435** 1879 Washlady Quarter Dollar, Judd-1591, Pollock-1784, R.6, PR65 Red and Brown PCGS. CAC. The Society Lady, better known as the Washlady, here in the quarter denomination. Charles Barber's obverse depicts a Liberty head with her hair bound up behind. IN GOD WE TRUST appears in small letters at the upper border with the date below and stars seven left, six right. An eagle on the reverse has wings displayed, holding an olive branch and three arrows in the dexter and sinister claws, respectively, with the wings passing in front of both. UNITED STATES OF AMERICA and E PLURIBUS UNUM are at the upper border with QUAR. DOLLAR below. Struck in copper with a reeded edge.

The Washlady patterns are admired far more today than they were in the late 19th century; the pejorative moniker dates to the sale of the New York Coin & Stamp sale of the Doughty Collection in April 1891, the term likely given by David Prosser. Perhaps 12 to 15 of the copper pieces survive today. An equal number of silver pieces are believed to exist. The surfaces of this lovely example are 80% original red. Blue-brown patina is mostly seen over the high points of the design. Nicely reflective fields.

*Purchased from Legend Numismatics.* NGC ID# 2AGH, PCGS# 71968

## 1879 Morgan Dollar Pattern in Copper Judd-1614, PR65 Red and Brown

**4436** 1879 Morgan Dollar, Judd-1614, Pollock-1810, Low R.7, PR65 Red and Brown PCGS. CAC. The obverse die is the regular issue Morgan dollar, but the reverse shows an eagle with sandwich board wings, similar to the Washington quarter. IN GOD WE TRUST is stretched out over the upper half of the periphery, and accompanies the remaining two statutory legends, which have the usual placements. Struck in copper with a reeded edge. Mirrored fields and predictably full motifs are awash in vibrant shades of rose and peach-orange with scattered blue accents. The visual appeal is exceptional throughout this wonderfully preserved Morgan dollar pattern, of which about a dozen specimens are known. NGC ID# 2AH5, PCGS# 71992

## 1880 Aluminum Stella, Flowing Hair Design Judd-1659, PR64 Cameo Extremely Rare

**4437 1880 Flowing Hair Four Dollar Stella, Judd-1659, Pollock-1859, High R.7, PR64 Cameo PCGS. CAC.** The Flowing Hair design by Charles Barber. Struck in aluminum with a reeded edge. This impressive near-Gem cameo proof exhibits deeply mirrored light gray surfaces with highly lustrous devices that provide a high degree of contrast. A few faint hairlines are evident on each side, consistent with the assigned grade of this piece. The obverse has a shallow lamination in the surface that extends from the lower hair curl to the 0 in the date. Similar characteristics are often seen on aluminum pieces, perhaps a reason that this material was not chosen for regular coinage production. This example has a full strike in all areas except the hair curls immediately over the ear, continuing through TY on the coronet. A well-made specimen, this piece provides excellent aesthetic appeal. Both sides have faint striae across the devices, similar to those seen on gold examples, usually attributed as roller marks from the planchet preparation procedure.

It is generally believed that five examples of this pattern issue are known, although only incomplete pedigree information is available, and the actual population may be slightly higher, perhaps six or seven pieces. We have compiled a roster of pieces known to us below:

### Roster of 1880 Flowing Hair Aluminum Stellas, Judd-1659

- 1. PR67 PCGS.** Paramount (Rare Coin List #10, 6/1975); Jeff Browning; Dallas Bank Collection (Sotheby's and Stack's, 10/2001), lot 370; Simpson Collection.
- 2. PR65 NGC.** Auction '89 (Superior, 7/1989), lot 874; September Sale (Stack's, 9/2003), lot 704; David Queller; Lemus Collection (Heritage, 1/2009), lot 1938. Gilt aluminum.
- 3. PR64 Cameo PCGS.** FUN Signature Auction (Heritage, 1/2007), lot 1600. **The present piece.**
- 4. Gem Proof.** Dr. Edward Maris; Maris Collection (H.P. Smith, 6/1886), lot 227; T. Harrison Garrett; Garrett Collection (Stack's, 3/1976), part of a complete set of aluminum stellas in lot 668; Harry W. Bass, Jr.; Harry W. Bass Foundation.
- 5. Brilliant Uncirculated.** Rio Rancho Estate (Superior, 10/1974), lot 138. Gilt aluminum (plate matching confirms this is not the Lemus Collection example in number 2 above).

**Additional Appearances** It is quite likely that some, and perhaps most, of these other appearances cited in the literature actually represent duplications of the coins above. They include:

- A.** Two pieces owned by Virgil Brand.
- B.** King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1995.
- C.** King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 2025.
- D.** The William H. Woodin-1914 ANS Exhibition-Waldo Newcomer coin.
- E.** Lee G. Lahrman Collection (Abe Kosoff, 2/1963), lot 915.
- F.** August F. Hausske, Central States Auction (RARCOA, 5/1969), lot 273.
- G.** 50th Anniversary Sale (Kagin's, 5/1975), lot 1061.

Much pedigree research has taken place in the pattern arena in recent years, especially due to the considerable efforts of Saul Teichman and others, published at USPatterns.com, but clearly a complete pedigree record of pattern coins is still not a reality. PCGS# 389234

## POLITICAL MEMORABILIA

### Peter Force's Declaration of Independence

**4438 William J. Stone for Peter Force: The Declaration of Independence.** Single oversized sheet, 26" x 29", copperplate engraving on thin rice paper. This printing was intended to be folded and placed in Volume I of Peter Force's 1837-1853 series of books (not present), *American Archives*.

In 1820, Secretary of State John Quincy Adams had commissioned William J. Stone of Washington to engrave an exact copy of the original Declaration of Independence onto a copperplate, a process that took three years to complete. Stone used a new Wet-Ink transfer process to create a copperplate from which facsimile copies could then be made. By wetting the original document, some of the original ink was transferred to the copperplate, which was then used for printing. There were 201 official parchment copies struck from the Stone plate. These are identified as "Engraved by W. J. Stone for the Department of State, by order" in the upper left corner, followed by "of J. Q. Adams, Sec. of State July 4th 1824" in the upper right corner. Stone kept one copy for himself (this copy now resides in the Smithsonian) and delivered 200 copies to the Department of State.

In 1833, historian and printer Peter Force, under contract with the Department of State authorized by an act of Congress, planned to compile a vast work in at least twenty volumes, to be known as the *American Archives, a Documentary History of the English Colonies in North America*. It included legislative records, documents, and historic private correspondence. Six volumes were published from 1837-1846 and three more between 1846-1853. The nine volumes covered the years 1774-1776. Inserted in Volume I was a copy of the Declaration of Independence. The "Wet Ink" copperplate created by William J. Stone had been removed from storage and, from it, Force printed copies on rice paper. In the lower left of each copy, Force printed: "W. J. STONE SC. WASHN." The printings were then folded and inserted into Volume 1 of the *American Archives* collection. Congress authorized up to 1500 copies of the series, but subscriptions fell far short of that number. The actual number of copies printed is unknown, with estimates ranging from about 500 to upwards of 1,000. Only a few hundred of Force's printing of the Declaration of Independence are known to exist today. On April 29, 1846, the U.S. Senate "Resolved, That the Committee on the Library be instructed to inquire into the expediency of distributing copies of the American Archives, now belonging to the government, among the historical societies, incorporated public libraries, colleges, and universities in the United States." There were still sets of the American Archives remaining so on February 21, 1849, the House issued "a Joint resolution authorizing the distribution of the 'American Archives,' under the direction of the Joint Committee on the Library, to literary institutions in the several States and Territories." In 1853, possibly because of the low demand for the nine volumes of American Archives already in print, Secretary of State William L. Marcy refused to approve Force's plans to continue his series.

**Condition:** Original folds with some minor weakness at intersections and two small tears (easily restored) along top horizontal fold. Minor marginal tears, two archivally-repaired. Paper generally bright. NGC ID# AL86.

## ERRORS

### 1981 Cent Obverse Struck Over a 1981-P Half Dollar Brilliant Uncirculated

**4439 1981 Cent Obverse Die Impression Struck Into Center of a 1981-P Half Dollar, Brilliant Uncirculated NGC.** A normally struck 1981-P Kennedy half dollar was struck, face up, between a 1981 Lincoln cent obverse die and a hard, blank surface. The result is a thimble-shaped piece with a sharply struck cent obverse at the center, and a steep rim that retains a recognizable, though distorted, half dollar design. The reverse has a flattened center but the half dollar reverse design remains apparent throughout. Although NGC has not ventured a grade, a loupe fails to locate any spots, abrasions, or other detractions. An undoubtedly unique mint error.

### 1976-S Jefferson Nickel Obverse Impression on a Clad Proof Ike Dollar Planchet

**4440 1976-S Jefferson Nickel — Obverse Impression Struck Into Center of a Dollar Planchet — NGC.** 22.37 gm, very close to the 22.68 gm statutory weight of a clad Eisenhower dollar. Very softly struck on a proof Ike dollar planchet with a plain edge, between mismatched dies. One side shows a nicely centered impression from a 1976-S proof Jefferson nickel obverse die. The nickel date and mintmark are bold, and the Jefferson portrait is fully outlined. The other side exhibits a larger diameter design, described by noted error authority Mike Diamond as from "a proof dime obverse die ... The dime design was hubbed or transferred into a larger area marked by many irregular features." Fred Weinberg adds, "this incredible proof nickel/dime striking is unique." Jon Sullivan examined this unique striking and said that "this is the only known muling of a U.S. dime obverse and a U.S. nickel obverse. This is one of the most fascinating mint errors I have ever seen." The date, mintmark, and neck outline of Roosevelt is perceptible in incused, reversed, and expanded format, similar to a mid-to-late stage brockage striking. We note that opinions may vary regarding the reverse impression, and we suggest personal examination prior to bidding.

## 1904 Double Eagle, MS62 Double Struck in Collar Rotated 180 Degrees Between Strikes

**4441 1904 Liberty Double Eagle — Double Struck, Rotated 180 Degrees in Collar — MS62 NGC. CAC.** Ex: Byers Collection. An outline of the hairbun from the initial strike is apparent in front of Liberty's mouth, while her profile from the first impression remains beneath the hairbun from the second strike. Outlines of the bust are also evident above the bust tip and beneath Liberty's eye. Neither strike was off center. The reverse also shows evidence of a prior strike, near the D in UNITED and on the field within the left scroll. The reeding is visible within the holder and does not show doubling, which suggests that the collar die was impeded or absent for the second strike. Perhaps the coin made it between the dies on two different occasions. The other possibility is that after the first strike, the coin widely rotated but failed to eject. The second in-collar strike created a prominent wire rim on the reverse between 9 and 12 o'clock. Lustrous and conservatively graded.

From our online auction archives, perhaps the closest match to the present error coin was an MS62 NGC 1925-D quarter eagle that was also double struck with a 180 degree collar rotation between strikes. That coin, lot 5345 from our April 2011 Rosemont Central States Signature, was hammered down for \$57,500. Another double struck 1904 Liberty double eagle, with a spread between strikes of only a few degrees, brought \$37,375 as lot 5685 in our 2006 Denver Platinum Night Signature.

*End of Platinum Night*

## SESSION THREE

### EARLY HALF DOLLARS

1794 O-101a Half Dollar  
VG Sharpness

- 4442** 1794 O-101a, T-7, High R.3 — Obverse Scratched — NGC Details. VG. This first-year half dollar is generally stone-white, although the right obverse margin and a portion of the right reverse display tan-brown toning. Sharp for the VG legend, since all stars and legends are clear. Two slender parallel abrasions on the left obverse field account for the NGC notation. The surfaces are microgranular and lightly hairlined, and the obverse has a slight rim knock at 2 o'clock. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, O-101a, VG10  
Classic First-Year Issue

- 4443** 1794 O-101a, T-7, High R.3, VG10 NGC. This is an evenly worn, original example of this first-year half dollar issue, showing consistent olive and gunmetal-gray toning that lightens to golden-gray over the relief elements. The borders are complete and the date is clear. Some crisscrossing adjustment marks are present on the obverse portrait. This late die state variant of O-101 is heavily cracked through the F in OF and from the rim to the left of the first S in STATES. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1795 O-108a, T-17 Half Dollar, XF45

- 4444** 1795 2 Leaves, O-108a, T-17, R.4, XF45 PCGS. A delicate crack joins the tops of AME on this late die state half dollar that represents the second year of the Flowing Hair design. Housed in an old green-label PCGS holder, this Choice XF representative exhibits wispy hairlines on the obverse. However, the sharpness is quite strong for a coin of the grade, and the gray-gold and lilac surfaces exhibit peripheral steel-blue patina.

Ex: *Bowers and Merena* (3/1989), lot 1988.

From *The Hamilton Collection*. NGC ID# 24E7, PCGS# 39226 Base PCGS# 6052

- 4445** 1795 2 Leaves, O-109, T-16, R.4 — Repaired, Re-Engraved, Whizzed — ANACS. VF20 Details. Liberty's hair, ear, and eye are re-engraved with a degree of skill. The portrait and obverse field have been smoothed. The gunmetal-gray surfaces are granular, but there are no detracting abrasions. NGC ID# 24E7, PCGS# 39227 Base PCGS# 6052

- 4446** 1795 2 Leaves, O-110, T-21, R.3, Fine 12 NGC. CAC. A lavender-gray Flowing Hair type coin with deeper shades in protected regions. The only consequential abrasions are a horizontal line below the right (facing) wing and a hair-thin line through stars 6 and 7. NGC ID# 24E7, PCGS# 39228 Base PCGS# 6052

1795 O-110a Half Dollar, VF35  
Two Leaves, Flowing Hair Type Coin

- 4447** 1795 2 Leaves, O-110a, T-21, R.3, VF35 PCGS. Tompkins Die State 4/2. Stars 5 and 8 are repunched. The berries are arranged 9x8 with two leaves below each wing. The late obverse die state shows a die crack from R into the field below TY through star 11 to the edge. Each side of this Choice VF Flowing Hair half dollar features a blanket of rich gunmetal-gray toning. Crisp detail on the hair, complete dentilation, and partial feathers on the eagle's breast make this a perfect example for type representation. Certified in an old green label holder.

Ex: *Allstate Coin Co.* (8/1992).

From *The Hamilton Collection*. NGC ID# 24E7, PCGS# 39229 Base PCGS# 6052

1795 O-113a Half Dollar, VF20  
A Over E in STATES, Ex: Norweb

**4448** 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, VF20 PCGS. CAC. Tompkins Die State 5/2. This is a late die state representative of Overton-113, featuring a blundered reverse die with the A in STATES over what was initially an E (STETES). Although the portrait is typically mushy, the other design elements exhibit strong detail with a predictable degree of friction. Attractive bluish-gray and violet patina colors each side. Bowers wrote of this piece in the Norweb catalog: "A very attractive example, with a medium gray surface overlaid with delicate lilac. Far finer than the Overton plate coin." Housed in an old green label holder with a green CAC approval sticker.

Ex: Norweb Collection, Part III (Bowers and Merena, 11/1988), lot 3021.

From The Hamilton Collection. NGC ID# 24E7, PCGS# 39254 Base PCGS# 6052

1795 Half Dollar, XF40  
Two Leaves, O-117a  
Rich Border Patina

**4449** 1795 2 Leaves, O-117a, T-3, R.4, XF40 ANACS. Cobalt-blue and golden-brown shades encompass the margins of this partly lustrous and pleasing Flowing Hair half dollar. No abrasions merit mention, though moderate adjustment marks (as made) are noticeable on the upper reverse. The field is boldly clashed near Liberty, but it is the radial crack below the bust tip that confirms the piece as O-117a. Encased in a small-sized ANACS holder.

From The Hamilton Collection. NGC ID# 24E7, PCGS# 39234 Base PCGS# 6052

1795 Two Leaves Half Dollar, VF25  
O-119, Ex: Norweb

**4450** 1795 2 Leaves, O-119, T-1, R.4, VF25 PCGS. CAC. Tompkins Die State 4/1. A die lump above star 15 and a die scratch near the right wingtip confirm this scarce variety. Deep lavender-gray toning shrouds each side of this smooth, problem-free Flowing Hair half dollar. The strike is strong and well-centered with a touch of indistinctness at the upper obverse and lower reverse borders. Adjustment marks appear on the rim above LIB. Small pedigree marks in the right obverse field have made and will continue to make identification of this piece possible. Housed in an old green label holder.

Ex: Norweb Collection, Part III (Bowers and Merena, 11/1988), lot 3022. The cataloger from that sale noted that this coin was purchased by Albert Fairchild Holden from the James B. Wilson Collection (Thomas Elder, 10/1908), possibly lot 230.

From The Hamilton Collection. NGC ID# 24E7, PCGS# 39236 Base PCGS# 6052

1795 O-125 Half Dollar  
AU Sharpness, Two Leaves

**4451** 1795 2 Leaves, O-125, T-13, R.4 — Cleaning — PCGS Genuine. AU Details. Tompkins Die State 2/2. Deep blue-green toning encompasses most of this unabraded and prominently clashed Flowing Hair type coin. The obverse is microgranular, and the reverse displays peripheral mint-made adjustment marks, but the overall eye appeal is nonetheless impressive. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

**4452** 1795 2 Leaves, O-130, T-8, Low R.5 — Cleaning — PCGS Genuine. VF Details. A better Flowing Hair die marriage, readily attributed by its unique 7x10 arrangement of berries on the wreath. This dove-gray and cream-white representative is moderately glossy and displays a patch of faint hairlines on the reverse exergue. No abrasions are readily apparent. NGC ID# 24E7, PCGS# 39242 Base PCGS# 6052

**1795 Flowing Hair Half Dollar, VF30**  
**Scarce O-130 Variety, Unique 7x10 Berries**

- 4453** 1795 2 Leaves, O-130, T-8, Low R.5, VF30 PCGS. CAC. The O-130 (T-8) variety is among the scarcer die pairs for the 1795 Flowing Hair issue. Seven berries on the left and 10 berries on the right help identify the variety — the only such configuration for the year. The O in OF is recut — although the Tompkins reference suggests it is really an O over a horizontal O. This example is smooth and richly toned in iridescent hues that are best viewed at an angle. Violet and blue shades are visible over olive-gray surfaces with some deep build-up around the devices. The coin is free of all but minor marks and abrasions with strong rims and dentils. Housed in an old green label holder with CAC endorsement.  
**From The Hamilton Collection.** NGC ID# 24E7, PCGS# 39242 Base PCGS# 6052

- 4454** 1801 O-101, T-2, R.3 — **Damage** — PCGS Genuine. VF Details. A horizontal mark on Liberty's forehead corresponds to the PCGS designation. The silver-gray surfaces otherwise show only unobtrusive abrasions near STATES OF. A better date with only two die marriages. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

- 4455** 1801 O-101, T-2, R.3 — **Improperly Cleaned** — NGC Details. VF. The 1801 is a better Draped Bust issue, the first half dollar coined with the large eagle reverse. This circulated example displays bright silver-white surfaces with scattered abrasions and hairlines. The amount of remaining detail is pleasing. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1801 Draped Bust Half, VF35**  
**O-101, Traces of Luster Remain**

- 4456** 1801 O-101, T-2, R.3, VF35 PCGS. Tompkins Die State 1/4. No half dollars were struck between 1798 through 1800. Coinage resumed in 1801 with the Heraldic Eagle reverse and a mintage of just 30,289 pieces from two die pairs. This O-101 example was struck from a perfect state of the obverse die and a late state of the reverse, with numerous areas of die rust and die clashing. Traces of mint luster persist in protected areas of both sides beneath rich, umber-gray toning. The central elements are sharp for the Choice VF level. Scarce this nice and seldom available in finer grades because of high demand. Housed in an old green label holder. Population: 26 in 55, 62 finer (6/16).  
*Ex: Winthrop Coins (8/1992).*  
**From The Hamilton Collection.** NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1801 Draped Bust Half Dollar, XF45**  
**Popular O-101, T-2 Variety**

- 4457** 1801 O-101, T-2, R.3, XF45 NGC. The base of the first A in AMERICA does not touch the wing feathers, identifying the O-101 variety. Half dollar production resumed in 1801 after a four year hiatus, with a mintage of 30,289 pieces. Only two die varieties are known for the date, with the O-101 being slightly more available than O-102. This lightly worn Choice XF specimen exhibits pleasing dove-gray surfaces that are minimally abraded for the grade.  
**From The Hamilton Collection.** NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**1801 Half Dollar, VF30**  
**Elusive O-102 Die Marriage**

- 4458** 1801 O-102, T-1, High R.4, VF30 PCGS. Overton-102 is the scarcer of the two 1801 half dollar varieties, identifiable in part by the lack of a die chip atop the reverse arrowheads. Even as a date, the 1801 Draped Bust half dollar is elusive, and demand is high. The present example displays light, even wear over boldly struck design elements. Lavender-gold hues emerge from the pewter-gray patina, and there are no adjustment marks or other distractions. NGC ID# 24ED, PCGS# 39268 Base PCGS# 6064

**1802 Draped Bust Half Dollar, VF20**  
**O-101, T-1, Sole Dies for the Date**

- 4459** 1802 O-101, T-1, R.3, VF20 PCGS. Tompkins Die State 1/1. A splash of blue, violet, and orange-gold toning adds interest to the obverse of this sharp VF example. Olive and silver-gray shades prevail otherwise, with strong definition on the reverse eagle and Liberty's hair strands. Faint lines on the obverse may be adjustment marks, now muted by moderate wear. Just 29,890 pieces were struck, making this early issue a key to the Draped Bust, Heraldic Eagle series. Housed in an old green label holder.  
*Ex: Becker and Kuehnert (1/1991).*  
**From The Hamilton Collection.** NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

1802 O-101 Half, VF30  
Tan and Green Toning

- 4460** 1802 O-101, T-1, R.3, VF30 ANACS. Only a single die pair is confirmed for the very scarce 1802 half dollar. Bullion depositors at the Mint preferred the silver dollar denomination, and mintages of half dollars were very low between 1796 and 1802. The present tan-brown and ocean-blue representative is nicely defined and is free from any consequential marks. Certified in an ANA cache holder. *From The Hamilton Collection.* NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

1802 Draped Bust Half Dollar, XF40  
Better Date, O-101, T-1

- 4461** 1802 O-101, T-1, R.3, XF40 NGC. The only dies for the date. The 1802 Draped Bust half dollar is a scarce issue, from a mintage of 29,890 pieces. This attractive XF specimen exhibits some light wear on the well-defined design elements and the pleasing surfaces are blanketed in shades of lavender-gray and golden-brown. Some slight granularity shows in the left obverse field. *Ex: Lexington Collection (Bowers and Merena, 1/1994), lot 3501.* *From The Hamilton Collection.* NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

1803 O-101 Half Dollar, AU58  
Large 3, Small Reverse Stars

- 4462** 1803 Large 3, Small Reverse Stars, O-101, T-1, R.3, AU58 NGC. Tompkins Die State 1/2. Lathe lines appear within the shield verticals. The eagle holds 12 arrows, distinguishing this O-101 variety from the other Large 3, Small Reverse Stars variant (O-102 with 13 arrows). Stone-gray toning covers the obverse, while blue and gold hues surround mostly brilliant centers on the reverse. A trace of cabinet friction has failed to meaningfully affect design detail. The right shield/wing juncture is softly struck. Pitting is noted along the lower reverse. Census (all 1803 varieties): 18 in 58, 8 finer (7/16). *From The Hamilton Collection.* NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

1803 Draped Bust Half Dollar, AU58  
O-104, Scarce Small 3 Variant

- 4463** 1803 Small 3, Large Reverse Stars, O-104, T-4, R.3, AU58 NGC. CAC. Tompkins Die State 2/2. The O-104 (T-4) variety is the sole representative of the Small 3 date logotype, identified more easily by the lack of a vertical serif on the crossbar of 3 than by the size of the digit. This example shows just the suggestion of wear and a sharp strike, with stronger-than-normal field stars and only slight weakness at the eagle's head from metal flow into the shoulder of Liberty. Attractive olive-gray toning shows glimmers of golden luster. The Tompkins reference indicates one other AU58 at the low end of the Condition Census. Housed in a prior generation NGC holder with CAC endorsement. NGC Variety Plus reports 3 in 58, 1 finer (7/16). CAC: 3 in 58, 2 finer (7/16). *Purchased from Sheridan Downey (1/1994).* *From The Hamilton Collection.* NGC ID# 24EF, PCGS# 39274 Base PCGS# 6067

1805/4 O-102 Half Dollar, AU50  
Condition Census Quality

- 4464** 1805/4 O-102, T-5, R.3, AU50 PCGS. Tompkins Die State 1/2. Diagnostic markers for this variety include the 5 in the date punched over an underlying 4, star 13 away from the drapery, and four berries on the olive branch. This AU50 half dollar is tied for fourth place on Steve M. Tompkins' Condition Census for the variety. The strike decidedly bold with stars 4 through 7 fully raised, a strong portrait, and only a bit of the usual softness on the lower portion of the shield. Iridescent gunmetal-blue toning richly colors each side. A prize for the series enthusiast. Housed in an old green label holder. Population (all 1805/4 varieties): 9 in 50, 17 finer (7/16). *Purchased from Marin Numismatics (8/1992).* *From The Hamilton Collection.* NGC ID# 24EH, PCGS# 39292 Base PCGS# 6070

- 4465** 1805 O-111, T-3, R.2, XF40 PCGS. A triple "collar" clash mark and a crack through AMERICA attribute this collectible Overton variety. Deep cobalt-blue and lavender toning bathes this moderately circulated early half dollar. We note only an inconspicuous "apostrophe" mark after the Y in LIBERTY. NGC ID# 24EG, PCGS# 39285 Base PCGS# 6069

**1806/5 Half Dollar, Colorful AU55  
O-103, Large Stars, Knobbed-Top 6  
Gold CAC Endorsement**

- 4466** 1806/5 O-103, T-8, R.2, AU55 PCGS. Gold CAC. Tompkins Die State 3/2. The point of the flag of an underdigit 5 extends from the top curve of the primary 6, while ghostly curves of a recut 0 are visible inside that numeral. A die crack runs through the lower points of star 1 to the hair. Forest-green and blue toning supplants lustrous peach-gold shades at the centers of this attractive Knob 6 overdated half. Little milling is visible on either side, characteristic of a later die state of the O-103 (T-8) variety. The strike is incomplete at the centers, yet the eye appeal of this Choice, nearly unmarked coin is undeniable. Housed in an old green label holder with the highly-valued Gold CAC endorsement. Population (all 1806/5 varieties): 10 in 55, 7 finer (7/16).  
Ex: RARCOA (8/1987).  
From The Hamilton Collection. NGC ID# 24EK, PCGS# 39299 Base PCGS# 6077

**1806 O-105a Half Dollar, AU55  
Knob 6, Large Obverse Stars**

- 4467** 1806 Knob 6, Large Stars, O-105a, T-5, R.2, AU55 PCGS. The T in LIBERTY is blatantly repunched, and die scratches from the right shield corner and fletchings ensures the attribution. A whisper of gold patina graces this partially lustrous and minimally marked Bust half. The strike is soft on the rightmost cloud, as often seen for the type. NGC ID# 24EJ, PCGS# 39305 Base PCGS# 6074
- 4468** 1806 Pointed 6, No Stem, O-109, T-15, R.1, XF45 PCGS. The well-known engraver's blunder without the branch stem inside the eagle's claw. Rich forest-green margins frame pearl-gray fields and devices. The fields display multiple sets of clash marks but are refreshingly unabraded. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073
- 4469** 1806 6 Over Inverted 6, O-111a, T-11, R.4, VF25 PCGS. Tompkins Die State 4/5. The 6 in the date is clearly punched over an inverted 6. The arrowheads are under the left foot of the N, and a cud forms over TED. Battleship-gray colors the centers, while ocean-blue, magenta, and gold encircle the edges. This well-circulated Draped Bust half dollar retains bold detail with the only area of mentionable softness on the right wingtip. Encapsulated in an old green label holder.  
From The Hamilton Collection. NGC ID# 24EL, PCGS# 39337 Base PCGS# 6078

**1806 Draped Bust Half, AU58  
O-116, Pointed 6, Short Stem  
Rich Border Toning**

- 4470** 1806 Pointed 6, Stem, O-116, T-20, R.3, AU58 PCGS. Tompkins Die State 3/5. Only a bit of high point rub separates this near-Mint State half from a significantly finer grade. Struck from a very late state of the dies, the O-116 (T-20) variety shows a series of triangular segments that confirm the variety, but they are more visible on earlier die states. They are present here as well, although weak, and less prominent than the die clashing a die cracks that frequent both sides. Steel-blue toning joins tan-gold and silver-gray shades on the obverse and reverse margins. Mint luster remains plentiful throughout. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

**1806 O-118a, T-24 Half Dollar, AU58  
Pointed 6, With Stem**

- 4471** 1806 Pointed 6, Stem, O-118a, T-24, R.3, AU58 NGC. The obverse is Tompkins die stage 2 with prominent clash marks and a faint die crack from the rim to star 3. The reverse is Tompkins die state 5. A census of varieties by Tompkins die state would be a good long term project for an avid collector. This attractive example has brilliant silver-white surfaces that host a hint of champagne toning. Nearly full luster remains. A small dark spot in the left obverse field will help aid tracking of this piece in the future. NGC ID# 24EJ, PCGS# 39322 Base PCGS# 6071

**1806 Draped Bust Half Dollar, MS60  
Pointed 6, With Stem, O-120, T-28**

- 4472** 1806 Pointed 6, Stem, O-120, T-28, R.3, MS60 PCGS. Gold CAC. A network of spidery die cracks shows from the lowest curl through the stars on the left, to the hair at the top, on the reverse, five berries show on the branch, only the two lowest ones below the branch having curls, identifying the O-120 variety. This well-detailed Mint State example offers lustrous surfaces, under shades of lavender-gray and pale gold toning. Housed in an old green label holder.

*From The Hamilton Collection.* NGC ID# 24EJ, PCGS# 39325 Base PCGS# 6071

- 4473** 1807 Draped Bust, O-102, T-8, R.2, XF45 PCGS. CAC. A well-defined final-year Draped Bust type coin with walnut-brown fields and deep steel-gray high points. No marks are reportable, and the eye appeal is both original and attractive. NGC ID# 24EM, PCGS# 39339 Base PCGS# 6079

**1807 Draped Bust Half Dollar, MS60  
Among the Finest O-103a Examples, Gold CAC**

- 4474** 1807 Draped Bust, O-103a, T-11, R.3, MS60 PCGS. Gold CAC. Tompkins Die State 2/3. This final-year Draped Bust half dollar shows star 8 pointing below the serif of the Y and the leaf pointing to the right of the I. The obverse is clashed, and the reverse exhibits a die crack through AMERICA. O-103 and this late die state are conditionally rare. Tompkins' Condition Census counts a single Uncirculated example in MS62 that last appeared in a Bowers and Merena sale in 2003. This piece, off the market for 26 years, ranks at least second on that list. The Gold CAC sticker suggests the quality is higher than the awarded numeric grade, and it is hard to disagree. Blue, rose, and gold patina around the edges dissipates to minimally toned centers. Surface preservation is excellent, and the strike, though soft over the portrait and eagle, is bold elsewhere. Housed in an old green label holder.

*Ex: Tangible Investments (4/1990).*

*From The Hamilton Collection.* NGC ID# 24EM, PCGS# 39341 Base PCGS# 6079

- 4475** 1807 Draped Bust, O-105, T-4, R.1, XF45 NGC. CAC. A blanket of deep golden-gray patina enriches this moderately circulated Draped Bust type coin. The reverse is exceptionally unabraded, though a lens shows faded marks on the right obverse field.

*Ex: Chicago Central States (Heritage, 4/2013), lot 2119, which realized \$1,997.50.* NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

**1807 O-105 Half Dollar, MS61  
Exceptional Draped Bust Type Coin**

- 4476** 1807 Draped Bust, O-105, T-4, R.1, MS61 PCGS. Gold CAC. Tompkins Die State 2/2. This is the only use of Reverse HH. The F in OF shows a complete lower right serif, and the leaf points between IC. Overton-105 is the most often seen variety of 1807 Draped Bust half dollars. Examples survive through MS66, and while this piece fails to make the Condition Census, it remains a wonderful type coin with beautiful stone-gray interiors that darken to olive and gold patina around the rims. Fully struck with exceptionally strong detail on the reverse. Housed in an old green label holder. Gold CAC: 1 in 61, 0 finer (7/16).

*Ex: Stack's (8/1987).*

*From The Hamilton Collection.* NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

- 4477** 1807 Draped Bust, O-108, T-1, R.3 — Improperly Cleaned — NGC Details. AU. Dove-gray, golden-brown, and slate toning competes for territory across this inoffensively hairlined half dollar. Luster dominates the borders, and there are no noticeable marks. The strike shows softness on the eagle's head and nearby stars. NGC ID# 24EM, PCGS# 39348 Base PCGS# 6079

**1807 Draped Bust Half Dollar  
O-110a, Choice AU**

- 4478** 1807 Draped Bust, O-110a, T-3, R.2, AU55 PCGS. Tompkins Die State 3/4. The late die stage of this available Draped Bust variety. Faint tan-gold toning visits the mostly smooth surfaces while mint luster remains strongest at the borders. The field stars and central motif definition show remarkable strength despite numerous die cracks and die clashing on both sides. A Choice, lightly toned example of the final-year Draped Bust design. NGC ID# 24EM, PCGS# 39352 Base PCGS# 6079

## BUST HALF DOLLARS

### 1807 O-111a Half Dollar, Memorable AU53 Ex: Pryor, 'Bearded Goddess'

- 4479** 1807 Capped Bust, Large Stars, 50 Over 20, O-111a, R.5, AU53 PCGS. CAC. Described in the Pryor catalog as “surely Condition Census,” the current Steve Herrman Condition Census lists this coin third in the O-111a roster behind two other About Uncirculated coins. There is always some consternation and discussion about what one considers an O-111a coin versus the more advanced die state of the O-111b, although the present example is clearly the O-111a variety. Boldly struck overall, the typical central weakness of the John Reich design is barely seen on this exceptional coin and the “Beard” is complete from chin to chest — albeit thin in spots. Both sides are attractively toned in pale-gray shades that deepen to grayish-blue at the margins. Soft mint luster glows faintly beneath the toning. The Bearded Goddess is an ultimate goal of all Bust half variety collectors, and this well-pedigreed example is a true feather in the cap for some fortunate bidder who recognizes its memorable quality and importance. Housed in its Pryor Collection green label holder with CAC endorsement.  
**From The Hamilton Collection.** NGC ID# 357A, PCGS# 39355 Base PCGS# 39357

### 1807 Capped Bust Half Dollar, AU53 O-111b, Bold 'Bearded Goddess' Die Break

- 4480** 1807 Capped Bust, Bearded Goddess, O-111b, R.5, AU53 NGC. The old, pre-2002 NGC holder calls this the “Beard Lady” variety, giving our catalogers a chuckle. This being numismatics (not the circus), the preferred moniker is the “Bearded Goddess.” Under any name, the coin is a splendid example that displays the most-famous die crack of the series — bold and strong — from chest to chin. Remnants of the crack are visible from the headband, through the hair, eye, nose, and mouth as well, confirming the O-111b variety. Pleasing shades of lilac and golden-gray toning cover both sides, with mint luster still present at the margins. The few light lines and small marks exist from normal circulation, but they are grade-appropriate on this smooth and attractive example. The late die state is preferred by many specialists, although the uncracked state of the dies (O-111) is the greater rarity in the series.  
**From The Hamilton Collection.** NGC ID# 24EN, PCGS# 39358 Base PCGS# 39357

- 4481** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU50 PCGS. The 5 over 2 details are clear. Dusky forest-green, wheat-gold, and stone-gray toning. A minimally marked example with vibrant peripheral luster. The stars are bold, though portions of the eagle are lightly struck.  
*Ex: New York Signature (Heritage, 7/2002), lot 8048, which realized \$1,725.* NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

### 1807 O-112 Half Dollar, AU50 Capped Bust, 50 Over 20

- 4482** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU50 PCGS. CAC. This blundered die variety occurred when the engraver mistakenly chose a punch for the digit 2 instead of the 5 to begin entering the denomination. Either he thought he was engraving a quarter die, or he simply grabbed the wrong punch due to the similarities between the two digits. The mistake was quickly noticed, and the proper digit was then entered into the die. Both sides of this fully natural gray-brown half dollar retain noticeable luster with splendid gold and iridescent overtones. Housed in a first-generation PCGS holder.  
*Purchased from H.R. Cairns (6/1/1989).*  
**From The Hamilton Collection.** NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

### 1807 Capped Bust Half, AU58 50 Over 20, O-112 Variety

- 4483** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU58 NGC. The serifs on the 1 in the date are complete and the remnants of an undertype 2 are visible beneath the 5 in the denomination, identifying the O-112 variety. This attractive AU58 specimen represents the first year of the Capped Bust design, with sharply detailed design elements that show just a trace of wear. The lightly abraded surfaces are blanketed in shades of sea-green and lavender-gray toning. Some clash marks show in the upper reverse field.  
**From The Hamilton Collection.** NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

1807 O-114, Large Stars Bust Half, Choice AU  
Intermediate Die State, Gold CAC

**4484** 1807 Capped Bust, Large Stars, O-114, High R.3, AU55 PCGS. Gold CAC. The late die state is not plated in Overton, nor is it assigned a separate sub-variety, but the Steve Herrman listing recognizes the incremental scarcity of the late die state with extensive die cracks on both the obverse and reverse. Called O-114'a,' the late stage of the dies is an estimated R.5+ rarity rating in the Herrman Condition Census. The current coin is a spectacular example of an intermediate die stage, with the late die state reverse die cracks all in place but only the faint beginnings of some obverse cracks. This is a beautifully toned and still-lustrous example. The sharply defined elements including the Large Stars are crisply brought up. One has to wonder if slight flatness on a few of the curls influenced the grade (typical of the new John Reich design), since little or no rub is seen. Nice mint luster remains at the borders on both sides, yielding to exquisite sea-green, blue, and rose-gray toning with orange-gold accents at the centers. The coin is assigned the Gold CAC endorsement for undesignated quality, housed in a prior generation green label holder. Population (all Large Stars die states combined): 3 in 55, 15 finer (7/16). Gold CAC: 1 in 55, 0 finer (7/16).

Ex: Sheridan Downey (8/94).

1808/7 Half Dollar, O-101, AU50  
First Capped Bust Overdate, Gold CAC

**4485** 1808/7 O-101, R.1, AU50 PCGS. Gold CAC. The prominent die crack through the stars on the left and the date, and the break in the feathers near the right border of the shield identify the O-101 variety. The remnants of an undertype 7 can be detected below the final 8 in the date, making this the first overdate of the Capped Bust series. This lightly worn and lightly abraded AU specimen retains traces of original mint luster, under shades of pale gold and gunmetal-gray toning. Housed in an old green label holder.

Ex: Purchased from "Rarities" on 3/31/1987 for \$500.

From The Hamilton Collection. NGC ID# 24EP, PCGS# 39378 Base PCGS# 6091

1808/7 O-101 Half Dollar, AU55  
First Capped Bust Overdate

**4486** 1808/7 O-101, R.1, AU55 NGC. CAC. Both dies exhibit extensive clash marks, die cracks, and flow lines. This is one of the popular Capped Bust half dollar varieties that is individually listed in the *Guide Book*. The 1808/7 is the first overdate in the Capped Bust series, and it is clear enough to be recognized with out magnification. Tan and light brown surfaces host delicate blue overtones on this Choice AU half dollar.

From The Hamilton Collection. NGC ID# 24EP, PCGS# 39378 Base PCGS# 6091

1808 Capped Bust Half, MS63  
Possible Condition Census Example, O-102

**4487** 1808 O-102, High R.5, MS63 PCGS. CAC. An oval dot near the junction of the eagle's wing and shield identifies the rare O-102 variety. Off the market for 28 years, this sharply detailed Select example probably ranks in the Condition Census for the variety. The lightly marked surfaces are blanketed in pleasing shades of lavender-gray and greenish-gold toning. Housed in an old green label holder.

Ex: Purchased from "Cairns" on 10/8/1988 for \$4,100.

From The Hamilton Collection. NGC ID# 24EP, PCGS# 39362 Base PCGS# 6090

**4488** 1808 O-102a, R.2, AU55 PCGS. The radial die crack across the left border of the 0 in the date affirms status as Overton-102a. Gunmetal-blue and olive-gold toning blankets this unmarked and briefly circulated half dollar. Luster glimmers from the margins and motifs. NGC ID# 24EP, PCGS# 39363 Base PCGS# 6090

**1808 Capped Bust Half, O-103, AU58  
Spectacular Rim Toning**

- 4489** 1808 O-103, R.1, AU58 NGC. CAC. The left base of the 1 in the date is defective and the letters AM in AMERICA are joined, with the scroll ending below the left side of the upright of the M, identifying the O-103 variety. The brilliant silver centers of this near-Mint specimen yield to vivid shades of sea-green and cobalt-blue at the rims. Only a trace of wear is evident on the sharply detailed design elements and the lustrous surfaces are remarkably unabraded.  
*Ex: Worrell Collection (Superior, 9/1993), lot 1265.*  
**From The Hamilton Collection.** NGC ID# 24EP, PCGS# 39364 Base PCGS# 6090

- 4490** 1808 O-104, R.2, AU53 PCGS. A distinctive variety due to three bold die lines near the R in LIBERTY, the ribbon ends, and the branch stem. A lightly worn and unblemished representative with pearl-gray and straw-gold toning. NGC ID# 24EP, PCGS# 39365 Base PCGS# 6090

- 4491** 1809 XXX Edge, O-102, R.1, XF45 PCGS. A dusky autumn-brown and dove-gray representative. The surfaces show only trivial contact. Moderate wear on the curls and left (facing) wing determines the grade. O-102 has a widely repunched U in UNITED and a row of "shark's teeth" die defects above the eagle's head. NGC ID# 24ES, PCGS# 39380 Base PCGS# 6093

**1809 Half Dollar, MS63  
XXX Edge, O-102**

- 4492** 1809 XXX Edge, O-102, R.1, MS63 PCGS. CAC. The U in UNITED is recut, and a series of vertical marks appear below the scroll. Lavender patina unquestionably colors most of this outstanding Capped Bust half. Additional splashes of blue, gold, green, and amber toning occur intermittently over each side, enhancing the eye appeal considerably. Well-struck with softness over the left wing feathers. Housed in an old green label holder and recognized by CAC for quality.  
**From The Hamilton Collection.** NGC ID# 24ES, PCGS# 39380 Base PCGS# 6093

- 4493** 1809 Normal Edge, O-103, R.1, AU58 PCGS. A die line above the inner point of star 5 confirms the obverse die. The reverse is typically identified by the clockwise rotation of the M in AMERICA. This satiny cream-gray example has unabraded fields and a few faded thin marks on the central obverse. The strike is good aside from moderate blending of impression on the eagle's head. NGC ID# 24ES, PCGS# 39392 Base PCGS# 6092

**1809 Capped Bust Half, MS61  
Normal Edge, O-105, Ex: Pittman**

- 4494** 1809 Normal Edge, O-105, R.2, MS61 NGC. Ex: Pittman. A tine through the inner points of star 5 and a die line connecting the right-most leaf to the edge identifies the O-105 variety. This attractive Mint State specimen offers well-detailed design elements, with just a touch of the usual softness on the eagle's left (facing) wing. Vivid shades of greenish-gold, lavender-gray, and teal-blue toning blanket the pleasing surfaces, with vibrant mint luster underneath. Abrasions are minimal for the grade and eye appeal is terrific.  
*Ex: Wayte Raymond; purchased by John Jay Pittman in 1945; Pittman Collection, Part II (David Akers, 5/1998), lot 1455.*  
**From The Hamilton Collection.** NGC ID# 24ES, PCGS# 39394 Base PCGS# 6092

**1809 Half Dollar, O-106', MS64  
'Prime' Early Die State, Finest Known**

- 4495** 1809 Normal Edge, O-106', R.5, MS64 NGC. CAC. A long die line from the top-right shield corner extends into the wing, the lower-left serif on N in UNITED is recut, and the 9 in the date leans sharply right to confirm the O-106 variety. The lack of a die crack through the left-hand stars indicates the "prime" early die state, believed to be very scarce. The latest Steve Herrman census lists just two examples, where the finest grades XF45. This coin is a Condition Census example regardless of the die state, but as an O-106' example it is far and away the finest-known. Reflective surfaces show shades of azure-blue, wheat-gold, and auburn-brown over smooth, nearly unmarked surfaces. Sharply struck, the coin is housed in an early pre-hologram NGC holder with CAC endorsement.  
*Purchased from Heritage (10/1991).*  
**From The Hamilton Collection.** NGC ID# 24ES, PCGS# 39395 Base PCGS# 6092

**1809 Half Dollar, O-107, MS62  
Old Green Label Holder With CAC  
Low Condition Census, III Edge**

**4496** 1809 III Edge, O-107, R.3, MS62 PCGS. CAC. III Experimental Edge. A satiny iridescent sheen covers both sides of this lustrous Capped Bust half in shades of aquamarine, cerulean-blue, and peach-gold. Mint luster swirls across the smooth and well-produced surfaces. A modified design met with mixed results in 1809 in an attempt to improve the strike of the motifs. This O-107 example is sharply struck including the eagle's left wing, although the talons show minor weakness. The fields and raised devices show no untoward marks or abrasions. Housed in an old green (turned yellow) label holder with CAC endorsement.

*Ex: Heritage (1/1991).*

*From The Hamilton Collection.* NGC ID# 24ES, PCGS# 39383 Base PCGS# 6094

**4497** 1809 III Edge, O-109a, R.2, AU50 PCGS. CAC. The heavy die crack through the center of AMERICA attributes this attractive Bust half dollar. Cream-gray centers cede to golden-brown, lilac, and aquamarine borders. The centers show incompleteness of strike, but marks are few and unworthy of comment. NGC ID# 24ES, PCGS# 39387 Base PCGS# 6094

**4498** 1809 III Edge, O-109a, R.2, AU53 NGC. The beginning stages of a die break through AMERICA on the reverse identify the middle die state of the O-109 marriage. This AU coin displays light golden-gray patina with hints of luster and amber toning in the protected peripheral fields. The strike is bold and even, and the central devices show little high-point wear. NGC ID# 24ES, PCGS# 39387 Base PCGS# 6094

**1810 Half Dollar, Near-Mint  
O-101a, Small 8  
Struck 5% Off-Center**

**4499** 1810 O-101a, R.1 — Off-Center — AU58 ANACS. This is an attractive, near-Mint State early Bust half error. The coin is struck 5% off center toward 10:30. Dentilation is absent between 9 and 1 o'clock on the obverse, and 5 and 8 o'clock on the reverse. The edge is concealed by the holder, but it presumably exhibits normal lettering, executed prior to the strike. Extensive die cracks across both borders allow prompt attribution as the O-101a variety. A mostly lustrous and pleasing piece with exceptional peripheral golden-brown and forest-green toning. Housed in a small-sized ANACS holder.

*From The Hamilton Collection.* NGC ID# 24ET, PCGS# 39405 Base PCGS# 6095

**1810 O-101a Half Dollar, AU58  
Near-Terminal Die State**

**4500** 1810 O-101a, R.1, AU58 PCGS. Both dies are cracked with the obverse die shattered. A short crack forms a small break from the milling to the outer point of star 1. Housed in a first-generation PCGS holder, this near-Mint half dollar exhibits ivory surfaces with virtually full luster. Both sides have delicate peripheral gold toning, with two dark toning spots on the obverse for identification.

*From The Hamilton Collection.* NGC ID# 24ET, PCGS# 39405 Base PCGS# 6095

**1810 O-102 Half Dollar, MS63  
Natural Golden-Gray Patina**

**4501** 1810 O-102, R.1, MS63 PCGS. CAC. Attractive golden-gray patina displays blue accents on the high points of this Select Uncirculated half. Well-struck at the margins, the O-102 variety is usually weakly struck at the centers affecting Liberty's portrait (with a characteristic weak chin) and the eagle's left wing. In contrast, the scroll and its lettering are razor-sharp. Star 12 is recut with a small extra point. There are no significant marks to mention on this CAC-endorsed example. Population (all 1810 varieties): 28 in 63 (2 in 63+), 16 finer (7/16). CAC: 3 in 63, 5 finer (7/16).

*From The Hamilton Collection.* NGC ID# 24ET, PCGS# 39406 Base PCGS# 6095

**1810 O-104 Half Dollar, MS63  
Gold CAC**

**4502** 1810 O-104, R.3, MS63 NGC. Gold CAC. An impressive example of this scarce die marriage, this piece represents an extremely early die marriage with bold obverse and reverse border details and no evidence of die cracks on either side. This highly lustrous half dollar exhibits satin surfaces with sky-blue and champagne toning that is evenly dispersed across both sides. The strike is bold and well-centered.

*Ex: Stack's (11/1986), lot 319; Worrell Collection (Superior, 9/1993), lot 1267.*

*From The Hamilton Collection.* PCGS# 39409 Base PCGS# 6095

**1810 Half Dollar, O-104a, Lustrous MS64  
Iridescent Rainbow Toning**

- 4503** 1810 O-104a, R.3, MS64 NGC. CAC. The O-104 reverse has a smudged area above the shield in line with the second gule. This late die state example features a crack across the top of D STAT. Only a single MS64 is currently listed at the top of the Condition Census, where this piece should now rank. Vibrant luster percolates emanates from beneath iridescent toning that covers this spectacular Choice Capped Bust half dollar. Razor-sharp with full veins on the olive leaves. This piece should find a good home in a high-end set. Certified in a prior generation holder.  
*From The Hamilton Collection.* PCGS# 39409 Base PCGS# 6095

**1810 O-110 Half Dollar, Near-Mint  
Exceptionally Smooth Surfaces**

- 4504** 1810 O-110, R.2, AU58 PCGS. A charming wheat-gold near-Mint representative. The cartwheel luster is substantial, and the portrait high points show only a hint of wear. Both sides exhibit faded clash marks but abrasions are essentially absent. The right obverse field exhibits a trace of struck-in grease. Close to Condition Census quality for this underappreciated Overton variety. NGC ID# 24ET, PCGS# 39420 Base PCGS# 6095

**1811/10 Capped Bust Half, MS63  
Popular O-101 Overdate**

- 4505** 1811/10 O-101, R.1, MS63 PCGS. Slate-gray surfaces display deep-blue and violet accents across the smooth and lustrous surfaces of this Select Mint State half. The strike shows slight blending on a few curls, but the eagle is razor-sharp. Die erosion at the margins minimizes the dentils, and the stars are drawn to the rim. The overdate consists of a pair of dots and the barely visible curve of an 0 near the final 1 — hardly noticeable as more than a misplaced period (or in this case, a comma) between the 8 and second 1. Housed in an old green label holder. Population (both 1811/10 varieties combined): 6 in 63 (1 in 63+), 6 finer (7/16).  
*Ex: Heritage (1/1992).*  
*From The Hamilton Collection.* NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

**1811/10 O-101 Half Dollar, Memorable MS63  
Dramatic Toning, Rare Early Die State**

- 4506** 1811/10 O-101, R.1, MS63 NGC. CAC. Stunning shades of fuchsia-pink and amazonite-blue gleam from the rich forest-green and gray patina of this toned and lustrous O-101 Punctuated Date variety. Struck from the early state of the dies, the dentils are sharp as are the right-side stars, which are not drawn to the edge (nor is the date). The two diagnostic dots located on each side of the second 1 are fully formed and pinpoint sharp. A clear outline of the curved underdigit 0 appears to the right of the final 1. Liberty's spiked cap is equally sharp. Rare this well-defined, housed in an old, pre-barcode NGC holder with CAC endorsement.  
*Purchased from the Delaware Valley Rare Coin Co. (8/1989).*  
*From The Hamilton Collection.* NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

1811/10 O-101 Half Dollar, MS64  
The Garrett-Pryor Coin

- 4507** 1811/10 O-101, R.1, MS64 PCGS. CAC. Ex: Pryor Collection. Here is a coin that should intrigue serious connoisseurs of this series. The origin of the so-called punctuation mark between 81 has long been debated, with some suggesting it is actually 11 punched over 09. All 1811/10 halves are rare in Mint State, and this exceptional near-Gem compares to the finest known examples of the O-101 variety. The Pogue collection contained an example in MS64+ without CAC endorsement, realizing \$22,325 in September 2015. This coin was mentioned in that sale as another notable survivor. It ranks second on the Overton-Parsely Condition Census with a single MS65 finer. The central motifs exhibit a bold impression, while the outer design elements become progressively softer. Splendid blue, green, and amber hues converge around violet-gray interiors. Housed in a green label holder. Population (both 1811/10 varieties): 5 in 64, 1 finer (7/16).  
Ex: Garrett Collection, Part I (Bowers and Ruddy, 11/1979), lot 292; James Bennett Pryor (Bowers and Merena, 1/996), lot 22.  
**From The Hamilton Collection.** NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

1811 O-103a Half Dollar, MS62  
Late Die State

- 4508** 1811 Large 8, O-103a, R.3, MS62 PCGS. CAC. The obverse has a bold die crack from the border to the left side of the second 1, the drapery clasp, and hair lock, fading out as it approaches the ear. Prominent clash marks are noted on both sides. Housed in a first generation PCGS holder, this lovely Mint State half dollar has light gold toning over satiny silver luster on the obverse, and faint champagne toning on the reverse.  
*Purchased from House of Stuart (9/10/1988).*  
**From The Hamilton Collection.** NGC ID# 24EU, PCGS# 39424 Base PCGS# 6096

- 4509** 1811 Small 8, O-106, R.3, AU58 PCGS. CAC. Largely untoned save for a narrow band of gray-gold toning at the rims, this near-Mint Capped Bust half shows few signs of actual circulation. Nearly full cartwheel luster remains on both sides. Sharply struck from lightly clashed dies, with slight blending on Liberty's highest curls and the obverse stars drawn to the edge and weak milling (as always for the O-106 variety). CAC endorsed and high-end for the grade. NGC ID# 24EU, PCGS# 39429 Base PCGS# 6097

1811 O-108a Half Dollar, MS62  
Small 8, Fully Patinated

- 4510** 1811 Small 8, O-108a, R.2, MS62 PCGS. A rising die crack through UNITED attributes the Overton subvariety. This unabraded, undisturbed, and coruscating half dollar is encompassed by deep walnut-brown and battleship-gray toning. The strike is bold save for minor blending on the curls.  
Ex: Dallas Signature (Heritage, 10/2006), lot 1134, which realized \$1,725. NGC ID# 8Z63, PCGS# 39432 Base PCGS# 6097

**1811 Capped Bust Half, MS63  
Small 8, O-109 Variety**

- 4511** 1811 Small 8, O-109, R.2, MS63 PCGS. CAC. A heavy die crack through the left side of the first S in STATES identifies the O-109 variety. This attractive Select specimen is sharply detailed in most areas, but a touch of softness shows on the eagle's wing above the die crack. The crack seems to have created an uneven surface in this area, with the surface on the left lower than the surface on the right. Vibrant mint luster shines through shades of lavender-gold toning. Housed in a green label holder.  
*From The Hamilton Collection.* PCGS# 39433 Base PCGS# 6097

**1811 Small 8 Half Dollar, O-110, MS64  
Sharp and Lustrous**

- 4512** 1811 Small 8, O-110, R.1, MS64 PCGS. CAC. The available O-110 variety shares its obverse with the much rarer O-113, but the former is distinguished by the AM in AMERICA being joined at the bases — O-113 does not have this feature. This Plus-graded Choice example is struck just a trifle off-center toward 10 o'clock on the obverse and 8 o'clock on the reverse; the dentils remain complete but are very thing through this area, whereas the rim is broad and wide along the opposite border. The stars, eagle's talons, and Liberty's hair curls all show sharp detail. Luster is satiny and free of major abrasions, showing medium olive-gold toning that lightens slightly toward the centers; russet overtones also appear around the peripheries. Population (all Small 8 varieties included): 27 in 64 (5 in 64+), 3 finer. CAC: 10 in 64, 10 finer (7/16). NGC ID# 24EU, PCGS# 39434

**1811 Capped Bust Half, Richly Toned MS64  
O-111, Small 8, Early Die State**

- 4513** 1811 Small 8, O-111, R.1, MS64 NGC. CAC. Spectacular, deep multicolor toning encompasses both sides of this sharply struck half. Full dentils on both the obverse and reverse suggest an early state of the dies. The O-111 shows IT of UNITED solidly joined at the top, while the obverse displays two tiny dots below the ear to confirm the variety. The surfaces do not reveal any significant imperfections, with a short toned-over line near the 8 in the date visible under magnification but of little consequence. Shades of sea-green, gold, cobalt-blue, and burnt orange comprise the rich patina. Housed in a prior generation NGC holder with CAC endorsement. The Steve Herrman Condition Census suggests MS62 is the top O-111 in the early die state, making this example possibly the finest-known. CAC: 2 in 64, 0 finer (7/16).  
*From The Hamilton Collection.* NGC ID# 24EU, PCGS# 39436 Base PCGS# 6097

**1812/1 Capped Bust Half, VF25  
Elusive Large 8, O-101a Variety**

- 4514** 1812/1 Large 8, O-101a, R.5, VF25 NGC. The large 8 in the date and the recut N in UNITED identify the elusive O-101 variety. The die crack through 12 indicates the late die state O-101a. The remnants of an undertype 1 are faintly visible below the 2 in the date. From a late state of the dies, this coin shows an obverse die crack from 18 in the date across the field, through the stars on the left to the rim above star 7. Another crack connects all the stars on the right. Despite some wear, the clasp remains bold and the hair above the brow retains much interior detail. The lavender-gray surfaces are lightly abraded.  
*From The Hamilton Collection.* NGC ID# 24EX, PCGS# 39442 Base PCGS# 6102

1812/1 Capped Bust Half, AU55  
Guide Book Overdate, O-102

- 4515** 1812/1 Small 8, O-102, R.2, AU55 PCGS. CAC. The small 8 in the date and the recut N in UNITED identify the O-102 variety. This Choice AU specimen offers well-detailed design elements, with a touch of flatness on the star centers. Some interesting clash marks are seen above the date and in the right obverse field. Shades of pinkish-gray and pale gold toning enhance the lightly abraded surfaces. Housed in a green label holder. Purchased from Winthrop on 10/20/1992.  
**From The Hamilton Collection.** NGC ID# 24EY, PCGS# 39443 Base PCGS# 6101

1812/1 Capped Bust Half Dollar, MS62  
Small 8, O-102a Guide Book Variety

- 4516** 1812/1 Small 8, O-102a, R.2, MS62 NGC. CAC. The small 8 in the date and the remnants of an undertype 1 below the primary 2 identify the O-102 variety. The blurry die crack from the base of the second 1 to the stand of the overpunched 1 and the clash marks above the date identify the late die state O-102a. Iridescent shades of magenta and greenish-gold toning enhance the pleasing surfaces of this MS62 specimen, with scattered, minor signs of contact and vibrant mint luster underneath. The design elements are well-detailed, showing some of the usual flatness on the stars.  
**From The Hamilton Collection.** NGC ID# 24EY, PCGS# 39444 Base PCGS# 6101

1812 O-103 Half Dollar, MS63  
Cracked Reverse Die

- 4517** 1812 Large 8, O-103, R.1, MS63 PCGS. CAC. Minor clash marks are noted on both sides, and the reverse has a die crack through the denomination and olive leaves to the top of the U in UNITED. This Select Mint State example is housed in a first-generation PCGS holder and exhibits frosty ivory luster with lovely light gold and powder-blue toning along the borders.  
Purchased from House of Stuart (10/8/1988).  
**From The Hamilton Collection.** NGC ID# 24EW, PCGS# 39446 Base PCGS# 6100

1812 Half Dollar, O-103, MS64  
Lustrous, Choice Large 8 Type Coin

- 4518** 1812 Large 8, O-103, R.1, MS64 NGC. Pale silver-blue and peach-gold toning allows silver luster to shine through on both sides of this near-Gem, Large 8 half. A quartet of die dots help identify the O-103 variety — two dots beneath I in AMERICA, another below U of UNITED, and a centering dot between crossbars 4 and 5 combine with a broadly recut O in OF. Vertical die lines above the eagle's left wing confirm the reverse. The obverse shows an evenly spaced wide date with the figures slanted left. Sharply struck except for some of the stars — which are diagnostically flat on the O-103 — with bold die clashing on the obverse that displays a mirror image of PLURIBUS above the date. Otherwise, the surfaces are nearly mark-free, attractive, and sharply struck. NGC ID# 24EW, PCGS# 39446 Base PCGS# 6100

1812 Large 8 Half Dollar, MS62  
Conditionally Rare Overton-106

- 4519** 1812 Large 8, O-106, R.3, MS62 PCGS. Several heavy die cracks, particularly prominent from the N in UNITED, promptly attribute this conditionally rare Overton variety. Both sides also display double sets of clash marks. The coruscating and unabraded surfaces show almond-gold and steel-blue toning. The obverse die is misaligned several degrees toward 1:30. The only recent auction appearance of an Uncirculated example of O-106 was lot 4391 in our January 2014 FUN Signature, which graded MS64 PCGS. NGC ID# 24EW, PCGS# 39451 Base PCGS# 6100

1812 O-107 Half Dollar, MS64  
Early Die State

- 4520** 1812 Large 8, O-107, R.1, MS64 PCGS. CAC. This early die state 1812 O-107 half dollar shows no evidence of the die lump that soon develops adjacent to the top of the left wing. An impressive Choice Mint State example, this half dollar has gorgeous original gray-brown toning on both sides with splashes of gold and iridescent peripheral toning, especially on the obverse. Adequately centered and boldly struck with wider denticles at the lower obverse and upper reverse.  
*From The Hamilton Collection.* NGC ID# 24EW, PCGS# 39452 Base PCGS# 6100

- 4521** 1812 Large 8, O-108, R.2, AU58 PCGS. Apricot-gold toning embraces this lustrous Capped Bust type coin. Although not yet O-108a, the die state is late with many cracks and clashes. The obverse has a few delicate vertical hairlines, and the reverse field exhibits an unobtrusive trio of thin marks. PCGS# 39453 Base PCGS# 6100

- 4522** 1812 Large 8, O-110, R.1, AU55 PCGS. CAC. The O-110 die pair shows ME in AMERICA closely spaced with the E slightly higher. A blanket of rich toning confirms the originality of this Choice Capped Bust half dollar. Design detail will impress the most discerning specialist, as will the phenomenal eye appeal. Smooth and minimally marked. Housed in a first generation holder.  
*Ex: Sheridan Downey (11/1989).*  
*From The Hamilton Collection.* NGC ID# 24EW, PCGS# 39457 Base PCGS# 6100

- 4523** 1812 Large 8, O-110, R.1, AU58 PCGS. Rich jade-green, lilac-red, and peach-gold toning encompasses this coruscating example. Minor wear on the curls confirms a brief stint in early American commerce. The fields are multiply clashed but minimally abraded. NGC ID# 24EW, PCGS# 39457 Base PCGS# 6100

1813 O-101 Half Dollar, AU55  
50C over UNI

- 4524** 1813 50 C Over UNI, O-101, R.2, AU55 PCGS. CAC. The misplaced letters UNI are prominently visible between 50 and C at the lower reverse of this Choice AU half dollar. This important variety enjoys a separate listing in the Guide Book. Both sides exhibit faint hairlines that undoubtedly prevent a higher grade. The obverse has pastel gold, blue, and iridescent toning. The reverse has light gold toning at the center, within a blue peripheral frame.  
*Purchased from Sheridan Downey (9/4/1990).*  
*From The Hamilton Collection.* NGC ID# 24F2, PCGS# 39473 Base PCGS# 6104

1813 Bust Half, MS62  
O-101, 50C Over UNI

- 4525** 1813 50C Over UNI, O-101, R.2, MS62 NGC. The popular *Guide Book* variety with a blundered reverse. The UNI in UNITED was engraved in place of the denomination, before the error was discovered and partially effaced. This is a lustrous example with light and attractive caramel-gold, rose-gray, and forest-green toning, particularly evident near the borders. The strike is crisp save for star 1 and weakness of the scroll at PLUR in PLURIBUS. Census: 5 in 62, 11 finer (6/16).  
*Ex: Long Beach Signature (Heritage, 9/2007), lot 1474.* NGC ID# 24F2, PCGS# 39473 Base PCGS# 6104

1813 O-101a Half Dollar, MS63  
Popular 50C Over UNI Variety

- 4526** 1813 50C Over UNI, O-101a, R.4, MS63 PCGS. The denomination is clearly punched over UNI, creating a highly desirable *Guide Book* variety that is rarely found so fine. Die lapping on the lower fletchings confirms the late die state. Deep violet and gold hues coalesce throughout this Select representative, concealing minute scattered marks that define the grade. Good detail. Population: 10 in 63, 11 finer (7/16).  
*From The Hamilton Collection.* NGC ID# 24F2, PCGS# 39474 Base PCGS# 6104

- 4527** 1813 O-105, R.1, AU55 PCGS. Multiple sets of clash marks help attribute O-105, but the definitive die marker is a raised area on the shield above the second vertical stripe. Luster dominates the borders and motifs of this silver-gray Choice AU example. The margins exhibit hints of powder-blue and tan-gold. No marks are noticeable. NGC ID# 24EZ, PCGS# 39463 Base PCGS# 6103

**1813 Capped Bust Half, MS64  
Dramatically Clashed O-105 Variety**

- 4528** 1813 O-105, R.1, MS64 NGC. CAC. This impressive Choice specimen shows coarse dentilation and dramatic clash marks on both sides, and the A and T in STATES are close at the base, identifying the O-105 variety. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster, under shades of champagne-gold and lavender-gray toning.  
*Ex: Joel Rettew; purchased by James Hamilton on 7/15/1993.*  
**From The Hamilton Collection.** NGC ID# 24EZ, PCGS# 39463 Base PCGS# 6103

- 4529** 1813 O-106a, R.2, AU55 PCGS. A late die state with partial dentilation across both sides. Pumpkin-gold toning visits the margins and portrait. The fields are cream-gray. Luster brightens the borders, curls, and plumage. No marks are noticeable. The strike is incomplete near the D in UNITED. NGC ID# 24EZ, PCGS# 39466 Base PCGS# 6103

- 4530** 1813 O-107a, R.1, AU55 NGC. CAC. Numerous cracks confirm the late die state of this O-107 variety. Medium-intensity grayish-brown toning runs over each side and the devices are well-struck.  
*Ex: Purchased from Delaware Valley Coins (9/1994).*  
**From The Hamilton Collection.** NGC ID# 24EZ, PCGS# 39468 Base PCGS# 6103

**1813 O-107a Half Dollar, MS63  
Struck From Shattered Dies**

- 4531** 1813 O-107a, R.1, MS63 PCGS. A remarkable array of die cracks and die clashing await the Bust half specialist on this late die stage O-107a example. Struck from shattered dies, one wonders how the Mint coaxed any more production from the die marriage. As it is, noticeable weakness at both the obverse and reverse centers is no doubt related to failure of the dies, and the number of die cracks on both sides requires a tally sheet. Lustrous silver surfaces display areas of gunmetal-blue toning that add to the distinctive appeal. Population (all 1813 varieties combined): 34 in 63, 40 finer (7/16). NGC ID# 24EZ, PCGS# 39468 Base PCGS# 6103

**1813 Capped Bust Half, MS61  
Large Center Dot, O-108 Variety**

- 4532** 1813 O-108, R.3, MS61 NGC. The second 1 in the date is low and a large center dot shows in the upper-left shield lines, identifying the O-108 variety. An attractive Mint State example, with well-detailed design elements that exhibit flat stars on the left, but sharper than usual details on the right. Dusky shades of lavender-gray and champagne-gold toning visit the lightly marked surfaces. A few clash marks show on the upper reverse.  
**From The Hamilton Collection.** NGC ID# 24EZ, PCGS# 39469 Base PCGS# 6103

**1813 O-108 Half Dollar, MS64  
From the Norweb Collection**

- 4533** 1813 O-108, R.3, MS64 PCGS. Sharp doubled profile from the nose to the throat. Although most of the border details are missing, there is no evidence of the obverse die crack that forms in later die states. Housed in a green-label PCGS holder, this Choice Mint State 1813 half dollar features sharp central details with peripheral weakness, especially on the obverse where all the stars are flat. Lustrous violet and ivory surfaces exhibit peripheral steel-blue toning.  
*Ex: Norweb Collection (Bowers and Merena, 11/1988), lot 3057; Heritage (3/31/1993).*  
**From The Hamilton Collection.** NGC ID# 24EZ, PCGS# 39469 Base PCGS# 6103

- 4534** 1813 O-110, R.1, AU55 PCGS. Struck from extensively worn dies that show multiple dramatic clashes on the obverse. This About Uncirculated example displays fire-orange, violet, and teal-blue toning in concentric rings on the obverse, while the reverse exhibits occasional accents of those colors throughout champagne-gray patina. Quite eye-appealing and interesting. NGC ID# 24EZ, PCGS# 39472 Base PCGS# 6103

1813 O-110 Half Dollar, MS61  
Struck from Fatigued Dies

- 4535** 1813 O-110, R.1, MS61 PCGS. CAC. Struck from an extremely worn die pair, and the obverse, especially, exhibits obvious die fatigue. The date and stars are drawn to the border with blunt hair and eagle details. At least three prominent sets of clash marks are noted above the date and those clash marks are seen to some degree on all known examples of this die pair. The surfaces of this green-label PCGS half dollar exhibit full ivory luster and light gold toning. Purchased from Larry Whitlow's *Galleria Unique* (8/4/1990). From *The Hamilton Collection*. NGC ID# 24EZ, PCGS# 39472 Base PCGS# 6103

1814/3 O-101a Half Dollar, AU53  
Usual Late Die State

- 4536** 1814/3 O-101a, R.2, AU53 NGC. Gold CAC. A die crack begins at the border below the first star and joins all the stars on the left, curves through the cap, and joins all the stars on the right. A prominent crack joins the base of all digits in the date. The reverse has a crack that joins UNITED STA. The reverse is rotated counterclockwise. This pleasing AU example has considerable ivory luster and lovely blue, gold, and iridescent toning with a trace of rub on the high points. Ex: *Boys Town Sale* (Superior, 5/1990), lot 174. From *The Hamilton Collection*. NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

1814/3 O-101a Half Dollar, AU55  
Unmarked and Lightly Toned

- 4537** 1814/3 O-101a, R.2, AU55 PCGS. The crossbar of the underdigit 3 is clear on this briefly circulated half dollar. The silver-gray surfaces show moderately deeper toning throughout the borders. Luster illuminates the curls, eagle, and margins. Both sides exhibit multiple sets of clash marks, but abrasions are practically absent. A late die state with stars drawn toward the rim. NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

1814/3 Half Dollar, AU58  
O-101a, Lustrous *Guide Book* Overdate

- 4538** 1814/3 O-101a, R.2, AU58 PCGS. The late die state of the 1814/3 issue is a collector favorite not only for the overdate, but for the multiple die clashing and die cracks that are visible to the naked eye on both sides of the coin. A hint of pale-gold toning with faint lilac-gray accents keep this lightly toned coin from full brilliance, but the vibrant mint luster is nearly full across both sides and there are no noticeable marks from circulation. A slight streak of struck-in grease along Liberty's jawline is of minor note. This is a frosty and sharply struck near-Mint example, suitable either for a nice circulated set or a specialized Uncirculated collection. NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

1814/3 Capped Bust Half Dollar, AU58  
Popular Overdate, O-101a

- 4539** 1814/3 O-101a, R.2, AU58 NGC. CAC. Ex: Brown. The remnants of an undertype 3 show below the 4 in the date and the reverse exhibits two oversized dentils above the second T in STATES, identifying the O-101 variety. An arcing die crack through the first six stars on the left to the cap and another below UNITED on the reverse indicates the late die state O-101a. Attractive shades of champagne-gold, slate-gray, and magenta toning blanket the lightly marked surfaces of this near-Mint specimen and the well-detailed design elements show just a trace of wear. Dramatic clash marks show on both sides. Vibrant mint luster shines through the patina. From *The Hamilton Collection*. NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

1814/3 O-101a Half Dollar, MS62  
Late Die State

**4540** 1814/3 O-101a, R.2, MS62 PCGS. CAC. This late die state example has a crack through all the stars and the cap, and a second crack at the base of the date. Both sides also exhibit prominent clash marks. Housed in a first generation PCGS holder, this half dollar has light champagne and gold toning on its highly lustrous ivory surfaces.

*Purchased from House of Stuart (6/4/1990).*

**From The Hamilton Collection.** NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

1814/3 Half Dollar, Richly Toned MS63  
O-101a, Nearly Unsurpassed Quality

**4541** 1814/3 O-101a, R.2, MS63 NGC. Remnants of a 3 are plainly visible under the 4. Extensive die cracks encompass the obverse and clash marks occur on each side, as usual. Interestingly, an impression of LIBERTY is visible below the eagle's left wing. This overdate variety is always popular with collectors, and although examples can usually be located with a little patience, coins as fine as this are very rare. Blue and violet patina drapes smooth, clean surfaces. A well-struck Select example that even the most advanced collector would have difficulty upgrading. Census: 3 in 63, 3 finer (7/16).

*Ex: Delaware Valley Rare Coin Company (10/1995).*

**From The Hamilton Collection.** NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

1814/3 O-101a Half Dollar, MS63  
Late Die State, Vibrant Coloration

**4542** 1814/3 O-101a, R.2, MS63 NGC. The obligatory obverse die cracks occupy the margins to confirm the O-101a variety, although the prior generation NGC holder does not make the distinction. Examples without the die cracks are virtually unknown. Gradations of vibrant coloration flow across both sides of this Select Uncirculated coin including royal-blue, violet, olive-gold, and grayish-rose shades. Die clashing competes with the numerous die cracks for attention. Even so, the coin is sharply struck and minimally marked for the grade with abundant eye appeal. Census: 4 in 63, 6 finer (7/16).

**From The Hamilton Collection.** NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

1814 Capped Bust Half, MS63  
Lightly Clashed O-102

**4543** 1814 O-102, R.2, MS63 NGC. CAC. Some die lines around the curl above the clasp and a triangular die lump in the first clear space in the shield stripes identify the O-102 variety. This sharply detailed Select specimen exhibits lightly marked, lustrous surfaces under shades of golden-gray and magenta toning. Some light clash marks are evident on both sides.

*Ex: Ellesmere Numismatics; purchased by James Hamilton on 10/1/1988.*

**From The Hamilton Collection.** PCGS# 39475 Base PCGS# 6105

**1814 O-103 Half Dollar, Choice XF  
Off Center, Triple Struck  
Impressive Mint Error**

- 4544 1814 O-103, R.1 — Triple Struck, Off Center — XF45 ANACS.** Designated “Dbl Struck” by ANACS, but we identify three separate strikes. A row of dentils from the first strike is apparent near the top of Liberty’s cap, and the upper obverse dentils are doubled. The first strike was 20% off center toward 6:30, and the next two strikes were 10% off center toward 5:30. This is the distinctive Overton-103 variety with a vertical “bar” between the scroll and left (facing) wing. Sea-green and chestnut-gold toning visits lightly abraded surfaces.

*From The Hamilton Collection.* NGC ID# 24F3, PCGS# 39477  
Base PCGS# 6105

- 4545 1814 O-103, R.1, AU55 NGC.** Gold CAC. A melange of cobalt-blue, gray, reddish-gold, and yellow-gold patina shows over each side of this Choice AU. The devices are well-struck. Clashmarks, very typical of this issue, are visible on obverse and reverse.

*From The Hamilton Collection.* NGC ID# 24F3, PCGS# 39477  
Base PCGS# 6105

- 4546 1814 O-103, R.1, AU58 PCGS.** The vertical “bar” below the left scroll end allows for immediate attribution. This satiny Borderline Uncirculated half dollar has stone-white fields and motifs. The borders are charcoal-gray. Liberty’s chin shows slight wear, but the surfaces are refreshingly unabraded. NGC ID# 24F3, PCGS# 39477  
Base PCGS# 6105

**1814 O-103 Half Dollar, AU58  
Early Die State**

- 4547 1814 O-103, R.1, AU58 PCGS.** CAC. There are no visible clash marks on either side of this early die state half dollar. A trace of rub appears on the high points of this lovely near-Mint half dollar that is housed in a first generation PCGS holder. Both sides of this light gray half dollar exhibit considerable luster with peripheral gold, blue, and violet patina.

*Purchased from Becker and Kuehnert (circa 1991).*

*From The Hamilton Collection.* NGC ID# 24F3, PCGS# 39477  
Base PCGS# 6105

**1814 O-103 Half Dollar, MS62  
Heavy Reverse Die Ridge**

- 4548 1814 O-103, R.1, MS62 PCGS.** CAC. A heavy die ridge from the left wing to the scroll instantly identifies this die marriage. Like most examples of the variety, this piece exhibits heavy clash marks on the obverse and reverse. Housed in a green-label PCGS holder, this half dollar has golden-brown luster on the obverse, within a frame of gold and iridescent toning. The reverse is lustrous light gray with vibrant gold, russet, and blue toning.

*Purchased from Allstate Coin Company (10/21/1991).*

*From The Hamilton Collection.* NGC ID# 24F3, PCGS# 39477  
Base PCGS# 6105

**1814 O-103 Half Dollar, MS64  
A Crisply Struck, Top-Tier Example**

- 4549 1814 O-103, R.1, MS64 PCGS.** CAC. A broad line from the tip of the scroll to the eagle’s wing confirms the origin of this outstanding Choice half dollar. Undoubtedly, a primary attribute is the extraordinary level of preservation. High-grade examples of this variety are known, and while this piece barely misses out on making the Condition Census, it is inarguably a top-tier example worthy of inclusion in a fine collection of early half dollars. Fully toned in violet and blue colors, this lustrous near-Gem displays crisp detail on all devices. The right-hand stars exhibit the only trace of incompleteness. Void of clash marks. Certified in a first generation “rattler” holder, now with CAC endorsement. Population (all varieties): 31 in 64, 16 finer (7/16).

*Ex: Bowers and Merena (7/1989).* NGC ID# 24F3, PCGS# 39477  
Base PCGS# 6105

**1814 O-104 Capped Bust Half, MS64  
Early Die State, High Condition Census**

- 4550** 1814 O-104, R.4, MS64 NGC. CAC. Multiple areas of die clashing are visible on both sides, but no die cracks, which confirms the very scarce O-104 variety. The C is widely separated from 50 on the denomination, the key pick-up point for the variety. The surfaces are lustrous yet lack most of the dentils, with the stars and legends drawn to the edge. Lilac and amber-gold toning joins silver-gray and blue shades on this attractively patinated half. It trails only one or two MS65 coins for the top spot in the O-104 Condition Census according to the recent Steve Herrman listing. Encapsulated in a prior generation holder with CAC endorsement.  
Ex: Delaware Valley Rare Coin Company (9/1994).  
**From The Hamilton Collection.** PCGS# 39478 Base PCGS# 6105

**1814 Capped Bust Half, MS64  
O-105, Tremendous Visual Appeal**

- 4551** 1814 O-105, R.2, MS64 PCGS. CAC. Strong bar clash marks under the ear and the T positioned far left over the I help attribute the die pair. This near-Gem qualifies for the Condition Census, where it ranks fourth. Boldly struck from clashed dies, each side showcases pleasing violet-gray patina with accents of rose, blue, green, and gold, generating tremendous, seemingly unimprovable visual appeal. Encapsulated in an old green label holder with added CAC approval.  
**From The Hamilton Collection.** NGC ID# 24F3, PCGS# 39480 Base PCGS# 6105

**1814 Capped Bust Half, MS62  
Guide Book Single Leaf, O-105a Variety**

- 4552** 1814 Single Leaf, O-105a, R.4, MS62 NGC. Dramatic clash marks at the ear and the single leaf above the branch on the reverse identify the late die state O-105a. The central design elements were strongly impressed, but some loss of detail is evident, due to die polishing. The lustrous surfaces show scattered, minor contact marks, under shades of champagne-gold, blue-steel, and lavender-gray toning.  
Ex: Sheridan Downey, purchased by James Hamilton on 1/23/1994.  
**From The Hamilton Collection.** NGC ID# 24F3, PCGS# 39481 Base PCGS# 6105

**1814 Half Dollar, Choice AU  
Rare Overton-106  
Tied for Finest in Herrman**

- 4553** 1814 O-106, R.5, AU55 PCGS. Brilliant except for a dab of cobalt-blue and golden-brown toning west of the shield. Lustrous, unmarked, and desirable. Struck 5% off center toward 11 o'clock. Among the finest known examples of Overton-106. O-106a, with an arc-shaped crack through the lower reverse and an ascending diagonal crack through the R in AMERICA, is only slightly more available. PCGS# 39482 Base PCGS# 6105

**1814 O-107 Half Dollar, MS63  
Heavy Obverse and Reverse Clash Marks**

- 4554** 1814 O-107, R.2, MS63 PCGS. The obverse has a rough die crack from the hair ribbon toward star 11, and exhibits heavy clash marks, but there is no evidence of the secondary die crack found in late die states. The reverse also displays prominent clash marks. Housed in a green-label PCGS holder, this piece has brilliant silver luster with faint champagne toning only on the obverse. The reverse is brilliant and untoned. This is a splendid Select Mint State example from the same die pair that was used to strike three platinum pieces.  
**From The Hamilton Collection.** NGC ID# 24F3, PCGS# 39484 Base PCGS# 6105

**1815/2 O-101 Half Dollar, XF45  
'Rattler' Holder, Gold CAC Sticker**

- 4555** 1815/2 O-101, R.2, XF45 PCGS. Gold CAC. All 1815 half dollars show an underdigit 2. The year 1815 is known in numismatic circles for its lack of production. The Mint struck 47,150 half dollars in that year, small quantities of quarters and half eagles, and nothing else. The 1815/2 is a hands-down key date among Capped Bust halves. Examples are scarcely offered so fine and invariably generate strong demand when they do appear for sale. This piece, unquestionably finer than the grade suggests, maintains strong detail with minimal friction. Olive tones adhere to the margins, leaving the centers mostly steel-gray. Housed in a first generation holder. Gold CAC: 1 in 45, 1 finer (7/16).  
*Ex: Allstate Coin Co. (6/1989).*  
**From The Hamilton Collection.** NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

- 4556** 1817/3 O-101, R.3, XF40 PCGS. Gold CAC. Cobalt-blue toning at the margins cedes to reddish-gray at the centers. Sharply struck devices and well-preserved surfaces further enhance the coin's eye appeal. The die crack through ME has not yet further developed, hence this piece is classified as O-101 instead of O-101-a. A very popular variety.  
**From The Hamilton Collection.** PCGS# 39511 Base PCGS# 6111

**1817/3 Half Dollar, AU50  
O-101, Featured in the Guide Book**

- 4557** 1817/3 O-101, R.3, AU50 PCGS. This collector-favorite *Guide Book* variety features the 7 prominently punched over a secondary 3. A trace of friction appears over sharply struck motifs, including fully raised stars. The uniform layer of color on each side comprises eye-catching shades of deep blue, violet, and olive. A distinctive spot of gunmetal toning will identify this coin in future auction appearances. Housed in a green label holder.

**From The Hamilton Collection.** PCGS# 39511 Base PCGS# 6111

**1817/3 O-101 Half Dollar, Choice AU  
Originally Toned, Minimal Marks**

- 4558** 1817/3 O-101, R.3, AU55 PCGS. Blue-green and lavender borders surround chestnut-gold fields. The device high points are gunmetal-gray. A briefly circulated and lightly abraded example of this popular, obvious, and conditionally rare overdate. Clash marks (as coined) are prominent across both sides. PCGS# 39511 Base PCGS# 6111

**1817/3 Capped Bust Half, AU58  
Guide Book Overdate, O-101a**

- 4559** 1817/3 O-101a, R.2, AU58 PCGS. The remnants of an undertype 3 shows plainly below the 7 in the date and the die crack above 50 in the denomination clearly identifies the late die state O-101a variety. The design elements show just a trace of wear and sharp definition is evident in most areas, with some softness at the clasp and the corresponding area on the reverse. Vibrant mint luster shines through iridescent shades of violet and pale gold toning. Housed in a green label holder.  
**From The Hamilton Collection.** NGC ID# 24F7, PCGS# 39512 Base PCGS# 6111

- 4560** 1817 O-110, R.2, AU55 NGC. CAC. Solid triple segments at star 13 and a horizontal tool mark from tip of feathers of upper arrow shaft confirm the variety. Reddish-gold patina, sharply struck design elements, and remarkably clean surfaces endow this Choice AU.  
*Ex: Purchases from Allstate (9/1990).*  
**From The Hamilton Collection.** NGC ID# 24F6, PCGS# 39502 Base PCGS# 6109

**1817 Capped Bust Half, MS62  
Popular O-112 Variety**

- 4561** 1817 O-112, R.2, MS62 NGC. Some vertical die lines are evident in front of Liberty's neck and the letters R and I in AMERICA touch at the base, identifying the O-112 variety. This impressive MS62 specimen exhibits well-detailed design elements and lustrous, lightly marked surfaces, under pleasing shades of golden-brown and lavender-gray toning.  
Ex: Purchased by James Hamilton from "Newport Beach" on 7/6/1989 for \$2,200.  
From *The Hamilton Collection*. PCGS# 39506 Base PCGS# 6109

**1817 O-113a Half Dollar, Frosty MS63  
Condition Census Quality**

- 4562** 1817 O-113a, R.4, MS63 PCGS. CAC. A wormlike die line appears in the field below the eagle's beak. Extensive die cracks encircle the obverse. The technical quality of this Select half dollar is among the finest for the variety, tied for fifth on the Condition Census. Equally important is the tremendous visual quality and blatant originality that this piece possesses. Frosty and brilliant with the slightest suggestion of golden patina on the reverse, each side displays a pinpoint impression. Tiny reeding marks near star 3 and a minute fleck on the cheek fail to affect the appeal. Worth a premium bid. Housed in an old green label holder with CAC endorsement.  
Ex: Delaware Valley Rare Coin Company (6/1990).  
From *The Hamilton Collection*. NGC ID# 24F6, PCGS# 39509 Base PCGS# 6109

**1818/7 Capped Bust Half, AU58  
Large 8 Guide Book Variety, O-101**

- 4563** 1818/7 Large 8, O-101, R.1, AU58 NGC. CAC. The first 8 in the date is large and the crossbar of an undertype 7 shows above the final 8. On the reverse, UNITED is located very close to the rim, identifying the O-101 variety. The design elements of this attractive Near-Mint specimen are sharply detailed and show only the slightest trace of friction on the high points. The pleasing surfaces are minimally abraded and retain most of their original mint luster, under iridescent shades of golden-brown and cerulean-blue toning.  
Ex: Boys Town Sale (Superior, 5/1990), lot 203.  
From *The Hamilton Collection*. NGC ID# 24FA, PCGS# 39540 Base PCGS# 6115

**1818/7 Large 8 Bust Half, MS64  
O-101a, Bullseye Album Toning**

- 4564** 1818/7 Large 8, O-101a, R.1, MS64 NGC. CAC. Two different-sized 8s make up the date logotype, with the first 8 large, and the second 8 small (punched over an underdigit 7). A gap in the dentils beneath the C of 50 C on the reverse — plus a long die crack through the denomination — confirms the O-101a variety. Solidly in the Condition Census for the variety, this near-Gem half dollar shows only a few light marks and an above-average strike. Vibrant album toning is its main attraction, with vivid electric-blue borders and amber-gold centers. The strike is needle-sharp. Both sides display the requisite die clashing and die cracks for the O-101a variety. Census (all 1818/7 varieties): 13 in 64 (1 in 64 ★), 4 finer (7/16). CAC: 3 in 64, 0 finer (7/16).  
From *The Hamilton Collection*. NGC ID# 24FA, PCGS# 39541 Base PCGS# 6115

1818/7 Half Dollar, MS63  
Small 8, O-102a, Strong Luster

**4565** 1818/7 Small 8, O-102a, R.2, MS63 NGC. CAC. A curious die break within the top loop of the second 8 identifies the Overton-102a sub-variety. Lightly toned in shades of tan-gold and ice-blue on the obverse, this lustrous Select Uncirculated example is crisply struck. The reverse adds brownish-gold color to the mix, with a short, dark toning streak on the left (facing) wing. Slight weakness at the talons and a small planchet flaw above the eagle's head are noted, yet the coin shows just a few field marks on the obverse. Bright mint luster adds to the eye appeal. Housed in a prior generation NGC holder (pre-hologram, pre-barcode) with CAC endorsement. Census (all 1818/7 varieties): 11 in 63, 17 finer (7/16). CAC: 3 in 63, 2 finer (7/16).

Ex: "Cairns" (10/1988).

From The Hamilton Collection. NGC ID# 24FA, PCGS# 39537  
Base PCGS# 6114

1818/7 Capped Bust Half, MS62  
Large 8, O-103 Guide Book Variety

**4566** 1818/7 Large 8, O-103, R.3, MS62 PCGS. Although the PCGS holder indicates this coin is a Small 8 variety, the first 8 in the date is definitely large. The remnants of an undertype 7 show beneath the final 8, identifying the O-103 variety. The lightly marked surfaces of this attractive MS62 example display vibrant mint luster and some areas of prooflike reflectivity, under shades of greenish-gold, gray, and magenta toning. The well-detailed design elements show just a touch of softness on the eagle's claws and arrows.

From The Hamilton Collection. PCGS# 405383 Base PCGS# 6115

1818 Capped Bust Half Dollar, MS63  
Lustrous Gold CAC Example, O-108

**4567** 1818 O-108, R.1, MS63 PCGS. Gold CAC. This impressive Select example has been off the market for 27 years. The design elements are sharply detailed and the lustrous surfaces show only minor signs of contact, with attractive highlights of violet-gray and pale gold toning. Housed in an old green label holder.

Ex: Purchased from "All State" on 9/29/1989 for \$2,825.

From The Hamilton Collection. NGC ID# 24F9, PCGS# 39524  
Base PCGS# 6113

1818 Capped Bust Half, MS63  
Late Die State, O-109a

**4568** 1818 O-109a, R.1, MS63 NGC. CAC. Both 1's in the date are higher than the neighboring 8's and the first 1 is widely separated from the other numerals, identifying the O-109 variety. The die crack on the reverse through TED STATE identifies the late die state O-109a. This attractive Select example exhibits sharply detailed central design elements, but die wear caused many of the peripheral devices to be drawn to the edge and the dentils are weak in some areas. The lightly marked surfaces are mostly slate-gray, with accents of pale gold and blue. Original mint luster peaks through the toning at intervals.

From The Hamilton Collection. NGC ID# 24F9, PCGS# 39526  
Base PCGS# 6113

1818 Capped Bust Half, MS62  
Popular O-111 Variety

**4569** 1818 O-111, R.1, MS62 PCGS. CAC. A small tine at the top of the cap identifies the O-111 variety. This sharply detailed MS62 specimen exhibits lightly marked, lustrous surfaces, with subtle shades of lavender-gray and pale gold toning. Housed in an old green label holder.

Ex: Purchased from "All State" on 6/16/1989, for \$2,350.

From The Hamilton Collection. NGC ID# 24F9, PCGS# 39528  
Base PCGS# 6113

**1818 Half Dollar, O-111, MS64  
Attractively Toned**

- 4570** 1818 O-111, R.1, MS64 PCGS. As a date, the 1818 half dollar is elusive in MS64 and rare any finer. This near-Gem representative exhibits a sharp strike and vibrant, satiny mint luster. Warm golden interiors cede to amber and ocean-blue peripheries, delivering an old-time appeal that is quite pleasing. Population (all varieties included): 30 in 64, 10 finer (7/16). NGC ID# 24F9, PCGS# 39528 Base PCGS# 6113

**1819/8 Capped Bust Half, MS63  
Large 9, O-104 Variety**

- 4571** 1819/8 Large 9, O-104, R.1, MS63 PCGS. CAC. The 9 in the date is large, star 2 shows signs of recutting, and the upper left serif's are missing from the E's on the reverse, identifying the O-104 variety. This well-detailed MS63 example shows just a touch of flatness on some star centers and the lightly marked, lustrous surfaces are blanketed in attractive shades of golden-brown and magenta toning. Housed in an old green label holder.  
*Ex: Purchased from Ellesmere Numismatics on 2/24/1989 for \$2,600.*  
**From The Hamilton Collection.** NGC ID# 24FC, PCGS# 39559 Base PCGS# 6119

**1819/8 Capped Bust Half Dollar, MS64  
Large 9, Bold Overdate, O-105**

- 4572** 1819/8 Large 9, O-105, R.2, MS64 NGC. CAC. At time of purchase, this lustrous and attractively toned near-Gem half was thought to be the finest-known O-105 survivor. The intervening years have placed one coin in a finer grade above it, yet this example remains high Condition Census and it is still housed in its original pre-hologram NGC holder. Shades of blue and gold combine with bright mint luster and the coin displays delightful iridescence at the borders. Smooth and frosty surfaces show no notable marks or abrasions and the strike is razor-sharp. It is currently the second-ranking O-105 overdate in both the Parsley and Herrman Census listings, CAC endorsed.  
*Ex: Tower Hill Collection (Bowers and Merena, 9/1993), lot 2314.*  
**From The Hamilton Collection.** NGC ID# 24FC, PCGS# 39561 Base PCGS# 6119

**1819/8 Capped Bust Half, MS63  
Large 9, O-106 Variety**

- 4573** 1819/8 Large 9, O-106, R.4, MS63 NGC. A small die defect, like an accent mark, appears above the second 1 in the date, identifying the O-106 variety. The design elements of this attractive Select specimen are sharply detailed in most areas, but some of the diagnostic flatness is seen on star 13, and an area of the banner around UR looks like it was struck through some planchet adjustment marks. The lustrous surfaces are free of mentionable distractions, with medium intensity shades of champagne-gold and lavender-gray toning.  
**From The Hamilton Collection.** NGC ID# 24FC, PCGS# 39562 Base PCGS# 6119

**1819 O-107 Half Dollar, MS62  
Scarce Variety, Recut 5 in 50 C**

- 4574 1819 O-107, R.4, MS62 NGC. CAC.** Powder-gray and coppery-gold patina with blue highlights speckles the attractive surfaces of this pleasing, original half dollar. The coin shows few marks for the assigned grade, with high-point softness of strike on a few curls and the eagle's talons and wing shoulders. A scarce variety with the vertical stand of the 5 in the denomination. The present coin qualifies for the lower end of the Condition Census at the MS62 level. Rightfully CAC endorsed.  
Ex: Delaware Valley Rare Coin Company (7/1994).  
**From The Hamilton Collection.** NGC ID# 4FLD, PCGS# 39542 Base PCGS# 6117

**1819 O-108 Half Dollar  
Rainbow-Toned Gem Coin  
None Finer at Either Service for the Variety**

- 4575 1819 O-108, R.3, MS65 NGC.** Entrancing rainbow coloration flows in a wide arc from the top downward across the obverse of this gleaming Gem half. The reverse displays similar colors, ranging from vivid orange-gold shades to lilac, pale-blue, and sea-green hues. The date is widely spaced — one of just two 1819 varieties with such wide spacing (the other is O-115), and the 5 in the denomination is recut at the top. Inconspicuous die cracks encircle the reverse suggesting a late state of the dies. Only a few tiny ticks exist on the coin beneath the chin, and they require a loupe for viewing. The fields and devices are otherwise nearly pristine, and Liberty's hair curls are razor-sharp. Recently, the Pogue Part II example of O-108 (graded MS64+ PCGS) set the record for the O-108 variety when it realized \$18,800. That was before our attribution of this example, which resides in a prior-generation NGC holder circa 1997 to 2001. It is unlisted in the Steve Herrman census, where it assumes the #1 position, although the Parsley reference notes a single MS65 coin — possibly this same example. NGC Census (all 1819 non-overdate varieties): 9 in 65, 1 finer (7/16).  
**From The Hamilton Collection.** NGC ID# 24FB, PCGS# 39544 Base PCGS# 6117

**1819 O-109a Half Dollar, MS63  
Old Generation Holder, Well-Preserved**

- 4576 1819 O-109a, R.2, MS63 NGC. CAC.** The stars are large and close to the edge, although sharply struck. The reverse shows a die crack through virtually the entire legend, and the C in 50 C is recut at the top serif. T and E in STATES are not joined either top or bottom — a curious circumstance for this late die state coin, although they are unjoined in earlier stages. Deep-gray and pale tan-gray toning displays silver luster with orange highlights. A sharply struck and attractive coin, with no abrasions or marks to speak of across the smooth and frosty surfaces. Beautifully preserved, housed in a second-generation NGC holder (pre-hologram, plain white label) with CAC endorsement.  
Purchased from H.R. Cairns (12/1987).  
**From The Hamilton Collection.** NGC ID# 9PV9, PCGS# 39546 Base PCGS# 6117

- 4577 1819 O-110a, R.3, AU58 PCGS Secure.** Ex: Link. The repunched star 7 is the pick-up point for this moderately scarce die marriage. Lengthy reverse die cracks confirm the status as O-110a. This well struck butter-gold representative displays substantial cartwheel sheen and is void of any relevant abrasions. NGC ID# 24FB, PCGS# 39548 Base PCGS# 6117

**1819 O-112a Half Dollar, MS64  
High Condition Census Coin**

- 4578 1819 O-112a, R.3, MS64 NGC. CAC.** T and E in STATES are joined at the tops but not at the base, an immediate pick-up point for the O-112 variety. A lengthy die crack from the arrow fletchings, through the olive leaves, to beneath UNIT of UNITED. confirms the late die state subvariety. Bluish-gray toning with pale violet highlights offer tremendous eye appeal. The fields are semireflective and Choice, while the strike could hardly be sharper. Housed in an early, pre-barcode NGC holder with CAC endorsement. Tied at the high end of the Condition Census for the late die state variety.  
**From The Hamilton Collection.** PCGS# 39551 Base PCGS# 6117

**1819 Half Dollar, O-114, Amazing Gem  
One of the Finest Examples Extant**

- 4579** 1819 O-114, R.3, MS65 NGC. This Gem is not only tied for finest for the variety — identified by a die line on the eagle's neck feathers — it ranks among the finest 1819 half dollars extant. The only finer non-overdate 1819 half is the Pogue O-107 example in MS66. The Pogue collection also included two 1819/8 pieces in Premium Gem condition. This important offering, like other holdings in the Hamilton collection, has been off the market for decades and should stimulate intense competition when it crosses the block. Softly frosted mint luster shines through deep tones of gold, violet, and blue. This Gem is fully struck. Four small ticks appear above the eagle's left wing and head. Housed in a pre-hologram holder. For the variety, it ranks as the numerically finest-known according to the Steve Herrman listing and it is tied for finest based on the Donald Parsley reference. Census (all varieties): 9 in 65, 1 finer (7/16).  
*From The Hamilton Collection.* NGC ID# 24FB, PCGS# 39553 Base PCGS# 6117

- 4580** 1820/19 Square Base 2, O-101, R.2, AU55 PCGS. This Choice AU half displays olive-green and gray patination over well-preserved surfaces. Sharply struck devices further contribute to the coin's eye appeal. A very impressive and popular overdate.  
*Ex: Purchased from Julian Liedman (3/1992).*  
*From The Hamilton Collection.* NGC ID# 24FE, PCGS# 39572 Base PCGS# 6125

**1820/19 O-101a Half Dollar, MS62  
Late State of the Overdate**

- 4581** 1820/19 Square Base 2, O-101a, R.3, MS62 PCGS. CAC. Square Base 2. Stormy-gray toning yields to bright, underlying silver luster on this partially prooflike overdated Bust half. The 1820/19 is a favorite of collectors for its two-digit overdate, sharply visible even on this late state coin where the loop of the underdigit 9 fades. Reflectivity in the fields extends into the recesses between the shield lines and surrounds all of the raised design elements. Razor-sharp for the assigned grade and CAC-endorsed, this distinctive half dollar qualifies for the lower-end of the Condition Census for the variety according to Steve Herrman's listing. NGC ID# 4FXV, PCGS# 39573 Base PCGS# 6125

**1820 Curl Base 2, O-103 Half Dollar, AU58  
First Generation 'Rattler' Holder**

- 4582** 1820 Curl Base 2, Small Date, O-103, R.1, AU58 PCGS. CAC. This is one of two Curl Base 2 varieties. The other shows 20 in the date punched over 19. Both variants boast separate listings in the *Guide Book*, creating ever-strong demand for each. This near-Mint survivor features an overlay of golden-gray and tan patina that confirms its originality. The strike shows moderate softness over the curls but is otherwise strong. Minimally marked. Certified in a first generation holder.  
*Ex: Sheridan Downey (10/1989).*  
*From The Hamilton Collection.* NGC ID# 9PYL, PCGS# 39563 Base PCGS# 6121

**1820 Half Dollar, Sharp MS63  
O-105, Square Base Knob 2, Large Date**

- 4583** 1820 Square Base 2, Large Date, Knob, O-105, R.1, MS63 NGC. CAC. Three joined segments near the left olive leaves provide an easily viewed clue to the O-105 variety. The O-104 variety shares the same Square Base Knob 2 obverse, but the D in UNITED sits low compared to the present reverse. Blue and orange accents surround the rims and raised devices of this richly toned half, with natural warm-gray patina the dominant surface color. A glass reveals sharp star centers and only one or two inconsequential marks hidden in the attractive toning. Housed in a late-1980s pre-hologram holder with CAC endorsement.  
*Purchased from H.R. Cairns (10/1988).*  
*From The Hamilton Collection.* NGC ID# 24FD, PCGS# 39567 Base PCGS# 6122

- 4584** 1820 Square Base 2, Large Date, No Knob, O-106, R.1, AU55 PCGS. CAC. ME in AMERICA are joined, identifying the collectible Overton variety. Deep rose-violet hues over the centers cede to blue, green, and gold shadings peripherally, accounting for the CAC-approved eye appeal of this Choice AU half dollar. Strike detail is good. Clash marks occur on each side. Encapsulated in a first generation holder.  
*Ex: Richard Pugh Collection of Bust Half Dollars (Superior, 5-6/1992), lot 1126.*  
*From The Hamilton Collection.* NGC ID# 24FD, PCGS# 39569 Base PCGS# 6123

**1820 O-106 Large Date Half Dollar, MS60  
Square Base 2, No Knob, Gold CAC Sticker**

- 4585** 1820 Square Base 2, Large Date, No Knob, O-106, R.1, MS60 NGC. Gold CAC. A bold die line joins the top of M and E in AMERICA, similar to O-108 but the large close date and the alignment of I in PLURIBUS with the second T in STATES confirms the O-106 variety. Bright mint luster enlivens the golden-tan toning that envelops both sides. Sharp and Uncirculated, the Gold CAC suggests a higher grade level is warranted. We note a few light abrasions at L and U of PLURIBUS and some nicks above the denomination, but the obverse shows microscopic ticks and moderate die clashing. Gold CAC: 1 in 60, 0 finer.  
Ex: *Sheridan Downey* (5/1994).  
From *The Hamilton Collection*. NGC ID# 24FD, PCGS# 39569 Base PCGS# 6123

**1820 O-107 Half Dollar, AU53  
No Serifs on E's Guide Book Variety**

- 4586** 1820 No Serifs on E's, O-107, R.5, AU53 NGC. CAC. Overton-107 is a highly desirable variety that merits its own listing in the annual *Guide Book*. The simplest attribution points are the E's on the reverse, curiously lacking serifs. The date has a Square Base 2 without a knob. This marvelously original AU53 Bust half is richly toned in deep steel-gray patina with the slightest trace of antique-gold and lighter gray over the high points. The devices are uniformly bold with an expected amount of trivial rub. Noticeably free of detracting abrasions and housed in a prior generation holder.  
Ex: *Shertz, Leaman Collections* (*Sheridan Downey*, 7/1994), lot 166.  
From *The Hamilton Collection*. NGC ID# 24FD, PCGS# 39571 Base PCGS# 6124

**1820 Capped Bust Half, MS63  
Square Base 2, Large Date, O-108 Variety**

- 4587** 1820 Square Base 2, Large Date, No Knob, O-108, R.2, MS63 PCGS. CAC. Ex: Pryor. The recut star 5 and the sharp center dot on the reverse identify the O-108 variety. The curl-top, square-base 2 leans to the left. This impressive MS63 specimen displays vibrant mint luster and sharply detailed design elements, under shades of russet-gold and violet toning. Housed in a green label holder.  
Ex: *Madison Estate* (*Superior*, 1/1979), lot 783; *James Bennett Pryor Collection* (*Bowers and Merena*, 1/1996), lot 48.  
From *The Hamilton Collection*. NGC ID# 24FD, PCGS# 39570 Base PCGS# 6123

**1821 Half Dollar, O-103, Toned MS64**

- 4588** 1821 O-103, R.2, MS64 PCGS Secure. Rich autumn-gold dominates the fields, while the borders display lavender and electric-blue. Lustrous and well-preserved with a sharp strike that shows inexactness only the centers of stars 5 and 6. O-103 is readily identified by the defective serifs on the As and Es in the reverse legend.  
Ex: *Chicago Signature* (*Heritage*, 8/2011), lot 3940. NGC ID# 24FF, PCGS# 39578 Base PCGS# 6128
- 4589** 1821 O-105, R.1, MS60 PCGS. CAC. This variety is attributed by the center dot on neck, I centered under left side of T, and C of 50 C entirely right of olive stem. Golden-gray and greenish-blue toning at the margins frames the light silver-gray centers. Well-struck throughout.  
Purchased from *Allstate* (12/1989).  
From *The Hamilton Collection*. NGC ID# 24FF, PCGS# 39582 Base PCGS# 6128

**1821 Bust Half, Impressive AU58  
O-106a, Filled N in UNITED**

- 4590** 1821 O-106a, R.2, AU58 NGC. CAC. Our consignor purchased this coin as MS63+ in 1989 at the David W. Akers portion of the "Apostrophe Auction." There, it was color-plated and described as: "A spectacularly toned Bust Half Dollar with terrific lustre under the toning and relatively few marks. The toning is an amazing blend of russet, gold, blue, green and violet. Not many early Half Dollars are as pretty as this one." Later, the coin was certified in a pre-barcode NGC holder as AU58. Such holders were used for about three years until 1992. Today, this exceptional piece remains in that old holder and retains its colorful iridescent toning and dramatic eye appeal. The luster is essentially full and only slightly subdued at the centers beneath the toning. A glass reveals just a few tiny marks and a trifle of high-point blending, perhaps related to the late die state. Now CAC endorsed with the green seal.  
Ex: Auction '89 (Akers, 7/1989), lot 1075.  
**From The Hamilton Collection.** NGC ID# 24FF, PCGS# 39585  
Base PCGS# 6128

**1821 Capped Bust Half Dollar, MS63  
A Top O-106a Survivor**

- 4591** 1821 O-106a, R.2, MS63 PCGS. CAC. A small spike protrudes left of the tailfeathers, a die line appears in the lowest portion of the shield verticals, and the N in UNITED is filled. As with so many pieces from this important collection, the Select half dollar offered here represents one of the finest examples to come to market in the last 10 years, according to Stephen Herrman's most recent list of auction appearances (Spring 2016). It also holds fifth place on the Condition Census of O-106 halves. Inarguably original patina includes eye-appealing shades of violet and tan-gold, layered over strongly struck motifs with typical high-point incompleteness. Certified in a first generation "rattler" holder with CAC endorsement. Population: 19 in 63 (2 in 63+), 21 finer (7/16).  
Ex: *Ellesmere Numismatics* (8/1989).  
**From The Hamilton Collection.** NGC ID# 24FF, PCGS# 39585  
Base PCGS# 6128

**1821 Bust Half, MS64  
Scarce O-107 Variety**

- 4592** 1821 O-107, R.3, MS64 NGC. The position of star 7 is higher in the field than any other 1821 variety and points to the front edge of the cap rather than to the headband. A challenging variety, the O-107 is by far the scarcest of the 1821 die pairs. This example displays sharp stars and rich, charcoal-gray toning at the borders with reddish-gold interior toning. Slight high point blending at the upper cap folds and drapery is noted, yet the strike is otherwise bold. Only a few scattered light abrasions exist on this pleasing and softly lustrous near-Gem.  
**From The Hamilton Collection.** NGC ID# 24FF, PCGS# 39586  
Base PCGS# 6128

**1822/1 Capped Bust Half Dollar, AU58  
Popular Guide Book Variety, O-102**

- 4593** 1822/1 O-102, High R.4, AU58 PCGS. CAC. The remnants of an undertype 1 are faintly visible below the final 2 in the date and there is a bold center dot on the reverse, identifying the O-102 variety. The lightly abraded surfaces of this attractive near-Mint example retain most of their original mint luster, under low-intensity shades of greenish-gold toning. Just a trace of wear shows on the well-detailed design elements. Housed in a green label holder.  
**From The Hamilton Collection.** NGC ID# 24FH, PCGS# 39605  
Base PCGS# 6130

**1822/1 Capped Bust Half Dollar, Rare MS63**  
**Ex: Norweb, The Finest O-102 By Far**

**4594** 1822/1 O-102, High R.4, MS63 NGC. CAC. The final 2 is thicker and the date does not get progressively lower on the Overton-102 variety (in contrast to the O-101 overdate), while a series of tiny dots between the points of star 12 confirms the marriage. Sharply struck, the surfaces of this Select Uncirculated coin are blatantly original with golden highlights surrounding pleasing tan toning and pale-blue overtones. The margins are prooflike on both sides with brief rainbow iridescence.

The present coin stands out among the many fine Bust halves in the collection both in rarity and importance. **It outranks the published Condition Census in both the Parsley and Herrman listings by a full three points**, where MS60 is the finest coin listed (60-58-58-58-55). Its popularity among specialists as the scarcer of the two 1822/1 overdates is well known. Intuition tells us that this attractive and rare O-102 — in the unequalled grade of MS63 NGC, housed in its old pre-hologram NGC holder with CAC endorsement — is destined for the finest Bust half collection.

*Ex: Norweb. Purchased from Vernon Oswald (Ossie's Coin Shop) Allentown, PA (2/1989).*

**From The Hamilton Collection.** NGC ID# 24FH, PCGS# 39605 Base PCGS# 6130

**4595** 1822 O-104, R.3, MS60 PCGS. Gold CAC. The center dot on the neck and the left side of the second T in line with the right side of I attributes the variety. Ample luster remains on the silvery surfaces imbued with wisps of light gold-tan. Sharply struck design elements and minimal marks round out the eye appeal. Well-deserving of the CAC gold sticker.

**From The Hamilton Collection.** NGC ID# 24FG, PCGS# 39589 Base PCGS# 6129

**1822 Half Dollar, Near-Gem**  
**Condition Census O-106a**

**4596** 1822 O-106a, R.3, MS64 PCGS Secure. Ex: Link. A die crack across the left reverse border helps confirm the Overton variety. This lustrous Choice half dollar has a sharp strike and minimal marks. Aquamarine borders and chestnut-gold fields cede to lavender shades on the portrait high points. A Condition Census example, trailing only the MS65 PCGS coin that appeared as lot 4378 in our 2007 January FUN Signature. NGC ID# 24FG, PCGS# 39592 Base PCGS# 6129

**1822 O-110 Half Dollar, MS63**  
**Lustrous and Smooth Surfaces**

**4597** 1822 O-110, R.2, MS63 NGC. CAC. Satin-smooth surfaces radiate silver luster with faint-gold, blue, and orange toning deepening at the borders. The strike is notably sharp for the O-110 variety. Struck from an early state of the dies, this Select Uncirculated example has surface quality and eye appeal that combine to suggest an even finer grade. Housed in a prior generation NGC holder with CAC endorsement.

**From The Hamilton Collection.** NGC ID# 4GAK, PCGS# 39597 Base PCGS# 6129

**1822 Capped Bust Half, MS64**  
**Popular O-113 Variety**

**4598** 1822 O-113, R.3, MS64 PCGS. CAC. The RI in AMERICA nearly touch and the R is slightly higher, while the inside right serif of the A in STATES is missing, identifying the O-113 variety. The design elements of this attractive Choice example are well-detailed and vibrant mint luster shines through shades of slate-gray and greenish-gold toning. The well-preserved surfaces show some diagonal die lines below the bust. Housed in a green label holder. *Purchased from Delaware Valley on 9/14/1994.*

**From The Hamilton Collection.** NGC ID# 24FG, PCGS# 39601 Base PCGS# 6129

**1822 Half Dollar, MS63**  
**O-115, Splendid Multicolor Toning**

- 4599** 1822 O-115, R.3, MS63 PCGS. CAC. Two shield lines extend past the lower border, while line 1 of gule 5 fails to touch the margin. This is a common variety through XF condition, but it is scarce in AU and downright rare in Mint State. In fact, this is the second-finest example to appear at auction in the past 10 years, and it holds the same place on the Condition Census (tied for second). Splendid multicolor toning and glittering luster explain why CAC approved this well-struck Capped Bust half dollar. A thin tick on the neck acts as a pedigree identifier. Encapsulated in a first generation holder.  
*Ex: Blanchard (3/1990).*  
**From The Hamilton Collection.** NGC ID# 24FG, PCGS# 39603  
 Base PCGS# 6129

**1822 O-115 Bust Half Dollar, MS64**  
**Tied Finest in the Condition Census**

- 4600** 1822 O-115, R.3, MS64 NGC. CAC. An impressive near-Gem, tied at the top of the Condition Census listings of both the Herrman and Parsley references with the former Queller coin. This example is richly toned in shades of aquamarine-blue and rose-gray. This example displays long die cracks along the tops of the reverse legend and through the denomination. Bold rims and dentils are well-separated from the sharply struck obverse stars. A few faint abrasions are often nothing more than interruptions in the toning across the Choice surfaces. Housed in a pre-barcode NGC holder with CAC endorsement.  
*Ex: The Clark E. Adams and Duncan MacMillan Auction (Superior, 10/1992), lot 598.*  
**From The Hamilton Collection.** NGC ID# 24FG, PCGS# 39603  
 Base PCGS# 6129

- 4601** 1823 O-103, R.2, AU58 PCGS. A lovely and lustrous Capped Bust half dollar. Glimpses of lavender toning visit the obverse margin. Minimally marked and exemplary for the grade. A small obverse flan flaw is noted at 11:30. NGC ID# 24FJ, PCGS# 39606  
 Base PCGS# 6131

**1823 Half Dollar, High-Census MS64**  
**O-104, Double Profile, Low 2 in Date**

- 4602** 1823 O-104, R.3, MS64 NGC. CAC. Multihued toning covers both sides of this near-Gem half, with steel-blue toning at the borders surrounding violet and amber-gold shades that flow into silver-gray centers. Areas of powder-gray patina speckle the obverse fields. The stars are sharp and the coin is well-struck, with Liberty's profile broadly strike-doubled — a result of worn Mint machinery that allowed slight planchet shift, often seen on Bust halves. The 2 in the date sits lower than the other digits to identify the O-104 obverse, while the reverse shows the lowest azure (horizontal shield line) extending beyond the shield edge. The fields and portrait are essentially mark-free. This exact coin is tied for first in the current Steve Herrman Condition Census with two other MS64 coins for the O-104 variety.  
*Ex: Worrell Collection (Superior, 9/1993), lot 678.*  
**From The Hamilton Collection.** NGC ID# 24FJ, PCGS# 39607  
 Base PCGS# 6131

**1823 Half Dollar, Lustrous MS62**  
**O-106a, 'Tampered 3', Gold CAC Seal**

- 4603** 1823 O-106a, R.2, MS62 NGC. Gold CAC. Concentric bands of vibrant cerulean-blue and peach-gold provide excellent eye appeal for this sharply struck O-106a example. A die crack from stars 11 to 13 and a die chip on the tall 3 in the date (apparently a Mint modification) confirm the late die state. Mint luster is remarkably strong while the surfaces show few marks for the assigned grade. Housed in a prior generation NGC holder with the highly-sought Gold CAC seal of endorsement.  
*Ex: Sheridan Downey (8/1994).*  
**From The Hamilton Collection.** NGC ID# 47HP, PCGS# 39610  
 Base PCGS# 6131

**1823 Capped Bust Half, O-107, MS62**  
**Lustrous, Sharply Detailed Example**

- 4604** 1823 O-107, R.2, MS62 PCGS. CAC. The eagle's right (facing) claws are joined by a die line and the letters M and E in AMERICA are similarly connected at the base, identifying the O-107 variety. The date is well-centered and the design elements of this attractive MS62 specimen are sharply detailed throughout. The lustrous, lightly marked surfaces are enhanced by subtle shades of greenish-gold toning. An arcing die crack extends from the rim near the lowest leaf through the letters in UNITED STATES on the reverse. Housed in a green label holder.  
**From The Hamilton Collection.** NGC ID# 47HY, PCGS# 39611 Base PCGS# 6131

**1823 Capped Bust Half, MS64**  
**Late Die State O-108a**

- 4605** 1823 O-108a, R.3, MS64 PCGS. CAC. The 3 in the date has been reworked and all the A's in the reverse legend are missing most of their inner right serifs, identifying the O-108 variety. The die crack above the date identifies the late die state O-108a. This well-detailed Choice example shows an extensive network of die cracks on the obverse, but the lustrous surfaces show only minor signs of contact. Dusky shades of greenish-gold and gunmetal-gray toning add to the outstanding eye appeal. Housed in a green label holder.  
**From The Hamilton Collection.** NGC ID# 24FJ, PCGS# 39613 Base PCGS# 6131

- 4606** 1823 O-110, R.2, MS61 PCGS. Gold CAC. Splashes of green and reddish-gold are somewhat deeper in hue on the reverse. Well struck and minimally abraded. Great eye appeal for the grade, aptly confirmed by the CAC gold sticker.  
**From The Hamilton Collection.** NGC ID# 24FJ, PCGS# 39615 Base PCGS# 6131

**1823 O-110a Ugly 3 Half Dollar, AU53**  
**Struck 5% Off Center**

- 4607** 1823 Ugly 3, O-110a, R.3 — Struck 5% Off Center — AU53 NGC. Moderately off-center toward 7 o'clock with a couple of dozen dentils off the flan. The very bottom of the date is absent, and STATES OF is very tight against the rim. The rim is broad and featureless near 12 o'clock. An unblemished silver-gray half dollar with hints of almond-gold toning. Liberty's profile is strike doubled. The "Ugly 3" variety with the 3 in the date crudely strengthened by a mint worker. The die state is fairly late but lacks the arc-shaped crack through the eagle's right (facing) wing seen on some examples.  
**From The Hamilton Collection.**

**1823 Capped Bust Half, MS63**  
**Ugly 3, O-110a Guide Book Variety**

- 4608** 1823 Ugly 3, O-110a, R.3, MS63 PCGS. CAC. The misshapen "Ugly 3" in the date, caused by a die crack through that digit, identifies the O-110a variety. This well-detailed Select example offers lustrous, lightly marked surfaces, with a mix of silver-gray and champagne-gold toning. Overall eye appeal is outstanding. Housed in a green label holder.  
**From The Hamilton Collection.** NGC ID# 24FJ, PCGS# 39623 Base PCGS# 6134

**1824/1 O-101 Half Dollar, MS63**  
**Early Die State**

- 4609** 1824/1 O-101, R.2, MS63 PCGS. CAC. There are no reverse die cracks visible on this early die state example. Satiny silver surfaces exhibit pale gray luster with hints of steel and gold peripheral toning. Housed in a green-label PCGS holder, this nicely centered piece has a bold strike and excellent eye appeal. Purchased from Sheridan Downey (12/9/1992).  
**From The Hamilton Collection.** NGC ID# 476E, PCGS# 39640 Base PCGS# 6139

**4610 1824 Over Various Dates, O-103, R.1, AU58 PCGS. CAC.** Overton/Parsley (1990) refer to this date as "1824 over a jumble of recuttings." Grayish-tan patina at the margins is more extensive and deeper on the reverse; the centers are silvery. Traces of luster reside in the recesses of the well-defined design features.  
*Purchased from Allstate (2/1991).*  
**From The Hamilton Collection.** NGC ID# 24FK, PCGS# 39646 Base PCGS# 6138

**4611 1824 Over Various Dates, O-103, R.1, MS62 NGC. CAC.** This otherwise available variety becomes challenging in Mint State. Its inclusion in the *Guide Book* makes it highly desirable across all grade levels. Light golden-gray interiors meld with russet and blue shadings around the borders of this high-end overdate representative. Razor-sharp and seldom found finer. Certified in a pre-hologram holder.  
*Ex: Acquired by the present consignator at Newport Beach (7/1989).*  
**From The Hamilton Collection.** NGC ID# 24FK, PCGS# 39646 Base PCGS# 6138

**1824 O-105 Half Dollar, MS64  
 Fantastic All-Around Quality**

**4612 1824 O-105, R.2, MS64 PCGS. CAC.** Overton-105 features a prominent die lump on Liberty's chin. This Choice half dollar, appropriately endorsed by CAC for eye appeal and quality within the grade, cracks the Condition Census for the variety. Lavender and gold patina dominate each side, ceding to bluish-green around parts of the border areas. Well brought-up and lustrous with fantastic visual quality to match the carefully preserved surfaces. Certified in a first generation holder.  
**From The Hamilton Collection.** NGC ID# 24FK, PCGS# 39625 Base PCGS# 6137

**4613 1824 O-115, R.2, AU58 NGC. CAC.** There is a small die chip between the beginning of the scroll and the left (facing) wing. The defining attribute of this nearly Uncirculated example is the marvelous, colorful patina that blankets each side in rainbow tones. Well-struck with fully raised stars and incomparable visual quality.  
*Ex: Sheridan Downey (8/1994).*  
**From The Hamilton Collection.** NGC ID# 24FK, PCGS# 39637 Base PCGS# 6137

**4614 1824 O-116, R.3, MS62 PCGS.** This lustrous half dollar is predominantly brilliant but does have a blush of orange toning near star 1 and a circular dab of patina below the earlobe. Free from any noticeable marks. Liberty's profile is strike doubled. NGC ID# 24FK, PCGS# 39638 Base PCGS# 6137

**1824 O-116 Half Dollar, MS65**

**4615 1824 O-116, R.3, MS65 PCGS.** Ocean-blue toning consumes the borders. The centers are dusky orange with glimpses of steel-gray. Well struck save for a few right-side stars. Lustrous and virtually unabraded. Liberty's profile is strike doubled. A desirable Gem early silver type coin. PCGS has certified just one example finer as O-116 (6/16). NGC ID# 24FK, PCGS# 39638 Base PCGS# 6137

**1825 O-103 Half Dollar, MS63  
 Condition Census Coin, CAC-Approval**

**4616 1825 O-103, Low R.4, MS63 NGC. CAC.** This is a very scarce die marriage attributed by a vertical die line at the upper left shield corner. ED in UNITED and AM in AMERICA are joined. This MS63 example is tied for third place on Donald Parsley and Stephen Herrman's Condition Census for the variety. Cream-gray surfaces display few marks for the grade, the only ones of note being two ticks on the 1 and above the 2 in the date. This well-struck half dollar should find a good home in an advanced collection.  
**From The Hamilton Collection.** NGC ID# 24FL, PCGS# 39649 Base PCGS# 6142

**4617 1825 O-105, R.2, AU55 NGC. Gold CAC.** The portrait profile is strongly doubled and ITED are joined. It is easy to see why CAC has awarded this high-end half dollar a sought-after gold sticker. The quality is absolutely exceptional for the grade. Design detail is strong, especially on the stars. Mint brilliance mixes with daubs of gold, blue, and magenta toning, explaining the top-notch aesthetic appeal. Certified in a prior generation holder.  
*Ex: Auction '89 (Stack's/Superior/RARCOA/Akers, 7/1989).*  
**From The Hamilton Collection.** NGC ID# 24FL, PCGS# 39651 Base PCGS# 6142

**4618 1825 O-111, R.3, MS62 PCGS. CAC.** Star 13 touching the curl, recutting of 50 C, and AM joined at base attribute the variety. Attractive reddish-gold, gray, and soft green patination runs over both sides. The design elements are well-struck save for weakness in the middle letters of PLURIBUS.  
**From The Hamilton Collection.** NGC ID# 24FL, PCGS# 39658 Base PCGS# 6142

**1825 Capped Bust Half Dollar, MS63  
Beautifully Original O-114 Representative**

- 4619** 1825 O-114, R.1, MS63 PCGS. CAC. The 1 is recut and rotated clockwise, and the left base of the shield is recut. This beautifully original Select half dollar shows doubling on the portrait. Violet toning appears throughout, mixed in with gold patina at the centers and blue near the borders. The stars are drawn to the edges, as usual, while central is complete. Encapsulated in an old green label holder.  
*From The Hamilton Collection.* NGC ID# 24FL, PCGS# 39661 Base PCGS# 6142

**1825 O-114 Half Dollar, Near-Gem  
Attractive Multicolor Patina**

- 4620** 1825 O-114, R.1, MS64 PCGS. CAC. Overton-114 is an available variety through most grade levels, but not MS64. The Overton-Parsley Condition Census shows two Gems in the top spot, following by three MS64 examples. Steven Herrman ranks this piece among the finest O-114 halves to surface in the past 25 years. Ice-blue and green toning encompasses the peripheries, progressing to light violet and amber interiors with boldly rendered devices. Extremely attractive and certified in an old green label holder.  
*Ex: Allstate Coin Co. (6/1997).*  
*From The Hamilton Collection.* NGC ID# 24FL, PCGS# 39661 Base PCGS# 6142

**1825 Bust Half Dollar, Richly Toned MS64  
O-115, Lustrous and Well-Preserved**

- 4621** 1825 O-115, R.3, MS64 NGC. CAC. Struck from lightly clashed dies, a die state not mentioned in the Parsley reference. Liberty's profile shows strike doubling. As usual in later die stages, the large stars are flat and drawn to the edge — a result of prolonged die usage during the mintage of 2.9 million pieces. Few examples survive as well-preserved as this coin, with gleaming bronze-gold patina and sharp central motifs. Housed in a prior generation NGC holder, pre-barcode. CAC endorsed.  
*Ex: Heritage (11/1990).*  
*From The Hamilton Collection.* NGC ID# 24FL, PCGS# 39662 Base PCGS# 6142

**1825 Half Dollar, O-115, MS65  
Colorful Toning**

- 4622** 1825 O-115, R.3, MS65 PCGS. The 1825 is a fairly plentiful date, although Gem examples remain scarce. This piece is sharply struck and lustrous, showing only a few trivial marks on the cheek that define the grade. Vivid fire-orange interiors cede to olive-brown and bluish peripheral hues. Eye appeal is excellent. Population (all varieties included): 14 in 65 (2 in 65+), 7 finer (7/16). NGC ID# 24FL, PCGS# 39662 Base PCGS# 6142

**1825 O-116 Half Dollar, MS64  
Prooflike Fields**

- 4623** 1825 O-116, R.3, MS64 Prooflike NGC. The O-116 die pair exists in proof format, and this piece was probably struck immediately after the proofs, before the dies lost their mirrored finish. Delicate splashes of magenta and blue toning appear in the silver-gray surfaces of this splendid prooflike half dollar. The mirrored surfaces exhibit faint hairlines that limit the grade. However, the fields provide a nice backdrop for the satin devices. Sharply defined and highly attractive. NGC ID# 24FL, PCGS# 39663 Base PCGS# 6142

**1826 O-101 Capped Bust Half Dollar, MS64  
Rich, Original Toning**

**4624** 1826 O-101, R.1, MS64 NGC. Subtle iridescence resides beneath the blue and tan-gold toning of this near-Gem 1826 half. Sharply struck throughout, the pick-up points to identify the O-101 variety include a tiny line at the left edge of the scroll and linked serifs at the base of AT in STATES. Housed in a prior generation holder, this coin ranks at the lower end of the Condition Census for the variety.

*From The Hamilton Collection.* PCGS# 39666 Base PCGS# 6143

**4625** 1826 O-102, R.1, MS63 PCGS. Slate-gray, golden-brown, and forest-green toning blankets this satiny Capped Bust type coin. A few thin marks are noted near star 2 and the eagle's head. The identifier for O-102 is a line in the upper serif of the E in E PLURIBUS UNUM. NGC ID# 4ENC, PCGS# 39668 Base PCGS# 6143

**1826 O-102 Half Dollar, Toned MS63**

**4626** 1826 O-102, R.1, MS63 NGC. CAC. A readily available variety, although not always with the pleasing original patina and sharpness of strike seen on this Select Mint State example. Abrasions are limited to a few widely scattered light lines. Some Mint-related roller marks are noted through star 5 to the forecurl, headband, and cap, but otherwise the stars and portrait are well-struck. Faint iridescence enlivens the warm-gray toning on the obverse, while the reverse displays pronounced gold and lilac accents. Housed in a prior generation NGC holder (pre-barcode). CAC endorsed.

*Ex: Blanchard (3/1991).*

*From The Hamilton Collection.* NGC ID# 4ENC, PCGS# 39668 Base PCGS# 6143

**1826 O-104a Half Dollar, Near-Mint  
10% Off Center Toward 4:30**

**4627** 1826 O-104a, R.3 — Struck 10% Off Center — AU58 NGC. Struck fairly widely off center toward 4:30. Most of AMERICA is off the flan. The date and right-side stars are partial. A broad arc of unstruck surface, widest at 10:30, features a steep, broad rim. The edge is concealed by the encapsulation but is presumably lettered. The predominantly cream-gray surfaces also display lime-green near peripheral elements. Unblemished aside from a pair of thin marks near star 9.

*From The Hamilton Collection.*

**4628** 1826 O-106, R.3, MS62 PCGS. Arguably O-106a, since one of the two cracks described by Overton (spanning STATES OF) is present. No crack is apparent through the arrowheads and O C. The recut left foot of the R in AMERICA is the pick-up point for the die marriage. Lustrous and unabraded with light to medium golden-gray toning. Exceptional quality for the MS62 level. NGC ID# 4ENF, PCGS# 39673 Base PCGS# 6143

**4629** 1826 O-109, R.1, MS62 PCGS. A hint of sun-gold patina visits this lustrous and refreshingly unmarked Bust half. The right-side stars lack a full impression, but the eye appeal is superior for the designated grade. NGC ID# 24FM, PCGS# 39678 Base PCGS# 6143

**4630** 1826 O-117a, R.2, MS62 NGC. CAC. Attribution points include thin lines below claw 5, closely spaced arrowheads, and a die crack through RICA. Antique gray-gold patina will appeal to those who appreciate originality. Sharply struck, save for the stars, with lively mint luster and well-preserved surfaces. Encapsulated in a pre-hologram, pre-barcode holder with CAC approval.

*Ex: Ossie's (3/1988).*

*From The Hamilton Collection.* NGC ID# 49FX, PCGS# 39690 Base PCGS# 6143

**1826 O-118a Half Dollar, MS64  
Reverse Die Cracks**

**4631** 1826 O-118a, R.1, MS64 PCGS. CAC. Delicate die cracks join the tops of NITED STATES and MERICA on the reverse of this late die state half dollar. Housed in a green-label PCGS holder, this piece exhibits vibrant champagne toning over brilliant silver luster on its satin surfaces. Both sides enjoy delicate blue overtones that enhance the eye appeal.

*Purchased from Regal Rare Coins (6/18/1991).*

*From The Hamilton Collection.* NGC ID# 24FM, PCGS# 39692 Base PCGS# 6143

**1827/6 O-101 Half Dollar, MS64  
Popular Overdate Variety**

- 4632 1827/6 O-101, R.2, MS64 NGC. CAC.** The underdigit 6 is barely visible in the best of circumstances on the 1827/6 varieties, and on this O-101 example it is even less-noticeable than normal. The tail of a 6 peeks out above the right serif of the primary 7. The rest of the coin is sharply struck. The C of 50 C shows recutting at its serif, and a pair of prominent die cracks near U of UNITED circle up and down around the reverse legends to confirm the variety. Attractive olive-gray toning with golden luster covers the attractive, smooth surfaces. The coin is currently tied for second place in the Steve Herrman Condition Census. NGC Census (all varieties of the overdate): 7 in 64, 8 finer (7/16). CAC: 6 in 64, 3 finer (7/16). *From The Hamilton Collection.* NGC ID# 24FP, PCGS# 39751 Base PCGS# 6147

- 4633 1827/6 O-102, R.1, AU58 NGC. CAC.** The 7 is punched over a 6, and AM in AMERICA are joined. Liberty's hair curls exhibit pinpoint detail, as do the eagle's feathers, talons, and fletchings. Largely untoned centers meld with dappled golden-tan, violet, and blue patina around the edges. Extraordinary eye appeal. Housed in a rare pre-hologram holder. *Ex: H.R. Cairns (6/1988).* *From The Hamilton Collection.* NGC ID# 24FP, PCGS# 39752 Base PCGS# 6147

**1827/6 O-102 Half Dollar, MS62  
Sharp Mint State Example of the Overdate**

- 4634 1827/6 O-102, R.1, MS62 PCGS.** A wavy die break to the right of the final A in AMERICA defines the O-102 variety, also known as the "apostrophe" reverse. The underdigit 6 in the date is bold — one of three 1827/6 varieties for the issue that share the same obverse. Attractive steel-blue toning at the rims cedes into orange and champagne-gold shades on both sides of this softly lustrous half. The central strike is sharp as are most of the stars, with minor flatness on stars 11 to 13. A few widely scattered, tiny abrasions define the grade. NGC ID# 24FP, PCGS# 39752 Base PCGS# 6147

**1827/6 O-102 Half Dollar, Lustrous MS63**

- 4635 1827/6 O-102, R.1, MS63 PCGS. CAC.** All three 1827/6 varieties share the same obverse with an underdigit 6 visible right of the 7. Overton-102 is distinguished by an apostrophe-like die break over the last A in AMERICA. This is a lovely, lustrous example with delicate gold and violet patina over brilliant surfaces. The devices are boldly struck, and small flecks on the cheek do not distract. Certified in a green label holder with a green CAC approval sticker. *From The Hamilton Collection.* NGC ID# 24FP, PCGS# 39752 Base PCGS# 6147

**1827/6 O-102 Half Dollar, MS64  
Attractively Lustrous**

- 4636 1827/6 O-102, R.1, MS64 PCGS Secure.** *Ex: Link.* Remnants of the previous 6 can be seen in the field amid the 7 in the date. This Choice O-102 representative is sharply struck and lustrous with original golden and lavender toning that shows tinges of blue-green around the peripheries. There are no severe abrasions. Population (all overdate varieties included): 10 in 64 (1 in 64+), 4 finer (6/16). NGC ID# 24FP, PCGS# 39752 Base PCGS# 6147

**1827/6 Half Dollar, MS64  
Among the Finest O-103 Halves**

- 4637 1827/6 O-103, R.4, MS64 PCGS. CAC.** The 7 is punched over a 6, crossbars on the shield extend into the right wing feathers, and the upright of the 5 in the denomination is recut. This near-Gem is tied for third place on the most recent edition of Donald Parsley's Condition Census. Antique-gold and violet patina appears on each side, enriched by glowing mint luster. The borders are softly defined along the upper obverse and lower reverse, but the central motifs display bold detail. A late die state example with clash marks on each side. Housed in an old green label holder. Population (all 1827/6 varieties): 10 in 64 (1 in 64+), 4 finer (7/16). *Ex: Sheridan Downey via Heritage (1/1990).* *From The Hamilton Collection.* NGC ID# 24FP, PCGS# 39753 Base PCGS# 6147

**4638** 1827 Square Base 2, O-104, R.1, MS61 NGC. A small curved line off the lowest pair of olive leaves is unique to this Overton die marriage. Light golden marginal toning yields to largely brilliant centers that shimmer with vibrant luster. The motifs are well-impressed, and there are fewer marks than expected. Housed in a former generation holder.

Ex: Ossie's (7/1988).

**From The Hamilton Collection.** NGC ID# 24FN, PCGS# 39696 Base PCGS# 6144

**4639** 1827 Square Base 2, O-104, R.1, MS62 PCGS. Ex: Link. Dusky lavender, orange-red, and aquamarine toning encompasses satiny and refreshingly unmarked surfaces. The strike is sharp except on star 8. A pleasing Capped Bust type coin. NGC ID# 24FN, PCGS# 39696 Base PCGS# 6144

**4640** 1827 Square Base 2, O-104, R.1, MS62 NGC. CAC. A small raised line near the lowest pair of olive leaves confirms the variety. Luminous luster enlivens surfaces attractively toned in mixed shades of golden-gray, rose, violet, and blue-green. Nearly fully struck aside from the top of the eagle's head and wingtips. Clean fields house a few unimportant flecks. Certified in a former generation holder.

Ex: House of Stuart (3/1989).

**From The Hamilton Collection.** NGC ID# 24FN, PCGS# 39696 Base PCGS# 6144

#### 1827 Square Base 2 Half Dollar, MS63 Scarce O-110 Variety, Gold CAC

**4641** 1827 Square Base 2, O-110, Low R.4, MS63 PCGS. Gold CAC. The first two lines in the first three shield gules fail to reach the lower border. Tied for third on the Condition Census, this Select coin would match the two top-ranked examples were it to sticker one grade level finer, as CAC believes it could. Effulgent luster glistens through violet, blue, and gold toning that lightens near the centers, generating outstanding visual appeal. The motifs exhibit a pinpoint impression, and the surfaces are inarguably clean for the MS63 assessment. Housed in an old green label holder. Gold CAC: 2 in 63, 0 finer (7/16).

**From The Hamilton Collection.** NGC ID# 24FN, PCGS# 39703 Base PCGS# 6144

**4642** 1827 Square Base 2, O-112, R.3, MS61 NGC. Forest-green and autumn-gold toning fill the peripheries of this lustrous and refreshingly unabraded representative. The centers are close to brilliant. The strike is good aside from the left-side stars. Outside the Condition Census for O-112, but nonetheless impressive. NGC ID# 24FN, PCGS# 39705 Base PCGS# 6144

#### 1827 O-117 Half Dollar, MS63 Square Base 2, Lustrous and Smooth

**4643** 1827 Square Base 2, O-117, R.3, MS63 PCGS. Light caramel-gold toning adorns this lustrous and unabraded Select half dollar. The strike is bold except on the device high points. A trace of struck-in grease is noted within the shield, and the area of the olive branch is minutely granular. The 8 in the date is repunched on the right side of the upper loop, the pick-up point for the variety. NGC ID# 24FN, PCGS# 39713 Base PCGS# 6144

**4644** 1827 Square Base 2, O-135, R.3, MS62 PCGS Secure. Ex: Link. Deep lavender-red and blue-green shades dominate most of this satiny and lightly abraded half dollar. The strike is good despite blending on a few stars. An impressive Capped Bust type coin. NGC ID# 24FN, PCGS# 39734 Base PCGS# 6144

#### 1827 Square Base 2 Half Dollar, MS64 Tied for Finest for the O-135 Variety

**4645** 1827 Square Base 2, O-135, R.3, MS64 PCGS. CAC. There is an extra hair strand below the I in LIBERTY, and the A in STATES is rotated clockwise with remnants of a former A over the right serif. This Choice O-135 half is tied for finest for the variety, according to Parsley's Condition Census. Two other MS64 appearances are listed in Herrman's reference, one in Stack's September 1997 Remick sale (lot 823) and another in our September 2015 Long Beach Signature sale (lot 4340), possibly the same coin. This richly toned example is strongly struck everywhere except the border, where dentilation is incomplete. Free of singular marks. Housed in an old green label holder with CAC approval

**From The Hamilton Collection.** NGC ID# 24FN, PCGS# 39734 Base PCGS# 6144

1827 O-146 Half Dollar, Lustrous MS62  
Scarce Curl Base 2 Type

**4646** 1827 Curl Base 2, O-146, R.2, MS62 PCGS. Only two varieties have the Curl Base 2 for the 1827 halves — an important type for the issue. O-146 is confirmed by proximity of the final A in AMERICA to the arrowhead (they virtually touch) and the I in PLURIBUS below the left side of T in STATES. Further markers include die lines in the horizontal shield stripes and between the arrowheads and shafts. The left-side stars are a bit flat on this example as are the eagle's talons, but otherwise the strike is sharp on Liberty's hair, drapery folds, and the eagle's wing. The scroll lettering is complete with only slight weakness opposite the bust point. Vibrant silver luster shines through areas of russet, blue, and reddish-gold toning for nice eye appeal. NGC ID# 24FN, PCGS# 39749 Base PCGS# 6145

**4647** 1828 Curl Base 2, No Knob, O-102, R.2, AU58 PCGS Secure. Golden-brown and ocean-blue toning adorns the margins of this attractive half dollar. The curl above the ear shows slight wear, but the surfaces teem with luster. A thin mark through the T in LIBERTY provides the only mentionable mark. NGC ID# 24FR, PCGS# 39755 Base PCGS# 6148

**4648** 1828 Square Base 2, Large 8s, O-109, R.3, AU58 NGC. CAC. Sharply struck with only star 1 lacking its center, this O-109 variety shows the first 8 in the date punched over a smaller 8. The final A in AMERICA nearly touches the arrowhead. The coin is lightly toned with plentiful remaining mint luster. Pleasing iridescence covers both sides with cream-gray and pale-blue hues amid gold accents. Housed in a pre-barcode NGC holder with CAC endorsement.  
*Ex: Dr. Jack Adams Collection (Superior, 5/1992), lot 1361.*  
**From The Hamilton Collection.** NGC ID# 24FR, PCGS# 39763 Base PCGS# 6150

**4649** 1828 Square Base 2, Large 8s, O-109, R.3, MS62 NGC. This is one of two Square Base 2, Large 8s die pairs. The first 8 exhibits repunching in the upper loop. A curved line occurs below gule 4 on the shield. Each side is uniformly toned in gunmetal-gray hues with bold detail on the relief elements. Microscopic ticks are well-hidden beneath the patina.  
**From The Hamilton Collection.** NGC ID# 24FR, PCGS# 39763 Base PCGS# 6150

1828 O-112 Half Dollar, MS65  
Square Base 2, Small 8, Large Letters

**4650** 1828 Square Base 2, Small 8s, Large Letters, O-112, R.3, MS65 NGC. CAC. Struck from a late state of the dies, with some of the defect lines to the left of the date and near the bust removed by die lapping. Likewise, the "apostrophe" die line to the right of the top serif of C no longer shows. Deep, gunmetal blue toning at the borders surrounds orange-gold centers with nice mint luster shining through. A sharply struck Gem example, tied for second in both the Parsley and Steve Herrman Condition Census. Housed in a prior generation NGC holder (pre-barcode) with CAC endorsement. The holder has a chip missing from the lower-left corner that does not affect the integrity of the encapsulation.  
*Purchased from "Renrob" (11/1990).*

**From The Hamilton Collection.** NGC ID# 24FR, PCGS# 39766 Base PCGS# 6151

1828 O-116 Half Dollar, MS64  
Square Base 2, Small 8s, Large Letters

**4651** 1828 Square Base 2, Small 8s, Large Letters, O-116, R.2, MS64 PCGS. Dull die defect lines are visible left of the date on this example, from an obverse die that was used earlier for O-115. Housed in a green-label PCGS holder, this Choice Mint State 1828 half dollar has satin luster and sharp central details with slight peripheral weakness, especially through the stars that are mostly flat. Both sides are distinctive violet-gray with splashes of blue and gold toning.  
*Purchased from Larry Whitlow (8/16/1993).*

**From The Hamilton Collection.** NGC ID# 24FR, PCGS# 39770 Base PCGS# 6151

**1828 O-116 Half Dollar, MS64  
Square Base 2, Large Letters**

- 4652** 1828 Square Base 2, Small 8s, Large Letters, O-116, R.2, MS64 NGC. CAC. Small 8s, Large Letters. Tied at the lower end of the Condition Census based on the current Steve Herman listing, this brightly lustrous, near-Gem Square Base 2 example displays rich, caramel-gold toning surrounded by autumn-brown borders. The reverse complements the obverse coloration in lighter shades. The coin is sharply struck except at the A in STATES and immediately below on the scroll. Housed in a prior generation NGC holder with CAC endorsement.  
*From The Hamilton Collection.* NGC ID# 24FR, PCGS# 39770 Base PCGS# 6151

**1828 O-119 Capped Bust Half, MS63  
Notable Guide Book Variety**

- 4653** 1828 Square Base 2, Small 8s, Small Letters, O-119, R.3, MS63 PCGS. CAC. The die cutter had a field day creating the O-119 variety, which incorporates a Square Base 2 with a pair of Small 8s in the date, and pairs the obverse with the sole Small Letters reverse legend for the 1828 issue. STA in STATES shows recutting. For good measure, both As in AMERICA are filled at the top. Softly lustrous cream-gray toning melds to bluish-gray accents near the rims on both sides of this frosty and sharply struck Select Uncirculated example. A slightly better *Guide Book* variety. NGC ID# 24FR, PCGS# 39780 Base PCGS# 6152

**1828 Half Dollar, Original MS63  
O-119, Square Base 2, Small 8s and Letters**

- 4654** 1828 Square Base 2, Small 8s, Small Letters, O-119, R.3, MS63 PCGS. CAC. The A in STATES shows recutting at the top left. This is one of the finest O-119 half dollars to come to market over the past decade, although it just barely misses out on making the Condition Census for the variety. The centers are frosty and untuned, progressing to rings of gold, rose, and blue patina at the margins. A razor-sharp Select example that will appeal to the most discriminating Capped Bust half specialist. Housed in an old green label holder.  
*From The Hamilton Collection.* NGC ID# 24FR, PCGS# 39780 Base PCGS# 6152

- 4655** 1828 Square Base 2, Small 8s, Large Letters, O-120, R.1, MS63 NGC. The 2 is recut, and a thin die line pierces the fletching and claw. This razor-sharp Select Capped Bust half dollar boasts a lightly toned obverse with glimpses of cobalt-blue around the borders, and a richly patinated reverse in shades of violet-gray. A small planchet crack occurs below the bust tip. Highly lustrous and eye-appealing.  
*From The Hamilton Collection.* NGC ID# 24FR, PCGS# 39775 Base PCGS# 6151

**1829/7 O-101 Half Dollar, MS63  
Recut Motto**

- 4656** 1829/7 O-101, R.1, MS63 PCGS. The base of a previous 27 are visible at the bottoms of 29 in the date, and the top right corner of the 7 appears over the 9, precluding the one-time description of 1829 over 1. Although slight lapping is evident at the lower reverse, it is not sufficient to designate this as a late die state. Housed in a green-label PCGS holder, this Select Mint State half dollar has brilliant silver luster with delicate blue and pale gold toning.  
*Purchased from Allstate Coin Company (2/16/1993).*  
*From The Hamilton Collection.* NGC ID# 24FT, PCGS# 39807 Base PCGS# 6155

1829/7 O-101a Half Dollar, MS63  
Semireflective Fields, Lapped Die State

- 4657** 1829/7 O-101a, R.1, MS63 PCGS. Recutting on the date is visible on all four numerals, with digits under the 2 and 9 the most obvious evidence of the overdate. A scarce and highly sought variety, prized in Mint State. This example displays mottled iridescent toning over sharply struck motifs and semireflective fields. Struck from the late die state where die lapping removes most of the eagle's tailfeathers and the midsections of the arrow shafts. Pleasing mint luster glows beneath the moderate toning. Population: 15 in 63 (1 in 63+), 25 finer (6/16). NGC ID# 24FT, PCGS# 39808 Base PCGS# 6155

1829 O-105 Small Letters Half Dollar, MS61  
Gold CAC-Endorsed, Exceptional Appeal

- 4658** 1829 Small Letters, O-105, R.1, MS61 NGC. Gold CAC. Translucent shades of gold, blue, and rose-red cover both sides of this sharply struck, early die state Bust half. Cartwheel silver luster beams strongly beneath the attractive, light toning. O-105 is an available variety for the issue, yet few Uncirculated examples exceed the eye appeal of this minimally marked coin. A few light lines beneath the toning do not detract from the frosty Mint-fresh surfaces, and the Gold CAC sticker suggests that the MS61 grade is overly conservative. We agree. Housed in a prior generation, pre-barcode NGC holder. Gold CAC: 1 in 61, 1 finer (7/16).  
*Ex: Auction '89 (Superior Stamp & Coin Co., 7/1989), lot 617, there described as "Choice Brilliant Uncirculated."*  
**From The Hamilton Collection.** NGC ID# 8YZY, PCGS# 39784 Base PCGS# 6154

1829 O-105 Capped Bust Half, MS64  
Iridescent Rainbow Colors

- 4659** 1829 Small Letters, O-105, R.1, MS64 PCGS. CAC. Variety collectors will note a slightly later state of the dies, with recutting on the top arrow shaft not as prominent as earlier strikes, yet not fully effaced by lapping as on the late die states of O-105. Several letters in the motto are recut. A lightly toned and lustrous coin with iridescent rainbow colors throughout both sides, this Choice example shows sharp stars both left and right. Marks are limited to a few light lines and a wormlike strike-through on the motto between I and B of PLURIBUS. Housed in an old green label holder with CAC endorsement.  
*Ex: Tangible Investments of America (9/1990).*  
**From The Hamilton Collection.** NGC ID# 8YZY, PCGS# 39784 Base PCGS# 6154

1829 Half Dollar, O-105, Exceptional MS65  
Lustrous, Beautifully Toned

- 4660** 1829 Small Letters, O-105, R.1, MS65 PCGS. CAC. Here is a wonderful Gem example of the O-105 early die state. Attractively toned and lustrous, the coin displays a band of cerulean-blue at the borders and reddish-orange highlights surrounding the devices, plus violet and lilac overtones that embellish the olive-gray central toning. The coin is needle-sharp except at stars 7 and 8 and at the tip of the cap. Abrasions are nonexistent across the smooth fields and, quite simply, there are no marks of note. A touch of planchet roughness near star 7 is the only visible flaw. Housed in an old green label holder with CAC endorsement, this beautiful Bust half has the eye appeal of a finer grade. A high Condition Census coin for the variety.  
*Ex: Ellesmere Numismatics (7/1990).*  
**From The Hamilton Collection.** NGC ID# 8YZY, PCGS# 39784 Base PCGS# 6154

- 4661** 1829 Small Letters, O-111, R.2, MS63 PCGS Secure. *Ex: Link.* The top of the A in STATES is clearly repunched, characteristic of Overton-111. This lustrous and pleasing half dollar is lightly toned aside from sea-green, lilac, and chestnut shades along the reverse periphery. The left-side stars are soft but the overall strike is good. NGC ID# 24FS, PCGS# 39793 Base PCGS# 6154

- 4662** 1829 Small Letters, O-111a, R.2, MS62 NGC. CAC. A tine off the top fletching extends left into the feathers. This late die state lacks evidence of recutting on the A in STATES and the 5 in the denomination. Both As in AMERICA are filled. Subdued mint luster glimmers beneath a layer of mostly violet-gray toning with occasional bursts of sea-green and ice-blue color.  
*Ex: Allstate Coin Co. (9/1990).*  
**From The Hamilton Collection.** NGC ID# 24FS, PCGS# 39794 Base PCGS# 6154

**4663** 1829 Small Letters, O-112a, R.2, MS62 PCGS. Rich tobacco-brown, jade-green, powder-blue, and lavender-red toning embraces this satiny and unabraded half dollar. The strike is generally sharp, though the C in 50 C is softly brought up. NGC ID# 24FS, PCGS# 39796 Base PCGS# 6154

**4664** 1829 Small Letters, O-114, R.3, MS62 PCGS. The As in AMERICA are filled above the crossbar, diagnostic for O-114. This lustrous and nearly unmarked half dollar is brilliant save for peripheral hints of straw-gold and ice-blue patina. A couple of tiny spots on the reverse serve as identifiers. NGC ID# 24FS, PCGS# 39799 Base PCGS# 6154

**1829 O-115 Half Dollar, Impressive MS64 Small Letters, High 'T' in STATES**

**4665** 1829 Small Letters, O-115, R.1, MS64 NGC. CAC. The second T of STATES rides higher than the other letters, and the lower-most arrowhead shows doubling above the shaft. This is a razor-sharp example with a pinpoint strike. Semireflective fields display dramatic cobalt-blue and fire-orange toning on both sides. A few faint field lines and some Mint-related reverse roller marks on the scroll (below AT) are noted. CAC endorsed, this lustrous near-Gem half radiates outstanding eye appeal. Housed in a prior generation NGC holder.

**From The Hamilton Collection.** NGC ID# 24FS, PCGS# 39800 Base PCGS# 6154

**4666** 1829 Small Letters, O-117, R.2, MS62 PCGS. Gold CAC. The silvery, lustrous surfaces display occasional whispers of gold-tan patina at the margins and are remarkably clean for the grade designation. The design elements are sharply struck throughout. It appears that PCGS was very conservative in grading this piece.

**From The Hamilton Collection.** NGC ID# 24FS, PCGS# 39803 Base PCGS# 6154

**4667** 1830 Small 0, O-101, R.1, AU58 PCGS. Gold CAC. Luster shows in the recessed areas of this near-Mint half. Soft greenish-gray toning covers both sides, each of which exhibits well-defined devices. The surfaces are remarkably clean for a large silver coin that has seen brief circulation.

**From The Hamilton Collection.** NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

**4668** 1830 Small 0, O-103, R.1, AU58 NGC. CAC. The 5 in the denomination and the first A in AMERICA are recut. This is lustrous borderline-Uncirculated half dollar with just a trace of cabinet friction. Beautifully toned in rings of rainbow iridescence that frame brilliant centers. A strongly rendered and remarkably clean type coin in an old "No Line Fatty" holder.

Ex: *D.E.A. and U.S. Marshals Service Sale (Heritage, 12/1988)*, lot 581.

**From The Hamilton Collection.** NGC ID# 24FU, PCGS# 39812 Base PCGS# 6156

**4669** 1830 Small 0, O-103, R.1, MS62 NGC. Attribution points for Overton-103 include recutting on the 5 in the denomination and on the first A in STATES. This is a well-struck type coin with an overlay of untouched, original toning. Attractive fire-orange, crimson, and gunmetal-blue elements appear throughout the reverse. Housed in a pre-hologram holder.

Ex: *Mid-American Rare Coin Auctions (1/1989)*.

**From The Hamilton Collection.** NGC ID# 24FU, PCGS# 39812 Base PCGS# 6156

**1830 O-117 Half Dollar, MS64 Prooflike Small 0**

**4670** 1830 Small 0, O-117, R.2, MS64 Prooflike NGC. This well-produced near-Gem appears to be an early die state, with a small patch of die lines between the field and Liberty's cap, a feature that is normally not present. Combined with the prooflike surfaces, this O-117 half is apparently one of the first examples minted of this variety. Both sides are light silver-gray with fully mirrored fields and lustrous devices, showing pale blue peripheral toning.

Ex: *Beverly Hills Auction (Heritage, 11/2011)*, lot 5013; *New York Auction (Heritage, 12/2011)*, lot 3586; *Dallas Signature (Heritage, 10/2012)*, lot 4339. NGC ID# 24FU, PCGS# 39828 Base PCGS# 6156

**4671** 1830 Small 0, O-118, R.3, MS63 PCGS. CAC. Reddish-gray patination is accented with whispers of bluish-green at the borders of this Select half dollar. The devices are well-defined and neither side reveals mentionable marks.

**From The Hamilton Collection.** NGC ID# 24FU, PCGS# 39829 Base PCGS# 6156

**4672** 1830 Large 0, O-120, R.1, MS62 PCGS. All design elements are razor sharp except for softness in the centrils of stars 6 and 7. Attractive gray patina and well-preserved surfaces further enhance the coin's pleasing eye appeal.

**From The Hamilton Collection.** NGC ID# 24FU, PCGS# 39831 Base PCGS# 6157

**1830 O-123 Half Dollar, Brilliant MS64 Large 0, Frosty and Lustrous**

**4673** 1830 Large 0, O-123, R.1, MS64 PCGS. CAC. Several of the horizontal shield lines (the azure) extend well into the feathers beyond the right shield border, a characteristic of O-122, although the other diagnostics all point to O-123 as the correct variety for this mostly brilliant and frosty near-Gem coin. Both the left-side and right-side stars are sharp on the obverse, and the Large 0 leans left toward the 3 in the date. This coin ranks at the low end of the Condition Census according to Steve Herrman's current analysis and the Parsley reference. Housed in an old green label holder with CAC endorsement.

**From The Hamilton Collection.** NGC ID# 24FU, PCGS# 39834 Base PCGS# 6157

**4674** 1831 O-103, R.1, MS63 PCGS. A well-struck Select Mint State example of this type-coin issue, showing satiny luster and attractive toning. Champagne and orange-gold interior hues cede to mint-green and blue around the borders. Grade-limiting abrasions are minimal. NGC ID# 24FV, PCGS# 39839 Base PCGS# 6159

1831 Half Dollar, O-103, MS63  
Green Label Holder With Gold CAC

- 4675** 1831 O-103, R.1, MS63 PCGS. Gold CAC. Extremely sharp and attractive, this reddish-gold and blue-toned half already ranks close to the Condition Census for the O-103 variety according to both the Donald Parsley and Steve Herrman listings. With the Gold CAC endorsement, it would not be surprising to see the coin move up in the rankings at some future date. The surfaces are smooth and lustrous with virtually no post-mintage marks. The stand of 5 in 50 C is recut. A few roller marks on the reverse legend and scroll are noted, invisible in-hand but easily seen with a glass. The eye appeal is outstanding. Housed in an old green label holder. Gold CAC: 1 in 63, 0 finer (7/16).  
*From The Hamilton Collection.* NGC ID# 24FV, PCGS# 39839 Base PCGS# 6159

1831 Capped Bust Half, Attractive MS62  
O-104, Gold CAC Endorsement

- 4676** 1831 O-104, R.1, MS62 PCGS. Gold CAC. A readily identified variety with blunt 1s in the date, the 83 slightly lower than the 1s, and parallel die lines immediately beneath the bust point to the left of the date. A "spiked" berry confirms the reverse, with a bold die line through the upper berry. Shades of deep-lilac and orange-gold cover both sides, emboldened by frosty mint luster. A sharply struck example except for the mid-scroll, seemingly undergraded as indicated by the Gold CAC endorsement. Housed in an old green label holder. Gold CAC: 1 in 62, 1 finer (7/16).  
*From The Hamilton Collection.* NGC ID# 24FV, PCGS# 39840 Base PCGS# 6159

1831 O-110 Half Dollar, Frosty MS63  
Pleasing, Lightly Toned Example

- 4677** 1831 O-110, R.2, MS63 NGC. CAC. The A in STATES is rotated clockwise, and a tiny tine above R in LIBERTY confirms the O-110 variety. The fields of this frosty Select Uncirculated coin are remarkably free of any marks, while a small ticks on the portrait join some angled Mint roller marks on the reverse as the only anomalies when viewed with a glass. Faint olive-brown toning joins full silver luster on both sides, with the toning is more extensive on the reverse. Housed in a pre-hologram, pre-barcode early NGC holder with CAC endorsement.  
*Ex: Ossie's (3/1988).*  
*From The Hamilton Collection.* NGC ID# 24FV, PCGS# 39846 Base PCGS# 6159

- 4678** 1831 O-111, R.1, AU58 NGC. CAC. A crack joins the base of the date and the lefthand stars. The bottoms of stripes 2 and 3 of line 1 on the reverse shield are joined at the bottom. Old cabinet toning gives this near-Mint half dollar superb eye. Rings of cobalt-blue, rose, and gold surround brilliant interiors. Razor-sharp centrally with marginal softness around the borders. Encapsulated in a former generation holder.  
*From The Hamilton Collection.* NGC ID# 8Z74, PCGS# 39848 Base PCGS# 6159

1831 O-114 Half Dollar, MS64  
Vibrant Toning, Tied for Finest

- 4679** 1831 O-114, R.3, MS64 PCGS. CAC. Flamboyant rainbow toning encircles both sides of this vibrant near-Gem half. Brightly lustrous, shades of amber-gold, sea-green, sky-blue, and lavender provide a dazzling display on both sides. Frosty luster beams from the finely granular surfaces, which show a scattering of light abrasions but no serious marks. The strike is sharp except on the eagle's right (facing) talons. CAC endorsed, the eye appeal is terrific. Tied for finest of the variety according to both the Steve Herrman and Donald Parsley census listings. NGC ID# 24FV, PCGS# 39851 Base PCGS# 6159

**1832 Half Dollar, MS62  
O-101, Large Letters**

**4680 1832 Large Letters, O-101, R.2, MS62 PCGS.** O-101 and its late die state counterpart are the only Large Letters varieties of the 1832 half dollar. A thick, heavy die break through the eagle's left (facing) wing also quickly identifies this available die marriage. This is a pleasing lower-end Mint State example, showing satiny golden-toned luster. The reverse shows a central area of deeper olive toning. Minor high-point marks account for the grade. Population (O-101 and -101a included): 13 in 62 (1 in 62+), 9 finer (7/16). NGC ID# 24FW, PCGS# 39885 Base PCGS# 6161

**4681 1832 Large Letters, O-101a, R.1, MS62 PCGS.** The heavy die break below the left (facing) wing allows arm's length attribution of the present die marriage. An unmarked and attractive piece with considerable cartwheel shimmer. Splashes of peach-gold toning contribute further to the eye appeal. NGC ID# 24FW, PCGS# 39886 Base PCGS# 6161

**1832 O-103 Small Letters Half, MS64  
Early Die State, Full Tailfeathers**

**4682 1832 Small Letters, O-103, R.1, MS64 NGC. CAC.** Full tailfeathers remain on this sharply struck, early die state O-103 half. Shades of peach-gold and blue cover the smooth obverse, while dove-gray, amber-gold, and blue toning appear on the reverse. The surfaces are brightly lustrous and satiny, with plentiful eye appeal for the near-Gem grade. The variety is known for its recut 5 in the denomination, with a diagnostic die lump in the drapery fold above 18 in the date. Housed in a prior generation NGC holder (pre-barcode) with the early NGC full-width hologram.  
*Ex: Allstate Coin Co. (8/1992).*  
**From The Hamilton Collection.** NGC ID# 24FW, PCGS# 39860 Base PCGS# 6160

**1832 Half Dollar, MS64 with Gold CAC  
O-106, Outstanding Iridescent Patina**

**4683 1832 Small Letters, O-106, R.1, MS64 PCGS. Gold CAC.** The strike is exceptionally sharp on this immaculate and attractive Bust half, a fact that did not escape the CAC evaluation since it was awarded the important Gold CAC label for quality beyond the assigned numeric grade. The fields are semiprooflike beneath rich iridescent toning, with blue and violet colors visible amid reddish-gold and yellow-gold undertones. Already at the low end of the Condition Census for the variety, this example is poised to move up in the ranking. Housed in a green label holder for the past two and a half decades.

**From The Hamilton Collection.** NGC ID# 24FW, PCGS# 39864 Base PCGS# 6160

**4684 1832 Small Letters, O-111, R.1, MS62 PCGS. CAC.** Medium-intensity gold- and reddish-tan patina resides on the unabraded surfaces of this 1832 half, and sharp detail characterizes the design elements, resulting in above-average eye appeal. A few toning spots are noted on the obverse. Housed in an old green label holder.

**From The Hamilton Collection.** NGC ID# 9KXV, PCGS# 39869 Base PCGS# 6160

**4685 1832 Small Letters, O-116, R.3, MS63 PCGS. CAC.** Greenish-gray patination is joined by splashes of reddish-gold on the reverse. The design features are well-defined except for a few stars with the typical softness in the centers. The upper part of the shield and some letters in PLURIBUS also reveal weakness. Nevertheless, the surfaces are remarkably clean for the grade designation.

**From The Hamilton Collection.** NGC ID# 24FW, PCGS# 39875 Base PCGS# 6160

**4686 1832 Small Letters, O-118, R.1, MS63 ANACS.** Splendid peach-gold, apple-green, and plum-red toning endows this lustrous and well preserved Bust type coin. As nice as can be found for the designated grade. One of the three "Laced Lips" varieties for 1832, O-118 also has a double vertical line at the left shield corner.

**From The Hamilton Collection.** NGC ID# 24FW, PCGS# 39877 Base PCGS# 6160

**4687 1833 O-102, R.1, MS60 PCGS. Gold CAC.** Reddish-gold, soft green, and gray patina runs over both sides of this well-struck MS60 half. The gold CAC sticker affirms the above-average eye appeal. Certified in an old green label holder.

**From The Hamilton Collection.** NGC ID# 24FX, PCGS# 39888 Base PCGS# 6163

**1833 Half Dollar, O-102  
High-Luster, Near-Gem Example**

- 4688** 1833 O-102, R.1, MS64 NGC. CAC. Attractively toned in shades of pale forest-green and peach-gold, this lustrous and frosty near-Gem displays the eye appeal and surface quality of an even finer grade. The stars, hair curls, and cap folds are crisp — in fact, the only incompleteness of strike occurs at the upper shield stripes and corners. A stubby-top flag on the 5 and a curved die line from the rim to the 0 of the denomination identify the O-103 variety. This coin approaches the Condition Census for the die pair. Housed in an early NGC holder (pre-barcode) with CAC endorsement. *Purchased from Heritage (9/1992).*  
**From The Hamilton Collection.** NGC ID# 24FX, PCGS# 39888 Base PCGS# 6163

- 4689** 1833 O-105, R.2, MS63 PCGS Secure. Ex: Link. The second S in STATES is repunched south, diagnostic for Overton-105. This lustrous powder-blue and olive-green half dollar has exemplary surfaces and occasional incompleteness of strike. NGC ID# 24FX, PCGS# 39892 Base PCGS# 6163

**1833 Capped Bust Half Dollar, MS64  
O-108, Remarkable Preservation**

- 4690** 1833 O-108, R.1, MS64 PCGS. CAC. The second-lowest azure line extends beyond the shield border into the right wing and the date sits low and close to the dentils of the O-108 variety. A readily available die marriage, this example is Choice and lustrous with attractive lilac-gray toning and peach-gold accents. The sharply struck devices are nearly free of marks while the smooth fields are remarkably well-preserved. Housed in a green label holder with CAC endorsement.  
**From The Hamilton Collection.** NGC ID# 24FX, PCGS# 39896 Base PCGS# 6163

- 4691** 1833 O-109, R.3, MS63 PCGS. A spur from the I in AMERICA is the well-known pick-up point for Overton-109. This dusky gunmetal-gray, sea-green, and wheat-gold half dollar appears unabraded. The satiny surfaces show softness on several stars and the RIB in PLURIBUS. NGC ID# 24FX, PCGS# 39897 Base PCGS# 6163

- 4692** 1833 O-110a, R.2, MS63 PCGS. A curved line passes through the top of 50 to the C. The later die state shows a crack through the lower leaves and claws. Shimmering luster emanates from beneath a layer of antique patina. Strike detail is better at the centers than the peripheries on each side of this Select offering. NGC ID# 24FX, PCGS# 39899 Base PCGS# 6163

**1834 Half Dollar, Iridescent MS64  
Large Date, Small Letters, O-106**

- 4693** 1834 Large Date, Small Letters, O-106, R.1, MS64 PCGS. CAC. Diagnostics for this transitional die pair include a small 4 under the primary 4 in the date, and a recut upright on the M in AMERICA. The stars lack centers, but the hair curls are crisp and the eagle shows strong detail on the feathers and fletchings. Beautifully toned in blue and violet iridescence. Housed in an old green label holder. PCGS reports 16 Large Date, Small Letters submissions finer (7/16).  
**From The Hamilton Collection.** NGC ID# 24FY, PCGS# 39910 Base PCGS# 6165

- 4694** 1834 Large Date, Small Letters, O-107, R.1, AU58 NGC. CAC. This available variety features a triangular filling within the top of the I in LIBERTY. The devices show good detail with trivial high-point friction. A surprising degree of luster remains throughout this AU58 half dollar, shining through a layer of rich violet and ice-blue patina with added golden elements on the reverse. Certified in a former generation holder with CAC approval.  
Ex: *Mid-American Auctions (1/1989).*  
**From The Hamilton Collection.** NGC ID# 24FY, PCGS# 39911 Base PCGS# 6165

- 4695** 1834 Large Date, Small Letters, O-107, R.1, MS62 PCGS. Gold CAC. Splashes of bluish-green patina visit the lustrous gray surfaces. This well-struck piece has been very well cared for. The gold CAC sticker affirms the outstanding eye appeal. Certified in an old green label holder.  
**From The Hamilton Collection.** NGC ID# 24FY, PCGS# 39911 Base PCGS# 6165

- 4696** 1834 Small Date, Small Letters, O-109, R.1, MS63 NGC. CAC. Stars 8, 9, and 10 are repunched, and horizontal die lines appear within the vertical stripes of the shield. This variety is typically available in high grades, making it perfect for type purposes. Bluish-gray and olive coloration graces each side, covering sharply struck motifs. A tiny dig occurs above the cap. Overtly original.  
**From The Hamilton Collection.** NGC ID# 24FY, PCGS# 39913 Base PCGS# 6166

**1834 O-114 Half Dollar, MS65  
Small Date, Small Letters**

- 4697** 1834 Small Date, Small Letters, O-114, R.1, MS65 PCGS. Repunching on stars 3 and 4 confirm the Overton marriage, despite its similarity to O-113. Rich electric-blue borders frame autumn-brown fields. The high points are gunmetal-gray. A coruscating and unabraded example. As usual for O-114, peripheral elements are incompletely brought up. NGC ID# 24FY, PCGS# 39918 Base PCGS# 6166

**1834 Bust Half, MS64**  
**O-116, Small Date, Small Letters**

- 4698** 1834 Small Date, Small Letters, O-116, R.1, MS64 PCGS. CAC. Mottled hues of gold, blue, lilac, and pale-rose glimmer with strong mint luster on both sides of this near-Gem, CAC-endorsed Small Date half. The Small Letters reverse is weak in spots on the O-116, especially at the A in STATES and across the scroll below it — a characteristic of several Small Letters reverses in 1834. The O-116 obverse shows a long “worm” in the field near the bust below star 1, tracing the outline of the bust, while the clasp displays a distinctive double outline. Moderate reflectivity in the fields on both sides adds to the eye appeal of this Choice example. NGC ID# 24FY, PCGS# 39921 Base PCGS# 6166

**1835 Capped Bust Half Dollar, O-101, MS64**  
**Prior Generation NGC Holder**

- 4699** 1835 O-101, R.1, MS64 NGC. CAC. Dappled fawn-gold and orange central toning joins sea-green and blue borders for strong visual appeal across the smooth and unabraded surfaces of this lustrous near-Gem half dollar. The O-101 variety seldom comes this nice. Bolstered by a sharp strike and CAC endorsement, the coin would not surprise if it moves up from its current spot of third in the Condition Census, as ranked by the Steve Herrman and the Parsley references. NGC Census: 38 in 64 (2 in 64+, 1 in 64★), 17 finer (7/16). CAC: 11 in 64, 5 finer (7/16). *From The Hamilton Collection.* NGC ID# 24FZ, PCGS# 39927 Base PCGS# 6168

- 4700** 1835 O-103, R.2, MS62 PCGS. CAC. Parallel diagonal die defect lines between stripes of shield attribute the variety. Grayish surfaces are accented with green and orange toward the margins, and the design elements are sharply impressed. *Purchased from Heritage Auctions (9/1992).* *From The Hamilton Collection.* NGC ID# 24FZ, PCGS# 39929 Base PCGS# 6168

- 4701** 1835 O-104, R.3, MS63 NGC. The scarcest die pair for the date features an oval area where the forecurl meets the headband, and a vertical tine protrudes up into the feathers from the right shield corner. Blue, rose, and gold toning at the rims fades to brilliant centers on each side of this frosty Select half dollar. Tied for finest on the Condition Census for O-104 and housed in a prior generation holder. *From The Hamilton Collection.* NGC ID# 24FZ, PCGS# 39930 Base PCGS# 6168

**1835 Capped Bust Half, MS64**  
**O-105, Nearly Brilliant Example**

- 4702** 1835 O-105, R.1, MS64 PCGS. The 3 in the date sits low and leans right on this nearly brilliant, frosty and lustrous Choice half. Additional pick-up points for the O-105 variety include recutting on stars 3, 4, and 8. Traces of almond-gray toning make a brief appearance on the otherwise untuned surfaces. Tied for third in the Condition Census for the variety, according to both the Steve Herrman and Donald Parsley references. Population (all 1835 varieties): 43 in 64 (6 in 64+), 8 finer (6/16). NGC ID# 24FZ, PCGS# 39931 Base PCGS# 6168

**1835 O-105 Half Dollar, MS64**  
**Condition Census Example**

- 4703** 1835 O-105, R.1, MS64 PCGS. Repunching on star 4 confirms the Overton identity of this near-Gem. Satiny and virtually unabraded with rich, original sea-green and chestnut-gold toning. The strike is bold except on the IB in PLURIBUS. O-105 is plentiful in grades through VF, but is very rare in Mint State. The present example may tied for the second-finest known, trailing only a PCGS MS64+ from a recent Stack's-Bowers sale. NGC ID# 24FZ, PCGS# 39931 Base PCGS# 6168

**1835 Half Dollar, Near-Gem**  
**O-105, Condition Census Quality**

- 4704** 1835 O-105, R.1, MS64 PCGS. CAC. Jade-green, butter-gold, and ruby-red embrace this lustrous near-Gem. The deepest shades are on the reverse. The stars and the RIB in PLURIBUS are soft, but the major devices are well struck. Marks are relegated to a single hair-thin straight diagonal line on the portrait. NGC ID# 24FZ, PCGS# 39931 Base PCGS# 6168

- 4705** 1835 O-107, R.1, MS62 PCGS. Caramel-gold and gunmetal-blue toning blanket this unmarked and attractive Capped Bust type coin. Minor parallel roller marks (as made) pass through the left (facing) claw. The portrait high points display minor blending. NGC ID# 4EKB, PCGS# 39933 Base PCGS# 6168

**4706** 1836 Beaded Reverse, O-106, R.1, MS62 PCGS. Gold CAC. Greenish and gold patina gravitate to the margins, framing the grayish centers. The design elements are well-struck. The finest of five 1836 Lettered Edge halves assigned the Gold CAC sticker. A beautiful piece for the grade designation.  
**From The Hamilton Collection.** NGC ID# 24G2, PCGS# 39966 Base PCGS# 6169

**4707** 1836 Beaded Reverse, O-106a, R.3, MS63 PCGS. CAC. Light golden-brown and apple-green toning visits the borders of this thoroughly lustrous and minimally marked half dollar. Several stars are incomplete but the strike is otherwise good. An exceptional example of this popular *Guide Book* variety. NGC ID# 24G2, PCGS# 39967 Base PCGS# 6169

**4708** 1836/1336 Lettered Edge, O-108, R.1, AU58 NGC. Gold CAC. Overton-108 is identified by the 1836/1336 overdate, a highly collectible variety with its own entry in the *Guide Book*. Iridescent patina comprises shades of green, blue, rose, and peach-orange. The resulting eye appeal is spectacular, partly contributing the gold CAC sticker. The endorsement also suggests this coin is undergraded by at least one level. The strike is fractionally incomplete over the curls and wing feathers, but is exceedingly strong around the borders. Slabbed in an old "No Line Fatty" holder without a barcode.  
*Ex: Moreira Collection, Part 3 (Superior, 1/1989), lot 4466.*  
**From The Hamilton Collection.** PCGS# 39956 Base PCGS# 39955

**4709** 1836/1336 Lettered Edge, O-108, R.1, MS63 NGC. CAC. Hallmarks of this popular *Guide Book* variety include the 8 punched over an underlying 3, the third arrow shaft broken under the claw, and a double outline on the drapery clasp. Old-time toning drapes the surfaces of this Select Lettered Edge offering, endorsed by CAC for its quality within the grade. The stars exhibit full centers, and the strike is equally strong elsewhere. Housed in a former generation NGC holder.  
**From The Hamilton Collection.** PCGS# 39956 Base PCGS# 39955

#### 1836 O-110 Half Dollar, MS64 Lettered Edge, Sharp Strike

**4710** 1836 Lettered Edge, O-110, R.1, MS64 PCGS. CAC. The O-110 is impossible to find with a full strike, since the letters RTY are always weak for the variety. Likewise, a few of the star centers are incomplete including star 7, which shows an extra point (or spike) adjacent to the primary outside point. Otherwise, the definition is razor-sharp on this coin. Satinlike surfaces are smooth and supremely lustrous with iridescent toning throughout both sides. Caramel-gold, lavender, and lilac shades vary with the viewing angle. Housed in an old green label holder with the green CAC endorsement, it is hard to imagine a finer O-110. Both the Parsley and Herrman Condition Census listings show a single MS65 followed by a pair of MS64 coins.  
**From The Hamilton Collection.** NGC ID# 24G2, PCGS# 39946 Base PCGS# 6169

**4711** 1836 Lettered Edge, O-114, R.2, MS63 PCGS. CAC. Soft grayish-gold toning adheres to the lustrous surfaces of this Select half dollar. The design features are well-defined save for the absence of RI in PLURIBUS. Both sides are well-preserved for the grade designation.  
**From The Hamilton Collection.** NGC ID# 24G2, PCGS# 39949 Base PCGS# 6169

**4712** 1836 50/00, Lettered Edge, O-116, R.2, AU55 PCGS. The final Mint blunder in the Lettered Edge Bust half series. The denomination was initially entered as 00, then the first 0 was partially lapped away, and a 5 entered in its place. This lightly abraded wheat-gold and dove-gray example has a spot on the rim near star 6 and a small granular area near the left scroll end. NGC ID# 24G2, PCGS# 39964 Base PCGS# 6170

## REEDED EDGE HALF DOLLARS

### 1836 Reeded Edge Half Dollar, XF40 GR-1, Classic Numismatic Scarcity

**4713** 1836 Reeded Edge, GR-1, R.2, XF40 PCGS. Cobalt-blue and tan-brown toning encompasses this rare date half dollar. A loupe reveals only minor marks. Historic as the first half dollar variety struck with the recently installed steam press. The traditional mintage figure of 1,200 pieces has inspired hoarding over the years, but the production level was undoubtedly higher, given the quantity and grade distribution of survivors. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

### 1836 Reeded Edge Half, GR-1, XF45 Rich Ebony-Gray Toning

**4714** 1836 Reeded Edge, GR-1, R.2, XF45 PCGS. Copper coins were the first denominations struck by the Mint's new steam press, followed by a reported mintage of 1,200 half dollars in 1836. The actual mintage may have been higher. This Choice example is glossy and smooth with ebony-gray fields and silver-gray raised devices for a distinctive, two-tone effect. Sharply struck, the coin displays excellent technical quality with the visual appeal of a "circulation cameo." A glass reveals only tiny marks distributed across the smooth surfaces. Housed in a prior generation green label holder.  
**From The Hamilton Collection.** NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

**1836 GR-1 Reeded Edge Half Dollar, XF45  
Colorfully Toned Original Surfaces**

**4715** 1836 Reeded Edge, GR-1, R.2, XF45 NGC. CAC. The Thonnelier steam press ushered in a new era at the Mint, replacing the labor-intensive screw presses. Mint Director Robert Patterson reported, "The workmen are now engaged in making other steam presses; and as these are completed, the coining by human labor (will) be abandoned..." The current coin is a Choice representative of the 1836 Reeded Edge format, struck on the new steam press. Steel-blue shades accent the golden-gray toning. Lightly abraded, the sharp surfaces retain hints of reflectivity and traces of mint luster. A small rim bump is noted at 7 o'clock on the obverse. From a late die stage, housed in a pre-hologram holder with CAC endorsement.  
*Ex: Lee Certified Coins (2/1989).*

**From The Hamilton Collection.** NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

**4716** 1836 Reeded Edge, GR-1, R.2 — **Repaired** — PCGS Genuine. AU Details. The left obverse field has been crudely smoothed, but this lightly circulated key date half dollar has an attractive reverse. That side displays a sea-green margin and light golden patina about the eagle. The obverse is toned olive-green. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

**4717** 1837 GR-8, R.4, MS62 PCGS. A small "spike" from the top of Liberty's cap identifies the scarce die marriage. This well struck and coruscating type coin displays ocean-blue, autumn-gold, and lavender peripheral toning. The reverse is especially colorful. The left obverse is moderately abraded, but the eye appeal is nonetheless imposing. PCGS# 531054 Base PCGS# 6176

**4718** 1837 GR-12, R.2, MS62 PCGS. CAC. Soft crimson and greenish-gray patina resides on the obverse ceding to cobalt-blue and reddish-violet on the reverse. All devices are sharply impressed and neither side reveals mentionable marks. The GR-12 shares its obverse with GR-11, with a bold crack through star 7, but the reverse die differs as confirmed by a short die line beneath the crossbar of E in UNITED. Housed in an old green label holder.  
*Ex: Purchased from Allstate Coin Co., 4/1992.*

**From The Hamilton Collection.** NGC ID# 24G4, PCGS# 531058 Base PCGS# 6176

**1837 GR-13 Half Dollar, MS64  
Lustrous, Choice Surfaces**

**4719** 1837 GR-13, R.1, MS64 PCGS. CAC. Both sides display attractive olive-gray toning, with lemon-gold highlights at the borders and soft underlying mint luster throughout. A glass reveals a few minor marks on the cheek and below the clasp, but overall the surfaces are remarkably free of abrasions or marks. Unlike many 1837 halves, there are no die cracks or overt Mint-related defects on either side. A Choice Uncirculated example, the coin is housed in an old green label holder with CAC endorsement.  
*Ex: Numismatic Consultants (8/1992).*

**From The Hamilton Collection.** PCGS# 531059 Base PCGS# 6176

**4720** 1837 GR-22, R.2, MS61 NGC. Gold CAC. Clash marks occur in the field above Liberty's chest and the eagle's left (facing) wing. Typically struck for the variety, this Uncirculated Reeded Edge, 50 CENTS reverse half dollar is entirely patinated in lavender gray toning with soft luster shining through. Exceptionally clean for the MS61 assessment, hence the Gold CAC sticker. Housed in an early pre-hologram NGC holder with a plain white insert.  
*Ex: Ossie's (11/1987).*

**From The Hamilton Collection.** NGC ID# 24G4, PCGS# 531071 Base PCGS# 6176

**4721** 1838 GR-13, R.1, MS60 PCGS. Golden-gray centers are framed by whispers of green around the margins. The devices are well-impressed. A few spots on each side determine the grade.

**From The Hamilton Collection.** NGC ID# 24G5, PCGS# 531094 Base PCGS# 6177

**1838 Reeded Edge Half Dollar, Rainbow MS63  
GR-13, Smooth Colorful Surfaces**

**4722** 1838 GR-13, R.1, MS63 NGC. CAC. Struck from a late die state, this Select Uncirculated coin displays an advanced die crack with accompanying die lumps through the denomination and legend on the reverse. The motifs are sharply struck despite weak dentils. Attractive rainbow toning is slightly iridescent, encompassing blue, lavender, red, and gold shades with soft mint luster across satiny, smooth surfaces. A few light lines on the portrait and in the reverse fields are visible with a glass but do not distract from the great eye appeal. This coin traces back to an old Wayne Raymond envelope but it is now housed in an old, pre-barcode NGC holder with CAC endorsement.  
*Ex: Scott Travers, Numismatic Consultants (8/1991).*

**From The Hamilton Collection.** NGC ID# 24G5, PCGS# 531094 Base PCGS# 6177

- 4723 1839 Large Letters, GR-6, R.3, MS62 PCGS. CAC.** Well-struck design features and soft golden-gray patina on lustrous surfaces combine to yield pleasing eye appeal for the designated grade. Well-deserving of the CAC sticker.  
**From The Hamilton Collection.** PCGS# 531103 Base PCGS# 6179
- 4724 1839-O GR-1, R.1, VF30 PCGS.** Bluish-green hues blend into the gunmetal-gray fields of this sharp VF 1839-O half dollar, while the relief elements contrast with lighter tan-gray patina. The coin is well-detailed and choice for the grade. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181
- 4725 1839-O GR-1, R.1, VF35 PCGS.** The late die state with many peripheral cracks, especially prominent on the reverse. The walnut-brown and ocean-blue surfaces are faintly hairlined but devoid of relevant abrasions. A Choice VF example of the only collectible New Orleans Capped Bust issue. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181
- 4726 1839-O GR-1, R.1, VF35 PCGS.** A late die state with heavy cracks across both borders. Gunmetal-gray and autumn-brown toning encompasses this moderately circulated but unmarked half dollar. An arc of minor granularity passes through star 8 and Liberty's cap. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

**1839-O/O GR-1 Half Dollar, XF40  
Very Late Die State, Gold CAC**

- 4727 1839-O GR-1, R.1, XF40 PCGS. Gold CAC.** A monumental array of die cracks cover both sides of this lightly circulated, richly toned New Orleans issue. Just 116,000 pieces were struck. Regal coloration includes royal-blue, violet, and Midas-gold toning, with a surprising amount of mint luster remaining throughout both sides. The mintmark is repunched north. Sharp definition on the raised elements defies the near-terminal state of the dies that show high and low areas among the multitude of die breaks. Housed in an old green label holder with Gold CAC recognition. Gold CAC: 3 in 40, 38 finer (7/16).  
**From The Hamilton Collection.** NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

- 4728 1839-O GR-1, R.1, XF45 PCGS.** A late die state of this scarce O-Mint Bust half, with many peripheral die cracks on both sides of the coin showing varying die sinking and disintegration — a foreshadowing of shattered dies. The warm-gray fields and devices retain their sharp strike and attractive surfaces, which are faintly marked but devoid of large abrasions. A Choice XF example of the only collectible New Orleans Capped Bust issue. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181
- 4729 1839-O GR-1, R.1 — Improperly Cleaned — NGC Details. AU.** The 1839-O is the only collectible New Orleans Capped Bust half dollar issue. GR-1 is the usually seen variety, distinctive for its repunched mintmark. This cream-gray representative is somewhat subdued, but well defined and without mentionable marks. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

- 4730 1839-O GR-1, R.1 — Improperly Cleaned — NCS. AU Details.** The late die state with many spindly cracks across both borders. The mintmark is repunched south. A stone-gray example with a slender vertical streak of slightly deeper toning on each side of the bust. The surfaces are slightly subdued but display only unimportant contact. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

## SEATED HALF DOLLARS

- 4731 1839 No Drapery, WB-101, AU50 ANACS.** A popular and important one-year type coin, the sole true “No Drapery” half dollar in the Seated series, as designed by Christian Gobrecht. Subsequent No Drapery issues in the series are a function of die polishing, rather than design. This richly toned example displays dramatic cobalt-blue and copper-gold patina with album-style “porthole” coloration. Light lines and tiny marks are scattered across the surfaces, but there are no major distractions beyond normal wear and the eye appeal is dramatic. Housed in an early generation ANACS holder.  
*Ex: Long Beach Signature (Heritage, 10/2001), lot 6633.* NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

**1841 Half Dollar, MS63  
Repunched Date**

- 4732 1841 Repunched Date, WB-102, MS63 NGC.** Slight repunching is seen below the 18 in the date. This appears to only be seen on one obverse die. Light silver overall with touches of gold at the obverse margins and additional violet elements at the right reverse. Well-defined with wispy abrasions in the glimmering fields that contribute to the grade. Census: 4 in 63, 13 finer (7/16). NGC ID# 24GR, PCGS# 572008 Base PCGS# 6236

**1842 Half Dollar, Richly Toned MS64  
Medium Date, Large Letters**

- 4733 1842 Medium Date, Large Letters, WB-104, MS64 PCGS. CAC.** There are three known Medium Date, Large Letters die pairings and they are not differentiated by die pairs (yet). However, these three die pairs commonly show “die cracks and die file lines” according to the 1993 Wiley-Bugert reference. This particular half shows a die crack that shoots to the left and upward from the 1 in the date, past the rock base and into the rim beyond. The surfaces are richly toned with strong underlying mint luster. Sharply struck throughout. Population: 11 in 64, 3 finer (6/16). NGC ID# 24GU, PCGS# 572013 Base PCGS# 6239

- 4734 1843-O WB-101, Die Pair 5, R.3, MS62 NGC.** The rich aqua-blue and orange-gold patina is lighter in the centers. This Mint State 1843-O half dollar is lustrous and well-struck with lightly abraded fields. A pleasing representative of an issue that is elusive in better grades. Census: 13 in 62, 23 finer (7/16).  
*Ex: Long Beach Signature (Heritage, 6/2002), lot 7219.* PCGS# 572023 Base PCGS# 6244

**4735 1845 WB-101 MS62 PCGS.** Mint State examples of the 1845 halves are very scarce regardless of numeric grade. This lustrous MS62 coin is sharply struck on the obverse with well-formed star centers and crisp definition on Liberty's hair. The reverse shows slight blending of the eagle's left leg and arrow fletchings. Silver centers yield to lilac-gray and vibrant orange-gold toning. A pair of tiny nicks are noted on Liberty's cheek, yet the coin is remarkably free of abrasions for the grade. Population: 4 in 62, 11 finer (6/16). NGC ID# 24H3, PCGS# 572035 Base PCGS# 6248

**4736 1845-O MS62 PCGS.** An interesting array of die cracks represents the terminal state of the reverse die in its third usage, while the obverse die made its only appearance on this variety of the 1845-O. Faint golden-gray toning drifts over the silver surfaces that show semiprooflike reflectivity on both sides. Slight blending at the base of the eagle and among Liberty's hair curls and the surrounding stars is noted, while marks are limited to some faint hair-thin lines and small abrasions. Population (all 1845-O varieties): 8 in 62, 21 finer (6/16). NGC ID# 24H4, PCGS# 6249 Base PCGS# 6249

#### 1845-O Half Dollar, Attractive MS64 No Drapery Variety

**4737 1845-O No Drapery WB-101, Die Pair 12, R.4, MS64 PCGS.** Struck from the third and final usage of the obverse die, each die use shows progressively less drapery beneath the elbow from die polishing until reaching the current stage deemed No Drapery by PCGS. While the 1839 No Drapery Seated half is the only issue struck without drapery as a separate Gobrecht design feature, the 1845-O No Drapery is collected as well despite being merely a function of die state. The grading services recognize it as a variety and the 1845-O No Drapery has a separate *Guide Book* listing.

This example is frosty and lustrous. Shades of lilac-gray, blue, and pale-gold form a natural light patina over both sides with exceptional eye appeal. A few light field lines are visible with a glass and the reverse displays the vertical die striations known for the issue. The coin is sharply struck as are most representatives of this popular New Orleans date. Only five 1845-O pieces are certified by PCGS in Mint State as No Drapery examples, with this coin tied with one other as finest certified. Population: 2 in 64, 0 finer (7/16). NGC ID# 24H4, PCGS# 6250 Base PCGS# 6250

#### 1846-O WB-103 Half Dollar, MS64 Repunched Medium Date

**4738 1846-O Medium Date, Repunched Date, WB-103, Die Pair 5, R.4, MS64 PCGS.** The date is lightly repunched, most apparent below the base of the 1. Die cracks along the reverse periphery confirm the die pair. This ocean-blue and butter-gold near-Gem offers coruscating luster, a sharp strike, and a virtual absence of abrasions or other detractors. Population: 4 in 64, 1 finer (6/16). NGC ID# 27SW, PCGS# 572050 Base PCGS# 6255

#### 1851-O Half Dollar, Scarce MS64 Original Speckled Toning

**4739 1851-O WB-101, Die Pair 1, R.4, MS64 PCGS.** The story of the 1851-O half is much the same as that for the other pre-1853 silver coins: The influx of gold from California drove the price of silver coins above face value. The result is many thousands were melted. Only five die combinations are known for this issue. This die pairing is recognizable by the unfinished area below the olive leaves, a tiny tine under the eagle's left (facing) wing, and several die lines within the lines of the lower portion of the shield. This is a richly lustrous coin. Much of the original mint brilliance remains, but significant areas on each side are also covered with speckled russet patina. Sharply struck throughout. For all 1851-O varieties. Population: 7 in 64, 9 finer (6/16). PCGS# 572082 Base PCGS# 6267

**4740 1853 Arrows and Rays, WB-101, MS62 PCGS.** A pleasing Mint State type coin, showing sharp design elements and satiny, champagne-tinted mint luster. A few streaks of struck-in die grease are seen horizontally across the upper obverse. Minor surface chatter determines the grade but poses limited distraction. NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275

#### 1853 Arrows and Rays Half, MS64 Necessary One-Year Type

**4741 1853 Arrows and Rays, WB-101, MS64 PCGS. CAC.** A generation ago Arrows and Rays quarters and halves were still considered common, high-mintage coins. Their importance at that time was overlooked because collecting by type was just beginning to come into vogue. Date and mintmark collectors could always find an example. However, with the advent of type collecting, and especially collecting type in high grades there was tremendous price pressure placed on the near-Gem and finer examples of the Arrows and Rays one-year type. This is a brilliant example with more of a satiny finish than frosted. The strike details are strong throughout and there are no obvious or detracting abrasions on either side. NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275

**1853-O Arrows and Rays Half, MS63  
Colorful Toning, Unlisted Die Marriage**

**4742** 1853-O Arrows and Rays, WB-101, Die Pair Unlisted, MS63 PCGS. CAC. Peach-gold, rose-red, and lime-green toning graces this lustrous and carefully preserved single-year New Orleans type coin. This half dollar has Reverse I, identified by a radial crack through the E in AMERICA and a die line below the lower left serif of the E in STATES. The obverse diagnostics do not match either WB-20 or WB-21, the two listed Reverse I varieties. NGC ID# 24JK, PCGS# 572086 Base PCGS# 6276

**4743** 1854-O Arrows, WB-101, Die Pair 3, R.1, MS64 PCGS. Several die cracks on both sides allow ready attribution. Deep forest-green, lavender, and walnut-brown toning embraces the obverse. The reverse is virtually brilliant. Well struck and coruscating with minimal marks. NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

**1854-O Arrows Half Dollar, MS65  
Naturally Patinated, Eye-Appealing**

**4744** 1854-O Arrows, WB-101, Die Pair 34, R.3, MS65 NGC. This naturally patinated near-Gem half was produced from the 34th of 58 die pairs identified in Bill Bugert's comprehensive 2013 monograph. More than 5.2 million pieces were struck in 1854 by the New Orleans Mint, so it is possible more die pairs remain to be discovered. The mintmark is nearly centered between the feather tip and the F of HALF, narrowing the number of possible die combinations considerably. Russet-red toning accents surround the devices of this pearlescent-silver example. The strike is sharp on Liberty's head, but less so on the star centers and on the eagle's left leg. Census (all varieties): 13 in 65, 10 finer (6/16). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

**4745** 1855-O Arrows, WB-101, Die Pair 4, R.4, MS63 PCGS. Considering the mintage of more than 3.6 million pieces, Mint State examples of the 1855-O are few and far between. This Select Uncirculated coin displays original multicolor toning supported by bright mint luster. Sharply struck except for slight weakness at star 13 and the eagle's left (facing) talon, the surfaces show bold motifs with remarkably few marks for the assigned grade. A rim mark at 12 o'clock on the reverse is the sole abrasion of note, while a radial die crack from to star 4 toward Liberty's arm confirms the variety. NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

**1855-O Arrows Half Dollar, MS65  
Scarce New Orleans Type Coin**

**4746** 1855-O Arrows, WB-101, WB-4, R.3-4, MS65 PCGS. This Arrows half dollar from the New Orleans mint is a collector favorite, representing both a short-lived type and a branch mint issue in high grade. This is a remarkably bright, lustrous example with lightly toned centers that are surrounded by pale blue marginal toning. The strike details are remarkably strong for this mint, that is well known for its notoriously weak strikes. Population: 23 in 65 (1 in 65+), 8 finer (7/16). NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

**1864 Seated Half, MS64  
Shimmering Semiprooflike Surfaces**

**4747** 1864 WB-101 MS64 PCGS. CAC. Although a substantial mintage of 379,100 pieces was accomplished in this tumultuous year, many thousands were shipped overseas, a substantial number to Guatemala. When and if those coins returned, they were far from pristine. High-grade examples are difficult to locate. This example displays bright mint luster with shimmering, semiprooflike fields. The strike is strong throughout and there are no mentionable abrasions. Population: 15 in 64 (1 in 64+), 11 finer (6/16). PCGS# 572158 Base PCGS# 6311

**1865-S WB-101 Half Dollar, MS62  
Smooth and Lightly Toned**

**4748** 1865-S Small Wide Broken S, WB-101, Die Pair 1, R.4, MS62 PCGS. Light straw-gold and powder-blue toning visits this satiny San Francisco Civil War half dollar. The surfaces are slightly subdued but appear unabraded. A good strike overall, despite blending on the uppermost stars. Very Scarce in Uncirculated grades, although VF examples are generally available. PCGS# 572167 Base PCGS# 6314

- 4749 1866-S Motto, Very Small S, WB-102, Die Pair 2, MS62 PCGS.** Regardless of variety, the 1866-S With Motto Seated half dollar is rare in Uncirculated condition. This piece displays a sharp strike and satiny luster with a suggestion of light golden color. Trivial surface chatter limits the grade in the absence of any major abrasions. Population: 4 in 62, 15 finer (7/16). PCGS# 572174 Base PCGS# 6320

**1870 Seated Half Dollar, MS65  
Important Condition Rarity**

- 4750 1870 WB-101 MS65 PCGS.** The 1870 Seated half dollar had a total production of only 633,900 coins, and few have survived in such remarkable quality. This piece has a bold strike and pristine surfaces with satin luster that shines through lovely amber, gold, violet, emerald, and blue toning that is blended across both surfaces. Population: 5 in 65, 1 finer (7/16). NGC ID# 24JZ, PCGS# 572188 Base PCGS# 6327

**1870-S WB-101 Seated Half, MS63  
Attractive Lilac-Silver Surfaces**

- 4751 1870-S Very Small S, WB-101, Die Pair 1, R.3, MS63 PCGS. CAC.** The Very Small S mintmark position directly below the feather tip is the easiest pick-up point for the variety. Despite a mintage of more than 1 million pieces, the 1870-S very scarce in Select Uncirculated grades and finer. This frosty and lustrous example displays lilac-gray and reddish-gold toning on both sides. Numerous short die lines are easily seen on the portrait, especially at Liberty's neck and upper torso as well as in and near the obverse shield. The reverse shows roller marks across UNITED. CAC endorsed. Population (all varieties): 6 in 63 (1 in 63+), 5 finer. CAC: 2 in 63, 5 finer (6/16). NGC ID# 6467, PCGS# 572191 Base PCGS# 6329

**1871 Half Dollar, Lustrous MS66  
WB-103, Repunched Date**

- 4752 1871 Repunched Date, WB-103, MS66 PCGS. CAC.** Noticeable repunching is seen above the base and the flag of the first 1 in the date. The reverse die is identifiable by a die line the field between the denticles and left upright of the M. Someone has taken care of this coin for many years. The surfaces display thick, blended rose and blue luster with thick underlying luster, the look that one immediately recognizes as original. The strike on the obverse is full, while there is just the slightest high point softness noted on the reverse devices. Among the finest known of this issue. Population: 3 in 66, 0 finer (6/16). NGC ID# 646A, PCGS# 572195 Base PCGS# 6330

- 4753 1872-CC WB-101, Die Pair 1, R.4, XF45 PCGS.** Autumn-brown, battleship-gray, and forest-green patina envelops this better date Carson City half dollar. The fields display small marks but none are distracting. Occasional tiny rim nicks are also of little import. NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

**1872-CC Half Dollar, AU50  
Problem-Free Collector Coin**

- 4754 1872-CC WB-101, Die Pair 1, R.4, AU50 PCGS.** A lightly circulated cream-gray and caramel-gold Carson City half dollar. Luster shimmers across the motifs and borders, and Liberty's legs show only minor wear. The right obverse field displays small marks, but none merit singular mention. The 1872-CC is collectible in well-circulated grades but becomes rare at the AU level. NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

**1873 Arrows Half, Lustrous MS64  
Small Arrowheads Variant**

**4755** 1873 Small Arrows, WB-107, MS64 PCGS. The Small Arrowheads varieties are much more challenging to locate than their Large Arrowheads counterparts. Only three WB varieties have been recorded and the other two show either a Repunched Date or a Doubled Die Obverse (a.k.a. quad stripes). The obverse of this piece has blended blue-rose toning across that side, while the reverse is mostly untuned. The strike is sharp throughout and there are only the tiniest abrasions discernible. Population: 39 in 64 (2 in 64+), 15 finer (6/16). NGC ID# 2XVM, PCGS# 572212 Base PCGS# 6343

**4756** 1873 Small Arrows, Doubled Die Obverse, WB-109, FS-101, MS63 NGC. "This is likely the strongest doubled obverse die in the series," in the terminology of the *Cherrypickers'* reference. The obverse is dramatically doubled on LIBERTY, the shield, and the cap. The coin is boldly struck and shows satiny luster beneath olive-gold patina. Abrasions are minimal. Census (all varieties included): 24 in 63, 29 finer (7/16). PCGS# 400136 Base PCGS# 6343

**1874-CC Arrows Half, XF40  
Elusive Carson City Issue**

**4757** 1874-CC Arrows, WB-101, Dir Pair 2, R.5, XF40 PCGS. The 1874-CC half dollar is scarce in all grades. This is a bright, lightly circulated example with steel-gray color and pleasing detail. The surfaces are generally smooth. This issue had a small mintage of 59,000 pieces and is in high demand regardless of condition. Population: 12 in 40, 43 finer (6/16). NGC ID# 24LB, PCGS# 572221 Base PCGS# 6347

**1875-CC Half Dollar, MS62  
Repunched Mintmark, Green Label Holder**

**4758** 1875-CC Repunched Mintmark, WB-102, Die Pair 5, R.3, MS62 PCGS. Diagnostics for die pair 5 include two vertical die lines below Liberty's chin and a die dot between US in TRUST. Evidence of repunching appears within the loops of the mintmark. Roller marks are visible on each side, yet design detail is needle-sharp, particularly on the lower portion of the eagle and olive leaves. A softly lustrous, steel-gray survivor from a mintage of 1 million coins. Certified in an old green label holder.  
*Ex: Winthrop Coins (8/1992).*  
**From The Hamilton Collection.** NGC ID# 24KE, PCGS# 572228 Base PCGS# 6350

**4759** 1875-S Very Small S, WB-101, Die Pair 17, R.3, MS64 PCGS. CAC. Dusky shades of silver-gray and amber toning blanket the lustrous surfaces of this well-detailed Choice specimen. The Wiley-Bugert variety is determined by the very small mintmark above the F in HALF as well as heavy die clashing visible in Liberty's lap. A prominent, oblong-shaped lump at the right base of T in TRUST confirms the reverse die, while a tiny spike protrudes from the left upright of 5 in the date. NGC ID# 24KF, PCGS# 572229 Base PCGS# 6351

**4760** 1877 Closed Bud, WB-103, MS65 ANACS. While a thin band of rainbow toning graces the margins, both sides of this 1877 half are only lightly toned at the centers. The fields are prooflike, although they are a bit busy with light lines and a few small marks. Aside from some incompleteness at Liberty's head and at stars 5 to 8, the obverse strike is bold, as is the reverse except at the arrow fletchings and the left (facing) talons, which show minor blending. A flashy example, earning the Gem designation by ANACS. NGC ID# 24KK, PCGS# 572246 Base PCGS# 6355

**1877 Half Dollar, Peripherally Toned MS66  
Much Scarcer Than the Mintage Indicates**

**4761** 1877 Closed Bud, WB-103, MS66 PCGS. CAC. A breathtaking Gem specimen with frosty, untuned centers and peripheral accents of reddish-orange with an occasional dab of blue on the reverse. If ever a high mintage on a coin could be totally disregarded, it would have to be on the 1877 half dollar. While more than 8 million pieces were struck of the issue, Gem or better specimens are just as difficult to obtain as many of the low-mintage dates from the 1880s. Population: 23 in 66 (4 in 66+), 2 finer (6/16).  
*Ex: Central States Signature (Heritage, 5/2003), lot 6769.* NGC ID# 24KK, PCGS# 572246 Base PCGS# 6355

**1880 Half Dollar, MS66  
Great Original Patina**

- 4762 1880 Closed Bud, WB-102, MS66 PCGS. CAC.** Half dollar production took a significant hit after 1878, when the Mint started directing its attention toward Morgan dollars. Additionally, large quantities of expatriated halves started flowing back into the country from Canada and South America, reducing the need for new coinage. Thus, only 8,400 Seated half dollars were struck in 1880. This Premium Gem exhibits rainbow target-toning on the obverse and mottled violet, crimson, and olive-green patina on the reverse. Nearly fully struck and semiprooflike. Population: 23 in 66 (2 in 66+), 2 finer (6/16). NGC ID# 24KT, PCGS# 572262 Base PCGS# 6362

**1881 Half Dollar, Toned MS65+  
Reflective, Mark-Free Surfaces**

- 4763 1881 Closed Bud, WB-102, MS65+ NGC. CAC.** Partially prooflike fields surround the frosted central devices of this high-end Gem half, one of just 10,000 circulation strikes produced in 1881. Steel-blue overtones cover attractive, lustrous gold base toning on the obverse, with violet shades added to the palette on the reverse. The coin is remarkably free of any marks, lines, or signs of contact. Slight weakness at Liberty's head and the surrounding star centers as well as at the eagle's left talon do not diminish the eye appeal of this impressive, CAC-endorsed coin. Census: 10 in 65 (3 in 65+, 1 in 65★), 12 finer. CAC: 4 in 65, 6 finer (6/16). NGC ID# 24KU, PCGS# 572264 Base PCGS# 6363

- 4764 1887 WB-101 MS62 PCGS.** Reflective, prooflike fields are somewhat overwhelmed by the intense rainbow toning that radiates from the richly toned borders toward the colorful centers. The strike is sharp throughout with the exception of Liberty's head and three or four of the surrounding stars. A few light abrasions exist, but the eye appeal of this example definitely exceeds its numeric grade. Population: 12 in 62, 87 finer (6/16). NGC ID# 24L2, PCGS# 572272 Base PCGS# 6369

**PROOF SEATED HALF DOLLARS**

**1858 Seated Half, PR64  
Excellent Toning**

- 4765 1858 PR64 PCGS.** Vivid blue, sea-green, champagne, and violet hues blanket both sides of this Choice proof 1858 Seated half dollar. The strike is sharp, and the eye appeal exceeds expectations. The 1858 proof is an elusive date, and its popularity as the first proof issue marketed to the collecting public is significant. Population: 26 in 64, 9 finer (6/16). NGC ID# 27TH, PCGS# 6412

- 4766 1859 PR63 PCGS.** Wispy champagne toning with blue, green, and violet highlights combine to present excellent eye appeal. A small toning spot near star 13 may help identify this piece in past or future sales. Faint hairlines limit the grade. Population: 38 in 63, 51 finer (6/16). NGC ID# 27TJ, PCGS# 6413

- 4767 1868 PR64 PCGS. CAC.** Deep cobalt-blue toning clings to the margins of this near-Gem proof, framing reddish-gray centers. Sharp definition and well-preserved surfaces round out the coin's pleasing eye appeal, aptly recognized by CAC.  
Ex: John A. Van Arsdall, M.D. Collection (Bowers and Merena, 1/1993), lot 487.  
From The Hamilton Collection. NGC ID# 27U3, PCGS# 6426

**1868 Half Dollar, PR65  
Deep Multicolor Toning**

- 4768 1868 PR65 PCGS. CAC.** This is a fully struck Gem proof with the coveted CAC green label and deep, original toning. Both sides are cast in rich amber-orange, gold-green, olive-gray, russet, forest-green, and cherry-red hues. The fields are deeply reflective. The 1868 proof half dollar is seldom seen so well-preserved. Population: 10 in 65, 2 finer (6/16). NGC ID# 27U3, PCGS# 6426

**1869 Seated Half, PR67  
Original Toning**

- 4769 1869 PR67 PCGS.** The 1869 proof half dollar is available in the absolute sense, but Superb Gems are rare. PCGS has seen only three pieces in PR67, one a Cameo, and none finer (6/16). This piece is sharply struck with reflective fields. Lovely original toning in concentric shades of gold, sea-green, blue, violet, and pale orange blanket each side. NGC ID# 27U4, PCGS# 6427

**1872 Half Dollar, PR66 Cameo  
Surprisingly Scarce in High Grades**

- 4770 1872 PR66 Cameo PCGS.** This earlier With Motto half is surprisingly challenging to locate in better grades, even though 950 proofs were struck. The fields on this piece are deeply mirrored and there is significant contrasting mint frost over the devices, the combination producing noticeable cameo contrast. The centers are mostly brilliant and are surrounded by pale golden-rose toning around the margins. Population: 3 in 66 Cameo, 0 finer (7/16). NGC ID# 27U7, PCGS# 86430

**1874 Arrows Half, PR64 Cameo  
Vivid Border Toning**

- 4771 1874 Arrows PR64 Cameo PCGS Secure.** Toned with deep blue-green on the obverse periphery and an alluring spotlight of cameo brightness on Liberty. The balance of the reverse is brilliant, but deep gold appears around the peripheries. An important two year type coin with the arrows at the date and always in strong demand. Scarce so well-preserved and a very desirable coin for the numismatist. Population: 29 in 64 (2 in 64+) Cameo, 6 finer (6/16). NGC ID# 27U7, PCGS# 86435

**1882 Half Dollar, PR67 Cameo  
Attractively Toned**

- 4772 1882 PR67 Cameo NGC. WB-101.** Here is one of the finest examples known of this scarce, low-mintage issue and also one of the most visually impressive. The surfaces are virtually perfect, and the centers are nearly free from color with ever-deepening shades of golden-brown and blue toning toward the rims. Perfectly matched in appearance on each side, the fields are deeply reflective which helps establish the cameo effect against the frosted devices. Only 1,140 proofs were struck in 1882 plus another 4,400 business strikes, thus making the 1882 a sought-after coin in any condition and in any method of manufacture. Census: 6 in 67 Cameo (1 in 67+, 1 in 67 ★), 1 finer (7/16).  
*Ex: FUN Signature (Heritage, 1/2009), lot 3864. NGC ID# 27UH, PCGS# 86443*

- 4773 1883 PR64 PCGS.** Pale-gold, cerulean-blue, and lavender shades dominate this richly toned Choice proof. Viewed at the proper angle, the deeply mirrored fields reveal their near-Gem quality and reflectivity. The frosty central devices are similarly toned, diminishing the contrast between the fields and devices, yet the strike is sharp throughout and very few lines or marks of any kind disturb the strong eye appeal. NGC ID# 27UJ, PCGS# 6444

**1883 Seated Liberty Half, PR67  
Very Rare at This Level**

- 4774 1883 PR67 NGC. WB-101.** This Superb Gem proof features considerable undesignated cameo contrast, accounting for the excellent aesthetic appeal. Deeply mirrored violet- and blue-toned fields surround frosty devices layered in attractive lavender and pinkish-orange patina. Each side is practically pristine, save for a few microscopic flecks. A production of 1,039 proofs complements a mintage of 8,000 circulation strikes for this 1883 issue. Sufficient Treasury stockpiles and inflows of old American silver from abroad diminished the need to strike new half dollars. The low business-strike mintage puts significant date pressure on proofs that are otherwise available through PR64. Only a handful of proofs survive in Superb Gem condition, and they are widely sought after. Census: 6 in 67 (1 in 67★), 3 finer (6/16).  
*Ex: Purchased from Aspen Park Rare Coins by Gene Cardner (4/2005); Gardner Collection, Part IV (Heritage, 10/2015), lot 98732. NGC ID# 27UJ, PCGS# 6444*

**1886 Seated Half Dollar, PR66  
Only 886 Proofs Minted**

- 4775 1886 PR66 PCGS.** Proof mintages dwindled toward the end of the Seated half dollar series. An average of 1,113 proofs were coined from 1879 to 1883. From 1884 to 1887, the average was 850 proofs per year, and from 1888 to 1891, the average was 683 proofs per year. This Premium Gem proof has nice contrast between the fields and devices, visible beneath splendid iridescent toning. Population: 16 in 66, 5 finer (6/16). NGC ID# 27UM, PCGS# 6447

**1889 Seated Liberty Half, PR66  
Low Business-Strike and Proof Mintage**

- 4776 1889 PR66 PCGS. WB-101.** The 1889 is a scarce date with 711 proofs and 12,000 business strikes issued. That proof mintage is relatively small compared to previous dates from the period, which reached as high as 1,355 specimens in 1880. The obverse of this impressive Premium Gem exhibits ocean-blue, ruby-red, and gold patina, while the reverse is bathed in similar but more pronounced hues. Splendidly preserved, and a delightful addition to a collection of toned 19th century proofs. Population: 17 in 66 (4 in 66+), 3 finer (6/16).  
Ex: FUN Signature (Heritage, 1/2005), lot 7423; FUN Signature (Heritage, 1/2006), lot 2796; FUN Signature (Heritage, 1/2008), lot 1641; Eugene Gardner Collection, Part IV (Heritage, 10/2015), lot 98735. NGC ID# 27UR, PCGS# 6450

**1889 Half Dollar, Multicolor PR66+  
Few are Certified Finer**

- 4777 1889 PR66+ PCGS. CAC.** From a mintage of 711 pieces, this late-series proof Seated half dollar showcases deeply mirrored fields with concentric toning of ocean-blue, violet, and orange-gold on each side. The devices are lightly frosted, though the beautiful patina precludes a Cameo designation. Still, this is an immensely attractive Premium Gem proof. Plus-graded by PCGS with CAC endorsement for its outstanding eye appeal as well as the technical quality of its strike. Population: 17 in 66 (4 in 66+), 3 finer (6/16). CAC Population: 4 in PR66, 2 finer (6/16). NGC ID# 27UR, PCGS# 6450

**1891 Half Dollar, PR65 Cameo  
Delightful Toning**

- 4778 1891 PR65 Cameo NGC.** The 1891 proof Seated half is popular as the final issue in the series. NGC has seen a small number of Cameos but no Ultra Cameos. This Gem Cameo is the NGC Coin Explorer plate coin. The strike is full, and the fields are deeply mirrored. Sun-gold interiors cede to amber, violet, and blue peripheral halos. Census: 7 in 65 Cameo, 10 finer (6/16). NGC ID# 27UT, PCGS# 86452

**BARBER HALF DOLLARS**

- 4779 1892 MS65 PCGS.** Whispers of brownish-tan and lavender adhere to the lustrous, well-preserved surfaces of this Gem Barber half. The upper-right shield corner is weak, as typically seen. The 1892 is challenging in Gem condition and elusive any finer. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

- 4780 1892 MS65 PCGS.** Olive-gray and aquamarine hues blanket satiny mint luster on this Gem first-year Barber type coin. The upper-right corner of the shield is weak as usual, but the eagle's talons are sharp. Finer examples become elusive. NGC ID# 24LE, PCGS# 6461 Base PCGS# 6461

- 4781 1892 Tripled Die Reverse, FS-801, MS64 NGC. CAC.** The reverse shows tripling on the legends, stars, ribbon ends, and arrows. Dusky antique patina swathes each side of this Choice inaugural-year Barber half dollar. A bold strike shows strong detail on the stars, forecurl, and fletchings. A nice examples of this popular *Cherrypickers'* variety. NGC ID# 24LE, PCGS# 145290 Base PCGS# 6461

**1892-O Micro O Half Dollar, Good 4  
Collector-Grade Example**

- 4782 1892-O Micro O, FS-501, Good 4 PCGS.** The Micro O 1892-O Barber half dollar is the only true stopper in the series in low grade. This example displays steel-gray patina with deeper toning in parts of the fields. The obverse is evenly worn with bold rims, while the reverse displays a weak right-hand border. There are no serious flaws for the grade. Population: 11 in 4, 30 finer (6/16).  
From *The Collection of Richard W. DeRobertis*. PCGS# 391216 Base PCGS# 6463

- 4783 1893 MS64 PCGS.** The 1893 Barber half dollar was not widely saved at the time of issue, and survivors grading finer than the present Choice example are rare. This coin displays a sharp strike and softly frosted luster beneath dusky champagne toning. There are no severe abrasions. Population: 38 in 64 (3 in 64+), 34 finer (7/16). NGC ID# 24LK, PCGS# 6465

**1893 Barber Half Dollar, MS65**  
**Finest Certified With the Tripled Die Reverse**

- 4784 1893 Tripled Die Reverse, FS-801, MS65 PCGS.** Tripling of the die is clearly visible at ATE of STATES and at ALF of HALF. Other letters and reverse elements are obviously doubled. Few doubled die varieties exist in the entire Barber half series (let alone of the tripled nature), and both PCGS and NGC now list this important variety as a separate entry. The coin is a lustrous and sharply struck example with cream-white surfaces and splendid, satiny luster. It is the sole Gem listed with the acknowledged Tripled Die Reverse at either service. Population (Tripled Die Reverse): 1 in 65, 0 finer (6/16). NGC ID# 24LK, PCGS# 510588 Base PCGS# 6465

**1894 Half Dollar, MS65**  
**Outstanding Surface Quality**

- 4785 1894 MS65 PCGS.** A collectible date in Uncirculated condition but seldom seen at the Gem level. This softly frosted 1894 Barber half dollar is boldly struck and well-preserved, showing olive-green and golden toning. Liberty's cheek is particularly clean, and a few stray lines that limit the grade are hidden beneath the patina. Population: 23 in 65 (1 in 65+), 14 finer (7/16). NGC ID# 24LN, PCGS# 6468

**1895-S Barber Half, MS65**  
**Attractive Luster and Sharpness**

- 4786 1895-S MS65 PCGS. CAC.** Ex: Shireman. Mint State examples of the 1895-S Barber half dollar is primarily clustered in MS64 and lower grades. This Gem is conditionally rare, and finer pieces are exceedingly so. The strike is full, and the mint-fresh surfaces showcase splendid frosty mint luster. The fields have a hint of reflectivity, and wisps of champagne toning appear over each side. Population: 23 in 65 (13 in 65+), 6 finer (6/16). NGC ID# 24LU, PCGS# 6473

**1897 Half Dollar, MS66**  
**Conditionally Rare Type Coin**

- 4787 1897 MS66 PCGS. CAC.** Any Barber half dollar certified at the Premium Gem grade level is worth getting excited about, as at this level even common dates become major condition rarities. This 1897 example is thickly frosted, with a sharp strike and clean surfaces. Many casual collectors would call this piece brilliant, though we note a light golden tinge to both sides. Population: 15 in 66 (1 in 66+), 2 finer. CAC: 7 in 66, 2 finer (6/16). NGC ID# 24LY, PCGS# 6477

**1897-S Barber Half, Lustrous AU58**  
**Scarce Semikey Issue**  
**Appears Mint State**

- 4788 1897-S AU58 PCGS. CAC.** The 1897-S is a longtime semikey in the Barber half series, and this near-Mint State example would fit nicely into a mostly Uncirculated set. The faintest touch of rub appears on the highest points, with silver-white surfaces gleaming faintly of gold overtones. While this piece may read in the catalog as a "slider," the surfaces are brightly lustrous and it looks **very** much like an Uncirculated coin. Population: 7 in 58, 62 finer. CAC: 4 in 58, 15 finer (6/16).  
*Ex: Long Beach Signature (Heritage, 5-6/2012), lot 3867. NGC ID# 24M2, PCGS# 6479*

- 4789 1898 MS65 PCGS Secure.** Ex: Hayes. A well-struck, satiny Gem with warm golden toning and pleasing eye appeal. The 1898 Barber half is elusive in Gem condition, and finer pieces are rarely seen. Population: 19 in 65 (2 in 65+), 14 finer (6/16). NGC ID# 24M3, PCGS# 6480

**1898-O Half Dollar, MS64**  
**Elusive in Mint State**

- 4790 1898-O MS64 PCGS Secure.** Ex: Hayes. The 1898-O is a slightly better date in the Barber half dollar series, particularly so at the finer Mint State levels. This near-Gem displays satiny luster with trivial grazes on the cheek that limit the grade. Russet and lavender-gray toning surrounds the borders. The eagle's right (facing) talons and wing junction show typical New Orleans Mint softness. Population: 23 in 64, 13 finer (6/16). NGC ID# 24M4, PCGS# 6481

**1901 Half Dollar, Toned MS65**  
**Seldom Seen This Fine**

- 4791 1901 MS65 NGC.** Mint State examples of the 1901 Barber half dollar are plentiful through MS64, but finer coins are rare. This Gem displays satiny mint luster and well-defined relief elements. Blended lemon-gold and olive toning appears on each side, masking trivial grazes that limit the grade. Census: 12 in 65 (1 in 65 ★), 3 finer (6/16). NGC ID# 24MC, PCGS# 6489

**1902-S Half Dollar, MS65**  
**Appealing Surfaces and Color**

- 4792 1902-S MS65 PCGS. CAC.** Beautiful silver and champagne-pink colors compete for territory on this lustrous and extremely attractive better-date S-mint Barber half. Minor strike weakness occurs at the upper-right shield corner and the adjacent wing, but there are few marks of any significance, and the generous luster and appealing surfaces more than compensate. Population: 7 in 65, 18 finer (6/16).  
 Ex: *The Owen Collection, Part I / Rosemont Signature* (Heritage, 8/2013), lot 3980. NGC ID# 24MH, PCGS# 6494

- 4793 1903 MS63 PCGS Secure.** Ex: Hayes-Pryor. Light to medium tan-brown and forest-green toning visits this satiny and sharply struck silver type coin. The reverse is unabraded, and the obverse shows only incidental contact. NGC ID# 24MJ, PCGS# 6495

**1904-S Half Dollar, Toned AU55**  
**Key Issue to the Series**

- 4794 1904-S AU55 PCGS.** The 1904-S is a widely recognized key to the Barber half series, and one that is generally not available in mint condition. Its key status makes it of primary interest to date- and mintmark collectors. As such, this example should garner a great deal of interest. The surfaces are golden-gray with much underlying brightness. The obverse displays roller marks, which are only visible with magnification. There are no post-striking defects worthy of mention. Population: 12 in 55, 42 finer (6/16). NGC ID# 24MP, PCGS# 6500

**1905 Barber Half, MS66**  
**Conditionally Rare**

- 4795 1905 MS66 PCGS.** This Premium Gem is a condition rarity and displays radiant mint luster beneath mottled olive-gold toning. There are no distracting abrasions, and the only notable strike softness is seen on the eagle's right (facing) wing junction, as usual. Finer examples of the 1905 Barber half are prohibitively rare. Population: 9 in 66 (1 in 66+), 3 finer (6/16). NGC ID# 28PX, PCGS# 6501

- 4796 1905-O MS63 PCGS.** The 1905-O is a slightly better date in Uncirculated condition, although this Select example remains within the grasp of the average collector. The eagle's right (facing) wing junction is soft, but the remainder of the design elements are well brought up. Amber-gold toning paints the obverse and the reverse borders. Population: 29 in 63 (1 in 63+), 60 finer (6/16). NGC ID# 24MS, PCGS# 6502

- 4797 1905-S MS63 PCGS.** Pewter-gray surfaces exhibit wispy blue, gold, and iridescent toning on both sides of this frosty Select Mint State Barber half dollar. This issue is elusive in the better Mint State grades. Population: 13 in 63, 30 finer (6/16). NGC ID# 24MT, PCGS# 6503

- 4798 1906-O AU58 PCGS. CAC.** The 1906-O half dollar is a better date in Uncirculated condition, and near-Gem pieces such as the present coin experience comparable demand. The eagle's right (facing) shoulder is weak, as usual, but the obverse is well-defined. Luster remains in the fields beneath champagne-gray toning. Population: 14 in 58, 68 finer (7/16). NGC ID# 24MW, PCGS# 6506

**1906-S Half Dollar, MS64+  
Original Patina**

- 4799 1906-S MS64+ PCGS.** Luminous surfaces show near-Gem preservation on this 1906-S Barber half dollar, toned in dusky amber-gold with bluish-green accents around the borders. The strike is soft on the eagle's right (facing) wing junction, as usual, but the obverse is bold. Population: 41 in 64 (2 in 64+), 21 finer (6/16). NGC ID# 24MX, PCGS# 6507

**1906-S Barber Half, MS65  
Richly Toned, Well-Preserved**

- 4800 1906-S MS65 PCGS. CAC.** Soft, beautiful patina is the greatest asset of this strongly lustrous and well-preserved Gem. Deep gold, violet, and blue shadings drape the fields and the well-defined portrait. A top-notch survivor from this little-saved issue of under 1.8 million pieces. Population: 12 in 65 (1 in 65+), 9 finer. CAC: 6 in 65, 6 finer (6/16).  
Ex: *Central States Signature (Heritage, 4/2008)*, lot 1257. NGC ID# 24MX, PCGS# 6507

**1907 Barber Half, Rare MS66  
Shimmering Mint Luster**

- 4801 1907 MS66 PCGS.** This otherwise plentiful Philadelphia issue becomes a major rarity in Premium Gem condition and is almost unknown finer. The present example is well-struck, displaying shimmering golden-toned luster and outstanding eye appeal. A few trivial grazes are seen with a loupe, none out of line for the grade. Population: 5 in 66 (1 in 66+), 1 finer (7/16). NGC ID# 24MY, PCGS# 6508

- 4802 1908-O MS64 PCGS.** The strike is rather meticulous throughout both sides of this near-Gem Barber half dollar, including full radials on all stars and limited weakness even at the problematic area of the reverse — the upper-right shield stripes and the right-top eagle's wing nearby, both of which show far more detail than usual (and especially for an O-mint strike). Light golden-gray toning deepens to occasional tinges of pale charcoal on this difficult date. Population: 79 in 64 (1 in 64+), 75 finer (6/16). Population: 79 in 64 (1 in 64+), 75 finer (6/16). NGC ID# 24N6, PCGS# 6514

**1908-O Half Dollar, MS66+  
Exceptional Eye Appeal and Luster**

- 4803 1908-O MS66+ PCGS. CAC.** Rainbow-toned and exceptionally lustrous, this Premium Gem half offers a sharp strike for the 1908 New Orleans issue. Old-time "coin board" toning combines with underlying silver flash for tremendous eye appeal. The carefully preserved surfaces show a minimum of tiny, ticklike contacts, each well-hidden in the toning. More than 5 million pieces were struck, but few examples are finer. Population: 20 in 66 (3 in 66+), 15 finer. CAC: 11 in 66, 11 finer (7/16). NGC ID# 24N6, PCGS# 6514

**1908-S Half Dollar, MS64  
Lightly Toned and Well-Struck**

- 4804 1908-S MS64 PCGS. CAC.** Out of the mintage of 1.6 million pieces only a few dozen higher grade examples have survived. This representative displays light rose-gold toning that deepens noticeably around the margins. Both sides are enlivened by the bright mint luster, a characteristic of San Francisco products. Population: 19 in 64 (1 in 64+), 16 finer. CAC: 3 in 64, 7 finer (6/16).  
Ex: *Long Beach Signature (Heritage, 5/2012)*, lot 3881. NGC ID# 24N7, PCGS# 6515

- 4805 1909 MS65 PCGS.** A lovely album-toned Gem, showing brilliant, frosty interiors surrounded by vivid amber and ocean-blue peripheral rings of toning. The eagle's right (facing) talons are slightly soft, but the strike is sharp on the obverse. Population: 61 in 65, 15 finer (6/16). NGC ID# 24N8, PCGS# 6516

**1909 Half Dollar, MS66**  
**Remarkably Lustrous and Appealing**

**4806 1909 MS66 PCGS.** The 1909 is plentiful through MS65, but this Premium Gem example is a rarity. None are numerically finer at either service (7/16). The strike is bold, and the surfaces display exceptional luster. The fields have a hint of reflectivity. Each side is tinged champagne, although the reverse has a wide swath of olive toning along the left side. Population: 15 in 66 (4 in 66+), 0 finer (7/16). NGC ID# 24N8, PCGS# 6516

**1909 Barber Half, Richly Toned MS66**

**4807 1909 MS66 PCGS.** Lovely rose, hazel, and violet colors intermingle on the surfaces of this carefully preserved Premium Gem. Both sides are remarkably clean, and a loupe locates only a couple of microscopic handling marks. A conditionally rare and vividly toned specimen. Sharply struck throughout. Neither NGC nor PCGS has certified any pieces finer than the present example, and PCGS reports just 15 submissions at the MS66 level (6/16).  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 2308; Central States Signature (Heritage, 4-5/2009), lot 810.* NGC ID# 24N8, PCGS# 6516

**1910-S Half Dollar, MS67**  
**Exceedingly Rare This Fine**

**4808 1910-S MS67 NGC.** Here is a branch mint issue that is elusive in any Mint State grade, and the present coin is a Condition Census Superb Gem rarity. Satiny luster is mostly brilliant over the interiors, while the peripheries display concentric amber-gold and ocean-blue toning. The eagle's right (facing) talons and the clutched fletchings are weak, but the remainder of each side shows sharp definition. Census: 2 in 67, 1 finer (6/16). NGC ID# 24NC, PCGS# 6520

**1911-D Half, Lustrous MS66**  
**Lightly Toned**

**4809 1911-D MS66 PCGS.** It seems obvious to us today that a low-mintage issue such as the 1911-D half dollar would be set aside, but it was not so obvious in 1911. Few collectors existed at that time for this denomination of any design type, and after all, 50 cents represented a substantial amount of money for the average worker at that time. This piece was set aside, though, and has been carefully preserved in the 100+ years since. The surfaces are softly frosted and lightly toned with slightly deeper hues around the margins. The strike is stronger than normally seen and there are no mentionable abrasions. Population: 10 in 66 (1 in 66+), 3 finer (7/16). NGC ID# 24NE, PCGS# 6522

**1911-D Barber Half Dollar, MS66**  
**Only One Finer Coin at NGC**

**4810 1911-D MS66 NGC.** The 1911-D Barber half dollar claims a low mintage of 695,080 pieces and few high-quality examples were saved by contemporary collectors. This remarkable Premium Gem exhibits well-detailed design elements, with just a trace of the typical softness on the shield point and adjacent area on the wing. The well-preserved brilliant surfaces show a mix of vibrant satiny mint luster and prooflike reflectivity. Census: 6 in 66, 1 finer (7/16). NGC ID# 24NE, PCGS# 6522

**1912-D Barber Half Dollar, MS66**  
**Extremely Rare Any Finer**

**4811 1912-D MS66 PCGS. CAC.** The 1912-D Barber half dollar claims a substantial mintage of 2.3 million pieces, making it an available issue in most Mint State grades. The 1912-D is rare in MS66, however, and finer examples are virtually unobtainable. This well-detailed Premium Gem offers well-preserved surfaces with a few hints of golden-tan toning and vibrant satiny mint luster. Population: 17 in 66 (2 in 66+), 1 finer. CAC: 13 in 66, 0 finer (7/16). NGC ID# 24NH, PCGS# 6525

**4812 1913-D MS64 PCGS. CAC.** This attractive Choice specimen exhibits well-detailed design elements, with just a touch of the usual softness on the star centers. The lightly marked lustrous surfaces are blanketed in delicate shades of sea-green and lavender-gray toning. Population: 56 in 64 (1 in 64+), 16 finer (6/16). NGC ID# 24NL, PCGS# 6528

**4813 1913-S MS64 PCGS.** An important Barber half dollar issue from a modest mintage of 604,000 that is actually the highest production at any of the three Mints in 1913. This Choice Mint State representative has dappled gold toning on its frosty silver surfaces. Population: 27 in 64, 21 finer (6/16). NGC ID# 24NM, PCGS# 6529

**4814 1914-S MS64 PCGS.** Mottled yellow-gold toning blankets satiny mint luster on each side of this Choice 1914-S Barber half dollar. The central eagle is not fully defined, but the obverse is well-struck. There are no obtrusive abrasions. Finer examples are rare. Population: 39 in 64, 26 finer (7/16). NGC ID# 24NP, PCGS# 6531

#### 1915-D Half Dollar, MS65 Lustrous and CAC-Endorsed

**4815 1915-D MS65 PCGS. CAC.** This CAC-certified Gem shows remarkably bright, frosted mint luster. The lustrous finish is interrupted only by a few tiny specks of color over the mostly brilliant surfaces, rather than the abrasions one might expect. Slight softness is noted over the high points of the design, most notably Liberty's hair curls, the eagle's talons, and the junction of the right side of the shield and the eagle's right (facing) wing. NGC ID# 24NS, PCGS# 6533

#### 1915-D Barber Half, MS66 Superior Type Coin

**4816 1915-D MS66 PCGS. CAC.** The 1915-D has a relatively substantial mintage of 1.1 million pieces, and since it is positioned chronologically at the end of the series it is among the more available Barber halves. This is a remarkably lustrous example with mint frost more akin to an S-mint than the usual satiny finish seen on D-mints. Some central strike weakness is noted (and expected). The centers are much lighter in hue than the deep reddish-russet and blue margins on each side. Population: 22 in 66 (3 in 66+), 0 finer (6/16). NGC ID# 24NS, PCGS# 6533

### PROOF BARBER HALF DOLLARS

**4817 1894 PR64+ NGC.** Although lacking a designation, this near-Gem proof Barber half dollar is a borderline Cameo example with excellent field-to-device contrast. Both sides have lovely peripheral gold toning on otherwise brilliant silver surfaces. NGC ID# 24NW, PCGS# 6541

#### 1894 Half Dollar, Brilliant PR65

**4818 1894 PR65 NGC.** This fully struck Gem proof almost qualifies for a Cameo designation, showing modest field-motif contrast on each side. The devices are satiny white, and the mirrored fields have a few stray lines that determine the grade. Other than a hint of light golden peripheral toning, there is no discernible color. Census: 39 in 65 (1 in 65★), 48 finer (6/16). NGC ID# 24NW, PCGS# 6541

#### 1896 Half Dollar, Toned PR65

**4819 1896 PR65 NGC.** This Gem proof 1896 Barber half is deeply toned in olive-gold, amber-orange, sea-green, and russet-gray hues, with deeply mirrored fields and sharp motifs. A few stray hairlines are well-hidden by the rich patina. Finer examples are occasionally seen but harder to acquire for the budget-conscious collector. Census: 34 in 65, 46 finer (6/16). NGC ID# 24NY, PCGS# 6543

**4820 1898 PR63 Cameo NGC.** This boldly detailed Select Cameo proof exhibits subdued silver centers with lovely gold, violet, and blue toning along the borders. Microscopic hairlines prevent a higher grade. Census: 5 in 63 Cameo, 65 finer (6/16). NGC ID# 24P2, PCGS# 86545

#### 1900 Barber Half, PR65 Cameo Sharply Contrasted

**4821 1900 PR65 Cameo PCGS.** The strike is complete throughout on this attractive, sharply contrasted Barber half dollar. The surfaces are largely untoned, save for a slight tinge of rose. A few needle-thin scrapes on Liberty prevent an even higher grade. An eye-appealing example of this popular turn-of-the-century date. Population: 23 in 65 (2 in 65+) Cameo, 29 finer (6/16). NGC ID# 24P4, PCGS# 86547

**1904 Half Dollar, PR67  
Original Toning**

- 4822 1904 PR67 NGC.** Cobalt-blue and violet borders surround amber-gold interiors on this Superb Gem 1904 proof Barber half dollar. The design elements are fully struck and satiny. A Cameo designation might have been achieved were it not for the rich patina. Superb Gem examples are genuinely rare for the 1904 proof. Census: 14 in 67, 3 finer (6/16). NGC ID# 24P8, PCGS# 6551

**1905 Half Dollar, PR66  
Perceptible Field-Motif Contrast**

- 4823 1905 PR66 PCGS. CAC.** A fully struck, mostly untoned Premium Gem proof, showing traces of champagne color on each side. The mirrored fields contrast modestly with satiny design elements, particularly on the reverse. With no Cameos certified at NGC, the subtle contrast of the present coin is highly significant. Population: 28 in 66 (1 in 66+), 16 finer. CAC: 10 in 66, 10 finer (7/16). NGC ID# 24P9, PCGS# 6552

**1906 Half Dollar, PR67 Cameo  
Virtually Flawless**

- 4824 1906 PR67 Cameo NGC.** The proof 1906 Barber half is not particularly elusive overall, but examples worthy of a Cameo designation are decidedly rare; this coin is tied with two others as the finest of just 12 Cameos certified by NGC (6/16). The seemingly flawless surfaces show full mirroring in the fields, while the devices display pleasing, satiny luster. A faint golden hue is seen around the peripheries, though the coin appears at first glance to be brilliant. NGC ID# 24PA, PCGS# 86553

**1909 Barber Half Dollar, PR67 Cameo  
Only 650 Examples Struck**

- 4825 1909 PR67 Cameo PCGS. CAC.** Only 650 proof Barber half dollars were struck in 1909 and few survivors can match the technical quality and eye appeal of the present coin. This delightful Superb Gem exhibits sharply detailed design elements and deeply mirrored fields that contrast dramatically with the frosty devices. The impeccably preserved surfaces show highlights of sea-green and lavender-gray toning. Population: 9 in 67 Cameo, 3 finer. CAC: 4 in 67, 3 finer (6/16). NGC ID# 24PD, PCGS# 86556

**1912 Barber Half Dollar, PR67  
Condition Census Example, Ex: Gardner**

- 4826 1912 PR67 PCGS.** Both sides of this visually impressive Superb Gem are impeccably preserved and veiled in mottled iridescent toning. The patina is just light enough to allow the underlying flashy mirrors to forcefully shine through. This Condition Census proof is among the best-preserved examples from a nominal mintage of 700 specimens. PCGS rates the 1912 as one of the most challenging issues in Gem condition or better, along with the significantly lower-mintage 1915. Population: 9 in 67 (1 in 67+), 2 finer (6/16). Ex: *New York Signature* (Heritage, 11/2003), lot 6841; *Long Beach Signature* (Heritage, 9/2004), lot 6743; Bill Nagle; purchased by Gene Gardner (9/2004); Gardner Collection, Part IV (Heritage, 10/2015), lot 98770. NGC ID# 24PG, PCGS# 6559

**1915 Half Dollar, PR66  
Final Barber Half**

- 4827 1915 PR66 PCGS. CAC.** Only 450 proof Barber half dollars were minted in 1915, the last year of the design. Coins in Premium Gem condition are rare today and few can match the appeal of the coin offered here. Both sides display an intricate mingling of lavender and golden-brown hues at the peripheries, with brilliant white dominating the central devices. An exquisite strike adds to the fantastic eye appeal. Population: 18 in 66, 11 finer. CAC: 5 in 66, 14 finer (6/16). NGC ID# 24PK, PCGS# 6562

## WALKING LIBERTY HALF DOLLARS

- 4828 1916 MS65 NGC.** This attractive first-year Gem exhibits well-detailed design elements, with clear separation between Liberty's thumb and fingers. The brilliant surfaces are well-preserved and both sides radiate vibrant mint luster. Eye appeal is terrific.  
*From The Good Karma Collection.* NGC ID# 24PL, PCGS# 6566

### 1916 Walking Liberty Half, MS66 First Year of Issue for This Popular Series

- 4829 1916 MS66 PCGS. CAC.** Only 608,000 pieces were struck of this first-year issue, and many were set aside as mementoes. While numerous examples are known in MS66, few are finer. This piece is distinguished by its glowing mint luster, which is abundantly evident beneath the light layer of pale golden and lilac toning. Exceptionally well struck for an early Walker with no mentionable abrasions.  
*From The Ray Levoi Collection, Part II.* NGC ID# 24PL, PCGS# 6566
- 4830 1916-D MS64 PCGS.** Intensely variegated gold, blue, and ivory toning resides on both sides of this lustrous Choice Mint State first-year Walking Liberty half dollar that is celebrating its 100th anniversary this year. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

### 1916-D Half Dollar, MS65

- 4831 1916-D MS65 PCGS. CAC.** A satiny Gem example of this first-year San Francisco issue, showing mostly champagne toning except for a blush of lavender-gold along the upper obverse and lower reverse borders. The 1916-S Walker is usually available in this grade, but finer pieces are scarce.  
*From The Ray Levoi Collection, Part II.* NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

### 1916-D Walking Liberty Half Dollar, MS65 Popular First-Year Issue

- 4832 1916-D MS65 PCGS. CAC.** Despite a smallish mintage of just over 1 million pieces, the 1916-D Walking Liberty half dollar is not too difficult to locate in Mint State grades. It seems contemporary collectors saved a large number of high-quality specimens for their novelty value, since it was the first year of the design. This delightful Gem is sharply detailed for an early series issue, with vibrant mint luster and well-preserved, brilliant surfaces.  
*From The Good Karma Collection.* NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

### 1916-D Walking Liberty Half, MS66 High-Grade Example

- 4833 1916-D MS66 PCGS.** With a reported mintage of just over 1 million pieces, the 1916-D Walking Liberty half dollar is surprisingly available in high grade, making it a favorite choice of first-year branch mint type collectors. This impressive Premium Gem exhibits well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces are blanketed in attractive shades of champagne-gold toning. Population: 66 in 66 (1 in 66+), 3 finer (7/16). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567
- 4834 1916-S MS61 NGC.** Deep lavender, rose, and lilac hues combine over each side of this Mint State 1916-S Walker. The coin is well-struck and satiny. Grade-limiting abrasions are trivial and hidden by the rich patina. NGC ID# 24PN, PCGS# 6568

---

1916-S Walking Liberty Half Dollar, MS64

**4835 1916-S MS64 PCGS. CAC.** The 1916-S Walking Liberty half dollar is a low-mintage issue from the first date of the design. Attractive Choice specimens, like the present coin, are prized by mintmark type collectors and series specialists alike. This well-detailed example exhibits satiny mint luster under light lavender and gold patina.

*From The Good Karma Collection.* NGC ID# 24PN, PCGS# 6568

---

**4836 1917 MS65+ PCGS. CAC.** This CAC-endorsed, Plus-graded Gem 1917 Walker is fully struck and boasts luminous champagne luster with hints of russet and olive toning. There is a thick, frosty "skin" over each side, perfect for the collector who is pursuing that blatantly original look. NGC ID# 24PP, PCGS# 6569

**4837 1917 MS66 PCGS.** Light honey-gold toning visits this lustrous and essentially immaculate Superb Gem. The strike is precise and the eye appeal is exceptional. Housed in a green label holder. Population: 98 in 66 (1 in 66+), 3 finer (6/16).

*From The Good Karma Collection.* NGC ID# 24PP, PCGS# 6569

---

1917-D Half Dollar, Satiny MS64+  
High-End Obverse Mintmark Example

**4838 1917-D Obverse MS64+ NGC.** The Denver Mint struck 765,400 Walking Liberty half dollars in 1917 with the Obverse Mintmark before moving it to the reverse. The variety is widely pursued across all grade levels by beginners and advanced specialists alike. This near-Gem has faint golden-gray patina over mostly brilliant surfaces with satiny luster. Typically struck and unquestionably well-preserved for the grade. NGC ID# 24PR, PCGS# 6570

---

1917-D Walking Liberty Half, MS65  
Obverse Mintmark

**4839 1917-D Obverse MS65 NGC.** In Gem condition, the 1917-D Obverse Mintmark half dollar is slightly more plentiful than its Reverse Mintmark counterpart, but both issues are scarce at this level. The Obverse Mintmark example is boldly struck, with satiny luster and light golden toning. A few small, scattered ticks preclude a finer grade. Census: 54 in 65, 5 finer (6/16). NGC ID# 24PR, PCGS# 6570

---

1917-D Walking Liberty Half Dollar, MS65  
Low-Mintage Obverse Mintmark Variant

**4840 1917-D Obverse MS65 PCGS.** From a low mintage of 765,400 pieces, this issue is always popular with type collectors because of the prominent obverse mintmark. The present coin is an impressive Gem, with well-detailed design elements and well-preserved lustrous surfaces, under shades of golden-tan and lavender-gray toning. Population: 81 in 65 (4 in 65+), 5 finer (7/16).

*From The Good Karma Collection.* NGC ID# 24PR, PCGS# 6570

---

1917-D Obverse Mintmark Half, MS65  
Scarcer of the Two Mintmark Varieties

**4841 1917-D Obverse MS65 PCGS. CAC.** Among 1917-D half dollars, those with the mintmark on the obverse are in the minority, struck before the mintmark was moved to a less conspicuous spot at the lower left reverse. The present Gem is immensely lustrous with slightly above-average central detail and smooth, subtly gold-kissed silver-white surfaces.

*Ex: Central States Signature (Heritage, 4-5/2009), lot 2830.*

*From The Ray Levoi Collection, Part II.* NGC ID# 24PR, PCGS# 6570

**1917-D Walking Liberty Half Dollar, MS64  
Underrated Reverse Mintmark Variant**

- 4842 1917-D Reverse MS64 PCGS.** The 1917-D Walking Liberty half dollar with the mintmark on the reverse is an underrated issue, especially in high grade. This attractive MS64 specimen exhibits well-detailed design elements and well-preserved, lustrous surfaces under low-intensity shades of champagne-gold toning. PCGS has graded 54 numerically finer examples (7/16). NGC ID# 24PS, PCGS# 6571

**1917-D Half Dollar, MS64  
Reverse Mintmark**

- 4843 1917-D Reverse MS64 PCGS. CAC.** This pleasing near-Gem 1917-D Reverse Mintmark half dollar has subdued ivory brilliance with full mint luster and delicate champagne toning. A few dark toning spots are visible on the reverse. Although a trifle weak at the center as expected, Liberty's thumb is outlined and most of the skirt lines are evident. CAC Green: 20 in 64, 9 finer (6/16). NGC ID# 24PS, PCGS# 6571

**1917-D Reverse Mintmark Half, MS65  
Thick Mint Luster**

- 4844 1917-D Reverse MS65 NGC.** Mintages seldom tell the whole story of a date's rarity, and the difference between the Obverse Mintmark and Reverse Mintmark 1917-D Walking Liberty halves is a case in point. The Reverse Mintmark has a mintage approaching 2 million pieces, while the Obverse Mintmark type just tops three-quarters of a million coins. Unsurprisingly, the Reverse Mintmark is more common in low circulated grades, but by the XF level, the Reverse Mintmark is costlier, and at the Gem level it is a condition rarity. While this example is a trifle soft on Liberty's head, the branch hand is better-defined than usually seen, and subtly textured silver surfaces are minimally marked with a hint of antique-gold color. Ex: *Houston Signature* (Heritage, 12/2010), lot 3726. From *The Good Karma Collection*. NGC ID# 24PS, PCGS# 6571

**1917-S Half Dollar, MS63  
Obverse Mintmark**

- 4845 1917-S Obverse MS63 PCGS.** The earlier Obverse Mintmark variant, this example with satiny luster and light golden toning. The strike is boldly executed, and the eye appeal is pleasing. A few short, hidden scratches behind Liberty's head and a handful of ticks on the eagle's lower wing feathers contribute to the grade. NGC ID# 26G7, PCGS# 6572

**1917-S Walking Liberty Half Dollar, MS63  
Prominent Obverse Mintmark**

- 4846 1917-S Obverse MS63 PCGS.** The 1917-S Walking Liberty half dollar with the prominent obverse mintmark claims a mintage of just 952,000 pieces. The mintmark was moved to the reverse later in the year. This attractive Select specimen offers sharply detailed design elements and well-preserved, lustrous surfaces, with a few accents of greenish-gold toning. From *The Good Karma Collection*. NGC ID# 26G7, PCGS# 6572

**1917-S Walking Liberty Half, MS64  
First San Francisco Reverse Mintmark Issue**

- 4847 1917-S Reverse MS64 PCGS. CAC.** The first S-mint half dollar of the second Reverse Mintmark subtype, the 1917-S Reverse coins were produced to the extent of more than 5.5 million coins. They are nonetheless elusive at the Gem level. This near-Gem boasts splendid luster over grayish-gold surfaces, with tinges of olive and ice-blue. Abrasions are minimal on this high-end near-Gem. PCGS has graded 61 numerically finer examples (6/16). From *The Good Karma Collection*. NGC ID# 24PU, PCGS# 6573

- 4848 1918 MS64 NGC.** This impressive early series Walking Liberty half dollar exhibits sharply detailed design elements, with clear separation between Liberty's thumb and finger on the wreath hand. Shades of champagne-gold and lavender toning enhance the lightly marked, lustrous surfaces. From *The Good Karma Collection*. NGC ID# 24PV, PCGS# 6574

---

**1918-D Walking Liberty Half Dollar, MS63**  
**Lightly Toned and Lustrous**

- 4849** 1918-D MS63 PCGS. Despite a generous mintage of 3.8 million pieces, the 1918-D Walking Liberty half dollar is seldom seen in high grade. This attractive Select example exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's head, and well-preserved lustrous surfaces that show a few highlights of pale gold toning.  
*From The Good Karma Collection.* NGC ID# 24PW, PCGS# 6575

---

**1918-D Walking Liberty Half Dollar, MS64**  
**Rare Issue in Finer Grades**

- 4850** 1918-D MS64 PCGS. The 1918-D Walking Liberty half dollar claims a substantial mintage of 3.8 million pieces, but striking problems and excessive surface marks limit the grade of most examples seen. The 1918-D is the third-rarest Walking Liberty half in grades above MS64. This attractive Choice specimen offers well-detailed design elements, with vibrant mint luster and well-preserved surfaces, under shades of champagne-gold and lavender toning. PCGS has graded 31 numerically finer examples (7/16). NGC ID# 24PW, PCGS# 6575

- 4851** 1918-S MS64 PCGS. This attractive Choice representative exhibits well-detailed design elements, with a touch of the usual softness on the central devices. The lightly marked, lustrous surfaces are visited by subtle shades of champagne-gold toning. PCGS has graded 36 numerically finer examples (6/16).  
*From The Good Karma Collection.* NGC ID# 24PX, PCGS# 6576

- 4852** 1918-S MS64 PCGS. CAC. Satiny mint luster illuminates warm golden toning on this CAC-approved near-Gem 1918-S half dollar. Liberty's branch hand is slightly soft, as is the eagle's trailing leg, but the overall eye appeal is excellent for the grade. A few trivial ticks do not detract. PCGS has seen 36 numerically finer representatives (7/16). NGC ID# 24PX, PCGS# 6576

---

**1918-S Half Dollar, MS64+**  
**Infrequently Seen Finer**

- 4853** 1918-S MS64+ PCGS. CAC. Wisps of lavender and champagne toning grace each side of this luminous, satiny 1918-S Walker, accenting Plus-graded, near-Gem surfaces. The strike is predictably weak on Liberty's head and branch hand, as well as on the central eagle, but the eye appeal is hardly hindered. PCGS has seen only 36 finer submissions (6/16).  
*From The Ray Levoi Collection, Part II.* NGC ID# 24PX, PCGS# 6576

---

**1919 Walking Liberty Half Dollar, MS64**  
**Low-Mintage Philadelphia Issue**

- 4854** 1919 MS64 PCGS. This is an appealing near-Gem example of this low-mintage P-mint Walker, the second-rarest in the series behind the 1921-P. This is a silvery piece with gently frosted surfaces that show little discernible color otherwise. We note a single dark spot on Liberty's gown. The strike is well-executed overall, a feature not uncommon to the issue. PCGS has graded 80 numerically finer examples (6/16).  
*From The Good Karma Collection.* NGC ID# 24PY, PCGS# 6577

---

**1919-D Walking Liberty Half, AU58**  
**Seldom Seen in High Grade**

- 4855** 1919-D AU58 NGC. CAC. The 1919-D Walking Liberty half dollar was not a well-made issue and few high-quality examples were saved by contemporary collectors. As a result, the 1919-D is seldom found in high grade today. This attractive near-Mint example shows just a trace of wear on the well-detailed design elements, and the brilliant surfaces are remarkably free of mentionable abrasions. Vibrant mint luster adds to the outstanding eye appeal.  
*From The Good Karma Collection.* NGC ID# 24PZ, PCGS# 6578

**1919-S Walking Liberty Half Dollar, AU58  
Seldom Encountered in High Grade**

- 4856 1919-S AU58 NGC.** The 1919-S Walking Liberty half dollar claims a smallish mintage of 1.5 million pieces and most of the coins circulated heavily at the time of issue. As a result, the 1919-S is one of the most challenging issues of the series in high grade. This lightly abraded near-Mint specimen shows just a trace of high-point wear and retains significant amounts of original mint luster.  
*From The Good Karma Collection.* NGC ID# 24R2, PCGS# 6579

**1919-S Half Dollar, MS62  
Better Date in Uncirculated Condition**

- 4857 1919-S MS62 NGC.** Deep, mottled olive-gold and amber-orange toning appears over much of the obverse of this Uncirculated 1919-S Walking Liberty half dollar, while the reverse is more lightly toned in champagne hues. The central high points of Liberty's figure and the eagle show expected strike weakness. Abrasions are minimal for the grade. NGC ID# 24R2, PCGS# 6579

**1920 Half Dollar, MS65  
Unsung Condition Rarity**

- 4858 1920 MS65 PCGS. CAC.** The 1920 Walking Liberty half dollar is not recognized as a rare date, but it is elusive in MS65 or finer grades. PCGS has certified just 100 in MS65, and only 33 finer. CAC has only approved 13 in MS65 and just four finer (6/16). This lovely Gem exhibits delicate champagne toning with splashes of rich gold peripheral toning. The strike is above average for the issue. NGC ID# 24R3, PCGS# 6580

**1920 Walking Liberty Half Dollar, MS65  
Underrated Early Issue**

- 4859 1920 MS65 PCGS. CAC.** This is one of the surprising dates in the early Walker series. The mintage exceeded 6 million coins, yet only 0.00002% of the mintage has been certified as Gem or finer quality by PCGS. This particular Gem has light gold and iridescent toning over satiny luster on the obverse, with extremely heavy russet toning over the entire reverse. Although the central details are a trifle weak, the overall quality is exceptional.  
*Ex: Central States Signature (Heritage, 5/2007), lot 2985.*  
*From The Ray Levoi Collection, Part II.* NGC ID# 24R3, PCGS# 6580

**1920-S Half Dollar, MS63  
Very Scarce Early Walker**

- 4860 1920-S MS63 PCGS.** The 1920-S is one of the legion of U.S. coins where the mintage indicates little or nothing about the scarcity of the issue. There were 4.6 million half dollars struck in San Francisco in this year. Yet, the 1920-S ranks in the top 10 of overall rarity in mint condition. As always, the surfaces are nicely frosted and the strike is somewhat shallow in the centers. Each side has an even layer of yellow-gold patina with strong underlying brilliance. There are few abrasions that account for the grade — making this a coin that could be worth close examination. NGC ID# 24R5, PCGS# 6582

**1920-S Walking Liberty Half, MS64  
Challenging Branch Mint Issue**

- 4861 1920-S MS64 NGC.** The 1920-S Walking Liberty half dollar is a better date in the series, despite the substantial mintage of 4.6 million pieces. This attractive Choice example displays well-detailed design elements and well-preserved surfaces, with vibrant mint luster on both sides. Attractive hints of greenish-gold and turquoise toning add to the outstanding eye appeal. NGC has graded 52 numerically finer examples (6/16).  
*From The Good Karma Collection.* NGC ID# 24R5, PCGS# 6582

**1921 Walking Liberty Half, AU58  
Low-Mintage Key**

- 4862 1921 AU58 PCGS. CAC.** The 1921 Walking Liberty half dollar boasts the second-lowest mintage of the series, at 246,000 pieces. This attractive near-Mint example shows just the slightest wear on the high points of the well-detailed design elements and the lightly abraded surfaces retain much of their original mint luster. A few hints of champagne-gold toning add to the strong eye appeal. *From The Good Karma Collection.* NGC ID# 24R6, PCGS# 6583

- 4863 1921-D XF45 NGC.** Light grayish patina covers both sides of this Choice XF low-mintage, key-date representative. Remarkably clean surfaces retain excellent detail on the devices. One will be hard pressed to locate a finer example for a high-grade circulated Walking Liberty half collection. *From The Good Karma Collection.* NGC ID# 24R7, PCGS# 6584

**1921-S Half Dollar, XF40  
Elusive in This Grade**

- 4864 1921-S XF40 NGC.** Higher-grade circulated examples of this key San Francisco issue are difficult to acquire, particularly with original coloration. This XF example will please even the most astute collector. Both sides show uniform lavender-gray patina with light highlights seen over the relief elements. Wear is minimal, with the remnants of a sharp strike are evident on the devices. NGC ID# 24R8, PCGS# 6585

**1921-S Walking Liberty Half Dollar, XF40**

- 4865 1921-S XF40 NGC.** The 1921-S Walking Liberty half dollar is even more difficult to locate in high grade than its small mintage of 548,000 pieces would suggest. This pleasing XF specimen shows some light wear on the design elements, but the skirt lines are still bold. The lightly abraded surfaces are blanketed in shades of lavender-gray and golden-tan toning. *From The Good Karma Collection.* NGC ID# 24R8, PCGS# 6585

- 4866 1923-S AU58 PCGS. CAC.** Elements of satiny luster glimmer in the protected regions of the fields on this fully original near-Mint 1923-S half dollar. The strike is well-executed, and trivial high-point friction determines the grade. Light golden toning appears over each side. This CAC-endorsed coin possesses far more eye appeal than is expected for the grade. NGC ID# 24R9, PCGS# 6586

**1923-S Walker, MS63  
Original Patina**

- 4867 1923-S MS63 PCGS.** The 1923-S was the only Walking Liberty half dollar struck between 1921 and 1927, making an example of this conditionally elusive issue essential for a complete date set. The present Select representative displays a bold strike and original satin luster with champagne toning. Scattered light grazes determine the grade. NGC ID# 24R9, PCGS# 6586

**1923-S Walking Liberty Half, MS63**

- 4868 1923-S MS63 PCGS.** The 1923-S Walking Liberty half dollar is much more difficult to locate in high grade than its mintage of 2.1 million pieces would suggest. Weak strikes and excessive surface marks are the norm for this issue. This impressive Select specimen shows a better-than-average strike, with just a touch of the usual softness on the wreath hand and eagle's leg. The lightly marked surfaces radiate satiny mint luster, under highlights of greenish-gold and lavender-gray toning. *From The Good Karma Collection.* NGC ID# 24R9, PCGS# 6586

**1927-S Walking Liberty Half, MS65  
Very Rare in Finer Grades**

- 4869 1927-S MS65 PCGS.** The 1927-S Walking Liberty half dollar was not a well-produced issue, and most examples seen are softly struck on the central design elements. In addition, the issue is known for excessive surface marks, even on lower Mint State pieces. This attractive Gem is well-detailed, with just a trace of the usual softness on the wreath hand and eagle's leg. The surfaces are well-preserved and lustrous, under delicate shades of pale gold toning. Population: 87 in 65 (6 in 65+), 8 finer (6/16).  
*From The Good Karma Collection.* NGC ID# 24RA, PCGS# 6587

**1928-S Half, Colorful MS64**

- 4870 1928-S MS64 NGC.** This lustrous near-Gem's most promising attribute is its patina, swirling peach-gold and blue-green with glints of original silver. The striking softness seen in the centers is typical for the issue, though the reverse shows a better impression than the norm. NGC has graded just 43 numerically finer pieces (6/16).  
*Ex: Baltimore Signature (Heritage, 3/2009), lot 2216.*  
*From The Good Karma Collection.* NGC ID# 24RB, PCGS# 6588

**1928-S Half Dollar, MS64  
Stronger Strike Than Usual**

- 4871 1928-S MS64 PCGS.** The 1928-S has a lower mintage than the 1927-S, but it is slightly more available in high grades. Which makes one wonder: Why did people set aside and preserve more 1928-S than 1927-S half dollars? This piece shows the typically seen bright, frosted mint luster usually seen on this issue. The all-important strike details are much stronger on this piece than usually seen. Each side is mostly brilliant with a marginal accent of deep golden-russet patina. NGC ID# 24RB, PCGS# 6588

**1928-S Walking Liberty Half, MS65  
Better Date Branch Mint Issue**

- 4872 1928-S MS65 PCGS. CAC.** The San Francisco Mint was the only facility to coin Walking Liberty halves between 1922 and 1928. Because of heavy silver dollar production, the 1923-S, 1927-S, and 1928-S were the only issues from that seven-year span, despite a booming economy. All three issues had low mintages, but the 1928-S was the only date with a mintage of less than 2 million pieces. Gems are understandably rare. Lustrous and lightly toned with unabraded fields and a suitable strike. Population: 58 in 65 (1 in 65+), 7 finer. CAC: 17 in 65, 2 finer (6/16).  
*From The Ray Levoi Collection, Part II.* NGC ID# 24RB, PCGS# 6588

**1929-D Walking Liberty Half, MS65  
Nice Branch Mint Type Coin**

- 4873 1929-D MS65 NGC. CAC.** The 1929-D Walking Liberty half dollar experienced limited circulation because of the reduced demand for coinage during the Depression years. As a result, the 1929-D is one of the more available issues of the series in high grade. This impressive Gem offers well-detailed design elements and well-preserved, lustrous surfaces with subtle highlights of champagne-gold toning.  
*From The Good Karma Collection.* NGC ID# 24RC, PCGS# 6589

**1929-D Half Dollar, MS66  
Only One Coin Certified Finer**

- 4874 1929-D MS66 PCGS.** The 1929-D is the only Denver issue from the period between 1922 and 1933. Premium Gem examples are scarce, and only a single coin is known finer. This representative displays frosty original luster with hints of ice-blue and champagne toning. Liberty's branch hand is slightly soft, but the strike is otherwise well-executed. Population: 66 in 66 (2 in 66+), 1 finer (6/16).  
*From The Ray Levoi Collection, Part II.* NGC ID# 24RC, PCGS# 6589

**4875 1929-S MS64 PCGS.** Faintly iridescent champagne toning warms each side of this lustrous 1929-S Walking Liberty half dollar. The strike is bold, and the satiny surfaces are devoid of bothersome abrasions. Eye appeal surpasses expectations for the grade. NGC ID# 24RD, PCGS# 6590

**4876 1929-S MS64 PCGS.** Traces of champagne and other pastel colors appear throughout the satiny surfaces of this Choice 1929-S Walking Liberty half dollar. The design elements are moderately well defined, although noticeable weakness appears on Liberty's head and the eagle's trailing leg. NGC ID# 24RD, PCGS# 6590

**4877 1929-S MS65 NGC.** Whispers of reddish patina cling to the margins of this Gem. Typically struck, in that incompleteness of detail is apparent in the central areas. Still, some separation is noted on the branch hand. The lustrous surfaces have been generally well cared for. Difficult to locate any finer than Gem.  
*From The Good Karma Collection.* NGC ID# 24RD, PCGS# 6590

#### 1929-S Half Dollar, MS65 Luminous Mint Luster

**4878 1929-S MS65 PCGS. CAC.** This CAC-approved Gem 1929-S Walking Liberty half dollar is quite appealing for the grade, showing clean fields and glistening mint luster. A hint of champagne color graces each side. The strike is a trifle soft on the central figure and eagle, but there are no significant abrasions. Some faint die polishing lines in the right obverse fields should not be confused with hairline scratches, of which there are none seen. Finer examples are infrequently offered.  
*From The Ray Levoi Collection, Part II.* NGC ID# 24RD, PCGS# 6590

#### 1929-S Half Dollar, MS66 Better Date in High Grade

**4879 1929-S MS66 PCGS.** Lower-grade examples of the 1929-S Walker are readily available, but Premium Gems are scarce. This piece displays well-struck design elements and satiny, brilliant mint luster. A few tiny ticks are not out of line for the grade. Finer examples are extremely rare. Population: 51 in 66 (1 in 66+), 1 finer (7/16). NGC ID# 24RD, PCGS# 6590

#### 1933-S Walking Liberty Half, MS66 Conditionally Rare in Finer Grades

**4880 1933-S MS66 PCGS.** With a reported mintage of just over 1.7 million pieces, the 1933-S Walking Liberty half dollar is very scarce in MS66 condition and very rare in finer grades. This spectacular Premium Gem offers sharply detailed design elements and well-preserved lustrous surfaces, under pleasing shades of champagne-gold toning. PCGS has graded 14 numerically finer examples (6/16).  
*From The Good Karma Collection.* NGC ID# 24RE, PCGS# 6591

#### 1933-S Walking Liberty Half Dollar, MS66+ Conditionally Very Rare Any Finer

**4881 1933-S MS66+ PCGS. CAC.** With a reported mintage of nearly 1.8 million pieces, the 1933-S Walking Liberty half dollar is not too difficult to locate in most Mint State grades, but the issue is a condition rarity in grades above MS66. This delightful Plus-graded Premium Gem is sharply detailed throughout and the impeccably preserved surfaces radiate vibrant mint luster, under attractive shades of champagne-gold and violet toning. PCGS has graded 14 numerically finer examples (7/16).  
*From The Ray Levoi Collection, Part II.* NGC ID# 24RE, PCGS# 6591

**4882 1934 MS67 PCGS. CAC.** Magnificent canary-gold and jade-green patina consumes this lustrous and minimally abraded Superb Gem. Precisely struck and desirable. PCGS has graded just eight numerically finer examples (6/16).  
*From The Ray Levoi Collection, Part II.* NGC ID# 24RF, PCGS# 6592

**4883 1934-D MS66 PCGS.** This spectacular Premium Gem is sharply detailed throughout, with fine definition on the usual trouble spots like the wreath hand and eagle's leg. The well-preserved surfaces radiate vibrant mint luster, with a few highlights of golden-brown toning. PCGS has graded four numerically finer examples (6/16).  
*From The Good Karma Collection.* NGC ID# 24RG, PCGS# 6593

**4884 1934-D MS66 PCGS.** Small D. A wheat-gold and stone-gray Premium Gem. The lustrous surfaces show only incidental contact. The strike is good save for moderate blending on Liberty's head. This Great Depression issue is a great rarity any finer. NGC ID# 24RG, PCGS# 6593

**4885 1934-D MS66 PCGS. CAC.** Small D. Brilliant aside from a hint of tan-gold toning. Potent luster swirls about this sharply struck and impressively preserved Premium Gem. The lowest mintage issue within the PDS trio for the date. CAC: 32 in 66, 1 finer (6/16).  
*From The Ray Levoi Collection, Part II.* NGC ID# 24RG, PCGS# 6593

**1934-S Walking Liberty Half, MS65  
Underrated Middle-Series Issue**

- 4886 1934-S MS65 NGC.** The 1934-S is a better date from the middle of the Walking Liberty half dollar series, especially in high grade. This impressive Gem exhibits unusually sharp definition on all design elements and the well-preserved, brilliant surfaces radiate vibrant mint luster from both sides. Overall eye appeal is outstanding.  
*From The Good Karma Collection.* NGC ID# 24RH, PCGS# 6594

**1934-S Walker, Frosty MS66  
Choice Luster and Eye Appeal**

- 4887 1934-S MS66 PCGS. CAC.** The 1934-S is infrequently seen in Premium Gem condition, and finer pieces are genuinely rare. This CAC-approved MS66 coin displays original, frosty mint luster with a hint of icy-blue iridescence. The fields and devices are devoid of mentionable abrasions, and even a slight rotation beneath a light delivers a shimmering cartwheel effect. PCGS has seen only eight Superb Gems finer (6/16).  
*From The Ray Levoi Collection, Part II.* NGC ID# 24RH, PCGS# 6594

**1935 Half Dollar, MS67**

- 4888 1935 MS67 NGC.** A spectacular Superb Gem Walking Liberty half dollar, with well-detailed design elements and lustrous brilliant surfaces that show no mentionable flaws. Customary for the series, the branch hand shows incompleteness, and the high points of Liberty retain traces of the planchet surface. Census: 40 in 67 (8 in 67+, 1 in 67★), 1 finer (6/16). NGC ID# 24RJ, PCGS# 6595

**1935 Walker, MS67  
Superior Type Coin**

- 4889 1935 MS67 NGC.** This Superb Walker shows solid detail for the grade with full separation on Liberty's branch-hand thumb. Pale gold-edged margins shift through silver-blue on their way to metallic near-white. Outstanding type coin. Census: 40 in 67 (8 in 67+, 1 in 67★), 1 finer (6/16).  
*Ex: Long Beach Signature (Heritage, 5-6/2012), lot 4098.*  
*From The Good Karma Collection.* NGC ID# 24RJ, PCGS# 6595

**1935 Walking Liberty Half, MS67  
Extremely Rare in Finer Grades**

- 4890 1935 MS67 PCGS. CAC.** The 1935 Walking Liberty half dollar is a perennial favorite with type collectors because of its availability in high grade. The 1935 is still very scarce at the MS67 grade level, however, and finer coins are virtually unobtainable. This spectacular Superb Gem is sharply detailed in most areas, with just a trace of the usual softness on the wreath hand. The impeccably preserved surfaces radiate vibrant mint luster, with subtle hints of greenish-gold toning. Population: 52 in 67 (4 in 67+), 1 finer (7/16).  
*From The Ray Levoi Collection, Part II.* NGC ID# 24RJ, PCGS# 6595

- 4891 1935-D MS65 PCGS.** A bright, brilliant Gem 1935-D Walking Liberty half dollar, showing clean fields and well-defined motifs. A few trivial grazes on the high points of the devices are all that limit the grade. This issue is available in MS65 but seldom seen finer.  
*From The Ray Levoi Collection, Part II.* NGC ID# 24RK, PCGS# 6596

- 4892 1935-D MS65 PCGS.** A well-preserved, frosty Gem example, showing a blush of light golden toning over each side. Liberty's figure shows some minor weakness, as usual. A few tiny ticks limit the grade. The 1935-S Walking Liberty half dollar is infrequently seen finer. NGC ID# 24RK, PCGS# 6596

- 4893 1935-D MS65+ PCGS.** Frosty and original with champagne toning that deepens to gold around the peripheries. The strike is slightly soft on Liberty's head and branch hand, as usual. Finer examples of the 1935-D half dollar are scarce and may be out of reach for the average collector. NGC ID# 24RK, PCGS# 6596

- 4894 1935-D MS66 PCGS Secure.** This impressive Premium Gem displays well-detailed design elements and flawless, lustrous surfaces, with highlights of golden-tan and lavender-gray toning. PCGS has graded no coins in higher numeric grades (6/16).  
*From The Good Karma Collection.* NGC ID# 24RK, PCGS# 6596

**4895 1935-S MS65 PCGS.** Sharply detailed in most areas, this attractive Gem shows just a touch of the usual softness on the wreath hand. The well-preserved surfaces radiate satiny mint luster, under delicate shades of golden-tan toning.

**From The Good Karma Collection.** NGC ID# 24RL, PCGS# 6597

**4896 1935-S MS65 PCGS.** A sharp, satiny Gem with warm golden toning over each side. The preservation is outstanding. The 1935-S is an available date that is known for eye appeal, but examples are infrequently seen finer than the present MS65 coin. NGC ID# 24RL, PCGS# 6597

**4897 1935-S MS65 PCGS. CAC.** Scattered traces of russet and olive toning appear around the borders on this Gem 1935-S half dollar, accenting otherwise ice-blue mint luster. Liberty's branch hand and the eagle's trailing leg are soft, as is typical, but the eye appeal remains strong. This San Francisco issue is usually available in this grade, but finer representatives present a challenge for the budget-conscious collector.

**From The Ray Levoi Collection, Part II.** NGC ID# 24RL, PCGS# 6597

**4898 1935-S MS66 PCGS.** 30th Anniversary Green Label Holder. Light golden-brown borders cede to cream-gray fields and motifs. The lustrous surfaces show only wispy contact. Liberty's head is sharp, though the branch hand and central skirt lines are incomplete. NGC ID# 24RL, PCGS# 6597

**4899 1936 MS67 PCGS. CAC.** Fully brilliant and fully struck with frosty silver luster. A lovely example that will even please the most fastidious collector. PCGS has seen only two numerically finer representatives. CAC: 78 in 67, 1 finer (6/16).

*Ex: ANA Signature (Heritage, 7/2005), lot 10034; Long Beach Signature (Heritage, 6/2006), lot 1829.*

**From The Ray Levoi Collection, Part II.** NGC ID# 24RM, PCGS# 6598 Base PCGS# 6598

**4900 1936 MS67+ PCGS. CAC.** Dramatically toned with broad swaths of chartreuse patina over frosty silver surfaces. Boldly struck and high-end even by Superb Gem standards. PCGS has graded just two numerically finer representatives (3/16).

**From The Good Karma Collection.** NGC ID# 24RM, PCGS# 6598 Base PCGS# 6598

**4901 1936-D MS66+ PCGS. CAC.** This high-end Premium Gem displays vibrant, frosty mint luster without perceptible toning. The strike is razor-sharp, and only a few faint grazes define the grade. The 1936-D half dollar is collectible in this grade, but PCGS has seen only 37 finer representatives (7/16). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

### 1936-D Half Dollar, MS67

#### Impressive Mint Luster

**4902 1936-D MS67 PCGS. CAC.** The 1936-D is moderately rare with a mintage of 4.2 million pieces struck. However, very few examples qualify at this grade level. This is a well-struck piece with sparkling mint luster, more suggestive of an S-mint than the usual satin finish seen on Denver coins. One vertical abrasion is well-concealed in the center of the reverse. Population: 37 in 67 (2 in 67+), 0 finer. CAC: 17 in 67, 0 finer (6/16).

**From The Ray Levoi Collection, Part II.** NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

**4903 1936-S MS66 PCGS. CAC.** CAC-endorsed Premium Gems, such as the present coin, are scarce. This 1936-S half displays a bold strike and frosty luster with champagne toning. Eye appeal is this coin's most important attribute. PCGS has seen only 11 Superb Gems finer. CAC: 65 in 66, 4 finer (6/16).

**From The Ray Levoi Collection, Part II.** NGC ID# 24RP, PCGS# 6600

**4904 1937 MS67 PCGS. CAC.** Wisps of ice-blue accent satiny champagne luster on each side of this Superb Gem, CAC-approved 1937 Walking Liberty half dollar. The preservation is outstanding, and the strike is razor-sharp. This is a coin that seems to become more and more eye-appealing the longer it is studied. PCGS lists five numerically finer representatives (6/16).

**From The Ray Levoi Collection, Part II.** NGC ID# 256A, PCGS# 6601

### 1937-D Walking Liberty Half Dollar, MS67

#### Challenging Late-1930s Issue

**4905 1937-D MS67 NGC.** The 1937-D and S are more challenging issues from the 1930s, and the D-mint does not always show full striking details. This is a splendid example that has sharp details on both sides. The surfaces are brilliant and radiate bright, satiny mint luster. As one would expect from the grade, the coin is nearly perfect. Census: 36 in 67 (1 in 67+, 1 in 67★), 1 finer (6/16).

**From The Good Karma Collection.** NGC ID# 24RS, PCGS# 6602

### 1937-S Half Dollar, Lightly Toned MS67

**4906 1937-S MS67 NGC.** The 1937-S Walking Liberty half dollar is one that "comes nice," as this frosty Superb Gem demonstrates, showing a partial split thumb on Liberty's branch hand and plenty of detail on the head, flag, olive branch, and lower gown. Attractive light-rose patina and an absence of mentionable marks provide excellent eye appeal. NGC lists 15 MS67 coins, plus a single MS67+, and none finer (6/16). NGC ID# 24RT, PCGS# 6603

**1937-S Walking Liberty Half, MS67  
None Numerically Finer at PCGS**

- 4907 1937-S MS67 PCGS. CAC.** Bright and slightly frosted luster remains primarily silver but has hints of green-gold that are most visible along the margins. A few areas of die-polish brilliance hug the eagle's form on the reverse of this well-struck and carefully preserved Superb Gem. Population: 38 in 67 (2 in 67+), 0 finer. CAC: 20 in 67, 0 finer (6/16).

*From The Good Karma Collection.* NGC ID# 24RT, PCGS# 6603

- 4908 1938 MS67 PCGS.** Ex: Jack Lee. Jack Lee is best remembered for his remarkable Morgan dollar collections. He also owned a high grade set of Lincoln cents, auctioned in our December 2008 Houston Signature. Jack Lee's set of Walking Liberty halves was privately sold circa-2000. This is a lustrous and nicely struck apricot-gold Superb Gem. Housed in a green label holder.

*From The Ray Levoi Collection, Part II.* NGC ID# 24RU, PCGS# 6604

- 4909 1938 MS67 PCGS. CAC.** Sharply detailed in most areas, this remarkable Superb Gem even shows some emerging detail on Liberty's wreath hand. The virtually pristine lustrous surfaces radiate vibrant mint luster, with a few hints of pale gold toning. PCGS has graded one numerically finer example (6/16).

*From The Good Karma Collection.* NGC ID# 24RU, PCGS# 6604

- 4910 1938-D MS65 PCGS.** Splashes of light champagne-gold patina visit the obverse border of this D-mint Walker. The design elements are well-struck except for the usual weakness in Liberty's branch hand and the feathers in the eagle's trailing leg. Lustrous surfaces reveal just a few minute marks in the right obverse field. This low-mintage issue has a production approaching 500,000 pieces. NGC ID# 24RV, PCGS# 6605

- 4911 1938-D MS65 NGC.** Well-struck with typical satin luster, a small amount of tan color on the right side of the obverse, and just two or three tiny contact marks on obverse and reverse alike. This Gem 1938-D Walker will appeal to a range of collectors.

Ex: *Palm Beach Signature (Heritage, 3/2005), lot 5888.* NGC ID# 24RV, PCGS# 6605

- 4912 1938-D MS66 PCGS.** Pleasing luster issues from both sides of this Premium Gem Walker, each of which exhibits well-struck design features. A modicum of detail shows on Liberty's branch hand and impeccable preservation is apparent throughout. NGC ID# 24RV, PCGS# 6605

- 4913 1938-D MS66 PCGS.** A frosty, untoned Premium Gem example of this semikey Denver issue, of which PCGS has seen only 45 finer representatives (7/16). This piece is slightly soft on Liberty's branch hand but sharp elsewhere, delivering excellent eye appeal. NGC ID# 24RV, PCGS# 6605

- 4914 1938-D MS66+ PCGS.** Dappled autumn-brown and silver-gray toning embraces the obverse. The reverse is comparatively brilliant. The 1938-D has by far the lowest mintage of any post-1921 issue. Marks are impressively few, and limited to a tick on the center of Liberty's head. NGC ID# 24RV, PCGS# 6605

- 4915 1938-D MS66 PCGS. CAC.** The mintage for the 1938-D is less than half that of any other post-1921 issue. It is popular even in well-worn grades. The present piece, however, has immaculate fields and only a wisp of gold toning. Lustrous and lovely with a good strike. Housed in a green label holder.

Ex: *Boston ANA Signature (Heritage, 8/2010), lot 4207, which realized \$1,840.*

*From The Ray Levoi Collection, Part II.* NGC ID# 24RV, PCGS# 6605

- 4916 1938-D MS66 PCGS. CAC.** This spectacular Premium Gem exhibits a better-than-average strike, with just a trace of the usual softness on the wreath hand and eagle's leg. The unmarked lustrous surfaces show a few hints of pale gold toning, with outstanding eye appeal.

*From The Good Karma Collection.* NGC ID# 24RV, PCGS# 6605

**1938-D Half Dollar, MS67  
Conditionally Tied for Finest**

- 4917 1938-D MS67 PCGS.** This Superb Gem is among the finest-certified examples of this late-series semikey. The strike is bold, and well-preserved satin luster is warmed by light golden toning that shows deeper amber areas around the borders. Due to its small mintage of 491,600 pieces, the 1938-D is a better date among post-Depression era issues. Population: 45 in 67 (3 in 67+), 0 finer (6/16). NGC ID# 24RV, PCGS# 6605

- 4918 1939-D MS67 PCGS. CAC.** The frosty nickel-gray luster of this CAC-endorsed Superb Gem is original, as are the wisps of rainbow toning that appear along the upper obverse rim and arc through the right obverse field. This 1939-D half is well-struck and conditionally scarce. Population: 86 in 67 (5 in 67+), 2 finer. CAC: 52 in 67, 0 finer (6/16).

*From The Ray Levoi Collection, Part II.* NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

- 4919 1939-S MS67 PCGS.** A magnificent, blazing white Superb Gem 1939-S Walking Liberty half dollar, showing a bold strike and virtually flawless fields. This frosty coin is ideal for the collector seeking a mint-fresh appearance. None are numerically finer at PCGS (7/16). NGC ID# 24RY, PCGS# 6608

- 4920 1939-S MS67 PCGS. CAC.** This delightful Superb Gem exhibits sharply detailed design elements in most areas, with just a trace of the usual softness on the wreath hand. The flawless surfaces show delicate shades of pale gold toning with vibrant mint luster throughout. PCGS has graded no coins in higher numeric grades (6/16).

*From The Good Karma Collection.* NGC ID# 24RY, PCGS# 6608

- 4921 1940 MS68 NGC.** Although plentiful in lower grades, the 1940 Walking Liberty half dollar is a rarity at the MS68 level. This Registry-grade example displays slight iridescence throughout otherwise champagne surfaces, and the fields are beautifully preserved. Census: 21 in 68 (3 in 68 ★), 1 finer (7/16). NGC ID# 24RZ, PCGS# 6609

- 4922 1940-S MS66 PCGS. CAC.** Mint-fresh, glowing luster rolls over Premium Gem-quality surfaces on this CAC-endorsed 1940-S Walking Liberty half dollar. A dash of amber toning on the lower pine branch is the only detectable color. Liberty's branch hand and the eagle's trailing leg show moderate softness. PCGS has seen 13 finer representatives (6/16).  
*From The Ray Levoi Collection, Part II.* NGC ID# 24S2, PCGS# 6610
- 4923 1940-S MS66 PCGS. CAC.** Sharply detailed in most areas, this delightful Premium Gem shows just a touch of the usual softness on Liberty's wreath hand. The immaculate, brilliant surfaces radiate vibrant mint luster and eye appeal is terrific. PCGS has graded 13 numerically finer examples (6/16).  
*From The Good Karma Collection.* NGC ID# 24S2, PCGS# 6610
- 4924 1940-S MS66+ PCGS. CAC.** This wholly brilliant and thickly frosted Premium Gem exhibits above-average detail, though it lacks definition on the thumb, upper skirt lines, and the eagle's leg feathers. The surfaces appear unmarked at first, showing only minute ticks when examined closely with a loupe. Only 13 finer representatives are reported at PCGS (7/16). NGC ID# 24S2, PCGS# 6610
- 4925 1940-S MS66+ PCGS. CAC.** Bright luster emanates from the impeccably preserved surfaces of this untuned Walker. The design elements are typically struck, that is, the centers are weak, though a modicum of detail is apparent at Liberty's branch hand. The 1940-S is very difficult any finer; only about 25 examples have been graded numerically higher (6/16). NGC ID# 24S2, PCGS# 6610
- 4926 1941-S MS66 PCGS Secure. CAC.** A magnificently well-preserved, frosty Premium Gem with stellar eye appeal. This CAC-approved 1941-S Walker displays weakness on the head, branch hand, and eagle's leg, but the eye appeal is hardly affected. PCGS has seen nine Superb Gems finer (6/16).  
*From The Ray Levoi Collection, Part II.* NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613
- 4927 1941-S MS66 PCGS. CAC.** This spectacular Premium Gem exhibits well-detailed design elements, with just a touch of the usual softness on the wreath hand and eagle's leg. The impeccably preserved surfaces radiate vibrant mint luster and eye appeal is terrific. PCGS has graded nine numerically finer examples (6/16).  
*From The Good Karma Collection.* NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613
- 4928 1942 MS67+ PCGS. CAC.** Thin crescents of rainbow patina cling to the margins, but the surfaces are overwhelmingly brilliant with coruscating mint frost. As expected for the remarkable grade, each side of this Superb Gem is immaculate with only a single visible mark on Liberty's chest. Crisply rendered with the usual central softness. NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614
- 4929 1942 MS67+ PCGS. CAC.** 30th Anniversary Green Label Holder. Plus-graded and CAC-endorsed, this Superb Gem 1942 Walking Liberty half dollar is an ideal type coin. The obverse periphery displays vivid yellow-gold and orange toning, while the center and entire reverse show faintly iridescent silver luster. The strike is sharp, and eye appeal is outstanding. NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614
- 4930 1942 MS67+ PCGS. CAC.** A sharp, frosty Premium Gem 1942 half dollar, showing faint traces of light champagne toning. The fields are clean, and the eye appeal is strong. An ideal type coin or Registry candidate. PCGS has seen only six finer representatives (7/16). NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614
- 4931 1942-S MS66+ PCGS. CAC.** Trumpet tail S. A stone-white high-grade representative. The thoroughly lustrous surfaces appear pristine. The skirt lines are fairly sharp, although Liberty's cheek and branch hand have usual definition for a San Francisco wartime Walker. NGC ID# 24S8, PCGS# 6617
- 4932 1942-S MS66+ PCGS. CAC.** Trumpet Tail S. Clearly saved from an original roll, this entirely brilliant Premium Gem half dollar has exceptionally clean fields and microscopic marks hidden within the design elements. Cartwheel luster flows throughout, and the devices show crisp detail. There are merely nine higher-graded coins at PCGS (7/16). NGC ID# 24S8, PCGS# 6617
- 4933 1942-S MS66+ PCGS. CAC.** Trumpet Tail S. It would be quite the task to locate a finer example of this San Francisco Walking Half dollar issue. Vibrant luster glistens over all-brilliant, well-detailed surfaces. A loupe reveals small ticks within the central design elements, but the fields are seemingly free of even the tiniest flaws. PCGS reports nine finer submissions (7/16). NGC ID# 24S8, PCGS# 6617
- 4934 1942-S MS66+ PCGS. CAC.** Small S, a scarce mintmark style for the issue. Light golden patina enriches the margins of this lustrous and essentially unabraded wartime Walker. Liberty's head is nicely struck. The skirt lines and branch hand show definition usual for the issue. NGC ID# 24S8, PCGS# 6617
- 4935 1943 MS67+ PCGS. CAC.** An extraordinary Superb Gem, this 1943 Walking Liberty half dollar is rarely found finer, with just eight higher grade examples certified by PCGS (6/16). This satiny example has wispy gold peripheral toning on the obverse, and is otherwise brilliant and untuned. NGC ID# 24S9, PCGS# 6618
- 4936 1943 MS67+ PCGS. CAC.** Full design rendering of Liberty branch hand, head, and the eagle's trailing leg give this high-end Superb Gem outstanding eye appeal. The luster is thick and frosty, showing a suggestion of light champagne toning. The preservation is superb. PCGS lists eight finer submissions (7/16). NGC ID# 24S9, PCGS# 6618
- 4937 1943-D MS67+ PCGS. CAC.** Mottled olive toning appears around the obverse borders, attesting to the originality of the champagne-gray interiors. This well-struck, high-end Superb Gem 1943-D Walker displays excellent luster and eye appeal. PCGS lists just two coins finer (6/16). NGC ID# 24SA, PCGS# 6619
- 4938 1944 MS67 PCGS Secure. CAC.** A boldly struck, frosty Superb Gem with a hint of iridescences that accentuates a blush of light champagne color. The coin is well-struck, and eye appeal is outstanding. PCGS has seen only a single finer example. CAC: 67 in 67, 0 finer (6/16).  
*From The Ray Levoi Collection, Part II.* NGC ID# 24SC, PCGS# 6621

**1944 Half Dollar, MS67+  
Only One Coin Finer at PCGS**

**4939 1944 MS67+ PCGS. CAC.** The 1944 Walker is a plentiful issue that is seldom seen in Superb Gem condition. This Plus-graded MS67 coin is a rare find, and only a single finer example is reported at PCGS (6/16). The strike is sharp, and the luminous, frosty surfaces display a glimpse of pale champagne toning. CAC: 67 in 67, 0 finer (6/16). NGC ID# 24SC, PCGS# 6621

**4940 1944-D MS67+ PCGS. CAC.** This Plus-graded Superb Gem displays virtually pristine surfaces, with vibrant mint luster and just a trace of pale gold toning. The design elements are sharply rendered and the visual appeal is tremendous. PCGS has graded one numerically finer example (6/16). NGC ID# 24SD, PCGS# 6622 Base PCGS# 6622

**4941 1944-S MS66+ PCGS. CAC.** 30th Anniversary Green Label Holder. Large S. Light almond-gold toning adorns this lustrous and uncommonly unmarked half dollar. The strike is above average on Liberty's head and skirt lines. The branch hand shows definition usual for a wartime San Francisco issue. NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

**1945 Half, Occasionally Toned MS67+**

**4942 1945 MS67+ NGC.** Original patches of golden-rose toning are scattered around the rims on each side of this Superb Gem. The mint luster is bright and satiny, enhancing the color where it is present. The strike details are pinpoint-sharp with complete definition on the skirt lines, hand, and head of Liberty. Do we even need to say there are no noticeable abrasions. No, I didn't think so. There are no finer graded 1945 halves at either service than a Plus-graded MS67. NGC ID# BYKU, PCGS# 6624 Base PCGS# 6624

**1945 Half Dollar, MS67+  
Tied for the Finest Certified**

**4943 1945 MS67+ PCGS. CAC.** There has never been a finer 1945 half dollar certified at PCGS or NGC, and PCGS has only graded 17 examples as MS67+ (6/16). Although CAC has approved 84 MS67 examples, their population data does not account for Plus designations. This impressive Superb Gem has frosty silver luster with ivory surfaces and reddish-gold toning that is much thicker on the reverse. This piece is a must have coin for the collector who aspires to the top Registry set. NGC ID# BYKU, PCGS# 6624 Base PCGS# 6624

**1945-D Walker, MS67+  
Amazing Quality Type Coin**

**4944 1945-D MS67+ PCGS. CAC.** The one thing that is immediately apparent when viewing this coin is the patient, hand-selection of this piece. That takes in all the salient features including bright mint luster, subtle toning, full strike, and lack of abrasions. But none of those features are guaranteed just by mailing in a check for any MS67. This coin is definitely special, and should be viewed and ultimately purchased by a collector who will appreciate its special attributes that add up to more than any of its individual parts. NGC ID# 24SG, PCGS# 6625

**1945-S Walking Liberty Half, MS67  
Peripherally Toned**

**4945 1945-S MS67 PCGS.** The 1945-S Walker is readily available through MS66, but Registry Set collectors will find Superb Gems surprisingly scarce. This MS67 coin is beautiful and frosty, with near-brilliant interiors and vivid pine-green, lemon-gold, amber, and crimson around the peripheries. Liberty's branch hand and the eagle's central feathers are a trifle soft, but the overall eye appeal is exceptional. Population: 35 in 67, 0 finer (6/16). NGC ID# 24SH, PCGS# 6626

- 4946 1946 MS67 PCGS.** A remarkable Superb Gem, with sharply detailed design elements that show emerging detail on the wreath hand and fine definition on the head and eagle's leg. The flawless surfaces radiate vibrant mint luster, under attractive shades of pale gold toning. Population: 64 in 67 (5 in 67+), 0 finer (6/16).  
**From The Good Karma Collection.** NGC ID# 24SJ, PCGS# 6627 Base PCGS# 6627
- 4947 1946-D MS67 PCGS.** Peripheral wisps of russet and gold toning accent pale champagne interiors on this Superb Gem 1946-D Walker. The strike is well-executed, and the fields are devoid of mentionable abrasions. Population: 85 in 67 (2 in 67+), 0 finer (7/16).  
**From The Ray Levoi Collection, Part II.** NGC ID# 24SK, PCGS# 6628
- 4948 1946-S MS67 NGC.** Knob S. Lovely golden-brown and apple-green toning endows the peripheries of this otherwise brilliant Superb Gem. Nearly pristine, and nicely struck except for the usual light impression on the branch hand. Census: 76 in 67 (1 in 67+, 4 in 67★), 0 finer (6/16).  
*Ex: Long Beach Signature (Heritage, 2/2011), lot 3840.*  
**From The Good Karma Collection.** NGC ID# 24SL, PCGS# 6629
- 4949 1946-S MS67 NGC.** Knob S. Dappled forest-green and wheat-gold toning overlies stone-gray surfaces. A lustrous World War II Walker with smooth fields and minor contact on Liberty's outstretched arm. A nice strike, though the branch hand shows blending usual for the San Francisco facility. NGC ID# 24SL, PCGS# 6629
- 4950 1946-S MS67 PCGS. CAC.** Knob S. Plum-red, apple-green, and golden-brown freckles adorn the obverse border. The remainder of this lustrous Superb Gem is close to brilliant. The 1946-S has a better strike than the immediately preceding San Francisco issues, and the present piece corresponds to that rule despite blending on the branch hand.  
**From The Ray Levoi Collection, Part II.** NGC ID# 24SL, PCGS# 6629
- 4951 1947 MS66+ PCGS. CAC.** Delicate blushes of pale rose and gold patina accent the overwhelmingly brilliant and fully frosted surfaces of this MS66+ Walking Liberty half dollar. Thumb separation is complete, and the upper gown lines are strongly rendered. NGC ID# 24SM, PCGS# 6630
- 4952 1947 MS67 PCGS.** A boldly struck and thoroughly lustrous Superb Gem example of this final-year Walking Liberty half dollar, showing lovely champagne toning over each side. This issue is elusive so well-preserved, and finer pieces are rare. Population: 67 in 67 (4 in 67+), 0 finer (7/16).  
**From The Ray Levoi Collection, Part II.** NGC ID# 24SM, PCGS# 6630
- 4953 1947 MS67 NGC.** Champagne-gold patina covers the radiantly lustrous surfaces of this Superb Gem and a decisive strike imparts strong definition to the design features. A few light obverse marks do not detract. Census: 75 in 67 (3 in 67★, 2 in 67+★), 0 finer (6/16).  
**From The Good Karma Collection.** NGC ID# 24SM, PCGS# 6630
- 4954 1947-D MS67 NGC.** This is an essentially untuned Superb Gem, well-defined in all but one or two isolated areas. The richly frosted surfaces are practically mark-free and eye appeal is terrific. Census: 59 in 67 (2 in 67+, 6 in 67★), 1 finer (6/16).  
**From The Good Karma Collection.** NGC ID# 5ESK, PCGS# 6631

## PROOF WALKING LIBERTY HALF DOLLARS

- 4955 1936 PR64 PCGS.** Lightly toned golden with a full strike and impressive eye appeal for the grade. This Choice 1936 proof Walker will appeal to a range of budget-conscious collectors seeking a quality coin. NGC ID# 27V4, PCGS# 6636

### 1936 Walking Liberty Half Dollar, PR66 First Proof Issue of the Series

- 4956 1936 PR66 NGC.** A delightful Premium Gem representative of the first Walking Liberty proof issue, with sharply detailed design elements and deeply reflective fields. The impeccably preserved surfaces show subtle highlights of pale gold toning and eye appeal is outstanding.  
**From The Good Karma Collection.** NGC ID# 27V4, PCGS# 6636

- 4957 1937 PR67 NGC. CAC.** A sharply detailed Superb Gem from a proof mintage of 5,728 pieces, this coin offers virtually perfect brilliant surfaces with deeply reflective fields and outstanding eye appeal. NGC has graded 28 numerically finer examples (6/16).  
**From The Good Karma Collection.** NGC ID# 5ESS, PCGS# 6637

- 4958 1937 PR67 PCGS. CAC.** A lovely Superb Gem proof with mirrored fields and light golden toning over each side. The strike is full. The 1937 is available in this grade, but PCGS lists only 10 numerically finer proofs (7/16). NGC ID# 5ESS, PCGS# 6637

### 1937 Half Dollar, PR67+ Rarely Found Finer

- 4959 1937 PR67+ PCGS. CAC.** PCGS has only certified 10 finer examples of the 1937 proof Walking Liberty half dollar, and CAC has only approved six of those finer examples (6/16). This piece has natural champagne toning over its brilliant silver surfaces. The fields are fully mirrored around satiny, reflective devices. An impressive example for the proof Walking Liberty half dollar connoisseur. NGC ID# 5ESS, PCGS# 6637

**1937 Walking Liberty Half Dollar, PR67+  
Sharply Detailed and Well-Preserved**

- 4960 1937 PR67+ PCGS. CAC.** A spectacular Plus-graded Superb Gem proof Walking Liberty half dollar, with sharp definition on all design elements, including clear separation between Liberty's thumb and finger. The well-preserved surfaces show a few hints of greenish-gold toning and the fields are deeply reflective throughout. PCGS has graded 10 numerically finer examples (6/16). NGC ID# 5ESS, PCGS# 6637

**1938 Half Dollar, PR68  
Among the Finest Certified**

- 4961 1938 PR68 PCGS.** This lightly toned 1938 proof Walker has made the ranks of being among the finest certified. A thin dash of rainbow toning appears along portions of the outer peripheries, but the majority of each side is cast in a dusky stone-gray blanket. This proof is fully struck and deeply reflective. Population: 17 in 68, 0 finer (6/16). NGC ID# 27V6, PCGS# 6638

**1939 Half Dollar, PR68  
Nearly Pristine**

- 4962 1939 PR68 NGC.** This brilliant proof Walker boasts an entirely untuned obverse with glassy mirrors, while the other side shows dusky powder-blue and peach-orange accents. Contrast is minimal, as expected. The Mint produced 8,808 proofs in 1939, a small increase over the previous year's output. Nearly pristine survivors like this are very scarce. NGC ID# 5ESU, PCGS# 6639

**1939 Half Dollar, PR68  
Subtle Obverse Contrast**

- 4963 1939 PR68 PCGS.** This brilliant, gleaming Superb Gem 1939 Walking Liberty half dollar proof displays a full strike and satiny, stone-white devices. The obverse actually shows modest cameo contrast, an attribute that is rarely seen on this type. Only small numbers of proof 1939 Walkers are known this fine, and none are finer at PCGS. Population: 39 in 68, 0 finer (6/16). NGC ID# 5ESU, PCGS# 6639

**1939 Half Dollar, PR68  
Extraordinary Eye Appeal**

- 4964 1939 PR68 PCGS.** This glittering Superb Gem proof 1939 Walker is among the finest at PCGS, displaying remarkably sharp devices and deeply mirrored fields. The coin appears flawless. The interiors are brilliant, and the borders display a hint of iridescence. The eye appeal must be viewed in person to be fully appreciated. Population: 39 in 68, 0 finer (7/16). NGC ID# 5ESU, PCGS# 6639

**1940 Walking Liberty Half, PR68  
None Certified Finer**

- 4965 1940 PR68 PCGS. CAC.** This mirrored Superb Gem proof 1940 Walking Liberty half dollar is faintly toned over the interiors with deepening iridescent gold color around the peripheries. The strike is full, and the preservation is excellent. There are no doubts as to the originality of this top-grade coin. Population: 35 in 68 (2 in 68+), 0 finer. CAC: 13 in 68, 0 finer (6/16). NGC ID# 27V8, PCGS# 6640

- 4966 1941 PR67+ PCGS. CAC.** The 1941 proof, with a mintage exceeding 15,000 pieces, is a readily available issue in the Walking Liberty half dollar series. Golden-tan patination bathes both sides of this high-end Superb Gem, framing bluish-green color in the obverse center. Sharply struck and impeccably preserved. NGC ID# 24SP, PCGS# 6641

**1941 Walking Liberty Half, PR68  
No AW Monogram**

- 4967** 1941 PR68 NGC. CAC. No AW monogram. Although both sides of this Superb Gem proof have toning that is best described as wispy, the presentation is multihued, suggesting a fog-shrouded rainbow. Only one piece is numerically finer at NGC, there are no finer examples certified at PCGS. Census: 83 in 68 (18 in 68★, 1 in 68+★), 1 finer. CAC: 21 in 68, 0 finer (6/16).  
Ex: December Signature (Heritage, 12/2011), lot 3094.  
From The Good Karma Collection. NGC ID# 24SP, PCGS# 6641

**1942 Half Dollar, Delicately Toned PR68  
Only One Coin Finer at PCGS**

- 4968** 1942 PR68 PCGS. The 1942 is the final proof issue in the Walking Liberty half dollar series. High-grade examples are usually available for type purposes, but this PR68 coin is conditionally scarce. The strike is full, and the fields display deep mirroring. The interiors are essentially brilliant, ceding to tinges of iridescence around the borders. Population: 57 in 68 (3 in 68+), 1 finer (7/16). NGC ID# 282G, PCGS# 6642

**1942 Half Dollar, PR68 ★  
Outstanding Quality**

- 4969** 1942 PR68 ★ NGC. The brilliant surfaces of this Superb Gem jump out at the observer. An absolutely full strike is seen over the design features on each side, and close examination reveals no marks of any kind. Both sides exhibit breathtaking eye appeal. Slight field-device contrast is also noted.  
From The Good Karma Collection. NGC ID# 282G, PCGS# 6642

**FRANKLIN HALF DOLLARS**

- 4970** 1949-D MS66 Full Bell Lines PCGS. Subtle hints of greenish-gold toning enhance the well-preserved surfaces of this spectacular Premium Gem, with well-detailed design elements that show full definition on the bell lines. Original mint luster shines through the patina. Population: 77 in 66 (6 in 66+) Full Bell Lines, 0 finer (6/16). NGC ID# 5HWE, PCGS# 86654

**1950 Half Dollar, MS67 Full Bell Lines  
Among the Finest Certified**

- 4971** 1950 MS67 Full Bell Lines PCGS. Ex: Radabaugh Collection. As a Superb Gem Full Bands coin, the 1950 Franklin half dollar is a condition rarity. What sets the present coin apart from its peers is that it is completely untoned, slightly frosty with a measure of texture through the fields; while high-end Full Bell Lines Franklin halves are more often associated with lavish patina. While this coin has a single small mark to the right of Franklin's ear and a couple of minor ticks on the left side of the bell's wooden support, the overall preservation is magnificent. Population: 15 in 67 (1 in 67+) Full Bell Lines, 0 finer (7/16).  
Ex: FUN Signature (Heritage, 1/2011), lot 5608. NGC ID# 24SW, PCGS# 86656

**1950 Franklin Half Dollar, MS67  
Rare Full Bell Lines Example**

- 4972** 1950 MS67 Full Bell Lines PCGS. CAC. A magnificent Superb Gem Franklin half dollar, with sharply detailed design elements and full definition on the bell lines. Both sides exhibit vibrant mint luster, with attractive highlights of greenish-gold toning. Housed in a new 30th Anniversary green label holder. Population: 15 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 6 in 67, 0 finer (6/16). NGC ID# 24SW, PCGS# 86656

- 4973** 1950-D MS66 Full Bell Lines PCGS. Uniformly distributed gold-tan freckles bathe both sides of this sharply struck Premium Gem, each of which displays remarkably well preserved surfaces for a 1950-D Franklin. A trivial mark on the upper-right side of the bell may help to pedigree the coin. This issue is virtually unobtainable any finer. Population: 90 in 66 (12 in 66+) Full Bell Lines, 0 finer (6/16). NGC ID# 24SX, PCGS# 86657 Base PCGS# 86657

- 4974** 1950-D MS66 Full Bell Lines PCGS. Frosty, original mint luster illuminates untuned surfaces on this Premium Gem Full Bell Lines 1950-D Franklin half dollar. There are no obtrusive abrasions, and none are graded numerically finer. Population: 91 in 66 (12 in 66+) Full Bell Lines, 0 finer (7/16). NGC ID# 24SX, PCGS# 86657 Base PCGS# 86657

**4975 1950-D MS66 Full Bell Lines PCGS. CAC.** The mostly brilliant, virtually pristine surfaces of this spectacular Premium Gem show a few hints of pale gold and amber toning, with vibrant mint luster throughout. The design elements are sharply detailed and the bell lines show full definition. Population: 90 in 66 (12 in 66+) Full Bell Lines, 0 finer. CAC: 15 in 66, 0 finer (6/16). NGC ID# 24SX, PCGS# 86657 Base PCGS# 86657

**4976 1951-D MS66+ Full Bell Lines PCGS. CAC.** A Plus-graded Premium Gem with sharply detailed design elements and full definition on the bell lines. The lustrous surfaces are impeccably preserved, under shades of golden-tan toning. PCGS has graded a single Full Bell Lines example finer (6/16). NGC ID# 24SZ, PCGS# 86659

#### 1951-S Franklin Half Dollar, MS67 Superb Surface Quality

**4977 1951-S MS67 PCGS. CAC.** This is a magnificently well-preserved Superb Gem example of the 1951-S Franklin half dollar. The bell lines are just shy of full, but the eye appeal is hardly affected. Frosty mint luster is brilliant over the interiors but shows vivid gold, crimson, russet, and forest-green toning around the peripheries. Among the finest non-Full Bell Lines examples known and rare as such. Population: 7 in 67, 0 finer (6/16). NGC ID# 24T2, PCGS# 6660 Base PCGS# 6660

**4978 1952 MS67 Full Bell Lines PCGS.** A blend of low-intensity lavender-gray and greenish-gold toning blankets the impeccably preserved, lustrous surfaces of this spectacular Superb Gem, with well-detailed design elements that meet the specifications for Full Bell Lines definition. Population: 22 in 67 Full Bell Lines, 0 finer (6/16). NGC ID# 24T3, PCGS# 86661

**4979 1953-S MS67 PCGS. CAC.** Orange-red toning is prevalent on the upper obverse and right reverse. Stone-gray and olive-green patina is also extensive. This coruscating and well-preserved Superb Gem shows minor merging on the lower bell lines west of the crack. Population: 28 in 67 (1 in 67+), 0 finer (7/16). NGC ID# 24T8, PCGS# 6666

#### 1954-S Franklin Half, MS66+ Full Bell Lines Soft Luster and Toning

**4980 1954-S MS66+ Full Bell Lines PCGS. CAC.** This Registry-grade Full Bell Lines 1954-S Franklin half dollar displays luminous, frosty mint luster with a pleasant overlay of olive-gold, russet, and pale forest-green hues. The strike is bold, and the surfaces are carefully preserved. Only a single Superb Gem is finer at either service. CAC: 19 in 66, 0 finer (7/16). NGC ID# 24TB, PCGS# 86669

**4981 1955 MS66+ Full Bell Lines PCGS.** The 1955 is the lowest-mintage coin in the Franklin half dollar series (about 2.5 million pieces). Premium Gem is the finest numerical grade likely to be encountered; PCGS reports a mere four examples finer and NGC shows none grading higher (6/16). A swath of deep bluish-green, lavender, and gold toning concentrates on the left obverse border, while a similar color palette, though lighter, gravitates to the reverse margin. NGC ID# 24TC, PCGS# 86670

**4982 1955 MS66+ Full Bell Lines PCGS.** Full Bell Lines examples of this issue are plentiful through MS66, but with only four Superb Gems finer at PCGS (7/16), the present Plus-graded coin is highly appealing. Mottled olive-green, russet, and copper-red toning blankets each side, masking any trivial surface grazes. NGC ID# 24TC, PCGS# 86670

**4983 1955 MS66+ Full Bell Lines PCGS. CAC.** Noted series expert Rick Tomaska writes that the 1955 Franklin half dollar is difficult to find in MS66 with or without Full Bell Lines and that most examples lack good eye appeal. This strongly struck piece will appeal to Registry collectors in search of a high-end, originally toned example. PCGS shows four finer submissions (7/16). NGC ID# 24TC, PCGS# 86670

**4984 1958-D MS67 Full Bell Lines PCGS.** Rainbow-like toning accents the right borders of this lustrous, sharply struck steel-gray Franklin half dollar. While bagmarks are a significant problem on the 1958-D (Tomaska, 2011), the present Superb Gem reveals just a few minuscule, unobtrusive grade-consistent marks. Population: 62 in 67 (1 in 67+) Full Bell Lines, 0 finer (6/16). NGC ID# 5HNM, PCGS# 86675

**4985 1958-D MS67 Full Bell Lines PCGS.** Vivid shades of burnt-orange and lavender-gray toning enhance the immaculate surfaces of this delightful Superb Gem. The design elements are sharply detailed, with full Bell Lines definition and vibrant mint luster, under the patina. Population: 62 in 67 (1 in 67+) Full Bell Lines, 0 finer (6/16). NGC ID# 5HNM, PCGS# 86675

**4986 1958-D MS67 Full Bell Lines PCGS. Ex: Radabaugh Collection.** A Registry-grade 1958-D Franklin half dollar, showing frosty mint luster beneath vibrant original toning. The obverse is almost consumed by amber-red, fire-orange, yellow-gold, and forest-green colors, while the reverse displays these around the periphery but has dusky lavender-gray over the interior. Population: 63 in 67 (1 in 67+) Full Bell Lines, 0 finer (7/16). NGC ID# 5HNM, PCGS# 86675

**4987 1959-D MS66+ Full Bell Lines PCGS. Ex: Radabaugh Collection.** This sharp, frosty 1959-D Franklin half displays dusky champagne toning over Plus-graded Premium Gem surfaces. The strike is sharp. PCGS has seen only two finer Full Bell Lines representatives (7/16). NGC ID# 24TK, PCGS# 86677

**4988 1959-D MS66+ Full Bell Lines PCGS. CAC.** A thoroughly lustrous, satiny Premium Gem with a sharp strike and warm toning. Both sides display olive, forest-green, ruby-red, and gold peripheral toning around a light sky-blue interior. PCGS lists only two finer representatives in Full Bell Lines (7/16). NGC ID# 24TK, PCGS# 86677

**1961 Franklin Half, MS66 Full Bell Lines  
Strike Rarity, Two-Toned Color Scheme**

- 4989 1961 MS66 Full Bell Lines PCGS.** Ex: Radabaugh Collection. Two different but equally lovely color schemes prevail on the surfaces of this conditional and strike rarity within the Franklin half series. The obverse of this Premium Gem Full Bell Lines 1961 half features daubs of gold, jade, and pink dominating, while the reverse offers a beautiful orange-pink center with a narrow ring of teal at the rim. Contact marks are a nonissue here. Series pundit Rick Tomaska calls the 1961-P “extremely rare in MS-66 FBL,” an assertion borne out by the certified populations. Population: 13 in 66 (1 in 66+) Full Bell Lines, 0 finer (7/16).  
Ex: *Central States Signature (Heritage, 4/2012)*, lot 5144. NGC ID# 24TN, PCGS# 86680

- 4990 1962 MS65 Full Bell Lines PCGS.** The 1962 Franklin half dollar with Full Bell Lines is one of the scarcer issues in the series, and coins grading finer than MS65 are exceeding rare. The exceptionally smooth and lustrous silver-white surfaces of the current Gem display an occasional whisper of gold-tan patina at the margins. NGC ID# 24TR, PCGS# 86682

- 4991 1962 MS65 Full Bell Lines PCGS.** The 1962 is a slightly scarcer date in high grade with Full Bell Lines. This sharp Gem Full Bell Lines example displays satiny luster with a hint of reflectivity in the fields. Subtle amber-gold, lavender, and bluish toning is seen on each side. A small planchet lamination is visible in the obverse field below the Y in LIBERTY. PCGS lists 13 Premium Gems finer in Full Bell Lines (7/16). NGC ID# 24TR, PCGS# 86682

**1962 Franklin Half Dollar, MS66 Full Bell Lines  
None Certified Finer at PCGS or NGC**

- 4992 1962 MS66 Full Bell Lines PCGS.** This spectacular Premium Gem displays vibrant mint luster, with subtle hints of greenish-gold toning on both sides. The design elements are sharply detailed, with Full Bell Lines definition, and the surfaces are impeccably preserved. Housed in a new 30th Anniversary green label holder. Population: 13 in 66 Full Bell Lines, 0 finer (6/16). NGC ID# 24TR, PCGS# 86682

**1962-D Franklin Half, MS66 Full Bell Lines  
Among the Finest Certified**

- 4993 1962-D MS66 Full Bell Lines PCGS.** This conditionally rare Full Bell Lines 1962-D Franklin half dollar is among the finest certified, an ideal Registry Set acquisition. The strike is bold, and the surfaces display frosty luster. The obverse has mottled olive toning, and the reverse is light golden. A few small ticks do not detract. Population: 29 in 66 (1 in 66+) Full Bell Lines, 0 finer (7/16). NGC ID# 24TS, PCGS# 86683

**1963-D Franklin Half Dollar, MS66+  
Full Bell Lines Example**

- 4994 1963-D MS66+ Full Bell Lines PCGS.** This Plus-graded Premium Gem is from the last year of the Franklin design, and exhibits sharply detailed design elements, with Full Bell Lines definition, and vibrant mint luster on both sides. Attractive shades of sea-green and magenta toning enhance the obverse surfaces, while the reverse remains essentially brilliant. Population: 97 in 66 (4 in 66+) Full Bell Lines, 0 finer (7/16). NGC ID# 24TU, PCGS# 86685

**1963-D Half Dollar, MS67 Full Bell Lines  
Only One Other Piece So Graded**

- 4995 1963-D MS67 Full Bell Lines NGC.** Here is a staggering statistic: More than 67 million 1963-D half dollars were struck, but only two (both NGC-certified) have been graded MS67. This is a remarkably well-preserved coin. The mint luster is bright and softly frosted, and both sides show shades of crimson and cobalt-blue. The detailing on the bell lines leaves no doubt — the individual lines are deeply impressed and complete from side to side. This coin will be of paramount importance to collectors of this popular series. NGC ID# 24TU, PCGS# 86685

## PROOF FRANKLIN HALF DOLLARS

### 1950 Half Dollar, PR67 High-End Non-Cameo

- 4996 1950 PR67 PCGS. CAC.** Proof Franklin halves were not coined until 1950. Cameo-contrasted examples are rare in high grade, although a non-Cameo Superb Gem can still be obtained without breaking the bank. This CAC-endorsed example is brilliant. The strike is full, and the fields display ample reflectivity. Satiny mint luster adheres to the devices. Population: 66 in 67 (2 in 67+), 1 finer. CAC: 31 in 67, 1 finer (6/16). NGC ID# 27VA, PCGS# 6691

### 1950 Half Dollar, PR66 Cameo First Franklin Proof Issue

- 4997 1950 PR66 Cameo PCGS.** In 1950 the Philadelphia Mint struggled to recapture the art of proof coinage, after an eight year hiatus, and few pieces from that first year displayed any sort of contrast. This attractive Premium Gem is one of the exceptions. A hint of gold over each side only accents the eye appeal and contrast, which is perhaps even stronger on the reverse. Sharply detailed and impeccably preserved throughout. Population: 60 in 66 (4 in 66+) Cameo, 19 finer (6/16). NGC ID# 27VA, PCGS# 86691

### 1950 Franklin Half Dollar, PR67 Cameo Extremely Rare Any Finer

- 4998 1950 PR67 Cameo NGC.** The design elements exhibit razor-sharp striking definition throughout, and imposing white-on-black contrast exists on each side between intensely frosted devices and deeply mirrored fields. A few tiny nicks on the Liberty Bell preclude an even loftier grade assessment. This issue is rare at the current grade level, and finer examples are virtually unobtainable. Census: 14 in 67 Cameo (3 in 67★, 1 in 67+★), 1 finer (6/16). NGC ID# 27VA, PCGS# 86691

- 4999 1951 PR66 Cameo PCGS.** High-end Cameo examples of the 1951 proof half dollar are elusive. This Premium Gem example displays a full strike and stark field-device contrast. No toning is seen. A few stray lines in the fields determine the grade. Population: 78 in 66 (3 in 66+) Cameo, 20 finer (7/16). NGC ID# 27VB, PCGS# 86692

- 5000 1951 PR66 Cameo PCGS.** Fully struck with amazingly crisp detail on the Liberty Bell, including the lettering. This piece is well preserved and free of bothersome hairlines or contact marks. A trace of haze in the fields prevents an even loftier grade. Population: 78 in 66 (3 in 66+) Cameo, 20 finer (6/16). NGC ID# 27VB, PCGS# 86692

### 1951 Franklin Half Dollar, PR67 Cameo Nicely Contrasted and Impeccably Preserved

- 5001 1951 PR67 Cameo NGC.** This early Franklin proof issue has a low frequency of Cameo examples, and few examples have the eye appeal to rival this untuned Superb Gem. The devices are exquisitely detailed and the strong mirrors have hardly any distractions to the unaided eye. Though the portrait and bell have too little frost to qualify for Ultra Cameo status, the beauty of a coin such as this is easy to appreciate. Census: 26 in 67 Cameo (1 in 67★), 1 finer (6/16). NGC ID# 27VB, PCGS# 86692

- 5002 1952 PR67 Cameo PCGS.** Fully struck with jet-black fields, nicely frosted devices, and intense cameo contrast on both sides. Distraction-free with faint die lines on the central devices. A scarce early proof issue in the Franklin half dollar series. Population: 59 in 67 (3 in 67+) Cameo, 4 finer (6/16). Ex: *Summer FUN Signature (Heritage Auctions, 7/2007)*, lot 1135. NGC ID# 27VC, PCGS# 86693

- 5003 1953 PR67+ Cameo PCGS. CAC.** While many examples of the proof 1953 Franklin were struck from very worn dies (Tomaska, 2011), the present high-end Superb Gem displays above-average mirror quality in the fields, yielding pronounced contrast with the frosty motifs. Excellent surface preservation is evident on both sides. NGC ID# 27VD, PCGS# 86694

### 1953 Franklin Half Dollar, PR68 Cameo None Certified Numerically Finer

- 5004 1953 PR68 Cameo NGC.** Icy devices and legends contrast favorably with the highly reflective fields. Even the hair curls near Franklin's ear show strong definition. This fully brilliant Superb Gem is certain to satisfy the demanding cameo proof specialist. Census: 34 in 68 Cameo (1 in 68★), 0 finer (6/16). Ex: *Long Beach Signature (Heritage, 2/2007)*, lot 4149. NGC ID# 27VD, PCGS# 86694

- 5005 1954 PR68 Cameo NGC.** A flashy piece with laudable contrast and a slight hint of toning on the reverse. NGC has certified just six finer Cameo specimens (6/16). NGC ID# 27VE, PCGS# 86695
- 5006 1954 PR68 Cameo PCGS.** The devices are nicely frosted, and the virtually untuned fields have illimitable depth. The surfaces are absolutely clean to the unaided eye. Population: 66 in 68 Cameo, 0 finer (6/16).  
Ex: *Dallas Signature* (Heritage Auctions, 10/2006), lot 2186. NGC ID# 27VE, PCGS# 86695
- 5007 1954 PR68 Cameo PCGS. CAC.** A magnificent PR68 example of this popular Franklin half dollar, with sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. The brilliant surfaces are impeccably preserved. Population: 66 in 68 Cameo, 0 finer (6/16). NGC ID# 27VE, PCGS# 86695
- 5008 1954 PR68 Cameo PCGS. CAC.** This stunning PR68 Franklin half dollar exhibits bold cameo contrast between the sharply detailed, frosty design elements and the deeply mirrored fields. The brilliant surfaces are impeccably preserved and eye appeal is terrific. Population: 66 in 68 Cameo, 0 finer (6/16). NGC ID# 27VE, PCGS# 86695
- 5009 1954 PR67 Deep Cameo PCGS. CAC.** Deep Cameo 1954 proof halves are elusive in any grade and rare above PR67. This Superb Gem CAC coin displays stark field-device contrast and brilliant surfaces. The mirroring is incredibly deep. A Registry-grade example. Population: 43 in 67 (2 in 67+) Deep Cameo, 10 finer. CAC: 12 in 67 Deep Cameo, five finer (7/16). NGC ID# 27VE, PCGS# 96695
- 5010 1955 PR69 Cameo NGC.** A gorgeous, brilliant proof Franklin half. Fully struck and virtually pristine. The white-on-black contrast is particularly impressive on the reverse. Most proof halves from the fifties lack frost on the devices; the present piece provides an exception. Census: 18 in 69 Cameo (3 in 69★), 0 finer (6/16).  
Ex: *FUN Signature* (Heritage Auctions, 1/2006), lot 4625; *Dallas Signature* (Heritage Auctions), 7/2006, lot 2620; *ANA Signature* (Heritage Auctions, 8/2007), lot 1125. NGC ID# 27VF, PCGS# 86696
- 5011 1956 Type One PR69 NGC.** By far the more elusive of the proof Franklin half variants for the issue. The Type One reverse is most easily distinguished by the four feathers on the eagle's left (facing) wing that are clear of the perch. While the obverse has minimal contrast, the reverse sports a pleasing cameo effect. Small dots of violet toning visit the rims.  
Ex: *Houston Signature* (Heritage, 11/2007), lot 61046, which realized \$805. NGC ID# 24TW, PCGS# 6686
- 5012 1956 Type One PR69 NGC.** The Type One 1965 proof Franklin is significantly scarcer in high grade than the Type Two. Among non-Cameos, this PR69 coin is at the top of the ladder for condition. The strike is full, and the surfaces are brilliant. A hint of field-device contrast is seen on each side. Ideal for Registry purposes. NGC ID# 24TW, PCGS# 6686

---

**1956 Franklin Half Dollar, PR68 Cameo  
Type 1, None Certified Finer at PCGS**

- 5013 1956 Type 1 PR68 Cameo PCGS.** Breen (1988) estimates only 5% of the 1956 proofs have a Type 1 reverse, best identified by the presence of four feather tips left of the eagle's perch. This magnificent PR68 specimen is also noteworthy for its obverse, which exhibits uncommon white-on-black contrast. A flawless and essentially brilliant specimen. Population: 56 in 68 Cameo, 0 finer (6/16). NGC ID# 24TV, PCGS# 86686
- 5014 1956 Type Two PR69 Deep Cameo PCGS.** A beautiful white-on-black Type Two Deep Cameo, tied for the finest known at either service and conditionally scarce as such. This magnificent Registry coin displays a full strike and seemingly flawless preservation. Population: 63 in 69 Deep Cameo, 0 finer (7/16). NGC ID# 24TW, PCGS# 96697
- 5015 1959 PR68 Cameo NGC.** Virtual perfection shows over both sides of this stunning Franklin cameo with bright silver mirrors and excellent contrast. NGC has only certified six examples finer, and none better have been graded by PCGS (6/16).  
Ex: *Long Beach Signature* (Heritage Auctions, 7/2007), lot 1840. NGC ID# 27VJ, PCGS# 86700
- 5016 1959 PR68 Cameo PCGS.** Outstanding brilliance emanates from both sides of this well struck cameo. When viewed from directly overhead, a white-on-black appearance is noted, as fathomless mirrored fields highlight lightly frosted motifs. Immaculate surfaces enhance the fantastic eye appeal. Population: 38 in 68 Cameo, 0 finer (6/16).  
Ex: *Charlotte Signature* (Heritage Auctions, 3/2007), lot 1185. NGC ID# 27VJ, PCGS# 86700
- 5017 1960 PR68 Deep Cameo PCGS. CAC.** This frosty Superb Gem Deep Cameo proof showcases stark white-on-black contrast with untuned surfaces and liquidlike mirroring in the fields. Eye appeal is exceptional, and finer coins are exceedingly rare. Population: 80 in 68 (2 in 68+) Deep Cameo, 7 finer (7/16). NGC ID# 24TY, PCGS# 96701

---

**1960 Franklin, PR68+ Deep Cameo  
Stellar Contrast and Eye Appeal**

- 5018 1960 PR68+ Deep Cameo PCGS. CAC.** A Registry-grade Deep Cameo example of the proof 1960 Franklin half, showing full definition and deeply mirrored fields. The preservation is virtually perfect, and the eye appeal is correspondingly high. Finer representatives are rarely encountered. Population: 81 in 68 (2 in 68+) Deep Cameo, 7 finer. CAC: 17 in 68 Deep Cameo, none finer (7/16). NGC ID# 24TY, PCGS# 96701
-

**5019 1961 PR68 Deep Cameo PCGS. CAC.** An essentially perfect Superb Gem Deep Cameo proof, this 1961 Franklin half dollar has extraordinary filed-to-device contrast on its brilliant and untuned silver surfaces. Population: 94 in 68 (2 in 68+) Deep Cameo, 1 finer (6/16). NGC ID# 24TZ, PCGS# 96702

**5020 1961 PR68 Deep Cameo PCGS. CAC.** A fully struck high-end Registry coin, showing stark white-on-black contrast and full mint brilliance without any toning. The 1961 proof Franklin half dollar is elusive this well-preserved, and finer pieces are extremely rare. Population: 94 in 68 (2 in 68+) Deep Cameo, 1 finer (7/16). NGC ID# 24TZ, PCGS# 96702

## KENNEDY HALF DOLLARS

**5021 1964 MS67 PCGS. Type Two Reverse.** A hint of almond-gold toning visits thoroughly lustrous and practically pristine surfaces. Struck in vast numbers, but much melted and seldom as close to perfect as the present piece. Population: 54 in 67 (2 in 67+), 0 finer (6/16). NGC ID# 27WH, PCGS# 6706

**5022 1964 MS67 PCGS. Type Two Reverse.** Dramatic golden-brown, cherry-red, and sea-green toning enriches the borders, and is particularly impressive on the obverse. Lustrous and fully struck with only a solitary graze on the right obverse field. Population: 54 in 67 (2 in 67+), 0 finer (6/16). NGC ID# 27WH, PCGS# 6706

**5023 1964 MS67 PCGS. Type Two Reverse.** Lovely bands of caramel-gold, powder-blue, lilac, and ruby-red toning endow the margins of this lustrous and essentially pristine Superb Gem. The strike is bold and the eye appeal is undeniable. Population: 54 in 67 (2 in 67+), 0 finer (6/16). NGC ID# 27WH, PCGS# 6706

### 1967 Kennedy Half, MS67 Rare Top-Grade Example

**5024 1967 MS67 PCGS. 30th Anniversary Green Label Holder.** The circulation strike 1967 Kennedy half dollar is a rarity in Superb Gem condition, wherein the present piece resides. This Registry-grade example displays a sharp strike and satiny mint luster. Light golden and iridescent hues appear around the borders, leaving the interiors essentially brilliant. Population: 19 in 67 (1 in 67+), 0 finer (7/16). NGC ID# 24WJ, PCGS# 6710

### 1967 Kennedy Half Dollar, MS67 Condition Rarity at This Grade Level

**5025 1967 MS67 PCGS.** The 1967 Kennedy half dollar claims a huge mintage of nearly 300 million pieces, but bagmarks and striking problems limit the grade of most examples seen. Struck in 40% silver composition, many specimens have been melted over the years. At the MS67 grade level, the 1967 Kennedy half is a rare issue in today's market. This spectacular Superb Gem is sharply detailed throughout, with virtually pristine lustrous surfaces and vivid greenish-gold toning on the obverse. Eye appeal is terrific. Population: 19 in 67 (1 in 67+), 0 finer (7/16). NGC ID# 24WJ, PCGS# 6710

**5026 1968-D MS67 PCGS.** Nearly imperceptible sky-blue patina adheres to the lustrous surfaces of this gorgeous Superb Gem Kennedy half. All design elements are well-impressed. A few unobtrusive marks may well preclude an even finer grade. Population: 32 in 67, 0 finer (6/16). NGC ID# 24U7, PCGS# 6711

**5027 1968-D MS67 ★ NGC.** The 1968-D is the only circulation-strike Kennedy half dollar struck in that year. This Star-designated Superb Gem is tied for the finest certified and is rare as such. The strike is full, and each side displays unabraded satin luster. Vivid gold, green, crimson, and deep russet toning appears in the left and right margins on each side, leaving a vertical strip of near-brilliance in the centers. Census: 12 in 67 (3 in 67 ★), 0 finer (7/16). NGC ID# 24U7, PCGS# 6711

**5028 1981-D MS67 PCGS.** A delightful Superb Gem, with well-detailed design elements and vibrant mint luster throughout. Delicate shades of golden-tan toning add to the outstanding eye appeal. Housed in a new 30th Anniversary green label holder. Population: 26 in 67, 0 finer (6/16). NGC ID# 24UX, PCGS# 6740

## SMS KENNEDY HALF DOLLARS

**5029 1966 SMS MS67 Ultra Cameo NGC.** A high-end Ultra Cameo example of the 1967 Special Mint Set Kennedy half, showing strong white-on-black contrast, mirrored fields, and untuned surfaces. This Registry-grade example is highly eye-appealing. Census: 71 in 67 Ultra Cameo (1 in 67+), 16 finer (7/16). NGC ID# 24WH, PCGS# 96846

---

**1966 SMS Kennedy Half Dollar, MS68 Ultra Cameo  
None Certified in Higher Numeric Grades**

- 5030** 1966 SMS MS68 Ultra Cameo NGC. The Mint improved the quality of their Special Mint Set offerings considerably in 1966, but relatively few Kennedy halves have been seen with the Ultra Cameo designation. In fact, at the MS68 level, Rick Tomaska considers the 1966 the key date in the series with Ultra Cameo contrast. This magnificent specimen is fully struck and the deeply mirrored fields are deeply reflective, virtually indistinguishable from a proof finish. The brilliant surfaces are impeccably preserved and eye appeal is terrific. Census: 16 in 68 Ultra Cameo (1 in 68+), 0 finer (7/16). NGC ID# 24WH, PCGS# 96846

---

**1967 SMS Half Dollar, SP68 Deep Cameo  
Stark White-on-Black Contrast**

- 5031** 1967 SMS SP68 Deep Cameo PCGS. Tied with just 13 others as the finest Deep Cameo at PCGS (7/16), showing stark white-on-black contrast that is devoid of toning. The strike is full, and the eye appeal is exceptional. Special Mint Set coins come with varying degrees of prooflike qualities, although the present coin is clearly among the finer-known in that regard. NGC ID# 24WJ, PCGS# 96847
- 

## **PROOF KENNEDY HALF DOLLARS**

- 5032** 1964 PR69 Deep Cameo PCGS. There has never been a finer 1964 Kennedy half dollar certified at either PCGS or NGC. This fully brilliant and untuned silver half dollar has exquisite field-to-device contrast with frosty devices and deeply mirrored fields. Population: 84 in 69 Deep Cameo, 0 finer (6/16). NGC ID# 24WF, PCGS# 96800
- 5033** 1964 Accented Hair, FS-401, PR68 Cameo PCGS. Type One Reverse. A fully brilliant and immaculate example of this briefly produced proof subtype. Only a small percentage of Accented Hair half dollars exhibit comparable frost on the portrait and eagle. NGC ID# 24WG, PCGS# 145626 Base PCGS# 86801
- 5034** 1964 Accented Hair, FS-401, PR68 Cameo NGC. Type One Reverse. A fully brilliant and pristine representative. The weak left foot on the I in LIBERTY is associated with this ephemeral introductory subtype. The portrait exhibits outstanding contrast with the glassy obverse field. NGC ID# 24WG, PCGS# 145626 Base PCGS# 86801
- 5035** 1976-S Clad PR70 Deep Cameo PCGS. A scarce top-grade Deep Cameo example of this copper-nickel clad Bicentennial issue, showing a hint of light champagne toning over starkly contrasted design elements and mirrored fields. Eye appeal is spectacular. Population: 90 in 70 Deep Cameo (6/16). NGC ID# B76C, PCGS# 96811

*End of Session Three*

# SESSION FOUR

## EARLY DOLLARS

### 1795 Flowing Hair Dollar, Choice VF Two Leaves, B-4, BB-14

- 5036** 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4, VF35 NGC. A handsome scarcer-variety Flowing Hair dollar. Powder-blue, lilac, and caramel-gold toning adorns minimally marked surfaces. Unimportant flan flaws, as made, are noted near the TE in UNITED and between stars 11 and 12. Rotation beneath a light reveals hints of luster in design crevices. NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853

### 1795 Flowing Hair Dollar, AU Details B-1, BB-21, Two Leaves

- 5037** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Mount Removed — PCGS Genuine. AU Details. Bowers Die State I. A richly toned and lightly circulated example of the perennially popular Flowing Hair dollar. Golden-brown and aquamarine patina encompasses gently shimmering surfaces. No mount is readily apparent, but we note slender marks above the eagle's head and east of the second S in STATES, and moderate field granularity near the L in LIBERTY and the ribbon ends. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

### 1795 Flowing Hair Dollar, Good 6 B-5, BB-27, Three Leaves

- 5038** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Good 6 PCGS. Stone-gray motifs accompany golden-brown, lavender, and cobalt-blue fields. This Flowing Hair type coin has performed its duty in early American commerce, but all letters and stars are distinct, and the wings show some plumage definition. The field near the eagle displays minor abrasions. Housed in a green label holder. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

- 5039** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Obverse Damage — NGC Details. VG. Deep lavender borders and golden-brown fields surround stone-white motifs. A semicircular mark on the central obverse should not be confused with a silver plug. B-5 is the best known 1795 Flowing Hair dollar variety, identified by the straight, slender line behind the uppermost neck curl.

- 5040** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VG10 ANACS. The "bar" behind Liberty's highest neck curl is diagnostic for B-5. This Flowing Hair type coin displays consistent deep olive-brown toning. All legends are bold, and the left (facing) wing exhibits partial plumage detail. Marks are unimportant, although we note a small obverse rim ding at 5 o'clock. The reverse is slightly misaligned toward 8:30. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

### 1795 Flowing Hair Dollar, VF20 Popular B-5, BB-27 Variety

- 5041** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF20 NGC. Bowers Die State II. Deep, gunmetal-gray toning on the obverse yields to lighter, silver-gray toning on the smoothly worn, raised elements. The reverse shows pleasing golden-gray color and well-defined motifs. A glass reveals minor abrasions and light lines, but no adjustment marks on either side of the coin. Shallow rim bumps are noted at 3 and 8 o'clock on the obverse. *From The Collection of Richard W. DeRobertis.* NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

### 1795 Draped Bust Dollar, XF40 Off Center, B-14, BB-51

- 5042** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, XF40 NGC. Bowers-Borckardt Die State I. The obverse die was hubbed slightly off-center, with the bust appearing just left of center on all subsequent coins. This example is well-detailed for the grade, with blended gunmetal-gray, golden, and lavender colors encompassing each side. The strike is bold and well-centered, with no evidence of adjustment marks around the borders. An appealing example of this marginally available variety. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1795 Silver Dollar, Very Fine  
Centered Draped Bust, B-15, BB-52**

- 5043** 1795 Draped Bust, Centered, B-15, BB-52, R.2, VF20 PCGS. Bowers Die State IV. The hair curl below the E in LIBERTY confirms BB-52. A *Guide Book* variety, BB-52 is known as the Centered Bust variety, since the bust is level relative to the its Uncentered Bust BB-51 immediate predecessor. This wheat-gold and gunmetal-blue BB-52 example displays even wear and a minor, narrow lamination near the C in AMERICA. Marks are trivial save for a slight reverse rim knock at 2 o'clock and a thin line between the AT in STATES. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

**1796 Small Date Dollar, XF  
B-4, BB-61, Large Letters**

- 5044** 1796 Small Date, Large Letters, B-4, BB-61, R.3, XF40 NGC. Bowers Die State I. Deep russet, golden-brown, and forest-green shades fill the borders. The fields and motifs are stone-gray. A charming Small Eagle dollar with noticeable luster in protected areas. The wings and curls show ample detail. Marks are minimal, and we note a small rim nick above the T in LIBERTY strictly as an identifier. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

**1796 Dollar, Choice XF  
B-4, BB-61, Small Date**

- 5045** 1796 Small Date, Large Letters, B-4, BB-61, R.3, XF45 NGC. Die State I, the usual state, identified by the complete hair curl drooping downward onto Liberty's forehead. The BB-61 die combination can be readily attributed by the single leaf under the D of UNITED, with TE in STATES close. Another identifier is the raised dotlike die flaw above the 1. The BB-61 die pairing is a nice collectible variety for the numismatist who wants an available early dollar without turning to the ubiquitous 1795 Flowing Hair B-5, BB-27 pieces. This BB-61 boasts excellent eye appeal, a product of attractive, unabraded pinkish-gray surfaces that show no singular marks. Good detailing appears throughout, save for the high points of the eagle's breast.

Ex: *Long Beach Signature* (Heritage, 6/2011), lot 3827. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

**1796 B-4, BB-61 Dollar, Choice XF  
Large Letters, Small Date**

- 5046** 1796 Small Date, Large Letters, B-4, BB-61, R.3, XF45 NGC. Bowers Die State III. Luster emerges from ample portions of this pleasing early dollar. Light to medium caramel-gold and cream-gray toning adorns both sides. No marks are noticeable, though we note the dentils near the L in LIBERTY have an unusual appearance, possibly as made. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

**1796 Large Date Dollar, VF25  
B-5, BB-65, Small Letters**

- 5047** 1796 Large Date, Small Letters, B-5, BB-65, R.2, VF25 PCGS. Breen Die State II. The die break from the I in AMERICA is large but does not touch the letter C. This silver-gray Small Eagle dollar has pleasing definition on Liberty's hair and the eagle's wings. The STA in STATES is softly brought up. Faintly hairlined but free from consequential abrasions. A flan flaw at 5 o'clock on the reverse rim is strictly of mint origin. Certified in a green label holder. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

**1796 Large Date Dollar, VF30  
Small Letters, B-5, BB-65**

- 5048** 1796 Large Date, Small Letters, B-5, BB-65, R.2, VF30 PCGS. Bowers Die State IV. The die break between the IC in AMERICA is well advanced. A cream-gray example with glimpses of steel-blue near the rims. Liberty's hair is well defined for the VF30 level. A few tiny curly stamp impressions are on the central obverse. Short, moderate marks are noted near the left-side stars and the D in UNITED. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

**1797 10x6 Stars Dollar, Choice VF  
Large Letters, B-3, BB-71**

- 5049** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF35 NGC. Bowers Die State II. A charming stone-gray Choice VF representative. No marks are consequential, and the eye appeal is significant for the designated grade. The eagle's belly displays wear, but the wings are well defined. B-3 is the only die marriage in the early dollar series with the stars arranged 10x6. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1798 B-1, BB-82 Dollar, VF30  
Small Eagle, 13 Stars, Gold CAC**

- 5050** 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, VF30 PCGS. Gold CAC. Bowers Die State III. A die crack joins the base of the N in UNITED to the branch. This is the more accessible of two Small Eagle varieties for 1798. The combination of 13 obverse stars and a Small Eagle motif is unique to B-1, BB-82, garnering a separate entry in the *Guide Book* and a loyal following from Early dollar enthusiasts. This strongly defined offering shows steel-gray patina that lightens near the protected areas. Friction over the devices is minimal for the assigned technical assessment, as affirmed by the rarely awarded gold CAC approval sticker. Certified in an old green label holder. Ex: House of Stuart (6/1990).  
**From The Hamilton Collection.** NGC ID# 24X5, PCGS# 40006 Base PCGS# 6867

**1798 Small Eagle, 13 Stars Dollar, XF40  
B-1, BB-82, Old Green Holder**

- 5051** 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, XF40 PCGS. Bowers Die State III. The die crack from (U)N(NITED) to the branch is visible upon close examination. Bowers noted in the revised edition of his *Encyclopedia of United States Silver Dollars 1794-1804* (2013): "EF examples are quite scarce, and any coin in better grade is rare." This transitional variety is popular as the only 13 stars, Small Eagle reverse die pair among all 1798 dollars. Gunmetal-gray surfaces maintain crisp detail despite inconsequential merging over the upper hair strands and breast feathers. Trivial ticks are present on each side, but none of them deserve individual attention. Encapsulated in an old green label holder.  
**From The Hamilton Collection.** NGC ID# 24X5, PCGS# 40006 Base PCGS# 6867

**1798 B-19, BB-106 Dollar, AU53  
Scarce Variety, Condition Census Example**

- 5052** 1798 Large Eagle, Pointed 9, Wide Date, B-19, BB-106, R.5, AU53 PCGS. Ex: Miller. Bowers Die State III. The Bowers *Encyclopedia* plate coin for the BB-106 variety. A bisecting die crack runs vertically from the E in LIBERTY through the portrait and 1 in the date to the rim. Silver luster peeks through attractive gunmetal-gray patina that deepens around the border devices. Abrasions are limited to scattered microscopic lines and a small dig beneath Liberty's drapery folds. Sharp definition remains throughout this pleasing About Uncirculated example, listed among the Bowers Notable Specimens and tied at the low end of the Condition Census for the variety. NGC ID# 24X6, PCGS# 40023 Base PCGS# 6877

**1798 Large Eagle Dollar, AU53  
Scarce B-21, BB-107 Variety**

**5053** 1798 Large Eagle, Pointed 9, 10 Arrows, B-21, BB-107, R.5, AU53 PCGS. Bowers Die State II, with a "tadpole" die break above 79. The obverse die was initially used to strike BB-102 and BB-103 dollars, while the reverse was later used to strike BB-108. Bowers' *Encyclopedia of United States Silver Dollars 1794-1804* (2013) estimates that perhaps 25 to 50 examples survive across all AU grades with as many as three Mint State examples finer, placing this CAC-endorsed AU53 dollar among the top available representatives of this challenging variety. Glowing ivory-gray surfaces enjoy razor-sharp detail everywhere aside from the eagle's neck. The slightest trace of friction on the cheek defines the grade, and a thin planchet flaw extends from the I in LIBERTY to the hair. Encapsulated in an old green label holder.

Ex: Larry Whitlow (10/1987).

**From The Hamilton Collection.** NGC ID# 24X6, PCGS# 40024 Base PCGS# 6876

**5054** 1798 Large Eagle, Pointed 9, B-10, BB-109, R.5 — Repaired — PCGS Genuine. XF Details. A very scarce die marriage distinguished by a radial die crack from the right serif of the L in LIBERTY. This snow-white and charcoal-gray representative has been cleaned, and the obverse field is smoothed. NGC ID# 24X6, PCGS# 40026 Base PCGS# 6873

**1798 Large Eagle Dollar, Pleasing VF35  
B-11, BB-111, Pointed 9**

**5055** 1798 Large Eagle, Pointed 9, B-11, BB-111, R.3, VF35 PCGS. Ex: Miller. Bowers Die State V. Warren Miller had several examples of the BB-111 variety in varying die states. Both his early and late die state coins were in higher grade, yet this mid-state coin is Choice in its own right. Gold toning accompanies areas of iridescence that include blue, lilac, and orange shades. Sharp definition remains on the both sides despite a prominent raised die crack from the rim to the underside of Liberty's chin, with another crack in the hair above the ear. The field stars, clouds, and eagle's wing tips are equally sharp. Glimpses of mint luster remain beneath the overall gray-gold patina. NGC ID# 24X6, PCGS# 40028 Base PCGS# 6873

**1798 Heraldic Eagle Dollar, XF40  
B-15, BB-112, Pointed 9**

**5056** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, XF40 PCGS. CAC. Ex: Hesselgesser. Bowers Die State III. A charming cream-gray representative. No marks are noticeable, and luster emerges from design elements. Liberty's cheek and shoulder display moderate wear. Dr. Robert D. Hesselgesser amassed one of the finest collections of early dollars by die variety. His PCGS Registry Set was retired in 2011. NGC ID# 24X6, PCGS# 40029 Base PCGS# 6877

**1798 B-5, BB-112 Dollar, AU50  
Heraldic Eagle, Pointed 9**

**5057** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, AU50 NGC. Bowers Die State III. This scarcer variety early dollar offers sea-green borders, golden-brown fields, and steel-gray devices. Refreshingly devoid of post-strike abrasions, but a couple of granular areas are noted on the lower half of the obverse. The left obverse exhibits several moderate adjustment marks, as made. NGC ID# 24X6, PCGS# 40029 Base PCGS# 6877

**1798 Heraldic Eagle Dollar, Sharp AU53  
B-15, BB-112, Pointed 9, Wide Date**

**5058** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, AU53 PCGS. Bowers Die State II. The reverse is struck slightly off-center southwest, with broad dentils at the upper right edge. Sharply struck but from lapped dies, where stars 1 and 13 appear smaller than the others and the date is weak from the lapping. Crisp definition remains on the rest of motifs, with bold hair strands and upper curls on Liberty and a sharply struck eagle. Mint luster resides in protected areas while blue and orange accents lend appeal to the semireflective silver surfaces.

**From The Hamilton Collection.** NGC ID# 24X6, PCGS# 40029 Base PCGS# 6877

**1798 B-28, BB-118 Bust Dollar, AU53  
Bowers Plate Coin**

- 5059** 1798 Large Eagle, Pointed 9, Close Date, B-28, BB-118, R.3, AU53 PCGS. Ex: Miller. Bowers Die State II. Actually, an intermediate state between I and II, with a single die crack to the left of the eagle's tail and only a slight hint of a developing second crack parallel to the initial one. The Bowers reference describes AU or finer examples as rare, and accordingly this very piece makes the list of Notable Specimens. A generous amount of mint luster survives on the golden-gray and lilac surfaces that cover both sides of the coin. The variety is sharply struck in most regards, yet weakness at the middle field stars exemplifies the reverse of BB-118 — the sole use of the reverse die. This is the Bowers *Encyclopedia* plate coin for the variety. NGC ID# 24X6, PCGS# 40035 Base PCGS# 6873

**1798 B-29, BB-119 Dollar, XF45  
Large Eagle, Pointed 9, Scarce Die Pair**

- 5060** 1798 Large Eagle, Pointed 9, Close Date, B-29, BB-119, R.4, XF45 PCGS. Ex: Miller. Bowers Die State II. Brief glimpses of mint luster remain on this Choice XF example of the scarce BB-119 die pair. After numerous uses, the obverse die was retired after striking the variety, while the reverse die was used again to strike BB-120. As one might imagine, the obverse is softly struck from the worn and cracked die (as are all examples of the variety). Silver-gray surfaces show a speckling of powder-gray patina on both sides, but no heavy abrasions or adjustment marks. NGC ID# 24X6, PCGS# 40036 Base PCGS# 6873

**1798 Heraldic Eagle Dollar, VG8  
B-12, BB-120, Wide Date  
Struck 15% Off Center**

- 5061** 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4 — Struck Off-Center — VG8 ANACS. Bowers Die State III. Struck 15% off center toward 10:30. About half of UNITED and almost half of LIBERTY are off the flan. Complete dentilation and an upset rim are present near 4:30 on the obverse and opposite at 1:30. An unblemished slate-gray example with softer definition near Liberty's chin and the central reverse stars. Widely off center early dollars are undeniably rare. Certified in a small-sized holder. *From The Hamilton Collection.* NGC ID# 24X6, PCGS# 40037 Base PCGS# 6877

**1798 B-12, BB-120 Silver Dollar, VF25  
Double Struck Reverse**

- 5062** 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4, VF25 PCGS. **Double Struck.** Ex: Miller. Bowers Die State IV. The double strike mint error is surprisingly present solely on the reverse. Apparently, two planchets were inserted into the screw press and received an initial one-sided impression, then each coin was individually struck again. The obverse shows only slight doubling at the date, suggesting it was insulated from the first strike, with minor bounce doubling in the date area from a second trip through the press. The reverse, however, displays broad doubling throughout the motifs, having been fully struck twice. The second strike produced the dominant image. Even without the double strike, this coin is a scarce 1798 variety. The surfaces are richly toned in shades of brown with only minor post-mint abrasions. Sharp detail remains across the fascinating surfaces of this Bust dollar, a rare Heraldic Eagle double strike sure to rouse the interest of specialists. (While technically a unique mint error coin, somewhere its "twin" may exist with a broadly doubled obverse and a single-strike reverse.)

**1798 B-9, BB-121 Dollar, VF30  
Large Eagle, Struck 3% Off-Center**

- 5063** 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4 — Struck 3% Off-Center — VF30 PCGS. Ex: Harrison Phillips Collection. Bowers Die State I. A die crack joins the rim to the O in OF. Struck 3% off-center toward 9 o'clock. All obverse stars are clear, while the tops of ITED ST are fractionally cut off. Colloquially referred to as the "Amateur Diecutter's Reverse," BB-121 is attributed by the sloppy star arrangement on the reverse. Bowers estimates a survivorship of about 300 to 500 coins, mostly in lower circulated grades. This well-circulated, stone-gray dollar maintains clear portrait detail and bold legends. The central portion of the eagle is smooth.  
*From The Hamilton Collection.*

**1798 Heraldic Eagle Dollar, Choice XF  
B-9, BB-121, Pointed 9**

- 5064** 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4, XF45 PCGS. Bowers Die State IV. An original gunmetal-gray, cobalt-blue, and autumn-brown example of this scarcer Bolender variety. A well-defined piece with minor wear on Liberty's cheek and shoulder. The sole remotely mentionable mark is a faint straight line on the portrait, visible only upon rotation beneath a light. NGC ID# 24X6, PCGS# 40038 Base PCGS# 6873
- 5065** 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, Fine 12 ANACS. Bowers Die State V. Deep cream-gray and gunmetal toning encompasses this first-year Heraldic Eagle dollar. No marks are of singular significance, although the surfaces have a cloudy appearance. NGC ID# 24X6, PCGS# 40039 Base PCGS# 6873

**1798 B-8, BB-125 Silver Dollar  
Large Eagle, Pointed 9, Fine 15  
Rare Double Struck Mint Error**

- 5066** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2 — Double Struck — Fine 15 ANACS. Bowers Die State II. A rarely encountered double struck early dollar. The second strike was shifted northwest a few degrees from the first strike. Evidence of the double strike is prominent on both sides, particularly on the peripheral stars and legends. This silver-gray representative has a small rim cut at 5:30 on the reverse but is otherwise pleasing. Housed in a small-sized holder.  
*From The Hamilton Collection.* NGC ID# 24X6, PCGS# 40042 Base PCGS# 6873

**1799/8 B-3, BB-141 Dollar, XF40  
Blundered 15 Stars Reverse**

- 5067** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, XF40 PCGS. Bowers Die State III. Gunmetal-gray fills the majority of this better variety early dollar, although a window of brilliance is noted on Liberty's face and the nearby field. Marks are minor, and mostly relegated to Liberty's neck. B-3 combines the overdate with the blundered 15 Stars reverse. The engraver entered too many stars above the eagle, then attempted to conceal his mistake by enlarging the peripheral clouds. Nonetheless, tell-tale star points emerge from the bottom of the oversized clouds. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

**1799/8 Dollar, Choice XF  
15 Stars Reverse, B-3, BB-141**

- 5068** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, XF45 PCGS. Bowers Die State IV, with numerous cracks around the reverse. This obverse was the only overdate die employed during the year, used to produce BB-141, BB-142, and BB-143. The reverse has 15 stars above the eagle, two of which are mostly hidden in the clouds. The stars, legends, wingtips, and tailfeathers are razor-sharp, though the upper hair curls and neck feathers are incomplete. Small ticks occur in the fields, and an area of speckled toning appears near the Y and star 8. Light silver surfaces display golden color around the reverse edges. Certified in an old green label holder.  
*From The Hamilton Collection.* NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

1799/8 B-1, BB-142 Dollar, XF40  
13 Stars Reverse

**5069** 1799/8 13 Stars Reverse, B-1, BB-142, R.4, XF40 PCGS. Bowers Die State III with advanced die deterioration localized to the I in AMERICA. The upper reverse exhibits heavy cracks. An attractive silver-gray overdated dollar without any reportable abrasions. Luster rolls across the curls, plumage, and borders. The strike shows selected softness on the upper right reverse stars, as often seen on Heraldic Eagle Bust dollars. NGC ID# 24X8, PCGS# 40065 Base PCGS# 6884

**5070** 1799 Irregular Date, 13 Stars Reverse, B-15, BB-152, R.3, Fine 12 ANACS. Deep cobalt-blue and walnut-brown patina encompasses this moderately granular Heraldic Eagle dollar. Nicely detailed for the Fine grade, with most of E PLURIBUS UNUM readable. Noticeable marks are confined to a small rim knock over the IB in LIBERTY. Housed in an ANA cache holder. NGC ID# 24X7, PCGS# 40045 Base PCGS# 6879

1799 B-4, BB-153 Dollar, AU55  
15 Stars Reverse, Irregular Date

**5071** 1799 Irregular Date, 15 Stars Reverse, B-4, BB-153, R.4, AU55 PCGS. Ex: Miller. Bowers Die State II. An amazing display of obverse die cracks characterize the final use of the obverse die. The reverse, in contrast, is in its first use of the famous Hidden Star engraver's blunder, with two extra field stars poorly hidden behind a pair of saggy clouds. The BB-153 also features the head-scratching placement of the two 9s in the date — the first 9 tipped too-far left at the top and the second 9 leaning to the right, and both digits out-of-step with the properly aligned 17. Deep olive-gray and blue toning covers both sides of this scarce, Choice About Uncirculated variety, with smooth fields and a notably sharp reverse. The Bowers *Encyclopedia* plate coin. NGC ID# 24X7, PCGS# 40062 Base PCGS# 6879

1799 Silver Dollar, B-18, BB-154, AU53  
Much Luster Remains

**5072** 1799 7x6 Stars, B-18, BB-154, R.4, AU53 PCGS. Ex: Miller. Bowers Die State IV. Mottled golden-gray toning does not diminish the nearly complete mint luster that remains on this briefly circulated dollar. BB-154 is the second-rarest die pair of the many 1799 varieties, exceeded only by the BB-151 Irregular Date pairing. Multiple die cracks occupy the reverse circumference, all of them in an advanced state and quite spectacular. As one would expect, the reverse die life was short and it was used to strike the BB-154 only. The gleaming silver surfaces suggest a finer grade, while central weakness of strike contributes to the assigned About Uncirculated designation. An exceptional coin for the variety specialist. NGC ID# 24X7, PCGS# 40046 Base PCGS# 6878

1799 B-7a, BB-156 Silver Dollar, Album-Toned AU55  
Bowers *Encyclopedia* Plate Coin

**5073** 1799 7x6 Stars, B-7a, BB-156, R.4, AU55 PCGS. Ex: Miller. Bowers Die State III. An encircling network of fine die cracks begins at ERICA of AMERICA and runs throughout the legend and lower reverse devices. Faint die clashing is visible on the obverse with a lens. The late die state is scarce, yet the real attraction is the BB-156 variety, which is very scarce in high grades. This Choice About Uncirculated example ranks high in the Condition Census for the variety. Colorful gunmetal-blue and amber-gold toning at the margins surrounds silver centers. The coin is sharply struck on both sides with strong hair definition and feathering on the eagle's breast that is nearly complete, save for a touch of rub. Only tiny marks are distributed across the appealing surfaces. NGC ID# 24X7, PCGS# 40048 Base PCGS# 6878

**1799 B-11a, BB-161 Draped Bust Dollar  
Advanced, Near-Terminal Die State**

- 5074** 1799 7x6 Stars, B-11a, BB-161, R.3, VF35 NGC. CAC. Bowers Die State "IV." No Berries reverse, a *Guide Book* variety. Both the obverse and reverse dies were used on multiple varieties, the berries lost through lapping and relapping of the dies. Remnants of die clashing remains on both sides. Charcoal-gray toning mixes with deep, lilac-gray patina with hints of iridescence. The devices are well-defined for the Choice VF grade, with strong rims and dentils and only minor marks from circulation. Heavy die cracks on the reverse include and internal break below the beak. Housed in a prior generation NGC holder (pre-hologram and pre-barcode). CAC endorsed.

Ex: *Lee Numismatics* (3/1988).

**From The Hamilton Collection.** NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

**1799 Draped Bust Dollar, XF40  
7x6 Stars, B-11, BB-161**

- 5075** 1799 7x6 Stars, B-11, BB-161, R.3, XF40 NGC. CAC. Bowers-Borckardt Die State II. The upper left corner of U in UNITED is defective, there are no berries in the olive branch, and star 8 is fairly close to Y in LIBERTY, identifying the BB-161 variety. This attractive XF specimen retains much interior detail in Liberty's hair and shows the diagnostic die crack on the reverse, near D in UNITED. Medium-intensity shades of gray and golden-brown toning blanket the lightly abraded surfaces.

**From The Hamilton Collection.** NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

**1799 B-11a, BB-161 Draped Bust Dollar  
Choice XF, 'No Berries' *Guide Book* Reverse**

- 5076** 1799 7x6 Stars, B-11a, BB-161, R.3, XF45 PCGS. Bowers Die State III. A group of three prominent die cracks on the reverse and the lack of any berries on the olive branch identify this *Guide Book* variety. Both the obverse and reverse dies saw multiple uses, with lapping and relapping of the dies responsible for the berryless feature minimized die clashing on the obverse. Bluish-gray overtones on the orange-gold surfaces allow traces of mint luster to glimmer beneath the rich patina. Well-struck for the Choice XF level, with a few small contacts and thin lines but no individually notable distractions. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

**1799 Draped Bust Dollar, XF40  
7x6 Stars, B-8, BB-165**

- 5077** 1799 7x6 Stars, B-8, BB-165, R.3, XF40 PCGS. CAC. Bowers-Borckardt Die State II. The highest curl of hair is centered under the right half of E in LIBERTY and some die flaws show at the top of the second S in STATES, identifying the BB-165 variety. This lightly worn XF specimen retains much interior detail intact in the hair and drapery. The lightly abraded surfaces are blanketed in dusky shades of russet-gold and blue-steel toning. Housed in a green label holder.

Ex: *Purchased from Lee Numismatics* on 10/9/1987 for \$1,200.

**From The Hamilton Collection.** NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

- 5078** 1799 7x6 Stars, B-9, BB-166, R.1, VF30 PCGS. Bowers Die State II. B-9 is known as the "Apostrophe" variety, due to the die break northeast of the second S in STATES. The break is fairly small on the present midgrade example. The cream-gray and gunmetal surfaces are mildly glossy and free from noticeable abrasions. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

**1799 B-9, BB-166 Draped Bust Dollar, XF45  
Remarkable Double Strike, Rotated**

- 5079** 1799 7x6 Stars, B-9, BB-166, R.1, XF45 PCGS. Double Struck, Rotated. Ex: Miller. Bowers Die State II. BB-166 struck from perfect dies is rare (possibly unknown), while this example is struck from the scarce, slightly later state with the obverse crack beneath 1 just starting, and likewise the “apostrophe” crack after the second S in STATES barely visible. The main attraction of this Choice XF early dollar is the double strike, rotated approximately 120° from the initial strike. While the first strike was largely eliminated by the subsequent impression, bold remnants remain beneath the second strike particularly at the borders of both sides. The four digit initial date is nearly entirely visible beneath stars 5 to 7. Likewise, STATES is sharply visible beneath UNITED. All early dollar errors are rare and eagerly sought by both series and error specialists. Ex: Hain Family Collection, Part II (Stack’s, 1/2002), lot 1518; The Warren Miller Collection.

**1799 7x6 Stars Dollar, Choice AU  
B-9, BB-166, ‘Apostrophe’ Variety**

- 5080** 1799 7x6 Stars, B-9, BB-166, R.1, AU55 PCGS. Bowers Die State II. Silver-gray and straw-gold toning blankets this partially lustrous and unobtrusively abraded Heraldic Eagle type coin. B-9 is known as the “Apostrophe” variety for its slender vertical reverse break at 12:30. An early die state without most of the eventually several obverse die cracks. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878
- 5081** 1799 7x6 Stars, B-21, BB-169, R.3 — Rim Repair — NGC Details. XF. Bowers Die State IV. The reverse rim is filed between 2 and 4 o'clock, and repaired at 3:30 on the reverse. A few other slight rim knocks are present, the most apparent at 11 o'clock on the obverse. Otherwise, a nicely defined and attractive cream-gray example with hints of tan-gold in protected areas. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

**1799 7x6 Stars Dollar, AU53  
B-21, BB-169, Latest Die State**

- 5082** 1799 7x6 Stars, B-21, BB-169, R.3, AU53 PCGS Secure. Bowers Die State V. A distinctive die crack shows from the rim, through the last two numerals in the date, through the bust, and on to star 11. The crack branches at the drapery to form a parallel crack that runs from the bust through stars 13 to 11. Several other die cracks are evident as well as widespread die rust on both sides, indicative of the latest state of the BB-169 dies. Only slight wear exists on the well-detailed devices, with still-lustrous surfaces and grayish-gold patina. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

**1800 Draped Bust Dollar, XF45  
Very Scarce B-1, BB-181 Variety**

- 5083** 1800 B-1, BB-181, R.5, XF45 PCGS. Ex: Miller. Bowers Die State I. The Bowers plate coin for the BB-181 variety. A Choice and still-lustrous example of the scarce die pair, which is unknown in full Mint State. Slate-gray accents occupy the central obverse surrounded by vibrant, khaki-gold undertones illuminated by an exceptional amount of remaining mint luster. The reverse is less densely toned, yet well-balanced with the obverse in coloration and equally vibrant for the XF level. Marks are minor for the moderate circulation. A minor rim bump is noted above AT of STATES that serves to pedigree the piece, which is a strong Condition Census representative of the challenging variety. NGC ID# 24X9, PCGS# 40067 Base PCGS# 6887

**1800 Draped Bust Dollar, Notable XF45  
Scarce B-4a, BB-186, Late Die State**

- 5084** 1800 B-4a, BB-186, R.4, XF45 PCGS. Ex: Miller. Bowers Die State III (Bolender 4a). Die flaws at ES of STATES confirm the reverse die, which was employed for the BB-184, BB-185, and BB-187 varieties as well. The obverse is unique to BB-186, where it sustained heavy obverse die cracks that ended the useful life of the die. A bold crack from the top rim runs between IB of LIBERTY into the hair, while an equally impressive crack branches through 18 of the date and travels in an arc through the 1, through the bust, and terminates at star 12. Additional cracks exist at star 1 to the ribbon and at the points of stars 10 to 12. This is a Choice XF example, softly struck on the obverse as always, but still-lustrous at the margins. Warm, powder-gray toning covers the devices and contrasts with the silver-gray fields for great eye appeal. NGC ID# 24X9, PCGS# 40072 Base PCGS# 6887

**1800 B-16, BB-187 Silver Dollar, VF35  
Intermediate Die State**

- 5085** 1800 B-16, BB-187, R.2, VF35 NGC. Bowers Die State III. This example has the curved die crack through the right side of the second 0 to the drapery, chin, and star 10, and die flaws at the tops of ES in STATES continuing along the border half way to the O in OF. Lustrous ivory surfaces exhibit steel-gray and light blue toning splashes on both sides. NGC ID# 24X9, PCGS# 40073 Base PCGS# 6887

**1800 Draped Bust Dollar, AU50  
B-16, BB-187, Close Date**

- 5086** 1800 B-16, BB-187, R.2, AU50 PCGS. Ex: Miller. Bowers Die State III. The BB-187 is a readily available variety in circulated conditions, although it is quite scarce in Mint State. This About Uncirculated example from the renowned Warren Miller Collection is an enticing alternative. The 18 of the date sits low, pitches right, and seems askew from the 00. Rich, olive-gray toning blankets both sides and deepens at the margins. Abrasions are minimal and a pleasingly sharp strike attends the motifs. NGC ID# 24X9, PCGS# 40073 Base PCGS# 6887

**1800 B-10, BB-190 Dollar, AU53  
Wide Date, Low 8**

- 5087** 1800 Wide Date, Low 8, B-10, BB-190, R.3, AU53 NGC. Ex: Durango Collection. Bowers Die State VII. The obverse displays shades of stone-gray along with a blush of autumn-brown near 12 o'clock. The reverse displays ample navy-blue toning, though chestnut-gold and dove-gray are also apparent. This well-defined example is minimally marked save for a small rim knock below the 1 in the date.  
Ex: *Denver Signature* (Heritage, 8/2006), lot 3692, which realized \$6,325. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

**1800 Dollar, Attractive XF40  
B-19, BB-192, AMERICA I**

- 5088** 1800 AMERICA I, B-19, BB-192, R.2, XF40 PCGS. Bowers Die State IV. The famous AMERICA I reverse, showing a linear die gouge after the final A on the reverse. The present example is boldly struck and lightly circulated, without distracting adjustment marks. The interiors show pleasant lavender-gray color, while the borders have aquamarine toning. The surfaces are smooth and problem-free. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

**1800 B-19, BB-192 Dollar, XF45  
AMERICA I Guide Book Variety**

- 5089** 1800 AMERICA I, B-19, BB-192, R.2, XF45 NGC. Bowers Die State IV. Golden-tinted luster illuminates the legends and stars on this *Guide Book* variety silver dollar. The final "I" in AMERICA I is actually a mint-made die scratch. The breast feathers show wear, but marks are inconsequential, and we note a rim nick on the reverse at 4:30 strictly as an identifier. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

**5090** 1800 B-13, BB-193, R.3 — Smoothed — PCGS Genuine. VF Details. Bowers Die State I. Only about 10% of BB-193 dollars are “perfect dies” examples without clash marks near OF. This silver-gray representative is well-defined for the VF level, but the fields have been carefully smoothed to remove abrasions. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

**5091** 1800 B-13, BB-193, R.3, VF35 PCGS. Bowers Die State II. Richly iridescent at the borders with olive-gray overtones on the obverse and patches of silver luster along the margins, the reverse shows shades of blue and rainbow colors that surround silver-gray centers. Pleasing definition remains on this Choice VF example. In its early die states, the BB-193 variety lacks the crescent-shaped obverse die cracks that curve outward from the stars left and right of Liberty. This example shows only minor marks with excellent eye appeal. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

**1801 Dollar, B-3, BB-213, AU53  
Partial Luster Remains**

**5092** 1801 B-3, BB-213, R.3, AU53 PCGS. Bowers Die State II. The BB-213 variety becomes increasingly elusive in the finer circulated grades, and any Mint State 1801 dollar is a rarity. This AU representative retains soft luster in the protected regions of the fields with soft lavender-gold color. The strike is bold and wear is light. Portions of the outer peripheries show attractive sky-blue color. There are no obvious adjustment marks. Population (all varieties included): 18 in 53, 35 finer (7/16). NGC ID# 24XA, PCGS# 40085 Base PCGS# 6893

**1801 Draped Bust Dollar, AU53  
B-3, BB-213 Variety**

**5093** 1801 B-3, BB-213, R.3, AU53 PCGS. CAC. Bowers-Borckardt Die State II. The 1801 Draped Bust dollar is scarce as a date, from a reported mintage of 54,454 pieces. Two obverse and four reverse dies were used to strike the four known die varieties of the date. This coin represents the BB-213 variety, with the first 1 in the date away from the curl and a star point touching the upper part of the eagle's beak. This attractive AU53 specimen shows just a touch of wear on the sharply detailed design elements and the lightly abraded surfaces retain traces of original mint luster, under shades of gunmetal-gray and greenish-gold toning. Housed in a green label holder. Ex: Purchased from “Cairns” on 7/8/1989 for \$7,200. From The Hamilton Collection. NGC ID# 24XA, PCGS# 40085 Base PCGS# 6893

**1801 B-4, BB-214 Dollar, Choice AU  
Light Golden Toning**

**5094** 1801 B-4, BB-214, R.4, AU55 NGC. Ex: Durango Collection. Bowers Die State III. This sharp example displays bright luster throughout the borders and motifs. Light butter-gold toning visits both sides. Smooth save for a trio of thin vertical field lines east of the tail feathers. An important example of B-4, the scarcest regular issue 1801 variety. NGC ID# 24XA, PCGS# 40086 Base PCGS# 6893

**1802/1 B-3, BB-234 Bust Dollar, XF45  
Faint Double Strike, Bold Overdate**

**5095** 1802/1 Wide Date, B-3, BB-234, R.3 — Rotated Double Struck — XF45 PCGS. Ex: Miller. Bowers Die State II. A pellet-like die lump in the field beneath stars 8 and 9 identifies both the BB-234 variety and die state. The overdate is clear and prominent on BB-234. Most of the initial strike was eliminated with the subsequent strike, yet ghostly outlines of extra right-side stars confirm the obverse double strike. A trace of the double strike on the reverse is visible near the first A in AMERICA. Traces of gold luster remain beneath silver-gray and pale-tan toning with a few bluish-gray accents. Sharp definition remains on Liberty's hair, drapery folds, the field stars, and some of the eagle's breast feathers. A few light lines are noted, plus two small planchet defects — one near the chin, the other beneath L of LIBERTY. NGC ID# 24XC, PCGS# 40094 Base PCGS# 6899

**1802/1 Wide Date Dollar, Choice AU  
B-3, BB-234, Attractive Surfaces**

**5096** 1802/1 Wide Date, B-3, BB-234, R.3, AU55 NGC. Bowers Die State III with faded “wave” clash marks above the date. The die lump below obverse star 8 is the best identifier. A butter-gold and pearl-gray example that boasts substantial luster and smooth surfaces. Only a faint line above the ES in STATES merits mention. Although outside the condition census (five best) for BB-234, the present piece would be a highlight of most collections of early dollars. NGC ID# 24XC, PCGS# 40094 Base PCGS# 6899

**1803 B-5, BB-252 Small 3 Dollar, VG10  
Double Struck Obverse**

- 5097** 1803 Small 3, B-5, BB-252, R.3 — Rotated Double Struck — VG10 PCGS. Ex: Miller. Bowers Die State I. The obverse is sharply doubled at the date, the right-hand stars, and at TY of LIBERTY but any evidence of doubling elsewhere on the coin is less well-defined. Light anomalies above AMERICA suggest doubling was once visible on the reverse legend of this well-circulated early dollar. The right-side obverse spread remains obvious to the unassisted eye. An exceptional early dollar error to represent the Small 3, BB-252 variety — smoothly worn with golden-gray patina, rare and desirable. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

**SEATED DOLLARS**

- 5098** 1840 AU53 PCGS. OC-3, R.3. Per Osburn and Cushing, the die pair for the present business variety first coined original proofs (OC-P3), then struck commercial pieces. This well-defined example displays medium peach-gold patina and the expected number of small field marks. Rim nicks are noted on the reverse at 3 o'clock and the obverse at 7 o'clock. NGC ID# 24YA, PCGS# 6926
- 5099** 1841 AU58 PCGS. OC-2, R.1. Deep golden-brown, sea-green, and stone-gray toning blankets this second-year Borderline Uncirculated Seated dollar. Nicely struck and satiny with lightly marked underlying surfaces. NGC ID# 24YB, PCGS# 6927
- 5100** 1842 AU58 PCGS. OC-3, R.2. An untuned and semiprooflike No Motto type coin. The moderately marked surfaces are boldly struck. Die polish lines near Liberty's lower wrist are a key diagnostic for OC-3, along with die lines in the leftmost field panel of the eagle's shield. NGC ID# 24YC, PCGS# 6928

**1844 Dollar, Near-Mint  
Better Low-Mintage Date**

- 5101** 1844 AU58 PCGS. OC-1, R.2. Deep cobalt-blue, cream-gray, and chestnut toning blankets this nearly Uncirculated representative. The strike is good and marks are relatively few and minor. Liberty's shield is die doubled; the so-called "Quad Stripes" variety. All 20,000 commercial strikes were coined from the same die pair. Population: 27 in 58, 31 finer (7/16). NGC ID# 24YE, PCGS# 6930

**1844 Seated Dollar, AU58  
Partially Reflective Fields**

- 5102** 1844 AU58 PCGS. CAC. Despite its small mintage of 20,000 pieces, the 1844 Seated dollar is among the more collectible No Motto type coin issues from this decade. This nearly Mint State example displays mottled lavender-gray, champagne, and sky-blue hues over each side, with bold relief elements and semiprooflike fields in the protected areas. Eye appeal is pleasing. Population: 27 in 58, 31 finer (7/16). NGC ID# 24YE, PCGS# 6930

**1845 Seated Liberty Dollar, AU58  
Rare Issue in Higher Grades**

- 5103** 1845 AU58 PCGS Secure. OC-1, R.2. Only 24,500 Seated Liberty dollars were struck in 1845, using a single pair of dies to strike all the regular-issue production (there are also two obverse dies and one reverse die that were used to strike proofs of this date). This attractive near-Mint specimen shows just a trace of wear on the sharply detailed design elements, and the lightly abraded surfaces retain much of their original mint luster. Highlights of golden-tan toning enliven both sides. Population: 13 in 58, 17 finer (5/16). NGC ID# 24YF, PCGS# 6931

**1845 Dollar, MS60  
Challenging in Mint State**

- 5104** 1845 MS60 NGC. OC-1, R.2. This is the only die pair used to coin 24,500 business strikes. The 1845 is a significant rarity among P-mint Seated dollars from the 1840s in mint condition. Both sides of this well-defined example are mostly brilliant, although suggestions of light golden color become evident as the coin turns away from the light. The luster is subdued, and there is one mark of note in the upper reverse field. Census: 3 in 60, 17 finer (6/16). NGC ID# 24YF, PCGS# 6931

- 5105 1846 AU58 PCGS. OC-2.** A prooflike and essentially brilliant Borderline Uncirculated representative. The strike is good and the mildly bright surfaces are refreshingly unabraded. The late die state is unlisted at the Osburn/Cushing website, and includes a delicate crack through MERICA and the upper arrowheads. NGC ID# 24YH, PCGS# 6932

**1846-O Dollar, Near-Mint  
First New Orleans Dollar Issue**

- 5106 1846-O AU58 PCGS. OC-1, R.2.** The first New Orleans silver dollar issue is also the rarest. From the initial mintage of 59,000 pieces, few survive in near-Mint condition. This golden-brown and lavender representative displays minimal wear. Marks are chiefly confined to a field cluster near Liberty's raised wrist. Housed in an old green label holder. Population: 16 in 58, 24 finer (7/16). NGC ID# 26GG, PCGS# 6933

**1846-O Silver Dollar, MS61  
Low-Mintage Branch Issue**

- 5107 1846-O MS61 NGC. OC-1, R.2.** An important Mint State example of this low-mintage issue, the first of the series from the New Orleans Mint. The satiny surfaces are essentially brilliant and display fewer marks than anticipated for the grade. All 59,000 pieces were coined from the same pair of dies. Census: 5 in 61, 11 finer (6/16). NGC ID# 26GG, PCGS# 6933

**1846-O Seated Dollar, MS62  
First New Orleans Issue**

- 5108 1846-O MS62 PCGS Secure.** Only a few branch mint issues exist in the Seated Liberty silver dollar series. The New Orleans Mint produced these coins in 1846, 1850, 1859, and 1860. At San Francisco, issues included the 1859-S, the 1870-S rarity, 1872-S, and the non-existent 1873-S. The Carson City Mint struck silver dollars each year from 1870 to 1873. A set of the 10 collectible issues will pose quite a challenge. One of those is the 1846-O that is offered here. This lovely Mint State piece has soft, frosty silver luster with light gold toning and typical design weakness along the right side of the obverse. Population: 10 in 62, 11 finer (5/16). NGC ID# 26GG, PCGS# 6933

**1848 Silver Dollar, AU58  
Rarely Seen Finer**

- 5109 1848 AU58 PCGS.** The 1848 Seated dollar comes from a mintage of 15,000 pieces and is rarely seen in Mint State. This nearly Uncirculated example displays well-detailed design elements set against semireflective fields. Pastel lavender and champagne hues deliver pleasing eye appeal. There are no major distractions. Population: 22 in 58, 27 finer (7/16). NGC ID# 24YK, PCGS# 6935

**1853 Silver Dollar, MS62  
OC-1, 'Chin Whiskers' Variety**

- 5110 1853 MS62 PCGS. OC-1, R.2.** Apricot-tinged luster embraces the borders and designs. The fields are toned cream-gray. This nicely struck silver dollar has a good strike and a smooth obverse field. Minor marks on the Liberty's left (facing) arm and the upper reverse field correspond to the third party grade. The "Chin Whiskers" variety with horizontal die lines below Liberty's jaw. NGC ID# 24YS, PCGS# 6941

**1853 Seated Dollar, MS62  
Lustrous, Lightly Toned**

- 5111 1853 MS62 PCGS. OC-1, R.2.** Osburn-Cushing Die State c/b. Lightly clashed dies, visible on the obverse and heavy die polish lines in the reverse shield help confirm the sole business-strike die pair. Best considered a semikey date, the 1853 mintage of 46,110 pieces marked a return to somewhat normal silver dollar production at the Mint. The surfaces of this example are satiny and partially reflective, with pleasing steel-blue accents over lustrous pale-gold patina. A sharply defined example except for a few of the right-side stars. Population: 21 in 62, 46 finer (6/16). NGC ID# 24YS, PCGS# 6941

**5112 1859-O AU58 PCGS. OC-1.** OC die state b/e. Most 1859-O Seated dollars with substantial luster are thoroughly bagmarked, but the present piece is only moderately abraded, principally on the upper reverse field. Butter-gold toning adorns the peripheries of this well struck New Orleans type coin. NGC ID# 24YY, PCGS# 6947

**5113 1859-S VF20 PCGS. OC-1.** Osburn-Cushing Die State a/a. Rich ocean-blue and plum-red toning adorns the margins of this low mintage silver dollar. The straw-gold fields are moderately glossy and minimally marked for the grade. BER is partial, while LI and TY are sharp. NGC ID# 24YZ, PCGS# 6948

**5114 1859-S XF45+ PCGS.** This Plus-designated Choice XF 1859-S Seated dollar has the detail of an AU coin, but deep, mottled gray-brown and olive toning prevents a finer numeric grade. The strike is sharp, and the coin is problem-free. From a mintage of only 20,000 pieces. NGC ID# 24YZ, PCGS# 6948

**5115 1859-S — Cleaning — PCGS Genuine. AU Details. OC-1.** OC Die State c/d. A pearl-gray representative of the sole No Motto San Francisco issue. Only 20,000 pieces were issued, and most were exported and melted. The surfaces are hairlined, and moderate rim dings are noted at 3 and 5 o'clock on the obverse, and at 4:30 on the reverse. NGC ID# 24YZ, PCGS# 6948

**5116 1860 AU53 PCGS.** Well-defined on both peripheral and central elements. Still-lustrous fields have a pale blue overtone and grade-contributing wispy marks with a few digs interspersed. The 1860 Seated dollar is a less often seen issue but remains accessible in this grade.  
*Ex: New York Signature (Heritage, 12/2011), lot 3730.* NGC ID# 24Z2, PCGS# 6949

**5117 1860-O MS60 NGC. OC-2.** Caramel-gold and rose-red toning adorns the borders of this coruscating No Motto type coin. Field marks are present, but are less conspicuous than seen on a majority of Uncirculated examples of this bag-stored issue. NGC ID# 24Z3, PCGS# 6950

**5118 1861 — Polished — PCGS Genuine. AU Details. OC-4.** OC Die State c/a. The date location is presently the only identifier for the late die state OC-4. A lightly worn representative of this little-saved Civil War issue. Somewhat bright from a wipe, and a thin straight mark is noted on the upper left obverse field. NGC ID# 24Z4, PCGS# 6951

#### 1861 Seated Dollar, MS63 Elusive So Well-Preserved

**5119 1861 MS63 PCGS.** A popular Civil War-era date, scarce in Uncirculated condition. This Select example is sharp and satiny with vibrant mint luster. A faint blush of light golden toning graces otherwise brilliant surfaces. A few trivial lines and marks determine the grade, but the overall quality far exceeds what is typically available on the market for this issue. Population: 13 in 63, 30 finer (7/16). NGC ID# 24Z4, PCGS# 6951

#### 1864 Seated Liberty Dollar, AU55 Low-Mintage Wartime Issue

**5120 1864 AU55 NGC. OC-1, R.2.** The Philadelphia Mint struck a small total of 30,700 Liberty Seated dollars in 1864, in the waning days of the Civil War. This attractive Choice AU specimen retains much of its original mint luster and design detail, with a few hints of gold and amber toning. A scattering of minor abrasions on both sides is consistent with the grade. Census: 8 in 55, 35 finer (7/16). NGC ID# 24Z7, PCGS# 6954

**5121 1869 AU55 PCGS.** Faint blue overtones lend a hint of color to this mildly reflective Choice AU 1869 Seated dollar. The coin is decently struck with abrasions that are mostly wispy, though reed marks and other flaws are visible in a horizontal path across the central obverse. Population: 30 in 55, 66 finer (7/16).  
*Ex: FUN Signature (Heritage, 1/2012), lot 3823.* NGC ID# 24ZC, PCGS# 6962

#### 1870-CC Dollar, Choice VF Scarce Carson City Type Coin

**5122 1870-CC VF35 PCGS. OC-9, High R.3.** Despite a mintage of only 12,462 pieces, nine die marriages are confirmed for the 1870-CC dollar. This almond-gold and cream-gray representative displays glimmers of luster within the drapery and plumage. Inspection reveals minor marks, none of which merit discussion. NGC ID# 24ZE, PCGS# 6964

**5123 1870-CC — Tooled — PCGS Genuine. XF Details. OC-2, R.5.** The 1870-CC dollar is the first issue struck by the Carson City Mint. A number were saved as symbols of local pride, but most survivors are impaired, such as the present piece. This bright, untuned example is hairlined but lacks any individually mentionable abrasions. NGC ID# 24ZE, PCGS# 6964

**5124 1870-CC — Plugged — PCGS Genuine. XF Details. OC-8, R.4.** The obverse is stone-gray and the reverse is ocean-blue. A lightly circulated example of the first Carson City issue. Plugged near 12 o'clock, apparent on the field between ONE and DOLLAR, and opposite on the field above Liberty's head. The obverse is moderately granular, and both sides have been cleaned. The fields display a number of thin marks. NGC ID# 24ZE, PCGS# 6964

**5125 1871 AU58 PCGS. CAC. OC-1.** Osburn-Cushing Die State a/a. Sharpness remains on the raised devices including the right-side stars and the eagle's plumage from the beak to the talons. Likewise, the surface quality is beyond reproach. Abrasions and marks are nearly nonexistent on either side of the coin. Wide, undisturbed rims surround both sides. Pleasing gunmetal-gray and blue shades deepen around the peripheral devices and tend to mute the mint luster, yet this near-Mint State example is exceedingly natural and high-end for the grade — a fact recognized by its CAC endorsement. An ideal type coin for a circulated set. NGC ID# 5DNV, PCGS# 6966

**5126 1871 — Cleaning — PCGS Genuine. Unc. Details. OC-13.** OC Die State a/c with several delicate reverse cracks. A stone-white Motto type coin with satin luster and a good strike. The obverse is only lightly hairlined, while the reverse field exhibits patches of hairlines upon rotation beneath a light. NGC ID# 5DNV, PCGS# 6966

### 1872 Seated Dollar, MS64 OC-3, Misplaced Date Digits

**5127 1872 MS64 PCGS. OC-3.** Osburn and Cushing list OC-3 as a Top 30 Variety due to its misplaced date digits. The high-mintage 1872 is surprisingly elusive at the MS64 grade level, and finer coins are very rare. This attractive Choice dollar offers well-detailed design elements and coruscating mint luster beneath shades of lavender-gray, golden-tan, and blue toning. Population: 39 in 64 (7 in 64+), 4 finer (7/16). NGC ID# 24ZJ, PCGS# 6968

### 1872-CC Dollar, XF Details Sharp Motifs

**5128 1872-CC — Rim Damage — PCGS Genuine. XF Details. OC-1, High R.3.** Osburn-Cushing Die State a/a. Not surprisingly, just one die pair was required to mint the 3,150 Carson City dollars in 1872, a rare issue in any condition. The reverse die was carried over from 1870 with a high, wide CC mintmark. This example shows a minor rim ding at 7 o'clock on the obverse that carries over to the reverse at 11 o'clock, with an additional slight rim flattening near 5 o'clock on the reverse also visible at about 1 o'clock on the obverse, as if the coin was squeezed in a vice. Otherwise, the motifs are sharply defined with warm-gray surfaces show scattered small marks, digs, and minor abrasions, some of which may have been smoothed. NGC ID# 24ZK, PCGS# 6969

**5129 1872-S VF35 PCGS. OC-1, Low R.3.** The 1872-S is the only collectible Motto San Francisco issue in the series, since the 1870-S is extremely rare and all 700 1873-S Seated dollars were melted. The present '72-S dollar has problem-free stone-gray and straw-gold surfaces. The motifs exhibit even, moderate wear. Only 9,000 pieces were issued. NGC ID# 24ZL, PCGS# 6970

## PROOF SEATED DOLLARS

### 1866 With Motto Dollar, PR64 Iridescent Toning

**5130 1866 Motto PR64 PCGS.** The 1866 represents the first year of the new With Motto Seated Liberty design, with IN GOD WE TRUST on a ribbon above the eagle. This lovely Choice proof dollar has rich cobalt-blue, violet, and turquoise toning on both sides that creates excellent eye appeal. This piece has fully mirrored fields with a hint of came contrast. Population: 67 in 64 (1 in 64+), 9 finer (6/16). NGC ID# 5GDV, PCGS# 7014

**5131 1867 PR61 PCGS. OC-P1, R.3.** The high, normal date precludes any confusion with the OC-1 repunched date business variety. A boldly struck and untuned specimen. The fields display hairlines commensurate with the third-party grade. A scant 625 proofs were issued. NGC ID# 252N, PCGS# 7015

**5132 1867 PR61 PCGS. OC-P1, R.3.** Sun-gold toning adorns this fully struck and flashy specimen. The motifs exhibit undeniable contrast, though the green label holder precludes a Cameo designation. The obverse field has small abrasions but the reverse is comparatively smooth. Very scarce, since only 625 proofs were issued. *Ex: Midwest Naval Officer's Collection of Early Dollars (Heritage, 8/2013), lot 4254, which realized \$2,500.40.* NGC ID# 252N, PCGS# 7015

### 1868 Silver Dollar, PR64 Deep Cameo Exceptional Eye Appeal

**5133 1868 PR64 Deep Cameo PCGS. OC-P2.** The date was entered with a slight upward slant, then repunched in a level position. Recutting is apparent on the flag and base of the 1, and inside the lower loop of the second 8. An impressive proof Seated dollar that boasts frosty devices and glassy fields. Subtle freckles of lilac and gold toning overlie fully struck white surfaces. Population: 6 in 64 (1 in 64+) Deep Cameo, 3 finer (6/16). NGC ID# 252P, PCGS# 97016

**1869 Seated Liberty Dollar, PR64+  
Stunning Deep Cameo Representative**

**5134 1869 PR64+ Deep Cameo PCGS.** Only 600 proof Seated Liberty dollars were struck in 1869, all for inclusion in the proof sets. The sets were delivered at different times throughout the year, and three different die combinations are known. This coin was struck using the same reverse die used on proofs in the following year, with some incomplete detail in the scroll due to lapping. Only a handful of survivors have been certified above the PR64 level.

The present coin is a high-end Choice specimen with richly frosted design elements that contrast profoundly with the deeply mirrored fields. Sharply detailed on the obverse, the reverse shows some minor incompleteness, due to die polishing, and some parallel striations in the lower portion that soften the detail on the eagle's left (facing) leg. The well-preserved surfaces show highlights of pale gold toning and eye appeal is terrific. Population: 7 in 64 (3 in 64+) Deep Cameo, 11 finer (6/16). NGC ID# 252R, PCGS# 97017

**1871 Silver Dollar, PR64  
Fully Struck, Richly Patinated**

**5135 1871 PR64 PCGS. OC-P1.** Autumn-brown and forest-green toning embrace this intricately struck and undisturbed Choice proof. The preservation is exemplary, and the originality is unquestioned. Proofs exist for each year of the Liberty Seated dollar series, but most collectors bypass proofs dated prior to 1858, when proof sets were first sold by the U.S. Mint to the general public. NGC ID# 252T, PCGS# 7019

**5136 1872 — Questionable Color — PCGS Proof Genuine. Unc Details. OC-P1, R.2.** Straw-gold centers are bounded by aquamarine fields and borders. A flashy and fully struck specimen that offers greater eye appeal than implied by the PCGS disclaimer. A small spot between star 3 and the arm provides an identifier. IN GOD WE TRUST is die doubled north, as seen on all 1872 and 1873 proofs. NGC ID# 252U, PCGS# 7020

**5137 1872 PR61 PCGS.** A pleasing lower-end proof Seated dollar with a sharp strike and subtle field-motif contrast on the obverse. A blanket of olive-gold toning with blue and violet accents masks grade-limiting hairlines. NGC ID# 252U, PCGS# 7020

**1872 Silver Dollar, PR62  
Rich Border Patina**

**5138 1872 PR62 PCGS. OC-P1, R.2.** Autumn-brown and blue-green toning embrace the margins, but the majority of this flashy Seated dollar is brilliant. The strike shows minor inexactness on the eagle's neck and left (facing) wing. The surfaces displays unimportant hairlines. IN GOD WE is die doubled, as always on this proof issue. NGC ID# 252U, PCGS# 7020

**TRADE DOLLARS**

**1873 Trade Dollar, MS64  
Transitional Dollar Issue**

**5139 1873 MS64 PCGS.** The transitional year 1873 marked the end of the Seated Liberty dollar and the beginning of the ill-fated Trade dollar that was intended to rival the Mexican crowns for trade in the Orient. Trade dollars were coined for six years, mostly at the San Francisco Mint, and then they were discontinued, although proofs were struck at Philadelphia through 1883, along with the 1884 and 1885 rarities. This Choice Mint State example is an attractive piece with natural gray-gold patina and wispy blue peripheral toning on the reverse. Population: 52 in 64 (3 in 64+), 16 finer (6/16). NGC ID# 252W, PCGS# 7031

**1874-CC Trade Dollar, MS61  
Lustrous and White**

**5140 1874-CC MS61 PCGS Secure.** Tall CC. Period after FINE. A satiny and nearly brilliant Carson City Trade dollar. There are no reportable abrasions. The strike is good despite minor blending on Liberty's hair and the eagle's right (facing) claw. A diagonal die line through the lower leaves of the branch may be of interest to the specialist. NGC ID# 2532, PCGS# 7035

**1874-CC Trade Dollar, MS62**  
Popular Carson City Issue

- 5141 1874-CC MS62 PCGS.** Micro CC. Period after FINE. A primarily almond-gold Carson City Trade dollar, although the reverse border near OF AMERICA displays deep cobalt-blue toning. The lustrous surfaces are smooth save for minor obverse hairlines and a graze on the left reverse field. A few tiny russet spots are near star 8. NGC ID# 2532, PCGS# 7035

**1876-CC Trade Dollar, MS63**  
Chop Marks, Incused Chop

- 5142 1876-CC Chop Mark MS63 PCGS.** Type One Obverse. Type Two Reverse. Tall CC. The obverse shows two chopmarks near the knees, another on the bale, and two more above the sheaf of wheat. The reverse has two chopmarks near GRAINS, another on the right (facing) leg, and an interesting incused flower chopmark on the lower left wing. The wavy surfaces are lustrous and display golden-brown, cream-gray, apple-green, and lilac toning. PCGS# 87042

**1876-CC Trade Dollar, AU58**  
Luminous, Toned Surfaces

- 5143 1876-CC Type Two Reverse AU58 NGC.** Tall CC. Luminous mint luster remains in the fields of this near-Mint 1876-CC Trade dollar, illuminating golden toning that yields to deeper lavender-gray overtones in the fields. Some aquamarine hues surround the peripheries. The coin is sharp and smooth with pleasing eye appeal. Census: 34 in 58, 56 finer (6/16). NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042

- 5144 1876-S Type One Obverse, Type One Reverse, MS64 PCGS.** Large S. Dappled autumn-brown and forest-green patina overlies cream-gray surfaces. Lustrous and well preserved with a good strike and impressive eye appeal. A popular Centennial issue, and rarely encountered any finer. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

**1876-S Trade Dollar, MS64**  
Type One Obverse, Type Two Reverse

- 5145 1876-S Type One Obverse, Type Two Reverse, MS64 PCGS.** CAC. Micro S mintmark. Just under 20% of 1876-S Trade dollars employ this scarce hub combination, and most of those have the Micro S mintmark seen here. Another 20% are Type Two obverse and reverse, and the other 60% are Type One obverse and reverse. For those collecting the different hub styles, this variety will pose a challenge in such a fine grade. Both sides exhibit satiny silver luster with vibrant peripheral iridescence. Population: 105 in 64 (1 in 64+), 7 finer. CAC: 8 in 64, 1 finer (7/16). The population data is for all hub types of this issue. NGC ID# 253B, PCGS# 40115 Base PCGS# 7043

**1877-S Trade Dollar, Toned MS65**  
Conditionally Elusive Type Coin

- 5146 1877-S MS65 PCGS.** Large S, lightly doubled at the serifs. Gem-quality Trade dollars are scarce, regardless of grade. This 1877-S is boldly struck and lustrous beneath burnt-orange and lavender-gray toning on the obverse and yellow-gold, amber, and lavender-blue on the reverse. Eye appeal is pleasing due to a lack of abrasions and the rich patina. Population: 32 in 65 (2 in 65+), 8 finer (7/16). NGC ID# 253E, PCGS# 7046

- 5147 1878-S MS62 PCGS.** The final circulation strike Trade dollar struck in the transitional year that also saw the introduction of Morgan silver dollars. This piece is fully brilliant with excellent eye appeal. Both sides are untoned with full satin luster. NGC ID# 253G, PCGS# 7048

**1878-S Trade Dollar, MS64  
Prooflike Fields**

- 5148 1878-S MS64 PCGS. CAC.** This Choice 1878-S Trade dollar displays fully prooflike fields and a sharp strike with mottled golden toning over each side. Eye appeal is excellent. The 1878-S is the final circulation-strike issue in the Trade dollar series. Although Morgan dollar production began early in 1878 at the Philadelphia Mint, the new dies did not reach San Francisco until the branch mint was on track to strike more than 4 million Trade dollars dated 1878. NGC ID# 253G, PCGS# 7048

**PROOF TRADE DOLLARS**

**1873 Trade Dollar, PR64  
First-Year Issue**

- 5149 1873 PR64 PCGS.** Type One Obverse and Reverse. The exact number of proof Trade dollars minted in 1873 is widely debated, though most agree the total is either 600 or 865 pieces. Whatever the case, 1873 proof Trade dollars were not widely popular, and many ended up in circulation or were carelessly stored, contributing to the issue's stance as the scarcest pre-1884 proof Trade dollar in higher grades. This example displays moderate mirroring in the fields, with dusky golden-gray patina over each side. The strike is generally well-defined, though some minor, typical weakness is noted on Liberty's head and the eagle's talons. Population: 30 in 64, 7 finer (6/16). NGC ID# 27YJ, PCGS# 7053

- 5150 1876 PR60 PCGS.** Type One Obverse. Type Two Reverse. An untoned, lightly marked, and somewhat subdued specimen. White-on-black contrast is apparent on both sides, although the coin is undesignated as Cameo. The U.S. Mint sold proof sets from a booth at the Centennial Exposition in Philadelphia, which accounts for the higher proof mintages for the date. NGC ID# 27YM, PCGS# 7056

**1876 Trade Dollar, PR65 Cameo  
Nicely Toned Gem With Contrast**

- 5151 1876 PR65 Cameo PCGS.** Type One Obverse. Type Two Reverse. The flashy fields and icy motifs are generally brilliant, but the obverse margin displays attractive peach-gold patina, and the reverse exhibits blushes of steel-gray near the eagle's neck and left (facing) wingtip. A couple of lint marks (as coined) near star 3 and above Liberty's head provide further identifiers. A well-struck Gem. The proof mintage of 1,150 pieces was higher than the prior three years of the type, due to sales of proof sets at the Mint booth of the Centennial Exposition in Philadelphia. Population: 10 in 65 (1 in 65+) Cameo, 4 finer (6/16). NGC ID# 27YM, PCGS# 87056

**1878 Trade Dollar, PR63 Cameo  
Transitional Proof Year**

- 5152 1878 PR63 Cameo PCGS. CAC.** A mintage of 900 proofs was the entire Trade dollar production at the Philadelphia Mint in 1878, as circulation strikes were produced with the new dies by George Morgan. This is an elusive Cameo example with champagne-tinted devices and mirrored fields. A few stray hairlines determine the grade. Population: 37 in 63 (1 in 63+) Cameo, 42 finer (6/16). NGC ID# 27YP, PCGS# 87058

- 5153 1883 PR61 NGC.** Deep violet and greenish-steel toning covers both sides of this proof Trade dollar representing the final collectible proof issue of the series. Both sides have satin devices with fully mirrored fields beneath the rich patina. NGC ID# 5DP8, PCGS# 7063

**1883 Trade Dollar, PR65+  
Final Collectible Issue**

- 5154 1883 PR65+ NGC.** The 1883 Trade dollar is the final collectible date of the series, from a proof-only mintage of 979 pieces. This high-end Gem displays a vivid combination of greenish-gold, gray, and cobalt-blue toning over deeply mirrored fields and sharply detailed design elements. No mentionable distractions are evident. Census: 62 in 65 (3 in 65+), 43 finer (6/16). NGC ID# 5DP8, PCGS# 7063

**1883 Trade Dollar, PR65 Cameo  
Rich Border Toning and Eye Appeal**

- 5155 1883 PR65 Cameo NGC.** Lovely golden-brown and navy-blue toning enriches the borders of this fully struck and flashy proof-only Gem. The major devices are thickly frosted, and the eye appeal is outstanding. Although the 1883 Trade dollar — the last readily collectible date in the series — can be obtained in higher grades, the quality of the present specimen will satisfy the most demanding specialist. Census: 16 in 65 Cameo, 30 finer (6/16).  
Ex: *Central States Signature (Heritage, 4/2012)*, lot 4997. NGC ID# 27YV, PCGS# 87063

**1883 Trade Dollar, PR65 Cameo  
Final Collectible Issue**

- 5156 1883 PR65 Cameo PCGS.** This delightful Gem, from a proof-only mintage of 979 pieces, represents the last collectible date of the Trade dollar series. The design elements are strongly impressed throughout, though some minor detail in the eagle's feathers remains incomplete, due to lapping. The deeply mirrored fields contrast boldly with the frosty devices, under delicate shades of greenish-gold toning. Eye appeal is outstanding. Population: 16 in 65 Cameo, 17 finer (7/16). NGC ID# 27YV, PCGS# 87063

**MORGAN DOLLARS**

- 5157 1878 8TF Lines in LIB, VAM-2, MS64 ANACS.** Prominently mirrored fields and icy motifs combine to provide substantial cameo contrast. The borders display golden-brown and jade-green patina. A blush of silver-gray accompanies the CA in AMERICA. A minor fingerprint is noted below the US in PLURIBUS. NGC ID# 253H, PCGS# 133785 Base PCGS# 7072

**1878 8TF VAM-2 Silver Dollar  
MS64 Deep Mirror Prooflike**

- 5158 1878 8TF Lines in LIB, VAM-2, MS64 Deep Mirror Prooflike PCGS.** The remarkably reflective fields contrast with the frosty devices. A brilliant example of this popular and briefly issued subtype. The left obverse exhibits scattered minor contact, and the remainder of the coin is well preserved. Both sides exhibit die doubling, usual for 8TF Morgans. NGC ID# 253H, PCGS# 40120 Base PCGS# 97073

**1878 8TF Morgan Dollar, MS66  
VAM-6, Pierced Eyelid**

- 5159 1878 8TF Pierced Eyelid, VAM-6, MS66 PCGS.** Regardless of variety, the 1878 eight tailfeather Morgan dollar is scarce in Premium Gem condition and a major rarity any finer. The present example is frosty and vibrantly lustrous. Some sky-blue appears around the obverse periphery, but the surfaces are otherwise warm sun-gold in color. A few faint grazes on the cheek are all that deny perfection. Population: 56 in 66 (4 in 66+), 2 finer (7/16). NGC ID# 76LZ, PCGS# 133789 Base PCGS# 7072

- 5160 1878 8TF Alligator Eye, VAM-14.1A, MS65 PCGS. CAC.** 30th Anniversary Green Label Holder. The left reverse displays sun-gold, lilac, and power-blue patina. The obverse is brilliant, as is the right reverse. A well struck and lustrous Gem with refreshingly smooth surfaces. A late, double-clashed die state of VAM-14.1. NGC ID# 253H, PCGS# 133796 Base PCGS# 7072

- 5161 1878 8TF Lines in Hair, VAM-14.15 — Graffiti — PCGS Genuine. Unc. Details.** VAMworld.com states "extremely difficult to find ... to date there is no known Uncirculated VAM-14.15." Indeed, the PCGS Census (6/16) is topped by four AU53 examples. The present lustrous and nearly bagmark-free example has light butter-gold toning, and would be unchallenged as the finest known were it not for the small pinscratched initials JUS on the field near Liberty's nose. NGC ID# 253H, PCGS# 133810 Base PCGS# 7072

**1878 8TF Dollar, Reflective AU53  
Very Rare VAM-14.20 Boll Lines Variety**

- 5162 1878 8TF Boll Lines, VAM-14.20, AU53 PCGS.** A Hit List 40 Variety. The comment from vamworld.com is, "Ultra-rare with less than a dozen known. A huge premium coin." Heavy die polish lines within the cotton leaves and bolls are prominent on this variety, which is widely pursued by VAM enthusiasts. Other key pick-up points include a slight tripling of the date (most visible at the lower crossbar of 1 and at the top of the first 8) and at right-hand stars toward the rim. Die markers include a die chip above L in LIBERTY. Confirming radial die cracks are seen from the rim to the base of 1 in the date and to the top of L in PLURIBUS. This example ranks among the finest known, with noticeably prooflike fields and pleasing blue and russet toning at the margins. Scattered light abrasions define the grade. No Mint State examples are known that we are aware of, and no Uncirculated examples are listed at either service. Population: 2 in 53, 1 finer (6/16). NGC ID# 253H, PCGS# 133815 Base PCGS# 7072

**1878 8TF Dollar, Exceptional MS66  
VAM-17 Condition Rarity**

- 5163 1878 8TF Diagonal In 8, VAM-17, MS66 PCGS. CAC.** Ex: The Shrike Set/The Michigan Set. The reverse die is shared with VAM-11, a variety that is now unknown and believed to be a listing error in the VAM reference. A diagonal die chip in the lower loop of the first 8 identifies the obverse. The easiest reverse identifier is a slightly curved die scratch from the left stem tip to the bottom of the upper serif of the E in ONE, a characteristic unlisted in the VAM reference or at VAMWorld.com.

This beautiful Premium Gem is fully brilliant with a cameo, prooflike obverse, and a frosty reverse. The surfaces are exceptional with only a few trivial marks. The PCGS label does not include the variety. Population (all 1878 8TF varieties): 55 in 66 (4 in 66+), 2 finer. CAC: 23 in 66, 2 finer (6/16).

Ex: *The Shrike Set - The Karschner Collection of Morgan Dollars / FUN Signature* (Heritage, 1/2011), lot 5829.

**From The Bowler Collection of Morgan Dollars.** NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

**1878 Eight Tailfeathers Dollar, MS66  
VAM-18, Doubled Date**

- 5164 1878 8TF Doubled Date, VAM-18, MS66 NGC.** The date, LIBERTY, and the obverse stars are nicely die doubled. The reverse is also die doubled, strongest on STATES OF. Rich golden-brown, powder-blue, and aquamarine patina endows this coruscating, well preserved, and crisply struck silver dollar. As of (6/16), NGC has certified 251 examples as VAM-18, none finer than MS65. NGC ID# 253H, PCGS# 133819 Base PCGS# 7072

**1878 8 Tailfeathers Morgan Dollar, MS66  
VAM-21, Broken R & B**

- 5165 1878 8TF Broken R & B, VAM-21, MS66 PCGS.** This variety shows doubling on the lower serifs of R and B in PLURIBUS. The first Morgan dollars were struck with the 8 Tailfeather reverse, and survivors are always in high demand. This brilliant Premium Gem is awash in frosty cartwheel luster. The surfaces are remarkably clean and show strongly rendered motifs. Extensive die cracks travel around the reverse legends. Population (all 8TF varieties): 56 in 66 (4 in 66+), 2 finer (7/16). NGC ID# 253H, PCGS# 133822 Base PCGS# 7072

- 5166 1878 7/8TF Doubled Legs, VAM-33, MS64 Deep Mirror Prooflike ANACS.** The borders and orange-gold and navy-blue, but the fields and devices remain brilliant. This intricately struck doubled tailfeathers variety has prominently mirrored fields, and Liberty's cheek and neck are refreshingly unmarked.

Ex: *Charlotte Signature* (Heritage Auctions, 3/2007), lot 1192. NGC ID# 4G65, PCGS# 40208 Base PCGS# 97071

**1878 7/8TF Strong Dollar, MS66  
VAM-38, Widely Doubled LIBERTY**

**5167** 1878 7/8TF Strong, VAM-38, MS66 PCGS. VAM-38 shows five feather ends below the eight tailfeathers. LIBERTY is more widely die doubled than on any other Morgan dollar VAM. This is a crisply struck and brilliant high grade representative. Booming cartwheel luster traverses well-preserved surfaces. The present lot ranks among the finest 7/8TF silver dollars. NGC ID# 2TXZ, PCGS# 134035 Base PCGS# 7078

**5168** 1878 7/8TF 7/7 Strong, VAM-41, MS65 PCGS. Ex: Jackson Hole, The Michigan Collection. A Top 100 Variety. According to the Top 100 reference, "This VAM shows the most complete doubling of the eagle's tailfeathers of any so-called 7/8 TF variety." Brilliant and boldly struck with satin luster and a clean cheek. Ex: Jackson Hole Collection (Heritage, 4/2007), lot 2, which realized \$2,530.  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 2TXZ, PCGS# 133828 Base PCGS# 7078

**1878 Morgan Dollar, MS66  
Seven Tailfeathers, Reverse of 1878**

**5169** 1878 7TF Reverse of 1878 MS66 PCGS. Dazzling mint frost covers this nearly brilliant Premium Gem. All of the design details are crisply impressed, and the reverse is beautifully preserved. Liberty's cheek is very clean, and only a faint luster graze in the left obverse field precludes an even finer grade designation. Population: 45 in 66 (6 in 66+), 0 finer (6/16).  
Ex: FUN Signature (Heritage, 1/2007), lot 6848; Phoenix Signature (Heritage, 3/2008), lot 887. NGC ID# 2TY3, PCGS# 7074

**1878 Morgan Dollar, MS66  
7 Tailfeathers, Reverse of 1878**

**5170** 1878 7TF Reverse of 1878 MS66 PCGS. VAM-83. A spectacular Premium Gem representative of this popular first-year Morgan dollar, with sharply detailed design elements and well-preserved surfaces that show a mix of vibrant mint luster and prooflike reflectivity. The parallel top arrow feather identifies the Reverse of 1878. A few hints of greenish-gold toning are evident and eye appeal is outstanding. Population: 45 in 66 (6 in 66+), 0 finer (6/16). NGC ID# 2TY3, PCGS# 7074

**1878 7TF Morgan, MS66+  
Reverse of 1878**

**5171** 1878 7TF Reverse of 1878 MS66+ PCGS. CAC. The 1878 Morgan dollar was issued with several different reverse types. The seven tailfeather Reverse of 1878 is scarce in Premium Gem condition, and none are finer at PCGS. This Plus-graded example is brilliant and frosty, showing a sharp strike and unabraded surfaces. Eye appeal is outstanding. Population: 45 in 66 (6 in 66+), 0 finer (7/16). NGC ID# 2TY3, PCGS# 7074

**5172** 1878 7TF Reverse of 1879 MS65 NGC. This introductory Morgan dollar representative is largely brilliant with pale toning around the edges. Cartwheel luster rolls over each side, and the strike is pinpoint-sharp. Examples are relatively obtainable through Gem condition, but anything finer is markedly rare. NGC shows 15 submissions finer (6/16). NGC ID# 253L, PCGS# 7076

**5173** 1878 7TF Reverse of 1879 MS65 PCGS. Ex: Michigan Collection. A slanted top arrow feather and rounded eagle's breast identify the Reverse of 1879. Pleasing luster exudes from silver-gray surfaces that are minimally abraded. This piece exhibits well-struck devices with just a trace of the usual softness on the hair above the ear. PCGS has graded 22 numerically finer examples (6/16).  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 253L, PCGS# 7076

**5174** 1878 7TF Reverse of 1879 MS65 NGC. A slanted top arrow feather and rounded eagle's breast identify the Reverse of 1879. Soft golden-gray patina resides on the lustrous surfaces of this Gem 1878 Morgan dollar. Sharply struck and minimally abraded. Seldom seen finer.  
Ex: Central States Signature (Heritage, 4-5/2010), lot 1283. NGC ID# 253L, PCGS# 7076

**5175** 1878-CC MS65 PCGS. The well-preserved surfaces of this impressive Gem show attractive shades of lavender-gray, greenish-gold, and magenta toning, with most of the color on the obverse. This first-year, branch mint issue also offers well-detailed design elements and vibrant mint luster, under the patina. NGC ID# 253M, PCGS# 7080

**5176 1878-CC MS65 NGC.** Pleasing luster exudes from the silver-gray surfaces of this Gem Morgan. Sharply struck design elements, including the hair above Liberty's ear and the eagle's breast feathers, enhance the coin's eye appeal. A few light grazes are consistent with the grade designation. NGC ID# 253M, PCGS# 7080

**5177 1878-CC MS65 PCGS. CAC.** Blue and violet patina near the margins combine with light apricot-orange hues centrally, accounting for the tremendous eye appeal of this Gem Carson City dollar from the series' first year of issue. Frosty luster illuminates strong devices. Minimally marked for the grade. NGC ID# 253M, PCGS# 7080

---

**1878-CC Morgan Dollar, MS66  
Rarely Encountered Finer**

**5178 1878-CC MS66 PCGS. Ex:** The Michigan Collection. Untoned and completely brilliant for this first-year Carson City issue, with shimmering cartwheel luster in the fields and heavily frosted devices. A prized issue in this virtually unsurpassable condition. A couple of staple grazes are detected on the obverse portrait under close examination. PCGS has only certified six finer examples (6/16).

*Ex: FUN Signature (Heritage, 1/2002), lot 7536; Palm Beach Signature (Heritage, 3/2005), lot 5988; The Jackson Hole Collection / Dallas Signature (Heritage, 4/2007), lot 6.*

**From The Bowler Collection of Morgan Dollars.** NGC ID# 253M, PCGS# 7080

---

**1878-CC Morgan Dollar, MS66  
Conditionally Rare Any Finer**

**5179 1878-CC MS66 PCGS.** The 1878-CC Morgan dollar is always popular with first-year branch mint type collectors, as the issue was generally well-produced and has a high survival rate in high grade. This attractive Premium Gem is sharply detailed throughout, with vibrant mint luster and well-preserved creamy surfaces. PCGS has graded six numerically finer examples (6/16). NGC ID# 253M, PCGS# 7080

**5180 1878-S MS66+ PCGS. CAC.** The virtually pristine surfaces of this high-end Premium Gem are blanketed in iridescent shades of sea-green, lavender, and dove-gray toning. The design elements are sharply detailed throughout and vibrant mint luster shines through the patina. PCGS has graded 36 numerically finer examples (6/16). NGC ID# 253R, PCGS# 7082

**5181 1878-S MS66+ PCGS. CAC.** A boldly struck first-year San Francisco Morgan, showing frost-white luster rolling over beautifully preserved surfaces. Only a few trivial grazes preclude a full MS67 grade. Eye appeal is excellent. PCGS lists 36 finer coins (6/16). NGC ID# 253R, PCGS# 7082

**5182 1878-S MS64 Deep Mirror Prooflike PCGS.** This eye-catching Deep Mirror Prooflike dollar would make a great first-year addition to any set. Flashy, untuned surfaces generate marked contrast between glassy fields and thickly frosted, fully struck relief elements. Faint roller marks occur on the chin, and small bagmarks are undistracting. NGC ID# 56ZC, PCGS# 97083

**5183 1878-S MS64 Deep Mirror Prooflike NGC.** Splendid golden-brown, rose-red, and forest-green patina adorns the margins of this flashy and fully struck silver dollar. Well preserved aside from a hair-thin vertical line above Liberty's eye. NGC ID# 56ZC, PCGS# 97083

**5184 1879 MS66 PCGS. Ex:** Michigan Collection. Only four numerically finer examples are certified by PCGS, illustrating the importance of the present opportunity (6/16). This wonderful Premium Gem has frosty silver luster with full mint brilliance, sharp design definition, and exceptional eye appeal.

**From The Bowler Collection of Morgan Dollars.** NGC ID# 253S, PCGS# 7084

---

**1879 Morgan Dollar, MS66+  
Very Rare Any Finer**

**5185 1879 MS66+ PCGS.** From a large mintage of 14.8 million pieces, the 1879 Morgan dollar has always been an available issue in high grade. The population drops off precipitously at the MS66 grade level, however, and examples in higher grades are very rare. This Plus-graded Premium Gem exhibits well-detailed design elements and vibrant mint luster, with impeccably preserved surfaces that show delicate highlights of golden-tan toning. PCGS has graded four numerically finer examples (7/16). NGC ID# 253S, PCGS# 7084

**5186 1879 MS64 Deep Mirror Prooflike ANACS.** Near-Gem is the finest grade likely to be seen for the 1879 DMPL Morgan as Gems are only infrequently encountered. Modest field-motif contrast is evident on both sides, each of which is sharply struck, including the hair over Liberty's ear and the eagle's breast feathers. A few light grazes preclude Gem status. NGC ID# 56ZE, PCGS# 97085

---

**1879-CC Dollar, AU58+  
Just 756,000 Pieces Struck**

**5187 1879-CC AU58+ PCGS. CAC.** Normal mintmark. Remnants of prooflike flash remain on the obverse, while the reverse is frosty and attractive on this softly lustrous, borderline Mint State Carson City dollar. The strike is incomplete over the ear with some roller marks there, yet otherwise the coin is crisply struck. Lilac-gray toning joins glimpses of gold at the margins. A scarce CC issue always in demand, with this example the sole AU58 coin to be granted the PCGS Plus designation. The CAC endorsement adds to its resume. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS63  
Normal Mintmark

- 5188 1879-CC MS63 PCGS. CAC.** The obverse of this fully brilliant Select Mint State Morgan dollar exhibits frosty luster on the central device with reflective fields that show only trivial surface marks to limit the grade. The reverse is similar with light yellowish-champagne toning. The 1879-CC ranks among the three rarest Carson City Morgan dollars alongside the 1889-CC and 1893-CC. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, Untoned MS64  
Carson City Semikey, Normal Mintmark

- 5189 1879-CC MS64 PCGS.** This second-year Carson City Morgan dollar is the secondmost challenging issue among CC emissions after the 1889-CC. Two mintmark variants are known: Large CC and Large CC over Small CC. The former, of which this is an example, is more available than the latter. It also happens to be more popular among collectors. Brilliant surfaces have a moderate prooflike quality about them, though contrast and reflectivity are insufficient for a formal designation from PCGS. Well-struck with minimal bagmarks. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, MS64  
Normal Mintmark

- 5190 1879-CC MS64 PCGS. CAC.** The 1879-CC is highly desired in any grade and rates second only to the 1889-CC in terms of rarity among Carson City issues. This near-Gem exhibits well-struck devices, including the central areas. Semiprooflike fields highlight the motifs, and each side is essentially color-free and minimally marked.

*Ex: Baltimore Signature (Heritage, 3/2009), lot 1224.*

*From The Bowler Collection of Morgan Dollars.* NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS63 Prooflike  
Normal Mintmark

- 5191 1879-CC MS63 Prooflike PCGS.** Normal Mintmark. Both sides of this Select Mint State 1879-CC Morgan dollar key exhibit satiny silver luster on the sharply defined devices, with fully mirrored prooflike fields that exhibit myriad die polishing lines. The obverse hosts delicate champagne toning while the reverse is brilliant and only faintly toned. An outstanding example searching for a home in an advanced collection. NGC ID# 253T, PCGS# 7087

1879-CC Morgan, MS61  
VAM-3A, Capped Die

- 5192 1879-CC Capped Die, VAM-3A, MS61 PCGS.** A Top 100 Variety. A pleasing lower-end Mint State example of this popular *Guide Book* variety, showing frosty mint luster without obvious toning. The strike is sharp and pleasing. Scattered light abrasions determine the grade, but none are individually significant. Suitable for the budget-conscious collector. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Dollar, Frosty MS64  
VAM-3, Capped Die

- 5193 1879-CC Capped Die, VAM-3, MS64 PCGS. CAC. Ex:** The Michigan Collection. A Top 100 Variety. The diagnostic die chips around the mintmark on this variety are believed to be from an attempt to efface an errant mintmark impression. This variety is highly popular but seldom seen finer than the present Choice example. The present coin is luminous and frosty with warm golden toning emerging from the peripheries. The central high points of the eagle's breast and Liberty's ear region show minor softness. PCGS has seen only 13 finer Capped Die dollars (6/16). *From The Bowler Collection of Morgan Dollars.* NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-CC Capped Die Silver Dollar  
VAM-3, MS63 Prooflike**

**5194 1879-CC Capped Die, VAM-3, MS63 Prooflike PCGS.** A Top 100 Variety. Brilliant and flashy with a smooth reverse and minor obverse contact. The engraver entered the mintmark with a too-small punch, entered it again with the correct Carson City punch, and attempted to efface traces of the initial mintmark by adding a number of tiny chips. The "Capped Die" variety was shunned by collectors during the 1970s, but now that it is better understood, it has become an integral part of the series, and is listed in the *Guide Book*. NGC ID# 253T, PCGS# 40776 Base PCGS# 7089

**5195 1879-O MS65 PCGS.** Vibrant mint luster rolls over each side of this Gem 1879-O Morgan dollar, illuminating amber and orange-gold hues around the peripheries. The interiors have a faint champagne hue. This issue is obtainable in MS65, but PCGS lists only 26 numerically finer representatives (7/16). NGC ID# 253X, PCGS# 7090

**1879-O Dollar, CAC-Endorsed Gem  
Vibrant Mint Luster**

**5196 1879-O MS65 PCGS. CAC.** Ex: The Michigan Collection. There is no shortage of 1879-O dollars in lower Mint State grades, but securing a quality Gem is surprisingly difficult. On the present piece, the experienced collector will first note the intricate strike, which displays full detail on the hair above the ear as well as on the eagle's breast feathers. Lustrous and essentially untuned with splendidly smooth fields and only incidental grazes on the cheekbone. PCGS has seen only 26 numerically finer submissions (6/16).  
Ex: *Summer FUN Signature* (Heritage, 7/2010), lot 4071.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 253X, PCGS# 7090

**5197 1879-S Reverse of 1878 MS64+ PCGS.** A Top 100 Variety. The Reverse of 1878 coins are far more elusive than their Reverse of 1879 counterparts, and examples are rarely seen beyond the Choice grade level. This boldly struck, untuned dollar is awash in frosty luster, contributing to the mint-fresh look that should appeal to a wide swathe of collectors. NGC ID# 253W, PCGS# 7094

**1879-S Morgan, Vibrant MS65  
VAM-39, Reverse of 1878**

**5198 1879-S Reverse of 1878, VAM-39, MS65 PCGS.** Ex: Naples II/The Michigan Collection. A Top 100 Variety. This Reverse of 1878 Gem is conditionally scarce, and finer examples are rare. The strike is razor-sharp, and the frosty surfaces yield dazzling mint luster. A few trivial grazes in the left obverse field are all that limit the grade. Population (all Reverse of 1878 varieties): 55 in 65, 1 finer (6/16).  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 253W, PCGS# 133862 Base PCGS# 7094

**5199 1879-S Reverse of 1878, VAM-46, MS64 NGC.** A Top 100 Variety. The crossbar of the R in TRUST is virtually absent, which makes attribution faster than for most of the Reverse of 1878 VAMs. A diagonal die line above Liberty's lips is also a key pick-up point for VAM-46. This brilliant near-Gem has an obverse with cartwheel luster and a semiprooflike reverse. NGC ID# 746T, PCGS# 133865 Base PCGS# 7094

**5200 1879-S MS67+ PCGS. CAC.** 30th Anniversary Green Label Holder. Potent luster illuminates this brilliant and fully struck Superb Gem. Outstanding preservation confirms the lofty third party grade. A desirable Morgan dollar type coin. NGC ID# 253X, PCGS# 7092

**1879-S Morgan Dollar, MS68  
Prooflike Obverse**

**5201 1879-S MS68 PCGS.** Uncommonly attractive surfaces appear on this common date silver dollar. The obverse fields are obviously prooflike (maybe deeply so), but the reverse fields don't have quite the reflectivity needed to garner a Prooflike designation. Nevertheless, the devices are heavily frosted and the obverse especially shows strong cameo contrast. Fully struck, the coin is also fully brilliant with no obvious post-strike impairments. None are certified numerically finer (6/16).  
Ex: *Long Beach Signature* (Heritage, 9/2004), lot 8326; *ANA Signature* (Heritage, 3/2008), lot 916. NGC ID# 253X, PCGS# 7092

**1879-S Silver Dollar, MS68  
Among the Finest Certified**

- 5202 1879-S MS68 PCGS.** Ex: The Michigan Collection. This is a coin that truly lives up to its reputation, with completely brilliant, untuned surfaces and astonishing luster. The minuscule ticks present do not merit individual mention. Liberty's cheek is essentially distraction-free, as is indeed the entire coin. Not perfect, but not far away. None are numerically finer at either service (6/16).  
Ex: Long Beach Signature (Heritage, 9/2006), lot 4962; Dallas Signature (Heritage, 11/2006), lot 1188.  
From The Bowler Collection of Morgan Dollars. NGC ID# 253X, PCGS# 7092

- 5203 1880 MS66 PCGS.** Ex: The Michigan Collection. Given its mintage of 12.6 million pieces and its early position within the Morgan dollar series, the 1880 is expectantly plentiful in MS62 to MS65 grades. At the MS66 level, however, it emerges as a surprising condition rarity, and PCGS has yet to certify an example in MS67 or finer grades (6/16). This lustrous and untuned Premium Gem is sharply struck and beautifully preserved. Prominent clashmarks are noted near the profile on opposite on the left wreath end.  
Ex: Dallas Signature (Heritage, 11/2006), lot 1194.  
From The Bowler Collection of Morgan Dollars. NGC ID# 253Y, PCGS# 7096

- 5204 1880 MS66 PCGS.** This sharply detailed Premium Gem displays well-preserved, mostly brilliant surfaces, with a few subtle hints of greenish-gold toning and vibrant mint luster throughout. Some interesting clash marks show in the reverse field. Eye appeal is outstanding. PCGS has graded no coins in higher numeric grades (6/16). NGC ID# 253Y, PCGS# 7096

**1880 Morgan Dollar, MS66  
Multihued Patina**

- 5205 1880 MS66 PCGS. CAC.** Flashy multicolored iridescent toning covers each side and is enlivened by strong mint luster. Just slightly soft in the centers. This is an overlooked early P-mint Morgan that is generally not available in high grades. None are certified finer than the Premium Gem level (6/16). NGC ID# 253Y, PCGS# 7096
- 5206 1880/79-CC Reverse of 1878, VAM-4, MS64 PCGS. CAC.** A Top 100 Variety. The parallel top arrow feather is characteristic of the Reverse of 1878 and the remnants of an undertype 79 are visible under the primary digits in the date, identifying the extremely popular VAM-4 overdate. The design elements are well-detailed and the well-preserved, lustrous surfaces show vivid shades of violet, green, blue, and slate-gray toning on the obverse. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

- 5207 1880/79-CC Reverse of 1878, VAM-4, MS65+ PCGS. CAC.** Ex: The Michigan Collection. A Top 100 Variety. The three most prominent overdates in the Morgan dollar series are found on the 1880-CC (VAMs 4, 5, and 6). This lustrous high grade example is well struck and displays well preserved fields. We note only wispy contact on the portrait and near the UN in UNITED.  
From The Bowler Collection of Morgan Dollars. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

**1880/79-CC Morgan Dollar, MS66  
Popular VAM-4 Overdate**

- 5208 1880/79-CC Reverse of 1878, VAM-4, MS66 PCGS.** A Top 100 Variety. A spectacular Premium Gem representative of the extremely popular VAM-4, with the parallel top arrow feather and the remnants of the undertype 79 below the last two digits in the date. This coin exhibits sharply detailed design elements throughout, and the well-preserved creamy surfaces radiate vibrant mint luster. Population: 83 in 66 (8 in 66+), 0 finer (6/16). NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

**1880/79-CC Reverse of 1878 Dollar, MS66+  
Conditionally Scarce VAM-4 Variety**

- 5209 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS66+ PCGS. CAC.** A Top 100 Variety. The VAM-4 overdate is scarce in this lofty grade. The present coin displays frosty original luster, is devoid of toning, and has sharply struck central devices. The Reverse of 1878 is significantly scarcer than the Reverse of 1879 of this issue, with an estimated (by Bowers) mintage of just 125,000 pieces. Few examples are seen so fine. Population for this variety: 3 in 66+, 0 finer (6/16). NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

**1880/79-CC Reverse of 1878 Dollar, MS66+  
Unsurpassable VAM-4 Example, Tied for Finest**

- 5210** 1880/79-CC Reverse of 1878, VAM-4, MS66+ PCGS. CAC. A Top 100 Variety. The 79 underdigits show strongly. This is a thickly frosted, high-end Premium Gem whose surfaces are unsurpassable in terms of technical quality. There are no singularly mentionable abrasions. Both sides are untuned with razor-sharp striking definition, including the hair above Liberty's ear and the eagle's breast feathers. A stellar representative of this scarcer 1880-CC variety, tied for finest at either service. Population: 8 in 66+, 0 finer. CAC: 21 in 66, 0 finer (6/16).  
*Ex: Long Beach Signature (Heritage, 9/2004), lot 8346; Brian Loncar Collection, Part II (Heritage, 6/2014), lot 4648. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108*

**1880-CC Morgan Dollar, MS66 Prooflike  
Tied for Finest at PCGS**

- 5211** 1880-CC 8 Over High 7, VAM-5, MS66 Prooflike PCGS. CAC. *Ex: Michigan Collection. A Top 100 Variety. This spectacular, prooflike Premium Gem displays deep reflectivity offset by frosted devices. The few abrasions found on the coin are exaggerated by the prooflike fields but are not significant for the assigned grade. Liberty displays a clean cheek and portrait, with a slight abrasion on the neck truncation. The strike is sharp and nearly full. This is the VAM-5 overdate, with the ears of a high 7 visible above the second 8 of the date. Population: 2 in 66 Prooflike, 0 finer. CAC: 2 in 66, 0 finer (6/16).*  
*From The Bowler Collection of Morgan Dollars. NGC ID# 2542, PCGS# 41133 Base PCGS# 7103*

**1880-CC Silver Dollar, MS66  
VAM-6, 8 Over Low 7**

- 5212** 1880-CC 8 Over Low 7, VAM-6, MS66 PCGS. CAC. A Top 100 Variety. *Ex: The Michigan Collection. The remnants of an earlier 7 are visible within the loops of the second 8 in the date on this Premium Gem 1880-CC dollar. This sharply struck coin has a hint of reflectivity in the fields and frosty luster on the devices. The eye appeal is outstanding. Neither side exhibits mentionable toning. Population: 43 in 66 (5 in 66+), 0 finer. CAC: 15 in 66, 0 finer (6/16).*  
*From The Bowler Collection of Morgan Dollars. NGC ID# 2542, PCGS# 133878 Base PCGS# 7104*

**1880-CC Morgan, MS66  
Reverse of 1878, VAM-7A**

- 5213** 1880-CC 8/7, Reverse of 1878, VAM-7A, MS66 PCGS. A Hit List 40 Variety. *Ex: The Michigan Collection. One of only two 1880-CC Reverse of 1878 VAMs, an honor shared with the VAM-4 overdate. This boldly struck Premium Gem has light chestnut-gold toning and potent cartwheel luster. The reverse appears pristine, and the obverse has only trivial imperfections. Population: 35 in 66 (8 in 66+), 2 finer (6/16).*  
*Ex: Long Beach Signature (Heritage, 9/2011), lot 3584.*  
*From The Bowler Collection of Morgan Dollars. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110*

**1880-CC Half-Roll of Silver Dollars  
From the Carson City Savings Bank**

- 5214 1880-CC Half-Roll of 1880-CC Dollars Uncertified.** This is a fascinating lot: A half-roll (10 coins) of 1880-CC dollars. The dollars are wrapped in the original bank paper and has the imprint of the Carson City Savings Bank. It appears that the upper portion of an eagle is below the bank's name, above is \$10. The top coin (obverse showing) is brilliant except for peripheral color, while the bottom coin (reverse showing) displays rich red and blue toning. The paper is brown, either from handling over 136 years or perhaps this is its original brown color. We hesitate to call this a one-of-a-kind item because you never know what will surface, but we can say this is definitely the first item like this we have seen. (Total: 10 coins) NGC ID# 2542, PCGS# 7100

- 5215 1880-CC MS65+ PCGS. VAM-9.** Ted Clark, an ardent overdate researcher, is credited with discovery of "8/7 Dash" VAM-9 in October 1970. This lustrous and practically brilliant Carson City Gem has a good strike and a well preserved reverse. NGC ID# 2542, PCGS# 7100

- 5216 1880-CC MS65+ PCGS. VAM-8.** Aquamarine, orange, and ruby-red toning adorns the colorful obverse margin. The remainder of this lustrous Carson City Gem is close to brilliant. The fields are smooth and the centers show incompleteness. A bold die line through the M in AMERICA is an identifier for this minor but interesting VAM. NGC ID# 2542, PCGS# 7100

- 5217 1880-CC MS66 PCGS. VAM-3.** Ex: The Michigan Collection. This splendidly unperturbed Gem possesses dazzling luster, and has only a whisper of gold toning. The eye appeal is formidable, even for the lofty MS66 grade. The centers are slightly soft and exhibit faint mint-made roller marks, as often seen on this scarcer Carson City issue. Encased in a green label holder.  
Ex: FUN Signature (Heritage, 1/2007), lot 6907, which realized \$2,760.

**From The Bowler Collection of Morgan Dollars.** NGC ID# 2542, PCGS# 7100

- 5218 1880-CC MS66 PCGS. VAM-8.** Rich autumn-brown, plum-red, and electric-blue toning is limited to the lower right obverse. The remainder of this Carson City dollar is brilliant. Lustrous and carefully preserved with a good strike and attractive eye appeal. NGC ID# 2542, PCGS# 7100

- 5219 1880-CC MS66 PCGS. VAM-3.** Exceptional bands of fire-red, ocean-blue, and lemon-gold toning dominate two-thirds of the obverse, though the field near Liberty's nose remains brilliant. The reverse displays only a whisper of tan patina. Lustrous and nicely struck with unabraded fields and moderate contact on the portrait. NGC ID# 2542, PCGS# 7100

- 5220 1880-CC MS66 PCGS. VAM-8.** The obverse exhibits "end of roll" toning, with straight lines separating the golden-brown, rose-red, and sea-green shades from brilliant portions of the portrait. The reverse remains stone-white. Lustrous and nicely struck with exemplary preservation.

Ex: FUN Signature (Heritage, 1/2006), lot 6366, which realized \$2,415. NGC ID# 2542, PCGS# 7100

- 5221 1880-CC MS66 PCGS. CAC. VAM-3A.** A Super CD Morgan VAM. Die rust near the mintmark and a clashed portrait attribute VAM-3A. This highly lustrous Carson City dollar offers booming luster and smooth, minimally toned surfaces. The strike is good although slightly inexact at the centers. NGC ID# 2542, PCGS# 7100

**1880-CC Morgan Dollar, MS66+  
Elusive in Higher Grades**

- 5222 1880-CC MS66+ PCGS. CAC. VAM-3.** The 1880-CC Morgan dollar was produced in small numbers, with a reported mintage of 591,000 pieces. This Plus-graded Premium Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces, with attractive highlights of champagne-gold toning. PCGS has graded 34 numerically finer examples (6/16). NGC ID# 2542, PCGS# 7100

- 5223 1880-O MS64 PCGS. Micro O.** Rich ruby-red and orange-gold toning dominates a majority of the obverse border. The reverse is brilliant aside from a blush of lemon patina across the upper border. Lustrous and precisely struck with scattered incidental marks. NGC ID# 2543, PCGS# 7114

**1880-O Morgan Dollar, MS64+  
Conditionally Elusive Issue**

- 5224 1880-O MS64+ PCGS. CAC.** A stunning near-Gem with exceptional eye appeal, this 1880-O Morgan dollar features a bold strike with nearly complete hair strands over Liberty's ear. Strong breast feathers are noted on the eagle. This impressive dollar exhibits brilliant and satiny mint surfaces that are almost completely untuned, save for delicate peripheral gold. PCGS has only certified 39 finer examples (7/16). NGC ID# 2543, PCGS# 7114

**1880-O Morgan Dollar, MS64+  
Well-Struck Branch Mint Issue**

- 5225 1880-O MS64+ PCGS. CAC.** Ex: Michigan Collection. Morgan dollars produced at the New Orleans Mint are among the most conditionally scarce issues in the ever-popular series. This date saw a relatively high mintage of more than 5.3 million coins, yet examples are not found in great numbers at this high-end Choice grade level, and pieces rated any finer are rare. This example is brilliant and well-struck, with intense satiny mint luster complementing clean, carefully preserved surfaces. PCGS has graded 39 numerically finer examples (6/16).  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 2543, PCGS# 7114

**1880-O Dollar, MS64 Prooflike  
VAM-4, A Top 100 Variety**

- 5226 1880-O 80/79 Crossbar, VAM-4, MS64 Prooflike PCGS. CAC.** A Top 100 Variety. Ex: The Michigan Collection. The underdigits beneath the 80 appear like smudges in the upper part of those digits with nowhere near the crispness seen on the Carson City dollars of this date. The fields are brightly reflective and set off the heavily frosted devices with a cameo effect. Brilliant throughout and sharply struck. A lovely example of this rare issue with prooflike fields. Population: 18 in 64 (2 in 64+) Prooflike, 1 finer. CAC: 4 in 64, 0 finer (6/16).  
Ex: *The Jimmy G. PCGS Registry Collection of Morgan Dollars with Varieties / Long Beach Signature (Heritage, 2/2008), lot 1145.*  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 356H, PCGS# 41287 Base PCGS# 7117

**1880-O Dollar, MS64 Prooflike  
VAM-4, 80/79 Crossbar**

- 5227 1880-O 80/79 Crossbar, VAM-4, MS64 Prooflike PCGS. CAC.** A Top 100 Variety. The remnants of an earlier 7 are plainly visible within the upper loop of the second 8. The 1880-O Morgan as a date is scarce in the finer Prooflike grades, and this example is particularly reflective and radiant with brilliant-white surfaces. The strike is bold, and only a few trivial grazes on Liberty's cheek prevent an even finer grade. Population: 20 in 64 (2 in 64+) Prooflike, 1 finer (7/16). NGC ID# 356H, PCGS# 41287 Base PCGS# 7117

- 5228 1880-O 8 Over 7 Ear, VAM-6A, MS64 PCGS.** A Top 100 Variety. Small or Micro O. The second 8 in the date displays a "left ear," the remnant of the left edge of the crossbar of an underdigit 7. VAM-6A is distinguished from the rare VAM-6 by clash marks near the portrait. A well struck and highly lustrous example with light peripheral golden toning. Smooth aside from a graze above the eagle's head and a minor abrasion on the mintmark. NGC ID# 2543, PCGS# 133883 Base PCGS# 7114

- 5229 1880-S MS67+ PCGS.** Medium S. Rich orange toning dominates the reverse and visits the obverse margin. Highly lustrous and nicely struck. The preservation is outstanding. Although the 1880-S is available in all grades, it is always in demand from type collectors. NGC ID# 2544, PCGS# 7118

- 5230 1880-S MS67+ PCGS. CAC.** This magnificent Morgan dollar is a high-end Superb Gem, with sharply detailed design elements and impeccably preserved surfaces that show some prooflike reflectivity on the reverse. Eye appeal is tremendous. Housed in a new 30th Anniversary green label holder. NGC ID# 2544, PCGS# 7118

**1880-S Morgan Dollar, MS68  
Outstanding Silver Type Coin**

- 5231 1880-S MS68 PCGS.** Large S. This sharply struck Superb Gem has beautiful powder-blue and golden-brown bands along the left borders. The reverse is semiprooflike, while the obverse exhibits blazing cartwheel sheen. Careful perusal with a loupe locates only minuscule contact. Certified in a green label holder.  
Ex: *Vanek Collection (Heritage, 7/2007), lot 1308, which realized \$5,462.50.* NGC ID# 2544, PCGS# 7118

**1880-S Dollar, MS68  
Outstanding Type Coin**

- 5232 1880-S MS68 PCGS.** Ex: The Michigan Collection. According to the Bowers silver dollar *Encyclopedia*: "In 1880 the only silver coins produced at the San Francisco Mint were dollars. The silver dollars of that year were produced with care, with precise die spacing (in most instances), and today are admired for their quality." This piece is an excellent illustration of Bowers' observation. Exceptionally crisp definition is demonstrated on both sides, and the entirely untuned ice-white surfaces reveal impeccable preservation. A common issue in lower grades, perhaps, but not at this remarkable level of preservation. PCGS has seen only five coins finer (6/16).  
Ex: *Central States Signature* (Heritage, 4-5/2009), lot 2981.  
From *The Bowler Collection of Morgan Dollars*. NGC ID# 2544, PCGS# 7118

- 5233 1880-S MS67 Prooflike PCGS.** Medium S. A brilliant Superb Gem with dazzling field reflectivity and a good strike. The fields are smooth and the cheek shows only unobtrusive contact. The 1880-S is often selected for type purposes due to its eye appeal in exceptional grades. NGC ID# 2544, PCGS# 7119

- 5234 1880/9-S VAM-11, Medium S, MS67 PCGS.** A Hot 50 Variety. An essentially brilliant Superb Gem that boasts booming luster and a bold strike. Minimal grazes on the cheek and fields determine the grade. Population: 65 in 67 (6 in 67+), 3 finer (6/16).  
Ex: *Fort Worth ANA Signature* (Heritage, 3/2010), lot 1353, which realized \$1,610.  
From *The Bowler Collection of Morgan Dollars*. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

- 5235 1880/79-S VAM-11, Medium S, MS67 PCGS.** A Hot 50 Variety. Light butter-gold toning visits portions of the upper obverse and lower reverse, but this lustrous Superb Gem is predominantly brilliant. The strike is full and the fields are virtually pristine. The portrait exhibits wispy contact. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

- 5236 1880/9-S VAM-11, Medium S, MS67 PCGS.** A Hot 50 Variety. Die fill within the 0 in the date is characteristic of *Guide Book-listed* VAM-11. The small J-shaped die scratch on Liberty's neck is also diagnostic. The present lustrous and well struck Superb Gem is mostly white but has a hint of peripheral golden toning and a small spot above the first L in DOLLAR. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

**1880/9-S Dollar, MS66 Deep Mirror Prooflike  
Stark Cameo Contrast**

- 5237 1880/9-S VAM-11 MS66 Deep Mirror Prooflike PCGS.** A Hot 50 Variety. The remnant of a 9 is visible within the upper portion of the 0 in the date. This variety is rarely seen in Deep Mirror Prooflike at the Premium Gem level. The present example is brilliant and showcases stark cameo contrast. The strike is sharp, and only a few trivial grazes determine the grade. Population: 14 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (7/16). PCGS# 41508 Base PCGS# 97123

- 5238 1881 MS66 PCGS.** Ex: The Michigan Collection. Though readily available in lower to mid-level Mint State, the 1881 is challenging in Premium Gem. This MS66 specimen displays silver-gray surfaces with frosty luster and sharply struck design elements. Both sides are impeccably preserved. PCGS has seen five Superb Gems finer (6/16).  
Ex: *Dallas Signature* (Heritage, 11/2006), lot 1220.  
From *The Bowler Collection of Morgan Dollars*. NGC ID# 2546, PCGS# 7124

**1881 Morgan Dollar, MS66+  
Rainbow-Toned Obverse, Brilliant Reverse**

- 5239 1881 MS66+ PCGS. CAC.** Blended hues of golden-orange, blue, green, and violet drape the obverse, while the reverse remains wholly brilliant. Frosty luster shines through the colorful obverse patina and issues from the untuned surfaces on the other side. Sharply struck and well cared for, this Premium Gem Morgan dollar would be exceedingly difficult to improve upon, as PCGS reports just five higher grading events (6/16). NGC ID# 2546, PCGS# 7124

- 5240 1881-CC MS66 PCGS.** Attractive shades of champagne-gold and lavender-gray toning visit the well-preserved surfaces of this impressive Premium Gem, with most of the color on the obverse. The design elements are well-detailed and vibrant mint luster shines through the patina. NGC ID# 2549, PCGS# 7126

- 5241 1881-CC MS66 PCGS. VAM-2.** VAM-2 shows the 88 in the date doubled inside the upper loops. This Premium Gem example displays frost-white mint luster with a touch of reflectivity in the fields. The strike is sharp, and only a few trivial grazes limit the grade. NGC ID# 2549, PCGS# 7126

- 5242 1881-CC MS66 PCGS. VAM-2.** Glimpses of golden patina adorn the margins, but this highly lustrous Carson City dollar is otherwise brilliant. The reverse and the obverse field are virtually pristine, and the portrait displays only delicate contact. NGC ID# 2549, PCGS# 7126

**5243 1881-CC MS66 PCGS. VAM-2.** Dazzling luster encompasses this fully struck and lower mintage Carson City silver dollar. Brilliant save for a trace of golden patina. The fields are nearly pristine, and the portrait shows only incidental contact. NGC ID# 2549, PCGS# 7126

**5244 1881-CC MS66+ PCGS. VAM-2.** The second 8 shows a bar in the upper loop. The 1881-CC is popular as a collectible Carson City issue available in high grades. This incredible Premium Gem dollar offers spectacular iridescent toning over the obverse. Shades include blue, magenta, and apricot-orange. The reverse is totally brilliant. Fully struck. NGC ID# 2549, PCGS# 7126

**5245 1881-CC MS66 PCGS. CAC. VAM-2.** Light tan toning graces this lustrous and precisely struck Premium Gem. An exemplary example of the second-lowest mintage Carson City Morgan dollar issue, made available in quality grades by the GSA auctions of the 1970s. NGC ID# 2549, PCGS# 7126

**5246 1881-CC MS66+ PCGS. CAC.** The 1881-CC is a popular Carson City type issue, as 147,485 examples were released to the public from GSA holdings in the 1970s. This wonderful, all-brilliant dollar is awash in lively mint frost. Marvelously preserved and fully struck with a hint of reflectivity on the reverse. NGC ID# 2549, PCGS# 7126

**5247 1881-CC MS66+ PCGS. CAC.** This Plus-graded Premium Gem exhibits flawless brilliant surfaces that radiate vibrant mint luster on both sides. The design elements are well-detailed and overall visual appeal is outstanding. From a low branch mint mintage of 296,000 pieces. NGC ID# 2549, PCGS# 7126

**5248 1881-CC MS66+ PCGS. CAC.** Struck from well-made obverse and reverse dies, this Premium Gem exhibits frosty silver luster and untuned surfaces with exceptional eye appeal. NGC ID# 2549, PCGS# 7126

#### 1881-CC Morgan Dollar, MS67 Rare in Finer Condition

**5249 1881-CC MS67 PCGS. Ex:** The Michigan Collection. The smooth, satin luster is only the first thing one notices about this Superb Gem. Virtually white, this coin shows only the merest traces of contact acquired over its 125 years of existence. Well-struck, as is typical for this issue. A few spindly peripheral die cracks (as struck) are visible, most notably on the reverse. PCGS has seen only four numerically finer representatives (6/16).  
*Ex: Dallas Signature (Heritage, 11/2006), lot 1231.*  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 2549, PCGS# 7126

#### 1881-CC Silver Dollar, MS67 Mint-Fresh, Frosty Surfaces

**5250 1881-CC MS67 PCGS.** Glowing, frosty mint luster rolls over beautifully preserved surfaces on this Superb Gem 1881-CC Morgan dollar, illuminating sharp devices and faint traces of pale champagne color. Eye appeal is remarkable. This Carson City issue is infrequently offered in MS67, and finer examples are exceedingly rare. PCGS and NGC each list only four numerically higher-grade pieces (6/16). NGC ID# 2549, PCGS# 7126

#### 1881-CC Dollar, MS66+ Prooflike Tied for Finest at PCGS

**5251 1881-CC MS66+ Prooflike PCGS. CAC.** A dazzling coin that combines radiant cartwheel luster with substantial prooflike mirroring in the fields. The devices are sharp and frost-white, providing noticeable cameo contrast. A light graze on Liberty's eyebrow is the only noticeable abrasion. This Plus-graded Premium Gem is conditionally rare, tied for the finest Prooflike 1881-CC dollar at PCGS. Population: 32 in 66 (3 in 66+) Prooflike, 0 finer. CAC: 9 in 66, 0 finer (6/16). NGC ID# 2547, PCGS# 7127

**5252 1881-CC MS64 Deep Mirror Prooflike PCGS.** The GSA release of the 1970s saw the distribution of 147,485 1881-CC Morgan dollars — nearly half of the original mintage. Deep Mirror Prooflike coins are somewhat available, though they are usually heavily bagmarked. This dusky, brilliant Choice dollar is strongly defined. Two small ticks on Liberty's jaw define the grade. Frosty and boldly contrasted. NGC ID# 2547, PCGS# 97127

**5253 1881-CC MS64 Deep Mirror Prooflike PCGS.** Most 1881-CC dollars with Deep Mirror Prooflike surfaces are heavily bagmarked. Finding an attractive one can be a formidable challenge. This Choice example maintains virtually all-brilliant, profoundly contrast surfaces with a thick layer of frost over needle-sharp devices. NGC ID# 2547, PCGS# 97127

**1881-CC Morgan Dollar, MS66  
Deep Mirror Prooflike Surfaces**

**5254 1881-CC MS66 Deep Mirror Prooflike PCGS.** From a low mintage of 296,000 pieces, the 1881-CC Morgan dollar was heavily represented in the Treasury and GSA releases of the 1960s and '70s, making the issue a popular one with present-day collectors. This delightful Premium Gem displays sharply detailed, frosty design elements and well-preserved reflective fields, with outstanding eye appeal. Population: 56 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (6/16). NGC ID# 2547, PCGS# 97127

**5255 1881-O MS65+ PCGS.** Frosty, completely brilliant surfaces define this New Orleans dollar. Central detail is typical for the facility, but the motifs are well-defined elsewhere. High-end for the grade with only one notable scrape on the eagle's breast. Remarkably smooth. NGC ID# 2548, PCGS# 7128

**5256 1881-O MS65 PCGS. CAC.** Ex: The Michigan Collection. A lovely Gem example with brilliant, satiny luster and a vibrant cartwheel effect. The coin appears a grade point finer at first glance, but closer study reveals a few faint grazes in the left obverse field that define the MS65 designation. PCGS has recorded 34 numerically finer examples (6/16).  
Ex: *Central States Signature (Heritage, 4-5/2009)*, lot 8712.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 2548, PCGS# 7128

**1881-O Morgan Dollar, MS66  
New Orleans Condition Rarity**

**5257 1881-O MS66 PCGS.** A supremely smooth and lustrous example of this conditionally challenged New Orleans issue, fully brilliant-white on both sides. Unlike many O-Mint dollars, the strike is generally sharp on the 1881-O and this Premium Gem displays bold definition over the ear and on the eagle's talons and plumage. Only a few tiny abrasions are visible on the coin, which is tied for the numerically finest-certified at either service. Population: 34 in 66 (3 in 66+), 0 finer (6/16). NGC ID# 2548, PCGS# 7128

**5258 1881-S MS67+ PCGS. CAC.** This is a popular type issue that is readily available in the finest levels of preservation. Cartwheel luster rolls over this brilliant Superb Gem. The technical and aesthetic quality are top-notch. Not a single mark is worthy of individual attention. Razor-sharp. NGC ID# 2549, PCGS# 7130

**5259 1881-S MS67+ PCGS. CAC.** 30th Anniversary Green Label Holder. Impressive fire-red, orange-gold, and powder-blue patina consumes the obverse. The reverse shows only a peripheral band of lemon toning. Lustrous and well struck with exemplary surfaces. NGC ID# 2549, PCGS# 7130

**1881-S Dollar, Radiant MS68  
Amazingly Clean Surfaces**

**5260 1881-S MS68 PCGS. CAC.** Ex: The Michigan Collection. Get out the magnifier — that's what it's going to take to find any abrasions on this immaculate coin. The surfaces are brilliant throughout, Liberty's cheek is smooth and creamy, and the devices are fully struck. This is the ultimate Morgan type coin. PCGS has seen only two numerically finer representatives (6/16).  
Ex: *Denver Signature (Heritage, 8/2006)*, lot 2857; *Long Beach Signature (Heritage, 6/2010)*, lot 1086.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 2549, PCGS# 7130

**5261 1881-S VAM-54B, Wounded Eagle, MS65 PCGS.** A Hit List 40 Variety. According to Morgan dollar expert John Roberts, VAM-54B "features one of the longest die breaks found on any coin in the series. The break traverses the eagle's breast and neck with displacement of the design." The present white, lustrous, and well preserved Gem shows the break in its full glory. Population: 5 in 65, 1 finer (7/16). PCGS# 412604 Base PCGS# 7130

**5262 1882 MS66+ PCGS. CAC.** Ex: The Michigan Collection. Sharply struck devices and radiant, frosty mint bloom are among the pleasing attributes this high-end Premium Gem has to offer. The surfaces are untuned and nearly free of disturbances, with Liberty's cheek being particularly clean. PCGS has certified just 10 numerically finer examples (6/16).  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 254A, PCGS# 7132

**5263 1882-CC MS66+ PCGS.** Both sides of this high-end Premium Gem are awash with strong luster and each exhibits sharply struck design features, including the hair above Liberty's ear. A few light grazes on the cheek and left obverse field are commensurate with the designated grade. NGC ID# 254S, PCGS# 7134

**5264 1882-CC MS66+ PCGS.** 30th Anniversary Green Label Holder. This is a sharp, high-end Premium Gem with frosty mint luster and virtually untuned surfaces. Save for a few faint grazes in the left obverse field, this eye-appealing Carson City Morgan appears virtually perfect. Finer pieces are elusive and pricey. NGC ID# 254S, PCGS# 7134

**5265 1882-CC MS66+ PCGS.** A high-end Premium Gem with frosty, mint-fresh luster and sharp design elements. Neither side exhibits mentionable toning. Liberty's cheek and the fields are exceptionally clean. Finer examples of the 1881-CC dollar are elusive and out of reach for many collectors. NGC ID# 254S, PCGS# 7134

**5266 1882-CC MS66 PCGS. CAC.** Sharply struck and brilliant with booming luster and smooth surfaces. A delightful Carson City silver dollar. Certified in a green label holder.  
Ex: *Dallas Signature (Heritage, 10/2009)*, lot 955, which realized \$1,150. NGC ID# 254S, PCGS# 7134

**5267 1882-CC MS66+ PCGS. CAC.** A dash of golden toning appears along the upper obverse and lower reverse borders, but the remainder of each side exhibits radiant, brilliant luster. The strike is sharp, and each side shows outstanding preservation with slight reflectivity in the fields. Finer examples are elusive. NGC ID# 254S, PCGS# 7134

**1882-CC Silver Dollar, MS67**  
**Only One Coin Certified Finer**

- 5268 1882-CC MS67 PCGS.** Ex: The Michigan Collection. This dazzling Superb Gem is virtually stone-white and possesses an exemplary strike. Even the claws and the hair above the ear are intricately defined. The cheek is impressively devoid of marks, and the semiprooflike fields are also unusually blemish-free. The 1882-CC emerged from the GSA hoard in quantity, but most examples cannot compete with the present piece. Population: 76 in 67 (2 in 67+), 1 finer (6/16).  
Ex: *FUN Signature* (Heritage, 1/2007), lot 6989.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 254S, PCGS# 7134

**1882-CC Morgan Dollar, MS67**  
**Only One Finer Coin at PCGS**

- 5269 1882-CC MS67 PCGS.** This stunning Superb Gem exhibits well-preserved, creamy surfaces that are brilliant and silky-smooth save for a tiny contact on the jawline. The design elements are well-detailed, with the slightest touch of softness on the hair strands above Liberty's ear. Vibrantly lustrous, the coin's eye appeal is tremendous. VAM enthusiasts will note die clashing and die cracks on both sides of the coin. Population: 76 in 67 (2 in 67+), 1 finer (6/16).  
**From The Conch Collection.** NGC ID# 254S, PCGS# 7134

**1882-CC Silver Dollar, MS67**  
**Among the Finest Known**

- 5270 1882-CC MS67 PCGS.** Despite being readily available in lower grades, the 1882-CC Morgan dollar is scarce in Superb Gem condition, and only a single coin is numerically finer than the present example. The strike is sharp, and each side radiates frosty mint luster. The obverse has mottled tan-gold toning, while the reverse is brilliant. Population: 76 in 67 (2 in 67+), 1 finer (6/16). NGC ID# 254S, PCGS# 7134

- 5271 1882-CC MS65 Deep Mirror Prooflike PCGS.** A brilliant Gem 1882-CC Morgan dollar, showing frost-white design elements set against mirrored, well-preserved fields. The strike is a trifle soft on the hair above Liberty's ear, but the detail is otherwise pleasing. Finer Deep Mirror Prooflike examples are scarce. NGC ID# 254B, PCGS# 97135

- 5272 1882-CC MS65+ Deep Mirror Prooflike PCGS. CAC.** The stark white-on-black contrast of this high-end Gem Deep Mirror Prooflike Carson City dollar displays extravagant eye appeal. The strike is sharp, and the depth of mirroring in the fields is incredible. There are a few trivial marks on Liberty's cheek that limit the grade. NGC ID# 254B, PCGS# 97135

**1882-O Silver Dollar, MS66**  
**High-End for the Issue**

- 5273 1882-O MS66 PCGS.** A beautifully preserved example of this conditionally elusive New Orleans issue, showing an above-average strike and rolling mint luster. A blush of light golden toning adds warmth to the obverse, and there are no distracting abrasions. Population: 55 in 66 (4 in 66+), 6 finer (6/16). NGC ID# 254C, PCGS# 7136

**1882-O Dollar, Outstanding MS66**  
**Vibrant Cartwheel Luster**

- 5274 1882-O MS66 PCGS. CAC. VAM-24.** Ex: The Shrike Set/The Michigan Collection. The knob of the 2 is minutely doubled inside, and the O mintmark is left of center and tilted slightly to the left. There is moderate interest in this variety. Both sides are fully brilliant with sharp details and satin luster. An excellent candidate for the specialist. Population: 55 in 66 (4 in 66+), 6 finer. CAC: 7 in 66, 2 finer (6/16).  
Ex: *The Shrike Set - The Karschner Collection of Morgan Dollars / FUN Signature* (Heritage, 1/2011), lot 5921.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 254C, PCGS# 7136

- 5275 1882-O/S Recessed, VAM-4, MS64 PCGS.** Ex: The Michigan Collection. A Top 100 Variety. The "Recessed" overmintmark, one of three different die varieties of the 1882-O/S. This well struck Choice New Orleans dollar is well preserved and displays delicate almond-gold and cream-gray toning. The motifs exhibit die rust, characteristic for VAM-4.  
Ex: *Long Beach Signature* (Heritage, 9/2008), lot 2686, which realized \$3,450.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

- 5276 1882-S MS67+ PCGS.** Here is a high-end Superb Gem that might have garnered a full MS68 grade were it not for some faint roller marks (mint made) that appear on Liberty's cheek at certain angles. The strike is bold, and the surfaces yield the vibrant cartwheel luster for which the 1882-S is well-known. This piece shows wisps of light golden toning as well. NGC ID# 254F, PCGS# 7140

**1882-S Dollar, MS68  
Unsurpassed Quality**

- 5277 1882-S MS68 PCGS. CAC.** Virtually the entire production of 1882-S Morgan dollars was kept in storage, explaining the issue's availability through this seemingly unimprovable grade level. Each side of this near-flawless dollar is largely brilliant with pale, dusky gold patina. However, a burst of spectacular rainbow toning occurs near the right obverse border. Sharply struck and ideal for type purposes. Population: 55 in 68 (1 in 68+), 0 finer (7/16). NGC ID# 254F, PCGS# 7140

**1882-S Dollar, Impressive MS68  
None Certified Finer**

- 5278 1882-S MS68 PCGS. CAC.** Ex: The Michigan Collection. The mintmark is tilted sharply to the left on this example. Both sides of this Superb Gem have frosty silver luster with incredible eye appeal. The surfaces are pristine and fully brilliant, while the design elements are boldly defined. This specimen is among the finest that PCGS or NGC have certified. Population: 54 in 68 (1 in 68+), 0 finer. CAC: 33 in 68, 0 finer (6/16).  
Ex: *The Shrike Set - The Karschner Collection of Morgan Dollars / FUN Signature* (Heritage, 1/2011), lot 5925.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 254F, PCGS# 7140

- 5279 1882-S MS65 Deep Mirror Prooflike ANACS.** A sliver of reddish-orange at the margins frames the silver-gray toning in the central areas. While the field-device contrast is not all that pronounced on this issue (Bowers, 2007), this coin is an exception. The reverse contrast is especially strong. Sharply struck design elements round out the coin's eye appeal. NGC ID# 254F, PCGS# 97141
- 5280 1883 MS67 PCGS.** Exceptionally clean surfaces and softly frosted mint luster are the hallmarks of this conditionally scarce 1883 silver dollar. Each side is mostly brilliant, although a halo of light golden toning appears around the extreme outer peripheries. The strike is bold, and eye appeal is excellent. PCGS list four numerically finer representatives (7/16). NGC ID# 254G, PCGS# 7142

**1883 Silver Dollar, MS67  
Elusive So Well-Preserved**

- 5281 1883 MS67 PCGS. CAC.** Ex: The Michigan Collection. There is no denying the Superb Gem grade assigned to this lovely Morgan. The smooth, virtually white, impeccably preserved surfaces radiate dazzling luster. The fields are partially prooflike and offer a mild contrast with the motifs. All of the design elements are nicely brought up, with good definition apparent in the hair over Liberty's ear and on the eagle's breast feathers. Scarce at this lofty level of preservation. PCGS has seen four finer submissions (6/16).  
Ex: *Long Beach Signature* (Heritage, 9/2005), lot 5712; *The Jackson Hole Collection / Dallas Signature* (Heritage, 4/2007), lot 35.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 254G, PCGS# 7142

- 5282 1883 MS65 Deep Mirror Prooflike PCGS.** Sharp and brilliant, this Gem Deep Mirror Prooflike 1883 silver dollar displays stark cameo contrast and pleasing eye appeal. Considerable flash attracts the viewer from a distance. PCGS lists 10 Deep Mirror Prooflike coins numerically finer (7/16). NGC ID# 254J, PCGS# 97143

- 5283 1883-CC MS66+ PCGS. CAC.** The obverse of this Plus-graded Premium Gem displays spectacular shades of burnt-orange, lilac, and violet toning, while the reverse remains essentially brilliant. The impeccably preserved surfaces radiate vibrant mint luster and the design elements are sharply detailed throughout. NGC ID# 254J, PCGS# 7144

- 5284 1883-CC MS66+ PCGS. CAC.** A delightful Plus-graded Premium Gem from the famous Carson City Mint, this coin exhibits sharply detailed design elements and impeccably preserved surfaces with vibrant mint luster on both sides. The brilliant centers yield to accents of turquoise and sea-green at the peripheries. NGC ID# 254J, PCGS# 7144

- 5285 1883-CC MS66+ PCGS. CAC.** Vivid shades of violet and emerald-green toning visit the obverse of this high-end Premium Gem, with brilliant prooflike reflectivity on the reverse. The design elements are sharply detailed and no mentionable distractions are evident. Eye appeal is terrific. NGC ID# 254J, PCGS# 7144

---

**1883-CC Silver Dollar, MS67**  
**Extremely Rare Finer**

**5286 1883-CC MS67 PCGS.** Ex: The Michigan Collection. This remarkable Carson City type coin offers delicate chestnut toning and booming cartwheel luster. The strike is crisp, even on the hair above Liberty's ear. Both sides are splendidly smooth, with the cheek particularly impressive in its lack of contact. PCGS and NGC combined have certified just five pieces numerically finer (6/16). Ex: *Long Beach Signature* (Heritage, 9/2006), lot 5111; *Dallas Signature* (Heritage, 11/2006), lot 1255.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 254J, PCGS# 7144

---

**1883-CC Dollar, MS67 Prooflike**  
**Brilliant and Well-Balanced**

**5287 1883-CC MS67 Prooflike PCGS.** Prooflike 1883-CC Morgan dollars are rarely encountered in grades above MS66. This delightful Premium Gem exhibits sharply detailed, frosty design elements and deeply reflective fields that show only the most insignificant signs of contact. Neither service has graded any finer examples (6/16). NGC ID# 254H, PCGS# 7145

---

**1883-CC Dollar, MS66 Deep Mirror Prooflike**  
**In an Old Green Label Holder**

**5288 1883-CC MS66 Deep Mirror Prooflike PCGS.** Lightly frosted motifs are highlighted by the illimitable depth of watery fields, and a powerful strike manifests itself on sharply defined design features. This includes the hair over Liberty's ear and the eagle's breast feathers, the latter of which are often weak on this issue. Some whispers of gold-tan are noted on the obverse periphery. A few small obverse marks may prevent an even higher grade. Housed in an old green label holder. PCGS has seen only two numerically finer Deep Mirror Prooflike coins (7/16). Ex: *Dallas Signature* (Heritage, 4/2007), lot 1087. NGC ID# 254H, PCGS# 97145

---

**1883-O Silver Dollar, MS67**  
**None Certified Finer**

**5289 1883-O MS67 PCGS.** Bright, satiny surfaces are nicely struck for this often substandard New Orleans issue and have escaped all but the most insignificant signs of contact. Perhaps its most endearing feature, however, is a bright, snow-white appearance over each side with traces of gold around the outer peripheries. Population: 53 in 67 (2 in 67+), 0 finer (7/16). Ex: *Long Beach Signature* (Heritage, 2/2005), lot 10130; *Long Beach Signature* (Heritage, 2/2008), lot 1209. NGC ID# 254J, PCGS# 7146

---

**1883-O Morgan, MS67**  
**Scarce, Among the Finest Certified**

**5290 1883-O MS67 PCGS.** Ex: Jackson Hole. A handsome Superb Gem that boasts booming luster and gorgeous preservation. Nearly brilliant, but a trace of tan color visits both sides. The New Orleans Mint dollars are characterized by generally weak strikes, often lacking detail above Liberty's ear and on the eagle's breast. This example is an exception to that rule, and possesses exceptional detail in both of those locations, as well as everywhere else. Perhaps Dave Bowers was considering this coin when he said: "Cherrypicking is definitely recommended, this making all the difference between your high-quality collection and the ordinary quality of most others." Population: 53 in 67 (2 in 67+), 0 finer (6/16). Ex: *Long Beach Signature* (Heritage, 2/2005), lot 7230; *Palm Beach Signature* (Heritage, 3/2006), lot 1098; *The Jackson Hole Collection / Dallas Signature* (Heritage, 4/2007), lot 37.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 254J, PCGS# 7146

**1883-O Dollar, Frosty MS67  
Brilliant, Frosted Surfaces**

- 5291 1883-O MS67 PCGS.** Unusually frosty luster adorns the essentially brilliant surfaces of this Superb Gem 1883-O Morgan dollar. The usual New Orleans Mint strike softness is seen on the eagle's breast and the hair above Liberty's ear, but there are no other characteristics that are less than impressive. The 1883-O is a common date in lower grades but becomes conditionally scarce at the Superb Gem level. Population: 53 in 67 (2 in 67+), 0 finer (6/16). NGC ID# 254J, PCGS# 7146

**1883-O Dollar, MS67  
None Graded Higher**

- 5292 1883-O MS67 PCGS. CAC.** About 45% of the obverse of this lovely Superb Gem exhibits gold and blue-green toning, while the balance of the obverse and the entire reverse are fully brilliant and untoned. A wonderful example that is tied for the finest certified. Population: 53 in 67 (2 in 67+), 0 finer (7/16).  
Ex: ANA National Money Show (Heritage, 10/2012), lot 4794. NGC ID# 254J, PCGS# 7146
- 5293 1883-S MS61 PCGS.** A brightly lustrous, satiny Mint State example of this better San Francisco issue, showing a bold strike and lustrous silver surfaces. Scattered abrasions contribute to the grade, although the visual appeal is pleasing for the MS61 level. NGC ID# 254K, PCGS# 7148
- 5294 1883-S MS63 PCGS.** This is a challenging issue to locate in Mint State, far more so than coins struck at the other mints in 1883. Despite a generous mintage of 6.2 million pieces, the 1883-S circulated extensively. This wholly untuned Select dollar offers attractive cartwheel luster over lightly marked surfaces. Well-detailed with minor softness over the ear. NGC ID# 254K, PCGS# 7148
- 5295 1883-S MS63 PCGS.** Cartwheel luster and virtually untuned surfaces contribute to the eye appeal of this Select example. The strike is sharp, including the centers, further adding to the attractiveness of this piece. Scattered marks and grazes, including a number on Liberty's face, contributed to the grade. NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, Toned MS64  
Notable Rarity in High Grade**

- 5296 1883-S MS64 PCGS.** Lavender, rose, and blue shadings shroud the obverse surfaces. Similar hues adorn the reverse rims but leave the interiors largely brilliant. This is a strongly defined near-Gem with frosty S-mint luster that percolates through the patina. The 1883-S is a notable condition rarity, and PCGS has only seen 19 higher grading events (6/16). NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, MS64  
Tone-Free Surfaces**

- 5297 1883-S MS64 PCGS. CAC.** Dazzling cartwheel luster radiates from the tone-free surfaces of this near-Gem S-mint dollar. The motifs are well-rendered, as is evident from the relatively sharp definition in the hair over Liberty's ear and on the eagle's breast feathers. A few minor contact marks and luster grazes preclude a higher grade. There are merely 19 finer grading events at PCGS (4/16).  
Ex: Dallas Signature (Heritage, 11/2007), lot 1124.  
From The Bowler Collection of Morgan Dollars. NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar  
Brilliant Near-Gem**

- 5298 1883-S MS64 NGC. CAC.** Semiprooflikeness in the fields surrounds boldly struck devices to enhance the near-Gem status of this brilliant, untuned silver dollar. Potential bidders will want to weigh the considerable price jump into the next highest, full Gem grade, since this San Francisco issue is a legendary rarity when MS65 or finer. NGC has certified just 16 numerically finer coins (6/16). NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, MS64+  
Exceedingly Rare in Better Condition**

**5299 1883-S MS64+ PCGS. CAC.** The 1883-S is a significant condition rarity in Gem condition, where examples command well into the five-figure range when they appear at auction. High-end Choice examples like this prove very scarce and attract serious attention from knowledgeable specialists. Dusky lilac gray patina dominates each side, intermixed with splashes of champagne-gold color. The devices show strong detail, and Liberty's cheek is remarkably clean with only a few small ticks near the nose. PCGS has seen 20 finer examples (7/16). NGC ID# 254K, PCGS# 7148

**5300 1884 MS66+ PCGS. CAC.** Ex: The Michigan Collection. Rich, rolling cartwheel luster appears over frosty silver-white surfaces that are essentially pristine, save for a couple of marks on Liberty's chin — the largest of which appears to be a small planchet flaw. A beautiful coin and quite close to a full strike. PCGS lists 55 finer submissions (6/16).  
Ex: *Long Beach Signature* (Heritage, 9/2011), lot 3625.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 254L, PCGS# 7150

**5301 1884 MS66+ PCGS. CAC.** Frosty, luminous mint luster rolls over the high-end Premium Gem surfaces of this 1884 Morgan dollar, illuminating copper-red, gold, mint-green, and lavender-gray toning on each side. Liberty's cheek is particularly clean. PCGS has seen 56 Superb Gems finer (7/16). NGC ID# 254L, PCGS# 7150

**5302 1884-CC MS66+ PCGS. CAC.** This is one of the most available Carson City dollars in the series because of its high mintage and survival rate. Original mint brilliance and swirling luster are the hallmarks of this Premium Gem. The absence of any noteworthy flaws and exceptional eye appeal account for the added recognition from PCGS and CAC. NGC ID# 8BBF, PCGS# 7152

**1884-CC Dollar, Dazzling MS67  
Extremely Difficult to Upgrade**

**5303 1884-CC MS67 PCGS. VAM-7.** The 18 in the date is doubled, and a die gouge occurs on the upper cheek. Dazzling mint luster cartwheels around each side uninterrupted by any surface imperfections. Radiant brilliance characterizes this Superb Gem Carson City dollar. An air of prooflike reflectivity enhances the aesthetic quality. The 1884-CC (1.1 million coins struck) is very scarcely encountered in MS67, and PCGS has seen merely three submissions in better condition (6/16). NGC ID# 8BBF, PCGS# 7152

**1884-CC Silver Dollar, MS67  
Finer Examples Are Rare**

**5304 1884-CC MS67 PCGS.** Ex: The Michigan Collection. The thick mint frost is nearly perfect with none of the usually seen abrasions that are commonly found on Carson City dollars. This is a fully brilliant coin that is sharply defined throughout. A perfect CC dollar for a mintmark type set. PCGS has seen only three numerically finer submissions, NGC just one (6/16).  
Ex: *Dallas Signature* (Heritage, 7/2006), lot 2804; *ANA Signature* (Heritage, 3/2007), lot 1271.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 8BBF, PCGS# 7152

**1884-CC Silver Dollar, MS67  
Eye-Catching Luster and Originality**

**5305 1884-CC MS67 PCGS. VAM-3.** This variety shows the 188 in the date lightly doubled. The 1884-CC is a plentiful Carson City issue overall, heavily represented in the GSA sales of the early 1970s, but its availability declines sharply at the Superb Gem level. The present MS67 coin displays a bold strike and frosty, unabraded surfaces with golden peripheral toning around brilliant interiors. A few faint, vertical roller marks are observed on Liberty's chin. PCGS has seen three numerically finer submissions (6/16).  
**From The Conch Collection.** NGC ID# 8BBF, PCGS# 7152

**1884-CC Dollar, MS67  
VAM-2, Repunched Date**

**5306 1884-CC MS67 PCGS. CAC. VAM-2.** The 1 in the date is repunched. Orange-red, jade-green, and lavender toning encompasses this thoroughly lustrous and fully struck Superb Gem. This Carson City type coin has a splendidly smooth reverse and only minor contact on the left obverse. CAC Population: 27 in 67, 2 finer (6/16). NGC ID# 8BBF, PCGS# 7152

- 5307 1884-CC MS66 Prooflike PCGS. VAM-2.** Ex: GSA. The flag of the 1 in the date is repunched, as is the first C in the mintmark. A practically brilliant Carson City type coin that offers mirrored fields, a good strike, and pleasing preservation. NGC ID# 254M, PCGS# 7153

**1884-CC Dollar, MS67 Prooflike  
None Numerically Finer**

- 5308 1884-CC MS67 Prooflike NGC.** The 1884-CC Morgan represented one-third of all Carson City Morgan dollars that were distributed through the GSA in the 1970s. However, just 10% of all NGC certified Morgans are designated Prooflike or better, and the percentage drops to below 7% in MS67. This brilliant Superb Gem has untoned silver surfaces and extraordinary field-to-device contrast. The surfaces are pristine and the strike is bold. Census: 9 in 67 (1 in 67+) Prooflike, 0 finer (7/16). NGC ID# 254M, PCGS# 7153
- 5309 1884-O MS67 PCGS.** Despite its status as a high-mintage common date Morgan dollar, the 1884-O is rarely found in Superb Gem or finer grades. This impressive example has frosty mint luster with brilliant and untuned silver surfaces. An exceptional example exceeded by a single piece at PCGS (6/16). NGC ID# 254N, PCGS# 7154

**1884-O Morgan Dollar, MS66  
Remarkable Deep Mirror Prooflike Specimen**

- 5310 1884-O MS66 Deep Mirror Prooflike PCGS. CAC.** The 1884-O Morgan dollar boasts a large mintage of 9.7 million pieces. Examples are available in all grades, and the issue is most popular with type collectors. The present coin possesses reflective fields and frosted devices, with a strong element of contrast. Only some hairlines and a few speckles on the obverse prevent an even higher grade. Housed in a green label holder. Population: 54 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer. CAC: 8 in 66, 0 finer (6/16). NGC ID# 256X, PCGS# 97155
- 5311 1884-O/O VAM-10 MS67 PCGS.** Ex: New York City Set, The Michigan Collection. A Hot 50 Variety. Wisps of chestnut toning adorn this thoroughly lustrous and nearly immaculate Superb Gem. The strike is above average, and the quality is essentially unimprovable. The 1884-O is common in typical Mint State grades, but is a significant conditional scarcity at the MS67 level. Population: 50 in 67, 1 finer (10/06).  
Ex: Michael Casper Collection, Part Three (Heritage, 3/2006), lot 1108, which realized \$4,025.  
From The Bowler Collection of Morgan Dollars. NGC ID# 254N, PCGS# 133993 Base PCGS# 7154

- 5312 1884-S AU58 NGC.** Tinges of gold and blue toning appear around the borders of this nearly Uncirculated 1884-S dollar, while the interiors show mostly brilliant patina. The coin is lustrous in the fields and shows a bold strike. NGC ID# 254P, PCGS# 7156

- 5313 1884-S AU58 NGC.** The fields show a balance of vibrant luster and semiprooflike reflectivity on this near-Mint 1884-S Morgan dollar. The strike is bold, and wear is light. Each side shows a blush of light golden toning. NGC ID# 254P, PCGS# 7156

- 5314 1884-S AU58 PCGS.** Deep olive-gray and lighter golden hues appear over each side of this near-Mint 1884-S Morgan dollar, while the fields retain ample amounts of luster. The coin is well-struck and shows trivial high-point friction. NGC ID# 254P, PCGS# 7156

- 5315 1884-S AU58 PCGS.** Beautifully deep lavender-gray, sea-green, and golden toning appears on each side of this near-Mint 1884-S dollar in concentric hues. Luster swirls in the fields. This piece is well-detailed and eye-appealing for the grade and issue. NGC ID# 254P, PCGS# 7156

- 5316 1884-S AU58 PCGS.** Nearly full luster rolls around the lightly abraded surfaces of this near-Mint 1884-S Morgan dollar. Slight high-point friction and traces of light golden toning accompany the grade. A small reed mark near Liberty's mouth is the only mentionable abrasion. NGC ID# 254P, PCGS# 7156

- 5317 1884-S AU58 PCGS Secure. CAC.** A highly lustrous example with traces of golden toning around the periphery. This near-Mint 1884-S Morgan dollar exhibits a brush of friction over the high points of the design with light chatter on the cheek, as usual. Outstanding eye appeal for the grade. NGC ID# 254P, PCGS# 7156

**1884-S Silver Dollar, AU58+  
Vibrant Mint Luster**

- 5318 1884-S AU58+ NGC. CAC.** This thoroughly lustrous, high-end near-Mint 1884-S dollar appears about as fine as a lower-end Mint State coin, although a trace of friction over the highest points of the devices prevents such a designation from NGC. The coin is brilliant and sharp with light, scattered abrasions. NGC ID# 254P, PCGS# 7156

- 5319 1885 MS67 PCGS. CAC.** Ex: The Michigan Collection. Thick, frost-white luster rolls over both sides of this CAC-approved Superb Gem 1885 silver dollar, illuminating sharp design elements and unabraded surfaces. This issue is occasionally seen in MS67, but finer coins are rare. PCGS lists three numerically finer submissions. CAC: 64 in 67, 2 finer (6/16).

From The Bowler Collection of Morgan Dollars. NGC ID# 254R, PCGS# 7158

- 5320 1885-CC MS66 PCGS. VAM-2.** A dash appears below the second 8. Frosted, boldly struck devices produced partial contrast against the semireflective fields of this wonderful MS66 Carson City dollar. The only mark of note occurs above the eagle's head. Brilliant with fantastic visual appeal. NGC ID# 254S, PCGS# 7160

- 5321 1885-CC MS66 PCGS. VAM-3.** The low mintage 1885-CC is collectible in quality Mint State due to GSA holdings dispersed during the 1970s. This lustrous and lightly toned Premium Gem has a crisp strike, and is smooth save for an intermittent line near the top of the cap. NGC ID# 254S, PCGS# 7160

**1885-CC Dollar, MS66+  
Blazing Cartwheel Luster**

- 5322 1885-CC MS66+ PCGS. CAC. VAM-2A.** A clashed N appears below the chin. The 1885-CC saw widespread distribution during the GSA release of the 1970s, explaining the availability of high-grade survivors despite a low mintage of 228,000 coins. This Plus-designated and CAC-approved Premium Gem is untuned with good design detail and blazing cartwheel luster. Seemingly unmarked surfaces show a hint of semiprooflikeness on the reverse. NGC ID# 254S, PCGS# 7160

**1885-CC Silver Dollar, MS66+  
CAC Green Label Endorsement**

- 5323 1885-CC MS66+ PCGS. CAC.** Frosty, untuned mint luster illuminates the Plus-graded MS66-quality surfaces of this CAC-endorsed 1885-CC Morgan dollar. The strike is slightly soft on the hair above Liberty's ear, but the eye appeal is hardly affected. Finer examples of this popular Carson City issue are only infrequently seen. NGC ID# 254S, PCGS# 7160

**1885-CC Silver Dollar, MS67  
Only One Coin Finer at PCGS**

- 5324 1885-CC MS67 PCGS.** A hint of reflectivity accentuates the radiance of the frosty luster on this Superb Gem 1885-CC dollar. Other than trivial incompleteness on the hair above Liberty's ear and some faint roller marks in the lower reverse field, the coin is flawlessly rendered. Only a few trivial grazes in the left obverse field preclude an even finer numeric designation. The 1885-CC is a popular Carson City issue, available in most grades but conditionally scarce in MS67. Population: 77 in 67 (3 in 67+), 1 finer (6/16). **From The Conch Collection.** NGC ID# 254S, PCGS# 7160

**1885-CC VAM-3 Silver Dollar  
MS65 Deep Prooflike**

- 5325 1885-CC MS65 Deep Prooflike NGC. CAC. VAM-3.** Vibrant peach-gold toning fills the borders of this carefully preserved Carson City Gem. The motifs are frosty and demonstrate noticeable contrast with the flashy fields. The initial strikes for VAM-3 show die fill within the Cs of the mintmark. Later, the dies were lapped, which removed the die fill within the mintmark, and created mirrored fields as seen on the present coin. Certified in a prior generation holder. CAC Population: 30 in 65 Deep Prooflike, 12 finer (6/16). NGC ID# 254S, PCGS# 97161

- 5326 1885-O MS67 PCGS. CAC. Ex:** New York City Set/The Michigan Collection. A beautiful frost-like finish displays glowing luster, and powerfully struck design elements are manifested in nice definition in the hair around Liberty's ear and on the eagle's breast feathers. Impeccably preserved, essentially untuned surfaces define both sides. PCGS lists a single coin numerically finer (6/16). **Ex:** Dallas Signature (Heritage, 11/2006), lot 1283. **From The Bowler Collection of Morgan Dollars.** NGC ID# 254T, PCGS# 7162

**1885-O Morgan Dollar, MS66  
Exceptional Deep Mirror Prooflike Specimen**

- 5327 1885-O MS66 Deep Mirror Prooflike PCGS. CAC.** The present coin is one of the most appealing 1885-O Morgan dollars imaginable, subtly gold-toned with strong frost on the well-struck design elements and brightly reflective mirrors. Housed in a green label holder. PCGS has graded only one numerically finer Deep Mirror Prooflike piece (6/16). NGC ID# 254T, PCGS# 97163

- 5328 1885-S MS65 PCGS.** Unlike the 1884-S before it, this San Francisco Morgan dollar issue is collectible through Gem condition. Dusky patina covers the obverse, accented with splashes of golden color. The other side is entirely brilliant. Typically struck for the date. A rarity in high grade levels. NGC ID# 254U, PCGS# 7164

- 5329 1885-S MS65 PCGS.** This lovely Gem 1885-S Morgan dollar displays exceptionally frosty luster and a distinct mint-fresh look. Gold and lavender border toning add to the eye appeal. This piece is razor-sharp and nearly fine enough for a higher grade — only a few faint grazes in front of Liberty's nose prevent such a designation. PCGS has seen 44 numerically finer submissions (7/16). NGC ID# 254U, PCGS# 7164

- 5330 1885-S MS65 PCGS. CAC. VAM-2.** The 5 in the date is repunched north. Peach-gold toning encompasses the borders of this lustrous and well struck Gem. Marks are trivial and mostly relegated to the back of Liberty's jaw. A scarcer S-mint issue. NGC ID# 254U, PCGS# 7164

**1885-S Morgan Dollar, MS66**  
Conditionally Very Rare in Finer Grades

- 5331 1885-S MS66 PCGS.** Ex: Michigan Collection. Given the mintage approaching 1.5 million pieces, the 1885-S Morgan is generally available up to Gem condition, where it becomes quite elusive, and Premium Gems such as this piece are just downright rare. This untuned, frosty piece shows a sharp strike and minimal marks throughout both sides, making it a prime potential acquisition for a fine collection or Registry Set. Population: 42 in 66 (2 in 66+), 2 finer (6/16).  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 254U, PCGS# 7164

- 5332 1886 MS67 PCGS. CAC. VAM-4.** Ex: The Michigan Collection. The flag of the 1 is repunched. A blush of tobacco-brown and forest-green toning adorns the right obverse margin, but the rest of this lustrous Superb Gem shows only light gold patina. The strike is intricate and marks are minimal. A trace of a fingerprint is near the D in DOLLAR.  
Ex: Cincinnati Central States Signature (Heritage, 5/2009), lot 8854, which realized \$1,265.  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 254V, PCGS# 7166

**1886 Dollar, MS66 Deep Mirror Prooflike**  
Among the Finest at PCGS

- 5333 1886 MS66 Deep Mirror Prooflike PCGS. CAC.** The 1886 is readily obtainable through virtually all grade levels, but Bowers points out that "DMPL coins with cameo contrast are very elusive." That is especially true of Premium Gems with added approval from CAC. This exceptional survivor is completely brilliant and fully struck, clearly an early impression from fresh dies. The motifs are layered in a blanket of frost, while clean fields exhibit marked mirrorlike tendencies. Population: 32 in 66 (1 in 66+) Deep Mirror Prooflike, 0 finer (7/16). NGC ID# 254V, PCGS# 97167
- 5334 1886-O MS62 PCGS.** This attractive branch mint Morgan dollar exhibits razor-sharp definition on all design elements, a quality seldom seen on high-mintage New Orleans issues. The pleasing surfaces are brightly lustrous and show the minimum number of minor contact marks for the grade. NGC ID# 254W, PCGS# 7168

**1886-O Morgan Dollar, MS64**  
Challenging So Fine

- 5335 1886-O MS64 PCGS.** Ex: The Michigan Collection. The 1886-O Morgan dollar is an available date in circulated grades, but it becomes scarce at the MS64 level, and anything finer is prohibitively rare. Only seven coins have been certified in MS65 or finer condition by PCGS and NGC combined (6/16). The present coin exhibits decent strike details and vibrant mint luster. Overall eye appeal is extraordinary for the grade.  
Ex: Summer FUN Signature (Heritage, 7/2010), lot 4146.  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 254W, PCGS# 7168

**1886-O Silver Dollar, MS64**  
Famous New Orleans Conditional Rarity

- 5336 1886-O MS64 PCGS.** The 1886-O is famously rare and costly as a Gem. The present example is about as nice as can be found short of that level, since there are only trivial abrasions, certainly of lesser consequence than seen on many Carson City Morgans graded MS65. The lustrous surfaces exhibit rich apple-green and chestnut-gold toning. The mintmark is repunched south, and Liberty's earlobe is die doubled south, yet the variety is apparently unlisted at VAMworld.com. NGC ID# 254W, PCGS# 7168
- 5337 1886-O Clashed E, VAM-1A, MS62 PCGS.** A Top 100 Variety. The reverse is heavily clashed, with the E from LIBERTY plainly impressed into the field below the eagle's tailfeathers. This is a sharp 1886-O dollar with satiny luster. Each displays mottled grayish-gold toning that masks scattered abrasions. NGC ID# 254W, PCGS# 133905 Base PCGS# 7168

**1886-S Morgan Dollar, MS66**  
Scarce This Well-Preserved

**5338 1886-S MS66 PCGS.** Ex: The Michigan Collection. A well-struck, untoned example of this conditionally elusive San Francisco issue. The surfaces are devoid of major abrasions, and the luster glistens as it rolls around each side. The 1886-S is a slightly better date, coming from a mintage of 750,000 pieces. This Premium Gem example is among the finest most collectors can hope to acquire. Population: 45 in 66 (3 in 66+), 4 finer (6/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 254X, PCGS# 7170

**5339 1886-S/S VAM-2 MS65 PCGS.** A Top 100 Variety. The mintmark is repunched, apparent on both serifs. Vibrant cartwheel luster and smooth surfaces confirm the Gem quality of this lower mintage San Francisco Morgan dollar. The borders display freckles of autumn-brown toning. NGC ID# 254X, PCGS# 133906 Base PCGS# 7170

**1887/6 Morgan Dollar, MS65+**  
Popular *Guide Book* Variety

**5340 1887/6 MS65+ PCGS.** CAC. VAM-2. Ex: Michigan Collection. A Top 100 Variety. The bottom curve of a 6 straddles the base of the 7 in the date on this extremely popular *Guide Book* variety. A brilliant Gem with coruscating mint luster and dazzling cartwheel effects in the fields. Sharply struck and well-preserved; the reverse is especially impressive and clean. PCGS has graded 14 numerically finer examples (6/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 254Z, PCGS# 7174

**1887 Dollar, MS66**  
Richly Toned Obverse

**5341 1887 MS66 PCGS.** CAC. Remarkable cherry-red, lemon-gold, forest-green, and powder-blue toning covers much of the obverse. The reverse is brilliant aside from peripheral honey patina. The 18 in the date is clearly repunched south. This is a dollar that could bring far in excess of expected price levels because of the distinctive obverse toning. NGC ID# 27Y3, PCGS# 7172

**5342 1887 MS67 PCGS.** Cartwheel luster abounds over each side of this radiant Superb Gem coin. Just a hint of gold patina is detectable on this otherwise-brilliant example, which represents essentially the finest quality obtainable for the issue. PCGS has only certified one finer example (7/16). NGC ID# 27Y3, PCGS# 7172

**5343 1887 Alligator Eye, VAM-12A, MS67 PCGS.** CAC. Ex: The Michigan Collection. A Top 100 Variety. The late, clashed die state of the popular doubled die variety. The pick-up point is Liberty's eyelid. Lustrous and nicely struck with faint golden-gray toning. Exceptionally devoid of marks. According to the PCGS *Population Report*, most certified Alligator Eye dollars are in MS62 to MS65 grades. Population: 3 in 67, 0 finer (6/16).

Ex: Cincinnati Central States Signature (Heritage, 4/2009), lot 3072, which realized \$2,012.50.

*From The Bowler Collection of Morgan Dollars.* NGC ID# 254Y, PCGS# 133910 Base PCGS# 7172

**5344 1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. The reverse is close to brilliant, but the obverse displays light straw-gold toning. A lustrous overdated New Orleans dollar with fewer marks than expected for the grade. The centers are typically defined, but the remainder of the strike is good. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

**1887/6-O Silver Dollar, MS64**  
High-End for the Variety

**5345 1887/6-O VAM-3 MS64 PCGS.** A Top 100 Variety. Ex: The Michigan Collection. This popular Morgan VAM shows the lower-right loop of a 6 along the right edge of the 7 in the date. The present example displays original, frosty mint luster with traces of champagne toning here and there. The hair above Liberty's ear and the eagle's breast are slightly soft, as usual, but the eye appeal remains above average for the issue. Only a single Gem 1887/6-O dollar is finer at PCGS (6/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

**5346 1887-O MS65 PCGS.** Mint State 1887-O Morgans can be located with little difficulty through Gem condition. As Bowers (2007) indicates, however, only a fraction of these have a combination of sharp strike and attractive luster. The present Gem is just such a coin, yielding pleasing luster and well-struck devices, including the hair over Liberty's ear and the eagle's breast feathers. Both sides are minimally abraded. PCGS has seen only 10 pieces finer (7/16). NGC ID# 2547, PCGS# 7176

**5347 1887-O MS65 PCGS.** Ex: The Michigan Collection. Partially prooflike fields establish nice contrast with the adequately struck design elements. A few minor luster grazes are not bothersome. PCGS has seen 10 numerically finer submissions (6/16).  
Ex: *The Motor City Collection / FUN Signature (Heritage, 1/2008)*, lot 5439.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 2547, PCGS# 7176

**5348 1887-O MS65 PCGS.** The typical Mint State 1887-O Dollar exhibits muted luster, a soft strike in the central areas, and often, a heavily bagmarked appearance, thus limiting the grade to MS64 or lower. It is a privilege to offer this MS65 example in the present sale. This piece exhibits swirling, snow-white luster and a bold strike with superior definition on the hair over Liberty's ear and on the eagle's breast feathers. The surfaces are well preserved, revealing just a couple of minute marks on Liberty's face and on the eagle's right wing. PCGS has certified a mere 10 coins finer, and NGC has seen four grading higher (6/16). NGC ID# 2547, PCGS# 7176

**5349 1887-S MS65 PCGS.** Toned with a blush of light gold and blue over the obverse, the reverse is frosty and bright. A scarce date in Gem grades, and very difficult to find any finer. Fairly well struck on the curls over Liberty's ear and on the eagle's chest as well. PCGS has only certified 30 finer examples (6/16). NGC ID# 2554, PCGS# 7180

---

**1887-S Morgan Dollar, MS65  
Better Date in High Grade**

**5350 1887-S MS65 PCGS. CAC.** Ex: The Michigan Collection. The 1887-S is a better date among the Redfield holdings. Of the bags in his hoard, most were in lower Uncirculated grades. Few Gems are known of this issue, and finer coins are rare. This fully struck Gem has bright, satiny mint luster that races around the surfaces as it is rotated beneath a light. As one would expect from an MS65, there are no singularly mentionable or detracting marks on either side. PCGS lists 30 finer submissions (6/16).  
Ex: *The Reuben Reinstein Collection / Summer FUN Signature (Heritage, 7/2007)*, lot 1458.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 2554, PCGS# 7180

---

**1888 Silver Dollar, MS67  
Among the Finest at PCGS**

**5351 1888 MS67 PCGS.** Ex: The Michigan Collection. This "triple-eight" issue was minted to the extent of nearly 20 million coins, and expectedly, its quality varies widely. Few specimens indeed can match the aesthetics of the present coin, with glowing silver-white surfaces that appear virtually blemish-free. The strike is excellent, even on the hair above Liberty's ear. Moderate die fatigue appears as metal flow lines on each side. Population: 39 in 67, 0 finer (6/16).  
Ex: *The Jackson Hole Collection / Dallas Signature (Heritage, 4/2007)*, lot 55.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 26KE, PCGS# 7182

---

**1888 Silver Dollar, MS67  
Only One Coin Certified Finer**

**5352 1888 MS67 NGC.** The 1888 Morgan dollar is a common date in most grades, although it becomes scarce at the Superb Gem level. This MS67 example is vibrantly lustrous and beautifully preserved. Light golden toning appears over each side. Some minor strike weakness is seen on the hair above Liberty's ear, but the viewer is quickly diverted to the exceptionally clean cheek nearby. Census: 82 in 67 (1 in 67+, 3 in 67 ★), 1 finer (6/16). NGC ID# 26KE, PCGS# 7182

---

**1888 Doubled Ear Dollar, MS66  
VAM-11A, Top 100**

**5353 1888 Doubled Ear, VAM-11A, MS66 PCGS.** A Top 100 Variety. The clashed die state of VAM-11, with the N from IN apparent in front of Liberty's neck. VAM-11 is a Doubled Die Obverse variety that shows doubling on Liberty's ear. This lustrous Premium Gem displays peripheral golden-brown and navy-blue toning. The fields are smooth and the cheek exhibits minor grazes. The centers show moderate blending of impression. Population: 3 in 66, 0 finer (6/16). NGC ID# 2555, PCGS# 133916 Base PCGS# 7182

**5354 1888-O MS66 PCGS.** Although the 1888-O Morgan dollar can be located in MS66 condition with some patience, the issue is virtually unobtainable any finer. This well-detailed Premium Gem is well-preserved and brightly lustrous, with vivid highlights of greenish-gold and magenta toning. PCGS has graded no coins in higher numeric grades (6/16). NGC ID# 2556, PCGS# 7184

**5355 1888-O MS66 NGC.** Vivid shades of magenta, greenish-gold, silver-gray, and amber toning enhance the well-preserved surfaces of this spectacular Premium Gem, with most of the color on the obverse. Vibrant mint luster and well-detailed design elements complete the attractive presentation. Census: 44 in 66 (1 in 66+, 1 in 66★), 2 finer (6/16). NGC ID# 2556, PCGS# 7184

**5356 1888-O MS66 PCGS.** Premium Gem is the finest grade likely to be encountered by the Morgan dollar collector. Indeed, PCGS reports none numerically finer and NGC shows only two with a higher numerical grade. A melange of sky-blue, lavender, and gold patina runs over the obverse, while the reverse is color free. Some detail is seen in the centers. NGC ID# 2556, PCGS# 7184

**5357 1888-O MS66 PCGS.** Wisps of tan patina appear on the obverse of this Premium Gem, with a crescent of gold and steel toning along the left reverse border. This is an important condition rarity, and PCGS has never certified a numerically finer example (7/16). NGC ID# 2556, PCGS# 7184

**5358 1888-O MS66 PCGS. CAC.** Ex: Jackson Hole/The Michigan Collection. Largely untoned with just a few flecks of reddish-brown patina on the reverse. The luster is surprisingly potent, and the strike is uncommonly bold, particularly at the highpoints. While the 1888-O is encountered often in lower grades, PCGS has graded no coins finer than the present piece (6/16).  
Ex: *The Jackson Hole Collection / Dallas Signature* (Heritage, 4/2007), lot 56.

*From The Bowler Collection of Morgan Dollars.* NGC ID# 2556, PCGS# 7184

#### 1888-O 'Scarface' Dollar, MS62 Dramatic Terminal Die State

**5359 1888-O Scarface, VAM-1B4, MS62 PCGS.** A Top 100 Variety. VAMWorld.com calls this the "mother of all Morgan die breaks. ... This is a tremendously desirable coin with few samples available." VAM-1B4 is the terminal die state with an enormous die break across Liberty's face to the lower hair curls. The beginnings of a small die crack appear above the bridge of the nose. Most Scarface Morgan dollars come from a few bags and are in lower Mint State grades. This brilliant representative is typically struck with frosty luster. A great opportunity to obtain the most dramatic state of this sought-after variety. NGC ID# 2556, PCGS# 133918 Base PCGS# 87184

#### 1888-O 'Hot Lips' Dollar, AU58 VAM-4 Guide Book Variety

**5360 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU58 PCGS.** A Top 100 Variety. An exciting VAM, with clearly defined die doubling on the lips, chin, and nose. While not rare in lower circulated grades, it is decidedly so in near-Mint and finer conditions. This brilliant and still-lustrous piece is on the precipice of a full Mint State grade — a true slider. Nearly full luster shines from both sides. The coin shows strong definition on the raised elements as well as a touch of rub.

*From The Bowler Collection of Morgan Dollars.* NGC ID# 2556, PCGS# 133919 Base PCGS# 7308

**5361 1888-S MS65 PCGS.** In the context of Morgan dollars, the 1888-S is a scarce date. The recorded mintage was only 657,000 pieces. This piece is a particularly attractive specimen, with full mint luster and a sharp strike. Eye appeal is outstanding, and handling marks are minimal. PCGS lists 33 numerically finer representatives (6/16).  
Ex: *FUN Signature* (Heritage, 1/2009), lot 4616.

*From The Bowler Collection of Morgan Dollars.* NGC ID# 2557, PCGS# 7186

#### 1888-S Morgan Dollar, MS64 Remarkable Deep Mirror Prooflike Specimen

**5362 1888-S MS64 Deep Mirror Prooflike PCGS.** From a small mintage of 657,000 pieces, the 1888-S Morgan dollar is seldom encountered with a sharp strike and lightly marked surfaces. This remarkable Choice specimen exhibits unusually sharp definition on all design elements and the fields are deeply reflective, with strong field/device contrast. The surfaces show a few minor contact marks and some vertical planchet striations in the obverse fields and on Liberty's cheek. Population: 46 in 64 (1 in 64+) Deep Mirror Prooflike, 3 finer (7/16). NGC ID# 27MY, PCGS# 97187

---

**1889 Dollar, Glittering MS66+**

- 5363 1889 MS66+ PCGS. CAC.** A mintage of 21.7 million coins is unremarkable in itself, and examples of the 1889 are readily available through MS65. However, Premium Gems are scarce, and Superb Gems are practically unobtainable, if only because so few examples are certified and they rarely come up for sale. This glittering, all-brilliant dollar is somewhat lightly struck, but the eye appeal is extraordinary. Definitely on the cusp of a higher grade. PCGS reports four finer grading events (6/16). NGC ID# 2558, PCGS# 7188

- 5364 1889 MS65 Deep Mirror Prooflike PCGS.** Deep Mirror Prooflike examples of the 1889 Morgan dollar become rare above MS64. This reflective, cameo-contrasted Gem displays untuned surfaces with frosty design elements and deeply reflective fields. A few stray marks define the grade. Population: 36 in 65 Deep Mirror Prooflike, 4 finer (6/16). NGC ID# 3VWX, PCGS# 97189

- 5365 1889-CC XF40 ANACS.** Most of the hairlines remain bold, but some wear shows on the eagle's breast and other high points of this attractive Carson City key. The lightly abraded surfaces are toned in pleasing shades of lavender-gray and greenish-gold. NGC ID# 2559, PCGS# 7190

---

**1889-CC Silver Dollar, XF40  
Carson City Key**

- 5366 1889-CC XF40 PCGS.** This bright, untuned example shows pleasing detail for the grade and lightly abraded surfaces. The 1889-CC Morgan dollar is the key to the Carson City short set. This issue was struck in the final three months of the year, resuming coinage at the Nevada branch mint after a four-year hiatus. NGC ID# 2559, PCGS# 7190

---

**1889-CC Morgan Dollar, XF45  
Carson City Key**

- 5367 1889-CC XF45 PCGS.** An impressive Choice XF specimen of the rarest Morgan dollar issue from the Carson City Mint. Some slight wear shows on the eagle's breast feathers, but the hair lines and ear remain bold and the pleasing lavender-gray surfaces exhibit just a few scattered, minor abrasions. The overall presentation is most attractive. NGC ID# 2559, PCGS# 7190

---

**1889-CC Morgan Dollar, AU53  
Lightly Worn and Sharply Struck**

- 5368 1889-CC AU53 PCGS.** Pleasing shades of violet and lavender-gray toning blanket the lightly abraded surfaces of this important Carson City key. Only a trace of wear shows on the sharply detailed design elements and traces of original mint luster shine through the patina. This coin should find a home in a fine collection of Morgan dollars. NGC ID# 2559, PCGS# 7190

---

**1889-CC Morgan Dollar, AU55  
Brilliant, Good Luster Remains**

- 5369 1889-CC AU55 PCGS. CAC.** The 1889-CC is the rarest Carson City dollar by a wide margin and always in demand. This untuned example exceeds expectations with some remaining prooflikeness at the margins and ample remaining luster. Friction and numerous light marks appear primarily in the obverse fields, but there are no major abrasions or distractions as confirmed by the CAC Approval. A key issue, well-struck and minimally circulated.  
*Ex: Atlanta ANA (Heritage, 2/2014), lot 4021.* NGC ID# 2559, PCGS# 7190

### 1889-CC Dollar, Uncirculated Details

- 5370 1889-CC — Cleaning — PCGS Genuine. Unc. Details.** A hint of straw-gold toning visits this sharply struck key date Carson City dollar. The fields are semiprooflike and display delicate hairlines. There are surprisingly few bagmarks. Many if not most CC-mint Morgans struck between 1878 and 1885 were saved in vaults, but those struck between 1889 and 1893 principally entered commerce. NGC ID# 2559, PCGS# 7190

### 1889-O Morgan, MS65 Conditionally Elusive O-Mint Issue

- 5371 1889-O MS65 PCGS.** Ex: The Michigan Collection. Although the 1889-O Morgans were struck in enormous quantities — 11.9 million coins — most of them were apparently released into 19th century circulation. Gems are elusive, and anything finer is seldom seen. This piece offers splendidly lustrous silver-white surfaces with tremendous flash and eye appeal. The central strike softness on both sides is nearly universal for the issue. PCGS has certified only 10 coins finer (6/16).

Ex: *Dallas Signature* (Heritage, 10/2009), lot 1011.

From *The Bowler Collection of Morgan Dollars*. NGC ID# 255A, PCGS# 7192

- 5372 1889-S MS65 PCGS.** A former rarity prior to its widespread release during the mid-20th century, the 1889-S still enjoys a low mintage of 700,000 coins. This Gem is all-brilliant and well-defined at the centers. The reverse is moderately semiprooflike. Clean and attractive. NGC ID# 255B, PCGS# 7194

- 5373 1889-S MS65 PCGS.** Iridescent shades of golden-brown, lavender, greenish-gold, and amber toning blanket the well-preserved surfaces of this attractive Gem, with vibrant mint luster and well-detailed design elements underneath. The 1889-S Morgan dollar claims a low mintage of 700,000 pieces. NGC ID# 255B, PCGS# 7194

### 1889-S Dollar, Radiant MS66 Only One Coin Certified Finer

- 5374 1889-S MS66 PCGS.** Ex: The Michigan Collection. This Premium Gem has fully brilliant silver surfaces with sharp design features and only the faintest traces of dusty gold toning. Of all of the Morgan dollars produced between the years of 1878 and 1921, from five different mints, only 18 issues had mintages of less than one million coins, and this 1889-S is one of those. In fact, the mintage of 700,000 coins places this in the 15th position among the lowest-mintage Morgans. Among the examples certified by PCGS and NGC, just one coin has been graded finer. Population: 89 in 66 (9 in 66+), 1 finer (6/16).

Ex: *Long Beach Signature* (Heritage, 9/2004), lot 8659; *The Motor City Collection / FUN Signature* (Heritage, 1/2008), lot 5481.

From *The Bowler Collection of Morgan Dollars*. NGC ID# 255B, PCGS# 7194

### 1889-S Dollar, MS66+ One Coin Finer at PCGS

- 5375 1889-S MS66+ PCGS. CAC.** Merely 700,000 Morgan dollars were struck at the United States Mint's San Francisco branch in 1889. Premium Gems are very scarce, and finer examples are virtually unheard of. There is one higher-graded example at both services combined, a PCGS submission in MS67 (7/16). Shades of green, blue, and violet coalesce across the obverse, while the reverse maintains its brilliance. The common denominator between the two is rich, frosty luster that illuminates each carefully preserved side. Minor strike softness occurs centrally. NGC ID# 255B, PCGS# 7194

- 5376 1889-S MS64 Deep Mirror Prooflike ANACS.** Variegated gold-brown and sky-blue toning runs over the lustrous surfaces of this near-Gem that exhibits sharply struck devices. Very difficult in DMPL. NGC ID# 255B, PCGS# 97195

- 5377 1890-CC MS64 PCGS. VAM-5.** Light tan-gold toning adorns this lustrous and crisply struck Choice Carson City dollar. Scarcer than the CC-mint issues from the 1880s. The second C in the mintmark is repunched north. A late die state with many cracks, but not quite VAM-5A. NGC ID# 255D, PCGS# 7198

- 5378 1890-CC MS64 PCGS.** The lustrous surfaces of this near-Gem Morgan dollar display occasional whispers of medium gray patina. The design elements are well-struck except for the often-seen softness in the centers. A few light obverse marks are noted. NGC ID# 255D, PCGS# 7198

- 5379 1890-CC MS64 PCGS. VAM-7.** Potent luster sweeps this minimally marked and scarcer date Carson City Morgan. Both sides show only a hint of golden patina. The strike is above average, and the mintmark is lightly repunched. Encased in an old green label holder. NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, MS65  
Finer Coins Are Rare**

- 5380 1890-CC MS65 PCGS.** Ex: The Michigan Collection. While 2.3 million pieces were struck of the 1890-CC, Bowers and Dannreuther estimate that as many as 1 million may have been melted under the 1918 Pittman Act. This is a lovely Gem that has smooth surfaces with a nearly blemish-free cheek of Liberty. Softly frosted, this fully struck coin is nearly free from color altogether. PCGS lists only 15 numerically finer representatives (6/16).  
Ex: FUN Signature (Heritage, 1/2007), lot 7179.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, Elusive MS65**

- 5381 1890-CC MS65 PCGS. CAC.** The 1890-CC Morgan has a mintage of 2.3 million pieces, the largest in the Carson City series. Examples can be located through near-Gem without too much difficulty. Gems, on the other hand, are elusive, and finer pieces are nearly impossible to obtain. This attractive Gem exhibits sharply detailed devices and vibrant mint luster. The brilliant surfaces are minimally marked and show just a few traces of gold toning. PCGS has certified only 15 coins in higher numeric grades (6/16).  
Ex: Chicago Signature (Heritage, 8/2011), lot 4657; New York Signature (Heritage, 11/2013), lot 3712.  
**From The Conch Collection.** NGC ID# 255D, PCGS# 7198

- 5382 1890-CC MS64 Prooflike PCGS. VAM-8.** A well struck and flashy Choice Carson City dollar. The brilliant fields show few marks, and the lightly toned portrait displays only wispy contact. Die lines below the wings identify VAM-8.  
Ex: FUN Signature (Heritage, 1/2008), lot 5496, which realized \$1,840. NGC ID# 255D, PCGS# 7199

**1890-CC Tail Bar VAM-4 Dollar, MS64  
A Top 100 Variety**

- 5383 1890-CC Tail Bar, VAM-4, MS64 PCGS.** A Top 100 Variety. Ex: The Michigan Collection. The thick, mint-made die gouge beneath the left border of the tail feathers is certainly more impressive than the similar 'Hangnail' variety found on some 1880-O dollars. Tail Bar pieces comprise a very small minority of Mint State 1890-CC dollars. A lustrous and untuned near-Gem with attractive preservation and faint mint-made roller marks in the centers. Population: 83 in 64 (4 in 64+), 4 finer (6/16).  
Ex: Long Beach Signature (Heritage, 9/2005), lot 5898; Denver Signature (Heritage, 8/2006), lot 3012; FUN Signature (Heritage, 1/2007), lot 7167.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

- 5384 1890-O MS65 PCGS.** Ex: The Michigan Collection. The reverse is practically pristine, while the obverse of this expertly struck Gem has only faint contact. A flashy and desirable representative of this high-mintage but conditionally elusive New Orleans issue. PCGS lists 28 finer representatives (6/16).  
Ex: The Reuben Reinstein Collection / Summer FUN Signature (Heritage, 7/2007), lot 1528.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 255E, PCGS# 7200

- 5385 1890-O MS65 PCGS.** Attractive shades of medium intensity golden-tan and lavender toning blanket the well-preserved surfaces of this impressive branch mint Gem. The design elements are well-detailed and vibrant mint luster shines through the patina. PCGS has graded 28 numerically finer examples (6/16). NGC ID# 255E, PCGS# 7200

- 5386 1890-O MS65 PCGS.** Vibrant, frosty mint luster gives this Gem 1890-O Morgan splendid eye appeal, accented by gold and amber toning around the peripheries. The eagle's breast and the hair above Liberty's ear are softly struck, as is characteristic of this New Orleans issue. PCGS lists 28 numerically finer representatives (7/16). NGC ID# 255E, PCGS# 7200

- 5387 1890-O MS65+ PCGS.** The 1890-O is a less often seen date in Gem condition, and finer pieces are major series rarities. This Plus-graded MS65 coin displays frosty, untuned mint luster and exceptional eye appeal. Slight strike softness is seen on the hair above Liberty's ear, as usual for this New Orleans issue. PCGS has seen 28 finer submissions (6/16). NGC ID# 255E, PCGS# 7200

- 5388 1890-O MS65+ PCGS.** 30th Anniversary Green Label Holder. This remarkably eye-appealing 1890-O Morgan dollar showcases glowing, frosty mint luster with warm golden toning around the borders. Liberty's cheek is remarkably clean, and were the strike slightly sharper in the centers, a full premium Gem grade might have been achieved. NGC ID# 255E, PCGS# 7200

- 5389 1890-S MS66 PCGS.** Radiant cartwheel luster abounds on each side of this delightful Premium Gem specimen. Like most examples of this issue, the present coin is well-produced, with good luster and a bold strike. The luster on this coin, however, is superior to most examples of the date. This piece is an excellent choice for the collector of Morgan dollars who seeks coins that are not only high-grade, but also eye-appealing and high-end within their assigned grade level. PCGS has certified only seven coins finer (7/16). NGC ID# 255F, PCGS# 7202

**1890-S Morgan Dollar, MS66+  
Well-Preserved and Lustrous**

- 5390 1890-S MS66+ PCGS. CAC.** Ex: Michigan Collection. Combined, PCGS and NGC have certified just eight finer examples of this important issue (6/16). Both sides are mostly brilliant and highly lustrous, with a few hints of greenish-gold toning. Sharply detailed throughout, with sharp definition on the hair over Liberty's ear. An exceptional example with amazing eye appeal.  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 255F, PCGS# 7202

- 5391 1891 MS64+ PCGS. CAC.** This Plus-graded Choice specimen exhibits sharply detailed design elements and well-preserved surfaces with vibrant mint luster on both sides. A few hints of pale gold toning add to the outstanding eye appeal. NGC ID# 255G, PCGS# 7204

**1891 Silver Dollar, MS65  
Elusive in Gem Condition**

- 5392 1891 MS65 PCGS.** Ex: The Michigan Collection. The 1891 Morgan dollar is a scarce date that is highly desirable in Gem condition, as the PCGS population data indicates. This piece is highly lustrous with frosty brilliance. Only a few marks are evident, with no toning on either side. The strike is above average for the date. PCGS and NGC have each seen only three numerically finer examples (6/16).  
*Ex: Long Beach Signature (Heritage, 9/2009), lot 1098.*  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 255G, PCGS# 7204

- 5393 1891 MS64 Prooflike PCGS.** Among the finest Prooflike examples certified, this Choice 1891 Morgan dollar exhibits virtually brilliant surfaces with reflective fields and softly frosted motifs. A few minor grazes on Liberty's cheek determine the grade. Population: 22 in 64 Prooflike, 0 finer (7/16). NGC ID# 255G, PCGS# 7205

**1891-CC Silver Dollar, MS65+  
Few Seen Finer**

- 5394 1891-CC MS65+ PCGS.** This Plus-graded Gem 1891-CC Morgan is near the upper limits of what most collectors will be able to acquire for this issue, as finer coins are rarely seen. The strike is above-average, and frosty, luminous surfaces yield excellent preservation. The interiors are brilliant, surrounded by gold, olive, and russet toning. PCGS lists 34 finer submissions (6/16).  
*From The Conch Collection.* NGC ID# 255H, PCGS# 7206

**1891-CC Dollar, MS65  
Beautifully Patinated**

- 5395 1891-CC MS65 PCGS. CAC.** Only 5,687 1891-CC dollars were made available through the GSA release of the 1970s. The vast majority of the 1.6 million coins struck were distributed early on and through the 1940s and 1950s. It is also likely that many pieces were melted under the terms of the Pittman Act. This Gem is beautifully patinated in lavender, cobalt-blue, and golden-orange tones through which vibrant mint luster shines. The resulting eye appeal is fantastic. Lightly struck near the centers but otherwise sharp. Rarely found finer. NGC ID# 255H, PCGS# 7206

**1891-CC Morgan Dollar, MS65+  
Seldom Encountered Finer**

- 5396 1891-CC MS65+ PCGS. CAC.** Ex: Michigan Collection. Struck from a mintage of 1.6 million pieces, the 1891-CC Morgan dollar today has a certified population numbering several thousand coins through the near-Gem level. Gems can be located with a bit of searching, but higher-grade specimens are elusive. Vibrant luster emanates from the lightly toned surfaces of this high-end Gem and the devices exhibit strong definition. Neither side reveals the extensive bagmarks seen on most surviving examples. PCGS has graded 34 numerically finer examples (6/16).  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 255H, PCGS# 7206

**5397 1891-CC MS64+ Prooflike PCGS. CAC.** Prooflike Carson City Morgan dollars of any date are scarce, and this 1891-CC is seldom found in finer grades. This brilliant silver example is untuned and exhibits nice contrast between the fields and devices. PCGS has only certified 20 finer examples (6/16). NGC ID# 255H, PCGS# 7207

**5398 1891-CC Spitting Eagle, VAM-3, MS64 PCGS.** A Top 100 Variety. A lustrous, brilliant, and nicely struck Choice dollar. Wispy marks on the left obverse fail to challenge the third party grade. The "Spitting Eagle" variety constitutes many of the former GSA hoard examples of this better Carson City issue. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**5399 1891-CC Spitting Eagle, VAM-3, MS64+ NGC.** A Top 100 Variety. VAM-3 is best known for the die lump below the eagle's beak, but the left C in the mintmark is also repunched north. A lustrous near-Gem with delicate almond-gold toning and a well preserved obverse field. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**5400 1891-CC Spitting Eagle, VAM-3, MS64 PCGS. CAC.** A Top 100 Variety. The mintmark is repunched north, but VAM-3 is best known for the small die lump below the eagle's beak. This lustrous near-Gem is brilliant aside from a dark speck on upper beak. The strike is bold and the fields are well preserved. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**5401 1891-O MS64+ PCGS. CAC.** The lustrous silvery surfaces of this O-mint Morgan are untuned and reveal just a few grade-limiting marks on Liberty's cheek and neck. A modicum of detail is seen in the hair over Liberty's ear, an area that is often flat. NGC ID# 255J, PCGS# 7208

---

**1891-O Silver Dollar, MS65  
Among the Finest at PCGS**

**5402 1891-O MS65 PCGS. Ex: The Michigan Collection.** This Gem 1891-O Morgan dollar has eye appeal that is comparable to many higher-grade coins. The surfaces display satiny mint luster with a hint of light golden toning. The very central high points are slightly soft, as expected for this New Orleans issue, although the eye appeal is hardly affected. No numerically finer examples are reported by PCGS (6/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 255J, PCGS# 7208

---

---

**1891-O Morgan Dollar, MS64  
Rare Deep Mirror Prooflike Example**

**5403 1891-O MS64 Deep Mirror Prooflike PCGS.** From a large mintage of 7.9 million pieces, the 1891-O Morgan dollar is known as a weakly struck issue, but this coin exhibits sharply detailed design elements, with a rich coat of mint frost. The fields are deeply reflective, with bold cameo contrast, and the lightly marked surfaces show traces of greenish-gold toning. Population: 10 in 64 (4 in 64+) Deep Mirror Prooflike, 2 finer (7/16). NGC ID# 3VXM, PCGS# 97209

**5404 1891-S MS65 PCGS.** Minimally toned interiors progress outward to rings of gold, violet, blue, and green patina, giving this Gem 1891-S Morgan dollar excellent visual appeal. Mint frost issues from underlying surfaces that exhibit small, unimportant ticks. Very scarcely offered in better condition. NGC ID# 255K, PCGS# 7210

---

**1891-S Morgan, MS66  
Better S-Mint Issue in High Grade**

**5405 1891-S MS66 PCGS. Ex: The Michigan Collection.** The brilliant surfaces of this remarkable Gem are resplendent with shimmering coruscant luster that flashes from each side with dazzling cartwheel splendor. Essentially defect-free, this is an exceptional example of this scarcer S-mint in the always popular Morgan dollar series. Population: 98 in 66 (9 in 66+), 8 finer (6/16).

*Ex: FUN Signature (Heritage, 1/2004), lot 8954; The Jimmy G. PCGS Registry Collection of Morgan Dollars with Varieties / Long Beach Signature (Heritage, 2/2008), lot 1346.*

*From The Bowler Collection of Morgan Dollars.* NGC ID# 255K, PCGS# 7210

---

**1891-S Morgan, MS65+ Prooflike  
Few Prooflike Pieces Finer**

- 5406 1891-S MS65+ Prooflike PCGS. CAC.** Although the 1891-S dollar as a whole is usually available through MS65, Prooflike examples are not. This Plus-designated Gem is struck from polished dies with thoroughly lustrous fields and brilliant color. The strike is sharp, and a few faint grazes that limit the grade are not particularly obvious. Population: 42 in 65 (3 in 65+) Prooflike, 2 finer. CAC: 6 in 65, 1 finer (6/16). NGC ID# 255K, PCGS# 7211

**1891-S Silver Dollar  
MS64 Deep Mirror Prooflike**

- 5407 1891-S MS64 Deep Mirror Prooflike PCGS.** A snow-white Choice silver dollar with lustrous fields and carefully preserved surfaces. The strike is good and the reverse exhibits consequential cameo contrast. Housed in a green label holder. Population: 34 in 64 (1 in 64+) Deep Mirror Prooflike, 4 finer (6/16).  
*Ex: Dallas Signature (Heritage, 12/2004), lot 7618, which realized \$1,667.50. NGC ID# 3VXL, PCGS# 97211*

- 5408 1891-S MS64 Deep Mirror Prooflike ANACS.** A sharp, cameo-contrasted Choice example of this conditionally elusive San Francisco issue, showing deeply reflective fields and minimal abrasions. The strike is sharp, and the eye appeal is excellent. Housed in an old white, small size ANACS holder. Any Deep Mirror Prooflike example is rarely seen so well-preserved. NGC ID# 3VXL, PCGS# 97211

**1892 Morgan Dollar, MS65  
Prohibitively Rare Any Finer**

- 5409 1892 MS65 PCGS.** *Ex: The Michigan Collection.* Slightly over one million silver dollars were minted in 1892 as production slowed during the mid-1890s. This splendid Gem has frosty silver luster with untuned surfaces and exceptional design definition. Only the hair over Liberty's ear shows slight weakness as usual. PCGS has only certified five finer examples of the date (6/16).  
*Ex: FUN Signature (Heritage, 1/2009), lot 4675.*  
**From The Boulder Collection of Morgan Dollars.** NGC ID# 255L, PCGS# 7212

- 5410 1892-CC MS61 NGC.** This Carson City Morgan dollar is highly lustrous and fully brilliant with untuned silver surfaces. Both sides have trivial, grade-consistent surface marks, although none are singularly obvious. NGC ID# 255M, PCGS# 7214

- 5411 1892-CC MS62 NGC.** A sharply struck and lightly toned representative of this scarce and penultimate Carson City issue. Dynamic luster sweeps the moderately marked obverse and the well preserved reverse. NGC ID# 255M, PCGS# 7214

- 5412 1892-CC MS62 PCGS.** Vibrant mint luster gives this Mint State 1892-CC dollar excellent eye appeal, while the brilliant interiors are framed by a halo of light golden peripheral toning. Minor abrasions on Liberty's cheek define the grade. NGC ID# 255M, PCGS# 7214

- 5413 1892-CC MS63 NGC.** This Select Mint State Carson City Morgan silver dollar exhibits trivial grade-consistent marks with none that are singular in appearance. Both sides are fully brilliant and highly lustrous with untuned mint frost. NGC ID# 255M, PCGS# 7214

- 5414 1892-CC MS63 PCGS.** This boldly defined Select Mint State 1892-CC Morgan dollar exhibits lustrous devices and reflective fields that display a hint of field-to-device contrast. Although undesignated, this lovely piece is a borderline prooflike example. NGC ID# 255M, PCGS# 7214

- 5415 1892-CC MS63 ANACS. VAM-10A.** Rose-red toning adorns the borders of this lustrous and sharply struck Carson City dollar. A small reed impression on the cheek limits the grade. VAM-10A is the triple-clashed die state of the misplaced date variety. The top of a 9 or 2 emerges from the dentils below the 92. Certified in a small-sized holder. NGC ID# 255M, PCGS# 7214

- 5416 1892-CC MS63 PCGS.** Brilliant, satiny mint luster appears over each side of this Select 1892-CC silver dollar, complemented by semiprooflike reflectivity in the fields. The strike is sharp, and grade-limiting abrasions are trivial. NGC ID# 255M, PCGS# 7214

- 5417 1892-CC MS63 PCGS.** This Select Mint State 1892-CC Morgan dollar features a surprisingly sharp strike for the issue, with fully brilliant and frosty silver luster. Trivial bagmarks are consistent with the grade. NGC ID# 255M, PCGS# 7214

**1892-CC Silver Dollar, MS64  
Popular Carson City Issue**

- 5418 1892-CC MS64 PCGS.** A silver-white near-Gem, with just a tinge of light gold color noted on the obverse rim. A bit of strike weakness shows over Liberty's ear, but elsewhere it is bold and pleasing. Wispy die cracks largely encircle the peripheral stress points on each side.  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 5647. NGC ID# 255M, PCGS# 7214*

**1892-CC Silver Dollar, MS64  
Beautifully Toned and Lustrous**

- 5419 1892-CC MS64 PCGS.** The toning on this 1892-CC dollar is spectacular, showing warm lavender-gold and sun-orange hues that lighten toward the centers, with some vivid blue along portions of the peripheries. The strike is a trifle soft on the hair above Liberty's ear, but the glowing mint luster that illuminates the patina is far more obvious. Grade-limiting abrasions are hidden by toning and are light in nature. NGC ID# 255M, PCGS# 7214

**1892-CC Silver Dollar, Sharp MS64**

- 5420 1892-CC MS64 PCGS.** This satiny 1892-CC Morgan dollar shows remarkably few abrasions for the grade, but the luster is not quite vibrant enough to warrant a Gem designation. The strike is razor-sharp, and each side exhibits a subtle steel-gray hue. The 1892-CC is a challenging Carson City issue in finer grades. NGC ID# 255M, PCGS# 7214

**1892-CC Morgan, MS65  
Semiprooflike Fields**

- 5421 1892-CC MS65 PCGS.** Ex: The Michigan Collection. While many Mint State 1892-CC Morgans are flat in the centers and heavily bagmarked (David Bowers, 2006), the Gem we present in this lot displays excellent technical quality and aesthetic appeal. All of the design elements have benefited from a well-executed strike, including the hair at Liberty's ear and the eagle's breast feathers. Partially prooflike fields highlight lightly frosted motifs, and essentially untoned surfaces are well preserved.  
Ex: Philadelphia Signature (Heritage, 8/2000), lot 6346; FUN Signature (Heritage, 1/2001), lot 7519; The Arnold & Harriet Collection, Part Two / Long Beach Signature (Heritage, 9/2007), lot 2664.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 255M, PCGS# 7214

**1892-CC Silver Dollar, MS65  
Toned Obverse**

- 5422 1892-CC MS65 PCGS.** This well-struck Gem 1892-CC Morgan dollar displays vibrant, frosty mint luster without distracting abrasions. The reverse is brilliant, but the obverse displays sea-green and amber toning in the margins around a light golden interior. PCGS lists 32 numerically finer submissions (6/16). NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS65  
Thick Mint Luster**

- 5423 1892-CC MS65 PCGS. VAM-8A.** This lovely coin is mostly white in color with a blush of light gray starting to form. The surfaces are very clean and there are no deep or distracting nicks. We note this is the filled 2 variety, with a small piece broken out of the die within the lower portion of that digit. A very difficult date and Mint to find in Gem condition, and almost impossible to secure in any finer grade.

Ex: Central States Signature (Heritage, 5/2004), lot 8608; Long Beach Signature (Heritage, 2/2005), lot 10390; Dallas Signature (Heritage, 11/2005), lot 2307. NGC ID# 255M, PCGS# 7214

**1892-CC Silver Dollar, MS65+  
Seldom Seen Finer**

- 5424 1892-CC MS65+ PCGS. CAC.** The 1892-CC is among the more challenging issues in the Carson City Morgan dollar series in Gem condition, and finer representatives are genuinely rare. This satiny high-end MS65 coin displays vibrant cartwheel luster with a hint of light champagne toning. The strike is sharp. Trivial grazes in the left obverse field are all that preclude a full Premium Gem designation. PCGS lists 32 finer submissions (6/16). NGC ID# 255M, PCGS# 7214

**1892-CC Silver Dollar, MS64+ Prooflike  
Modest Cameo Contrast**

**5425 1892-CC MS64+ Prooflike PCGS. CAC.** Sharp, frosty design elements provide stark cameo contrast on this high-end near-Gem Prooflike 1892-CC dollar. The coin is brilliant, and grade-limiting grazes are trivial in nature. Prooflike 1892-CC dollars are scarce this fine, and higher-grade examples are rare. PCGS has certified 5 examples as MS64+ Prooflike and only 13 finer (7/16). NGC ID# 255M, PCGS# 7215

**5426 1892-CC MS62 Deep Mirror Prooflike ANACS.** Field-motif contrast is evident, especially on the obverse of this CC-mint example. The design features are sharply impressed, including the hair over Liberty's ear and the eagle's breast feathers. A few minute marks determine the grade. NGC ID# 255M, PCGS# 97215

**1892-O Silver Dollar, MS65+  
Few Known Finer**

**5427 1892-O MS65+ PCGS.** Tinges of gold appear around the peripheries of this high-end Gem 1892-O silver dollar, while the interiors show a lighter champagne hue. The coin is frosty and luminous with excellent preservation. Some high-point strike softness is seen on the eagle's breast and the hair above Liberty's ear, as usual. PCGS lists only six finer representatives (7/16). NGC ID# 255N, PCGS# 7216

**1892-O Silver Dollar, MS65  
Conditionally Scarce New Orleans Issue**

**5428 1892-O MS65 PCGS. CAC. Ex:** The Michigan Collection. An amazing Gem specimen with frosty silver surfaces and full mint brilliance. Both sides have entirely brilliant silver surfaces and no evidence of toning. PCGS has only certified six finer examples of this date. CAC: 19 in 65, 1 finer (6/16).  
*Ex: The Jackson Hole Collection / Dallas Signature (Heritage, 4/2007), lot 75.*  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 255N, PCGS# 7216

**1892-S Dollar, Choice AU  
Virtually Inaccessible in Mint State**

**5429 1892-S AU55 PCGS.** Morgan dollar collectors recognize the 1892-S as an available date in lower circulated grades but scarce in Choice AU, particularly in relation to the number of specialists looking for a nice example. Mint State coins are far out of reach for most enthusiasts. The hidden areas retain partial luster, and each side is devoid of color. Well-struck with minor friction over the curls and breast feathers. NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, AU55  
Seldom Encountered Finer**

**5430 1892-S AU55 PCGS.** The 1892-S Morgan dollar was long overlooked by collectors, but numismatists have recently come to appreciate the elusive nature of this issue in high grade. This Choice AU specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain significant amounts of original mint luster. Hints of golden-tan toning visit the pleasing surfaces. NGC ID# 255P, PCGS# 7218

**1892-S Morgan, AU58  
Semiprooflike Fields**

**5431 1892-S AU58 NGC.** Well struck with deep blue-gray coloration across both sides, and noticeable reflectivity in the fields. Wispy hairlines are noted in the fields, and there are a handful of minor marks on Liberty's cheek. High point friction is not obvious on either side. The 1892-S is one of the most important key dates in the Morgan dollar series, and is highly desirable at the AU58 grade level.

*Ex: ANA Signature (Heritage, 8/2007), lot 2377; FUN Signature (Heritage, 1/2008), lot 5547.* NGC ID# 255P, PCGS# 7218

**5432 1893 MS64 PCGS. VAM-2.** The 3 in the date is lightly repunched north. Orange-gold toning graces the borders of this lustrous and carefully preserved near-Gem. The centers show softness of impression, and a pair of mint-made roller marks pass through the eagle's lower body. A low mintage date. NGC ID# 255R, PCGS# 7220

**1893 Dollar, Lustrous Gem  
Low-Mintage Philadelphia Issue**

- 5433 1893 MS65 PCGS.** Ex: The Michigan Collection. A whisper of gold toning adorns this highly lustrous Gem. The surfaces are impressively mark-free despite a minor tick on the cheekbone. It is boldly struck overall but with a hint of incompleteness at the centers. The 1893 is among the lowest-mintage Philadelphia issues of the series (378,000 pieces) and is essentially unobtainable any finer, with just six coins so-graded at PCGS (6/16).  
Ex: *Dallas Signature* (Heritage, 10/2009), lot 1048.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 255R, PCGS# 7220

**1893-CC Silver Dollar, AU58  
Reflective Fields**

- 5434 1893-CC AU58 PCGS.** This near-Mint 1893-CC Morgan dollar is brilliant and well-detailed, with only a brush of high-point friction to limit the grade. Scattered abrasions accompany the grade, as expected. The fields are semiprooflike. The 1893-CC is the final Carson City issue and a slightly better date in the series from this mint. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar  
Uncirculated Sharpness  
Scarce Carson City Issue**

- 5435 1893-CC — Damage — PCGS Genuine. Unc. Details.** At arm's length, no damage is apparent, but close inspection reveals a moderate, shallow scrape on the left border of Liberty's cheek. Similar but much smaller marks are noted on Liberty's eyebrow and neck. This nicely struck and untuned Carson City dollar has sweeping luster and a smooth reverse. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS62+  
Reflective Fields**

- 5436 1893-CC MS62+ PCGS.** The final issue of the Carson City Mint before coinage operations were discontinued for good at the Nevada Mint. This pleasing Morgan dollar has fully brilliant and untuned silver surfaces with frosty devices, and reflective, semi-prooflike fields. Both sides exhibit myriad surface marks that are entirely trivial in nature. NGC ID# 255S, PCGS# 7222

- 5437 1893-O AU58 PCGS. VAM-3A.** The 1893-O has the lowest mintage of any New Orleans Morgan dollar issue. This lustrous near-Mint example has peripheral peach patina and only a hint of wear on the eagle's breast. Close inspection reveals only incidental marks. NGC ID# 255T, PCGS# 7224

**1893-O Morgan Dollar, MS62  
Low-Mintage Branch Mint Key**

- 5438 1893-O MS62 NGC.** From a limited mintage of 300,000 pieces, the 1893-O Morgan dollar is a challenging issue in all grades. This attractive MS62 example exhibits unusually sharp definition on all design elements and the brilliant surfaces show a mix of satiny mint luster and prooflike reflectivity. A number of minor contact marks are scattered over both sides, explaining the grade. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS62  
Reflective Fields**

- 5439 1893-O MS62 NGC.** This semikey New Orleans issue is elusive in Mint State compared to most other dates in the series. The present example is well-struck for the issue and boasts semiprooflike fields. Traces of light champagne toning appear over each side. Light chatter on Liberty's cheek limits the grade but poses little distraction for the grade. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS63  
Reflective Fields**

- 5440** 1893-O MS63 PCGS. CAC. Ex: The Michigan Collection. This brilliant Mint State 1893-O Morgan dollar, though not certified as Prooflike, certainly looks the part. Both sides have mirrored fields around satiny devices, with obvious cameo contrast. An intriguing Select example with obvious appeal to the high-end collector, despite a few scattered abrasions that define the grade.  
Ex: *Las Angeles Signature* (Heritage, 8/2009), lot 1975.  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 255T, PCGS# 7224

- 5441** 1893-S — Cleaning — PCGS Genuine. VG Details. VAM-1. Although moderately hairlined, this key date dollar has partly retoned caramel-gold. All legends are clear, and the lower wings exhibit plumage. Mentionable marks are confined to small rim knocks near 9 o'clock on the reverse. NGC ID# 255U, PCGS# 7226

- 5442** 1893-S VG8 NGC. This key-date Morgan displays remarkably clean, natural bluish-gray surfaces for a large silver coin that has experienced heavy circulation. This is a very nice piece that will fit comfortably in a low- to mid-grade Morgan dollar collection. NGC ID# 255U, PCGS# 7226

**1893-S Silver Dollar, VG10  
Problem-Free for the Grade**

- 5443** 1893-S VG10 PCGS. VAM-1. A stone-gray example of the most challenging commercial Morgan dollar issue. All legends are bold, and the eagle's wings and tail possess about half of their initial definition. Small marks are scattered but none are sufficiently consequential for individual description. NGC ID# 255U, PCGS# 7226

- 5444** 1893-S — Improperly Cleaned — NGC Details. Fine. VAM-1. Light tan-gold and plum-red toning visits the borders, but this key date silver dollar is predominantly pearl-gray. The surfaces are mildly glossy from a wipe. Relevant marks are confined to a slight obverse rim knock at 2:30 and a narrow depression on the obverse rim at 5:30. NGC ID# 255U, PCGS# 7226

**1893-S Morgan, XF Details  
Unmistakable Die Markers, VAM-2**

- 5445** 1893-S — Cleaning — PCGS Genuine. XF Details. VAM-2. Just two die pairs exist for the 1893-S, sharing a common obverse. The diagnostic "rabbit ears" on the left foot of the R in LIBERTY and a die line at the top of the adjacent T confirm the genuine obverse. The mintmark on the reverse of this example leans to the right and a die line angles up through the opening of the ribbon bow to identify the VAM-2 variety. The surfaces are overly bright from a light cleaning that shows faint hairlines in the fields. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, XF Details**

- 5446** 1893-S — Scratches — NGC Details. XF. VAM-1. The centered mintmark variety. Luster emerges from the curls and plumage. The borders on both sides exhibit several thin scratches, most noticeable near the DO in DOLLAR. The field east of the R in DOLLAR appears smoothed. Nonetheless, a well defined pearl-gray representative of the scarcest business issue Morgan dollar. NGC ID# 255U, PCGS# 7226

**1893-S Silver Dollar, XF Sharpness**

- 5447** 1893-S — Tooled — PCGS Genuine. XF Details. VAM-1. A stone-gray key date representative with substantial pearl-white luster throughout the borders and wings. Clusters of pinscratches on the fields near Liberty's nose and the arrowheads correspond to the PCGS designation. A thin vertical mark extends from the branch to the beak. Otherwise, only minimally abraded. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, XF45**  
**Attractive Surfaces**

- 5448 1893-S XF45 NGC. VAM-1.** This lovely dollar has pleasing pewter-gray surfaces with faint traces of champagne color on both sides. Some luster remains visible in the protected areas. Aside from the usual light circulation marks from a brief term in circulation, the surfaces are exceptional for their overall quality. As one of the important key-date issues in the Morgan dollar series, this date is in constant demand regardless of condition. The present example is solid for the grade, a coin that will delight the collector.  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 5692. NGC ID# 255U, PCGS# 7226*

**1893-S Dollar, Choice XF**

- 5449 1893-S XF45 PCGS. VAM-2.** An untuned and well defined example. Luster is prevalent across the borders, wings, and curls. Marks are inconsequential aside from a thin line below STATES. The 1893-S is the rarest business issue of the Morgan series, and the eternal popularity of silver dollars among collectors ensures continual demand. NGC ID# 255U, PCGS# 7226

**1893-S VAM-2 Dollar, Choice XF**  
**Famous Morgan Rarity**

- 5450 1893-S XF45 PCGS. VAM-2.** A silver-gray representative with plentiful peripheral luster and good eye appeal. A few small to moderate marks on the left obverse merit only cursory mention. The mintmark is lower and tilted on VAM-2, the rarer of the two die marriages for the San Francisco key. NGC ID# 255U, PCGS# 7226
- 5451 1894 AU55 PCGS.** Lustrous fields add to the eye appeal of this bright, untuned Choice AU example, showing well-detailed motifs and the usual smattering of light abrasions. The 1894 is a scarce Philadelphia issue, sought-after in all grades. NGC ID# 255V, PCGS# 7228

- 5452 1894 AU58 PCGS.** The bright, satiny surfaces of the nearly Uncirculated 1894 silver dollar are exceptionally smooth for the grade, showing only a few tiny ticks on Liberty's cheek. The strike is bold, and eye appeal is pleasing. The fields are thoroughly lustrous. NGC ID# 255V, PCGS# 7228

- 5453 1894 AU58 PCGS. CAC.** Substantial mint luster remains on this near-Mint, CAC-approved 1894 dollar, delivering eye appeal comparable to that of many Mint State pieces. The strike is sharp, and light chatter on Liberty's cheek appears to be the only grade-limiting factor. NGC ID# 255V, PCGS# 7228

- 5454 1894 — Cleaning — PCGS Genuine. Unc. Details.** The 1894 has the second-lowest business mintage of the Morgan dollar series, if one accepts the 1895 as proof-only. This lustrous and brilliant representative has a good strike and few marks, although careful rotation reveals delicate hairlines. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS61**  
**Bold Strike, Nice Luster**

- 5455 1894 MS61 PCGS.** The 1894 Morgan dollar claims a memorably low Philadelphia mintage of 110,000 pieces, making the date relatively elusive in all grades today. This sharply struck Mint State example radiates vibrant mint luster from both sides, under subtle shades of champagne-gold toning. The surfaces show the expected number of minor contact marks for the grade, but the eye appeal is surprisingly strong. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS64**  
**Rarely Available Finer**

- 5456 1894 MS64 PCGS. CAC. Ex: The Michigan Collection.** Dollars of 1894 are highly desired in all grades. David Bowers (1993) writes: "Among Philadelphia Mint Morgan dollars, the 1894 is the second rarest (after 1901) in Mint State. Most coins are in lower Mint State ranges. The demand for the latter is softened somewhat by the availability of high-grade Proofs." A hint of light tan color concentrates at the rims of this radiantly lustrous near-Gem. The design elements are well defined, including fairly good detail in the hair at Liberty's ear and on the eagle's breast feathers. A few minor marks are consistent with the grade.  
*Ex: ANA Signature (Heritage, 8/2007), lot 2425.*  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 255V, PCGS# 7228

- 5457 1894-O MS60 PCGS.** This Mint State 1894-O Morgan dollar displays satiny, untuned mint luster and well-defined design elements. Light chatter on the obverse determines the grade, but the eye appeal surpasses expectations for an MS60 coin. Housed in a green label holder.  
*Ex: Summer FUN Signature (Heritage, 7/2010), lot 8776. NGC ID# 255W, PCGS# 7230*

**5458 1894-O MS62 PCGS.** A lustrous and essentially brilliant representative of this much better New Orleans issue. The strike shows occasional incompleteness, but marks are surprisingly few for the MS62 level. Certified in a green label holder. NGC ID# 255W, PCGS# 7230

**5459 1894-O MS62 PCGS.** This lower-end Mint State 1894-O dollar is uncommonly attractive for the grade. To the naked eye, it appears about two points finer, but a loupe reveals contact on the cheek that limits the grade. This piece is well-struck and displays some amber-gold and blue toning along the left reverse border. NGC ID# 255W, PCGS# 7230

#### 1894-O Morgan Dollar, MS63 Nice Luster and Eye Appeal

**5460 1894-O MS63 PCGS.** The 1894-O Morgan dollar is a challenging issue in high grade, due to striking problems and excessive surface marks. The present coin offers a better-than-average strike, with just a touch of the typical softness on the hair above the ear and eagle's breast. The creamy surfaces radiate vibrant mint luster, with only minor signs of contact. Eye appeal is quite strong for this difficult issue. NGC ID# 255W, PCGS# 7230

#### 1894-O Dollar, MS64 High-End for the Issue

**5461 1894-O MS64 PCGS.** Ex: The Michigan Collection. The 1894-O is one of the great condition and strike rarities in the Morgan series. Wayne Miller said in 1982 that he had never seen a fully struck one, and when PCGS had its tour of the finest dollars in 1990 and 1991, the 1894-O was represented by an MS64. This coin certainly isn't fully struck either, and in fact it shows a pronounced lack of definition, most notably on the eagle's breast. However, in terms of abrasions this is a wonderfully smooth and undisturbed coin that has no obvious marks on either side. Lightly and evenly toned with strong underlying satiny mint luster. PCGS lists a dozen numerically finer submissions today (6/16).  
Ex: *The Clarke Marie Collection, Part One / Long Beach Signature* (Heritage, 9/2004), lot 8785.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 255W, PCGS# 7230

**5462 1894-S MS63 PCGS.** The fresh, original mint frost that blankets both sides of this Select 1894-S Morgan dollar delivers strong eye appeal for the grade, despite light abrasions. The strike is sharp, and a few tinges of light golden toning appear occasionally around the outer peripheries. NGC ID# 255X, PCGS# 7232

**5463 1894-S MS63 PCGS.** A collectible Select Mint State example of this better San Francisco issue, showing satiny mint luster on the obverse and fully prooflike fields on the reverse. The coin is well-struck and shows only minor abrasions. Areas of gold and orange-gold toning appear on each side. NGC ID# 255X, PCGS# 7232

**5464 1894-S MS63 PCGS.** This is a well-struck Select Mint State example of the semikey 1894-S Morgan, showing light champagne color and satiny luster. A linear graze in the left obverse field is all that precludes a Choice designation from PCGS. Eye appeal is pleasing for the grade. NGC ID# 255X, PCGS# 7232

#### 1894-S Silver Dollar, MS65 An Eye-Catching, Semiprooflike Coin

**5465 1894-S MS65 PCGS.** Ex: The Michigan Collection. A fully brilliant and satiny Gem with considerable die polish in the fields on both sides that impart a reflective or mirrored finish. In fact, this is a borderline prooflike coin of exceptional beauty. PCGS has only certified 16 finer examples of the 1894-S Morgan (6/16).  
Ex: *ANA Signature (Heritage, 7-8/2008)*, lot 2416.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 255X, PCGS# 7232

#### 1894-S Silver Dollar, MS65+ Conditionally Elusive Semikey

**5466 1894-S MS65+ PCGS.** Splashes of gold and blue toning line the obverse border of this frosty and highly lustrous Gem 1894-S Morgan dollar, exhibiting faint peripheral gold toning splashes on the reverse. Parallel roller lines across the lower obverse and faintly on the reverse are typical of this issue, as well as many other San Francisco Mint silver dollars from the 1890s. PCGS has certified 10 of these as MS65+ and just 16 finer examples (7/16). NGC ID# 255X, PCGS# 7232

**5467 1895-O AU55 NGC.** This is a bright, untoned semikey New Orleans dollar from a low mintage of 450,000 coins. The small distribution and lack of P-mint circulation strikes place considerable date pressure on examples across all grade levels. Typically defined and lightly marked. NGC ID# 255Y, PCGS# 7236

**5468 1895-O AU55 NGC.** A hint of lavender-gray toning graces the satiny surfaces of this Choice AU 1895-O Morgan dollar, while a combination of luster and reflectivity illuminate the fields. Wear is trivial, but some minor strike softness is seen on the hair above Liberty's ear. NGC ID# 255Y, PCGS# 7236

**5469 1895-O AU55 PCGS.** A hint of light golden toning appears over partially lustrous surfaces on this Choice AU 1895-O silver dollar. Light surface chatter accompanies the grade, and the design elements show slight high-point friction. NGC ID# 255Y, PCGS# 7236

**5470 1895-O AU55 PCGS.** Brilliant and mostly lustrous, this Choice About Uncirculated example displays only a brush of friction. Softness on the hair above Liberty's ear and on the eagle's breast is primarily due to strike quality — typically lacking on 1890s New Orleans issues. NGC ID# 255Y, PCGS# 7236

**5471 1895-O AU55 PCGS.** Only a touch of high-point friction precludes Mint State status for this 1895-O Morgan dollar. The strike is well-executed, and the satiny surfaces retain partial luster in the fields. A hint of light champagne toning graces each side. NGC ID# 255Y, PCGS# 7236

**5472 1895-O AU55 PCGS.** Lustrous fields give this faintly champagne-toned 1895-O Morgan dollar pleasing eye appeal, while a brush of high-point wear precludes a Mint State designation. The strike is sharp, and the surfaces are free of singular distractions. NGC ID# 255Y, PCGS# 7236

**5473 1895-O AU55 PCGS.** This bright, Choice AU representative retains partial luster in the fields. Weakness on the central high points is largely due to a poor strike, rather than wear. This 1895-O dollar is untuned save for a dash of amber around the F in OF. NGC ID# 255Y, PCGS# 7236

---

**1895-O Silver Dollar, Near-Mint  
Challenging New Orleans Issue**

**5474 1895-O AU58 PCGS. VAM-3.** The 5 in the date is repunched north. Lustrous and untuned with a trace of wear at the centers. The surfaces show only minor marks. Known as the rarest New Orleans issue, even though the mintage is 50% higher than the 1893-O. Such anomalies occur regularly within the Morgan series; for example, the low mintage 1899 is common in Mint State relative to the high mintage 1901. NGC ID# 255Y, PCGS# 7236

---

**1895-O Silver Dollar, AU58+  
Lustrous, Borderline Mint State Coin**

**5475 1895-O AU58+ PCGS. CAC.** Nearly full mint luster remains on both sides of this brilliant and scarce O-Mint dollar. Untoned except for a hint of pale-gold at the rims, the surfaces show scattered light marks that suggest brief circulation along with a touch of high-point rub. As usual for the 1895-O, the strike is a bit flat over the ear and on the eagle's breast and leg feathering. The vibrant surfaces more than make up for any shortcomings, with eye appeal seldom seen on even fully Uncirculated examples. CAC-endorsed for quality and high-end merit. NGC ID# 255Y, PCGS# 7236

---

**1895-O Dollar, Uncirculated Details  
Key New Orleans Issue**

**5476 1895-O — Cleaning — PCGS Genuine. Unc. Details.** Many Morgan dollar issues struck between 1893 and 1895 are rare. Mintages were low during those three years, and since vaults were already packed with silver dollars, most newly coined examples entered commerce. This is a stone-white key date New Orleans representative with good luster and minimal abrasions. Delicate hairlines cross both sides, and the hair above the ear shows a couple of horizontal marks. NGC ID# 255Y, PCGS# 7236

---

**1895-S Morgan Dollar, AU58  
Brilliant and Reflective**

**5477 1895-S AU58 PCGS. CAC.** The brilliant silver surfaces of this impressive near-Mint example are untuned with reflective fields that suggest a once gorgeous prooflike piece that is still highly attractive. This piece would make a nice addition to an otherwise Mint State set of Morgan dollars. NGC ID# 255Z, PCGS# 7238

---

**1895-S Dollar, MS64  
Low-Mintage Semikey**

**5478 1895-S MS64 NGC.** The unavailability of the 1895-P puts tremendous date pressure on the 1895-O and 1895-S, but both are low-mintage issues. Only 400,000 Morgan dollars were struck in California in 1895, and survivors are rarely found finer than the one offered here. Blue and gold toning dominates the obverse with an area of brilliance near the center. The opposite is true of the reverse, where mainly untuned surfaces yield to splashes of color around the borders. This near-Gem showcases crisp detail and minimal marks for the grade. NGC has seen 14 finer representatives (6/16). NGC ID# 255Z, PCGS# 7238

**1895-S Silver Dollar, MS64+  
Better Branch Mint Issue**

- 5479 1895-S MS64+ PCGS. CAC.** Ex: The Michigan Collection. With a mintage of only 400,000 pieces, the 1895-S is a better date in all grades. In Gem condition, it is a genuine rarity. This Plus-graded near-Gem displays satiny, brilliant surfaces with mild reflectivity in the fields. Minor softness on the hair above Liberty's ear is typical of the issue. PCGS has seen 42 finer submissions (6/16).  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 255Z, PCGS# 7238

- 5480 1895-S/S VAM-3 AU53 NGC.** A Hot 50 Variety. An untuned and partly lustrous semikey silver dollar. The center of the cheek and the field near UNITED are typically abraded. The mintmark is widely repunched northwest, though a horn-shaped curve is apparent from the first mintmark impression. The variety is undesignated on the NGC holder. NGC ID# 4BC2, PCGS# 134020 Base PCGS# 7238

**1895-S VAM-4 Dollar, Near-Mint  
S Over Horizontal S**

- 5481 1895-S S Over Horizontal S, VAM-4, AU58 PCGS.** A Top 100 Variety. Sun-gold and lavender toning embraces coruscating and minimally abraded surfaces. The strike is good despite the presence of faint vertical roller marks at the centers. The blundered mintmark variety is unacknowledged on the PCGS holder. A scarce San Francisco issue. NGC ID# 255Z, PCGS# 133943 Base PCGS# 7238

- 5482 1896 MS67 PCGS.** An amazing Superb Gem, this 1896 Morgan dollar has fully lustrous mint frost with brilliant silver surfaces and a crescent of iridescent toning at the lower reverse. PCGS has only certified two finer examples (6/16). NGC ID# 2562, PCGS# 7240

- 5483 1896 MS67 PCGS.** Subtle hints of light pink toning visit the immaculate surfaces of this delightful Superb Gem, with a crescent of emerald-green on the lower obverse periphery. The design elements are sharply detailed and vibrant mint luster radiates from both sides. PCGS has graded two numerically finer examples (6/16). NGC ID# 2562, PCGS# 7240

- 5484 1896-O MS62 PCGS.** New Orleans Morgan dollars struck in 1896 are seldom seen finer than MS62, and are out of reach for most collectors when found. This collectible Uncirculated dollar maintains its brilliance and shows bright, glistening luster. Scattered marks define the grade. NGC ID# 27ZU, PCGS# 7242

- 5485 1896-O MS62 PCGS.** Dusky golden-gray toning appears over each side of this Mint State 1896-O silver dollar, masking the scattered abrasions that define the grade. The strike is slightly soft on the eagle's breast and the hair above Liberty's ear, but eye appeal remains pleasing for the grade. NGC ID# 27ZU, PCGS# 7242

**1896-O Dollar, MS63  
Better New Orleans Issue**

- 5486 1896-O MS63 PCGS.** Ex: The Michigan Collection. Basically untuned with decent sharpness for this conditionally scarce O-mint and only modest abrasions on the central devices. The satiny fields are virtually unaffected by contact. PCGS has seen only 32 numerically finer submissions (6/16).  
Ex: Long Beach Signature (Heritage, 6/2006), lot 2666.  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 27ZU, PCGS# 7242

**1896-S Dollar, Frosty MS64  
Elusive in Finer Grades**

- 5487 1896-S MS64 PCGS. CAC.** Ex: The Michigan Collection. Frosty, glistening mint luster rolls over both sides of this Choice 1896-S Morgan dollar, showing mostly untuned surfaces and clean fields. A few minor grazes on Liberty's cheek are all that preclude a full Gem grade. The 1896-S is usually available in this grade, but finer coins are seldom seen.  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 2564, PCGS# 7244

- 5488 1897 MS66 PCGS.** Spectacular vertical bands of cherry-red, lemon, orange, powder-blue, and apple-green alternate across the reverse. The obverse is white save for a peripheral hint of gold patina. The left obverse exhibits wispy grazes. NGC ID# 27P5, PCGS# 7246

- 5489 1897 MS66+ PCGS. CAC.** The strike is sharp on this high-end Premium Gem, and the frosty surfaces display remarkable preservation. Neither side has obvious toning. The 1897 silver dollar is rarely seen finer than the present example. PCGS has certified only 33 coins in higher grades (6/16). NGC ID# 27P5, PCGS# 7246

**1897 Morgan Dollar, MS67  
Tied for Numerical Finest**

- 5490 1897 MS67 PCGS.** This boldly defined Superb Gem has frosty silver luster with exceptional eye appeal. The obverse is brilliant and untoned, and the reverse exhibits a hint of champagne toning. The 1897 is a challenging issue in Gem grades, and elusive any finer. Only a few Registry collectors will have a chance to obtain the best possible grade as offered here. Population: 33 in 67 (1 in 67+), 0 finer (7/16). NGC ID# 27P5, PCGS# 7246

**1897 Morgan, Top-Grade MS67  
Conditionally Rare**

- 5491 1897 MS67 PCGS.** Ex: Jackson Hole/The Michigan Collection. Although the 1897 is considered common today, it was once considered a rarity, and it actually remains an important condition rarity in top quality. Superb Gem specimens are almost never encountered in the numismatic marketplace. This Superb Gem is frosty and fully brilliant with amazing silver surfaces. It is also a fully struck representative with outstanding details on the obverse and reverse. This coin is among the finest certified. Population: 33 in 67 (1 in 67+), 0 finer (6/16).  
Ex: The Jackson Hole Collection / Dallas Signature (Heritage, 4/2007), lot 89.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 27P5, PCGS# 7246

**1897 Dollar, MS66 Prooflike  
Modest Cameo Contrast**

- 5492 1897 MS66 Prooflike PCGS. CAC.** Prooflike examples of the 1897 Morgan dollar are scarce in Gem or finer condition. This Premium Gem Prooflike coin is among the finest at PCGS. The strike is bold, and the frosty texture of the relief elements contrasts nicely with the reflective fields. Both sides are unabraded and brilliant save for a ring of amber-gold toning around the peripheries. Population: 15 in 66 (2 in 66+) Prooflike, 0 finer (6/16). NGC ID# 2565, PCGS# 7247

- 5493 1897-O MS61 NGC.** The silvery surfaces of this O-mint Morgan exhibit the weak strike associated with this issue. That said, a modicum of detail is apparent in the hair over Liberty's ear. Scattered marks are visible over the obverse NGC ID# 2565, PCGS# 7248

- 5494 1897-O MS62 PCGS.** A fairly well-struck Mint State example of this better New Orleans issue, showing golden-toned luster and minimal abrasions for the grade. The 1897-O Morgan becomes genuinely rare above MS63, making the present MS62 ideal for the budget-conscious collector. NGC ID# 2565, PCGS# 7248

- 5495 1897-O MS62 PCGS.** Light champagne toning appears over softly frosted luster on this unusually attractive 1897-O Morgan. The strike is above average for the date, and grade-limiting abrasions are trivial. An outstanding example for the lower end of the Mint State spectrum. NGC ID# 2565, PCGS# 7248

**1897-O Morgan Dollar, MS63  
Brightly Lustrous and Lightly Toned**

- 5496 1897-O MS63 PCGS.** Ex: Michigan Collection. An important condition rarity, the 1897-O is elusive in full Mint State grades. This Select piece is fully lustrous with frosty silver surfaces. Faint gold toning on the reverse seems to cover a few tiny areas of surface roughness, probably accounting for the grade. As seen on many O-mint coins of this era, the strike is somewhat weak, especially over Liberty's ear.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 2565, PCGS# 7248

- 5497 1897-S MS66 PCGS.** A sharp, frosty Premium Gem example of this conditionally elusive San Francisco issue, showing warm light golden toning. The strike is bold, and Liberty's cheek is clean. PCGS has seen 28 Superb Gems finer (7/16). NGC ID# 2567, PCGS# 7250

- 5498 1897-S MS66+ PCGS. CAC.** Ex: The Michigan Collection. The eye appeal of this high-end Premium Gem is off the charts, with radiant, brilliant luster illuminating virtually undisturbed mint frost on each side, while the design elements are struck to full definition. This issue is not properly considered scarce in lower Mint State grades, but examples grading finer than the present piece are seldom seen.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 2567, PCGS# 7250

- 5499 1897-S MS66 Prooflike PCGS. CAC.** Here is a date that is seldom seen in the finer Prooflike grades. This Premium Gem 1897-S silver dollar displays brilliant surfaces with reflective fields and bold design elements. Modest cameo contrast is seen on each side. Population: 38 in 66 (2 in 66+) Prooflike, 4 finer. CAC: 14 in 66, 2 finer (6/16). NGC ID# 267S, PCGS# 7251

- 5500 1897-S MS65 Deep Mirror Prooflike NGC. VAM-4.** The date was initially entered with an upward slant, then repunched with a proper alignment. The flag of the 1 and the top of the 7 show repunching. This flashy Gem is well struck and exhibits lovely golden-brown and cobalt-blue toning near the rims. Encapsulated in a former generation holder. NGC ID# 2567, PCGS# 97251

**1898 Morgan Dollar, MS67**  
None Certified in Numerically Finer Grades

- 5501 1898 MS67 PCGS.** Ex: Michigan Collection. The 1898 Morgan dollar, from a mintage approaching 6 million pieces, is plentiful through Gem condition. Superb Gem examples such as the present coin are very scarce and unknown any finer. The silver-white surfaces possess vibrant luster and yield sharply struck design features, including the hair over Liberty's ear and the eagle's breast feathers. A few minute marks are within the parameters of the grade designation.  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 2568, PCGS# 7252

- 5502 1898 MS66 Prooflike PCGS.** A scarce high-end Prooflike example, showing Premium Gem-quality surfaces with stark cameo contrast. The strike is full, and neither side exhibits mentionable toning. The fields and Liberty's cheek are clean. Population: 19 in 66 (2 in 66+) Prooflike, 2 finer (7/16). NGC ID# 2568, PCGS# 7253

- 5503 1898-O MS67 PCGS. CAC.** Ex: The Michigan Collection. Light golden-tan toning visits this lustrous and penetratingly struck Superb Gem. Magnificently preserved, and virtually unobtainable any finer. None are numerically finer at PCGS. CAC: 59 in 67, 0 finer (6/16).  
Ex: *FUN Signature (Heritage, 1/2007), lot 7382; Dallas Signature (Heritage, 4/2007), lot 1226.*  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 2569, PCGS# 7254

- 5504 1898-O MS66 Deep Mirror Prooflike NGC.** David Bowers (2006) indicates that quantities of the 4.440 million-piece 1898-O mintage were released by the Treasury, making the issue common. In Deep Mirror Prooflike, however, fewer than 60 Premium Gem examples have been seen by NGC and PCGS, and a mere four coins finer! This sharply struck specimen displays barely discernible light tan color on portions of the central devices, and has a cameo-like appearance. Some minute marks and luster grazes on the cheek and neck prevent an even higher grade. Census: 11 in 66 (1 in 66★) Deep Mirror Prooflike, 1 finer (7/16). NGC ID# 2569, PCGS# 97255

- 5505 1898-S MS65 PCGS.** Glimpses of orange-gold toning adorn the borders of this lustrous and well preserved silver dollar. The centers show moderate inexactness of strike, and the lower cheek exhibits delicate mint-made roller marks. Certified in a first generation holder. NGC ID# 256A, PCGS# 7256

**1898-S Morgan Dollar, MS66**  
Prime Condition Rarity in Finer Grades

- 5506 1898-S MS66 PCGS.** Ex: Michigan Collection. An amazing Premium Gem with satiny, nearly reflective, surfaces. The strike is bold, providing full design motifs, although the hair immediately above Liberty's ear is slightly weak, as always. Like many Morgan dollars, this is a condition rarity in higher grades, as evidenced by the population numbers. Population: 87 in 66 (5 in 66+), 3 finer (6/16).  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 256A, PCGS# 7256

**1899 Morgan Dollar, MS66+**  
Rare in Finer Grades

- 5507 1899 MS66+ PCGS. CAC.** Ex: Michigan Collection. Despite a low mintage of 330,000 pieces, the 1899 Morgan dollar is surprisingly available in Mint State. In the present grade, however, the 1899 becomes a rarity. This well struck and essentially brilliant example provides bright mint luster and a sharp strike. The reverse is immaculate and the obverse displays only faint grazes. PCGS has graded 22 numerically finer examples (6/16).  
Ex: *Central States Signature (Heritage, 4/2011), lot 5883; Beverly Hills Signature (Heritage, 11/2011), lot 3896.*  
*From The Bowler Collection of Morgan Dollars.* NGC ID# 256C, PCGS# 7258

**1899 Morgan Dollar, MS65 Deep Mirror Prooflike**

- 5508 1899 MS65 Deep Mirror Prooflike PCGS. CAC.** The 1899 is a high-visibility dollar among the later dates. Prooflike coins are seldom seen, and when found they generally do not have the contrast seen on this piece. That is an especially significant statement as this coin has a considerable overlay of golden-brown toning on each side. Deeply reflective in the fields with frosted mint luster over the devices. Fully struck. Housed in a green label holder. Population: 52 in 65 (1 in 65+) Deep Mirror Prooflike, 12 finer. CAC: 5 in 65, 1 finer (6/16). NGC ID# 256B, PCGS# 97259

- 5509 1899-O MS67 PCGS. CAC.** Ex: Michigan Collection. A whisper of gold toning is apparent, but most collectors would regard the present Superb Gem as brilliant. Boldly struck and highly lustrous with outstanding preservation. PCGS has graded only one numerically finer example (6/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 256C, PCGS# 7260

- 5510 1899-S MS65 PCGS.** The obverse of this well-preserved Gem is blanketed in shades of golden-brown and lavender-gray toning, while the reverse is mostly brilliant. The design elements are well-detailed and vibrant mint luster shines through the toning. NGC ID# 256D, PCGS# 7262

---

**1899-S Silver Dollar, MS66  
Conditionally Scarce**

- 5511 1899-S MS66 PCGS.** Ex: The Michigan Collection. The 1899-S Morgan dollar is a challenging issue at the Premium Gem level and nearly unobtainable in any finer grade. The present coin is sharply struck and displays rich, frosty luster. The surfaces exhibit no marks worthy of individual mention, and eye appeal is outstanding. PCGS reports 10 Superb Gems finer (6/16).

*Ex: Long Beach Signature (Heritage, 9/2010), lot 4711.*

*From The Bowler Collection of Morgan Dollars.* NGC ID# 256D, PCGS# 7262

- 5512 1900 MS66+ PCGS. CAC.** Softly frosted mint luster is largely untuned as it cartwheels around the near-pristine surfaces of this CAC-endorsed Premium Gem. The 1900 Morgan dollar is occasionally seen in MS66 but seldom finer, which makes the present Plus-graded piece particularly appealing. PCGS has seen 45 Superb Gems finer (6/16). NGC ID# 256F, PCGS# 7264

---

**1900 Silver Dollar, MS67  
Radiant Mint Luster**

- 5513 1900 MS67 NGC.** An issue seldom found in so high a grade, despite the considerable mintage of almost 9 million pieces. The present piece features excellent luster over brilliant surfaces with a hint of lilac coloration. This sharply struck piece is remarkably distraction-free. Census: 46 in 67 (1 in 67+), 0 finer (6/16).

*Ex: Long Beach Signature (Heritage, 2/2007), lot 5760.* NGC ID# 256F, PCGS# 7264

---

**1900 Morgan Dollar, MS67  
None Finer at PCGS**

- 5514 1900 MS67 PCGS.** Ex: Michigan Collection. A brilliant-white example, lightly frosted and extremely well-struck. The portrait is incredible on this Superb Gem dollar, with an extremely clean cheek on Liberty and strong hair details. A small abrasion above star 13 is the only mentionable mark. This dollar is tied for finest certified with none certified numerically finer by either major service (7/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 256F, PCGS# 7264

---

**1900-O Morgan, MS67  
Seldom Available So Fine**

- 5515 1900-O MS67 PCGS.** Even though many 1900-O Morgan dollars are well produced, there are relatively few that ever attain the Superb Gem ranking. This piece has silver-white surfaces on both sides that display the barest tinge of color. Liberty's cheek is remarkably pristine, as indeed the surfaces are throughout. Ebullient cartwheel luster completes the appeal. Population: 67 in 67 (4 in 67+), 0 finer (6/16).

*Ex: FUN Signature (Heritage, 1/2009), lot 4792.* NGC ID# 256F, PCGS# 7266

---

**1900-O Silver Dollar, MS67  
Rarely Seen Quality**

- 5516 1900-O MS67 PCGS.** Ex: Jack Lee III. Lovely golden-brown bands enrich the borders of this meticulously struck and remarkably undisturbed Superb Gem. Booming luster further confirms the originality. Because the 1900-O is common in middle Mint State grades, the issue fails to garner the respect it deserves at the MS67 level. Neither PCGS nor NGC has certified a higher-grade example. Population: 68 in 67 (4 in 67+), 0 finer (7/16).

*Ex: Palm Beach Signature (Heritage, 3/2006), lot 1264; Long Beach Signature (Heritage, 2/2007), lot 5764.* NGC ID# 256F, PCGS# 7266

**1900-O/CC Morgan Dollar, MS66  
Popular Overmintmark Variety**

- 5517 1900-O/CC VAM-8A MS66 PCGS.** Ex: Michigan Collection. A Top 100 Variety. VAM-8A has die rust near the mintmark but lacks clash marks near Liberty's profile. Only a hint of golden patina visits this lustrous and virtually immaculate overmintmarked silver dollar. The strike is sharp for a New Orleans emission. PCGS has graded two numerically finer examples (6/16).  
Ex: *Long Beach Signature* (Heritage, 9/2011), lot 3771, which realized \$8,625.  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 256G, PCGS# 133961 Base PCGS# 7268

**1900-O Dollar, MS65 Deep Prooflike  
Doubled Stars, VAM-15, Top 100**

- 5518 1900-O Doubled Stars, VAM-15, MS65 Deep Prooflike NGC.** A Top 100 Variety. Two obverse stars near 5 o'clock exhibit prominent die doubling. Brilliant and nicely struck with reflective fields and exceptionally unmarked surfaces. As of (6/16), NGC has graded just four examples of VAM-15 as Deep Prooflike, and the present piece is single-finest within that quartet. NGC ID# 256F, PCGS# 44417 Base PCGS# 97267

- 5519 1900-S MS65 NGC.** This turn-of-the-century Gem exhibits pretty luster and strong central detail. A hint of hazy iridescence graces the minimally marked fields. NGC has only certified 28 finer examples (7/16). NGC ID# 256H, PCGS# 7270

- 5520 1900-S MS65 PCGS.** The 1900-S is a slightly better date in high grade, particularly above MS65. This Gem is well-struck and brilliant, showing modestly reflective fields and satiny motifs. The surface quality seems unusually high, even for the Gem grade level. NGC ID# 256H, PCGS# 7270

- 5521 1900-S MS66 PCGS.** This Premium Gem 1900-S Morgan displays brilliant, satiny luster that appears a grade point finer at first glance. Only upon close study with a loupe do a few trivial grazes in the left obverse field become discernible. The hair above Liberty's ear is a trifle soft, but the strike is otherwise well-executed. Only two Superb Gems are finer at each grading service (6/16). NGC ID# 256H, PCGS# 7270

**1900-S Morgan Dollar, MS66  
Well-Preserved and Lightly Toned**

- 5522 1900-S MS66 PCGS. CAC.** Ex: Michigan Collection. The surfaces on this scarcer turn-of-the-century issue are boldly detailed with softly frosted, satiny luster. There are few appreciable blemishes to distract the viewer and only faint blushes of rose-gray patina are seen on either side. Wispy striations angling across the portrait are a product of the minting process and are not even discernible without the aid of magnification. PCGS has graded two numerically finer examples (6/16).  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 256H, PCGS# 7270

- 5523 1901 AU58+ PCGS. CAC.** A dusting of light gray toning appears over each side of this 1901 Morgan dollar, accompanying a brush of friction. Much luster remains in the fields. This appealing 1901 silver dollar boasts both a Plus designation and a CAC endorsement — a rare combination at the AU58 level. NGC ID# 256J, PCGS# 7272

- 5524 1901 Doubled Die Reverse, VAM-3, XF45 PCGS. CAC.** A Top 100 Variety. The dramatic "Shifted Eagle" variety, listed in the *Guide Book* and very scarce relative to demand. The eagle's branch, arrows, and tail feathers are die doubled north. This problem-free and original silver-gray example displays wear on the eagle's breast but shows luster throughout the legends and wings. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

- 5525 1901-O MS66+ PCGS. CAC.** This turn-of-the-century New Orleans issue is exceedingly rare above the Premium Gem grade level, making this Plus-designated coin highly appealing to the budget-conscious collector. The strike is bold, and the satiny cartwheel luster is almost devoid of flaws. Each side shows a light golden glow. PCGS has seen only six finer representatives (6/16). NGC ID# 256K, PCGS# 7274

**1901-O Silver Dollar, MS66+  
Finer Examples Are Rare**

- 5526 1901-O MS66+ PCGS. CAC.** This MS66+ 1901-O Morgan is the top of the ladder for budget-conscious collectors. Only a few handfuls of Superb Gems are known at both services combined. This CAC-approved representative displays an uncommonly bold strike and satiny mint luster with a trace of light champagne toning. PCGS has seen six finer representatives (6/16). NGC ID# 256K, PCGS# 7274

**1901-S Morgan Dollar, MS65  
Seldom Encountered In Finer Grades**

- 5527 1901-S MS65 PCGS.** This attractive Gem exhibits well-detailed design elements, with just a touch of the usual softness on the hair above the ear. The well-preserved surfaces are brightly lustrous, under subtle shades of greenish-gold toning. Housed in an old green label holder. PCGS has graded 40 numerically finer examples (6/16). NGC ID# 256L, PCGS# 7276

**1901-S Morgan Dollar, MS66  
Sharply Detailed and Lustrous**

- 5528 1901-S MS66 PCGS.** Ex: Michigan Collection. The 1901-S Morgan dollar was overlooked by contemporary collectors and relatively few high-grade examples have survived over the years. This spectacular Premium Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show a few hints of pink and pale gold toning. Population: 37 in 66 (3 in 66+), 3 finer (6/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 256L, PCGS# 7276

- 5529 1902-O MS66+ PCGS. CAC.** Ex: The Michigan Collection. A coin with outstanding eye appeal, this high-end Premium Gem possesses largely silver-white surfaces revealing a few areas of golden toning at the outer edges. The luster is strong and the strike is sharp aside from the extreme centers. The few marks present are minuscule. PCGS lists only 20 finer submissions (6/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 256N, PCGS# 7280

- 5530 1902-O MS66+ PCGS. CAC.** This high-end Premium Gem Morgan dollar exhibits well-detailed design elements and vibrant mint luster under attractive shades of orange-gold and magenta toning. No mentionable distractions are evident, even on close inspection. PCGS has graded 20 numerically finer examples (6/16). NGC ID# 256N, PCGS# 7280

- 5531 1902-O MS66+ PCGS. CAC.** A sharp, frosty 1902-O Morgan dollar with delicate champagne toning over each side. This high-end, CAC-approved Premium Gem displays exceptionally clean fields and pleasing eye appeal. PCGS lists 21 finer representatives (7/16). NGC ID# 256N, PCGS# 7280

- 5532 1902-S MS65 PCGS.** A vibrantly lustrous Gem example of this conditionally elusive San Francisco issue. The strike is bold, and each side displays well-preserved, frosty luster. The reverse is brilliant, but the obverse showcases a distinctive ribbon of lavender, olive-green, gold, and midnight-blue toning horizontally across Liberty's portrait and extending along the right obverse border. Finer examples are scarce. NGC ID# 256P, PCGS# 7282

- 5533 1902-S MS65 PCGS. CAC.** "Centers" on each side are generally pale silver-gray, while outer areas show rich bands of blue, green, and gold-orange. An attractive 20th century Morgan dollar Gem, solidly struck for its San Francisco issue. PCGS has certified 47 numerically finer representatives (7/16). NGC ID# 256P, PCGS# 7282

**1902-S Morgan Dollar, MS66  
Vibrant Luster, Minimal Toning**

- 5534 1902-S MS66 PCGS.** Ex: Michigan Collection. Aside from trifling softness at the highest design elements, this is a generally well-defined Premium Gem example of a challenging 20th century Morgan dollar issue. Shining surfaces are pale pearl-gray overall with just a suggestion of pink visible in the fields. The sharp-eyed Morgan dollar enthusiast will want to take a look at this piece. Population: 43 in 66 (5 in 66+), 4 finer (6/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 256P, PCGS# 7282

- 5535 1903 MS67 NGC.** Delicate rose-orange patina graces the highly lustrous surfaces of this suitably struck Superb Gem. Hardly any marks are present. NGC has only certified two numerically finer examples of this conditionally elusive issue (7/16). NGC ID# 256R, PCGS# 7284

- 5536 1903 MS67 PCGS.** Ex: Jackson Hole/Michigan Collection. Wayne Miller calls this issue the best-produced Morgan dollar ever from the Philadelphia Mint. The current Superb Gem offering is consistent with his assessment, as it offers a uniformly sharp, clear striking impression on all of the design elements. The brilliant surfaces display vibrant satin luster and are nearly mark-free on both sides. Population: 96 in 67 (2 in 67+), 0 finer (6/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 256R, PCGS# 7284

- 5537 1903-O MS66+ PCGS. CAC.** Daubs of light champagne-gold patina encompass the peripheries, ceding to brilliant centers. Each side shows the incompleteness of strike over the ear and breast that one expects for the issue, but this high-end Premium Gem is nonetheless appealing because of it. Marvelously preserved. NGC ID# 256S, PCGS# 7286

- 5538 1903-O MS66+ PCGS. CAC.** A remarkably well-preserved example of this 20th century New Orleans issue, showing brilliant, clean surfaces and a bold strike. The Plus designation/CAC green label combination affirms the outstanding quality. Finer examples are infrequently seen. NGC ID# 256S, PCGS# 7286

**1903-O Dollar, MS67**  
**Among the Finest Known**

- 5539 1903-O MS67 PCGS.** Ex: The Michigan Collection. While 1903-O dollars are plentiful today, they are still condition rarities in MS67. When a Superb Gem example is encountered it is a coin of singular beauty. This piece exemplifies that with its bright, satiny mint luster and freedom from any noteworthy abrasions. The strike details are as complete as one can expect from the C4 reverse dies. Brilliant throughout. Population: 79 in 67 (1 in 67+), 0 finer (6/16). Ex: Long Beach Signature (Heritage, 9/2010), lot 4728. *From The Bowler Collection of Morgan Dollars.* NGC ID# 256S, PCGS# 7286

**1903-O Dollar, MS67**  
**A Great Series Rarity Pre-1962**

- 5540 1903-O MS67 NGC.** One of the more "colorful dates" in the Morgan series, the 1903-O is a former great rarity. This untuned Premium Gem boasts a remarkably clean cheek on Liberty and far better-struck centers than usually seen on this issue. Census: 47 in 67 (1 in 67+), 0 finer (6/16). NGC ID# 256S, PCGS# 7286

**1903-O Morgan Dollar, MS67**  
**Outstanding Quality**

- 5541 1903-O MS67 PCGS.** A spectacular New Orleans type coin. The strike is razor-sharp, the cartwheel luster is vibrant, and the lightly toned almond-gold surfaces are virtually pristine. Although PCGS has graded one coin higher as MS67+, that piece, unseen by the cataloger, would have to be essentially perfect to surpass the present lot. Certified in an old green label holder. Population: 79 in 67 (1 in 67+), 0 finer (6/16). NGC ID# 256S, PCGS# 7286

**1903-S Silver Dollar, MS65**  
**Vibrant, Brilliant Mint Luster**

- 5542 1903-S MS65 PCGS.** A sharp, brilliant Gem example of this elusive San Francisco issue, showing untuned, radiant mint luster. A couple of minor grazes on the cheek are all that limit the grade. The 1903-S is a key date among 20th century Morgan dollar issues, and Mint State pieces are in particular demand. PCGS has seen 42 numerically finer submissions (7/16). NGC ID# 256T, PCGS# 7288

**1903-S Silver Dollar, AU50**  
**Micro S, VAM-2, Top 100**

- 5543 1903-S Micro S, VAM-2, AU50 NGC.** A Top 100 Variety. A mintmark punch intended for Barber quarters was inadvertently used on the reverse die for VAM-2, the sole such occurrence in the Morgan dollar series. Any AU 1903-S dollar is desirable, but the Micro S nonetheless commands a significant premium. An untuned and moderately abraded example with ample remaining luster. Listed in the Deluxe Edition of the *Guide Book*. NGC ID# 256T, PCGS# 133967 Base PCGS# 7306

**1903-S VAM-2 Dollar, Choice AU**  
**Micro S Mintmark, FS-002**

- 5544 1903-S Micro S, FS-002, VAM-2, Top 100, AU55 PCGS.** A Top 100 Variety. The *Cherrypickers' Guide* comments on this rare VAM variety: "The S mintmark punched into this die may have been intended for the Barber half dollar series, but it is certainly not the normal mintmark for a Morgan dollar. This is the only known Morgan die with this small mintmark. Only one is known in Mint State." Each side is brilliant, save for a blush of russet patina over the eagle's right wing. High-point rub leaves the design definition virtually unaffected, and minor abrasions do not overly distract. *From The Bowler Collection of Morgan Dollars.* NGC ID# 256T, PCGS# 133967 Base PCGS# 7306

**5545 1904 MS65 PCGS.** Ex: Michigan Collection. While 1904 Philadelphia dollars are usually available in lower Uncirculated grades, they become elusive in grades of Gem and finer. This example is highly attractive for the grade, with sharply struck design elements, except for some softness in the hair over Liberty's ear. Wisps of light tan color adhere to lustrous surfaces that exhibit just a few minor marks on Liberty's cheek and on the eagle's breast. The only mark worthy of individual note is seen on the reverse, below the T in TRUST. PCGS has graded 26 numerically finer examples (6/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 256U, PCGS# 7290

**5546 1904 MS65 PCGS.** This well-struck, satiny Gem displays warm golden toning on the obverse, surrounded by lavender and aquamarine peripheral color. The reverse is deep ocean-blue and sea-green. The 1904 is usually available in this grade, but PCGS lists only 26 finer representatives (7/16). NGC ID# 256U, PCGS# 7290

**5547 1904 MS65 PCGS. CAC.** Lustrous surfaces are essentially untuned and exhibit well-struck design elements, including most of the detail in the hair over Liberty's ear. A few minuscule, grade-consistent marks do not disturb. After the 1904 Philadelphia, New Orleans, and San Francisco issues, no more Morgan dollars were struck until 1921. PCGS has certified just 26 numerically finer examples (7/16). NGC ID# 256U, PCGS# 7290

#### 1904-O Dollar, Semiprooflike MS67 Tied for Finest Certified

**5548 1904-O MS67 PCGS.** Among the finest 1904-O Morgans certified, this Superb Gem showcases beautifully preserved surfaces with a hint of champagne toning and well-struck design elements. Semiprooflike mirroring in the fields enhances the eye appeal. Rare so fine in a PCGS holder. Population: 47 in 67, 0 finer (6/16). NGC ID# 256V, PCGS# 7292

#### 1904-O Dollar, MS67 ★ Brilliant With Reflective Fields

**5549 1904-O MS67 ★ NGC.** This is an intriguing coin with sharp central obverse and reverse details, but considerable weakness is seen around the borders. For example, the hair over Liberty's ear is fully defined but the date and all of the stars on the obverse are nearly flat. The fields on both sides seem to us to merit a Prooflike designation and the devices are satiny. Both sides are entirely brilliant with no trace of toning.

Ex: *Dallas Signature (Heritage, 11/2006), lot 1498; Long Beach Signature (Heritage, 2/2007), lot 5798.* NGC ID# 256V, PCGS# 7292

**5550 1904-S AU58 PCGS.** The 1904-S is a slightly better date in Uncirculated condition. This near-Mint representative displays substantial luster in the fields beneath light golden toning. The strike is bold, and wear is trivial. NGC ID# 256W, PCGS# 7294

**5551 1904-S AU58 PCGS.** Virtually full luster radiates from this near-Mint 1904-S Morgan dollar beneath light golden toning. There are minimal abrasions and only trivial high-point friction present, although a loupe reveals a few short pinscratches immediately above Liberty's ear. NGC ID# 256W, PCGS# 7294

#### 1904-S Dollar, Brilliant MS63+

**5552 1904-S MS63+ PCGS.** Although Uncirculated 1904-S dollars were released during the middle part of the 20th century, Mint State examples are still scarce relative to the demand for them. This brilliant Select dollar shows blushes of golden-orange toning around the margins on each side. The 1904-S usually comes lightly struck at the centers, as is the case here. Definition is strong elsewhere, though, and marks are minimal for the assigned grade. NGC ID# 256W, PCGS# 7294

#### 1904-S Dollar, MS65 Sought-After Late-Date Example

**5553 1904-S MS65 PCGS.** Somewhat like the 1903-S, this late-date San Francisco issue is collectible in circulated condition (more so than the 1903-S), but high-grade pieces are notable rarities. Examples of the 1904-S trickled out of the S-mint throughout the first half of the 20th century. Bowers writes that a few bags came on the market in the early 1940s, augmenting dealers' inventory for a long time. This brilliant Gem showcases frosty luster over well-preserved surfaces. The hair over Liberty's ear and the eagle's breast are a touch soft, as usual, but there are no other imperfections to report. PCGS shows 16 submissions graded higher (4/16).

*From The Bowler Collection of Morgan Dollars.* NGC ID# 256W, PCGS# 7294

**5554 1921 MS66+ PCGS.** 30th Anniversary Green Label Holder. The thickly frosty, radiant mint luster of this high-end Premium Gem 1921 Morgan dollar is outstanding. The strike is sharper than typical on the wreath and eagle, and faint traces of pale champagne toning add to the eye appeal. Only a few trivial marks prevent a full Superb Gem grade. PCGS has seen only 11 finer representatives (6/16). NGC ID# 256X, PCGS# 7296

**5555 1921 MS66+ PCGS. CAC.** A spectacular Plus-graded Premium Gem representative of the last year of the Morgan design, with sharply detailed design elements, vibrant mint luster, and well-preserved surfaces that show just a trace of golden-tan toning. PCGS has graded 11 numerically finer examples (6/16). NGC ID# 256X, PCGS# 7296

- 5556 1921 MS66+ PCGS. CAC.** A high-end Premium Gem Morgan dollar from the last year of the design, with sharply detailed design elements and vibrant mint luster throughout. Subtle hints of golden-tan toning add to the outstanding eye appeal. PCGS has graded 11 numerically finer examples (6/16). NGC ID# 256X, PCGS# 7296

**1921 Morgan Dollar, MS67  
None Certified Finer**

- 5557 1921 MS67 NGC.** The 1921 Morgan dollar was produced in record large numbers, but survivors are very rare in MS67 condition. This delightful Superb Gem exhibits sharply detailed design elements and well-preserved surfaces that radiate vibrant mint luster on both sides. A few subtle hints of golden-tan toning enhance the terrific eye appeal. Census: 11 in 67, 0 finer (7/16). NGC ID# 256X, PCGS# 7296

**1921-S Morgan Dollar, MS66  
None Finer at PCGS**

- 5558 1921-S MS66 PCGS. Ex:** The Michigan Collection. The 1921-S is an issue that logically should not be as rare as it is in high grades. Produced in the final year for Morgan dollars, from modified dies, all the 1921 issues were heavily circulated. Many were still in circulation in the early 1960s. So this date simply did not receive attention from collectors. Almost all of the 21.6 million pieces of the San Francisco dollars either slipped into circulation or were banged around in rolls or bags, leaving very few high grade collector coins. This is a spectacular, all-white coin that has the thick mint frost that seems to only be found on S and CC-mint silver. A spectacular example of this surprising, late-date condition rarity. Population: 82 in 66 (5 in 66+), 0 finer (6/16).  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 4740.*  
**From The Bowler Collection of Morgan Dollars.** NGC ID# 256Z, PCGS# 7300

## PROOF MORGAN DOLLARS

**1879 Morgan Dollar, PR65 Cameo  
Multicolor Toned Proof**

- 5559 1879 PR65 Cameo NGC.** A delightful Gem from a generous proof mintage of 1,100 pieces, this coin exhibits sharply detailed frosty design elements that contrast boldly with the deeply reflective fields. Delicate shades of greenish-gold toning blanket the well-preserved surfaces, with accents of jade, amber, and cobalt-blue. Census: 10 in 65 Cameo, 39 finer (6/16). NGC ID# 27Z2, PCGS# 87314

- 5560 1880 PR63 PCGS.** This fully struck Select 1880 proof Morgan displays subtle bluish-gray toning in the fields, which accentuates stark cameo contrast on the obverse. The reverse relief elements are not as frosted, and a Cameo designation is thus prevented. Eye appeal exceeds expectations for the grade. NGC ID# 27Z4, PCGS# 7315

- 5561 1881 PR61 NGC.** Light hairlines on the cheek and in the fields of this proof Morgan dollar limit the grade. Both sides are mostly brilliant with delicate gold peripheral toning on the obverse, and deeper gold toning at the reverse border. NGC ID# 27Z5, PCGS# 7316

**1882 Dollar, PR65 Cameo  
Starkly Contrasted Fields and Devices**

- 5562 1882 PR65 Cameo PCGS.** Many of the 1,100 or so proof 1882 Morgan dollars have been cleaned. The current Gem Cameo is a notable exception. Its impeccably preserved surfaces display wisps of gold color at the margins, as well as full strike detail throughout, including complete definition on the hair over Liberty's ear and on the eagle's breast feathers. The lightly frosted motifs stand out against the mirrored fields, and just a faint mark or two occurs on Liberty's cheek. Population: 15 in 65 (2 in 65+) Cameo, 19 finer (6/16).  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 5810.* NGC ID# 27Z6, PCGS# 87317

- 5563 1885 PR62 PCGS.** A sharp, golden-toned lower-end proof example of this popular date, showing modest cameo contrast on the obverse. Eye appeal is pleasing for the grade. A few tiny marks on Liberty's cheek prevent a finer numeric designation. NGC ID# 27ZE, PCGS# 7320

**1886 Dollar, PR66 Cameo**  
**Rarely Seen This Fine**

- 5564 1886 PR66 Cameo PCGS. CAC.** Cameo 1886 proof Morgans are elusive in any grade, but this Premium Gem example is a genuine rarity. Field-device contrast is immediately obvious on each side, accentuated by dusky golden toning that resides around the borders. The fields are deeply mirrored, and there is a pleasant lack of contact marks. Population: 6 in 66 Cameo, 1 finer. CAC: 1 in 66, 2 finer (6/16). NGC ID# 27ZF, PCGS# 87321

**1887 Silver Dollar, PR64**  
**Golden Toning**

- 5565 1887 PR64 NGC.** Dusky golden-tan toning appears over each side of this Choice 1887 proof Morgan dollar. The strike is full, and the fields show deep reflectivity when tilted beneath a light. The toning prevents a Cameo designation, although it also masks a few stray hairlines in the fields. NGC ID# 27ZG, PCGS# 7322

- 5566 1889 PR61 Cameo PCGS.** A slightly hazy Cameo Proof that has strong contrast and light champagne patina overall. Boldly struck as expected, though hairlines are abundant in the fields. NGC ID# 27ZJ, PCGS# 87324

**1890 Morgan Dollar, PR65**  
**Deep Original Toning**

- 5567 1890 PR65 PCGS.** Intense, iridescent cobalt-blue and champagne-pink toning covers the obverse, while the reverse has an area of light silver-gray in the center, with a similar color palette near the rims. Scrutiny under a loupe reveals a notable lack of contact, large or small. Population: 15 in 65 (1 in 65+), 23 finer (7/16). Ex: Long Beach Signature (Heritage, 2/2007), lot 5815. NGC ID# 27ZK, PCGS# 7325

**1891 Silver Dollar, PR65**  
**Modest Field-Device Contrast**

- 5568 1891 PR65 NGC.** This Gem 1891 proof shows reflective fields as well as satiny, contrasted devices, although minor strike weakness is seen on the central high points. There are no bothersome marks or hairlines not hidden by the patina, although a small toning speck near the S in PLURIBUS serves as a pedigree marker. Census: 18 in 65, 48 finer (6/16). NGC ID# 27ZL, PCGS# 7326

**1894 Dollar, Toned PR63**  
**Modest Field-Motif Contrast**

- 5569 1894 PR63 NGC.** Lavender-gold interiors cede to olive-gold and sea-green peripheral toning on this attractive 1894 proof dollar. The strike is full, and any grade-limiting hairlines are well masked by the patina. Both sides show perceptible contrast through the toning but not starkly enough to warrant a Cameo designation from NGC. NGC ID# 2577, PCGS# 7329

**1894 Silver Dollar, PR65**  
**One-Sided Contrast**

- 5570 1894 PR65 PCGS.** A well-preserved Gem proof 1894 Morgan dollar, showing deep mirrors with modest cameo contrast on the reverse. Hints of light golden toning appear on each side. Finer examples of this proof issue are infrequently seen. This coin presents pleasing eye appeal. Population: 30 in 65, 14 finer (7/16). NGC ID# 2577, PCGS# 7329

**1896 Silver Dollar, PR64+ Cameo  
Delightful Toning and Contrast**

**5571 1896 PR64+ Cameo NGC.** There is nothing about this high-end Choice Cameo 1896 proof dollar that is not absolutely eye-appealing. Proofs of all denominations in 1896 were fairly well made, as the present Morgan dollar confirms. The strike is full, and the depth of mirroring in the fields is outstanding. Lovely sun-gold toning around the borders lightens as it intrudes upon the interior fields. Eye appeal is outstanding. Census: 7 in 64 Cameo (1 in 64+), 53 finer (6/16). NGC ID# 27ZT, PCGS# 87331

**5572 1898 PR60 NGC.** Both sides of this proof Morgan dollar are brilliant and untuned with light hairlines that account for the grade. A hint of field-to-device contrast is evident, especially on the reverse. NGC ID# 27ZW, PCGS# 7333

**1904 Morgan Dollar, PR66+  
Richly Toned Original Surfaces**

**5573 1904 PR66+ PCGS. CAC.** The surfaces lack field-device contrast, as usual for this late-date proof issue, but they make up for it in colorful eye appeal. Iridescent toning covers each side, exhibiting shades of gold, rose, and blue. A marvelously original Premium Gem proof from a mintage of 650 specimens. Population: 35 in 66 (3 in 66+), 6 finer (6/16). NGC ID# 2824, PCGS# 7339

Farran Zerbe

**1921 Zerbe Proof Dollar, PR63  
All-Brilliant, Accompanied by Breen COA**

**5574 1921 Zerbe PR63 NGC.** Zerbe proofs certainly have a checkered history. Years ago they were universally accepted if the coin showed the requisite die markers. Then the doubters asserted none were proofs. Today the pendulum has swung back to belief that they are proofs, albeit poorly made ones when compared to the "Chapman proofs." Perhaps we will never know for certain what the exact nature of these dollars are. What is certain, however, is when they look like a proof they bring a price one would expect of a proof. This example is accompanied by a Breen letter of authentication from 1965. We won't go into the specific die characteristics he lists in his letter. Those have been published elsewhere.

This is a brilliant coin that has been hairlined, thus the PR63 grade, and there are only the tiniest contact marks that are located at the top of the reverse. The fields are mirrored, noticeably so if not deeply so, with just the slightest hint of contrast with the devices. If looking like a proof makes it a proof, this dollar should fetch the price of a PR63 Morgan dollar because it certainly does have the required appearance. Census: 9 in 63 (1 in 63★), 34 finer (6/16). NGC ID# 257A, PCGS# 7341

**PEACE DOLLARS**

**5575 1921 MS65 PCGS.** Shades of slate-gray, sea-green, and amber toning visit the peripheries of this attractive Gem, while the centers remain mostly brilliant. The lustrous surfaces are well-detailed and well-preserved and the high relief design elements show better-than-average detail for this issue. NGC ID# 2U4E, PCGS# 7356

**5576 1921 MS65 PCGS.** Dusky shades of golden-brown, lavender-gray, and amber toning blanket the well-preserved surfaces of this attractive Gem, with vibrant mint luster underneath. The well-detailed design elements show just a touch of the usual softness on Liberty's hair. NGC ID# 2U4E, PCGS# 7356

**5577 1921 MS65 PCGS.** The dappled rose-gray and russet patina often found on this issue is highlighted by soft luster. Minimally marked, though Liberty's hair exhibits the weakness often found on this high relief issue. NGC ID# 2U4E, PCGS# 7356

**5578 1921 MS65 PCGS.** A lustrous almond-gold and pearl-gray Gem. The strike is surprisingly sharp. Smooth save for a single hair-thin field line near the nose. An impressive example of the briefly produced high relief subtype. Certified in an old green label holder. NGC ID# 2U4E, PCGS# 7356

**5579 1921 MS65 PCGS.** Most first-year Peace dollars have a mushy central impression, but the present Gem has a surprisingly bold strike. The pastel wheat-gold and ice-blue toning further increases the eye appeal. Encapsulated in an old green label holder. NGC ID# 2U4E, PCGS# 7356

**5580 1921 MS65 PCGS.** This Gem High Relief Peace dollar displays well-preserved, golden-toned mint luster and excellent eye appeal. The central high points are poorly struck, as usual on this issue. Finer examples quickly climb out of reach for the average collector. NGC ID# 2U4E, PCGS# 7356

**5581 1921 MS65 NGC.** Whispers of gold-tan and sky-blue color cover the lustrous surfaces of this first year Peace dollar. The hair at Liberty's ear shows better definition than often seen, and both sides are remarkably clean. The 1921 is a very popular issue, and this particular example is an excellent choice for a high-grade collection. NGC ID# 2U4E, PCGS# 7356

**1921 Peace Dollar, MS66  
Outstanding Mint Luster**

**5582 1921 MS66 PCGS. CAC.** The 1921 Peace dollars are underappreciated in high grade, as they are both lovely in their own right and separate high-relief subtypes, just as are the MCMVII High Relief twenties in the Saint-Gaudens series. The 1921 Peace dollars are, of course, far more available, but the MS66 grade is pretty much the cutoff point, as both PCGS and NGC have each certified only a handful finer. The present MS66 PCGS specimen boasts outstanding luster and is nearly brilliant, save for a touch of pale gold color. The strike, while good overall and better than usually seen, is still a bit soft in the centers of each side. Seven submissions are finer at PCGS (6/16).

*Ex: Chicago Signature (Heritage, 8/2011), lot 4870. NGC ID# 2U4E, PCGS# 7356*

**1922-D Dollar, MS66+  
Colorfully Toned**

**5583 1922-D MS66+ NGC.** This Premium Gem Peace dollar displays mixed shades of golden-tan, copper, and powder-blue patina over each side with satin luster that glistens from beneath the colorful, undoubtedly original overlay. The motifs are well-struck with a bit of softness toward the centers. Marks are scant. Many bags of 1922-D dollars were held in storage and released slowly over time, but few contained anything near the quality of this coin. NGC reports 16 finer submissions (7/16). NGC ID# 257D, PCGS# 7358

**1923-S Peace Dollar, MS65  
Extremely Rare Any Finer**

**5584 1923-S MS65 PCGS.** This high-mintage issue (over 19 million pieces) is common through MS64, but its numbers drop significantly at the Gem level. David Bowers (1993) also mentions that it is nearly always poorly struck. The Gem we offer here displays sharp definition, with good detail apparent in Liberty's hair. Lustrous surfaces take on some blushes of orange here and there and reveal a few minute obverse contact marks. PCGS has seen only three numerically finer representatives (6/16).

*Ex: Long Beach Signature (Heritage, 2/2007), lot 5850. NGC ID# 257H, PCGS# 7362*

**1923-S Peace Dollar, MS65  
Conditionally Elusive Issue**

**5585 1923-S MS65 PCGS.** The 1923-S Peace dollar is an important condition rarity in the series. This frosty Gem exhibits a sharp strike and pristine surfaces with untuned silver brilliance. A few minuscule marks prevent an even higher grade. This is an important candidate for a Gem or finer set of the design. PCGS has only certified three numerically finer submissions (7/16). NGC ID# 257H, PCGS# 7362

**1923-S Dollar, MS65  
S-Mint Condition Rarity**

**5586 1923-S MS65 PCGS.** The 1923-S stands among the most elusive Peace dollar issues in Gem condition. Most examples are poorly struck and heavily bagmarked, accounting for an average certified grade of MS62. This extraordinary representative is uncharacteristically well-struck with mostly clear legends and only moderate central softness. Frosty, brilliant surfaces show speckled multihued toning confined mainly to the peripheral areas. PCGS reports merely three finer submissions: two in MS66 and one in MS67 (7/16). NGC ID# 257H, PCGS# 7362

**1924 Peace Dollar, MS67  
Thick Mint Luster**

- 5587 1924 MS67 NGC.** Booming luster sweeps across both sides of this well-struck and impeccably preserved Superb Gem. Light chestnut streaks are equally in force on each side. While the strike is strong and marks are almost non-existent, it is really the thick mint luster that gives this coin its special appeal. NGC has certified only one coin finer (6/16).  
Ex: *Long Beach Signature (Heritage, 2/2007)*, lot 5856. NGC ID# 257J, PCGS# 7363

**1925 Peace Dollar, MS67  
Prohibitively Rare Finer**

- 5588 1925 MS67 PCGS.** The 1925 Peace dollar is an available date in lower Mint State grades, but examples in MS67 condition are very scarce and finer coins are virtually unobtainable. This impressive Superb Gem offers sharply detailed design elements and impeccably preserved lustrous surfaces, under delicate shades of champagne-gold toning. PCGS has graded one numerically finer example (7/16). NGC ID# 257L, PCGS# 7365

- 5589 1926 MS66 PCGS. VAM-6.** The olive branch is lightly die doubled. Light honey-gold toning visits this lustrous and well preserved silver dollar. The 1926 has a much lower mintage than the prior four Philadelphia issues, and is correspondingly scarcer in lofty Mint State grades. NGC ID# 257N, PCGS# 7367

- 5590 1926 MS66 PCGS. CAC. VAM-6.** Butter-gold toning adorns the centers of this lustrous and splendidly preserved Premium Gem. The strike is bold and the eye appeal is exceptional. The lower reverse is nicely die doubled, similar to the Top 50 VAM-2.  
Ex: *Long Beach Signature (Heritage, 2/2000)*, lot 5661; *Portland Signature (Heritage, 3/2004)*, lot 6820, which realized \$1,610. NGC ID# 257N, PCGS# 7367

- 5591 1926-S MS65+ PCGS.** A high-end Gem Peace dollar, with sharply detailed design elements and especially vibrant mint luster throughout. The mostly brilliant surfaces show a few hints of greenish-gold toning and no mentionable distractions. NGC ID# 257R, PCGS# 7369

- 5592 1927-S MS64 PCGS. CAC.** Splashes of gold and iridescent toning appear on both sides of this satiny Choice Mint State Peace dollar. This representative is boldly struck with excellent eye appeal. PCGS has only certified 86 finer examples (7/16). NGC ID# 26J6, PCGS# 7372

- 5593 1927-S MS64 PCGS. CAC.** This frosty Choice Mint State 1927-S Peace dollar represents the finest quality that is routinely available, as PCGS has only certified 86 submissions in higher numerical grades (7/16). Both sides are fully brilliant and lustrous with untuned silver surfaces. NGC ID# 26J6, PCGS# 7372

- 5594 1927-S MS64+ PCGS. CAC.** Frosty mint brilliance appears centrally beneath a thin veil of antique-gold and russet patina. This well-known condition rarity is typically struck with a few small bagmarks on each side. A challenge to upgrade. NGC ID# 26J6, PCGS# 7372

- 5595 1928 MS64 PCGS.** A satiny Choice Mint State example of this key-date Peace dollar, this one is a trifle weak at the center but exhibits brilliant silver luster and splashes of golden-steel toning. NGC ID# 257V, PCGS# 7373

- 5596 1928 MS64+ PCGS. CAC.** A satiny borderline Gem, this 1928 Peace dollar is highly lustrous and fully brilliant with faint traces of rose-gold toning, mostly on the obverse. The 1928 is a highly popular key-date that enjoys strong demand in all grades. NGC ID# 257V, PCGS# 7373

**1928 Silver Dollar, MS65  
Elusive in Finer Grades**

- 5597 1928 MS65 PCGS.** A satiny Gem example of this key-date Philadelphia issue, showing well-struck design elements and characteristic yellow-gold toning. This date is famous for its low mintage (360,649 pieces), although it remains available through MS65. Finer coins, however, are rarely seen. PCGS lists 18 numerically finer representatives (6/16). NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65  
Rarely Encountered Finer**

- 5598 1928 MS65 PCGS.** The biggest key date in the Peace dollar series, the 1928 had a limited mintage of only a little more than 360,000 pieces. Gem survivors are scarce, and finer pieces are rare. This example is somewhat frostier than most representatives of this date, with sharp design elements and only a few insignificant ticks in unobtrusive locales. Delicate champagne toning blankets each side. PCGS has seen 18 numerically finer submissions (7/16). NGC ID# 257V, PCGS# 7373

- 5599 1934 MS66 PCGS.** A stunning Premium Gem, this 1934 Peace dollar exhibits brilliant and satiny silver luster with bright, untuned surfaces. Boldly struck and highly appealing. PCGS has only certified three numerically finer examples of this issue (7/16). NGC ID# 257Y, PCGS# 7375

**1934 Silver Dollar, MS66+  
Outstanding Quality**

**5600 1934 MS66+ PCGS. CAC.** The Plus designation/CAC green label combination sets this high-end Premium Gem apart from most MS66-quality 1934 Peace dollars, and finer examples are rare. This piece is well-struck and satiny with a blush of warm golden toning. Population: 15 in 66+, 3 finer. CAC: 46 in 66, 0 finer (6/16). NGC ID# 257Y, PCGS# 7375

**5601 1934-D MS65+ PCGS. Medium D.** A lustrous and lower mintage Gem. The strike is crisp, and both sides display delicate golden patina. Abrasions are minor and unworthy of mention. A curly lintmark is below the N in ONE. NGC ID# 257Y, PCGS# 7376

**5602 1934-S AU58 PCGS.** Satiny champagne surfaces show glimmering luster in the protected portions of the fields, granting this near-Mint 1934-S Peace dollar excellent eye appeal for the grade. The 1934-S is famous as being the scarcest issue in the series in Mint State. NGC ID# 257Z, PCGS# 7377

**1935 Peace Dollar, MS66  
Tied for the Finest at PCGS**

**5603 1935 MS66 PCGS. CAC.** Although a considerable number of 1935 Peace dollars are graded MS66, finer examples are non-existent in PCGS holders (7/16). This Premium Gem features a bold strike and satin luster beneath wispy champagne toning. Splashes of golden-brown toning may be seen near the reverse border. NGC ID# 2582, PCGS# 7378

**1935 Silver Dollar, MS66  
Green Label Holder**

**5604 1935 MS66 PCGS. CAC.** Lustrous and virtually brilliant with a bold strike. The portrait is exceptionally free from marks, and the fields and eagle show only minor contact. An outstanding representative of the final Philadelphia issue, and a great rarity any finer. Encapsulated in a green label holder. NGC ID# 2582, PCGS# 7378

**5605 1935-S MS65+ PCGS. CAC.** Three rays below ONE. Beguiling luster radiates from the surfaces of this high-end Gem 1935-S Peace dollar, the final issue in the series and conditionally scarce any finer. The coin is well-struck, the cheek is pristine, and minor marks on Liberty's neck and the eagle's rock are almost unnoticed by the mint-fresh, frost-white luster. NGC ID# 2583, PCGS# 7379

**EISENHOWER DOLLARS**

**1971-D Eisenhower Dollar, MS67  
Among the Finest Certified at PCGS**

**5606 1971-D MS67 PCGS.** From a first-year branch mint mintage of more than 68 million pieces, the 1971-D Eisenhower dollar is surprisingly difficult to locate in MS67 condition. This delightful Superb Gem is well-detailed and brightly lustrous throughout. The impeccably preserved surfaces are visited by delicate shades of pale gold toning. Housed in a new 30th Anniversary green label holder. Population: 28 in 67, 0 finer (6/16). NGC ID# 2585, PCGS# 7407

**1974-D Eisenhower Dollar, MS62  
on a 40% Silver Planchet**

**5607 1974-D — Struck on a 40% Silver Planchet — MS62 PCGS. Breen-5761.** The 2017 *Guide Book* states “a few 1974-D and 1977-D dollars in silver clad composition were made in error.” The planchets were intended for the San Francisco Mint, which struck Brown and Blue Ikes through 1974, and Bicentennial Ikes in that alloy in 1975. Breen (1988) states that “about 30 known” for the silver-clad 1974-D Ike, and adds that the variety was discovered by a Las Vegas blackjack dealer, further proof that the house always wins. A lustrous and lightly toned example with a smooth reverse and moderate obverse abrasions.

**5608 1974-D MS66+ PCGS.** Although more than 500 1974-D Eisenhower dollars have been graded MS66 by PCGS, that service has only certified 20 pieces in MS66+, and just 22 in finer grades (7/16). This amazing Premium Gem has a crescent of rainbow toning at the upper obverse, with iridescent toning on the reverse. Both sides are fully lustrous and impeccably well preserved. NGC ID# 258E, PCGS# 7416

**5609 1974-D MS66+ PCGS. CAC.** The obverse of this Premium Gem is entirely toned on golden-olive and pale blue, and the reverse exhibits predominantly orange and violet toning. This piece is fully lustrous and spectacular. PCGS has only certified 22 numerically finer examples (7/16). NGC ID# 258E, PCGS# 7416

**1974-D Eisenhower Dollar, MS67  
Top-Grade Registry Coin**

**5610 1974-D MS67 PCGS.** A conditionally rare Registry coin, among the finest 1974-D Eisenhower dollars known. This piece displays razor-sharp design elements set against satiny, golden-toned surfaces. There are no bothersome abrasions, and the eye appeal is pleasing. Population: 22 in 67 (3 in 67+), 0 finer (6/16). NGC ID# 258E, PCGS# 7416

**1974-D Eisenhower Dollar, MS67  
None Certified in Higher Numeric Grades**

**5611 1974-D MS67 PCGS.** The impeccably preserved surfaces of this delightful Superb Gem are blanketed in pleasing shades of lavender-gray and golden-brown toning. The design elements are well-detailed and vibrant mint luster shines through the patina. The 1974-D is an abundant issue in lower grades, but the issue is rare at this exalted grade level. Population: 22 in 67 (3 in 67+), 0 finer (7/16). NGC ID# 258E, PCGS# 7416

**1974-D Ike Dollar, MS67+  
Tied for the Finest Certified**

**5612 1974-D MS67+ PCGS.** This Plus-designated Superb Gem 1974-D Eisenhower dollar represents the absolute finest available to Registry Set collectors. The strike is sharp, and the satiny surfaces display greenish-gold toning with a blush of warmer orange color in the centers. Population: 22 in 67 (3 in 67+), 0 finer (6/16). NGC ID# 258E, PCGS# 7416

**1976-D Type Two Ike Dollar, AU55  
Struck on a 40% Silver Planchet  
Extremely Rare Wrong Alloy Error**

**5613 1976-D Type Two — Struck on a 40% Silver Planchet — AU55 PCGS.** 374.5 grains. A Clad Ike should weigh 22.7 grams, or 350 grains. Struck on a planchet intended for 40% silver Type One San Francisco Bicentennial Ike dollars (Breen-5764). Under Breen-5770, the entry for the Type Two 1976-D, he mentions that “a silver-clad specimen turned up about 1978.” A perusal of our online auction archives reveals three 1974-D and three 1977-D Ikes on 40% silver planchets, but no prior appearances of the present wrong-alloy variety. Untoned and satiny with a typical strike and minimally abraded surfaces. NGC ID# B76P, PCGS# 7421

**5614 1976-D Type Two MS67 PCGS. CAC.** An impressive Superb Gem Bicentennial dollar, with thin reverse letters in the legend and the Second U in UNUM centered below the letter I in PLURIBUS, identifying the popular Type Two design. This sharply detailed, lustrous example shows some delicate traces of lavender and pale gold toning. Housed in a new 30th Anniversary green label holder. Population: 28 in 67 (1 in 67+), 0 finer. CAC: 4 in 67, 0 finer (6/16). NGC ID# B76P, PCGS# 7421

**1977-D Eisenhower Dollar, MS67  
Condition Census Rarity**

**5615 1977-D MS67 PCGS.** A rare Registry-grade 1977-D Eisenhower dollar, tied with just eight others as the finest at PCGS (6/16). This Superb Gem is sharply struck and satiny with beautifully preserved surfaces. Ice-blue and mint-green interiors cede to olive, amber, and yellow-gold rings around the borders. NGC ID# 258N, PCGS# 7424

**5616 1978 MS66+ PCGS.** 30th Anniversary Green Label Holder. Tan-brown, rose-red, and powder-blue patina graces this satiny and magnificently preserved final-year Ike dollar. The high points retain traces of the planchet surface, as made. NGC ID# 258P, PCGS# 7425

**5617 1978 MS66+ PCGS. CAC.** Green-gray, gold, and lilac hues merge over the obverse of this high-end Premium Gem 1978 Eisenhower dollar, while the reverse is deep gold in color. The strike is sharp, and there are no abrasions. A strong Registry coin. PCGS has Plus-graded only nine pieces in MS66, and there are seven Superb Gems finer (7/16). NGC ID# 258P, PCGS# 7425

## PROOF EISENHOWER DOLLARS

- 5618 1971-S Silver PR70 Deep Cameo PCGS.** The 40% silver composition was first used on circulating Kennedy half dollars from 1965-1970. The San Francisco Mint issued noncirculating Eisenhower dollars in this composition, in both proof and Uncirculated format, beginning in 1971. This coin is a technically perfect specimen, with sharply detailed frosty design elements and deeply reflective fields that produce a stunning cameo effect. Population: 65 in 70 Deep Cameo (6/16).  
Ex: Long Beach Signature (Heritage Auctions, 6/2013), lot 5205. NGC ID# 258S, PCGS# 97428 Base PCGS# 999138
- 5619 1971-S Silver PR70 Deep Cameo PCGS.** Type Two Reverse. A fully brilliant specimen with stark white-on-black contrast. A lens reveals no evidence of contact. The strike is intricate throughout. Population: 69 in 70 Deep Cameo, (7/16). NGC ID# 258S, PCGS# 97428 Base PCGS# 999138
- 5620 1971-S Silver, David Hall Signature, PR70 Deep Cameo PCGS.** One of only 21 1971-S Ike dollars in PR70 Deep Cameo David Hall Signature holders. Fewer than 100 pieces have achieved this grade at PCGS regardless of holder type (6/16). The strike is full, and the untuned surfaces offer perfect Deep Cameo contrast. PCGS# 571177 Base PCGS# 97428
- 5621 1971-S Silver, David Hall Signature, PR70 Deep Cameo PCGS.** This first-year-of-issue silver Ike is a remarkable and perfect Deep Cameo proof with brilliant, untuned surfaces. After eight years of production, Eisenhower dollars were replaced with the physically smaller diameter Susan B. Anthony dollars. Population: 21 in 70 Deep Cameo, (7/16). PCGS# 571177 Base PCGS# 97428

### 1973-S Silver Eisenhower Dollar PR70 Deep Cameo

- 5622 1973-S Silver PR70 Deep Cameo PCGS.** One of only 40 Deep Cameo 1973-S silver Ike dollars that have achieved the flawless PR70 grade at PCGS (6/16). This Registry-grade condition rarity displays brilliant, mint-fresh surfaces with frost-white devices and gleaming mirrors in the fields. A flawless proof type coin or date set candidate. NGC ID# 258U, PCGS# 97431 Base PCGS# 999138
- 5623 1974-S Silver, David Hall Signature, PR70 Deep Cameo PCGS.** This impeccable, perfect Deep Cameo proof silver Eisenhower dollar is brilliant and untuned with impressive black-and-white contrast. Population: in 70 Deep Cameo, (7/16). PCGS# 571174 Base PCGS# 97433
- 5624 1974-S Silver, David Hall Signature, PR70 Deep Cameo PCGS.** An extraordinary black-and-white Deep Cameo proof, this perfectly preserved Eisenhower dollar has outstanding contrast. A candidate for the Eisenhower dollar perfectionist. Population: in 70 Deep Cameo, (7/16). PCGS# 571174 Base PCGS# 97433

### 1976-S Silver Eisenhower Dollar PR70 Deep Cameo

- 5625 1976-S Silver, David Hall Signature, PR70 Deep Cameo PCGS.** PCGS has seen 45 1976-S silver Eisenhower dollars in PR70 Deep Cameo, of which only six are encapsulated in David Hall Signature holders (7/16). The present coin displays flawless preservation and stark, untuned field-device contrast. The eye appeal is outstanding. A Registry-grade condition rarity. PCGS# 570854 Base PCGS# 97436

## SUSAN B. ANTHONY DOLLARS

### 1979-P Susan B. Anthony Dollar, MS67 FS-301, Wide Rim

- 5626 1979-P Wide Rim, FS-301, MS67 PCGS.** This popular *Cherrypickers'* variety shows an unusually wide rim, with the date nearly touching it. Superb Gem examples are genuinely rare. This piece displays satiny luster with nickel-gray and champagne coloration. The strike is sharp, and there are no bothersome abrasions. Population: 15 in 67, 0 finer (6/16). NGC ID# 2593, PCGS# 145367 Base PCGS# 99571

### 1979-P Anthony Dollar, MS67 Scarce Wide Rim, FS-301

- 5627 1979-P Wide Rim, FS-301, MS67 PCGS.** Formerly known as the Near Date variety, the Wide Rim variety is scarce. Presumably, it was an introductory subtype promptly abandoned, similar to the 1864 Small Motto two cent piece. This lustrous and crisply struck Superb Gem exhibits attractive caramel-gold and steel-blue toning. Abrasions are absent, and the sole imperfections are a few pinpoint lavender flecks on the reverse. Population: 17 in 67 (1 in 67+), 0 finer (6/16). NGC ID# 2593, PCGS# 145367 Base PCGS# 99571

## MODERN ISSUES

### Complete 1995-1996 Olympic Set Housed in Mint-Issued Cherry Wood Box

**5628** **Uncertified 32-piece 1995 and 1996 Olympic Commemorative Set.** The set is housed in an impressive cherry wood box of mint issue, with one case each for the 1995 and 1996 issues. The certificate of authenticity is included. The set includes business strike and proof versions of the Basketball, Baseball, Swimming, and Soccer clad half dollars, the Gymnastics, Paralympics, Track and Field, Cycling, Tennis, Rowing, Blind Runner, and High Jump silver dollars, and the Torch Runner, Stadium, Flag Bearer, and Cauldron gold \$5 pieces. All coins are undisturbed and appear pristine. The Mint State gold \$5 pieces all have enticingly low mintages. (Total: 32 coins)

**5629** **2000-W Library of Congress Bimetallic Ten Dollar MS70 NGC.** A completely flawless example of this bimetallic issue. Just 7,261 pieces struck. A great coin for the Registry Set collector! NGC ID# 26U9, PCGS# 9784

## MODERN BULLION COINS

**5630** **1986 Quarter-Ounce Gold Eagle MS70 PCGS.** The American Gold Eagle was introduced in 1986, drawing widespread attention from collectors, investors, and the general public. This unimprovable MS70 quarter-ounce Gold Eagle enjoys lustrous, straw-gold surfaces devoid of any imperfections whatsoever. NGC ID# 26M2, PCGS# 9804

**5631** **1988 Silver Eagle MS70 NGC.** The third issue in the ever-popular American Silver Eagle series has a relatively small mintage of 5 million coins. Pristine MS70 representatives are very scarce and highly desirable. This is one such coin, fully brilliant without a mark of note. NGC ID# 26J8, PCGS# 9816

**5632** **1989 Silver Eagle MS70 NGC.** Silver Eagle output rose slightly to 5.2 million circulation strikes in 1989. Like its immediate predecessor, examples prove very scarce at the MS70 level. Softly lustrous surfaces are free from even the most trivial blemishes. Fully struck, as expected. NGC ID# 26JA, PCGS# 9826

**5633** **1989 Silver Eagle MS70 NGC.** Although production of one-ounce Silver Eagles was slightly larger than the previous year in 1989, examples in MS70 condition continue to be elusive. This technically perfect example exhibits fully struck design elements and vibrant mint luster throughout. NGC ID# 26JA, PCGS# 9826

### 1989 Half-Ounce Gold Eagle, MS70 Semikey in the Series

**5634** **1989 Half-Ounce Gold Eagle MS70 NGC.** This half-ounce American Gold Eagle has both one of the smallest mintages (44,798 circulation strikes) and MS70 populations in the series. NGC records 56 technically perfect submissions, while PCGS shows five examples in that ultimate grade (6/16). Each side of this Registry-quality offering exhibits medium yellow-gold color with shimmering luster. We expect strong bidding when this lot crosses the block. NGC ID# 26NA, PCGS# 9832

### 1991 Half-Ounce Gold Eagle, MS70 Seldom Encountered in This Ultimate Grade

**5635** **1991 Half-Ounce Gold Eagle MS70 PCGS.** A technically perfect half-ounce Gold Eagle, featuring Augustus Saint-Gaudens iconic design on the obverse. This magnificent specimen offers fully struck design elements throughout, with impeccably preserved yellow-gold surfaces that radiate vibrant mint luster from both sides. Population: 19 in 70 (7/16). NGC ID# 26NC, PCGS# 9852

### 1994 Half-Ounce Gold Eagle Flawless MS70

**5636** **1994 Half-Ounce Gold Eagle MS70 NGC.** A tiny fraction of the 62,400 half-ounce Gold Eagles put out by the Mint in 1994 have achieved a flawless technical assessment. Registry Set builders should therefore bid accordingly. The surfaces are perfectly smooth and softly frosted with delicate lemon-gold coloration. Eye appeal is excellent. NGC ID# 26NF, PCGS# 9882

**1995-W Silver Eagle, PR69 Deep Cameo  
Low-Mintage Key Issue**

- 5637** 1995-W Silver Eagle PR69 Deep Cameo PCGS. Only 30,125 1995-W Silver Eagle proofs were issued for the 10th Anniversary Sets. The low distribution may have been due to the government issue being a year early, as 1995 was technically the ninth anniversary of the series that began in 1986. This nearly perfect Superb Gem Deep Cameo proof has extraordinary contrast between the frosty devices and deep mirrored fields. Both sides are brilliant and untoned. NGC ID# CFWX, PCGS# 9887

**1995-W Silver Eagle, PR69 Deep Cameo  
Proof Series Key**

- 5638** 1995-W Silver Eagle PR69 Deep Cameo PCGS. An almost perfectly preserved, untoned, and eye-catching Deep Cameo example of this key Silver Eagle proof issue. The 1995-W had a limited 30,125-coin distribution, being sold only in special 10th anniversary bullion coin program proof sets. PCGS has seen few examples finer than the present piece. NGC ID# CFWX, PCGS# 9887

**1995-W Silver Eagle, PR69 Deep Cameo**

- 5639** 1995-W Silver Eagle PR69 Deep Cameo PCGS. The 1995-W is the undisputed key issue in the extremely popular American Silver Eagle series, with a mere 30,125 pieces struck. This PR69 Deep Cameo displays breathtaking white-on-black contrast. Whispers of barely discernible light tan color make occasional visits to virtually pristine surfaces.  
Ex: FUN Signature (Heritage, 1/2008), lot 5796. NGC ID# CFWX, PCGS# 9887

**1995 Half-Ounce Gold Eagle, MS70  
Few Seen in This Grade at PCGS**

- 5640** 1995 Half-Ounce Gold Eagle MS70 PCGS. Only 53,474 half-ounce Gold Eagles were struck in 1995, down considerably from the year before. This delightful specimen exhibits Augustus Saint-Gaudens famous design in full detail, with vibrant mint luster and technically perfect yellow-gold surfaces. Population: 8 in 70 (7/16). NGC ID# 26NG, PCGS# 9892

**1997 Half-Ounce Platinum Eagle, MS70  
Few Pieces Certified This Fine**

- 5641** 1997 Half-Ounce Platinum Eagle MS70 PCGS. The 1997 half-ounce Platinum Eagle issue had a small mintage of 20,500 coins and is uniquely popular as the first issue of the series. This example is flawlessly struck and perfectly preserved. PCGS has seen only nine other examples in this finest possible grade, and NGC contributes 36 submissions (7/16). NGC ID# 26TC, PCGS# 99752

- 5642** 1997-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC. The Mint distributed 20,851 one-ounce Platinum Eagle proofs in the series' introductory year. Not a hint of toning is present anywhere on this remarkably contrasted specimen. Dramatic eye appeal. Certified in a retro-style NGC 25th Anniversary black holder. NGC ID# 293M, PCGS# 9751

- 5643** 1997-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC. First-year American Platinum Eagles are always in demand, and there are generally enough to go around thanks to a mintage of 20,851 proofs. Flawless examples are scarce, though. Smooth, black-and-white surfaces are completely free of any flaws whatsoever. An eye-catching example. NGC ID# 293M, PCGS# 9751

- 5644** 1998 Quarter-Ounce Platinum Eagle MS70 PCGS. A technically perfect example of the quarter-ounce Platinum Eagle, with fully struck reflective design elements and frosty, flawless surfaces that show intense contrast and outstanding eye appeal. Population: 42 in 70 (6/16). NGC ID# 26SS, PCGS# 9766

- 5645** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS68 PCGS. In 1999, the West Point mintmark was reserved for proofs. Although gold eagle bullion coins of all denominations were struck at the facility in 1999, the Uncirculated finish ten-dollar gold eagles were supposed to be struck sans mintmark. Nonetheless, 1999-W Uncirculated five dollar and ten dollar gold eagles were struck, albeit in limited numbers. This is a high grade example with blushes of tan toning on the right obverse field. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

- 5646 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC.** A blunder at the West Point Mint led to the unauthorized appearance of the W mintmark on select bullion-finish quarter-ounce gold eagles during the Y2K frenzy of 1999. The mintage is unknown, but likely only a few thousand pieces. This lustrous butter-gold example is immaculate save for a minuscule tick on the central reverse. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

**2000 Tenth-Ounce Platinum Eagle, MS70  
Rare So Fine at PCGS**

- 5647 2000 Tenth-Ounce Platinum Eagle MS70 PCGS.** One of 14 tenth-ounce 2000 Platinum Eagles certified at PCGS in the perfect MS70 grade (7/16). This condition rarity boasts a full strike and flawless eye appeal. Struck in .9995 fine platinum. The 2000 issue had the smallest mintage up to that point of 34,027 pieces. Eye appeal is outstanding. NGC ID# 26S8, PCGS# 9779

- 5648 2003-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC.** The Mint marketed the 2003-W Platinum Eagle proof as the first time a bald eagle and American flag appeared on the same design. A total of 8,246 proofs were sold. Fully struck, thickly frosted motifs appear to float over deep, glassy mirrors. Certified in a retro-style NGC 25th Anniversary black holder. NGC ID# 26U7, PCGS# 921103

- 5649 2004-W One-Ounce American Platinum Eagle PR70 Ultra Cameo.** The 2004-W one-ounce American Platinum Eagle boasts a low mintage of 6,007 specimens. The reverse features a rendition of Daniel Chester French's sculpture "America" by Donna Weaver. Each side is completely brilliant with profound Ultra Cameo contrast. Certified in a retro-style NGC 25th Anniversary black holder. NGC ID# 293U, PCGS# 921107

- 5650 2005-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC.** This is one of the best-known and most sought-after dates among American Platinum Eagles with a small mintage of 6,602 proofs. Each side of this perfect PR70 Ultra Cameo representative offers dramatic contrast, deeply reflective fields, and thickly frosted, fully defined motifs. NGC ID# 293V, PCGS# 921111

- 5651 Four-Piece 2006-W Gold Eagle Set, Burnished, MS70 NGC.** Individually housed in identically graded holders with consecutive certification numbers. The lot includes the **tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50.** All examples are intricately impressed and as made. (Total: 4 coins) NGC ID# 2TTR, PCGS# 89992

- 5652 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 NGC.** Issued to commemorate the 20th anniversary of the American Eagle series, the 2006-W Reverse Proof made a big splash as the first coin struck in that finish at the Mint. Frosted fields and brilliant relief elements combine to produce bold contrast. Lemon-gold surfaces are mark-free. NGC ID# 28ZH, PCGS# 89994

- 5653 Three-Piece 2006-W One-Ounce Gold Eagle 20th Anniversary Set, First Strike, PCGS.** Separately housed in 20th Anniversary, First Strike PCGS holders. The lot includes: **Uncirculated finish MS70**, pristine and fully struck with extraordinary eye appeal; a **regular proof PR70 Deep Cameo**, radiant devices rise above immaculate mirrored fields; and a **reverse proof, PR70**, intricately impressed, a blush of orange toning near DOLLARS, the key to the set in the finest possible grade. Reverse proof issues are infrequent within the American Eagle series. (Total: 3 coins) NGC ID# 28ZH, PCGS# 89995 Base PCGS# 89994

- 5654 Four-Piece 2006-W Platinum Eagle Set MS70 NGC.** Individually housed in identically graded modern black holders with consecutive certification numbers. The set includes the **tenth-ounce \$10, quarter-eagle \$25, half-ounce \$50, and one-ounce \$100.** All examples are fully struck and flawless. (Total: 4 coins) NGC ID# BNKM, PCGS# 21128

- 5655 2007-W One-Ounce Gold Buffalo PR70 Deep Cameo PCGS.** A technically perfect example of this one-ounce gold bullion issue, with the First Strike designation from PCGS, this coin displays fully detailed frosty design elements that contrast profoundly with the textured mirrored fields. NGC ID# 26RP, PCGS# 149586

- 5656 Four-Piece 2008-W Gold Buffalo Set, First Strike, MS70 PCGS.** Each coin is individually housed in identically graded holders. The set includes the **tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50.** All four coins are as perfect as their grades. 2008 was the only year that four-piece sets were issued in burnished Uncirculated finish. Nonetheless, mintages were low, ranging from 9,074 pieces for the fifty dollar to 17,429 pieces for the five dollar. (Total: 4 coins) NGC ID# 26RS, PCGS# 400038

**Four-Coin 2008-W Gold Buffalo Set  
PR70 Deep Cameo, First Strike**

- 5657 Four-Piece 2008-W Gold Buffalo Set, First Strike, PR70 Deep Cameo PCGS.** The matched grade set includes the **tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50.** The coins are separately housed in First Strike holders. All four pieces are fully struck and pristine with luminous motifs and reflective textured fields. (Total: 4 coins) NGC ID# 26RE, PCGS# 393330

- 5658 Four-Piece 2008-W Gold Buffalo Set, First Strike, PR70 Deep Cameo PCGS.** The ideally and identically graded quartet includes the **2008-W tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50.** Each coin is pristine and precisely struck with cameo devices and brightly textured fields. Housed in separate holders. The sole year of fractional Buffalo gold issue. (Total: 4 coins) NGC ID# 26RE, PCGS# 393330

- 5659 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** A technically perfect example of this iconic bullion issue that shows Augustus Saint-Gaudens' classic design to great advantage. The design elements are fully struck and the impeccably preserved surfaces show intense prooflike reflectivity in the fields. NGC ID# 26S4, PCGS# 407404

- 5660 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, First Strike, David Hall Signature, MS70 PCGS.** A fully struck, flawlessly preserved example of this popular Ultra High Relief gold twenty dollar. The fields are reflective, and the eye appeal is outstanding. This issue sold out quickly at the Mint upon its release, and demand remains strong in the secondary market. PCGS# 596163 Base PCGS# 407404

**5661 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, Early Release, MS70 NGC.** This technically perfect specimen is struck on a 27 mm planchet with twice the thickness of a regular one-ounce Gold Eagle, reminiscent of the rare gold patterns for the double eagle (Judd-1917) in the National Numismatic Collection. Fully struck, with reflective, prooflike surfaces, NGC has certified this piece as an Early Release. NGC ID# 2TY2, PCGS# 407405

**5662 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** The MMIX Ultra High Relief double eagle ranks among the most popular modern issues in American numismatics, providing collectors with an opportunity to enjoy Saint-Gaudens' Striding Liberty design as he originally intended. This yellow-gold MS70 Prooflike coin is fully struck and unmarked. NGC ID# 26S4, PCGS# 506602

**5663 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC.** The 2009 Ultra High Relief twenty dollar gold coins were struck on double-thick 24-karat gold planchets. The issue ranks 16th on Schechter and Garrett's *100 Greatest U.S. Modern Coins*. The surfaces of this pristine coin feature deep yellow-gold color considerable reflectivity in the fields. NGC ID# 26S4, PCGS# 506602

**5664 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC.** Struck on a 27 mm planchet, with twice the thickness of a standard one-ounce American Gold Eagle, this issue was inspired by the extremely rare gold patterns, Judd-1917, in the Smithsonian Institution. This remarkable specimen offers fully struck design elements and technically perfect surfaces, with deeply reflective fields. NGC ID# 26S4, PCGS# 506602

**5665 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, Moy Signature MS70 Prooflike PCGS.** This technically flawless Ultra High Relief rendition of Augustus Saint-Gaudens' masterful double eagle design offers rich yellow-gold surfaces with a distinct Prooflike appearance that adds to the overall appeal. The PCGS insert is signed by the 38th Mint Director, Edmund C. Moy. PCGS# 525192 Base PCGS# 506602

#### 2011-W One-Ounce Gold Buffalo, PR70 First Strike, Deep Cameo Example

**5666 2011-W One-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** This one-ounce Gold American Buffalo has been certified as a First Strike by PCGS. The design elements are fully struck throughout, with a thick coat of mint frost that creates intense cameo contrast with the deeply reflective textured fields. A technically perfect example with terrific eye appeal. NGC ID# 26RY, PCGS# 506886

**5667 2013-W One-Ounce Gold Buffalo, Reverse Proof, Chicago ANA, PR70 PCGS.** Buffalo gold bullion coins were the first .9999 gold coins produced by the U.S. Mint. This Reverse Proof shows bright devices and matte-like fields. Both sides are completely flawless. NGC ID# 2W2C, PCGS# 520265 Base PCGS# 520050

**5668 2015-W High Relief One-Ounce Gold, First Strike, David Hall Signature, MS70 PCGS.** A perfectly preserved example of the first gold issue from the U.S. Mint with the \$100 denomination. This one-ounce high relief coin is struck in .9999 fine gold, just as the Golf Buffalos. NGC ID# 3NBM, PCGS# 594894 Base PCGS# 545532

**5669 2015-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC.** The Mint struck Platinum Eagles in proof format only in 2015, as it had done from 2009 to 2013. The design for the year is titled "Liberty Nurtures Freedom." Just 3,881 pieces were sold, making it the lowest proof mintage in the set. Each side is pristine with bold white-on-black contrast. Certified in a retro-style NGC 25th Anniversary black holder. PCGS# 592229

**5670 2015-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC.** The 2015-W one-ounce Platinum Eagle proof went on sale on December 3, 2015 and quickly sold out. A total of 3,881 coins were distributed, and examples immediately began trading for strong premiums as the lowest-mintage issue in the series. This technically unimprovable proof has stark field-device contrast and great visual quality. PCGS# 592229

#### 2015-W One-Ounce Platinum Eagle PR70 Deep Cameo

**5671 2015-W One-Ounce Platinum Eagle, David Hall Signature, PR70 Deep Cameo PCGS.** The 2015-W one-ounce Platinum Eagle proof had a small mintage of 3,881 pieces, of which only 14 are designated PR70 Deep Cameo in David Hall Signature First Strike holders (7/16). This example is fully struck and flawlessly preserved with stark field-device contrast. A rarity among modern bullion issues. PCGS# 598683 Base PCGS# 592229

#### COINS OF HAWAII

**5672 1847 Hawaii Cent MS62 Brown PCGS. CAC. M. 2CC-6.** Plain 4, 7x8 berries. Although the reverse die is shared with the common Medcalf 2CC-2, that is a Crosslet 4 variety. Its Plain 4 counterpart, M. 2CC-6, is regarded as the rarest Hawaiian cent marriage. A satiny and lightly abraded chocolate-brown example. The obverse rim has a series of minor die breaks or "cuds" near 9 o'clock. Listed on page 420 of the 2017 *Guide Book*. NGC ID# 2C52, PCGS# 10965

**5673 1847 Hawaii Cent MS63 Brown PCGS. CAC. M. 2CC-2.** Crosslet 4, 7x8 berries. A lustrous and well struck example with ocean-blue centers and golden-brown borders. Contact is confined to minor abrasions on the left obverse field. Listed on page 420 of the 2017 *Guide Book*. *From The Collection of Richard W. DeRobertis.* NGC ID# 2C52, PCGS# 10965

**1883 Hawaiian Dime, MS66  
Highly Collectible, Few in This Grade**

- 5674 1883 Hawaii Ten Cents MS66 PCGS. CAC.** Hawaii's second elected ruler, King David Kalakaua came to the throne in 1874 after the premature death of King William Lunalilo. Kalakaua is responsible for revitalizing Hawaiian culture, suppressed for decades by Christian missionaries, for building Iolani Palace, and, in an effort to promote his kingdom in America, Europe, and the Far East, became the first monarch to circumnavigate the globe. His many accomplishments were countered, however, by at least as many missteps. While not seen as a mistake by the thousands of collectors of Hawaiian coins today, overzealous production of silver coins in 1883 was a disaster for the already depleted Hawaiian treasury. Palaces, coronations, royal yachts, and lavish parties didn't come cheap in the 1880s and had already threatened to bankrupt the island nation. The Hawaiian dime is second in rarity only to the Hawaiian dollar among the regular 1883 issues. The typical survivor is well worn and often cleaned. Only occasionally is an attractive Mint State coin located and true Gems are of the utmost rarity. This example representative boasts shimmering, unmarked surfaces that are lightly framed in golden toning, with a touch of blue-green color also noted about the reverse periphery. Population: 13 in 66, 2 finer. CAC: 6 in 66, 2 finer (6/16).  
Ex: *FUN Signature* (Heritage, 1/2007), lot 1160. NGC ID# 2C54, PCGS# 10979

- 5675 1883 Hawaii Quarter MS66 NGC.** A boldly struck Premium Gem, this 1883 Hawaii quarter has faintly reflective fields beneath lovely blue and iridescent toning. NGC has only certified seven finer examples of this variety (7/16). NGC ID# 2C5B, PCGS# 10987

- 5676 1883 Hawaii Quarter MS66 PCGS.** An extraordinary 1883 Hawaiian quarter, this piece exhibits bold hair and beard details along with sharp crown and shield details on the reverse. The frosty surfaces are predominately ivory with splendid peripheral gold and iridescent toning. PCGS has only certified 19 finer examples (7/16). NGC ID# 2C5B, PCGS# 10987

**1883 Hawaiian Quarter, MS67  
Exceptional Overall Quality**

- 5677 1883 Hawaii Quarter MS67 PCGS. CAC.** Pale cherry-red peripheries cede to faintly toned centers. This fully struck Superb Gem has an essentially pristine reverse, and the obverse is virtually as smooth since only the cheekbone and right obverse field show insignificant grazes. HAWAII and the King's mustache exhibit minute die doubling. The mintage of 500,000 pieces appears generous, but much of the production was melted after Hawaii became a U.S. Territory. The hapaha denomination has survived in Uncirculated grades in greater quantity than either the hapalua or akahai dala, but Superb Gems are undeniably rare. Population: 18 in 67 (2 in 67+), 0 finer. CAC: 16 in 67, 1 finer (6/16).  
Ex: *National Money Auction* (Heritage, 3/2007), lot 1563. NGC ID# 2C5B, PCGS# 10987

- 5678 1883 Hawaii Half Dollar MS64 PCGS. CAC.** Light- to medium-gray lustrous surfaces exhibit well-struck design features. Both sides are devoid of significant marks. After Hawaii became a U.S. territory in 1900, the legal tender status of the Hawaii coins was removed and most were withdrawn and melted. NGC ID# 2C5B, PCGS# 10991

**1883 Hawaii Dollar, MS62  
Uniformly Toned**

- 5679 1883 Hawaii Dollar MS62 PCGS.** The 1883 Hawaii silver dollar is elusive in Mint State. The present example is quite appealing for the grade, showing minimal abrasions. The surfaces are satiny, and each side exhibits pleasing lavender-gray toning. The strike is sharp throughout. Population: 21 in 62, 63 finer (7/16). NGC ID# 2TGD, PCGS# 10995

(1871) Wailuku Plantation Token 6 1/4 Cent, XF40  
Elusive Hawaiian Issue, M. 2TE-4

- 5680** (1871) Wailuku Plantation 6 1/4 Cent, Narrow Starfish, XF40 PCGS. M. 2TE-4. The Wailuku tokens of 1871 were struck in the plantation's blacksmith shop and circulated as money throughout the islands, although they were never legal tender. All the Wailuku Plantation tokens are scarce and collectors prize examples in all grades. This attractive XF specimen is well-centered and well-struck, with lightly abraded mahogany brown surfaces. Population: 3 in 40, 3 finer (6/16). NGC ID# 2UBM, PCGS# 600506

1879 Hawaii Railroad Token  
Thomas H. Hobron, 12 1/2 Cent  
Two Stars on Each Side, M. 2TE-9

- 5681** 1879 Thomas H. Hobron 12 1/2 Cent Token, Two Stars on Both Sides, XF40 PCGS. Medcalf 2TE-9. The design is similar to the less rare Medcalf 2TE-8 railroad token, but both sides show only two stars, and the denomination side has only three periods instead of six. An evenly struck chocolate-brown example. Relatively unabraded, and flan granularity is confined to the date side at 2 and 4 o'clock. Listed on page 421 of the 2017 *Guide Book*. PCGS# 503522

1891 Kahului Railroad 25 Cent Token  
Medcalf TL-12, XF40  
Rare Hawaii Merchant

- 5682** 1891 Hawaii Kahului Railroad Token, 25 Cents, XF40 NGC. M. TL-12. The Kahului railroad tokens are much rarer than their 1879 Thomas Hobron predecessors. Examples were struck in several denominations, 10 cents to 75 cents, but examples seldom surface. MAUI is spelled MAUL, a blunder also seen on the other Kahului varieties. This is a lightly oxidized and unmarked gunmetal-gray representative. Listed on page 421 of the 2017 *Guide Book*. PCGS# 600536

## PHILLIPINES

1906 U.S. Philippines Peso, PR66  
Series Rarity

- 5683** 1906 Philippines Peso, U.S. Administration, KM-168, PR66 PCGS. The 1906 is one of the important dates in the U.S. Philippines series with a total production of just 500 proofs in Philadelphia, where circulation strike pesos were only coined in 1903 and 1904. Proof production continued in small quantities through 1908. This Premium Gem has lovely dappled gold and blue toning over reflective ivory surfaces, featuring a bold strike and exceptional eye appeal. Population: 8 in 66, 15 finer (7/16). NGC ID# 2CAL, PCGS# 90405

1912-S U.S. Philippines Peso, MS61  
Final U.S. Administration Issue

- 5684** 1912-S Philippines Peso, U.S. Administration, KM-172, MS61 PCGS. Just 680,000 pesos were coined at San Francisco for circulation in the Philippines, and that is the second lowest production at that mint. This important Mint State example is one of only a few such pieces that PCGS has certified. The obverse has a sharp strike with light champagne toning, and the reverse is similarly sharp with champagne and golden-brown toning. Population: 2 in 61, 8 finer (7/16). NGC ID# 2CAV, PCGS# 90398

## GSA DOLLARS

1880-CC GSA Dollar, MS65 Prooflike  
8 Over High 7, VAM-5, Top 100

- 5685** 1880-CC 8 Over High 7, VAM-5, GSA, MS65 Prooflike NGC. CAC. A Top 100 Variety. The popular and distinctive Carson City variety that shows much of the underdigit 7, including the crossbar, ears, check, stem, and downstroke. Lustrous and well struck with a blush of golden-brown toning along the upper reverse border. No box or certificate accompanies. PCGS# 518855 Base PCGS# 7103

**5686 1881-CC GSA MS66 NGC.** Among Carson City Morgan emissions, only the 1885-CC has a lower production. The present highly lustrous Premium Gem displays delicate straw-gold toning and a bold strike. The exemplary surfaces provide immense eye appeal. The box and certificate of GSA issue accompany the lot. NGC ID# 2547, PCGS# 518863 Base PCGS# 407126

---

**1881-CC GSA Dollar, MS66+**

**5687 1881-CC GSA MS66+ PCGS. CAC. VAM-2.** Booming cartwheel luster illuminates this minimally toned and remarkably preserved Carson City GSA dollar. The strike is precise and the eye appeal is outstanding. VAM-2 exhibits die fill in the upper loops of the 8s. No box or certificate is included. Population: 25 in 66 (9 in 66+), 1 finer (7/16). NGC ID# 2547, PCGS# 518863 Base PCGS# 407126

**5688 1882-CC GSA MS66 PCGS.** A thoroughly lustrous, practically brilliant, and sharply struck Carson City type coin. Marks are confined to minor field grazes near the arrowheads. Many 1882-CC dollars appeared in the GSA auctions, but comparatively few are as nice as the present lot. NGC ID# 254H, PCGS# 518866 Base PCGS# 407134

---

**1882-CC GSA Dollar, MS66+**

**5689 1882-CC GSA MS66+ PCGS. CAC. VAM-3D.** A lovely high-grade silver dollar with delicate gold toning and dynamic cartwheel sheen. VAMworld.com describes VAM-3D as a "very late die state with crack continuing from Phrygian cap through wheat leaves to field in front of LIBERTY where there is a displaced field break in front of the LIBERTY band." No box or certificate is included. Population: 32 in 66 (9 in 66+), 3 finer (7/16). NGC ID# 254H, PCGS# 518866 Base PCGS# 407134

---

**1882-CC GSA Dollar, MS66+**

**5690 1882-CC GSA MS66+ PCGS. CAC.** This well struck and virtually brilliant high-grade Carson City dollar has potent luster and uncommonly smooth fields. No box and certificate accompany. Although the 1882-CC is often regarded as a GSA "common date", more than twice as many 1884-CC dollars were encased by the GSA in black holders. Population: 32 in 66 (9 in 66+), 3 finer (7/16). NGC ID# 254H, PCGS# 518866 Base PCGS# 407134

**5691 1883-CC GSA MS66+ PCGS. CAC. VAM-5A.** Light caramel-gold patina adorns this lustrous and precisely struck Premium Gem. Smooth fields and a virtually pristine cheek ensure imposing eye appeal. The 1883-CC is available in GSA format, but is rarely found in such exquisite preservation. No certificate or box is included. Population: 42 in 66 (16 in 66+), 1 finer (7/16). NGC ID# 254H, PCGS# 518869 Base PCGS# 407144

**5692 1885-CC GSA MS65 NGC. VAM-3.** A beautiful arc of apple-green, sun-gold, and russet toning adorns the left obverse. The reverse shows only a blush of caramel toning near the UN in UNITED. Well struck and lustrous with scattered minor contact. No box or certificate is included. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

---

**1885-CC GSA Dollar, MS66+  
Low Mintage, Rare Any Finer**

**5693 1885-CC GSA MS66+ PCGS. CAC. VAM-3.** An essentially brilliant Premium Gem of this popular and low mintage Carson City dollar. Lustrous and boldly struck with smooth fields and only wispy facial contact. VAM-3 is identified by die scratches near Liberty's eye. No box or certificate is included. Population: 28 in 66 (8 in 66+), 0 finer (7/16). NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

## ERRORS

1908 Indian Cent, XF40  
Double Struck, Second Strike  
15% Off-Center with a 25% Indent

- 5694** 1908 Indian Cent — Double Struck, Second Strike 15% Off-Center, 25% Indent at 12:00 — XF40 PCGS. The first strike was normal, but the coin was struck a second time, 15% off center toward 12 o'clock, at 12 o'clock relative to the first strike. For the second strike, a newly fed planchet was also in the die chamber and created a 25% obverse indent at 12 o'clock. A chocolate-brown mint error with two dates and no apparent abrasions. The base of the 1 in the date is repunched.

1860 Indian Cent, AU58  
Flipover Double Struck

- 5695** 1860 Rounded Bust Indian Cent — Flipover Double Struck in Collar — AU58 PCGS. The cent was struck normally, then flipped over and was struck a second time. No planchet was fed in for the second strike. The second strike was not off center, although the collar die may have been blocked from rising due to the coin's increased diameter after the first strike. The tops of TES OF from the first strike are apparent on the reverse at 7:30 and 10:30. Other traces from the first impression are evident but less recognizable.

1864 Copper-Nickel Indian Cent, MS64  
Uncentered Broadstrike, Retained Cud

- 5696** 1864 Copper-Nickel Indian Cent — Uncentered Broadstrike, Retained Cud — MS64 PCGS. This Indian cent gives the cursory appearance of an off-center strike toward 1 o'clock. Since all, or practically all, of the design on both sides is intact, PCGS has deemed the coin an uncentered broadstrike. It shows a broad area of unstruck surface widest at 7 o'clock. The dentils, where present, are stretched due to collar-unrestrained metal flow. The cud (unrelated to the broadstrike, and a Snow-unlisted variety) is fairly large, and located at 5 o'clock on the reverse. A heavy crack is also present across the bottom of the wreath and the middle arrow.

1865 Indian Cent, Double Struck, AU50  
Second Strike 85% Off Center

- 5697** 1865 Fancy 5 Indian Cent — Double Struck, Second Strike 85% Off Center — AU50 PCGS. The second strike is widely off center toward 1 o'clock, at 11 o'clock relative to the first strike. The first strike was normal. Orange-red with brown high points and a couple of minor retained laminations on the upper reverse. Ex: FUN Signature (Heritage, 1/2008), lot 2503, which realized \$1,495.

Double Struck 1904 Indian Cent, AU58  
Second Strike 65% Off Center, Partial Brockage

- 5698** 1904 Indian Cent — Double Struck, Second Strike 65% Off Center with Brockage — AU58 PCGS. The first strike was normal, but the coin failed to fully eject from the dies, and was struck a second time, 65% off center toward 12 o'clock, at 10:30 relative to the first strike. Between strikes, a previously struck cent (unlikely as it may seem) was fed into the die chamber instead of a planchet, between the obverse die and the present coin, and created a brockage on the upper third of the partially present obverse from the second strike. The brockage shows dentils and the upper half of the letters TI, a reversed and incused impression from UNITED on the previously struck cent (not included).

**20-Piece Group of Experimental Cent Planchets,  
Cent Planchets, and Cents  
All From the Year 1943**

- 5699** 20-Piece Lot of (1943) Experimental Cent Planchets, Cent Planchets, and Cents NGC. Ex: Philadelphia Collection. All 20 pieces are separately housed in NGC holders. One of the coins is a 1943 cent — Struck on an Experimental Zinc-coated Antimony and Steel Planchet — MS63 NGC, 2.7 gm, similar to Judd-2085 although no Judd designation is on the NGC holder. Three of the pieces are ungraded copper-plated steel blanks, 2.8 gm, from January 1943. Nine pieces are as follows: (1) Type One Blank, First Test Run, 2.7 gm; (3) Type One Blank, Feb. 1943, 2.6 gm; (1) Type One Blank, Feb. 1943, 2.7 gm; (1) Type One Blank, 2.7 gm; (1) Zinc-Plated Steel Type One Blank, 2.5 gm; (1) Zinc-Coated Steel Planchet, 2.8 gm; (1) Planchet, 2.7 gm. Additionally, the lot includes seven normal 1943-dated cents: (1) 1943 MS61; (2) 1943 MS62; (2) 1943 MS63; 1943-D MS66; and a 1943-S MS63. (Total: 20 coins) NGC ID# 22E4, PCGS# 2711

**1964 Lincoln Cent, MS65 Red and Brown  
Triple Struck, Obverse Die Cap**

- 5700** 1964 Lincoln Cent — Triple Struck, Obverse Die Cap — MS65 Red and Brown NGC. This triple-struck cent widely rotated between strikes. The second and third strikes overlapped a majority of the first strike, but the top of Lincoln's head is apparent, as is the lower right corner of the Lincoln Memorial and several letters in the reverse legend. The third strike obliterated the right half of the second strike, but portions of Lincoln's head, LIBERTY, and IN GOD WE TRUST are present. The third strike shows a complete obverse design, but the reverse is a jumble of blurry design elements, since the reverse die was blocked by newly fed planchets or portions of previously struck coins.

**25 Bonded Copper Cent Planchets  
Forced Together in a Dime Feeder Chute**

- 5701** 25 Bonded Copper Cent Planchets Uncertified. The group of 25 copper cent planchets became jammed together in a feeder chute. The force behind the planchets was sufficiently great to curve the planchets, and fuse them together at 12 and 6 o'clock, creating a single copper entity with flat upper and lower shelves. The feeder chute was probably made for dimes, which have a slightly smaller diameter than cents. According to mint error authority Fred Weinberg, this is the only error of its kind to have made it out of the U.S. Mint. (Total: 25 pieces)

**1982 Large Date Cent, MS64 Red  
Two-Piece Bonded Die Cap**

- 5702 1982 Zinc, Large Date Lincoln Cent — Two-Piece Bonded Die Cap — MS64 Red PCGS.** 6.2 gm. A bonded die cap with a steep thimble-like rim. Close inspection shows a double rim, one inside the other. There are two cents in the holder: an obverse die cap housed inside a reverse die cap, with the reverse of the obverse cap fused (from the strike) to the obverse of the reverse cap. Both the exterior obverse and reverse designs are well struck, and the reverse border exhibits zinc residue forced out from the interior of the coin by the strike. A test mark is noted on the field near Lincoln's profile. Housed in an extra large and thick PCGS holder.

**1999 Lincoln Cents  
Bonded Obverse Die Cap**

- 5703 1999 Lincoln Cent Bonded Obverse Die Cap.** The lot includes a 1999 Lincoln Cent — Nine-Planchet Bonded Obverse Die Cap — MS67 NGC, 22.5 gm, a cent stuck to the obverse die, and remained there for a series of additional strikes against newly fed planchets, several of which adhered to the obverse die cap, creating a broad, multi-layer cent, housed in a 5 cm cube-shaped plastic holder; and a 1999 Lincoln Cent — Double Struck, Second Strike 60% Off-Center, Second Strike Uniface Reverse — MS64 Red PCGS, the first strike was normal, the second strike was 60% off center at 7 o'clock relative to the first strike, the second strike was between the obverse die and a newly fed planchet. The MS64 Red PCGS cent in the present lot was formerly part of the bonded obverse die cap. (Total: 2 pieces)

**Rotated Double Struck 1924 Nickel  
Fine Sharpness**

- 5704 1924 Buffalo Nickel — Double Struck, Rotated in Collar, Scratches — NGC Details. Fine.** This Buffalo nickel rotated perhaps 10 degrees clockwise within the collar between strikes, distorting the face of the Indian and creating two sets of E PLURIBUS UNUM. The obverse has a horizontal pinscratch made by a perplexed finder long ago.  
*Ex: Philadelphia Signature (Heritage, 8/2012), lot 4326, which realized \$3,671.88.*

**1980-P Nickel, MS64 Red and Brown  
30% Off-Center on a Cent Planchet**

- 5705 1980-P Jefferson Nickel — Struck 30% Off-Center on a Cent Planchet — MS64 Red and Brown PCGS.** Widely off center toward 10:30, with most of IN GOD WE TRUST, LIBERTY, and the country name absent. The date and mintmark are fully present. This wrong planchet mint error is mostly orange-gold but displays lilac-red on Jefferson's collar.

**Delaware Statehood Quarter, MS62  
Multiple Struck on a Feeder Finger Fragment**

- 5706 1999-? Delaware Quarter — Multi-Struck On a Feeder Finger Fragment — MS62 NGC.** A fragment of a feeder finger, used to deliver planchets between dies, was struck at least three times between Delaware statehood quarter dies. The obverse shows two Washington portraits, and the reverse exhibits two horses. A third strike is apparent on the upper obverse, where portions of IN GOD WE TRUST are visible. The gunmetal-gray surfaces are minutely granular and display moderate edge splits.

**1978 Ike Dollar, MS63  
Struck on a 22% Defective Strip**

- 5707 1978 Eisenhower Dollar — Struck on a 22% Defective Planchet, Improperly Bonded Strip — MS63 PCGS.** The coinage strip, used to punch out blanks, was defective. The outer clad layer was partial due to improper bonding between the inner pure copper layer and the outer copper-nickel layer. The present coin began its life as a blank punched from that strip, with a vertical depression on one side where the outer layer was absent. It passed through the upset mill, then was struck with the flan defect facing the obverse die. The strike is soft on the obverse where the strip was defective, and on opposing portions of the reverse, due to incomplete metal flow into design recesses. The obverse has coppery-red color from the copper core. The reverse has the usual cream-gray color of a clad dollar. The date is mostly absent but the 8 is visible. The reverse exhibits a few thin test marks made by a curious finder.

**1979-P Susan B. Anthony Dollar, MS65 Red  
Struck on a Cent Planchet**

- 5708** 1979-P Anthony Dollar — Struck on a Cent Planchet — MS65 Red PCGS. A lustrous orange-red Gem with glimpses of rose and cobalt-blue on the reverse. The date and mintmark are off the flan. The reverse suggests this is a 1999 dollar, since the 1979 to 1981 Anthony dollars preceded the copper-plated zinc alloy, and there are traces of zinc in the feathers of the eagle. Dramatic off metal Anthony dollar errors remain highly popular.  
Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 2662, which realized \$5,750.

**Undated Anthony Dollar, MS67  
100% Obverse Indent**

**Struck Between the Reverse Die and a Planchet**

- 5709** Undated Anthony Dollar — Reverse Half of Two Planchets Struck Together — MS67 NGC. This mishap at the Mint began with a pair of Anthony dollar planchets fed together between a pair of dies, one planchet centered directly above the other. The present piece was the bottom planchet, struck between the reverse die and the upper planchet. Viewed from the reverse, the coin has a normal appearance, but the reeded edge includes a steep knife rim of irregular height above the obverse, which shows only a ghostly indication of the Susan B. Anthony portrait.

**2000-P Sacagawea Dollar, AU58  
Struck on an Anthony Dollar Planchet**

- 5710** 2000-P Sacagawea Dollar — Struck on an Anthony Dollar Planchet — AU58 PCGS. This transitional off metal error presumably occurred late in 1999, when the Philadelphia Mint was striking clad Anthony dollars for immediate needs of commerce and stockpiling manganese alloy Sacagawea dollars for their much-promoted early 2000 release. Lustrous and untoned with only a hint of wear on the cheekbone. A few ticks are near the LI in LIBERTY.  
Ex: Long Beach Signature (Heritage, 6/2013), lot 4691, which realized \$9,106.25.

**Undated “Silver” Eagle, MS63  
Struck on an Emery Disc**

- 5711** Undated Silver Eagle — Struck on a 3M Emery Disc — MS63 PCGS. Although the legends of this piece state it is “1 OZ. FINE SILVER,” this coin contains no silver at all, since it was struck on a wafer-thin emery disc. An emery disc is thin, round, granular, and adhesive-backed. It is typically affixed to a buffing wheel, and was presumably used at the Mint to help prepare dies. Somehow, an emery disc with an unpeeled backing covered a silver eagle planchet at the moment of strike. The silver planchet (not included) blocked the obverse die, so the front of this gray-brown piece has a reverse die impression, while the other side shows an incused and reversed impression of the reverse, along with previous printing on the backing.

**1987 “Silver” Eagle, MS63  
Struck on a 3M Emery Disc**

- 5712** 1987 Silver Eagle — Struck on a 3M Emery Disc — MS63 PCGS. Lot 7670 in our January 2007 FUN Signature was a silver eagle whose obverse was struck through an unpeeled emery disc. The present lot presents the other half of that situation, an emery disc struck between the obverse die and a silver eagle planchet. The emery disc overlapped one side of a silver eagle planchet before the strike, and the two were fed together for the strike. The emery disc separated from the coin after the strike. The obverse shows the dark gray color and granular texture of the emery disc, but all major design details are evident, including the date. The finely-grained tan-brown reverse shows only a faint incused and reversed impression of the obverse, as struck through the disc, along with a couple of letters and numbers as printed on the emery disc prior to the strike.

## CIVIL WAR PATRIOTIC

Undated Union Forever Civil War Token, MS64 Brown  
Extremely Rare Fuld 241A/417Aa in Copper

**5713** Undated Union Forever Civil War Token, Fuld-241A/417Aa, R.10, MS64 Brown NGC. Ex: Rev. Dr. James G.K. McClure Collection. Prior to the appearance of the McClure Collection, just two examples of this die combination were known. One is a copper overstrike that the cataloger understands to carry a high circulated grade of about Extremely Fine. The other is a lead example that is heavily corroded.

Two additional examples of the die pair appeared in the McClure Collection. This piece is a copper example that is not overstruck, and the other example is brass. Accordingly, each of the individual pieces carries the R.10 rating as each is unique. The die pair remains R.9, defined as two to five known.

This copper example is clearly the finest of those four known examples, retaining traces of original orange mint color over the lustrous olive-brown obverse. The similar olive-brown reverse has wispy blue overtones. Slight peripheral and central weakness is evident due to the rather thin planchet. An extraordinary opportunity for the specialist.

## WESTERN SOUVENIR GOLD

**5714** 1910 Alaska Gold Two TooWah, Nathaniel Joseph Original, MS62 NGC. 1.28 gm. Seven Stars Reverse. Although the gilt Tatham restrikes of the Five Stars Reverse variety show up regularly, original Seven Stars Reverse examples are rare. This prooflike apricot-gold representative is evenly struck and devoid of detractors. The fields exhibit myriad die lines, as made.

## 20TH CENTURY MEDAL

1963 Nobel Committee Medal, MS62  
Gold Medallion for Physics

**5715** 1963 Nobel Committee 23K Gold Medal, MS62 NGC. 27 mm. 20 grams. The five members of the Nobel committees are tasked with the identification of a worthy laureate for the Nobel Prize in the various classes. With just five committee members, these medals were struck in minuscule quantities and are extremely rare today. Issued to committee members for Physics, this medal exhibits scattered contact marks on its brilliant and lustrous light yellow surfaces. Nobel's portrait on the obverse, and the arms of the Academy of Sciences on the reverse are bold well-struck.

Atomic particle theory was the subject matter of the 1963 Nobel laureates in Physics, with three winners. Eugene Paul Wigner earner half of the award for "contributions to the theory of the atomic nucleus and the elementary particles." Maria Goeppert Mayer and J. Hans D. Jensen each received a quarter share for their "discoveries concerning nuclear shell structure."

## INGOTS

San Francisco Mint 6.24-Ounce Silver Ingot  
Type One Oval Hallmark, Large Font, Straight Stem 9s

**5716** San Francisco Mint Type One Oval Hallmark Silver Ingot. 6.24 Ounces. According to ingot collector and authority Ken Conaway, The Type One oval hallmark, large font with straight stem 9's in 999.5 fineness is one of the earliest ingots produced at the Mint Of The United States At San Francisco, predated only by only one series. The first series dates to the early to mid-1930s, so this ingot dates from the mid- to late-1930s.

As with most San Francisco Mint ingots, the obverse is irregular and does not provide a smooth surface for the hallmark strike. Additionally, the Type One oval hallmark die is almost as wide as the ingot casting; on ingot #1698, the hallmark has been slightly rotated to achieve better fit and strike. The eagle vignette is well-struck while the hallmark oval is sharpest on the bottom half.

Ingot #1698 fits early into the known numerical range of these ingots, from the #1600s to #1900s and as with most in this series, is marked on the leading edge with the lot number 6.

The ingot is laid out in typical fashion for this series with the logo at the top / 1698 / 999.5 / FINE. The surfaces are generally bright overall with reddish patina within the recesses of the devices.

---

San Francisco Mint Silver Ingot, 5.14 Ounces  
Type One Oval Hallmark, Overpunched Logo  
Mid-1930s Production

**5717 San Francisco Mint Type One Oval Hallmark Silver Ingot. 5.14 Ounces.** According to ingot collector and authority Ken Conaway, The Type One oval hallmark, large font with curved stem 9s in 999.75 fineness, are the earliest ingots produced at the Mint Of The United States At San Francisco, dating to the early to mid-1930s.

Ingot #265 displays a well-struck eagle vignette and hallmark, something not always seen on San Francisco Mint silver ingots. The very interesting secondary number on the obverse, #195, appears on only a handful of ingots in this series in the numerical range of #216 to #265. According to Ken, he only has recorded four such examples. In this very first series, known ingots range from #77 to #1812, making this one of the oldest San Francisco Mint silver ingots in existence.

The ingot is laid out in typical fashion for this series with the logo at the top / 265 / 999.75 / FINE with an overstrike of 195 on the hallmark. The surfaces are uniformly bright with no hint of toning on any of the sides.

---

---

San Francisco Mint Gold Ingot, 6.945 Ounces  
Type One Vertical Layout (1946-1950)

**5718 San Francisco Mint Type One Vertical Gold Ingot. 6.945 Ounces.** Gold ingots are of the greatest rarity to collectors in this field. A hundred silver ingots are seen for every one gold ingot (that is a guess, and it's probably too conservative). Silver ingot expert, Ken Conaway, had no real expertise in this area and referred us to an excellent website that deals with gold ingots: [www.goldbarsworldwide.com](http://www.goldbarsworldwide.com). Gold ingots were mostly made in 400-ounce bars (two versions). Those are the bars used in international trade and in storage at Fort Knox. However, ingots have also been produced in eight other versions: 250 ounce, 50 ounce, 30 ounce, 25 ounce, 20 ounce, 15 ounce, 10 ounce, and five ounce.

In many ways the layout of this gold ingot is similar to a silver one, but with a couple of interesting differences. The hallmark of the San Francisco Mint is the same and has been found on pieces produced between 1946 and 1950. The bar number is five digits, rather than four as one would expect. A preceding 9 is lightly impressed and partly overlaps the second digit, thus the bar number is 93035. The fineness is 996.7. The melt number is located on the short bottom side and reads 7589 with the first three digits cramped, another mysterious punch or partial broken punch is located at the top and between the 8 and 9.

- 8985** 1925 Vancouver Commemorative Silver — Partial Collar Strike — AU58 PCGS.

## SO-CALLED DOLLAR

- 8986** 1902 Wells Fargo & Company Semicentennial MS63 NGC. HK-296. Silver, R.5. The original box accompanies the lot.

## EARLY AMERICAN TOKENS

- 8987** (1829-1830) W.H. Schoonmaker, New York, NY, AU58 NGC. Rulau-E-NY-782A. Silvered brass, R.5.
- 8988** 1823 C. & I.D. Wolfe, New York, NY, MS61 NGC. Rulau-E-NY-957A. Silvered brass, reeded edge, R.4.

## HARD TIMES TOKENS

- 8989** 1838 Am I Not a Woman & a Sister AU55 NGC. Low-54, DeWitt-CE-1838-19, HT-81. Copper, R.1.
- 8990** 1837 Feuchtwanger Cent MS64 PCGS. CAC. Low-120, HT-268, Breen 6-G, R.1.

## WESTERN SOUVENIR GOLD

- 8991** 1901 Alaska 1/4 Pinch, Round, MS63 NGC. Hart's Coins of the West.
- 8992** 1902 Alaska Gold 1/4 Pinch, Octagonal, MS60 NGC. Hart's Coins of the West.

## HOBO NICKELS

- 8993** An Interesting Group of 17 Hobo Nickels. Nine of the nickels appear to be the work of John Dorusa, a well-known modern-era carver whose characteristic "J.D." signature appears on the work. Two other pieces are the work of Douglass Tirrell dated 8/23/84, done at "Engraving Class Providence, R.I." The remaining six nickels are by unidentified artists, but most appear to be from an earlier era and some are very likely original carvings from the classic period. In-person inspection, if possible, is recommended. A total of 17 nickels in this lot.

*End of Auction*

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
  - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
  - Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots (the Buyer's Premium is 19.5% for auctions in Hong Kong), and except for Gallery Auction lots as noted below;
  - Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
  - Twenty-two percent (22%) on Wine Auction lots;
  - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$200,000, plus twenty percent (20%) of any amount between \$200,000 and \$2,000,000, plus twelve percent (12%) of any amount over \$2,000,000.
- Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature\* Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s)”).
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments  
(see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://HA.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid .....	Bid Increment	Current Bid .....	Bid Increment
< \$10.....	\$1	\$10,000 - \$19,999 .....	\$1,000
\$10 - \$49 .....	\$2	\$20,000 - \$49,999 .....	\$2,000
\$50 - \$99 .....	\$5	\$50,000 - \$99,999 .....	\$5,000
\$100 - \$199 .....	\$10	\$100,000 - \$199,999 .....	\$10,000
\$200 - \$499 .....	\$20	\$200,000 - \$499,999 .....	\$20,000
\$500 - \$999 .....	\$50	\$500,000 - \$999,999 .....	\$50,000
\$1,000 - \$1,999 .....	\$100	\$1,000,000 - \$4,999,999 ....	\$100,000
\$2,000 - \$4,999 .....	\$200	\$5,000,000 - \$9,999,999 ....	\$250,000
\$5,000 - \$9,999 .....	\$500	>= \$10,000,000 .....	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature\* Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the “Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer.

# Terms and Conditions of Auction

With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

## **Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

## **Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

## **Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

## **Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer {which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

## **Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

## **State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/ Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

# Terms and Conditions of Auction

## Additional Terms & Conditions:

### COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658; <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reclassified to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

## Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016
